Undergraduate Academic Catalogue
Bulletin 76

The University of North Carolina Wilmington undergraduate catalogue is a valuable resource intended for use by prospective and currently enrolled students, faculty, advisors and staff. The catalogue provides information regarding the University's curriculum, academic policies and regulations, degree program requirements and course offerings. In addition, information about admission procedures, financial aid, university

facilities and resources, student life, and a Faculty Directory are also included. Enrolled students are strongly encouraged to use the catalogue in addition to consulting with their advisors when planning their academic programs. The catalogues are updated and published annually each summer for the upcoming academic year, which begins in the Fall.

Commitment to Equal Opportunity

The University of North Carolina at Wilmington is committed to and will provide equality of educational and employment opportunity for all persons regardless of race, sex, sexual orientation, gender identity or expression, marital status, pregnancy, age (40 or older), color, national origin, ethnicity, religion, sexual orientation, political affiliation, National Guard or veteran status, military service member status, genetic information, disability or relationship to other university constituents – except where sex, age, or ability represent bona fide educational or occupational qualifications or where marital status is a statutorily

established eligibility criterion for State funded employee benefit programs.

About the University

History of The University of North Carolina System

In North Carolina, all the public educational institutions that grant baccalaureate degrees are part of the University of North Carolina. The University of North Carolina Wilmington is one of the 17 constituent institutions of the multi-campus state university. The University of North Carolina, chartered by the N.C. General Assembly in 1789, was the first public university in the United States to open its doors and the only one to graduate students in the eighteenth century. The first class was admitted in Chapel Hill in 1795. For the next 136 years the only campus of the University of North Carolina was at Chapel Hill.

In 1877 the N.C. General Assembly began sponsoring additional institutions of higher education, diverse in origin and purpose. Five were historically black institutions, and another was founded to educate American Indians. Several were created to prepare teachers for the public schools. Others had a technological emphasis. One is a training school for performing artists.

In 1931 the N.C. General Assembly redefined the University of North Carolina to include three state-supported institutions: the campus at Chapel Hill (now the University of North Carolina at Chapel Hill), North Carolina State College (now North Carolina State University at Raleigh), and Woman's College (now the University of North Carolina at Greensboro). The new multi-campus university operated with one board of trustees and one president. By 1969 three additional campuses had joined the university through legislative action: the University of North Carolina at Charlotte, the University of North Carolina at Asheville, and the University of North Carolina at Wilmington.

In 1971 the General Assembly passed legislation bringing into the University of North Carolina the state's ten remaining public senior institutions, each of which had until then been legally separate: Appalachian State University, East Carolina University, Elizabeth City State University, Fayetteville State University, North Carolina Agricultural and Technical State University, North Carolina Central

University, the North Carolina School of the Arts, Pembroke State University, Western Carolina University, and Winston-Salem State University. In 1985 the North Carolina School of Science and Mathematics, a residential high school for gifted students, was declared an affiliated school of the university; in July 2007 NCSSM by legislative action became a constituent institution of the University of North Carolina. In 1996 Pembroke State University was renamed the University of North Carolina at Pembroke, and in 2008 the North Carolina School of the Arts was renamed the University of North Carolina School of the Arts, both through legislative action.

The UNC Board of Governors is the policy-making body legally charged with "the general determination, control, supervision, management, and governance of all affairs of the constituent institutions." It elects the president, who administers the university. The 32 voting members of the Board of Governors are elected by the General Assembly for four-year terms. Former board chairmen and board members who are former governors of North Carolina may continue to serve for limited periods as non-voting members emeriti. The president of the UNC Association of Student Governments, or that student's designee, is also a non-voting member. Each of the 17 constituent institutions is headed by a chancellor, who is chosen by the Board of Governors on the president's nomination and is responsible to the president. Each institution has a board of trustees, consisting of eight members elected by the Board of Governors, four appointed by the governor, and the president of the student body, who serves ex-officio. (The University of North Carolina School of the Arts has two additional ex-officio members and the North Carolina School of Science and Mathematics Board of Trustees has 27 members.) Each board of trustees holds extensive powers over academic and other operations of its institution on delegation from the Board of Governors.

History and Background of the University of North Carolina Wilmington

Education on the college level first came to Wilmington in 1946 when a college center was established under the direction of the North Carolina College Conference and under the administration of the Directorate of Extension of the University of North Carolina at Chapel Hill. The center offered courses on the freshman level to some 250 students during the academic year 1946-47. In 1947 a tax levy was approved by the citizens of New Hanover County, and Wilmington College was brought into existence as a county institution under the control of the New Hanover County Board of Education. In 1948 Wilmington College was officially accredited by the North Carolina College Conference and became a member of the American Association of Junior Colleges. In 1952 the institution was accredited as a junior college by the Southern Association of Colleges and Schools.

In 1958 New Hanover County voted to place the college under the Community College Act of the State of North Carolina. By virtue of this vote, the college became a part of the state system of higher education, and control passed from the New Hanover County Board of Education to a board of 12 trustees, eight of whom were appointed locally and four of whom were appointed by the governor of the state. At the same time the requirements for admission and graduation and the general academic standards of the college came under the supervision of the North Carolina Board of Higher Education, and the college began to receive an appropriation from the state for operating expenses in addition to the local tax.

On July 1, 1963, by an act of the General Assembly of North Carolina, Wilmington College became a senior college with a four-year curriculum, authorized to offer the bachelor's degree.

By vote of the Board of Trustees of the University of North Carolina in late 1968, with subsequent approval by the North Carolina Board of Higher Education and by an act of the General Assembly of North Carolina in 1969, Wilmington College became, on July 1, 1969, the University of North Carolina at Wilmington. It, and the institution in Asheville previously designated as Asheville-Biltmore College, became the fifth and sixth campuses of the University of North Carolina.

On October 30, 1971 the General Assembly in special session merged, without changing their names, the remaining 10 state-supported senior institutions into the university. Thus, the University of North Carolina comprised 16 institutions.

On August 22, 1977 the Board of Governors of the University of North Carolina

authorized the University of North Carolina at Wilmington to offer its first graduate programs at the master's level.
In the spring of 1985 the Board of Governors of the University of North Carolina elevated the University of North Carolina at Wilmington to a Comprehensive Level I University.
The programs offered by the university include four-year programs leading to the Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science and Bachelor of Social Work degrees within the College of Arts and Sciences, the Cameron School of Business, the Watson College of Education, and the College of Health and Human Services; graduate programs leading to the Master of Arts, Master of Arts in Teaching, Master of Business Administration, Master of Education, Master of Fine Arts in creative writing, Master of Public Administration, Master of School Administration, Master of Science, Master of Science in Accountancy, Master of Science in Nursing, and Master of Social Work; a Ph.D. in psychology, a Ph.D. in marine biology, a Doctor of Nursing Practice, an Ed.D. in educational leadership; several post baccalaureate and post master's certificate programs, a variety of pre-professional programs, and special programs in a variety of areas, including marine science research and continuing education.

The University of North Carolina Wilmington Mission Statement

The University of North Carolina Wilmington, the state's coastal university, integrates teaching and mentoring with research and service. UNCW's commitment to student engagement, creative inquiry, critical thinking, thoughtful expression, and civic responsibility defines the student experience. UNCW offers undergraduate, master's, and doctoral programs in areas of expertise that serve the needs of the state, as well as our local and global communities.

Board of Trustee Members:

Mr. Skyler Stein, President of Student Government Association

The Community of Scholars at UNCW is a network of collaborative resources aimed at enhancing the pursuit of the life of the mind. Its mission is to:

- support academic innovation and educational initiatives within the university community,
- provide resources for faculty development in teaching, research, and service,
- support the participation of the wider university community in the intellectual endeavor,
- represent in action and form the basic values of the life of the mind, and
- facilitate communication among all university departments, offices, and divisions.

The university seeks to attract and maintain a faculty of outstanding individuals who are capable of contributing to the enrichment of its diverse and comprehensive instructional and research programs. Its faculty members come from all geographic sections of the United States and several foreign countries, bringing to this campus a rich variety of educational experiences, training and scholarship. Of the more than 960 instructional and research faculty, more than 86 percent of full-time faculty hold doctoral or other terminal degrees.

Additional information on each of these awards can be found online at UNCW

Faculty Excellence Awards.

Board of Governors Award for Excellence in Teaching

As part of its ongoing efforts to underscore the importance of teaching and to encourage, identify, recognize, reward, and support good teaching within the university, the Board of Governors in 1993 created the annual system-wide teaching awards which are designated Board of Governors Awards for Excellence in Teaching. Seventeen awards are given annually, with one recipient selected from each of the constituent institutions. The first awards were given in the 1994-95 academic year.

Board of Trustees Teaching Excellence Award

The Board of Trustees of the University of North Carolina Wilmington, in recognition of this institution's commitment to teaching excellence, has established the Board of Trustees Teaching Excellence Award. Recipients of the award manifest excellence as a way of life and stand out among the faculty as persons who have made and continue to make a significant contribution to higher education through their dedication and service to students. The award carries with it both an honor and a responsibility: it identifies a member of the faculty as a person of excellence, and it calls upon the person so honored to share that excellence with colleagues and students.

Chancellor's Teaching Excellence Award

The Chancellor's Teaching Excellence Award recognizes all aspects of excellence

in teaching and in teaching-related activities that foster students' desire for lifetime learning and success. There shall be five Chancellor's Teaching Excellence Awards consisting of one for the Cameron School of Business, one for the College of Health and Human Services, one for the College of Humanities, Social Sciences, and the Arts, one for the College of Science and Engineering, and one for the Watson College of Education.

Distinguished Faculty Scholar Award

The Distinguished Faculty Scholar Award is designed to underscore this institution's continuing commitment to scholarship and creative work. Recipients of the award stand out among the faculty as persons who have made, and continue to make, a significant contribution to the university and the academic community through their commitment to scholarship, research and creativity. Up to two awards are given annually.

Distinguished Scholarly Engagement and Public Service Award

The Distinguished Scholarly Engagement and Public Service Award recognizes excellence in addressing crucial local, regional, national, or global issues through scholarly activity directed towards persons and groups outside UNCW. The university confers one rising and one senior award each year. The recipient of the senior award is the UNCW nominee for the Board of Governors Award for Excellence in Public Service.

Distinguished Teaching Professorship Award

The Distinguished Teaching Professorship Awards exemplify UNCW's commitment to excellence in teaching and in teaching-related activities by recognizing faculty members who have made a profound contribution to higher education through their dedication and service to students. Up to three awards are given each year.

Excellence in eLearning Award

The annual Excellence in eLearning Award recognizes faculty members for outstanding online and/or web-enhanced course design and delivery. Interested faculty apply for the award, and the recipient is chosen by a group of faculty course reviewers and the Office of Distance Education and eLearning.

Graduate Mentor Award

The Graduate Mentor Award recognizes members of UNCW's graduate faculty who have excelled at teaching at the graduate level and who have an established record of mentoring graduate students. The latter includes not only guiding the research activity of students during their tenure at UNCW but also helping students become established as independent scholars and professionals.

- https://www.uncw.edu/outreach/
UNCW is engaged with Southeastern North Carolina through innovative programs of lifelong and professional learning, applied research, and service that result in measurable improvements in our region's social and economic condition. We advocate for and support sustained, issue-specific partnerships between faculty, staff, and students and regional business, nonprofit, and government organizations, we support academically-based programs that enrich the lives of the youth and adults living in Southeastern North Carolina. Opportunities for student participation

exist in the following areas;

Conference and Event Management

Conference Services and Event Services provides comprehensive logistical and administrative services including on-campus facilities, lodging, food and registration for both internal and external organizations hosting conferences at UNCW.

Professional and Organizational Development

Professional and Organizational Development offers working professionals an opportunity to further develop their skills and/or provides an opportunity for career exploration by delivering on-site and online training. Visit https://www.uncw.edu/professional-ed

Osher Lifelong Learning Institute at UNCW (OLLI)

Osher Lifelong Learning Institute at UNCW (OLLI) refers to an individual's ongoing commitment to education and includes non-credit activities for personal enrichment, including short courses related to academic studies, such as history, art and languages, as well as activities such as lunch and dinner speaker series, public forums, special issues presentations and international travel. Other lifelong learning opportunities include the Adult Scholars Leadership Program, which brings accomplished members of the 55+ community together to discuss regional issues. Each semester the divisional publication, Pathways, catalogues current lifelong learning opportunities at UNCW. Visit https://www.uncw.edu/olli to learn more.

Scholarly Community Engagement

Scholarly Community Engagement facilitates interdisciplinary teams composed of faculty/student researchers and community organizations, conducting meaningful long-term applied research projects addressing local issues. Engaging the community in scholarly research, faculty and students affect the quality of life of individuals and communities in our region. Students participate in community-based research through internships, directed independent study and faculty-led research projects.

Storytelling in the Community

University students may enroll in [[permalink=1273|tooltip:{'title':1}]] %prefix% %code% %title%[[/permalink]], a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

Media Production

Media Production, formerly UNCW-TV, highlights the intellectual diversity of the university by creating educational programming derived from the academic departments of UNCW and delivered by UNCW-TV, through a variety of media. Also, Media Production serves the university through its Creative Services television production, such as broadcasting events like UNCW Commencement, a variety of award ceremonies, candidates forums, community based television

programming and award winning documentaries.

Youth Programs

Begin your journey to higher education by participating in one of UNCW's outstanding programs for youth of all ages. We offer summer academic enrichment opportunities, school year standards-based programs, and community outreach events that engage youth in experiential education, service learning and leadership development. Visit https://www.uncw.edu/youth/

-

The Center for the Support of Undergraduate Research and Fellowships

https://uncw.edu/myuncw/research/student/undergrad-research/
The Center for the Support of Undergraduate Research and Fellowships (CSURF) is a central resource for students, faculty, and staff dedicated to coordinating opportunities and information related to undergraduate research and creative activity. CSURF additionally coordinates the application and nomination process for competitive national scholarships and fellowships for undergraduates. The Center is housed in the Office of High Impact Practices.

Office of High Impact Practices

https://uncw.edu/myuncw/academics/beyond-the-classroom/applied-learning/
The Office of High Impact Practices provides support for faculty, staff, students, and

community partners to effectively develop, implement, and assess a range of applied learning and high impact practices (HIPs). The Office of HIPs has built on the successes of ETEAL (Experiencing Transformative Education through Applied Learning), which served as the Quality Enhancement Plan (QEP) for UNCW from 2013-2018.

The Center for Teaching Excellence

https://www.uncw.edu/cte
The Center for Teaching Excellence (CTE) provides workshops on a variety of teaching issues, encourages innovations in teaching through awarding stipends for course development, and supports continued education in the scholarship of teaching by subsidizing travel to teaching conferences. Its mission is to foster a campus-wide climate where teaching is highly valued, as well as provide leadership in the application of scholarship to teaching. CTE encourages efforts to achieve excellence in teaching by running programs for course development and improvement, implementing new instructional technologies, and providing support services. CTE also conducts orientations for new faculty and works to integrate them into the university community.

The Center for Faculty Leadership

https://uncw.edu/myuncw/academics/cfl
The Center for Faculty Leadership (CFL) is dedicated to developing and sustaining the high quality of academic leadership central to supporting the mission of the university and achieving the goals outlined in its strategic plan. The center serves as a resource for individuals with aspirations for academic leadership; as a training center for newly appointed department chairs, division coordinators, and program

directors; and as a retooling center for current, mid-level academic leaders interested in improving the quality of their academic programs and/or advancing their professional careers in university administration. Information and assistance emphasize exploration, experimentation, and networking with programs presented in a variety of formats: informal discussions, formal workshops, guest lectures, conferences, networking and alliance building, mentoring and shadowing. The center's mission encourages collaborative initiatives by the faculty. Thus, the center also serves as a resource for faculty-generated initiatives that require institutional support beyond the departmental or program level.

The Office of Distance Education and eLearning

https://www.uncw.edu/oel
The Office of Distance Education and eLearning, a unit of the Academic Affairs division, provides support to faculty through individualized instruction and assistance in a variety of formats. Resources are allocated to support the development of online courses using the most current, pedagogically sound and dynamic learning strategies. Working collaboratively with Information Technology Systems, the office sponsors workshops and initiatives which focus on helping faculty design quality online courses and on increasing faculty expertise in employing cutting-edge instructional technology.

Gender Studies Resource Center

https://www.uncw.edu/gsrc
The Gender Studies and Resource Center is an interdisciplinary and intersectional community of students, scholars, and advocates committed to social justice and equity for marginalized peoples. Our intellectual framework stems from gender and

sexuality studies. The Center works with campus, local, and wider community partners through online teaching, research support, programming, and service activities that further social justice and work to combat social inequality at every level. In addition, we offer professional workshops and leadership opportunities for students, staff, faculty, and community members as we strive for solutions to address gender-based discrimination and develop inclusive communities at UNCW and across the globe. The Center also provides physical space for gathering, resources, and referrals for the UNCW and Wilmington communities.

The UNCW undergraduate catalogue includes a calendar for the current academic year and a tentative calendar for the following year. All calendars are subject to change and will be updated online as necessary. The 2025-2026 calendar will not be official until published in the 2025-2026 online catalogue. Please refer to the links provided at the beginning of each calendar for specific information related to registration, orientation, housing and student accounts.

University Calendar 2025-2026

Academic Year Begin-End: Monday, August 11, 2025 - Monday, May 11, 2026

Fall 2025

Registration dates - Please refer to the Registrar's Important Dates and Deadlines.
New student orientation - Please refer to Transition Programs at www.uncw.edu/orientation.
Housing and Residence Life - Please refer to https://uncw.edu/housing/.
Student Accounts - Please refer to Billing Schedules & Due Dates website.
All Online Accelerated Programs, 7-Week Courses follow *this calendar.*
Every course offered for academic credit during summer sessions adheres to the

*standard of a minimum of **750** scheduled minutes of instructional time or the equivalent **per credit hour** (taken from UNC Policy Manual Chapter 400.1.6). For example; a three credit course requires a minimum of **2250** instructional minutes excluding breaks and including final exam time. Summer sessions consist of 17 class days (125 minutes per class) plus an additional day for exams which will equal **2250** minutes for a three credit course.*

Spring 2026

Registration dates - Please refer to the Registrar's Important Dates and Deadlines.
New student orientation - Please refer to Transition Programs at www.uncw.edu/orientation.
Housing and Residence Life - Please refer to https://uncw.edu/housing/.
Student Accounts - Please refer to Billing Schedules & Due Dates website.
All Online Accelerated Programs, 7-Week Courses follow *this calendar.*
*Every course offered for academic credit during fall and spring semesters adheres to the standard of a minimum of **750** scheduled minutes of instructional time or the equivalent **per credit hour** (taken from UNC Policy Manual Chapter 400.1.6) for example; a three credit course requires a minimum of **2250** instructional minutes excluding breaks and including final exam time.*

Summer 2026

Registration dates - Please refer to the Registrar's Important Dates and Deadlines.
New student orientation - Please refer to Transition Programs at www.uncw.edu/orientation.
Housing and Residence Life - Please refer to https://uncw.edu/housing/.
Student Accounts - Please refer to Billing Schedules & Due Dates website.

About the University of North Carolina Wilmington

History and Background of the University of North Carolina Wilmington

Education on the college level first came to Wilmington in 1946 when a college center was established under the direction of the North Carolina College Conference and under the administration of the Directorate of Extension of the University of North Carolina at Chapel Hill. The center offered courses on the freshman level to some 250 students during the academic year 1946-47. In 1947 a tax levy was approved by the citizens of New Hanover County, and Wilmington College was brought into existence as a county institution under the control of the New Hanover County Board of Education. In 1948 Wilmington College was officially accredited by the North Carolina College Conference and became a member of the American Association of Junior Colleges. In 1952 the institution was accredited as a junior college by the Southern Association of Colleges and Schools.

In 1958 New Hanover County voted to place the college under the Community College Act of the State of North Carolina. By virtue of this vote, the college became a part of the state system of higher education, and control passed from the New Hanover County Board of Education to a board of 12 trustees, eight of whom were appointed locally and four of whom were appointed by the governor of the state. At the same time the requirements for admission and graduation and the general academic standards of the college came under the supervision of the North Carolina Board of Higher Education, and the college began to receive an appropriation from the state for operating expenses in addition to the local tax.

On July 1, 1963, by an act of the General Assembly of North Carolina, Wilmington College became a senior college with a four-year curriculum, authorized to offer the bachelor's degree.

By vote of the Board of Trustees of the University of North Carolina in late 1968, with subsequent approval by the North Carolina Board of Higher Education and by an act of the General Assembly of North Carolina in 1969, Wilmington College became, on July 1, 1969, the University of North Carolina at Wilmington. It, and the

institution in Asheville previously designated as Asheville-Biltmore College, became the fifth and sixth campuses of the University of North Carolina.
On October 30, 1971 the General Assembly in special session merged, without changing their names, the remaining 10 state-supported senior institutions into the university. Thus, the University of North Carolina comprised 16 institutions.
On August 22, 1977 the Board of Governors of the University of North Carolina authorized the University of North Carolina at Wilmington to offer its first graduate programs at the master's level.
In the spring of 1985 the Board of Governors of the University of North Carolina elevated the University of North Carolina at Wilmington to a Comprehensive Level I University.
The programs offered by the university include four-year programs leading to the Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science and Bachelor of Social Work degrees within the College of Arts and Sciences, the Cameron School of Business, the Watson College of Education, and the College of Health and Human Services; graduate programs leading to the Master of Arts, Master of Arts in Teaching, Master of Business Administration, Master of Education, Master of Fine Arts in creative writing, Master of Public Administration, Master of School Administration, Master of Science, Master of Science in Accountancy, Master of Science in Nursing, and Master of Social Work; a Ph.D. in psychology, a Ph.D. in marine biology, a Doctor of Nursing Practice, an Ed.D. in educational leadership; several post baccalaureate and post master's certificate programs, a variety of pre-professional programs, and special programs in a variety of areas, including marine science research and continuing education.

The University of North Carolina Wilmington Mission Statement

The University of North Carolina Wilmington, the state's coastal university, integrates teaching and mentoring with research and service. UNCW's commitment to student engagement, creative inquiry, critical thinking, thoughtful expression, and civic responsibility defines the student experience. UNCW offers undergraduate, master's, and doctoral programs in areas of expertise that serve the needs of the state, as well as our local and global communities.

About the University of North Carolina System

History of The University of North Carolina System

In North Carolina, all the public educational institutions that grant baccalaureate degrees are part of the University of North Carolina. The University of North Carolina Wilmington is one of the 17 constituent institutions of the multi-campus state university. The University of North Carolina, chartered by the N.C. General Assembly in 1789, was the first public university in the United States to open its doors and the only one to graduate students in the eighteenth century. The first class was admitted in Chapel Hill in 1795. For the next 136 years the only campus of the University of North Carolina was at Chapel Hill.

In 1877 the N.C. General Assembly began sponsoring additional institutions of higher education, diverse in origin and purpose. Five were historically black institutions, and another was founded to educate American Indians. Several were created to prepare teachers for the public schools. Others had a technological emphasis. One is a training school for performing artists.

In 1931 the N.C. General Assembly redefined the University of North Carolina to include three state-supported institutions: the campus at Chapel Hill (now the University of North Carolina at Chapel Hill), North Carolina State College (now North Carolina State University at Raleigh), and Woman's College (now the University of North Carolina at Greensboro). The new multi-campus university operated with one board of trustees and one president. By 1969 three additional campuses had joined the university through legislative action: the University of North Carolina at Charlotte, the University of North Carolina at Asheville, and the University of North Carolina at Wilmington.

In 1971 the General Assembly passed legislation bringing into the University of North Carolina the state's ten remaining public senior institutions, each of which had until then been legally separate: Appalachian State University, East Carolina University, Elizabeth City State University, Fayetteville State University, North Carolina Agricultural and Technical State University, North Carolina Central University, the North Carolina School of the Arts, Pembroke State University, Western Carolina University, and Winston-Salem State University. In 1985 the North Carolina School of Science and Mathematics, a residential high school for gifted

students, was declared an affiliated school of the university; in July 2007 NCSSM by legislative action became a constituent institution of the University of North Carolina. In 1996 Pembroke State University was renamed the University of North Carolina at Pembroke, and in 2008 the North Carolina School of the Arts was renamed the University of North Carolina School of the Arts, both through legislative action.
The UNC Board of Governors is the policy-making body legally charged with "the general determination, control, supervision, management, and governance of all affairs of the constituent institutions." It elects the president, who administers the university. The 32 voting members of the Board of Governors are elected by the General Assembly for four-year terms. Former board chairmen and board members who are former governors of North Carolina may continue to serve for limited periods as non-voting members emeriti. The president of the UNC Association of Student Governments, or that student's designee, is also a non-voting member.
Each of the 17 constituent institutions is headed by a chancellor, who is chosen by the Board of Governors on the president's nomination and is responsible to the president. Each institution has a board of trustees, consisting of eight members elected by the Board of Governors, four appointed by the governor, and the president of the student body, who serves ex-officio. (The University of North Carolina School of the Arts has two additional ex-officio members and the North Carolina School of Science and Mathematics Board of Trustees has 27 members.) Each board of trustees holds extensive powers over academic and other operations of its institution on delegation from the Board of Governors.

University of North Carolina System Office Officers

Click this Link to be redirected to the UNC System Website
President Peter Hans — *President of the University*
Ms. Norma Houston — *Chief of Staff*
Mr. Michael Vollmer — *Chief Operating Officer*
Mr. David J. English — *Senior Vice President for Academic Affairs and Chief Academic Officer*
Ms. Jennifer Haygood — *Senior Vice President and Chief Financial Officer*
Dr. Andrew P. Kelly — *Senior Vice President for Strategy and Policy*
Mr. Andrew Tripp — *Senior Vice President for Legal Affairs & General Counsel*
Mr. Bart Goodson — *Senior Vice President of Government Relations*
Mr. Thomas Walker — *Senior Advisor for Economic Development and Military*

Affairs
Mr. Darryl Bass — *Vice President for Human Resources*
Ms. Andrea Poole — *Executive Director, North Carolina State Education Assistance Authority*

Board of Governors - The University of North Carolina System

Emeritus Members

W. Louis Bissette, Jr.

Administrative Officers of the University of North Carolina Wilmington

Aswani K. Volety, Ph.D. — *Chancellor*
Michael Wilhelm, Ed.D. — *Chief of Staff*

Kelly Mintern, C.P.A., C.I.A. — *Chief Audit Executive*

Michael Oblinger, M.S.A. — *Director of Athletics*

Lori Preiss, B.A. — *Associate Vice Chancellor Human Resources*

John P. Scherer II, J.D. *General Counsel*

Marion R. Warren, B.B.A., J.D. — *Assistant to the Chancellor & Executive Dir of Government and External Relations*

Andrea Weaver, B.A. — *Chief Marketing and Communications Office*

Academic Affairs

uncw.edu/aa

Robert T. Burrus Jr., Ph.D. — *Interim Provost and Vice Chancellor for Academic Affairs*

Matthew Rish, M.B.A. — *Associate Provost for Administration and Resource Management*

Margaret Demers – *Director, Academic Resource Administration*

Jennifer Fernandez-Villa, Ed.D. — *Interim Associate Provost for Global Partnerships and International Education*

Kara Pike Inman, Ed.D. – *Director, Education Abroad*

Kateryna Forynna, M.A.– *Director, English Language Center*

Jennifer Fernandez-Villa, Ed.D. – *Director, Office of International Students and Scholars*

Christopher M. Finelli, Ph.D. — *Associate Provost for Graduate, Continuing, and Lifelong Education; Dean, Graduate School*

Mitch Bloomer, Ph.D. — *Director, Office of Continuing and Professional Education*

Amy W. Keith, MALS — *Director, Osher Lifelong Learning Institute*

Andrew Mauk, Ph.D. — *Associate Provost for Institutional Research and Planning*

Kimberly D. Miller, D.M.—*Director, Institutional Effectiveness*

Michael Smith, Ed.D.— *Director, Institutional Research and Analytics*

Sujit D. Chemburkar, M.S. - *Director, Space Planning and Management*

Stuart Borrett, Ph.D. — *Associate Provost for Research and Innovation*

Heather McWhorter, M.S. — *Director, Center for Innovation and Entrepreneurship (CIE)*

Chris Prentice, Ph.D. — *Director, Center for Social Impact*

Karl Ricanek, Ph.D. — *Director, Institute for Interdisciplinary Identity Sciences (I3S)*

Justin Streuli, M.B.A. — *Director, Office of Innovation and Commercialization (OIC)*

Sarah Daniels, M.P.A. — *Director, Quality Enhancement for Non-Profits (QENO)*

Kirsten Wisneski, M.A. — *Director, Research Development Office*

George Cox, M.A. — *Director, Research Integrity Office*

Tamara Hatch, M.B.A. — *Director, Sponsored Programs and Research (SPARC)*

Cynthia Demetriou, Ph.D. *Associate Provost for Student Engagement, Enrollment and Retention*

Christine Pesetski, Ph.D. — *Assistant Provost Center for Academic Advising*

Lauren Franklin, Ed.D. —*Director, Office of Admissions*

Bill Kawczynski, B.A. — *Director, Office of Military Affairs*

Frederick Holding, M.S. — *Director, Office of Scholarships and Financial Aid*

Amanda Fleming, M.B.A. — *University Registrar*

Stefanie Norris, Ed.D.— *Director, Strategic Enrollment Initiatives and Transfer Pathways*

Shannon Pease, Ed.D. — *Director, Student-Athlete Support Services*

Kyle Verbosh, Ph.D. — *Director, Student Success Data and Research*

DiAnna Washington, Ph.D. — *Director, Student Success and Retention*

Edelmira I. Segovia, Ed.D. — *Director, College Access and Precollege Programs*

Lucy Holman, D.C.D. — *Associate Provost for Teaching, Learning and Library Services; Dean, UNCW Library*

Jacquelyn Lee, Ph.D.— *Director, Center for Teaching Excellence*

Jeremy Dickerson, Ed.D. — *Assistant Provost Distance Education and eLearning*

Carol McNulty, Ph.D. — *Associate Provost for Undergraduate Education and Faculty Affairs*

Suzanna Lopez-Legentil, Ph.D. — *Director, Faculty Development*

Susan Catapano, Ed.D. — *Director, Faculty Administration*

Jeanne Persuit, Ph.D. — *Director of High Impact Practices*

Eva Mehl, Ph.D. — *Director, Honors College*

Donald Bushman, Ph.D. — *Director, University Studies*

Richard Mautz, Jr, Ph.D. — *Dean, Cameron School of Business*

Stephanie B. Caulder, Ph.D. — *Dean, College of Humanities, Social Sciences, and the Arts*

Ronald J. Vetter, Ph.D. — *Dean, College of Science and Engineering*

Jack C. Watson II, Ph.D. — *Dean, College of Health and Human Services*

Tracy Linderholm, Ph.D. — *Dean, Watson College of Education*

Ken Halanych, Ph.D. — *Executive Director, Center for Marine Science*

Business Affairs

Miles Lackey, M.B.A., M.P.A. — *Vice Chancellor for Business Affairs*
Gino Galutera, M.B.A. — *Associate Vice Chancellor for Business Services*
Mark D. Morgan, B.S. — *Associate Vice Chancellor for Facilities*
Jennifer Leung, M.B.A. — *Associate Vice Chancellor for Finance*
Sharon B. Baucom, A.A.S. — *Director of Facilities Administration*
Frank Brinkley, M.B.A. — *Chief of University Police*
John L. Robinson, M.S. — *Director of Purchasing Services*
David Olson, B.S. — *Director of Physical Plant*
Mike Lloyd — *Director of Campus Support Services*
Jeff Campbell, M.S. — *Director of Environmental Health and Safety*
Kristy Nance, B.S., — *Director of Budget, Planning and Analysis*
Vacant. — *Director of Project Management*
Kelli Jordan — *Director of Architectural and Construction Services*
Steve Sharpe, B.S. — *Energy Manager*
Ariel Dunlap Cosimo, M.S. — *Director of Resource Management for Business Affairs*
Laura Gore, B.S. — *Director of Student Accounts and University Cashier*
Heather Iannucci, M.B.A. — *Controller*
Roberta LaSure, B.S. — *Director of Associated Entities, Endowment & Real Estate*
Sharyne A. Miller, Ed.D — *Associate Vice Chancellor for ITS and Chief Information Officer*
Patricia L. Thompson, M.P.A. — *Director of IT Resource Management Services*
Nicole West, B.S. *Director of Enterprise Systems Support*
Parker Moran, M.S.C.S. — *Director of Network, Operations and Research*
Jarrett Piner, B.S.C.S., B.F.A., M.A.L.S. – *Senior Director of Enterprise Project Management and Client Experience*
Aaron Culler, M.S. – *Chief Information Security Officer*

Student Affairs

Christine Reed Davis, Ed.D. — *Vice Chancellor for Student Affairs*
Michael A. Walker, Ed.D. — *Associate Vice Chancellor and Dean of Students*
Brian J. Victor, Ph.D. — *Associate Vice Chancellor for Student Affairs*
Myra Blow, — *Executive Director of Resource Administration*
Jen A. August, M.A. — *Director of CARE*

Kevin Meaney, Ph.D. — *Director of Housing and Residence Life*
Ania Peczalska, Ph.D. — *Director of Assessment, Research and Planning*
Michele Johnson, M.Ed. — *Director of Transition Programs*
Jennie R. McNeilly, M.A. — *Senior Associate Dean of Students*
Timothy Lewis, M.S. — *Director of Campus Recreation*
Mark Perez-Lopez, Ph.D. — *Director of Counseling Center and University Testing Services*
Nadirah Pippen, LPC, NCC — *Director of Career Center*
Katherine Krieger, M.A. — *Director of Disability Resource Center*
Katrin Wesner-Harts, Ed.D. — *Director of Abrons Student Health Center and Health Promotion*
William E. Wilkinson, M.A. — *Director of University Learning Center*
Larry Wray, M.S. — *Executive Director of Campus Life*

University Advancement

Edwin T. Stuart, M.P.A. — *Vice Chancellor for University Advancement*
Melissa A. Kennedy, B.A. — *Associate Vice Chancellor*
Judith Schieck, B.A. — *Assistant Vice Chancellor for Development Operations*
Melissa Sinclair, B.S — *Assistant Vice Chancellor for Major Gifts*
Lindsay A.T. LeRoy, B.A. — *Executive Director, Alumni Association*
Jordan H. Calfee, B.S. — *Director of Advancement Events & Boards*
Leslie Holdsworth, M.A. — *Director of Development, Major Gifts, CSB*
Katie Crosby,, M.Ed. — *Director of Development, Major Gifts, CHSSA*
Dawn B. Carter, B.A. — *Director of Development, Major Gifts, WCE*
Megan P. Gorham, M.B.A. — *Director of Corporate and Foundation Engagement*
Lindsay Crighton, M.A. — *Senior Director of Development, Major Gifts, CSE*
Kelly Wilson, M.P.A. — *Director of Development, Major Gifts, CHHS*
Tim McClain, B.S. — *Director of Development, Legacy Gift Planning*
Adam Fearing, M.A. — *Associate Athletics Director for Development*
Ellie Barker, M.P.A. — *Director of Annual Giving*
Paris Roebuck, B.S. — *Development Officer for Alumni Giving*
Vacant — *Director of Advancement Communications*

Board of Trustees for the University of North Carolina Wilmington

Mr. Earl F. "Hugh" Caison II, *Chair*

The Hon. Aldona Z. Wos, M.D., *Vice Chair*

Mr. Jeffrey D. Clark, *Secretary*

Board of Trustee Members:

Ms. Traci L. Butler

Ms. Frances "Perry" Chappell

Mr. Stephen E. Griffin

Ms. Karen K. King

Dr. Yousry Sayed

Mr. Dane Scalise

Ms. Carrie B. Shields

Dr. Jimmy T. Tate

Mr. Luke Waddell

Mr. Skyler Stein, President of Student Government Association

The Community of Scholars at UNCW

The Community of Scholars at UNCW is a network of collaborative resources aimed at enhancing the pursuit of the life of the mind. Its mission is to:

- support academic innovation and educational initiatives within the university community,
- provide resources for faculty development in teaching, research, and service,
- support the participation of the wider university community in the intellectual endeavor,
- represent in action and form the basic values of the life of the mind, and
- facilitate communication among all university departments, offices, and divisions.

All resource units promoting this mission are welcome to participate in the Community of Scholars at UNCW. Collaboration of these resources is enhanced by the Community of Scholars Council which brings together on a regular basis the directors of the resource units with representatives from Academic Affairs, Student Affairs, Randall Library, Information Technology Services, Faculty Senate, University College, Honors Scholars College and Student Government. Its charge is to review the activities of the resource units and to consider strategies for enhancing the intellectual growth of our community.

The Faculty at UNCW

The university seeks to attract and maintain a faculty of outstanding individuals who

are capable of contributing to the enrichment of its diverse and comprehensive instructional and research programs. Its faculty members come from all geographic sections of the United States and several foreign countries, bringing to this campus a rich variety of educational experiences, training and scholarship. Of the more than 960 instructional and research faculty, more than 86 percent of full-time faculty hold doctoral or other terminal degrees.

Faculty Awards at UNCW

Additional information on each of these awards can be found online at UNCW Faculty Excellence Awards.

Board of Governors Award for Excellence in Teaching

As part of its ongoing efforts to underscore the importance of teaching and to encourage, identify, recognize, reward, and support good teaching within the university, the Board of Governors in 1993 created the annual system-wide teaching awards which are designated Board of Governors Awards for Excellence in Teaching. Seventeen awards are given annually, with one recipient selected from each of the constituent institutions. The first awards were given in the 1994-95 academic year.

Board of Trustees Teaching Excellence Award

The Board of Trustees of the University of North Carolina Wilmington, in recognition of this institution's commitment to teaching excellence, has established the Board of Trustees Teaching Excellence Award. Recipients of the award manifest excellence as a way of life and stand out among the faculty as persons who have made and continue to make a significant contribution to higher education through their dedication and service to students. The award carries with it both an honor and a responsibility: it identifies a member of the faculty as a person of excellence, and it calls upon the person so honored to share that excellence with colleagues and students.

Chancellor's Teaching Excellence Award

The Chancellor's Teaching Excellence Award recognizes all aspects of excellence in teaching and in teaching-related activities that foster students' desire for lifetime learning and success. There shall be five Chancellor's Teaching Excellence Awards consisting of one for the Cameron School of Business, one for the College of Health and Human Services, one for the College of Humanities, Social Sciences, and the Arts, one for the College of Science and Engineering, and one for the Watson College of Education.

Distinguished Faculty Scholar Award

The Distinguished Faculty Scholar Award is designed to underscore this institution's continuing commitment to scholarship and creative work. Recipients of the award stand out among the faculty as persons who have made, and continue to make, a significant contribution to the university and the academic community through their commitment to scholarship, research and creativity. Up to two awards are given annually.

Distinguished Scholarly Engagement and Public Service Award

The Distinguished Scholarly Engagement and Public Service Award recognizes excellence in addressing crucial local, regional, national, or global issues through scholarly activity directed towards persons and groups outside UNCW. The university confers one rising and one senior award each year. The recipient of the senior award is the UNCW nominee for the Board of Governors Award for Excellence in Public Service.

Distinguished Teaching Professorship Award

The Distinguished Teaching Professorship Awards exemplify UNCW's commitment to excellence in teaching and in teaching-related activities by recognizing faculty members who have made a profound contribution to higher education through their dedication and service to students. Up to three awards are given each year.

Excellence in eLearning Award

The annual Excellence in eLearning Award recognizes faculty members for outstanding online and/or web-enhanced course design and delivery. Interested faculty apply for the award, and the recipient is chosen by a group of faculty course reviewers and the Office of Distance Education and eLearning.

Graduate Mentor Award

The Graduate Mentor Award recognizes members of UNCW's graduate faculty who have excelled at teaching at the graduate level and who have an established record of mentoring graduate students. The latter includes not only guiding the research activity of students during their tenure at UNCW but also helping students become established as independent scholars and professionals.

Global Partnerships and International Education

https://www.uncw.edu/global/
The Office of Global Partnerships and International Education is comprised of three units: Education Abroad, English Language Center, and the Office of International Students & Scholars.

Education Abroad

UNCW offers more than 800 education abroad opportunities in more than 50 countries. Options available include coursework taken abroad, international internships for academic credit, credit-bearing service-learning experiences, academic research, and virtual global learning opportunities. UNCW provides education abroad opportunities to suit nearly every major and credit earned through international programs may be applied towards a UNCW degree. Financial aid may be used in conjunction with education abroad programs and scholarships are available. Students may select from short-term and summer programs, as well as semester, year-long and two-year dual degree options.
All applications for any credit-bearing program abroad must be made through the Office of Global Partnerships and International Education.
UNCW students who study abroad retain their active UNCW student status and will not have to re-enroll upon return.

Eligibility requirements include:

- 18 years of age at the time of participation
- Good disciplinary standing
- 2.5+ cumulative grade point average
- Sophomore+ status (select programs are open to first-year students)
- Any program-specific requirements

Further information is available at https://uncw.edu/international/abroad.

English Language Center

UNCW's English Language Center offers courses in reading, writing, speaking, and listening, to non-native speakers of English. Students receive 20 hours of instruction per week. This intensive English program emphasizes Academic preparation. UNCW's Conditional Admission policy allows students who wish to start a degree to transition smoothly into degree programs once they have completed the highest level of the ELC program successfully. The ELC Program is best suited for students who have at least a basic foundation of English.

Further information is available at: https://uncw.edu/international/elc.

Office of International Students and Scholars (OISS)

The Office of International Students & Scholars fosters globalization at UNCW by recruiting, admitting, welcoming, advising, supporting, engaging, and advocating for UNCW's community of international students and scholars. OISS builds partnerships with overseas partners to attract international students to UNCW and fosters relationships with advisers, counsellors, agents, and governmental agencies to increase the international student and scholar population on campus. OISS provides transition support that addresses the unique needs of international students and scholars; ensures institutional compliance with federal immigration regulations for foreign students, visiting scholars, and employees on our visa sponsorship (F, J, H, and LPR); coordinates events and programs that engage international students with the broader community to promote a global culture throughout our campus; and serves the broader campus community in an administrative and advisory capacity.
Further information is available at: https://uncw.edu/international/isss/

German Studies Consortium

Raymond L. Burt, *coordinator*

The German Studies Consortium links participating UNC institutions to facilitate the sharing of teaching and learning resources to enhance German Studies across The University of North Carolina system. This consortium offers a broad array of German Studies courses in the language, literature, and culture of the German-speaking countries taught by specialists in the field. The primary focus is on the sharing of upper-level German classes offered each semester on the North Carolina Information Superhighway. Participant universities include Appalachian State University, East Carolina University, North Carolina State University, the University of North Carolina at Asheville, the University of North Carolina at Charlotte, the University of North Carolina at Greensboro, University of North Carolina Wilmington, and Western Carolina University. For course details, visit the UNC Online Exchange.

Portuguese Exchange

Regina Felix, *coordinator*

The Portuguese Exhange links participating UNC institutions to facilitate the sharing of teaching and learning resources to enhance Portuguese language and Portugurese and Brazilian Studies across the University of North Carolina system. This exchange offers courses in the language, literature, and culture of the Portuguese-speaking countries taught by specialists in the field. Participant universities include Appalachian State University, North Carolina State University, the University of North Carolina Asheville, the University of North Carolina at Chapel Hill, the Unversity of North Carolina at Charlotte, the University of North Carolina Wilmington, and Winston Salem State University. For course details, visit the UNC Online Exchange.

Russian Studies Consortium

Dave Graber, *coordinator*

The Russian Studies Consortium links participating UNC institutions to facilitate the sharing of teaching and learning resources to enhance Russian Studies across The

University of North Carolina system. This consortium offers a broad array of Russian Studies courses in the language, literature, history, film, society, and culture in the Russian-speaking countries, which can be taught in the target language and/or in translation by specialists with credentials in Russian Studies. The primary goal focuses on the sharing of elementary, intermediate, and upper level Russian Studies classes offered each semester as well as summer session courses on the North Carolina Information Superhighway and/or fully online. Participant universities include Appalachian State University, East Carolina University, North Carolina State University, The University of North Carolina at Charlotte, The University of North Carolina at Greensboro, and The University of North Carolina Wilmington. Courses are offered through the UNC Online Exchange.

Scholar Resource Units

The Center for the Support of Undergraduate Research and Fellowships

https://uncw.edu/myuncw/research/student/undergrad-research/
The Center for the Support of Undergraduate Research and Fellowships (CSURF) is a central resource for students, faculty, and staff dedicated to coordinating opportunities and information related to undergraduate research and creative activity. CSURF additionally coordinates the application and nomination process for competitive national scholarships and fellowships for undergraduates. The Center is housed in the Office of High Impact Practices.

Office of High Impact Practices

https://uncw.edu/myuncw/academics/beyond-the-classroom/applied-learning/
The Office of High Impact Practices provides support for faculty, staff, students, and community partners to effectively develop, implement, and assess a range of applied learning and high impact practices (HIPs). The Office of HIPs has built on the successes of ETEAL (Experiencing Transformative Education through Applied Learning), which served as the Quality Enhancement Plan (QEP) for UNCW from 2013-2018.

The Center for Teaching Excellence

https://www.uncw.edu/cte
The Center for Teaching Excellence (CTE) provides workshops on a variety of teaching issues, encourages innovations in teaching through awarding stipends for course development, and supports continued education in the scholarship of teaching by subsidizing travel to teaching conferences. Its mission is to foster a campus-wide climate where teaching is highly valued, as well as provide leadership in the application of scholarship to teaching. CTE encourages efforts to achieve excellence in teaching by running programs for course development and improvement, implementing new instructional technologies, and providing support services. CTE also conducts orientations for new faculty and works to integrate them into the university community.

The Center for Faculty Leadership

https://uncw.edu/myuncw/academics/cfl
The Center for Faculty Leadership (CFL) is dedicated to developing and sustaining the high quality of academic leadership central to supporting the mission of the university and achieving the goals outlined in its strategic plan. The center serves as a resource for individuals with aspirations for academic leadership; as a training center for newly appointed department chairs, division coordinators, and program directors; and as a retooling center for current, mid-level academic leaders interested in improving the quality of their academic programs and/or advancing their professional careers in university administration. Information and assistance emphasize exploration, experimentation, and networking with programs presented in a variety of formats: informal discussions, formal workshops, guest lectures, conferences, networking and alliance building, mentoring and shadowing. The center's mission encourages collaborative initiatives by the faculty. Thus, the center also serves as a resource for faculty-generated initiatives that require institutional support beyond the departmental or program level.

The Office of Distance Education and eLearning

https://www.uncw.edu/oel
The Office of Distance Education and eLearning, a unit of the Academic Affairs division, provides support to faculty through individualized instruction and assistance in a variety of formats. Resources are allocated to support the development of online courses using the most current, pedagogically sound and dynamic learning strategies. Working collaboratively with Information Technology Systems, the office sponsors workshops and initiatives which focus on helping faculty design quality online courses and on increasing faculty expertise in employing cutting-edge instructional technology.

Gender Studies Resource Center

https://www.uncw.edu/gsrc
The Gender Studies and Resource Center is an interdisciplinary and intersectional community of students, scholars, and advocates committed to social justice and equity for marginalized peoples. Our intellectual framework stems from gender and sexuality studies. The Center works with campus, local, and wider community partners through online teaching, research support, programming, and service activities that further social justice and work to combat social inequality at every level. In addition, we offer professional workshops and leadership opportunities for students, staff, faculty, and community members as we strive for solutions to address gender-based discrimination and develop inclusive communities at UNCW and across the globe. The Center also provides physical space for gathering, resources, and referrals for the UNCW and Wilmington communities.

UNC Language Assembly Exchange

Raymond L. Burt, UNCW *coordinator*
The UNC Language Assembly is a cooperative of the language departments of all 17 campuses of the UNC System, and serves the UNC System and the State of North Carolina by supporting the foreign language programs at the constituent institutions and by seeking to offer a wide diversity of foreign language choices to the students at all the UNC campuses. Students are not required to pay tuition at the

other campus, since UNCW tuition applies to these courses as well. Courses are taught online or through videoconference technology. Students can directly enroll in language classes offered by campuses through the UNC Online Exchange.

University Calendar

The UNCW undergraduate catalogue includes a calendar for the current academic year and a tentative calendar for the following year. All calendars are subject to change and will be updated online as necessary. The 2025-2026 calendar will not be official until published in the 2025-2026 online catalogue. Please refer to the links provided at the beginning of each calendar for specific information related to registration, orientation, housing and student accounts.

Financial Information

•

Assistantships

Graduate teaching assistantships are available on a limited basis in the Cameron

School of Business, the Watson College of Education, the College of Health and Human Services, and the College of Humanities, Social Sciences, and the Arts. The admission application process determines the candidates for these awards. For information contact the specific department/school or the Graduate School.

Employment

The **Federal Work-Study Program** (FWS), which is federally funded, provides part-time jobs both on and off the UNCW campus or off campus with community service organizations, for students who have demonstrated financial need. Students who submit a FAFSA and answer "yes" or "don't know" when presented with the question regarding wanting federal work study to be considered. Funds are limited and are awarded based upon the date the completed FAFSA is received.

Satisfactory Academic Progress (SAP) for Financial Aid Eligibility (Graduate)

Federal regulations require that students receiving financial aid maintain satisfactory academic progress from both qualitative and quantitative measures: cumulative GPA (3.0), hours earned compared to hours attempted (50%) and maximum time limit (200% of the published length of the program). Satisfactory Academic Progress and eligibility for financial aid are determined each academic term after grades are available. For more, visit https://uncw.edu/seahawk-life/money-matters/financial-aid/applying-receiving/eligibility.

Appeals

Federal regulations allow for certain cases in which the school may waive the Satisfactory Academic Progress (SAP) standards. Specifically, if a student's failure to be in compliance with one or more areas of satisfactory academic progress is due to events beyond the student's control, such as a student's extended illness, serious illness or death in the immediate family, or other significant trauma, and if such mitigating circumstances can be appropriately documented for the specific term(s) in which the deficiency occurred, the student may appeal to the Office of Scholarships & Financial Aid (OSFA). Eligibility may be regained by appeal. *Contact the OSFA to obtain a Satisfactory Academic Progress (SAP) Appeal form*.

-

Health insurance is required for all UNCW students who meet the following three criteria:

- Enrolled in a minimum of 6 credit hours per semester for undergraduates or 1 credit hour for graduate students, and
- Enrolled in a main-campus degree-seeking program, and
- Eligible to pay the UNCW student health fee.

-

The primary mission of the Office of Scholarships & Financial Aid (OSFA) is to assist prospective and currently enrolled students and their families in securing the most suitable financial aid as the student pursues a degree or teaching certificate at UNCW. Through our outreach efforts, we support the University's mission, including the commitment to public service and the encouragement of access to college. To this end, we administer federal, state and institutional student financial aid programs in excess of $100M to assist UNCW students.

Eligibility for the majority of our programs is determined using the U.S. Department of Education's Federal Methodology.

UNCW offers assistance in the form of scholarships, grants, loans, and Federal Work-Study jobs or a combination of these programs. For most graduate students, federal student loans are the primary source of financial assistance. Students are encouraged to file the Free Application for Federal Student Aid (FAFSA) every October 1st to receive priority consideration for aid. Aid funds are disbursed to the students' account at the beginning of each semester. Aid will continue to be disbursed through the rest of the semester as student's financial aid files become

complete. Refunds for overpayments of aid are processed regularly for students who have a credit balance. In order to receive a refund, the student needs to access the Student Accounts website to set up for e-refund to ensure there is no refunding delay. Contact Student Accounts at (910) 962-4281 with any questions about refunds.

To apply for Federal or State financial aid or institutional need-based aid, degree-seeking and teacher certificate students must submit a FAFSA. Some students must submit other documentation as requested by the OSFA. To receive federally-funded financial aid, students must be making satisfactory academic progress as determined by the OSFA; be a U.S. citizen or eligible non-citizen; and meet other criteria as specified by the U.S. Department of Education including at least half-time enrollment status. Questions concerning financial aid at UNCW should be directed to the OSFA. The office is located in the Warwick Center.

Graduate Enrollment Status for Financial Aid Purposes

For financial aid purposes, the following definitions apply for determining graduate enrollment status during the academic year (fall, spring and summer semesters), but this could be assessed differently by external areas like U.S. Department of Veteran's Affairs:

*Number of credit hours in which the student is enrolled at the end of the drop/add period. Students enrolled in a master's program must be earning credit hours in a qualified program in order to be eligible for financial aid. Note: a student may also be considered full-time when enrolled for less than nine hours if one of several conditions are met. See full-time status under the Academic Regulations and Procedures section.

Graduate students must be enrolled at least half-time in graduate-level courses to qualify for most financial aid programs.

Total credit hours for all summer sessions are used to define enrollment status in summer semester for financial aid purposes.

In order to receive a refund in the first session of Summer School, graduate students must be registered for at least 4.5 hours during Summer I. If the student registers for 3 hours in each session, the refund will not be available until the first

day of class of the second session. All students, including graduate students, must be attending at least half-time prior to a refund being issued.
Classes may be held until Summer II aid is applied to your account. Students are responsible for book money and living expenses until Summer II classes start at the end of June.
Students who need summer school aid must complete a summer school application available at www.uncw.edu/finaid after March 1. In order to have summer school aid processed in time to hold classes, the application must be received no later than one week prior to the start of the session you are attending.
The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

- All new undergraduate students are required to attend an orientation program prior to the beginning of their first term. The purpose of orientation is to acquaint new students with academic requirements, campus resources, and engagement opportunities.
During main campus orientation, first-year and transfer students will work with an academic advisor, take placement tests as needed, meet their peers, learn about campus resources and register for courses. Registration for orientation is required in advance. More information about orientation can be found at https://www.uncw.edu/orientation.
All new undergraduate students enrolling in online degree programs will be required to complete an online orientation which will include modules about academics, campus and technology resources, and an overview of e-learning. Academic advising will be provided virtually. Program specific orientations may also be required. For more information, please refer to Distance Education & eLearning webpage, https://uncw.edu/myuncw/academics/deel/online-education/online-orientation
Re-enrolling students admitted to any degree program are not required to participate in orientation, as they previously completed the orientation requirement (either in person or online) at the time of their initial enrollment.

-

Room rates include: **furniture,** rent, utilities, **and** internet.
The term of this agreement is two semesters unless this agreement is expressly approved by the Director of Housing and Residence Life or his/her designee for the spring semester only. The housing rate is paid on a semester basis.
The University reserves the right to change on-campus housing rates at any time without prior notice. A non-refundable **$150 housing application fee** must be remitted with each completed housing agreement. Timely submission of the housing contract and **$150 housing fee** is highly recommended.

2025-2026 Housing Rates

If you are interested in obtaining information regarding campus housing, please contact:

Housing and Residence Life Office
University of North Carolina Wilmington
601 South College Road
Wilmington, North Carolina 28403-5959
Telephone: (910) 962-3241

-

All students living in Belk, Cornerstone, Graham, Hewlett, Innovation, Keystone, Loggerhead, Pelican, Sandpiper, Schwartz, and Terrapin are required to have a Hawk plan (Gold, Silver or Bronze). The default meal plan for these locations will be the Hawk Silver, meaning students will have the option to either upgrade their plan to the Hawk Gold or downgrade their plan to Hawk Bronze.
All students living in the University Suites are required to have at least the Block 125 meal plan. The default meal plan for these locations will be the Hawk Silver, but students will have the option to either upgrade to the Hawk Gold, or downgrade to the Hawk Bronze or Block 125.
Meal plan transactions are facilitated on **students'** UNCW One Card ID, and it must be presented at every meal. Student ID cards are not transferable. The All Access

plans allow students to treat a friend or family member by using a guest meal at Wagoner Dining Hall, the Shore Dining Hall, and Dub's Cafe, or by using their food dollars or Teal Meals. Teal Meals on the Hawk All Access plans do NOT carry over from one week to the next, and will reset every Sunday morning.

Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. Changes to meal plans can be made in MySeaport before the change period end date. For a list of current change period dates and additional details, please visit the UNCW One Card student meal plan website at www.uncw.edu/studentmealplans.*

Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Housing Meal Plans

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.

Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period.

Visit http://www.uncw.edu/studentmealplans for more information.

Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.

Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

-

Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students "earn" a percentage of the funds they are disbursed with each day of class attendance. When a student who has received federal financial aid funds (Title IV Funds) leaves school before the end of

the semester or period of enrollment, federal law requires UNCW to calculate the percentage and amount of "unearned" financial aid funds that must be returned to the federal government. This calculation may have the effect of requiring a return of funds that have already been disbursed to the student. Students are encouraged to meet with their financial aid counselor prior to making the decision to withdraw from school. Once a student has completed more than 60% of the enrollment period, students are considered to have earned all funding received. For more, visit https://uncw.edu/seahawk-life/money-matters/financial-aid.

The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

- The goal of the Office of Scholarships & Financial Aid at UNCW is to provide students and their families with information on both internal and external scholarship opportunities. Scholarships are gifts of money that do not require repayment.

  Scholarships usually recognize special achievements in academics, talent, and leadership. Some scholarships may also require that students demonstrate financial need. Financial need will be determined by submitting the FAFSA. Scholarships can come from a variety of sources. Scholarships may be awarded by the Office of Scholarships & Financial Aid, Admissions, Honors, and by each of the colleges on our campus. There are scholarships for transfer students as well as students currently enrolled at the university.

  UNCW has many scholarships that have been made available through the generous donations of alumni and friends of the university. Scholarship eligibility, criteria, and amounts may vary. Information pertaining to the scholarships available and the application process may be obtained from our University Scholarship Application located in mySeaport and directly through our Scholarship Manager Student Portal. The application opens each December 1 and closes June 1. Students may also find additional information about discipline specific scholarships by contacting the academic department of their intended major or by viewing college Web pages.
  See Also: [[permalink=4128|new:{'title':1}]][[/permalink]]

- Students must complete a FAFSA to initiate the application process and are automatically considered for all Federal Loan programs and Federal Work-Study. Students may borrow up to $20,500 in Direct Student Loans per academic year.

Federal Unsubsidized Direct Student Loans

Federal Unsubsidized Direct Student Loans are available to graduate students who file the FAFSA and otherwise are eligible. Students may borrow up to $20,500 **($33,000 for some health professions)** or the cost of attendance minus all other resources (including financial aid, tuition remissions). Interest begins accruing when the funds are disbursed to the student. Repayment begins when the student graduates or drops below half-time enrollment status. There are a variety of repayment plans. A portion of the loan may be cancelled upon completion of employment under certain terms and conditions. Students must be enrolled at least half-time to be eligible for Federal Direct student loans. More information about the terms and conditions are available at the following
link: https://studentaid.gov/understand-aid/types/loans

PLUS Loans for Graduate or Professional Students

Graduate or professional students are eligible to borrow under the Federal Graduate Direct PLUS Loan Program up to their cost of attendance minus other estimated financial assistance. The terms and conditions applicable to Parent PLUS Loans also apply to Graduate/Professional PLUS loans. These requirements include a determination that the applicant does not have an adverse credit history, repayment beginning 60 days after the last disbursement of the loan, and a fixed interest rate of 7 percent in the Federal Direct PLUS Loan program. Applicants for these loans are required to complete the FAFSA. They must have applied for their annual maximum loan eligibility under the Federal Subsidized and Unsubsidized Direct Loan Program before applying for Graduate or Professional PLUS loan. They also must complete an entrance counseling session prior to first disbursement and an exit counseling session when the student leaves school.

Master Promissory Note

To receive a Direct Loan or PLUS loan for graduate students, the student is required to complete a Master Promissory Note (MPN) with the U.S. Department of Education Direct Loan Program at https://studentaid.gov. Students may use computers in the OSFA if desired.

Entrance and Exit Counseling

Students who receive a Federal Unsubsidized or Perkins Loan must complete loan entrance counseling prior to receiving the first disbursement of a loan. Students can complete this process at https://studentaid.gov. Students may use computers in the OSFA if desired.
These students must also complete exit counseling at the same location once they graduate or if they withdraw.

Non-Federal and Alternative Loans

Non-federal loans are often referred to as alternative loans because they represent an alternative to the federal loan program, and are typically the only funding option for students in non-degree programs.
The Direct Loans and PLUS Loans generally provide more favorable terms and conditions than non-federal loans, but not always. For that reason, we encourage students and their families to compare terms and conditions of each. Eligibility for non-federal loans is determined by the lender based on credit review. UNCW certifies the loan amount, but has no influence on the credit decision. A very small percentage of students are ineligible for federal loans. The most common reason

for this ineligibility is failure to meet UNCW's satisfactory academic progress policy. Please visit **our website** for more information on these financing options.

- **The Board of Governors of the university reserves the right to change the charges for tuition, fees and the room and board rate at any time without prior notice.**

Tuition and Fees (In Effect at Time of Publication)

University of North Carolina Wilmington's tuition and fees are reviewed and approved by the Campus-Initiated Tuition Increase Committee (includes representation from the student body, faculty, and staff), the UNCW Board of Trustees, and the UNC System's Board of Governors.

Tuition and fees are assessed per credit hour for fall and spring terms up to 12 credit hours for undergraduate students (up to 9 credit hours for graduate students). Undergraduate students enrolled in 12 or more credit hours are considered full-time (9 or more for graduate students) and they are assessed the full-time rates for tuition and fees as listed below.

All programs are categorized as main campus or extension campus. Students are assessed based on the category associated with their program (main campus or extension). Students are able to view the campus code associated with their program in MySeaport - Students. Rates for tuition vary according to the student's status as a resident or non-resident of North Carolina.

All charges on the student account are due and payable per published dates on the Student Accounts website to avoid class cancellation and/or registration, transcript, and diploma holds. Online payments can be made via E-bill in MySeaport. Checks and money orders should be made payable to the University of North Carolina Wilmington and include the student's identification number.

University of North Carolina Wilmington has implemented the Fixed Tuition Program as required by North Carolina General Statute § 116-143.9. As required, in-state tuition rates at all UNC institutions will be fixed for eight consecutive semesters for all resident bachelor's degree-seeking freshmen. Eligible transfer

students will have fixed tuition rates for an appropriate number of consecutive semesters, based on the number of transfer credits transferred in from other institutions. The Fixed Tuition program only includes tuition and not fees. Fees may be increased annually. For more information, please see the Student Accounts and Cashier Office website.

Full-Time Charges per Semester for Main Campus programs (12 or more semester hours):

*See information on residency at the end of this section.

Full-Time Charges per Semester for Extension programs (12 or more credit hours)

For fixed tuition rates by cohort please see the Student Accounts and Cashier Office website.
* See information on residency at the end of this section.
** The University of North Carolina Wilmington reserves the right to make changes to tuition and fees at any time with the approval of the proper authorities. The University also reserves the right to correct any clerical errors on student accounts. Summer sessions tuition, fees, and refund policy can be found here: https://www.uncw.edu/seahawk-life/money-matters/student-accounts-cashiers-office/tuition-fees/index

Other Fees***:

***Please see Student Account's website for additional course fees.

Charge for Registration Reinstatement of Tuition and Fees

A course registration reinstatement charge will be assessed to students who fail to pay tuition and fees by published deadlines. Students who have not paid tuition and fees by the deadline are subject to cancellation of their registration. Students who have been canceled for non-payment may re-register for the exact classes canceled with a $75 registration reinstatement charge. Appeals for course reinstatement after the add/drop date may be submitted to the Dean of the student's college. Non-attendance or non-payment does not relieve a student of tuition liability. Students who do not plan to attend classes for a term must officially withdraw from the semester by contacting the Office of the Registrar.

UNCW Refund Policy – Fall and Spring Semesters

The university's refund policy complies with the requirements of the university's accrediting agency and the U.S. Department of Education. This refund policy only applies to complete term withdrawals from all courses from UNCW. Students who simply withdraw from an individual class after the drop/add period receive NO refund or reduction of tuition and fees.

Students must follow the official term withdrawal process to receive a refund under the university's policy. To officially withdraw from the university, students must withdraw online via the student portal. Any outstanding financial obligations to the university will be deducted from the amount refunded.

A student who officially withdraws from the university on or before the last day of registration (drop/add period) will receive a refund of the amount paid. Refunds are based on the effective date of the withdrawal. The Tuition/Fees Credit Schedule is posted on the Student Accounts website.

Students completing a term withdrawal will receive refunds as follows:

This refund policy applies to complete term withdrawals from UNCW. Note: Before officially withdrawing, students should check with their financial aid counselor to understand any financial aid implications.

UNCW Refund Policy - Summer Sessions

Because of the short duration of summer school sessions, summer session charges are not refundable after the drop/add period.

Residence Status for Tuition Purposes

A student's status as an in-state or out-of-state resident for tuition purposes determines the tuition rate charged for the student. A student's residency status is determined by the North Carolina Residency Determination Service (RDS) under the authority of the North Carolina State Education Assistance Authority.
Students seeking to establish or update their residency status are required to complete the process offered by RDS and to provide UNCW with the Residency Classification Number (RCN) for their status. Students who do not have an RDS determination or who do not provide their RCN default to out-of-state status. Students with an expired residency status default to out-of-state and need to renew their status through RDS.
Refer to RDS at ncresidency.org or 844-319-3640 for information on how residency is determined and completing the process.
The deadline to be changed to in-state residency status for an in-progress semester is set by the UNC System and published on the UNCW calendar. Students who receive a change in status with an RDS effective date after the UNC System deadline will have the in-state status take effect the following semester.
There are several state-authorized tuition benefits that provide the equivalent of the in-state rate to qualifying out-of-state students. Refer to RDS for information on

these benefits and how to qualify.

-

OSFA provides certification for educational benefits to veterans and/or their eligible dependents, enrolled at the University of North Carolina Wilmington. Chapter 32 (VEAP), Chapter 1606/1607 (reservists from all branches of the services, and Chapter 30 (individuals who served on active duty), Chapter 33 (Post 9-11), and transfer of Benefits (T.O.E.) veterans who feel they have an entitlement should check with their local VA Office, the Regional Office in Atlanta (1-888-GIBill1) or the VA certifying official at their local educational institution. You may also obtain information at www.gibill.va.gov.

The exception to the above is:

- A veteran who has a 20 percent or greater disability due to a service-connected cause(s) may be eligible for benefits under Chapter 31. Check with the Veterans Affairs Regional Office (1-800-827-1000).
- [[permalink=4226|new:{'title':1}]][[/permalink]]

UNCW offers voluntary meal plans for students living off campus or upperclassmen living in Voluntary On-Campus Housing, consisting of Seahawk Village, Seahawk Landing, or Seahawk Crossing. The plans are designed to give students the convenience of using their One Card instead of carrying cash.

Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. For a list of current change period dates and additional details, please visit the UNCW student meal plan website at* www.uncw.edu/studentmealplans.

Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Voluntary or Off-Campus Meal Plans

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.
Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period. Visit https://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.
Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

TealPay Payment Plan Term Enrollment Fee

Students have the option to enroll in one of UNCW's TealPay payment plans. Three options are available each Fall and Spring to pay the charges on the student's account with three, four or five installment payments during the term. The three-installment payment plan is available in the Summer. Enrollment fees are non-refundable. OAP students are not eligible for the payment plans due to the course duration.

- The UNCW One Card is the UNCW student ID and official form of identification on campus. It allows the use of campus facilities, and provides safe, easy access to student housing, campus facilities, and student labs. With a valid UNCW One Card, students can check out materials at Randall library, ride the Seahawk Shuttle WAVE transit buses at no cost, and much more, including receiving a discount at local merchants through the Seahawk Savings Program. Students also have three accounts they can utilize on the One Card: Seahawk Buck$, Bookstore Dollars, and their Meal Plan. For more information on these accounts, please visit https://www.uncw.edu/onecard.
Seahawk Buck$ is the debit account feature of the UNCW One Card. With prepaid funds, students can make purchases at all food service locations, UNCW Bookstore, vending machines, student copiers, health center, pharmacy, Seahawk

Mail, iPrint locations, iPrint Business Center, and more. Deposits may be made either online using the UNCW One Card Online Management Center online, or at the UNCW One Card Office located in Warwick Center.
Students can track UNCW One Card balances (Food Dollars, Seahawk Buck$, and Bookstore Dollars) at the UNCW One Card Online Management Center or on the smartphone/tablet App called "Transact eAccounts". For more information, visit the UNCW One Card office in the Warwick Center or https://www.uncw.edu/onecard/.

- The university currently has residence facilities for over 5,400 students consisting of traditional residence halls, suite, and apartment style buildings.
All buildings are equipped with air-conditioning, laundry facilities, and Wi-Fi. New incoming freshmen will be required to residen in university owned or managed housing for their first and second year, unless an application for exemption is approved due to maintaining a primary residence with their parents or legal guardian within Brunswick, New Hanover, or Pender County.

Assistantships and Employment

Assistantships

Graduate teaching assistantships are available on a limited basis in the Cameron School of Business, the Watson College of Education, the College of Health and Human Services, and the College of Humanities, Social Sciences, and the Arts. The admission application process determines the candidates for these awards. For information contact the specific department/school or the Graduate School.

Employment

The **Federal Work-Study Program** (FWS), which is federally funded, provides part-time jobs both on and off the UNCW campus or off campus with community service organizations, for students who have demonstrated financial need. Students who submit a FAFSA and answer "yes" or "don't know" when presented with the question regarding wanting federal work study to be considered. Funds are limited and are awarded based upon the date the completed FAFSA is received.

Satisfactory Academic Progress (SAP) for Financial Aid Eligibility (Graduate)

Federal regulations require that students receiving financial aid maintain satisfactory academic progress from both qualitative and quantitative measures: cumulative GPA (3.0), hours earned compared to hours attempted (50%) and maximum time limit (200% of the published length of the program).
Satisfactory Academic Progress and eligibility for financial aid are determined each academic term after grades are available. For more, visit https://uncw.edu/seahawk-life/money-matters/financial-aid/applying-receiving/eligibility.

Appeals

Federal regulations allow for certain cases in which the school may waive the Satisfactory Academic Progress (SAP) standards. Specifically, if a student's failure to be in compliance with one or more areas of satisfactory academic progress is due to events beyond the student's control, such as a student's extended illness, serious illness or death in the immediate family, or other significant trauma, and if such mitigating circumstances can be appropriately documented for the specific term(s) in which the deficiency occurred, the student may appeal to the Office of Scholarships & Financial Aid (OSFA). Eligibility may be regained by appeal. *Contact the OSFA to obtain a Satisfactory Academic Progress (SAP) Appeal form*.

Health Insurance

Health insurance is required for all UNCW students who meet the following three criteria:
• Enrolled in a minimum of 6 credit hours per semester for undergraduates or 1 credit hour for

graduate students, and
• Enrolled in a main-campus degree-seeking program, and
• Eligible to pay the UNCW student health fee.

Students who have their own insurance and do not want to purchase the insurance through the school must complete an on-line waiver each term, providing details about their current insurance plan. Any student who does not waive out of the insurance plan will be charged the premium and automatically enrolled in the program.

Office of Financial Aid

The primary mission of the Office of Scholarships & Financial Aid (OSFA) is to assist prospective and currently enrolled students and their families in securing the most suitable financial aid as the student pursues a degree or teaching certificate at UNCW. Through our outreach efforts, we support the University's mission, including the commitment to public service and the encouragement of access to college. To this end, we administer federal, state and institutional student financial aid programs in excess of $100M to assist UNCW students.

Eligibility for the majority of our programs is determined using the U.S. Department of Education's Federal Methodology.

UNCW offers assistance in the form of scholarships, grants, loans, and Federal Work-Study jobs or a combination of these programs. For most graduate students, federal student loans are the primary source of financial assistance. Students are encouraged to file the Free Application for Federal Student Aid (FAFSA) every October 1st to receive priority consideration for aid. Aid funds are disbursed to the students' account at the beginning of each semester. Aid will continue to be disbursed through the rest of the semester as student's financial aid files become complete. Refunds for overpayments of aid are processed regularly for students who have a credit balance. In order to receive a refund, the student needs to access the Student Accounts website to set up for e-refund to ensure there is no refunding delay. Contact Student Accounts at (910) 962-4281 with any questions about refunds.

To apply for Federal or State financial aid or institutional need-based aid, degree-seeking and teacher certificate students must submit a FAFSA. Some students must submit other documentation as requested by the OSFA. To receive federally-funded financial aid, students must be making satisfactory academic progress as

determined by the OSFA; be a U.S. citizen or eligible non-citizen; and meet other criteria as specified by the U.S. Department of Education including at least half-time enrollment status. Questions concerning financial aid at UNCW should be directed to the OSFA. The office is located in the Warwick Center.

Student Accounts & Cashier's Office: Student Acocunt Information

Graduate Enrollment Status for Financial Aid Purposes

For financial aid purposes, the following definitions apply for determining graduate enrollment status during the academic year (fall, spring and summer semesters), but this could be assessed differently by external areas like U.S. Department of Veteran's Affairs:

Enrollment Status	Graduate Level Credit Hours*
Full time	9 or more
3/4 time	6.0 - 8.5
1/2 time	4.5 - 5.5
Less than 1/2 time	0 - 4.0

*Number of credit hours in which the student is enrolled at the end of the drop/add period. Students enrolled in a master's program must be earning credit hours in a qualified program in order to be eligible for financial aid. Note: a student may also be considered full-time when enrolled for less than nine hours if one of several conditions are met. See full-time status under the Academic Regulations and Procedures section.

Graduate students must be enrolled at least half-time in graduate-level courses to qualify for most financial aid programs.

Total credit hours for all summer sessions are used to define enrollment status in summer semester for financial aid purposes.

In order to receive a refund in the first session of Summer School, graduate students must be registered for at least 4.5 hours during Summer I. If the student registers for 3 hours in each session, the refund will not be available until the first day of class of the second session. All students, including graduate students, must be attending at

least half-time prior to a refund being issued.
Classes may be held until Summer II aid is applied to your account. Students are responsible for book money and living expenses until Summer II classes start at the end of June.
Students who need summer school aid must complete a summer school application available at www.uncw.edu/finaid after March 1. In order to have summer school aid processed in time to hold classes, the application must be received no later than one week prior to the start of the session you are attending.

The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

Orientation

All new undergraduate students are required to attend an orientation program prior to the beginning of their first term. The purpose of orientation is to acquaint new students with academic requirements, campus resources, and engagement opportunities.
During main campus orientation, first-year and transfer students will work with an academic advisor, take placement tests as needed, meet their peers, learn about campus resources and register for courses. Registration for orientation is required in advance. More information about orientation can be found at https://www.uncw.edu/orientation.
All new undergraduate students enrolling in online degree programs will be required to complete an online orientation which will include modules about academics, campus and technology resources, and an overview of e-learning. Academic advising will be provided virtually. Program specific orientations may also be required. For more information, please refer to Distance Education & eLearning webpage, https://uncw.edu/myuncw/academics/deel/online-education/online-orientation
Re-enrolling students admitted to any degree program are not required to participate in orientation, as they previously completed the orientation requirement (either in person or online) at the time of their initial enrollment.

On-Campus Housing - Room Rates

Room rates include: **furniture,** rent, utilities, **and** internet.
The term of this agreement is two semesters unless this agreement is expressly approved by the Director of Housing and Residence Life or his/her designee for the spring semester only. The housing rate is paid on a semester basis.
The University reserves the right to change on-campus housing rates at any time without prior notice. A non-refundable **$150 housing application fee** must be remitted with each completed housing agreement. Timely submission of the housing contract and **$150 housing fee** is highly recommended.

2025-2026 Housing Rates

2025-2026 Housing Rates - Traditional Halls	Semester Rates	Yearly Rates
Belk, Galloway, Graham, Hewlett, and Schwartz Hall - Double	$3,697.00	$7,394.00
Cornerstone, Keystone, and Innovation House	$4,164.00	$8,328.00
Pelican and Sandpiper Halls - Double	$4,470.00	$9,480.00
Pelican and Sandpiper Halls - Single	$5,332.00	$10,664.00
University Suites - Double	$4,042.00	$8,084.00
University Suites - Single	$4,286.00	$8,572.00
Terrapin and Loggerhead Halls - Double	$4,838.00	$9,676.00
Terrapin and Loggerhead Halls - Deluxe Double	$4,988.00	$9,676.00
Terrapin and Loggerhead Halls - Single	$5,443.00	$10,886.00

2025-2026 Housing Rates - Seahawk Apartments and Leased Properties	Semester Rates	Yearly Rates
Seahawk Crossing, Landing, and Village	$5,097.00	$10,194.00
Leased Properties	$5,597.00	$11,194.00

Summer School	
Seahawk Summer (per summer school session)	$ 995.00

Wilmington, North Carolina 28403-5959
Telephone: (910) 962-3241

On-Campus Required Housing – Meal Plans

All students living in Belk, Cornerstone, Graham, Hewlett, Innovation, Keystone, Loggerhead, Pelican, Sandpiper, Schwartz, and Terrapin are required to have a Hawk plan (Gold, Silver or Bronze). The default meal plan for these locations will be the Hawk Silver, meaning students will have the option to either upgrade their plan to the Hawk Gold or downgrade their plan to Hawk Bronze.

All students living in the University Suites are required to have at least the Block 125 meal plan. The default meal plan for these locations will be the Hawk Silver, but students will have the option to either upgrade to the Hawk Gold, or downgrade to the Hawk Bronze or Block 125.

Meal plan transactions are facilitated on **students'** UNCW One Card ID, and it must be presented at every meal. Student ID cards are not transferable. The All Access plans allow students to treat a friend or family member by using a guest meal at Wagoner Dining Hall, the Shore Dining Hall, and Dub's Cafe, or by using their food dollars or Teal Meals. Teal Meals on the Hawk All Access plans do NOT carry over from one week to the next, and will reset every Sunday morning.

Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. Changes to meal plans can be made in MySeaport before the change period end date. For a list of current change period dates and additional details, please visit the UNCW One Card student meal plan website at www.uncw.edu/studentmealplans.*
Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Housing Meal Plans

Hawk Gold	This plan features 6 Teal Meals (retail) per week, $300 Food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Halland Dub's Cafe, and 5 Guest Meals	$2,789/semester (plus tax*)
Hawk Silver	This plan features 3 Teal Meals (retail) per week, $200 Food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Hall and Dub's Cafe, and 5 Guest Meals	$2,534/semester (plus tax*)
Hawk Bronze	This plan features $100 food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, and 5 Guest Meals	$2,257/semester (plus tax*)
Block 125	125 Teal Meals (retail) or All Access Meals at Wagoner Hall,The Shore Dining Hall, and Dub's Cafe, $250 Food Dollars and 5 Guest Meals per semester	$1,685/semester (plus tax*)

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.

Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period.
Visit http://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.

Contact the One Card/Meal Plans office at 910-962-3560 or
email mealplans@uncw.edu with any questions.

Policy on Return of Title IV Funds

Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students "earn" a percentage of the funds they are disbursed with each day of class attendance. When a student who has received federal financial aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal law requires UNCW to calculate the percentage and amount of "unearned" financial aid funds that must be returned to the federal government. This calculation may have the effect of requiring a return of funds that have already been disbursed to the student. Students are encouraged to meet with their financial aid counselor prior to making the decision to withdraw from school. Once a student has completed more than 60% of the enrollment period, students are considered to have earned all funding received. For more, visit https://uncw.edu/seahawk-life/money-matters/financial-aid.

The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

Scholarships and Awards

The goal of the Office of Scholarships & Financial Aid at UNCW is to provide students and their families with information on both internal and external scholarship opportunities. Scholarships are gifts of money that do not require repayment.

Scholarships usually recognize special achievements in academics, talent, and leadership. Some

scholarships may also require that students demonstrate financial need. Financial need will be determined by submitting the FAFSA. Scholarships can come from a variety of sources. Scholarships may be awarded by the Office of Scholarships & Financial Aid, Admissions, Honors, and by each of the colleges on our campus. There are scholarships for transfer students as well as students currently enrolled at the university.

UNCW has many scholarships that have been made available through the generous donations of alumni and friends of the university. Scholarship eligibility, criteria, and amounts may vary. Information pertaining to the scholarships available and the application process may be obtained from our University Scholarship Application located in mySeaport and directly through our Scholarship Manager Student Portal. The application opens each December 1 and closes June 1. Students may also find additional information about discipline specific scholarships by contacting the academic department of their intended major or by viewing college Web pages.

Student Awards

Some of the organizations listed below are registered with the university through the Campus Activities & Involvement Center as student organizations. For more information about those honor societies, please visit https://uncw.campuslabs.com/engage/organizations

A. Farrell Teague Merit Scholarship for Rising Seniors (Junior)

The Teague Scholarship was created by Arthur Farrell Teague and is used to assist rising seniors who have achieved a high level of academic and extracurricular success during their time at UNCW. Every year a recipient is chosen as the recipient of "The Teague Award." The scholarship is considered a merit scholarship and the recipient will be selected on demonstrated academic ability and special achievement, and must have a comprehensive GPA above 3.5. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Adrian D. Hurst Award

Established by Adrian D. Hurst, emeritus professor of mathematics, this award recognizes a UNCW junior or senior math major who has achieved the highest overall academic grade point average. The award is presented each spring in the form of a plaque.

Biological Sciences Achievement Award

This award was established by the faculty of the Department of Biology and Marine Biology to

honor annually the graduating senior biology major who has achieved the highest academic standing. The recipient is identified on a permanent plaque in Friday Hall.

Distinguished Engagement Award (Junior or Senior)

The Distinguished Engagement Award is presented to a select group of junior, senior, and transfer students who have made a significant contribution to UNCW over the course of their undergraduate experience. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Excellence in Engagement Award (Sophomore or Junior)

The Excellence in Engagement Award is presented to a select group sophomore, junior, and transfer students for outstanding contributions to improving the quality of student life during their time at UNCW. Recipients must currently be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Hoggard Medal For Achievement

"The Hoggard Medal" presented through the generosity of the late Dr. John T. Hoggard, is awarded annually to one graduating senior who, in the opinion of the faculty, has shown the most improvement during their years at the university. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Margaret Walthour Lippitt Scholarship

The New Student Leader Award is designed to honor a first-year student with a 3.00 GPA or higher who has demonstrated leadership potential, service to UNCW and the community, personal integrity, and significant involvement in campus organizations. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Martha M. Duncan Scholarship (Sophomore or Junior)

The Martha M. Duncan Scholarship is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The recipient serves as a "LEAD Fellow" for Student Involvement and Leadership in the department of Campus Life for their scholarship year. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Rachel Freeman Service Leadership Award

The Freeman Award, established in honor of the late Mae "Rachel" Freeman, is given to a senior with a cumulative GPA of 2.67 who has demonstrated commitment to bettering the lives of others, leading through examples of service, and the ability to work with others to create social change. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Pat Leonard Senior Medallion Award (Seniors Graduating in May or December)

The Pat Leonard Senior Medallion Award is the most prestigious award presented by the Division of Student Affairs on behalf of the university community. The award was renamed in 2021 to honor Pat Leonard, the late Vice Chancellor for Student Affairs, and her 37 years of exemplary service to UNCW. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 3.0. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award

The Duffy Student Sustainability Award is presented to one student who has been at UNCW at least one semester during the academic year. The recipient must be in good standing with the university and have a minimum 3.0 GPA. The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award was created in March of 2015 to honor the efforts of Lizzy, particularly for spearheading the proposal for The Green Initiative Fund, which brought support, resources and visibility to sustainability at UNCW. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

The Walter Schmid Physics Award

This award has been established in honor of the late Walter Schmid, engineer and inventor, to reward a senior bachelor of science physics major for excellence in physics. The award consists of an engraved plaque and a physics encyclopedia.

UNCW Laureate Award (Sophomore or Junior)

The UNCW Laureate Award, inspired by the Nobel Peace Prize, is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

William A. Bryan Senior Leader Award

Student Involvement and Leadership in the department of Campus Life, with the support of the Alumni Association, sponsors the William A. Bryan Senior Leader Award. The award is given to a

senior with a cumulative GPA of 3.00 who has demonstrated outstanding leadership on campus and/or in the community. Special emphasis is placed on integrity, creativity, ability to collaborate, and service to others. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Honor Societies at UNCW

Beta Alpha Psi

Beta Alpha Psi is a national scholastic and professional accounting fraternity. The primary objective of the fraternity is to encourage and give recognition to scholastic and professional excellence in the field of accounting. This includes promoting the study and practice of accounting; providing opportunities for self-development and association among members and practicing accountants; and encouraging a sense of ethical, social, and public responsibility.
Beta Alpha Psi was founded in 1919. The Iota Alpha chapter at UNCW was chartered in 1996 and is a registered student organization through the Campus Activities and Involvement Center.

Beta Beta Beta National Biological Honor Society

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 175,000 persons have been accepted into lifetime membership, and more than 430 chapters have been established throughout the United States and Puerto Rico. TriBeta is a registered student organization through the Campus Activities and Involvement Center.

Gamma Sigma Epsilon

Gamma Sigma Epsilon, a national honorary chemical society, was founded at Davidson College on December 19, 1919. The society recognizes academic excellence in chemistry and fosters a more comprehensive and cooperative study of chemistry and related scientific disciplines. The organization now has 35 active chapters in 22 states, and is growing rapidly. The Alpha Epsilon chapter was established at UNCW in 2001. Eligibility for membership includes junior or senior standing, a 3.35 GPA on at least 30 hours of chemistry courses, and a 3.35 GPA.

Kappa Delta Pi International Honor Society in Education

Kappa Delta Pi International Honor Society in Education is committed to recognizing excellence and fostering mutual cooperation, support, and professional growth for educational professionals.

Lambda Pi Eta Honor Society

Lambda Pi Eta is the official communication studies honor society of the National Communication Association (NCA). As a member of the Association of College Honor Societies (ACHS), LPH has over 400 active chapters at four-year colleges and universities worldwide. LPH was founded in 1985 at the University of Arkansas. LPH became a part of the National Communication Association (NCA) in 1988, and the official honor society of the NCA in July 1995. LPH is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Epsilon Economics Honor Society

Omicron Delta Epsilon was founded by Professor John R. Commons at the University of Wisconsin in 1915. Its objectives include conferring distinction for high scholastic achievement in economics and stimulating and promoting student interest in all aspects of economics. ODE is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Kappa Society, Inc.

Omicron Delta Kappa (ODK) is the National Leadership Honor Society that recognizes and encourages superior scholarship, leadership, and exemplary character. Membership in ODK is a mark of the highest distinction and honor.
The society recognizes achievements in scholarship; athletics; campus or community service; social, religious activities, and campus government; journalism, speech and mass media; and the creative and performing arts. Emphasis is placed on the development of the whole person, both as a member of the college community and as a contributor to a better society. ODK is a registered student organization through the Campus Activities and Involvement Center.

Order of Omega

Order of Omega is a leadership honor society for members of Greek-letter organizations. Order of Omega recognizes juniors and seniors who have exemplified high standards in the areas of scholarship, leadership, involvement within their respective organization, and within the Greek, campus, and local communities. Members are selected from the top 3 percent of fraternity and sorority members at each institution. To date, over 500 chapters have been chartered throughout North America, each sharing the common goal of recognizing the many outstanding student leaders at their institution.

Phi Alpha National Honor Society in Social Work

Phi Alpha is a nationally recognized honor society for both undergraduate and graduate students majoring in social work. Founded in 1960, Phi Alpha now includes over 225 chapters. The Eta

Omega Chapter of Phi Alpha was established at UNCW in 1998. The society recognizes students for excellence in scholarship and achievement in the field of social work. Eligibility for membership requires students to major in a CSEW-accredited social work program, have completed 9 semester hours of social work courses, achieved a minimum social work GPA of 3.25, and a minimum overall GPA of 3.00. Phi Alpha is registered as a student organization through the Campus Activities and Involvement Center.

Psi Chi National Honor Society in Psychology

Psi Chi is the national honor society in psychology. It was founded in 1929 in New Haven, Connecticut, to encourage, stimulate and maintain excellence in scholarship, and to advance the science of psychology. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. The University of North Carolina Wilmington Chapter of Psi Chi was chartered on May 1, 1981, and is one of approximately 675 chapters nationwide. Psi Chi is registered as a student organization through the Campus Activities and Involvement Center.

A further list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html

Chancellor's List and Dean's List

Each semester, outstanding scholarship is recognized in the following tiered manner:

Chancellor's List

The Chancellor's List is composed of the names of all full-time undergraduates who earn a 4.0 semester GPA on all work taken. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Dean's List

The Dean's List is composed of the names of all full-time undergraduates who earn

at least a 3.5 semester GPA on all work taken with no grades "B-" or below. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Student Loans

Students must complete a FAFSA to initiate the application process and are automatically considered for all Federal Loan programs and Federal Work-Study. Students may borrow up to $20,500 in Direct Student Loans per academic year.

Federal Unsubsidized Direct Student Loans

Federal Unsubsidized Direct Student Loans are available to graduate students who file the FAFSA and otherwise are eligible. Students may borrow up to $20,500 **($33,000 for some health professions)** or the cost of attendance minus all other resources (including financial aid, tuition remissions). Interest begins accruing when the funds are disbursed to the student. Repayment begins when the student graduates or drops below half-time enrollment status. There are a variety of repayment plans. A portion of the loan may be cancelled upon completion of employment under certain terms and conditions. Students must be enrolled at least half-time to be eligible for Federal Direct student loans. More information about the terms and conditions are available at the following
link: https://studentaid.gov/understand-aid/types/loans

PLUS Loans for Graduate or Professional Students

Graduate or professional students are eligible to borrow under the Federal Graduate Direct PLUS Loan Program up to their cost of attendance minus other estimated financial assistance. The terms and conditions applicable to Parent PLUS Loans also apply to Graduate/Professional PLUS loans. These requirements include a determination that the applicant does not have an adverse credit history, repayment beginning 60 days after the last disbursement of the loan, and a fixed interest rate of 7 percent in the Federal Direct PLUS Loan program. Applicants for these loans are required to complete the FAFSA. They must have applied for their annual maximum loan eligibility under the Federal Subsidized and Unsubsidized Direct Loan Program

before applying for Graduate or Professional PLUS loan. They also must complete an entrance counseling session prior to first disbursement and an exit counseling session when the student leaves school.

Master Promissory Note

To receive a Direct Loan or PLUS loan for graduate students, the student is required to complete a Master Promissory Note (MPN) with the U.S. Department of Education Direct Loan Program at https://studentaid.gov. Students may use computers in the OSFA if desired.

Entrance and Exit Counseling

Students who receive a Federal Unsubsidized or Perkins Loan must complete loan entrance counseling prior to receiving the first disbursement of a loan. Students can complete this process at https://studentaid.gov. Students may use computers in the OSFA if desired.
These students must also complete exit counseling at the same location once they graduate or if they withdraw.

Non-Federal and Alternative Loans

Non-federal loans are often referred to as alternative loans because they represent an alternative to the federal loan program, and are typically the only funding option for students in non-degree programs.
The Direct Loans and PLUS Loans generally provide more favorable terms and conditions than non-federal loans, but not always. For that reason, we encourage students and their families to compare terms and conditions of each. Eligibility for non-federal loans is determined by the lender based on credit review. UNCW certifies the loan amount, but has no influence on the credit decision. A very small percentage of students are ineligible for federal loans. The most common reason for this ineligibility is failure to meet UNCW's satisfactory academic progress policy. Please visit **our website** for more information on these financing options.

Tuition, Fees and Policy

The Board of Governors of the university reserves the right to change the charges for tuition, fees and the room and board rate at any time without prior notice.

Tuition and Fees (In Effect at Time of Publication)

University of North Carolina Wilmington's tuition and fees are reviewed and approved by the Campus-Initiated Tuition Increase Committee (includes representation from the student body, faculty, and staff), the UNCW Board of Trustees, and the UNC System's Board of Governors.

Tuition and fees are assessed per credit hour for fall and spring terms up to 12 credit hours for undergraduate students (up to 9 credit hours for graduate students). Undergraduate students enrolled in 12 or more credit hours are considered full-time (9 or more for graduate students) and they are assessed the full-time rates for tuition and fees as listed below.

All programs are categorized as main campus or extension campus. Students are assessed based on the category associated with their program (main campus or extension). Students are able to view the campus code associated with their program in MySeaport - Students. Rates for tuition vary according to the student's status as a resident or non-resident of North Carolina.

All charges on the student account are due and payable per published dates on the Student Accounts website to avoid class cancellation and/or registration, transcript, and diploma holds. Online payments can be made via E-bill in MySeaport. Checks and money orders should be made payable to the University of North Carolina Wilmington and include the student's identification number.

University of North Carolina Wilmington has implemented the Fixed Tuition Program as required by North Carolina General Statute § 116-143.9. As required, in-state tuition rates at all UNC institutions will be fixed for eight consecutive semesters for all resident bachelor's degree-seeking freshmen. Eligible transfer students will have fixed tuition rates for an appropriate number of consecutive semesters, based on the number of transfer credits transferred in from other institutions. The Fixed Tuition program only includes tuition and not fees. Fees may be increased annually. For more information, please see the Student Accounts and Cashier Office website.

Full-Time Charges per Semester for Main Campus

programs (12 or more semester hours):

For FY 2025-26	In-State Students	Out-of-State Students*
Tuition	$2,221.50	$11,298.50
Education &Technology Fees	$281.50	$281.50
Security Fee	$30.00	$30.00
University Fees	$1,160.50	$1,160.50
Total	$3,693.50	$12,770.50

The following student activities fees are included in the full-time tuition and fee amount per semester:

Athletics	$410.00	$410.00
Health	$135.00	$135.00
Media	$6.25	$6.25

One Card Technology System	$6.00	$6.00
Leadership	$11.50	$11.50
Student Services	$20.00	$20.00
Green Initiative Fund	$5.00	$5.00
Rec Center Expansion Debt	$74.50	$74.50
Recreation Field Expansion	$26.00	$26.00
Union Expansion Debt	$87.50	$87.50
Transportation	$60.00	$60.00
Association of Student Government	$.50	$.50
Total	$1,160.50	$1,160.50

Undergraduate students in main campus programs registering for 12 or more credit hours will be charged at the full-time rate as shown above. Students in main campus programs registering for fewer than 12 credit hours will pay tuition and fees as follows:

In-State Residents	**In-State Students**
Cohort	**Per Credit Hour**
FT 2022-23	$307.80
FT 2023-24	$307.80
FT 2024-25	$307.80
FT 2025-26	$307.80
No Cohort	$307.80

Out of State Residents*	
Per Credit Hour	$1,064.22

*See information on residency at the end of this section.

Full-Time Charges per Semester for Extension programs (12 or more credit hours)

For FY 2025-26	**In-State Students**	**Out-of-State Students***
Tuition	$2,221.50	$11,298.500
Education and Technology Fee	$281.50	$281.50
Security Fee	$30.00	$30.00
Association of SGA Fee	$.50	$.50
Total	$2,533.50	$11,610.50

Note: For Distance Education/Extension courses that require proctored exams, there may be additional fees for the verification of student identity. Students may also be required to find an independent testing facility for these exams. Contact the course instructor for more information.

Undergraduate students in extension programs registering for 12 or more credit hours will be charged at the full-time rate as shown above. Students in extension programs registering for fewer than 12 credit hours will pay tuition and fees as follows:

In-State Students					**Cohort**
Per Credit Hour				FT 2022-23	$211.14
		FT 2023-24	$211.14		
FT 2024-25	$211.14			FT 2025-26	$211.14
		No Cohort	$211.14		

Out of State Residents*

For fixed tuition rates by cohort please see the Student Accounts and Cashier Office website.

* See information on residency at the end of this section.

** The University of North Carolina Wilmington reserves the right to make changes to tuition and fees at any time with the approval of the proper authorities. The University also reserves the right to correct any clerical errors on student accounts. Summer sessions tuition, fees, and refund policy can be found here: https://www.uncw.edu/seahawk-life/money-matters/student-accounts-cashiers-office/tuition-fees/index

Other Fees***:

Charge for Registration Reinstatement of Tuition and Fees (see below)	$75.00
Health Insurance Fees – Premium Plan – per semester (fall and spring)	$1,475.32
Health Insurance Fees – Value Plan – per semester (fall and spring) (default plan)	$1,182.28

Application Fee (to accompany application, nonrefundable)	$80.00
Freshman Orientation Fee	$180.00
UNCW One Card - Student ID	$20.00
Diploma Fee	$12.00

Liability Insurance (Additional charge for courses that require insurance coverage)

$12.00

Parking Annual Rates:

The University's Board of Trustees reserves the right to change parking rates. Please visit the Parking and Transportation website at https://uncw.edu/parking/ to confirm current parking rates. (In effect at time of publication)

All students operating motor vehicles on campus are required to purchase a UNCW Parking permit. Permits are assigned on a "first come, first served" basis based upon time of registration, with no advantage by class standing (i.e., Senior, Junior, Sophomore, Freshman).

Commuter Options:

Deck - premium option (Per Year)	$ 483.00
Zone 1 - premium option (Per Year)	$ 473.00
Zone 2 - premium option (Per Year)	$ 410.00
Park and Ride (Per Year)	$ 290.00
Night/Weekend (Per Year)	$ 164.00

Resident Options:

Resident (Per Year)	$ 410.00
Resident Deck (Per Year)	$ 483.00

Campus Mail:

Rental Rates for Student Campus Boxes (Per Semester)	$11.00
Rental Rates for Summer (Includes both sessions)	$11.00

***Please see Student Account's website for additional course fees.

Charge for Registration Reinstatement of Tuition and Fees

A course registration reinstatement charge will be assessed to students who fail to pay tuition and fees by published deadlines. Students who have not paid tuition and fees by the deadline are subject to cancellation of their registration. Students who have been canceled for non-payment may re-register for the exact classes canceled with a $75 registration reinstatement charge. Appeals for course reinstatement after the add/drop date may be submitted to the Dean of the student's college. Non-attendance or non-payment does not relieve a student of tuition liability. Students who do not plan to attend classes for a term must officially withdraw from the semester by contacting the Office of the Registrar.

UNCW Refund Policy – Fall and Spring Semesters

The university's refund policy complies with the requirements of the university's accrediting agency and the U.S. Department of Education. This refund policy only applies to complete term withdrawals from all courses from UNCW. Students who simply withdraw from an individual class after the drop/add period receive NO refund or reduction of tuition and fees.
Students must follow the official term withdrawal process to receive a refund under the university's policy. To officially withdraw from the university, students must withdraw online via the student portal. Any outstanding financial obligations to the university will be deducted from the amount refunded.

A student who officially withdraws from the university on or before the last day of registration (drop/add period) will receive a refund of the amount paid. Refunds are based on the effective date of the withdrawal. The Tuition/Fees Credit Schedule is posted on the Student Accounts website.
Students completing a term withdrawal will receive refunds as follows:

Date of Complete Withdrawal	Refund Percentage
On or before drop/add	100%
After drop/add but prior to first 20% of the enrollment period	80%
Between the first 20% and the end of the first 40% of an enrollment period	50%
Between the first 40% and the end of the first 60% of the enrollment period	25%
After the end of the first 60% of the enrollment period	0%

Declining balance portions of room and board plans will be refunded separately.

This refund policy applies to complete term withdrawals from UNCW. Note: Before officially withdrawing, students should check with their financial aid counselor to understand any financial aid implications.

UNCW Refund Policy - Summer Sessions

Because of the short duration of summer school sessions, summer session charges are not refundable after the drop/add period.

Residence Status for Tuition Purposes

A student's status as an in-state or out-of-state resident for tuition purposes determines the tuition rate charged for the student. A student's residency status is determined by the North Carolina Residency Determination Service (RDS) under the authority of the North Carolina State Education Assistance Authority.
Students seeking to establish or update their residency status are required to complete the process offered by RDS and to provide UNCW with the Residency Classification Number (RCN) for their status. Students who do not have an RDS determination or who do not provide their RCN default to out-of-state status. Students with an expired residency status default to out-of-state and need to renew their status through RDS.
Refer to RDS at ncresidency.org or 844-319-3640 for information on how residency is determined and completing the process.
The deadline to be changed to in-state residency status for an in-progress semester is set by the UNC System and published on the UNCW calendar. Students who receive a change in status with an RDS effective date after the UNC System deadline will have the in-state status take effect the following semester.
There are several state-authorized tuition benefits that provide the equivalent of the in-state rate to qualifying out-of-state students. Refer to RDS for information on these benefits and how to qualify.

Veteran's Benefits

OSFA provides certification for educational benefits to veterans and/or their eligible dependents, enrolled at the University of North Carolina Wilmington. Chapter 32 (VEAP), Chapter 1606/1607 (reservists from all branches of the services, and Chapter 30 (individuals who served on active duty), Chapter 33 (Post 9-11), and transfer of Benefits (T.O.E.) veterans who feel they have an entitlement should check with their local VA Office, the Regional Office in Atlanta (1-888-GIBill1) or the VA certifying official at their local educational institution. You may also obtain information at www.gibill.va.gov.
The exception to the above is:

- A veteran who has a 20 percent or greater disability due to a service-connected cause(s) may be eligible for benefits under Chapter 31. Check with the Veterans Affairs Regional Office (1-800-827-1000).

A goal of the OSFA is to assist students eligible for veterans' benefits with counseling regarding their coursework and benefits while they work to successfully

complete their desired educational objective within the guidelines of the North Carolina State Approving Agency. The monitoring of attendance, successful completion of courses and the pursuit of appropriate curricula are required. Services to veterans and dependents include referrals to peer and professional counseling, employment, community outreach services, tutorial services and special programs for educationally disadvantaged veterans.

Before each semester, the OSFA emails all VA students notifying them that their benefits will be processed for the upcoming semester and that they can reply if they wish to not use their benefits for that semester. Changes in the veteran's course of study must be cleared with the Veterans Services coordinator to ensure continuation of benefits. For changes in status or further information about veteran benefits and eligibility requirements, students should contact the OSFA at (910) 962-3177, Fax (910) 962-3851 or e-mail to: veterans@uncw.edu.

The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

- https://uncw.edu/seahawk-life/support-success/military-veterans/

The Office of Military Affairs is a support and advocacy office that was established in March 2016 to develop and coordinate resources to help military affiliated students - those currently serving, veterans, and their family members - achieve their academic and career goals.

Our staff members help students and their families learn how to navigate the university while helping faculty and staff understand and serve this important student population.

Our offices are located in the amazing Military Affairs Wing in Veterans Hall Room 1029. Office hours are Monday-Friday, 0800-1700.

For more information on UNC System Policy 700.7.1. for Military Student Success, including Deferral of Enrollment and Call to Duty, see the policy here: https://www.northcarolina.edu/apps/policy/doc.php?type=pdf&id=852

Voluntary On-Campus Housing or Off-Campus Living – Meal Plans

UNCW offers voluntary meal plans for students living off campus or upperclassmen living in Voluntary On-Campus Housing, consisting of Seahawk Village, Seahawk Landing, or Seahawk Crossing. The plans are designed to give students the convenience of using their One Card instead of carrying cash.

Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. For a list of current change period dates and additional details, please visit the UNCW student meal plan website at* www.uncw.edu/studentmealplans.

Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Voluntary or Off-Campus Meal Plans

Hawk Gold	This plan features 6 Teal Meals (retail) per week, $300 Food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, and 5 Guest Meals	$2,789/semester (plus tax*)
Hawk Silver	This plan features 3 Teal Meals (retail) per week, $200 Food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, and 5 Guest Meals	$2,534/semester (plus tax*)
Hawk Bronze	This plan features $100 Food Dollars per semester, All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, and 5 Guest Meals	$2,257/semester (plus tax*)

Block 125	125 Teal Meals (retail) or All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, $250 Food Dollars and 5 Guest Meals per semester	$1,685/semester (plus tax*)
Block 85	85 Teal Meals (retail) or All Access Meals at Wagoner Hall, The Shore Dining Hall, and Dub's Cafe, $150 Food Dollars and 5 Guest Meals per semester	$1,136/semester (plus tax*)
Block 50	50 Teal Meals of All Access Meals, and $50 Food Dollars per semester	$ 636/semester (plus tax*)
Sammy $600	$600 Food Dollars	$600 (plus tax*)
Sammy $400	$400 Food Dollars	$400 (plus tax)

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.
Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period. Visit https://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.
Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

TealPay Payment Plan Term Enrollment Fee

Students have the option to enroll in one of UNCW's TealPay payment plans. Three options are available each Fall and Spring to pay the charges on the student's account with three, four or five installment payments during the term. The three-installment payment plan is available in the Summer. Enrollment fees are non-refundable. OAP students are not eligible for the payment plans due to the course

duration.

Payment Plan Options (see below):	
TealPay Payment Plan Enrollment Fee - 5 pay plan	$30.00
TealPay Payment Plan Enrollment Fee - 4 pay plan	$40.00
TealPay Payment Plan Enrollment Fee - 3 pay plan	$50.00

UNCW OneCard

The UNCW One Card is the UNCW student ID and official form of identification on campus. It allows the use of campus facilities, and provides safe, easy access to student housing, campus facilities, and student labs. With a valid UNCW One Card, students can check out materials at Randall library, ride the Seahawk Shuttle WAVE transit buses at no cost, and much more, including receiving a discount at local merchants through the Seahawk Savings Program. Students also have three accounts they can utilize on the One Card: Seahawk Buck$, Bookstore Dollars, and their Meal Plan. For more information on these accounts, please visit https://www.uncw.edu/onecard.

Seahawk Buck$ is the debit account feature of the UNCW One Card. With prepaid funds, students can make purchases at all food service locations, UNCW Bookstore, vending machines, student copiers, health center, pharmacy, Seahawk Mail, iPrint locations, iPrint Business Center, and more. Deposits may be made either online using the UNCW One Card Online Management Center online, or at the UNCW One Card Office located in Warwick Center.

Students can track UNCW One Card balances (Food Dollars, Seahawk Buck$, and Bookstore Dollars) at the UNCW One Card Online Management Center or on the smartphone/tablet App called "Transact eAccounts". For more information, visit the UNCW One Card office in the Warwick Center or https://www.uncw.edu/onecard/.

University Owned and Managed Housing

The university currently has residence facilities for over 5,400 students consisting of traditional residence halls, suite, and apartment style buildings.

All buildings are equipped with air-conditioning, laundry facilities, and Wi-Fi. New incoming freshmen will be required to residen in university owned or managed housing for their first and second year, unless an application for exemption is approved due to maintaining a primary residence with their parents or legal guardian within Brunswick, New Hanover, or Pender County.

The university holds membership in the National Collegiate Athletic Association and the Coastal Athletic Association. Varsity intercollegiate teams are fielded for men in basketball, cross country, baseball, golf, soccer, tennis, swimming and diving, and outdoor track and field. Varsity intercollegiate teams for women are fielded in basketball, cross country, softball, golf, soccer, tennis, swimming and diving, volleyball, beach volleyball and indoor/outdoor track and field.

Mission Statement

UNCW Athletics enriches the university through a commitment to developing leadership qualities among its student-athletes by providing opportunities which support and promote academic excellence, community engagement, and competitive success.

Core Values

UNCW Athletics is committed to and intentional about allowing these beliefs to drive its decision-making and serve as the foundation for future growth.
STUDENT-ATHLETE FOCUSED: Put student-athlete development and success at the center of everything we do, by producing leaders, productive citizens and friends of the university.
COMMUNITY: Educate, enhance, serve and engage constituents of the athletics department through stewardship at local, regional and global levels.
EXCELLENCE: Be conference and national leaders through competitive success, academic performance and a complete student-athlete experience.
INTEGRITY: Operate with the highest standards of ethics, sportsmanship, honesty, trust, dignity and respect.
INNOVATION: Adopt best practices in everything we do, and foster new ideas and methods by being proactive, distinctive and resourceful.
DIVERSITY: Create, maintain and celebrate an environment that is fair, embracing and inclusive to all people.
The Equity in Athletics Disclosure Act report is available online at www.uncwsports.com by clicking on the Inside Athletics tab and then on the EADA Report.

Priorities

Priority I: Attract & Retain Outstanding Student-Athletes, Staff and Coaches
Priority II: Enhance Diversity, Inclusion & Equity
Priority III: Promote Academic, Competitive and Service Excellence
Priority IV: Provide the Highest Quality Experience for Students
Priority V: Engage Partners To Support Our Success
Priority VI: Enable Fiscal Sustainability
Priority VII: Fund and Build Facilities
Our mission vision and values guide our athletic community and foster a sense of

family among the Seahawk Nation. The tenets that make competing as a UNCW Seahawk Student-Athlete unique include:

- Striving for excellence in all phases of campus life including academics, competition, leadership and service.
- Embracing the student-athlete experience as preparation for success at the highest levels in one's life after graduation.
- Enjoying a comprehensive university experience, including broad engagement and involvement in the fabric of campus life.
- Taking care of one's self by nurturing the body, mind and spirit, and using resources available to help foster success in these realms.
- Feeling an indelible sense of pride to represent UNCW at the highest competitive level.
- Accepting that as ambassadors of UNCW, student-athletes will apply the highest self-accountability and informed decision-making, promote inclusion and diversity in the broadest sense, and treat others with the utmost dignity and respect on campus and in the community.
- Expecting that students, faculty and staff will support student-athletes and UNCW Athletics in the classroom, on campus and in competition.
-

The University of North Carolina Wilmington is located in the southeastern part of the state on a 661-acre tract midway between the Cape Fear River and the Atlantic Ocean. The city of Wilmington is situated on the east bank of the Cape Fear River about 15 miles from Carolina Beach and 10 miles from Wrightsville Beach. The metropolitan statistical area, of which Wilmington is a part, now has a population in excess of 360,000. Several main highways lead into the city, and commercial air service provides easy access to other metropolitan areas north, south, and west. Ocean breezes and the nearness of the Gulf Stream give Wilmington a delightful year-round climate, and the area's proximity to the ocean provides unlimited recreational opportunities.

The spacious well-landscaped campus was first occupied by the university in 1961. The number of buildings has increased from three in 1961 to 162 today, dispersed across a coastal pine savannah habitat. The buildings on the campus are of modified Georgian architecture, including academic, administrative, student life, residence, dining, athletic, and support buildings, all of which are completely air-conditioned. There are several athletic fields and intramural fields.

Campus Map

Click here to view the Campus Map.

Buildings

For information on university buildings, click here.

Herbert Bluethenthal Memorial Wildflower Preserve

The Herbert Bluethenthal Memorial Wildflower Preserve is a 10-acre memorial botanical garden located on the UNCW campus. Established in 1972, its purpose is to provide a place where the university community and the public can learn about and enjoy our native plants and their habitats. Many of the plants are labeled, and maps and trail guides are available at the entrance.

EV-Henwood Nature Preserve

Ev-Henwood is UNCW's coastal forest research and teaching station located in Brunswick County. It is only a short 30-minute drive from the university campus and is available for nature study and appreciation, student and faculty research, and class field trips. Included in its 110 acres are oak/hickory woods, pine forests, and low woods along the bordering Town Creek and its branches. Additional habitats such as ponds and fields are available nearby.

UNCW Long-Term Ecosystem Reserve

This 750 acre parcel of undisturbed bottomland hardwood forest, tidal creeks, and wetland marshes bordered by the Northeast Cape Fear River, Cowpen Road, and NC Highway 421 supports non-destructive teaching and research activities. The property is uniquely situated within the upper tidal region of the Cape Fear estuary. Although most of the property consists of tidal freshwater creeks and adjacent marsh, detectable salinity can occasionally be measured during drought periods. Because of this location, this area/habitat is expected to be among the early regions to be significantly affected by sea level rise over the next several decades, making it ideal for research into the effects of climate change on coastal ecosystems and ecosystem dynamics.

Art Exhibitions

Monthly exhibitions of painting, sculpture and the graphic arts are held in a variety of spaces on campus including: UNCW Library, Cultural Arts Building, Campus Life facilities, and the Ann Flack Boseman Gallery. Student art is often featured. Campus Life also features its permanent art collection of student artwork on display year round in the Fisher Student Center, Fisher University Union, and Burney Center. All exhibitions are open to the public without charge. Student art is also displayed outside the Office of the Vice Chancellor for Student Affairs in Alderman Hall.

Association for Campus Entertainment

The Association for Campus Entertainment (ACE) coordinates many of the events

that take place on campus including novelty act entertainment, concerts, Friday and Saturday night films in Lumina Theatre, and campus spirit and homecoming activities. This dynamic student-run organization is comprised of several committees including Arts, Activities, Films, Concerts, Spirit, and Homecoming. If you are interested in more information about events or joining a committee, stop by the ACE Office in the Campus Activities and Involvement Center in the Fisher Student Center, Room 2029, or email ace@uncw.edu.

Performing Ensembles

Membership is open to any student who has had instrumental or vocal experience, with the approval of the director of the particular ensemble.

Concert Choir and Chamber Singers

The University Concert Choir and small ensemble, the Chamber Singers, regularly act as ambassadors for the university and appear on radio and television. The Concert Choir performs at least two on-campus concerts each year and tours during spring break. On occasion, the choir has participated in joint stage productions of opera and musical comedies with the drama program.

Jazz Ensembles

In addition to the Big Band, UNCW has several small groups that play both mainstream and fusion jazz. The Big Band has produced recordings, while the small groups have garnered awards at jazz festivals and have recorded as well. Also, each year the jazz ensembles perform with some of today's top jazz artists

during the annual UNCW Guest Artist Jazz Festival.

Wilmington Symphony Orchestra

The orchestra's annual subscription series includes five concerts performed in UNCW's Kenan Auditorium, the principal concert hall in Wilmington. Orchestra members include UNCW students and faculty, as well as musicians from the community.

Wind Ensemble

The Wind Ensemble is organized each semester to provide instrumental music experience for wind players in a large ensemble. This ensemble performs two concerts each year in Kenan Auditorium and tours annually in the spring.
Other instrumental ensembles include the Pep Band, the Brass Ensemble, the Saxophone Ensemble, the Flute Choir, the Guitar Quartet, the Percussion Ensemble and various Chamber Ensembles.

Vocal Ensembles

The University of North Carolina Wilmington Concert Choir is organized each semester to provide vocal musical experience for those students who desire it. Membership is open to any student in the university, with the approval of the director, and any participant may earn credit. Participation by non-music majors may be supplemented by private lessons, also for credit.
The University Concert Choir and small ensemble, The Chamber Singers, regularly provide music for university functions, appear on radio and television, and act as ambassadors from the university at a wide spectrum of community functions.

The UNCW Concert Choir's yearly activities have included at least two on-campus concerts and an extensive tour during the spring holidays. On occasion, the choir has participated in large, joint stage productions of opera and musical comedies with the drama division.

Storytelling in the Community

University students may enroll in COM 212 Storytelling in the Community, a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

University Theatre

The University Theatre is a student-oriented theatre dedicated to the continuing development of all theatre practitioners. It strives to produce a total theatrical experience to support the educational, creative, and recreational potential of a campus-based theatre.
Two major productions are presented each semester, with student productions presented on demand. Participation is not limited to theatre majors.

Campus Activities and Involvement Center

The Campus Activities and Involvement Center (CAIC) is students' gateway to entertainment and involvement on campus. As part of the Division of Student Affairs, we are "creating experiences for life" by providing opportunities for students to participate actively, grow personally and explore new ideas and interests through a variety of entertainment and involvement experiences, including the annual Involvement Carnival. Our staff, and the students with whom we work, are committed to creating a vibrant campus community filled with diverse activities for all students. Students interested in learning how to get engaged with student organizations, hone their leadership skills, or simply to find out about events and activities can do so on WaveLink at https://uncw.campuslabs.com/engage.

Campus Activities

Campus Activities and Programs coordinate and promote opportunities to cultivate connection and social engagement for UNCW students. Our programs include: Association for Campus Entertainment (ACE); Ann Flack Boseman Gallery; Campus Life Marketing; Leadership Lecture Series; UNCWeekends; Campus Life Union Events; Summer @ the Dub; and the university-wide coordination of Fall and Spring UNCWelcome. For more information on Campus Activities & Programs, visit the Campus Activities and Involvement Center (CAIC) in the Fisher Student Center, Room 2029 or email clprograms@uncw.edu.

Summer @ the Dub

Summer @ the Dub features a comprehensive calendar of campus and community events for students throughout the summer months, including activities such as outdoor recreation, special events, summer sporting event tickets, and much more. For more information, visit the Campus Activities and Involvement Center (CAIC) in the Fisher Student Center, Room 2029 or email clprograms@uncw.edu.

Campus Dining

UNCW Campus Dining is committed to providing culinary options to satisfy diverse tastes. We deliver fresh and healthy food while also providing a high-quality experience prepared by professionally trained staff and award-winning chefs. Campus Dining locations are open to meet the schedules of students, staff and faculty.
Campus Dining offers four convenience stores on campus. These provide a wide range of ready to eat meals as well as pre-packaged snacks, drinks and more!
UNCW Campus Dining features several national brands throughout campus: Starbucks, Chick-fil-A, Panda Express, Subway, Einstein Bagels, Dunkin Donuts, and a Wilmington local favorite, Port City Java located in Randall Library. Local Restaurant Row is located in Hawk's Nest and provides a space for local restaurants to pop up on campus to offer students more variety and a taste of Wilmington right here on campus!
For a full listing of dining locations and Meal Plan options, visit www.uncw.campusdish.com. Information about On-Campus Required and on-Campus Voluntary/Off Campus Meal Plans is available at http://uncw.edu/studentmealplan. Contact us at 910.962.3560, or see the Auxiliary Services One Card office in Warwick Center for more information.

Campus Life Facilities

Student life is enriched at UNCW by a broad spectrum of activities, many of which occur in or around the Campus Life facilities, which includes the Fisher Student Center, Fisher University Union, Burney Center and Warwick Center. The Fisher Student Center is a 73,000 square foot facility which houses student organization offices in the Campus Activities and Involvement Center, the Student Media Center, meeting rooms, lounges, study areas, the University Bookstore, Lumina Theater – a 330-seat movie theater, and views of the Campus Commons.
The Fisher University Union is a 62,000 square foot facility that houses the Hawk's

Nest food court concepts and dining space. Services in this facility include the post office, the Passport Office, and Provisions on Demand (a convenience store). Many student service offices, including the Career Center, Transition Programs, the Upperman African American Cultural Center, Centro Hispano, the Mohin-Scholz LGBTQIA Resource Office, the Asian Cultural Heritage Center, and the Campus Life Administrative Office are located in the Fisher Union. In addition, the Ann Flack Boseman Gallery is located on the second floor of the Fisher University Union with art on exhibit throughout the year.

The Burney Center houses the largest multipurpose ballroom space on campus. The Campus Life Reservation and Event Services office, which is located in the Fisher University Union, will be happy to speak with you about this and other reservable spaces in any of the Campus Life facilities.

The Warwick Center houses a large multi-purpose room which can be divided into as many as three smaller spaces. Areas of the multi-purpose room are available to the university community and the community at large for meetings, and conference proceedings. Dub's Café, area is also located in the Warwick Center, as is the new UNCW Swap Shop where students can donate and access free clothing and other items.

Campus Life facilities and Campus Commons are student-oriented facilities in the center of campus that are welcoming, adaptable, well maintained, safe and accessible. These facilities are intentionally designed to be inviting and to encourage interaction with the community. As is the case for all campus facilities, it prominently features copies of the UNCW Seahawk Respect Compact.

Housing and Residence Life

The Department Office of Housing and Residence Life is responsible for the development of educational, cultural and social programs to enhance student life on campus. The goal of the Housing and Residence Life program is to create an environment conducive to academic pursuits and the personal growth of resident students. More than **250** Residence Life staff are responsible for the supervision of resident students in the residence halls, on-campus apartments, and suite-style buildings.

The university has residence hall facilities for over **5,000** students. All rooms are air-conditioned and furnished. Wifi and Ethernet computer networking, which allows student computers to access university software, has been installed in all residential facilities. Laundry facilities are available. The Residence Life program offers opportunities for student employment and leadership positions through hall governance. Students in all traditional residence halls**,** University Suites, Pelican, Sandpiper, Terrapin, and Loggerhead Halls, are required to participate in the university meal plan program. Sophomores, Juniors and Seniors who reside in **other locations** will not be required to have a university meal plan.

Student Media

Founded in 1948, *The Seahawk*, the student newspaper, publishes a weekly online edition (www.theseahawk.org) throughout the calendar year. The paper's staff is composed entirely of students interested in journalism, multimedia and computer-assisted design. *Atlantis*, the student creative arts magazine, publishes literature and art created by student writers and artists from throughout the UNC system. The magazine is funded by student fees and advertising and sponsors public readings and art exhibits. TealTV is a student-run production unit that provides students hands-on experience in script writing, video production, broadcast journalism, digital-video editing, announcing and reporting. Founded in 1999, TealTV produces several original programs including "Seahawk Central News," a program of campus news and information. TealTV's programs air regionally on Time Warner Cable channel 5 and on the UNCW's closed-circuit channel 77. Together, *The Seahawk* and "Seahawk Central" play valuable roles within UNCW's interdisciplinary Journalism Minor. UNCW Student Media Sales & Marketing provides the program's student publications with advertising and underwriting sales and marketing services and provides training for students interested in the business of media. UNCW Student Media also serves as home to other student organizations interested in mass media, such as Hawkstream Radio (podcasting station), and Flicker Film Society, which produces original student films and sponsors the annual Reel Teal Festival.
The Student Media Board (SMB) is UNCW Student Media's governing body. A

chancellor's advisory board, the SMB advises student publications and works to ensure their First Amendment rights. Comprised of students, faculty, university staff and community professionals, the SMB allocates budgets and provides financial oversight. Applications for two student-at-large positions, appointed to the board annually, are accepted in the spring semester. More information about UNCW Student Media is available online at https://uncw.edu/studentmedia/index.html.

https://uncw.edu/seahawk-life/health-wellness/campus-recreation/
The Department of Campus Recreation provides a multi-faceted program that includes the following programmatic areas: Group Fitness, Personal Training and Fitness Programs, Intramural and Sport Clubs, Aquatics, Adventure Recreation, Informal Recreation, and Member Services. We believe in a "Something for Everyone" philosophy to programming and services. To accomplish our mission, the department is home to various facilities:

- The Pat Leonard Student Recreation Center contains an aquatics facility (indoor lap pool and outdoor leisure pool), functional strength training area, 6 courts (used for basketball, volleyball, badminton, pickleball) 2 MAC (multi-purpose activity courts) for indoor soccer and special events, a 30 ft. rock climbing wall, adventure equipment check-out center, racquetball courts, the walking/jogging track, and many other functional recreational areas and amenities.
- The Recreational Field Complex is a 11-acre outdoor field complex with three lighted multipurpose fields (two synthetic turf and one natural grass), two operations buildings with restrooms, equipment check-out, vending machines, and water/bottle filling stations.
- The Shoreline Sports Complex is a 6.5-acre outdoor sports complex with four lighted sand volleyball courts, four lighted basketball courts, four lighted tennis courts (two courts lined for pickleball), one lighted large grass field, one lighted smaller grass field, outdoor fitness area, pavilion building (seating, equipment check-out, and restrooms), multiple water/bottle filling stations.
- The Adventure Recreation Challenge Course consists of both a high and low ropes course. The high ropes course is a structure that stands around 35 ft. tall with 12 bridge-like elements, giant swing, zipline, flying squirrel, high-5, fidget ladder, and ground school. The low ropes course can utilize a variety of the 12 element structures and spaces that are available.
-

https://uncw.edu/seahawk-life/support-success/military-veterans/
The Office of Military Affairs is a support and advocacy office that was established in March 2016

to develop and coordinate resources to help military affiliated students - those currently serving, veterans, and their family members - achieve their academic and career goals.

Our staff members help students and their families learn how to navigate the university while helping faculty and staff understand and serve this important student population.

Our offices are located in the amazing Military Affairs Wing in Veterans Hall Room 1029. Office hours are Monday-Friday, 0800-1700.
For more information on UNC System Policy 700.7.1. for Military Student Success, including Deferral of Enrollment and Call to Duty, see the policy
here: https://www.northcarolina.edu/apps/policy/doc.php?type=pdf&id=852

- https://uncw.edu/about/university-administration/student-affairs/departments/campus-life/student-resource-centers

Asian Heritage Cultural Center https://uncw.edu/seahawk-life/get-involved/students/asian-heritage-cultural-center/

Centro Hispano creates a responsive educational, scholarly and social environment for Latinx students, faculty and others interested in Hispanic and Latinx culture. Primarily, the goal of Centro Hispano is to support the rapidly growing number of Latinx students applying, attending and completing degrees at UNCW. Centro Hispano promotes opportunities that broaden understanding and appreciation of diverse Hispanic cultures, offer resources that maximize the success of each student, and most importantly, provides a place where every student feels at home while striving for success. Furthermore, the center supports the research, teaching and service components necessary for the training and preparation of global citizens. It also informs, guides and champions UNCW's engagement with the region on issues critical to Latinx constituencies.

Centro Hispano
https://uncw.edu/seahawk-life/get-involved/students/centro-hispano/

Mohin-Sholz LGBTQIA Resource Office
https://uncw.edu/seahawk-life/get-involved/students/lgbtqia-resource-office/

The Mohin-Scholz LGBTQIA Resource Office at the University of North Carolina Wilmington supports lesbian, gay, bisexual, transgender, questioning, intersex and allied students, faculty, staff, and alumni. Our office works to create a safe and inclusive environment for the LGBTQIA community and contribute to a culturally rich campus. Additionally, the office works both to raise awareness and inclusion of sexual and gender minorities and to provide information, referral, support, and programming to the UNCW Community. We do this through community building, advocacy, social justice and diversity education and the development of global citizens. All members of the UNCW campus are welcome, regardless of gender

identity or other factors.

Upperman African American Cultural Center https://uncw.edu/seahawk-life/get-involved/students/african-american-cultural-center/

The Upperman African American Cultural Center (UAACC) provides UNCW students, faculty, staff, and others interested in African and African American culture a central location from which they can experience the rich heritage of African diaspora through scholarly and cultural workshops, presentations, exhibits, performances, lectures, and print and visual media. Working collaboratively with campus and community partners, the UAACC works to positively impact the recruitment, retention, and academic achievement of black students at UNCW, and contribute to the preparation of *all* UNCW students to excel in an increasingly diverse world.

- The Office of the Dean of Students is committed to advocacy and education centered on student growth and self-responsibility by serving as a central resource for UNCW students, faculty and staff. Through collaboration with the university and Wilmington community, we provide assistance to members of the UNCW community by: educating students about their rights and responsibilities as members of our community; assisting students, faculty and staff with interpretation of campus policies, including the Code of Student Life and the Student Academic Honor Code; training and educating faculty, staff and students on community standards and conflict resolution; establishing grievance and conflict resolution procedures; referring students to myriad resources to increase the likelihood of their success; assisting in the coordination of 24 hour emergency and crisis response; and providing resources and education for special populations including fraternity & sorority life members and off campus students. Our mission is to foster a respectful and dynamic community that affirms the value and contributions of each individual and which harbors and elevates democracy, civility, and diversity as paramount

values.

The following services and programs are coordinated and managed through the Office of the Dean of Students: Off-Campus Student Services; Alternative Dispute Resolution; Cornerstone Community Standards; Student Conduct; Student Academic Honor Code and Case Management (student behavioral intervention/resource referral). Student rights and responsibilities are communicated through the Code of Student Life, and we adjudicate academic and behavioral violations through the campus conduct system. Our staff is vested in the success of every student, and we invite you to access us as partners in assisting you in your roles as students, faculty and staff at UNCW. If you have any questions or need assistance, please contact the Office of the Dean of Students at (910) 962-3119, by e-mail at deanofstudents@uncw.edu or visit our website at www.uncw.edu/odos.

-

The Office of Title IX and Clery Compliance is committed to providing an inclusive and welcoming environment for all students, faculty, staff, and visitors. All members of the UNCW community are expected to engage in conduct that contributes to its culture of integrity and honor that we always strive to maintain. The university prohibits its faculty, staff and students from engaging in any form of discrimination, protected-status harassment, sexual harassment, and sexual violence, and retaliation and expects these individuals to refrain from committing acts of discrimination, bias, or sexual violence. In compliance with federal and state law and university policy, the university maintains processes to provide redress and remediation to individuals or groups who believe they have been victims of these offenses. If you have any questions or need assistance, please stop by the Office of Title IX and Clery Compliance in DePaolo Hall Room 1003 or call 910-962-2937, email: titleix@uncw.edu. You may also visit: https://www.uncw.edu/titleix/ for more information and links to the relevant policies.

CARE: Campus Advocacy, Resources and Education

CARE: Campus Advocacy, Resources and Education is the office at UNCW

dedicated to relationship education, interpersonal violence prevention and crisis response/advocacy. CARE offers education about relationship issues, including healthy relationship skill-building and consent, as well as prevention of interpersonal abuse and violence, sexual assault, stalking, exploitation and harassment. We offer confidential consultations, crisis counseling, advocacy, accompaniment and referrals to students, staff and faculty who have experienced victimization, as well as those students, faculty, staff or others concerned about a loved one affected by abuse or violence. CARE additionally offers educational programming, awareness-raising events and bystander intervention trainings. CARE is available 24 hours a day through our hotline at (910) 512-4821.
For more information, call (910) 962-CARE, or (910) 512-4821 after business hours, stop by our office in DePaolo Hall, Suite 103, or visit our Web site at www.uncw.edu/care.

https://www.uncw.edu/outreach/
UNCW is engaged with Southeastern North Carolina through innovative programs of lifelong and professional learning, applied research, and service that result in measurable improvements in our region's social and economic condition. We advocate for and support sustained, issue-specific partnerships between faculty, staff, and students and regional business, nonprofit, and government organizations, we support academically-based programs that enrich the lives of the youth and adults living in Southeastern North Carolina. Opportunities for student participation exist in the following areas;

Conference and Event Management

Conference Services and Event Services provides comprehensive logistical and administrative services including on-campus facilities, lodging, food and registration for both internal and external organizations hosting conferences at UNCW.

Professional and Organizational Development

Professional and Organizational Development offers working professionals an opportunity to further develop their skills and/or provides an opportunity for career exploration by delivering on-site and online training. Visit https://www.uncw.edu/professional-ed

Osher Lifelong Learning Institute at UNCW (OLLI)

Osher Lifelong Learning Institute at UNCW (OLLI) refers to an individual's ongoing commitment to education and includes non-credit activities for personal enrichment, including short courses related to academic studies, such as history, art and languages, as well as activities such as lunch and dinner speaker series, public forums, special issues presentations and international travel. Other lifelong learning opportunities include the Adult Scholars Leadership Program, which brings accomplished members of the 55+ community together to discuss regional issues. Each semester the divisional publication, Pathways, catalogues current lifelong learning opportunities at UNCW. Visit https://www.uncw.edu/olli to learn more.

Scholarly Community Engagement

Scholarly Community Engagement facilitates interdisciplinary teams composed of faculty/student researchers and community organizations, conducting meaningful long-term applied research projects addressing local issues. Engaging the community in scholarly research, faculty and students affect the quality of life of individuals and communities in our region. Students participate in community-based research through internships, directed independent study and faculty-led research projects.

Storytelling in the Community

University students may enroll in [[permalink=1273|tooltip:{'title':1}]] %prefix% %code% %title%[[/permalink]], a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

Media Production

Media Production, formerly UNCW-TV, highlights the intellectual diversity of the university by creating educational programming derived from the academic departments of UNCW and delivered by UNCW-TV, through a variety of media. Also, Media Production serves the university through its Creative Services television production, such as broadcasting events like UNCW Commencement, a variety of award ceremonies, candidates forums, community based television programming and award winning documentaries.

Youth Programs

Begin your journey to higher education by participating in one of UNCW's outstanding programs for youth of all ages. We offer summer academic enrichment opportunities, school year standards-based programs, and community outreach events that engage youth in experiential education, service learning and leadership development. Visit https://www.uncw.edu/youth/

Student Awards

Some of the organizations listed below are registered with the university through the Campus Activities & Involvement Center as student organizations. For more information about those honor societies, please visit https://uncw.campuslabs.com/engage/organizations

A. Farrell Teague Merit Scholarship for Rising Seniors (Junior)

The Teague Scholarship was created by Arthur Farrell Teague and is used to assist rising seniors who have achieved a high level of academic and extracurricular success during their time at UNCW. Every year a recipient is chosen as the recipient of "The Teague Award." The scholarship is considered a merit scholarship and the recipient will be selected on demonstrated academic ability and special achievement, and must have a comprehensive GPA above 3.5. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Adrian D. Hurst Award

Established by Adrian D. Hurst, emeritus professor of mathematics, this award recognizes a UNCW junior or senior math major who has achieved the highest overall academic grade point average. The award is presented each spring in the form of a plaque.

Biological Sciences Achievement Award

This award was established by the faculty of the Department of Biology and Marine Biology to honor annually the graduating senior biology major who has achieved the highest academic standing. The recipient is identified on a permanent plaque in Friday Hall.

Distinguished Engagement Award (Junior or Senior)

The Distinguished Engagement Award is presented to a select group of junior, senior, and transfer students who have made a significant contribution to UNCW over the course of their undergraduate experience. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Excellence in Engagement Award (Sophomore or Junior)

The Excellence in Engagement Award is presented to a select group sophomore, junior, and transfer students for outstanding contributions to improving the quality of student life during their time at UNCW. Recipients must currently be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Hoggard Medal For Achievement

"The Hoggard Medal" presented through the generosity of the late Dr. John T. Hoggard, is awarded annually to one graduating senior who, in the opinion of the faculty, has shown the most improvement during their years at the university. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Margaret Walthour Lippitt Scholarship

The New Student Leader Award is designed to honor a first-year student with a 3.00 GPA or higher who has demonstrated leadership potential, service to UNCW and the community, personal integrity, and significant involvement in campus organizations. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Martha M. Duncan Scholarship (Sophomore or Junior)

The Martha M. Duncan Scholarship is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The recipient serves as a "LEAD Fellow" for Student Involvement and Leadership in the department of Campus Life for their scholarship year. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Rachel Freeman Service Leadership Award

The Freeman Award, established in honor of the late Mae "Rachel" Freeman, is given to a senior with a cumulative GPA of 2.67 who has demonstrated commitment to bettering the lives of others, leading through examples of service, and the ability to work with others to create social change. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Pat Leonard Senior Medallion Award (Seniors Graduating in May or December)

The Pat Leonard Senior Medallion Award is the most prestigious award presented by the Division of Student Affairs on behalf of the university community. The award was renamed in 2021 to honor Pat Leonard, the late Vice Chancellor for Student Affairs, and her 37 years of exemplary service to UNCW. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 3.0. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award

The Duffy Student Sustainability Award is presented to one student who has been at UNCW at least one semester during the academic year. The recipient must be in good standing with the university and have a minimum 3.0 GPA. The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award was created in March of 2015 to honor the efforts of Lizzy, particularly for spearheading the proposal for The Green Initiative Fund, which brought support, resources and visibility to sustainability at UNCW. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

The Walter Schmid Physics Award

This award has been established in honor of the late Walter Schmid, engineer and inventor, to reward a senior bachelor of science physics major for excellence in physics. The award consists

of an engraved plaque and a physics encyclopedia.

UNCW Laureate Award (Sophomore or Junior)

The UNCW Laureate Award, inspired by the Nobel Peace Prize, is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

William A. Bryan Senior Leader Award

Student Involvement and Leadership in the department of Campus Life, with the support of the Alumni Association, sponsors the William A. Bryan Senior Leader Award. The award is given to a senior with a cumulative GPA of 3.00 who has demonstrated outstanding leadership on campus and/or in the community. Special emphasis is placed on integrity, creativity, ability to collaborate, and service to others. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Honor Societies at UNCW

Beta Alpha Psi

Beta Alpha Psi is a national scholastic and professional accounting fraternity. The primary objective of the fraternity is to encourage and give recognition to scholastic and professional excellence in the field of accounting. This includes promoting the study and practice of accounting; providing opportunities for self-development and association among members and practicing accountants; and encouraging a sense of ethical, social, and public responsibility. Beta Alpha Psi was founded in 1919. The Iota Alpha chapter at UNCW was chartered in 1996 and is a registered student organization through the Campus Activities and Involvement Center.

Beta Beta Beta National Biological Honor Society

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 175,000 persons have been accepted into lifetime membership, and more than 430 chapters have been established throughout the United States and Puerto Rico. TriBeta is a registered student organization through the Campus Activities and Involvement Center.

Gamma Sigma Epsilon

Gamma Sigma Epsilon, a national honorary chemical society, was founded at Davidson College on December 19, 1919. The society recognizes academic excellence in chemistry and fosters a more comprehensive and cooperative study of chemistry and related scientific disciplines. The organization now has 35 active chapters in 22 states, and is growing rapidly. The Alpha Epsilon chapter was established at UNCW in 2001. Eligibility for membership includes junior or senior standing, a 3.35 GPA on at least 30 hours of chemistry courses, and a 3.35 GPA.

Kappa Delta Pi International Honor Society in Education

Kappa Delta Pi International Honor Society in Education is committed to recognizing excellence and fostering mutual cooperation, support, and professional growth for educational professionals.

Lambda Pi Eta Honor Society

Lambda Pi Eta is the official communication studies honor society of the National Communication Association (NCA). As a member of the Association of College Honor Societies (ACHS), LPH has over 400 active chapters at four-year colleges and universities worldwide. LPH was founded in 1985 at the University of Arkansas. LPH became a part of the National Communication Association (NCA) in 1988, and the official honor society of the NCA in July 1995. LPH is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Epsilon Economics Honor Society

Omicron Delta Epsilon was founded by Professor John R. Commons at the University of Wisconsin in 1915. Its objectives include conferring distinction for high scholastic achievement in economics and stimulating and promoting student interest in all aspects of economics. ODE is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Kappa Society, Inc.

Omicron Delta Kappa (ODK) is the National Leadership Honor Society that recognizes and encourages superior scholarship, leadership, and exemplary character. Membership in ODK is a mark of the highest distinction and honor.
The society recognizes achievements in scholarship; athletics; campus or community service; social, religious activities, and campus government; journalism, speech and mass media; and the creative and performing arts. Emphasis is placed on the development of the whole person, both as a member of the college community and as a contributor to a better society. ODK is a registered student organization through the Campus Activities and Involvement Center.

Order of Omega

Order of Omega is a leadership honor society for members of Greek-letter organizations. Order of Omega recognizes juniors and seniors who have exemplified high standards in the areas of scholarship, leadership, involvement within their respective organization, and within the Greek, campus, and local communities. Members are selected from the top 3 percent of fraternity and sorority members at each institution. To date, over 500 chapters have been chartered throughout North America, each sharing the common goal of recognizing the many outstanding student leaders at their institution.

Phi Alpha National Honor Society in Social Work

Phi Alpha is a nationally recognized honor society for both undergraduate and graduate students majoring in social work. Founded in 1960, Phi Alpha now includes over 225 chapters. The Eta Omega Chapter of Phi Alpha was established at UNCW in 1998. The society recognizes students for excellence in scholarship and achievement in the field of social work. Eligibility for membership requires students to major in a CSEW-accredited social work program, have completed 9 semester hours of social work courses, achieved a minimum social work GPA of 3.25, and a minimum overall GPA of 3.00. Phi Alpha is registered as a student organization through the Campus Activities and Involvement Center.

Psi Chi National Honor Society in Psychology

Psi Chi is the national honor society in psychology. It was founded in 1929 in New Haven, Connecticut, to encourage, stimulate and maintain excellence in scholarship, and to advance the

science of psychology. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. The University of North Carolina Wilmington Chapter of Psi Chi was chartered on May 1, 1981, and is one of approximately 675 chapters nationwide. Psi Chi is registered as a student organization through the Campus Activities and Involvement Center.

A further list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html

Chancellor's List and Dean's List

Each semester, outstanding scholarship is recognized in the following tiered manner:

Chancellor's List

The Chancellor's List is composed of the names of all full-time undergraduates who earn a 4.0 semester GPA on all work taken. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Dean's List

The Dean's List is composed of the names of all full-time undergraduates who earn at least a 3.5 semester GPA on all work taken with no grades "B-" or below. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

•

Student-Athlete Support Services is a joint effort between Academic Affairs and the UNCW Athletic Department, which seeks to support the academic enrichment and life skill development of every Seahawk student-athlete. SASS Academic Coordinators work diligently to meet the needs of student-athletes' healthy balance of athletic demands while maintaining satisfactory academic standards.
Once student-athletes are admitted to the university, Student-Athlete Support Services Academic Coordinators assist them with registration, sequencing and scheduling of required courses, and selection of a major. They also arrange tutoring assistance and monitor student-athletes' grades, class attendance, study habits, and progress toward a degree. When a student-athlete declares his or her major, the Academic Coordinators continue to monitor academic performance and progress in conjunction with the student-athlete's departmental advisor.
Central to the role of SASS is the maintenance of a strong working relationship between the program advisors and the university's athletic department and coaches. The Academic Coordinators are knowledgeable about NCAA and CAA rules that apply to eligibility for practice and competition. They are available for consultation when unusual or difficult rule interpretations are needed. They also play a key role in the athletic certification process for all student-athletes.

Student-Athlete Academic Eligibility Requirements

Student-Athlete Support Services helps to monitor the academic progress of each student-athlete as it relates to NCAA, CAA and institutional rules and regulations. The following are examples of rules applying to a student-athlete's academic progress:

- Student-athletes must be enrolled in no fewer than 12 semester hours (full-time) during the fall and spring semesters to be eligible for practice, competition and financial aid.
- Student-athletes must earn at least six (6) semester hours each semester to be eligible for the following semester.
- Student-athletes must earn 18 semester hours during the regular academic year (fall and spring).
- The NCAA requires student-athletes to maintain progress towards a degree and has set benchmarks they must meet throughout their career. Student-athletes must earn: 24 hours prior

to the start of their third semester; 40% of a degree prior to the start of their fifth semester; 60% of a degree prior to the start of their seventh semester; 80% of a degree prior to the start of their ninth semester.

- The NCAA requires a student-athlete to designate a major by the beginning of their fifth semester, or to be
taking major courses that lead to a degree, as certified by the dean or an appropriate academic advisor.
- Student-athletes must meet UNCW and NCAA minimum cumulative grade point averages in order to compete.
- In order to determine initial athletic eligibility, all student-athletes must be approved through the NCAA Eligibility Center.
- Earn a minimum of 6 credit hours each semester to maintain eligibility for the following semester.
- Earn 18 credit hours during the regular academic year (fall and spring semesters).
- Earn 24 credit hours before the start of the third semester of enrollment.
- Maintain at least a 1.80 cumulative GPA.
- Earn a minimum of 6 credit hours each semester to maintain eligibility the following semester.
- Maintain at least a 1.80 cumulative GPA through the third semester for eligibility the following semester.
- Earn 18 credit hours during the regular academic year (fall and spring semesters).
- Declare a major.
- Meet 40% of degree requirements.
- Maintain at least a 1.90 cumulative GPA.
- Complete a minimum of 6 degree applicable hours each semester for eligibility the following semester.
- Maintain at least a 1.90 cumulative GPA through the fifth semester for eligibility the following semester.
- Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
- Meet 60% of degree requirements.
- Maintain at least a 2.00 cumulative GPA.
- Earn a minimum of 6 degree applicable hours each semester for eligibility the following semester.
- Maintain at least a 2.00 cumulative GPA through the seventh semester for eligibility the following semester.
- Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
- Earn 80% of degree requirements.
- Maintain at least a 2.00 cumulative GPA.
-

Abrons Student Health Center

The mission of the UNCW Abrons Student Health Center (SHC) is to provide student centered, affordable, quality health and preventive services to the students ofUNCW. Our goal is to help students stay as healthy as possible so that they can fully engage in and out of the classroom. We see ourselves as a key component of student success here on campus.
Services include confidential diagnosis and treatment of general and acute medical problems, psychiatric medication management, nutrition services, allergy injections, immunizations, laboratory services, women's health care, contraception services, men's health assessment and preventive services. The health fee is included in student fees and entitles students taking six or more credit hours to unlimited visits. There are additional charges for services such as lab tests, immunizations, administration of allergy shots, and annual exams and physicals. Students taking less than six hours will be entitled to health services upon payment of the health fee. The Abrons Student Health Center does not routinely issue excuses for class absences due to illness. For more information, or to make an appointment, please call 910-962-3280 or visit us on the web at Student Health Center.
All students are required to submit a completed "Medical History Form and Immunization Record" upon being admitted to UNCW. For more information, refer to the [[permalink=4160|new:{'title':1}]][[/permalink]] section of this catalogue.

Student Health Insurance

All undergraduate students taking six or more credits will be required to have health insurance to attend UNCW. Those unable to show proof of existing coverage will automatically be enrolled in the university-sponsored insurance plan. Details are available on the Abrons Student Health Center website.
See also: [[permalink=4113|dynamic:{'title':1}]][[/permalink]]

Health Promotion

Health Promotion, located in the Hundley Health Education Center in the Student Recreation Center, is UNCW's central resource for health education programs and services. The staff and peer educators develop and implement campus-wide programs designed to encourage healthy attitudes, practices, and behaviors as well as to reduce the illegal and high-risk use of alcohol and other drugs and the consequences that the members of this campus community experience as a result. Health Promotion is also the home for the CRC Hawks, UNCW's recovery community.

Staffed by three prevention professionals, a registered dietitian and a group of peer educators, the office offers programs on nutrition, sexual health, cold/flu prevention, stress management and other health topics. The registered dietitian provides individual counseling and programs for weight management, disease prevention/management, sports nutrition, disordered eating, vegetarian and vegan diets, and other nutrition concerns. All requests for information or consultation are handled confidentially, whether for personal interest, for a friend, or for a class assignment.

There are resources including brochures and handouts on health-related topics, as well as books, magazines, and DVDs available for loan. Resident Assistants, professors, and organizations can request a program through our website. For more information, please call 910-962-4135, or visit us on the web at www.uncw.edu/healthpromo.

Pharmacy

The UNCW Pharmacy is located in DePaolo Hall within the Abrons Student Health Center suite. Students can fill prescriptions written by UNCW providers as well as off-campus providers and may purchase over 100 over-the-counter medications and products. Crutches are also available for purchase. For more information, please call 910-962-3016 or visit us on the web at Student Health Center.

Counseling Center

The staff of the Counseling Center believes that a student's successful progress towards their degree is affected by a number of personal, social and academic factors. We offer a variety of services to support a student's academic and personal success including individual personal counseling, group counseling and personal development workshops. In addition, consultation services and outreach programs (including the In Harmony Initiative, focused on the mind-body connection) are offered for residence halls, classes, student organizations, as well as other campus departments and offices. An important role of the Counseling Center is working with students to develop the necessary skills and awareness to successfully meet their college life demands.

The Counseling Center is staffed by licensed counseling professionals including counselors, social workers and psychologists, as well as post-doctoral Psychology Fellows and occasionally other advanced trainees who have specific interests and skills in working within a university setting. Some common student concerns addressed at the Counseling Center include depression, anxiety, homesickness, relationships, coming out, cultural adjustment, family issues and grief. Assistance is also available for students with concerns related to sexual assault, substance abuse and body image. The transition to college can be particularly trying for students managing previously diagnosed conditions or on-going psychological concerns. The Counseling Center can assist students and families with identifying local providers who can keep support structures intact and provide longer term services.

Enrolled students are eligible for counseling services, which are confidential and accessible. Initial consultations and counseling appointments are available weekdays. After-hours and on weekends, phone consultation with an on-call counselor is available for students experiencing a psychological crisis by calling the Counseling Center at (910) 962-3746 and choosing the option that allows the caller to speak with a counselor.

When seeking services, students engage in an initial consultation with a counselor who will assess the student's needs and determine the services that will best meet those needs. If a student's needs require attention that is beyond the Counseling

Center's scope of practice, the counselor will work to connect the student with appropriate off-campus services. Students are encouraged to come and talk with a counselor about any concerns that are hindering their academic or personal success.
For additional information about the services and programs offered by the Counseling Center, please call (910) 962-3746, come by our offices on the second floor of DePaolo Hall, or visit our Web site: www.uncw.edu/counseling. Also, check our social media platforms, including UNCW Counseling Center - Youtube and Pinterest page for additional resources.

-

There are approximately 280 student organizations registered with Student Involvement and Leadership at UNCW. These organizations include: political, professional, academic, multicultural, religious, service, honorary, governing, graduate, special interest groups, student media, Greek-letter, sports clubs, and ethnic and religious organizations. These organizations help develop the UNCW community through the activities and affiliations they create. Many of the clubs are showcased during the fall Involvement Carnival held in late August/early September. You can find out information about these organizations in the Campus Activities and Involvement Center in the Fisher Student Center, Room 2029 or on WaveLink, UNCW's student organization and departmental management platform that offers a variety of opportunities to highlight events, showcase resources, and collaborate with others.

Fraternity and Sorority Life

Fraternities and Sororities are social organizations that can help personalize the college experience. Greek Life offers a smooth transition to college, life-long friendships, leadership opportunities, scholastic support, and philanthropic and community engagement opportunities. Each type of organization recruits its members differently and at different times - contact us to learn more! Students

interested in fraternity and sorority opportunities can find out about upcoming events on WaveLink at https://uncw.campuslabs.com/engage/organization/ofsl.

International Student Organization

The International Student Organization is a support group, a social network, and a promoter of international programs. The group consists of American students who have traveled and studied abroad and international students who are enrolled at the university. The organization hopes to foster an international presence on the campus and to help international students become familiar with American culture, the local area, and university life.

Leadership Development

At UNCW we believe every student is capable of practicing leadership because it is not about a position or title;, it's about the desire and drive to create *positive change*. Student Involvement and Leadership in the department of Campus Life offers workshops, retreats, and personalized coaching that equips students with the skills and tools needed to successfully practice leadership on campus, in the community, and in their careers. Students interested in leadership development opportunities can find out about upcoming events on WaveLink at https://uncw.campuslabs.com/engage/organization/caic/events

Student Community Engagement

Community engagement is much more than a service hour requirement - we make it a priority to connect students with the community in ways that make a positive

impact for both the organizations and the volunteers. This can be through volunteer work (on campus, in Wilmington and in other cities like Atlanta, New Orleans, or Asheville), philanthropy projects (like donating a Thanksgiving meal or holiday gifts), or by donating blood (we host monthly drives with the American Red Cross). Students interested in community engagement opportunities can find out about upcoming events on GivePulse: https://uncw.givepulse.com/group/1027-University-of-North-Carolina-Wilmington

Student Government Association: Representing the Voice and Vision of UNCW Students

The Student Government Association (SGA) is a democratic organization, permitting expression of student opinion, working for the best interest of the university and upholding a high standard of morals and conduct. SGA embodies UNCW's shared governance commitment through partnerships with the UNCW administration, Faculty Senate and Staff Senate. Student activity fee money supports the Student Government Association in its objectives and activities. Officers, class representatives, and at-large representatives are elected by the student body.
Executive Committees are comprised of Appropriations, Diversity and Inclusion, Marketing, Communications, and Health & Wellness; Senate committees are comprised of Student Services, Campus Services, Academic Affairs, Internal Affairs, and External Affairs. The Student Government Association is also a member of the North Carolina Association of Student Governments. Contact the SGA Office or visit them on the second floor of the Fisher Center to learn more!

https://uncw.edu/seahawk-life/support-success/transition-programs/
The Transition Programs Office is responsible for providing comprehensive programs that will assist undergraduate students and their families in their transition to the university. These programs expose new and transfer students to the

educational opportunities within UNCW, introduce them to the academic and co-curricular life of the institution, and assist them in their on-going transition to the university beyond orientation. Transition Programs also assists parents and family members in supporting their student's success through frequent communication and engagement opportunities. In addition, Transition Programs is responsible for the coordination and implementation of Commencement.

-

UNCW offers voluntary meal plans for students living off campus or upperclassmen living in Voluntary On-Campus Housing, consisting of Seahawk Village, Seahawk Landing, or Seahawk Crossing. The plans are designed to give students the convenience of using their One Card instead of carrying cash.
Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. For a list of current change period dates and additional details, please visit the UNCW student meal plan website at* www.uncw.edu/studentmealplans.
Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Voluntary or Off-Campus Meal Plans

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.
Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period. Visit https://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.

Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

TealPay Payment Plan Term Enrollment Fee

Students have the option to enroll in one of UNCW's TealPay payment plans. Three options are available each Fall and Spring to pay the charges on the student's account with three, four or five installment payments during the term. The three-installment payment plan is available in the Summer. Enrollment fees are non-refundable. OAP students are not eligible for the payment plans due to the course duration.

Academic and Student Support Resources

-

UNCW provides access and reasonable accommodation to individuals with disabilities and prohibits unlawful discrimination on the basis of disability in its programs, services and activities. The ADA/504 Compliance Officer coordinates and monitors campus compliance with requirements of Section 504 of the Rehabilitation Act of 1973 (Public Law: 93-112), as amended, and the Americans with Disabilities Act of 1990 (Public Law: 101-336), as amended.
Current and prospective students with disabilities who need accommodations or who have questions about accessibility may contact the Disability Resource Center. Inquiries concerning UNCW policy and compliance with federal and state laws and regulations concerning discrimination in education and employment programs and activities may be directed to:
Brian Victor
ADA/504 Compliance Officer
University of North Carolina Wilmington
601 South College Road
DePaolo Hall 1007
Wilmington, NC 28403-5985

Phone: 910-962-7771
Fax: 910-962-2284
Email: ADA-504-Coordinator@uncw.edu
Inquiries may also be directed to the U.S. Department of Education Office for Civil Rights, the U.S. Equal Employment Opportunity Commission, or the applicable North Carolina state agency.

-

The central purpose of the Career Center is to help students prepare for academic and career success. The center assists students with self-assessments, values clarification and occupational data to help make informed choices of academic majors. The Career Center also provides opportunities for internships and discovering the relationship of skills acquired to the broader work world. The Career Center helps translate academic achievements, co-curricular activities and work experiences into successful job campaigns or graduate school applications. Through the journey of learning, career exploration, and applied learning opportunities, students and alumni are motivated to expand their knowledge of themselves and the world of work in a dynamic global community.
The Career Center encourages students and alumni to:

- **EXPLORE**
Explore work values, interests, skills, and personality using Career Center resources in order to optimize academic and career planning
- **EXPERIENCE**
Develop skills and competencies sought by employers, as outlined in the Skill Seeker, through applied learning opportunities
- **ENGAGE**
Engage and network with faculty and other professionals as well as local, state, national, and global employers to learn how to meet the needs of an ever-changing modern society
- **EMBARK**
Take responsibility for making informed career decisions and developing further education and employment plans over the lifespan

-

Students with disabilities are a rapidly growing minority at UNCW, as elsewhere in American higher education. Consistent with Section 504 of the Rehabilitation Act of 1972 and the Americans with Disabilities Act (as amended), it is the policy of UNCW that no otherwise qualified individual in the United States be excluded from, denied benefit of, or be subject to discrimination based on their disability within

university activities, programs, or services.
Disabililty Resource Center (DRC) is the designated office providing services and information to students with disabilities enrolled or considering enrollment at UNCW. As such, DRC is committed to providing assistance to enable qualified students with disabilities equal opportunity to accomplish their educational goals and derive all of the benefits of campus life.
DRC serves as an advocate for students with disabilities, and as a resource for UNCW faculty, staff and administration. Through intentional partnerships, DRC strives to create an atmosphere that encourages students' independence, responsibility for self, effective communication skills, and a respect for the diverse learning experience.
Students with disabilities needing accommodations or questions regarding resources should contact Disability Resource Center for more information, including documentation guidelines and requirements.
DRC@uncw.edu
(910) 962-7555
www.uncw.edu/disability

SEA.*lab* (Strategy Enhancement for Achievement)

Established to meet the unique needs of students with disabilities, SEA Lab offers students enrolled at the DRC the assistance of experienced and knowledgeable staff, to aid in their development of skills necessary for academic success.
Through SEA Lab, students have an opportunity to explore various strategies and techniques to assist them in their goals toward overall academic achievement and individual development. SEA Lab offers workshops and 1.1 instruction on topics such as:

- Time management and organizational skills
- Reading strategies and notetaking
- Test-taking and final exam preparation
- Understanding of one's disability
- Self-advocacy and metacognitive development
-

Information Technology Services (ITS) is an innovative organization committed to

providing a technologically progressive environment for students, faculty and staff. As part of Business Affairs, ITS is dedicated to leading, collaborating and supporting with cost effective services that promote the mission of the university. ITS is also committed to promoting and sustaining a powerful learning experience by responding to students' needs through student feedback, student engagement and collaboration with constituent groups across campus.

ITS provides an array of services to students, some of which include:

- An official UNCW email address, to connect with the university community, their professors and each other.
- mySeaport – the university online portal. Through mySeaport, students have access to their UNCW email, calendar, class information, online registration, billing information, campus news and additional student resources and services. Furthermore, students may access various educational tools—such as Percipio computer-based training courses and online materials.
- The Technology Assistance Center (TAC) provides one-on-one support via chat, in-person in Randall Hall, and by phone. Services provided by the TAC include, but are not limited to, assistance with: Windows and Macintosh support, wireless connectivity, password issues, Canvas support, and software questions. Students may access the myTAC portal to search and view the knowledge base, submit a service request, or they may CHAT with the Technology Assistance Center (TAC).
- Student laptop checkout program located at the TAC Walk-in Center in Randall Hall.
- Access to the Knowledge Base - Microsoft Office (ex. Word, Excel, PowerPoint, etc.).
- Access to the Adobe Creative Cloud | UNCW.
- Educational discounts on Apple and Dell computers.
- Canvas Learning Management System for online, blended, and hybrid courses.
- Horizon Software in the Cloud | UNCW to access UNCW software whether you are on- or off-campus.
- ITS offers both wireless and wired options for connecting devices to the campus network. *Hawkwifi* is our main wireless network and is used for computers, mobile devices, and tablets. *Labnet* is used for entertainment devices like TV's, game consoles, and streaming devices. Students can self-register these devices at the MyDevices Portal. Additional assistance with network services in the residence halls, including assistance with device registrations and connecting wired or wireless devices, can be obtained through the myTAC portal.
- Classroom technology for lecture instruction and presentation. General instructional spaces include a permanent PC or Mac, depending upon program needs, as well as laptop connections, room audio, and large format display(s) as appropriate for room size and viewing acuity needs.
- Collaborative technology for Active Learning Classrooms, Conference Rooms, and Huddle Spaces. Spaces include a display that the students can connect to, either wired or wirelessly. Various locations also include cameras, microphones, and speakers for remote interaction as well as in-person via platforms such as Zoom.
- Dedicated Distance education classrooms, which include telepresence, video conferencing, live

streaming and more. "Tier 3" classrooms are designed for Hyflex learning (class content is delivered both in-person and via synchronous streaming, with an equitable experience for both), and "Tier 4" spaces which include advanced capabilities such as multiple cameras, a control room, and in-person support technicians.

Asian Heritage Cultural Center https://uncw.edu/seahawk-life/get-involved/students/asian-heritage-cultural-center/

Centro Hispano creates a responsive educational, scholarly and social environment for Latinx students, faculty and others interested in Hispanic and Latinx culture. Primarily, the goal of Centro Hispano is to support the rapidly growing number of Latinx students applying, attending and completing degrees at UNCW. Centro Hispano promotes opportunities that broaden understanding and appreciation of diverse Hispanic cultures, offer resources that maximize the success of each student, and most importantly, provides a place where every student feels at home while striving for success. Furthermore, the center supports the research, teaching and service components necessary for the training and preparation of global citizens. It also informs, guides and champions UNCW's engagement with the region on issues critical to Latinx constituencies.

Centro Hispano https://uncw.edu/seahawk-life/get-involved/students/centro-hispano/

Centro Hispano creates a responsive educational, scholarly and social environment

for Latinx students, faculty and others interested in Hispanic and Latinx culture. Primarily, the goal of Centro Hispano is to support the rapidly growing number of Latinx students applying, attending and completing degrees at UNCW. Centro Hispano promotes opportunities that broaden understanding and appreciation of diverse Hispanic cultures, offer resources that maximize the success of each student, and most importantly, provides a place where every student feels at home while striving for success. Furthermore, the center supports the research, teaching and service components necessary for the training and preparation of global citizens. It also informs, guides and champions UNCW's engagement with the region on issues critical to Latinx constituencies.

Mohin-Sholz LGBTQIA Resource Office https://uncw.edu/seahawk-life/get-involved/students/lgbtqia-resource-office/

The Mohin-Scholz LGBTQIA Resource Office at the University of North Carolina Wilmington supports lesbian, gay, bisexual, transgender, questioning, intersex and allied students, faculty, staff, and alumni. Our office works to create a safe and inclusive environment for the LGBTQIA community and contribute to a culturally rich campus. Additionally, the office works both to raise awareness and inclusion of sexual and gender minorities and to provide information, referral, support, and programming to the UNCW Community. We do this through community building, advocacy, social justice and diversity education and the development of global citizens. All members of the UNCW campus are welcome, regardless of gender identity or other factors.

Upperman African American Cultural Center https://uncw.edu/seahawk-life/get-involved/students/african-american-cultural-center/

The Upperman African American Cultural Center (UAACC) provides UNCW students, faculty, staff, and others interested in African and African American culture a central location from which they can experience the rich heritage of African diaspora through scholarly and cultural workshops, presentations, exhibits, performances, lectures, and print and visual media. Working collaboratively with campus and community partners, the UAACC works to positively impact the recruitment, retention, and academic achievement of black students at UNCW, and contribute to the preparation of *all* UNCW students to excel in an increasingly diverse world.

- The UNCW Library, with its Randall Hall and Discovery Hall, fosters and promotes student success, faculty scholarship, and community engagement, providing information resources, learner-and-scholar-centered services, and community programming for the campus and greater Southeast North Carolina community in a welcoming and inclusive environment.
  Its collections include approximately 1.5 million items in various formats, including almost 400,000 print books, more than 600,000 eBooks, approximately 300,000 print and electronic journals, almost 60,000 media items (e.g., DVDs, CDs), and just under 70,000 streaming videos. The library subscribes to more than 550 databases providing UNCW students, staff, and faculty access to journals, newspapers, statistics, primary source material, videos, and other online content. Library resources are searchable from the library's website: https://library.uncw.edu.
  The Library's Interlibrary Loan and Document Delivery service provides access to information resources held by other libraries around the world free of charge to UNCW students, faculty and staff. Requests are submitted online through the Library's website.
  The library's Center for Southeast North Carolina Archives and History offers students access to primary source materials that focus on the history, culture, economy, environment, and politics of southeastern NC and includes University Archives as well as 400 unique manuscript collections, almost 900 oral histories, and hundreds of books. Its collection also includes state and federal government documents (print and electronic).
  Knowledgeable and helpful library faculty, staff, and student

assistants, provides comprehensive information access and research assistance. The Library is dedicated to the goal of educating users, especially students, in the identification, use and evaluation of information in all formats. In addition to providing immediate assistance at the Library Help Desk, staff and faculty provide research assistance by chat, e-mail, phone, or in-depth assistance by appointment. The Library partners with other library service providers for 24/7 chat reference service. Subject guides and tutorials available on the Library's website assist users in learning about the Library's resources. Additionally, library faculty offer assistance to all UNCW students and instructors in developing important research skills, including the following services:

- Individual research consultations by appointment.
- Liaison Librarians who work with students in each academic department on their discipline specific research projects.
- Course related instruction that teaches library and information research methods tailored to the course topic.
- Workshops on various aspects of information research and specific resources, digital creation and editing software, 3-D modeling and printing and other topics.
-

The University Learning Center (ULC) is UNCW's "one-stop shop" for high-quality peer academic support. We are committed to being a vital part of UNCW students' education. Our academic support services are based on the principle that quality learning takes place when peers work together. We provide students various learning opportunities that complement the classroom experience and, in collaboration with our campus partners, we provide our peer educators with a valuable pre-professional experience.

The ULC supports the development of learning skills and strategies, encouraging student confidence in lifelong success. We offer help in most subjects, including math and science, languages, and many other UNCW courses. We also provide study skills support and writing help. Some ULC services are by appointment only, but we also provide many drop-in services (no appointment needed!).

All ULC peer educators are faculty-recommended, meet minimum GPA requirements, and engage in an internationally certified training program. Each academic support service is free to all UNCW students.

Call (910)962-7857 or e-mail ulc@uncw.edu with questions. Visit our website to schedule an appointment and view drop-in service schedules: https://uncw.edu/seahawk-life/support-success/university-learning-

center/.
All appointments can be scheduled in person or online; drop-in services are in-person only.

- University Testing Services (UTS) provides secure computer-based and paper-based testing and test proctoring services for UNCW and the surrounding communities. The staff strives to provide a quality testing experience that is fair, efficient, and accessible in a professionally monitored facility. Admissions and certification testing programs as well as proctoring services for online courses are available through UTS. Other proctoring services may be provided on a space-available basis. Please contact us at: testingservices@uncw.edu to inquire about availability or for additional information about testing and proctoring services and online scheduling.
Testing programs coordinated by or administered in UTS include: CLEP, DSST, GRE, MAT, the PRAXIS I and II series, TEAS, ibt-TOEFL, and proctored exams. Each national program has testing dates, eligibility, registration and payment requirements that are determined by the testing companies. This information can be found in registration materials or on their respective websites. Links to local appointment, payment and scheduling information can be found on our website: https://www.uncw.edu/testingservices.
Accommodated testing for candidates with disabilities or for Title IX compliance is available; however, candidates must follow the requirements for submission of requested documentation for review and approval either to the national companies (for major testing programs/Prometric) or to the Disability Resource Center or the Title IX/Cleary Office (for smaller or campus-based programs), if not already registered with the DRC or if not referred by the Title IX/Cleary Office.
University Testing Services does not determine a candidate's eligibility for accommodations or accommodations available for the candidate. To avoid delays, please discuss your needs with Testing Services staff prior to appearing for your testing appointment.
Generally, services provided in the Testing Center are by appointment and require payment in advance. Appointments for national testing (Prometric programs) are determined by contacting the relevant company either by phone or online. For the remaining programs or proctoring services, available appointments may be viewed through an online registration and payment system, RegisterBlast, accessible on

the UTS homepage. Valid (unexpired) government-issued photo identification with a signature (Driver's License, passport, Military ID, etc.) is always required for testing. For additional information or to make an appointment, please call (910) 512-6785, come by our offices in DePaolo Hall, Room 1021, or visit our website at https://www.uncw.edu/testingservices.

ADA & 504 Compliance

UNCW provides access and reasonable accommodation to individuals with disabilities and prohibits unlawful discrimination on the basis of disability in its programs, services and activities. The ADA/504 Compliance Officer coordinates and monitors campus compliance with requirements of Section 504 of the Rehabilitation Act of 1973 (Public Law: 93-112), as amended, and the Americans with Disabilities Act of 1990 (Public Law: 101-336), as amended.
Current and prospective students with disabilities who need accommodations or who have questions about accessibility may contact the Disability Resource Center. Inquiries concerning UNCW policy and compliance with federal and state laws and regulations concerning discrimination in education and employment programs and activities may be directed to:
Brian Victor
ADA/504 Compliance Officer
University of North Carolina Wilmington
601 South College Road
DePaolo Hall 1007
Wilmington, NC 28403-5985
Phone: 910-962-7771
Fax: 910-962-2284
Email: ADA-504-Coordinator@uncw.edu
Inquiries may also be directed to the U.S. Department of Education Office for Civil Rights, the U.S. Equal Employment Opportunity Commission, or the applicable North Carolina state agency.

Co-Curricular Activities

Students will be offered opportunities and incentives to participate in co-curricular activities such as field trips, campus events, study abroad, and community events.

Career Center

The central purpose of the Career Center is to help students prepare for academic and career success. The center assists students with self-assessments, values clarification and occupational data to help make informed choices of academic majors. The Career Center also provides opportunities for internships and discovering the relationship of skills acquired to the broader work world. The Career Center helps translate academic achievements, co-curricular activities and work experiences into successful job campaigns or graduate school applications. Through the journey of learning, career exploration, and applied learning opportunities, students and alumni are motivated to expand their knowledge of themselves and the world of work in a dynamic global community.

The Career Center encourages students and alumni to:

- **EXPLORE**
  Explore work values, interests, skills, and personality using Career Center resources in order to optimize academic and career planning
- **EXPERIENCE**
  Develop skills and competencies sought by employers, as outlined in the Skill Seeker, through applied learning opportunities
- **ENGAGE**
  Engage and network with faculty and other professionals as well as local, state, national, and global employers to learn how to meet the needs of an ever-changing modern society
- **EMBARK**
  Take responsibility for making informed career decisions and developing further education and employment plans over the lifespan

For more information, visit Career Center online at: www.uncw.edu/career or call 910-962-3174. Appointments can be scheduled via Handshake https://app.joinhandshake.com/stu/appointments..

Fisher University Union

Seahawk Mail

Seahawk Mail is a full-service U.S. Postal Service contract station serving UNCW students, faculty, staff, and the general public. Seahawk mail provides on-campus

student mail services, including mailboxes and package pickup. Located in the Fisher University Union, Seahawk Mail is your one-stop shop for postage, money orders, mailing supplies, FAX services, and notary services. Seahawk Mail is open weekdays from 8:30 a.m. through 4:30 p.m. with package pickup service until 5 p.m. Forms of payment accepted at Seahawk Mail are cash, check (with valid identification), Seahawk Buck$, and credit cards (Visa, American Express, and MasterCard. There is a required minimum purchase of $3.00 for credit cards). Freshmen, residential and international students are mandatorily assigned a campus box for their personal and university correspondence. For students living on campus, the campus mailbox serves as their official campus address and is their only mailing address. All other students may request a mailbox assignment if desiring to receive mail or packages at Seahawk Mail. Package pickup service includes all carriers, such as U.S.P.S., UPS, Fed Ex, DHL, and floral delivery. Students will receive an email location whe mail is ready for pickup. Students are responsible for providing a forwarding address when they move or leave the university. Please visit our Web site at www.uncw.edu/mail for more information.

UNCW Bookstore

Located in the Fisher Student Center, the UNCW Bookstore is your one-stop shop for all your UNCW needs from textbooks to school spirit apparel. You can rent, purchase used textbooks, and even buy/rent digital textbooks for all your course related materials. Shop confidently at the UNCW Bookstore as they offer a Price Match Program to Amazon.com and BN.com to help students get the best price possible. They also carry a large assortment of school supplies and tech supplies including, laptops and printers. The UNCW Bookstore offers the largest inventory of Seahawk apparel and gift items so you can show off your Seahawk pride! They are also home to Dub City Brew Café who proudly brew Starbucks Coffee where students can use their One Card funds to grab a quick beverage or snack. Forms of payment accepted at the bookstore include Seahawk Buck$, cash, credit/debit cards, Apple Pay, Samsung Pay, Barnes & Noble gift cards, and Bookstore Dollars** and Food Dollars (Dub City Brew Café only.
Can't make it in to the bookstore? No problem! All of your textbooks and favorite UNCW Gear are available online at http://www.ShopUNCW.com. Simply place an online order, and we'll notify you when it is ready!

Contact the UNCW Bookstore at 910-962-3188 or, at www.uncw.edu/bookstore for more information on bookstore services.
**Some exclusions and restrictions apply to the Price Match Program. For full details, please visit the UNCW Bookstore website or ask one of our booksellers.*
**Bookstore Dollars – an optional account on the UNCW One Card that provides students with the ability to get their books and supplies without waiting for a financial aid refund by charging the selected funds to their student account. Funds on the Bookstore Dollars account do not expire – they roll over from semester to semester and are continually available to use for any item in the bookstore, including clothing items, Dub City Brew Café items, textbooks, technology items, and so much more! Please visit http://www.uncw.edu/onecard for more information.

University Information Center

The Information Center, conveniently located on the first floor of the Fisher Student Center, provides a variety of information about campus, student and community activities, as well as campus telephone numbers. The center also provides free laptop computer check out, umbrella checkout, and serves as the campus Lost and Found. Contact the Information Center at (910) 962-3841.

Information Technology Services

Information Technology Services (ITS) is an innovative organization committed to providing a technologically progressive environment for students, faculty and staff. As part of Business Affairs, ITS is dedicated to leading, collaborating and supporting with cost effective services that promote the mission of the university. ITS is also committed to promoting and sustaining a powerful learning experience by responding to students' needs through student feedback, student engagement and collaboration with constituent groups across campus.
ITS provides an array of services to students, some of which include:

- An official UNCW email address, to connect with the university community, their professors and each other.
- mySeaport – the university online portal. Through mySeaport, students have access to their UNCW email, calendar, class information, online registration, billing information, campus news and additional student resources and services. Furthermore, students may access various educational tools—such as Percipio computer-based training courses and online materials.

- The Technology Assistance Center (TAC) provides one-on-one support via chat, in-person in Randall Hall, and by phone. Services provided by the TAC include, but are not limited to, assistance with: Windows and Macintosh support, wireless connectivity, password issues, Canvas support, and software questions. Students may access the myTAC portal to search and view the knowledge base, submit a service request, or they may CHAT with the Technology Assistance Center (TAC).
- Student laptop checkout program located at the TAC Walk-in Center in Randall Hall.
- Access to the Knowledge Base - Microsoft Office (ex. Word, Excel, PowerPoint, etc.).
- Access to the Adobe Creative Cloud | UNCW.
- Educational discounts on Apple and Dell computers.
- Canvas Learning Management System for online, blended, and hybrid courses.
- Horizon Software in the Cloud | UNCW to access UNCW software whether you are on- or off-campus.
- ITS offers both wireless and wired options for connecting devices to the campus network. *Hawkwifi* is our main wireless network and is used for computers, mobile devices, and tablets. *Labnet* is used for entertainment devices like TV's, game consoles, and streaming devices. Students can self-register these devices at the MyDevices Portal. Additional assistance with network services in the residence halls, including assistance with device registrations and connecting wired or wireless devices, can be obtained through the myTAC portal.
- Classroom technology for lecture instruction and presentation. General instructional spaces include a permanent PC or Mac, depending upon program needs, as well as laptop connections, room audio, and large format display(s) as appropriate for room size and viewing acuity needs.
- Collaborative technology for Active Learning Classrooms, Conference Rooms, and Huddle Spaces. Spaces include a display that the students can connect to, either wired or wirelessly. Various locations also include cameras, microphones, and speakers for remote interaction as well as in-person via platforms such as Zoom.
- Dedicated Distance education classrooms, which include telepresence, video conferencing, live streaming and more. "Tier 3" classrooms are designed for Hyflex learning (class content is delivered both in-person and via synchronous streaming, with an equitable experience for both), and "Tier 4" spaces which include advanced capabilities such as multiple cameras, a control room, and in-person support technicians.

For more information on ITS and their services go to www.uncw.edu/its.

UNCW Library

The UNCW Library, with its Randall Hall and Discovery Hall, fosters and promotes student success, faculty scholarship, and community engagement, providing information resources, learner-and-scholar-centered services, and community programming for the campus and greater Southeast North Carolina community in a welcoming and inclusive environment.

Its collections include approximately 1.5 million items in various formats, including almost 400,000 print books, more than 600,000 eBooks, approximately 300,000 print and electronic journals, almost 60,000 media items (e.g., DVDs, CDs), and just under 70,000 streaming videos. The library subscribes to more than 550 databases providing UNCW students, staff, and faculty access to journals, newspapers, statistics, primary source material, videos, and other online content. Library resources are searchable from the library's website: https://library.uncw.edu. The Library's Interlibrary Loan and Document Delivery service provides access to information resources held by other libraries around the world free of charge to UNCW students, faculty and staff. Requests are submitted online through the Library's website.

The library's Center for Southeast North Carolina Archives and History offers students access to primary source materials that focus on the history, culture, economy, environment, and politics of southeastern NC and includes University Archives as well as 400 unique manuscript collections, almost 900 oral histories, and hundreds of books. Its collection also includes state and federal government documents (print and electronic).

Knowledgeable and helpful library faculty, staff, and student assistants, provides comprehensive information access and research assistance. The Library is dedicated to the goal of educating users, especially students, in the identification, use and evaluation of information in all formats. In addition to providing immediate assistance at the Library Help Desk, staff and faculty provide research assistance by chat, e-mail, phone, or in-depth assistance by appointment. The Library partners with other library service providers for 24/7 chat reference service. Subject guides and tutorials available on the Library's website assist users in learning about the Library's resources. Additionally, library faculty offer assistance to all UNCW students and instructors in developing important research skills, including the following services:

- Individual research consultations by appointment.
- Liaison Librarians who work with students in each academic department on their discipline specific research projects.
- Course related instruction that teaches library and information research methods tailored to the course topic.
- Workshops on various aspects of information research and specific resources, digital creation and editing software, 3-D modeling and printing and other topics.

During the semester at least one building is open 7am – 2am Mon-Thu, 7am – 9pm

Fri, 12 noon – 6pm Sat and 10am Sun - 2am Mon. Check the library's website for up-to-date building and service hours. The library provides approximately 2700 seats in a variety of environments. Fifty-seven group study rooms are available throughout both buildings. These rooms are equipped with large screen HDTV displays to use with laptops in order to assist student collaboration and can be reserved online through the library's website. There are 100 computers available in the library, many with dual monitors, several scanners including a walk-up quick scanning station, Bloomberg terminals, and GIS workstations.

The Maker Studio, located in the newly opened Discovery Hall, provides technologies such as virtual and augmented reality, 3D printing, modeling and laser cutting, and a state-of-the-art recording studio to all UNCW students, staff, and faculty in support of creation, prototyping, and digital literacy. Additionally, Discovery Hall is home to a Visualization & Analysis Lab (VAL) with a 30-foot video display wall and high-performance computing for classes, presentations, and collaborations to visualize and display large data sets, as well as an events space and exhibit gallery, daily lockers, and a Library Technology Desk to provide support for technology and loan equipment such as cameras and microphones.

The second floor of Randall Hall also houses a large graduate student lounge with group study, lockers, and other amenities, a sensory-friendly study space to support diverse student study needs, a "living room" gathering space for collaboration and study, and the Retreat at Randall, a wellness space intended for quiet contemplation, reflection, meditation, mindfulness, prayer, stress relief, stretching, and yoga.

Central Perch in Randall Hall provides beverages and food; a small food store in the Link offers grab-and-go sandwiches, salads, and snacks. The Technology Assistance Center (TAC), operated by UNCW Information Technology Servicesand the iPrint Business Center, are also located in Randall Hall. In addition to offering technology assistance, TAC also provides laptops to check out.

In addition to its services and spaces, the Library offers a variety of programming throughout the year including readings, workshops, exhibits and study breaks.

UNCW Library Video Tour

University Learning Center

The University Learning Center (ULC) is UNCW's "one-stop shop" for high-quality peer academic support. We are committed to being a vital part of UNCW students'

education. Our academic support services are based on the principle that quality learning takes place when peers work together. We provide students various learning opportunities that complement the classroom experience and, in collaboration with our campus partners, we provide our peer educators with a valuable pre-professional experience.

The ULC supports the development of learning skills and strategies, encouraging student confidence in lifelong success. We offer help in most subjects, including math and science, languages, and many other UNCW courses. We also provide study skills support and writing help. Some ULC services are by appointment only, but we also provide many drop-in services (no appointment needed!).

All ULC peer educators are faculty-recommended, meet minimum GPA requirements, and engage in an internationally certified training program. Each academic support service is free to all UNCW students.

All appointments can be scheduled in person or online; drop-in services are in-person only.

University Testing Services

University Testing Services (UTS) provides secure computer-based and paper-based testing and test proctoring services for UNCW and the surrounding communities. The staff strives to provide a quality testing experience that is fair, efficient, and accessible in a professionally monitored facility. Admissions and certification testing programs as well as proctoring services for online courses are available through UTS. Other proctoring services may be provided on a space-available basis. Please contact us at: testingservices@uncw.edu to inquire about availability or for additional information about testing and proctoring services and online scheduling.

Testing programs coordinated by or administered in UTS include: CLEP, DSST, GRE, MAT, the PRAXIS I and II series, TEAS, ibt-TOEFL, and proctored exams. Each national program has testing dates, eligibility, registration and payment requirements that are determined by the testing companies. This information can be

found in registration materials or on their respective websites. Links to local appointment, payment and scheduling information can be found on our website: https://www.uncw.edu/testingservices.
Accommodated testing for candidates with disabilities or for Title IX compliance is available; however, candidates must follow the requirements for submission of requested documentation for review and approval either to the national companies (for major testing programs/Prometric) or to the Disability Resource Center or the Title IX/Cleary Office (for smaller or campus-based programs), if not already registered with the DRC or if not referred by the Title IX/Cleary Office.
University Testing Services does not determine a candidate's eligibility for accommodations or accommodations available for the candidate. To avoid delays, please discuss your needs with Testing Services staff prior to appearing for your testing appointment.
Generally, services provided in the Testing Center are by appointment and require payment in advance. Appointments for national testing (Prometric programs) are determined by contacting the relevant company either by phone or online. For the remaining programs or proctoring services, available appointments may be viewed through an online registration and payment system, RegisterBlast, accessible on the UTS homepage. Valid (unexpired) government-issued photo identification with a signature (Driver's License, passport, Military ID, etc.) is always required for testing. For additional information or to make an appointment, please call (910) 512-6785, come by our offices in DePaolo Hall, Room 1021, or visit our website at https://www.uncw.edu/testingservices.

Athletics

The university holds membership in the National Collegiate Athletic Association and the Coastal Athletic Association. Varsity intercollegiate teams are fielded for men in basketball, cross country, baseball, golf, soccer, tennis, swimming and diving, and outdoor track and field. Varsity intercollegiate teams for women are fielded in basketball, cross country, softball, golf, soccer, tennis, swimming and diving, volleyball, beach volleyball and indoor/outdoor track and field.

Mission Statement

UNCW Athletics enriches the university through a commitment to developing

leadership qualities among its student-athletes by providing opportunities which support and promote academic excellence, community engagement, and competitive success.

Core Values

UNCW Athletics is committed to and intentional about allowing these beliefs to drive its decision-making and serve as the foundation for future growth.
STUDENT-ATHLETE FOCUSED: Put student-athlete development and success at the center of everything we do, by producing leaders, productive citizens and friends of the university.
COMMUNITY: Educate, enhance, serve and engage constituents of the athletics department through stewardship at local, regional and global levels.
EXCELLENCE: Be conference and national leaders through competitive success, academic performance and a complete student-athlete experience.
INTEGRITY: Operate with the highest standards of ethics, sportsmanship, honesty, trust, dignity and respect.
INNOVATION: Adopt best practices in everything we do, and foster new ideas and methods by being proactive, distinctive and resourceful.
DIVERSITY: Create, maintain and celebrate an environment that is fair, embracing and inclusive to all people.
The Equity in Athletics Disclosure Act report is available online at www.uncwsports.com by clicking on the Inside Athletics tab and then on the EADA Report.

Priorities

Priority I: Attract & Retain Outstanding Student-Athletes, Staff and Coaches
Priority II: Enhance Diversity, Inclusion & Equity
Priority III: Promote Academic, Competitive and Service Excellence
Priority IV: Provide the Highest Quality Experience for Students
Priority V: Engage Partners To Support Our Success
Priority VI: Enable Fiscal Sustainability
Priority VII: Fund and Build Facilities

Our mission vision and values guide our athletic community and foster a sense of family among the Seahawk Nation. The tenets that make competing as a UNCW Seahawk Student-Athlete unique include:

- Striving for excellence in all phases of campus life including academics, competition, leadership and service.
- Embracing the student-athlete experience as preparation for success at the highest levels in one's life after graduation.
- Enjoying a comprehensive university experience, including broad engagement and involvement in the fabric of campus life.
- Taking care of one's self by nurturing the body, mind and spirit, and using resources available to help foster success in these realms.
- Feeling an indelible sense of pride to represent UNCW at the highest competitive level.
- Accepting that as ambassadors of UNCW, student-athletes will apply the highest self-accountability and informed decision-making, promote inclusion and diversity in the broadest sense, and treat others with the utmost dignity and respect on campus and in the community.
- Expecting that students, faculty and staff will support student-athletes and UNCW Athletics in the classroom, on campus and in competition.

The Campus

The University of North Carolina Wilmington is located in the southeastern part of the state on a 661-acre tract midway between the Cape Fear River and the Atlantic Ocean. The city of Wilmington is situated on the east bank of the Cape Fear River about 15 miles from Carolina Beach and 10 miles from Wrightsville Beach. The metropolitan statistical area, of which Wilmington is a part, now has a population in excess of 360,000. Several main highways lead into the city, and commercial air service provides easy access to other metropolitan areas north, south, and west. Ocean breezes and the nearness of the Gulf Stream give Wilmington a delightful year-round climate, and the area's proximity to the ocean provides unlimited recreational opportunities.

The spacious well-landscaped campus was first occupied by the university in 1961. The number of buildings has increased from three in 1961 to 162 today, dispersed across a coastal pine savannah habitat. The buildings on the campus are of modified Georgian architecture, including academic, administrative, student life, residence, dining, athletic, and support buildings, all of which are completely air-conditioned. There are several athletic fields and intramural fields.

Campus Map

Click here to view the Campus Map.

Buildings

For information on university buildings, click here.

Herbert Bluethenthal Memorial Wildflower Preserve

The Herbert Bluethenthal Memorial Wildflower Preserve is a 10-acre memorial botanical garden located on the UNCW campus. Established in 1972, its purpose is to provide a place where the university community and the public can learn about and enjoy our native plants and their habitats. Many of the plants are labeled, and maps and trail guides are available at the entrance.

EV-Henwood Nature Preserve

Ev-Henwood is UNCW's coastal forest research and teaching station located in Brunswick County. It is only a short 30-minute drive from the university campus and is available for nature study and appreciation, student and faculty research, and class field trips. Included in its 110 acres are oak/hickory woods, pine forests, and low woods along the bordering Town Creek and its branches. Additional habitats such as ponds and fields are available nearby.

UNCW Long-Term Ecosystem Reserve

This 750 acre parcel of undisturbed bottomland hardwood forest, tidal creeks, and wetland marshes bordered by the Northeast Cape Fear River, Cowpen Road, and NC Highway 421 supports non-destructive teaching and research activities. The property is uniquely situated within the upper tidal region of the Cape Fear estuary. Although most of the property consists of tidal freshwater creeks and adjacent marsh, detectable salinity can occasionally be measured during drought periods. Because of this location, this area/habitat is expected to be among the early regions to be significantly affected by sea level rise over the next several decades, making it

ideal for research into the effects of climate change on coastal ecosystems and ecosystem dynamics.

Campus Arts and Entertainment

Art Exhibitions

Monthly exhibitions of painting, sculpture and the graphic arts are held in a variety of spaces on campus including: UNCW Library, Cultural Arts Building, Campus Life facilities, and the Ann Flack Boseman Gallery. Student art is often featured. Campus Life also features its permanent art collection of student artwork on display year round in the Fisher Student Center, Fisher University Union, and Burney Center. All exhibitions are open to the public without charge. Student art is also displayed outside the Office of the Vice Chancellor for Student Affairs in Alderman Hall.

Association for Campus Entertainment

The Association for Campus Entertainment (ACE) coordinates many of the events that take place on campus including novelty act entertainment, concerts, Friday and Saturday night films in Lumina Theatre, and campus spirit and homecoming activities. This dynamic student-run organization is comprised of several committees including Arts, Activities, Films, Concerts, Spirit, and Homecoming. If you are interested in more information about events or joining a committee, stop by the ACE Office in the Campus Activities and Involvement Center in the Fisher Student Center, Room 2029, or email ace@uncw.edu.

Performing Ensembles

Membership is open to any student who has had instrumental or vocal experience, with the approval of the director of the particular ensemble.

Concert Choir and Chamber Singers

The University Concert Choir and small ensemble, the Chamber Singers, regularly act as ambassadors for the university and appear on radio and television. The

Concert Choir performs at least two on-campus concerts each year and tours during spring break. On occasion, the choir has participated in joint stage productions of opera and musical comedies with the drama program.

Jazz Ensembles

In addition to the Big Band, UNCW has several small groups that play both mainstream and fusion jazz. The Big Band has produced recordings, while the small groups have garnered awards at jazz festivals and have recorded as well. Also, each year the jazz ensembles perform with some of today's top jazz artists during the annual UNCW Guest Artist Jazz Festival.

Wilmington Symphony Orchestra

The orchestra's annual subscription series includes five concerts performed in UNCW's Kenan Auditorium, the principal concert hall in Wilmington. Orchestra members include UNCW students and faculty, as well as musicians from the community.

Wind Ensemble

The Wind Ensemble is organized each semester to provide instrumental music experience for wind players in a large ensemble. This ensemble performs two concerts each year in Kenan Auditorium and tours annually in the spring.
Other instrumental ensembles include the Pep Band, the Brass Ensemble, the Saxophone Ensemble, the Flute Choir, the Guitar Quartet, the Percussion Ensemble and various Chamber Ensembles.

Vocal Ensembles

The University of North Carolina Wilmington Concert Choir is organized each semester to provide vocal musical experience for those students who desire it. Membership is open to any student in the university, with the approval of the director, and any participant may earn credit. Participation by non-music majors may be supplemented by private lessons, also for credit.
The University Concert Choir and small ensemble, The Chamber Singers, regularly

provide music for university functions, appear on radio and television, and act as ambassadors from the university at a wide spectrum of community functions.
The UNCW Concert Choir's yearly activities have included at least two on-campus concerts and an extensive tour during the spring holidays. On occasion, the choir has participated in large, joint stage productions of opera and musical comedies with the drama division.

Storytelling in the Community

University students may enroll in COM 212 Storytelling in the Community, a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

University Theatre

The University Theatre is a student-oriented theatre dedicated to the continuing development of all theatre practitioners. It strives to produce a total theatrical experience to support the educational, creative, and recreational potential of a campus-based theatre.
Two major productions are presented each semester, with student productions presented on demand. Participation is not limited to theatre majors.

https://www.uncw.edu/outreach/
UNCW is engaged with Southeastern North Carolina through innovative programs of lifelong and professional learning, applied research, and service that result in measurable improvements in our region's social and economic condition. We advocate for and support sustained, issue-specific partnerships between faculty, staff, and students and regional business, nonprofit, and government organizations, we support academically-based programs that enrich the lives of the youth and adults living in Southeastern North Carolina. Opportunities for student participation exist in the following areas;

Conference and Event Management

Conference Services and Event Services provides comprehensive logistical and administrative services including on-campus facilities, lodging, food and registration for both internal and external organizations hosting conferences at UNCW.

Professional and Organizational Development

Professional and Organizational Development offers working professionals an opportunity to further develop their skills and/or provides an opportunity for career exploration by delivering on-site and online training. Visit https://www.uncw.edu/professional-ed

Osher Lifelong Learning Institute at UNCW (OLLI)

Osher Lifelong Learning Institute at UNCW (OLLI) refers to an individual's ongoing commitment to education and includes non-credit activities for personal enrichment, including short courses related to academic studies, such as history, art and languages, as well as activities such as lunch and dinner speaker series, public forums, special issues presentations and international travel. Other lifelong learning opportunities include the Adult Scholars Leadership Program, which brings accomplished members of the 55+ community together to discuss regional issues. Each semester the divisional publication, Pathways, catalogues current lifelong learning opportunities at UNCW. Visit https://www.uncw.edu/olli to learn more.

Scholarly Community Engagement

Scholarly Community Engagement facilitates interdisciplinary teams composed of faculty/student researchers and community organizations, conducting meaningful long-term applied research projects addressing local issues. Engaging the community in scholarly research, faculty and students affect the quality of life of individuals and communities in our region. Students participate in community-based

research through internships, directed independent study and faculty-led research projects.

Storytelling in the Community

University students may enroll in [[permalink=1273|tooltip:{'title':1}]] %prefix% %code% %title%[[/permalink]], a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

Media Production

Media Production, formerly UNCW-TV, highlights the intellectual diversity of the university by creating educational programming derived from the academic departments of UNCW and delivered by UNCW-TV, through a variety of media. Also, Media Production serves the university through its Creative Services television production, such as broadcasting events like UNCW Commencement, a variety of award ceremonies, candidates forums, community based television programming and award winning documentaries.

Youth Programs

Begin your journey to higher education by participating in one of UNCW's outstanding programs for youth of all ages. We offer summer academic enrichment opportunities, school year standards-based programs, and community outreach events that engage youth in experiential education, service learning and leadership development. Visit https://www.uncw.edu/youth/

Campus Activities and Student Involvement

Campus Activities and Involvement Center

The Campus Activities and Involvement Center (CAIC) is students' gateway to entertainment and involvement on campus. As part of the Division of Student Affairs, we are "creating experiences for life" by providing opportunities for students to participate actively, grow personally and explore new ideas and interests through a variety of entertainment and involvement experiences, including the annual Involvement Carnival. Our staff, and the students with whom we work, are committed to creating a vibrant campus community filled with diverse activities for all students. Students interested in learning how to get engaged with student organizations, hone their leadership skills, or simply to find out about events and activities can do so on WaveLink at https://uncw.campuslabs.com/engage.

Campus Activities

Campus Activities and Programs coordinate and promote opportunities to cultivate connection and social engagement for UNCW students. Our programs include: Association for Campus Entertainment (ACE); Ann Flack Boseman Gallery; Campus Life Marketing; Leadership Lecture Series; UNCWeekends; Campus Life Union Events; Summer @ the Dub; and the university-wide coordination of Fall and Spring UNCWelcome. For more information on Campus Activities & Programs, visit the Campus Activities and Involvement Center (CAIC) in the Fisher Student Center, Room 2029 or email clprograms@uncw.edu.

Summer @ the Dub

Summer @ the Dub features a comprehensive calendar of campus and community events for students throughout the summer months, including activities such as outdoor recreation, special events, summer sporting event tickets, and much more. For more information, visit the Campus Activities and Involvement Center (CAIC) in the Fisher Student Center, Room 2029 or email clprograms@uncw.edu.

Campus Dining

UNCW Campus Dining is committed to providing culinary options to satisfy diverse tastes. We deliver fresh and healthy food while also providing a high-quality

experience prepared by professionally trained staff and award-winning chefs. Campus Dining locations are open to meet the schedules of students, staff and faculty.
Campus Dining offers four convenience stores on campus. These provide a wide range of ready to eat meals as well as pre-packaged snacks, drinks and more! UNCW Campus Dining features several national brands throughout campus: Starbucks, Chick-fil-A, Panda Express, Subway, Einstein Bagels, Dunkin Donuts, and a Wilmington local favorite, Port City Java located in Randall Library. Local Restaurant Row is located in Hawk's Nest and provides a space for local restaurants to pop up on campus to offer students more variety and a taste of Wilmington right here on campus!
For a full listing of dining locations and Meal Plan options, visit www.uncw.campusdish.com. Information about On-Campus Required and on-Campus Voluntary/Off Campus Meal Plans is available at http://uncw.edu/studentmealplan. Contact us at 910.962.3560, or see the Auxiliary Services One Card office in Warwick Center for more information.

Campus Life Facilities

Student life is enriched at UNCW by a broad spectrum of activities, many of which occur in or around the Campus Life facilities, which includes the Fisher Student Center, Fisher University Union, Burney Center and Warwick Center. The Fisher Student Center is a 73,000 square foot facility which houses student organization offices in the Campus Activities and Involvement Center, the Student Media Center, meeting rooms, lounges, study areas, the University Bookstore, Lumina Theater – a 330-seat movie theater, and views of the Campus Commons.
The Fisher University Union is a 62,000 square foot facility that houses the Hawk's Nest food court concepts and dining space. Services in this facility include the post office, the Passport Office, and Provisions on Demand (a convenience store). Many student service offices, including the Career Center, Transition Programs, the Upperman African American Cultural Center, Centro Hispano, the Mohin-Scholz LGBTQIA Resource Office, the Asian Cultural Heritage Center, and the Campus Life Administrative Office are located in the Fisher Union. In addition, the Ann Flack Boseman Gallery is located on the second floor of the Fisher University Union with

art on exhibit throughout the year.
The Burney Center houses the largest multipurpose ballroom space on campus. The Campus Life Reservation and Event Services office, which is located in the Fisher University Union, will be happy to speak with you about this and other reservable spaces in any of the Campus Life facilities.
The Warwick Center houses a large multi-purpose room which can be divided into as many as three smaller spaces. Areas of the multi-purpose room are available to the university community and the community at large for meetings, and conference proceedings. Dub's Café, area is also located in the Warwick Center, as is the new UNCW Swap Shop where students can donate and access free clothing and other items.
Campus Life facilities and Campus Commons are student-oriented facilities in the center of campus that are welcoming, adaptable, well maintained, safe and accessible. These facilities are intentionally designed to be inviting and to encourage interaction with the community. As is the case for all campus facilities, it prominently features copies of the UNCW Seahawk Respect Compact.

Housing and Residence Life

The Department Office of Housing and Residence Life is responsible for the development of educational, cultural and social programs to enhance student life on campus. The goal of the Housing and Residence Life program is to create an environment conducive to academic pursuits and the personal growth of resident students. More than **250** Residence Life staff are responsible for the supervision of resident students in the residence halls, on-campus apartments, and suite-style buildings.
The university has residence hall facilities for over **5,000** students. All rooms are air-conditioned and furnished. Wifi and Ethernet computer networking, which allows student computers to access university software, has been installed in all residential facilities. Laundry facilities are available. The Residence Life program offers opportunities for student employment and leadership positions through hall governance. Students in all traditional residence halls**,** University Suites, Pelican, Sandpiper, Terrapin, and Loggerhead Halls, are required to participate in the university meal plan program. Sophomores, Juniors and Seniors who reside in **other locations** will not be required to have a university meal plan.

Student Media

Founded in 1948, *The Seahawk*, the student newspaper, publishes a weekly online edition (www.theseahawk.org) throughout the calendar year. The paper's staff is composed entirely of students interested in journalism, multimedia and computer-assisted design. *Atlantis*, the student creative arts magazine, publishes literature and art created by student writers and artists from throughout the UNC system. The magazine is funded by student fees and advertising and sponsors public readings and art exhibits. TealTV is a student-run production unit that provides students hands-on experience in script writing, video production, broadcast journalism, digital-video editing, announcing and reporting. Founded in 1999, TealTV produces several original programs including "Seahawk Central News," a program of campus news and information. TealTV's programs air regionally on Time Warner Cable channel 5 and on the UNCW's closed-circuit channel 77. Together, *The Seahawk* and "Seahawk Central" play valuable roles within UNCW's interdisciplinary Journalism Minor. UNCW Student Media Sales & Marketing provides the program's student publications with advertising and underwriting sales and marketing services and provides training for students interested in the business of media. UNCW Student Media also serves as home to other student organizations interested in mass media, such as Hawkstream Radio (podcasting station), and Flicker Film Society, which produces original student films and sponsors the annual Reel Teal Festival.

The Student Media Board (SMB) is UNCW Student Media's governing body. A chancellor's advisory board, the SMB advises student publications and works to ensure their First Amendment rights. Comprised of students, faculty, university staff and community professionals, the SMB allocates budgets and provides financial oversight. Applications for two student-at-large positions, appointed to the board annually, are accepted in the spring semester. More information about UNCW Student Media is available online at https://uncw.edu/studentmedia/index.html.

•

Seahawk Mail

Seahawk Mail is a full-service U.S. Postal Service contract station serving UNCW students, faculty, staff, and the general public. Seahawk mail provides on-campus student mail services, including mailboxes and package pickup. Located in the Fisher University Union, Seahawk Mail is your one-stop shop for postage, money orders, mailing supplies, FAX services, and notary services. Seahawk Mail is open weekdays from 8:30 a.m. through 4:30 p.m. with package pickup service until 5 p.m. Forms of payment accepted at Seahawk Mail are cash, check (with valid identification), Seahawk Buck$, and credit cards (Visa, American Express, and MasterCard. There is a required minimum purchase of $3.00 for credit cards). Freshmen, residential and international students are mandatorily assigned a campus box for their personal and university correspondence. For students living on campus, the campus mailbox serves as their official campus address and is their only mailing address. All other students may request a mailbox assignment if desiring to receive mail or packages at Seahawk Mail. Package pickup service includes all carriers, such as U.S.P.S., UPS, Fed Ex, DHL, and floral delivery. Students will receive an email location whe mail is ready for pickup. Students are responsible for providing a forwarding address when they move or leave the university. Please visit our Web site at www.uncw.edu/mail for more information.

UNCW Bookstore

Located in the Fisher Student Center, the UNCW Bookstore is your one-stop shop for all your UNCW needs from textbooks to school spirit apparel. You can rent, purchase used textbooks, and even buy/rent digital textbooks for all your course related materials. Shop confidently at the UNCW Bookstore as they offer a Price Match Program to Amazon.com and BN.com to help students get the best price possible. They also carry a large assortment of school supplies and tech supplies including, laptops and printers. The UNCW Bookstore offers the largest inventory of Seahawk apparel and gift items so you can show off your Seahawk pride! They are also home to Dub City Brew Café who proudly brew Starbucks Coffee where students can use their One Card funds to grab a quick beverage or snack. Forms of

payment accepted at the bookstore include Seahawk Buck$, cash, credit/debit cards, Apple Pay, Samsung Pay, Barnes & Noble gift cards, and Bookstore Dollars** and Food Dollars (Dub City Brew Café only.
Can't make it in to the bookstore? No problem! All of your textbooks and favorite UNCW Gear are available online at http://www.ShopUNCW.com. Simply place an online order, and we'll notify you when it is ready!
Contact the UNCW Bookstore at 910-962-3188 or, at www.uncw.edu/bookstore for more information on bookstore services.
**Some exclusions and restrictions apply to the Price Match Program. For full details, please visit the UNCW Bookstore website or ask one of our booksellers.*
**Bookstore Dollars – an optional account on the UNCW One Card that provides students with the ability to get their books and supplies without waiting for a financial aid refund by charging the selected funds to their student account. Funds on the Bookstore Dollars account do not expire – they roll over from semester to semester and are continually available to use for any item in the bookstore, including clothing items, Dub City Brew Café items, textbooks, technology items, and so much more! Please visit http://www.uncw.edu/onecard for more information.

University Information Center

The Information Center, conveniently located on the first floor of the Fisher Student Center, provides a variety of information about campus, student and community activities, as well as campus telephone numbers. The center also provides free laptop computer check out, umbrella checkout, and serves as the campus Lost and Found. Contact the Information Center at (910) 962-3841.

- **All students living in Belk, Cornerstone, Graham, Hewlett, Innovation, Keystone, Loggerhead, Pelican, Sandpiper, Schwartz, and Terrapin** are required to have a Hawk plan (Gold, Silver or Bronze). The default meal plan for these locations will be the Hawk Silver, meaning students will have the option to either upgrade their plan to the Hawk Gold or downgrade their plan to Hawk

Bronze.
All students living in the University Suites are required to have at least the Block 125 meal plan. The default meal plan for these locations will be the Hawk Silver, but students will have the option to either upgrade to the Hawk Gold, or downgrade to the Hawk Bronze or Block 125.
Meal plan transactions are facilitated on **students'** UNCW One Card ID, and it must be presented at every meal. Student ID cards are not transferable. The All Access plans allow students to treat a friend or family member by using a guest meal at Wagoner Dining Hall, the Shore Dining Hall, and Dub's Cafe, or by using their food dollars or Teal Meals. Teal Meals on the Hawk All Access plans do NOT carry over from one week to the next, and will reset every Sunday morning.
Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. Changes to meal plans can be made in MySeaport before the change period end date. For a list of current change period dates and additional details, please visit the UNCW One Card student meal plan website at www.uncw.edu/studentmealplans.*
Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food Dollars expire at the end of the spring semester.***

2025-2026 On-Campus Housing Meal Plans

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.
Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period.
Visit http://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.

Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

- The UNCW One Card is the UNCW student ID and official form of identification on campus. It allows the use of campus facilities, and provides safe, easy access to student housing, campus facilities, and student labs. With a valid UNCW One Card, students can check out materials at Randall library, ride the Seahawk Shuttle WAVE transit buses at no cost, and much more, including receiving a discount at local merchants through the Seahawk Savings Program. Students also have three accounts they can utilize on the One Card: Seahawk Buck$, Bookstore Dollars, and their Meal Plan. For more information on these accounts, please visit https://www.uncw.edu/onecard.
  Seahawk Buck$ is the debit account feature of the UNCW One Card. With prepaid funds, students can make purchases at all food service locations, UNCW Bookstore, vending machines, student copiers, health center, pharmacy, Seahawk Mail, iPrint locations, iPrint Business Center, and more. Deposits may be made either online using the UNCW One Card Online Management Center online, or at the UNCW One Card Office located in Warwick Center.
  Students can track UNCW One Card balances (Food Dollars, Seahawk Buck$, and Bookstore Dollars) at the UNCW One Card Online Management Center or on the smartphone/tablet App called "Transact eAccounts". For more information, visit the UNCW One Card office in the Warwick Center or https://www.uncw.edu/onecard/.
- UNCW offers voluntary meal plans for students living off campus or upperclassmen living in Voluntary On-Campus Housing, consisting of Seahawk Village, Seahawk Landing, or Seahawk Crossing. The plans are designed to give students the convenience of using their One Card instead of carrying cash.
  Meal Plan Rolling: *The student's Fall semester meal plan will be automatically assigned to the student for the Spring semester. For a list of current change period dates and additional details, please visit the UNCW student meal plan website at* www.uncw.edu/studentmealplans.
  Unused Food Dollars roll over to the next semester if and only if you purchase a meal plan for that semester. Additionally, rolling occurs from summer to fall and fall to spring ONLY. Unused Food Dollars will be rolled into the following semester's account after the meal plan change period for that semester. ***All unused Food***

Dollars expire at the end of the spring semester.

2025-2026 On-Campus Voluntary or Off-Campus Meal Plans

*NC sales tax is charged on the Meals portion only at the time of meal plan purchase. Food dollars will be taxed as they are used.
Adding additional Food Dollars or Meals (Block Plans) may be done at any point during the semester after the meal change period. Visit https://www.uncw.edu/studentmealplans for more information.
Meal plans and meal plan rates are set by the university's Board of Trustees and are subject to change.
Contact the One Card/Meal Plans office at 910-962-3560 or email mealplans@uncw.edu with any questions.

TealPay Payment Plan Term Enrollment Fee

Students have the option to enroll in one of UNCW's TealPay payment plans. Three options are available each Fall and Spring to pay the charges on the student's account with three, four or five installment payments during the term. The three-installment payment plan is available in the Summer. Enrollment fees are non-refundable. OAP students are not eligible for the payment plans due to the course duration.

Campus Recreation

https://uncw.edu/seahawk-life/health-wellness/campus-recreation/
The Department of Campus Recreation provides a multi-faceted program that includes the following programmatic areas: Group Fitness, Personal Training and

Fitness Programs, Intramural and Sport Clubs, Aquatics, Adventure Recreation, Informal Recreation, and Member Services. We believe in a "Something for Everyone" philosophy to programming and services. To accomplish our mission, the department is home to various facilities:

- The Pat Leonard Student Recreation Center contains an aquatics facility (indoor lap pool and outdoor leisure pool), functional strength training area, 6 courts (used for basketball, volleyball, badminton, pickleball) 2 MAC (multi-purpose activity courts) for indoor soccer and special events, a 30 ft. rock climbing wall, adventure equipment check-out center, racquetball courts, the walking/jogging track, and many other functional recreational areas and amenities.
- The Recreational Field Complex is a 11-acre outdoor field complex with three lighted multipurpose fields (two synthetic turf and one natural grass), two operations buildings with restrooms, equipment check-out, vending machines, and water/bottle filling stations.
- The Shoreline Sports Complex is a 6.5-acre outdoor sports complex with four lighted sand volleyball courts, four lighted basketball courts, four lighted tennis courts (two courts lined for pickleball), one lighted large grass field, one lighted smaller grass field, outdoor fitness area, pavilion building (seating, equipment check-out, and restrooms), multiple water/bottle filling stations.
- The Adventure Recreation Challenge Course consists of both a high and low ropes course. The high ropes course is a structure that stands around 35 ft. tall with 12 bridge-like elements, giant swing, zipline, flying squirrel, high-5, fidget ladder, and ground school. The low ropes course can utilize a variety of the 12 element structures and spaces that are available.

Campus Recreation facilities and programs provide UNCW students, faculty, staff, and community members with experiences that support their overall health, wellbeing, and a sense of belonging. CR are major facilitators of the UNCW Healthy Hawks wellbeing model, and asks students, faculty and staff to commit to holistically healthy lifestyles to maximize personal and professional wellness. We inspire healthy lifestyles through recreation, innovative programming with sustainable facilities, while embracing technology and fostering leadership development.

Disability Resource Center

Students with disabilities are a rapidly growing minority at UNCW, as elsewhere in American higher education. Consistent with Section 504 of the Rehabilitation Act of 1972 and the Americans with Disabilities Act (as amended), it is the policy of UNCW that no otherwise qualified individual in the United States be excluded from, denied benefit of, or be subject to discrimination based on their disability within university activities, programs, or services.

Disabililty Resource Center (DRC) is the designated office providing services and

information to students with disabilities enrolled or considering enrollment at UNCW. As such, DRC is committed to providing assistance to enable qualified students with disabilities equal opportunity to accomplish their educational goals and derive all of the benefits of campus life.
DRC serves as an advocate for students with disabilities, and as a resource for UNCW faculty, staff and administration. Through intentional partnerships, DRC strives to create an atmosphere that encourages students' independence, responsibility for self, effective communication skills, and a respect for the diverse learning experience.
Students with disabilities needing accommodations or questions regarding resources should contact Disability Resource Center for more information, including documentation guidelines and requirements.
DRC@uncw.edu
(910) 962-7555
www.uncw.edu/disability

SEA.*lab* (Strategy Enhancement for Achievement)

Established to meet the unique needs of students with disabilities, SEA Lab offers students enrolled at the DRC the assistance of experienced and knowledgeable staff, to aid in their development of skills necessary for academic success.
Through SEA Lab, students have an opportunity to explore various strategies and techniques to assist them in their goals toward overall academic achievement and individual development. SEA Lab offers workshops and 1.1 instruction on topics such as:

- Time management and organizational skills
- Reading strategies and notetaking
- Test-taking and final exam preparation
- Understanding of one's disability
- Self-advocacy and metacognitive development

Military and Veteran Support Services

https://uncw.edu/seahawk-life/support-success/military-veterans/
The Office of Military Affairs is a support and advocacy office that was established in March 2016 to develop and coordinate resources to help military affiliated students - those currently serving, veterans, and their family members - achieve their academic and career goals.

Our staff members help students and their families learn how to navigate the university while helping faculty and staff understand and serve this important student population.

Our offices are located in the amazing Military Affairs Wing in Veterans Hall Room 1029. Office hours are Monday-Friday, 0800-1700.
For more information on UNC System Policy 700.7.1. for Military Student Success, including Deferral of Enrollment and Call to Duty, see the policy here: https://www.northcarolina.edu/apps/policy/doc.php?type=pdf&id=852

Multicultural Student Resource Centers

https://uncw.edu/about/university-administration/student-affairs/departments/campus-life/student-resource-centers

Asian Heritage Cultural Center https://uncw.edu/seahawk-life/get-involved/students/asian-heritage-cultural-center/

Centro Hispano creates a responsive educational, scholarly and social environment for Latinx students, faculty and others interested in Hispanic and Latinx culture. Primarily, the goal of Centro Hispano is to support the rapidly growing number of Latinx students applying, attending and completing degrees at UNCW. Centro Hispano promotes opportunities that broaden understanding and appreciation of diverse Hispanic cultures, offer resources that maximize the success of each student, and most importantly, provides a place where every student feels at home while striving for success. Furthermore, the center supports the research, teaching and service components necessary for the training and preparation of global citizens. It also informs, guides and champions UNCW's engagement with the region on issues critical to Latinx constituencies.

Centro Hispano https://uncw.edu/seahawk-life/get-involved/students/centro-hispano/

It also informs, guides and champions UNCW's engagement with the region on issues critical to Latinx constituencies.

Mohin-Sholz LGBTQIA Resource Office https://uncw.edu/seahawk-life/get-involved/students/lgbtqia-resource-office/

The Mohin-Scholz LGBTQIA Resource Office at the University of North Carolina Wilmington supports lesbian, gay, bisexual, transgender, questioning, intersex and allied students, faculty, staff, and alumni. Our office works to create a safe and inclusive environment for the LGBTQIA community and contribute to a culturally rich campus. Additionally, the office works both to raise awareness and inclusion of sexual and gender minorities and to provide information, referral, support, and programming to the UNCW Community. We do this through community building, advocacy, social justice and diversity education and the development of global citizens. All members of the UNCW campus are welcome, regardless of gender identity or other factors.

Upperman African American Cultural Center https://uncw.edu/seahawk-life/get-involved/students/african-american-cultural-center/

The Upperman African American Cultural Center (UAACC) provides UNCW students, faculty, staff, and others interested in African and African American culture a central location from which they can experience the rich heritage of African diaspora through scholarly and cultural workshops, presentations, exhibits,

performances, lectures, and print and visual media. Working collaboratively with campus and community partners, the UAACC works to positively impact the recruitment, retention, and academic achievement of black students at UNCW, and contribute to the preparation of *all* UNCW students to excel in an increasingly diverse world.

Office of the Dean of Students

The Office of the Dean of Students is committed to advocacy and education centered on student growth and self-responsibility by serving as a central resource for UNCW students, faculty and staff. Through collaboration with the university and Wilmington community, we provide assistance to members of the UNCW community by: educating students about their rights and responsibilities as members of our community; assisting students, faculty and staff with interpretation of campus policies, including the Code of Student Life and the Student Academic Honor Code; training and educating faculty, staff and students on community standards and conflict resolution; establishing grievance and conflict resolution procedures; referring students to myriad resources to increase the likelihood of their success; assisting in the coordination of 24 hour emergency and crisis response; and providing resources and education for special populations including fraternity & sorority life members and off campus students. Our mission is to foster a respectful and dynamic community that affirms the value and contributions of each individual and which harbors and elevates democracy, civility, and diversity as paramount values.

The following services and programs are coordinated and managed through the Office of the Dean of Students: Off-Campus Student Services; Alternative Dispute Resolution; Cornerstone Community Standards; Student Conduct; Student Academic Honor Code and Case Management (student behavioral intervention/resource referral). Student rights and responsibilities are communicated through the Code of Student Life, and we adjudicate academic and behavioral violations through the campus conduct system. Our staff is vested in the success of every student, and we invite you to access us as partners in assisting you in your roles as students, faculty and staff at UNCW. If you have any questions or need assistance, please contact the Office of the Dean of Students at (910) 962-3119, by e-mail at deanofstudents@uncw.edu or visit our website at www.uncw.edu/odos.

Office of Title IX and CARE

The Office of Title IX and Clery Compliance is committed to providing an inclusive and welcoming environment for all students, faculty, staff, and visitors. All members of the UNCW community are expected to engage in conduct that contributes to its culture of integrity and honor that we always strive to maintain. The university prohibits its faculty, staff and students from engaging in any form of discrimination, protected-status harassment, sexual harassment, and sexual violence, and retaliation and expects these individuals to refrain from committing acts of discrimination, bias, or sexual violence. In compliance with federal and state law and university policy, the university maintains processes to provide redress and remediation to individuals or groups who believe they have been victims of these offenses. If you have any questions or need assistance, please stop by the Office of Title IX and Clery Compliance in DePaolo Hall Room 1003 or call 910-962-2937, email: titleix@uncw.edu. You may also visit: https://www.uncw.edu/titleix/ for more information and links to the relevant policies.

CARE: Campus Advocacy, Resources and Education

CARE: Campus Advocacy, Resources and Education is the office at UNCW dedicated to relationship education, interpersonal violence prevention and crisis response/advocacy. CARE offers education about relationship issues, including healthy relationship skill-building and consent, as well as prevention of interpersonal abuse and violence, sexual assault, stalking, exploitation and harassment. We offer confidential consultations, crisis counseling, advocacy, accompaniment and referrals to students, staff and faculty who have experienced victimization, as well as those students, faculty, staff or others concerned about a loved one affected by abuse or violence. CARE additionally offers educational programming, awareness-raising events and bystander intervention trainings. CARE is available 24 hours a day through our hotline at (910) 512-4821.
For more information, call (910) 962-CARE, or (910) 512-4821 after business hours, stop by our office in DePaolo Hall, Suite 103, or visit our Web site at www.uncw.edu/care.

Outreach

https://www.uncw.edu/outreach/
UNCW is engaged with Southeastern North Carolina through innovative programs of lifelong and professional learning, applied research, and service that result in measurable improvements in our region's social and economic condition. We advocate for and support sustained, issue-specific partnerships between faculty, staff, and students and regional business, nonprofit, and government organizations, we support academically-based programs that enrich the lives of the youth and adults living in Southeastern North Carolina. Opportunities for student participation exist in the following areas;

Conference and Event Management

Conference Services and Event Services provides comprehensive logistical and administrative services including on-campus facilities, lodging, food and registration for both internal and external organizations hosting conferences at UNCW.

Professional and Organizational Development

Professional and Organizational Development offers working professionals an opportunity to further develop their skills and/or provides an opportunity for career exploration by delivering on-site and online training. Visit https://www.uncw.edu/professional-ed

Osher Lifelong Learning Institute at UNCW (OLLI)

Osher Lifelong Learning Institute at UNCW (OLLI) refers to an individual's ongoing commitment to education and includes non-credit activities for personal enrichment, including short courses related to academic studies, such as history, art and languages, as well as activities such as lunch and dinner speaker series, public forums, special issues presentations and international travel. Other lifelong learning opportunities include the Adult Scholars Leadership Program, which brings accomplished members of the 55+ community together to discuss regional issues. Each semester the divisional publication, Pathways, catalogues current lifelong

learning opportunities at UNCW. Visit https://www.uncw.edu/olli to learn more.

Scholarly Community Engagement

Scholarly Community Engagement facilitates interdisciplinary teams composed of faculty/student researchers and community organizations, conducting meaningful long-term applied research projects addressing local issues. Engaging the community in scholarly research, faculty and students affect the quality of life of individuals and communities in our region. Students participate in community-based research through internships, directed independent study and faculty-led research projects.

Storytelling in the Community

University students may enroll in COM 212 COM 212 - Storytelling in the Community , a two-credit hour course in which students are instructed and coached to visit local elementary schools and perform stories for children. In this manner, students learn to apply theoretical concepts related to performance and audience adaptation in actual settings. The course and activities emphasize interactive storytelling that directly involves audience members.

Media Production

Media Production, formerly UNCW-TV, highlights the intellectual diversity of the university by creating educational programming derived from the academic departments of UNCW and delivered by UNCW-TV, through a variety of media. Also, Media Production serves the university through its Creative Services television production, such as broadcasting events like UNCW Commencement, a variety of award ceremonies, candidates forums, community based television programming and award winning documentaries.

Youth Programs

Begin your journey to higher education by participating in one of UNCW's outstanding programs for youth of all ages. We offer summer academic enrichment opportunities, school year standards-based programs, and community outreach

events that engage youth in experiential education, service learning and leadership development. Visit https://www.uncw.edu/youth/

Special Academic Centers

https://www.uncw.edu/cestem/
The Center for Education in Science, Technology, Engineering, and Mathematics - CESTEM - (formerly the Science and Mathematics Education Center - SMEC) at UNCW is committed to regional service and endeavors to stimulate teachers' intellectual curiosity and increase exposure to current technology. The center is responsible for providing K-12 professional development programming in science, technology, engineering and mathematics (STEM). CESTEM applies the resources of UNC Wilmington to improve the teaching and learning of STEM disciplines in the K-12 schools of southeastern North Carolina. The center offers a range of professional development programs in the areas of STEM for pre-service and in-service elementary-, middle-, and high-school teachers, as well as an annual STEM education conference. Through center-sponsored activities, teachers can earn certificates that schools may accept as Continuing Education Units toward their license renewal.
CESTEM operates the Technology Loan Program (TLP), a program that lends science and technology materials and other resources to regional K-16 teachers at no cost for use in their classrooms. CESTEM also hosts annual student STEM competitions for grades 3-12, including the Southeast Regional Science and Engineering Fair, the Wilmington Regional Science Olympiad, and the Regional SeaPerch Competition.
Contact CESTEM at (910) 962-3168 for more information on programs.

(https://www.uncw.edu/cie/index.html)
CIE is an innovation hub serving UNCW students and faculty, as well as innovation-forward startups in NC's southeastern region. We offer incubation space, coworking, and programs (such as meetups, a mentoring program, precelerators, and pitch practice) specializing in high-impact entrepreneurs from ideation to commercialization. We attract changemakers and dreamers, the inquisitive and curious, and those who have the mindset to control their destiny. CIE serves as a UNCW-community connector, whether it is for student success or entrepreneurial

success.

https://www.uncw.edu/cms/

The Center for Marine Science (CMS) at the University of North Carolina Wilmington is dedicated to interdisciplinary approaches to answering questions in basic marine research. The mission of the center is to promote basic and applied research in the fields of oceanography, coastal and estuarine studies, marine biotechnology and aquaculture, marine biology, marine chemistry, and marine geology. Faculty from 11 departments with teaching and/or research interests related to the marine sciences participate in this program; including marine science researchers in the Departments of Biology and Marine Biology, Chemistry and Biochemistry, Geography and Geology, Environmental Sciences, and Physics and Physical Oceanography. Center faculty serve on regional, national and international research and policy advisory groups and thereby contribute to the development of agendas on marine research in the United States and the world. International interactions with labs in Europe, North America, South America, Australia, New Zealand, Asia, Africa, Bermuda, the Bahamas and Caribbean, the United Kingdom, and all regions of the coastal United States augment extensive programs addressing North Carolina coastal issues. By integrating these advisory functions with research programs of the highest quality, CMS enhances the educational experience provided by the University of North Carolina Wilmington for both undergraduate and graduate students in marine science.
The Center for Marine Science occupies a research and education facility located six miles from the main campus on the Atlantic Intracoastal Waterway, providing support for coastal and marine science efforts throughout UNCW. The modern marine science center at Myrtle Grove has a total of 181,000 square feet of net indoor space including: a new 69,000 square foot marine biotechnology building and 12,000 square foot shellfish research hatchery, group meeting facilities for up to 150 individuals; fully equipped research laboratories, classrooms, and marine science laboratories; a greenhouse with running seawater; a radioisotope laboratory; computer workrooms, cold rooms, and walk-in freezers; temperature controlled rooms; autoclave and media preparation room; darkroom; chemical storage and balance rooms; fireproof vault for data storage; clean room; central analytic facility;

sample processing rooms; aquarium room with running seawater; 7,200 gallon oceanographic test tank with electric overhead hoist; indoor storage; outdoor storage; shower/locker facilities; and outdoor facility for tanks with running sea water.

Core facilities include: nutrient analysis; DNA sequencing; oceanographic instrumentation; running seawater systems; and high-field NMR and stable isotope ratio mass spectroscopy. The seawater system provides raw, filtered, and purified seawater; tank farm services; and aquarium room services. The location of the center provides easy access to regional marine environments such as: tidal marshes/mud flats/sand flats/oyster reefs; tidal creeks; barrier islands and tidal inlets; the Atlantic Intracoastal Waterway; near shore marine environments; the Gulf Stream; hard bottom communities; sand dunes and maritime forests; and both highly developed and minimally developed estuarine environments. A 770-foot pier with docking facilities for several coastal research vessels is in place on the Atlantic Intracoastal Waterway. The center maintains 22 research vessels ranging in size from sixteen to sixty-eight feet as well as specialized equipment for offshore and nearshore/estuarine sampling and observation.

The Center for Marine Science serves as host for: the Coastal Ocean Research and Monitoring Program (CORMP); the Undersea Vehicles Program; an Extension Office for North Carolina Sea Grant; the Marine Mammal Stranding Network; the North Carolina National Estuarine Research Reserve; and UNCW's Marine Quest Program, an extensive community outreach program for public schools and adult education.

The Small Business and Technology Development Center is a business advisory service of The University of North Carolina system that provides management counseling and education services to small and mid-sized businesses in all of North Carolina's 100 counties. The SBTDC at UNCW provides services in New Hanover, Pender, Onslow, Duplin, Brunswick, and Columbus counties. The center helps established firms, high-growth companies and start-up businesses meet today's challenges, manage change, and plan for the future.

Services are well defined and are designed to meet clients' needs:

- Management Counseling – The center helps businesses with financing, marketing, human resources, operations, business planning, and feasibility assessment.
- Management Education Services – The SBTDC also provides targeted, research-based educational products that are focused on change management, strategic performance, and

leadership development for management team, employees, and board members.

- In addition, it offers specialized market development assistance in:
- government procurement
- international export financing
- marine trades services
- technology development and commercialization.

For those thinking about starting a business, the SBTDC at UNCW offers a Pre-Venture Orientation (PVO) program on a regular basis. This two-hour class offers an excellent overview of the first steps in starting a business, obtaining financing and business planning. There is no fee to attend the program.

For more information, call the SBTDC at UNCW at (910) 962-3744 or visit our Web site at https://www.sbtdc.org/offices/uncw/.

https://uncw.edu/swain

An extension of the UNCW Cameron School of Business, the Swain Center for Executive Education serves the region by connecting experts with organizations of all types and sizes. Our programs and services reflect the strength of faculty members, industry leaders, and business consultants. Swain Center partners with organizations through customized leadership solutions, team and operational assessments, executive coaching, and open enrollment project management programs. We equip executives with the essential skills to lead organizations, elevate senior leaders to take on broader roles, and engage the next generation of leaders.

Center for Education in Science, Technology, Engineering, Mathematics - CESTEM

https://www.uncw.edu/cestem/

The Center for Education in Science, Technology, Engineering, and Mathematics - CESTEM - (formerly the Science and Mathematics Education Center - SMEC) at UNCW is committed to regional service and endeavors to stimulate teachers' intellectual curiosity and increase exposure to current technology. Student Awards and Honor Societies

Student Awards

Some of the organizations listed below are registered with the university through the Campus Activities & Involvement Center as student organizations. For more information about those honor societies, please visit https://uncw.campuslabs.com/engage/organizations

A. Farrell Teague Merit Scholarship for Rising Seniors (Junior)

The Teague Scholarship was created by Arthur Farrell Teague and is used to assist rising seniors who have achieved a high level of academic and extracurricular success during their time at UNCW. Every year a recipient is chosen as the recipient of "The Teague Award." The scholarship is considered a merit scholarship and the recipient will be selected on demonstrated academic ability and special achievement, and must have a comprehensive GPA above 3.5. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Adrian D. Hurst Award

Established by Adrian D. Hurst, emeritus professor of mathematics, this award recognizes a

UNCW junior or senior math major who has achieved the highest overall academic grade point average. The award is presented each spring in the form of a plaque.

Biological Sciences Achievement Award

This award was established by the faculty of the Department of Biology and Marine Biology to honor annually the graduating senior biology major who has achieved the highest academic standing. The recipient is identified on a permanent plaque in Friday Hall.

Distinguished Engagement Award (Junior or Senior)

The Distinguished Engagement Award is presented to a select group of junior, senior, and transfer students who have made a significant contribution to UNCW over the course of their undergraduate experience. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Excellence in Engagement Award (Sophomore or Junior)

The Excellence in Engagement Award is presented to a select group sophomore, junior, and transfer students for outstanding contributions to improving the quality of student life during their time at UNCW. Recipients must currently be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Hoggard Medal For Achievement

"The Hoggard Medal" presented through the generosity of the late Dr. John T. Hoggard, is awarded annually to one graduating senior who, in the opinion of the faculty, has shown the most improvement during their years at the university. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Margaret Walthour Lippitt Scholarship

The New Student Leader Award is designed to honor a first-year student with a 3.00 GPA or higher who has demonstrated leadership potential, service to UNCW and the community, personal integrity, and significant involvement in campus organizations. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Martha M. Duncan Scholarship (Sophomore or Junior)

The Martha M. Duncan Scholarship is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The recipient serves as a "LEAD Fellow" for Student Involvement and Leadership in the department of Campus Life for their scholarship year. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Rachel Freeman Service Leadership Award

The Freeman Award, established in honor of the late Mae "Rachel" Freeman, is given to a senior with a cumulative GPA of 2.67 who has demonstrated commitment to bettering the lives of others, leading through examples of service, and the ability to work with others to create social change. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Pat Leonard Senior Medallion Award (Seniors Graduating in May or December)

The Pat Leonard Senior Medallion Award is the most prestigious award presented by the Division of Student Affairs on behalf of the university community. The award was renamed in 2021 to honor Pat Leonard, the late Vice Chancellor for Student Affairs, and her 37 years of exemplary service to UNCW. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 3.0. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award

The Duffy Student Sustainability Award is presented to one student who has been at UNCW at least one semester during the academic year. The recipient must be in good standing with the university and have a minimum 3.0 GPA. The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award was created in March of 2015 to honor the efforts of Lizzy, particularly for spearheading the proposal for The Green Initiative Fund, which brought support, resources and visibility to sustainability at UNCW. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

The Walter Schmid Physics Award

This award has been established in honor of the late Walter Schmid, engineer and inventor, to reward a senior bachelor of science physics major for excellence in physics. The award consists of an engraved plaque and a physics encyclopedia.

UNCW Laureate Award (Sophomore or Junior)

The UNCW Laureate Award, inspired by the Nobel Peace Prize, is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

William A. Bryan Senior Leader Award

Student Involvement and Leadership in the department of Campus Life, with the support of the Alumni Association, sponsors the William A. Bryan Senior Leader Award. The award is given to a senior with a cumulative GPA of 3.00 who has demonstrated outstanding leadership on campus and/or in the community. Special emphasis is placed on integrity, creativity, ability to collaborate, and service to others. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Honor Societies at UNCW

Beta Alpha Psi

Beta Alpha Psi is a national scholastic and professional accounting fraternity. The primary objective of the fraternity is to encourage and give recognition to scholastic and professional excellence in the field of accounting. This includes promoting the study and practice of accounting; providing opportunities for self-development and association among members and practicing accountants; and encouraging a sense of ethical, social, and public responsibility.
Beta Alpha Psi was founded in 1919. The Iota Alpha chapter at UNCW was chartered in 1996 and is a registered student organization through the Campus Activities and Involvement Center.

Beta Beta Beta National Biological Honor Society

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 175,000 persons have been accepted into lifetime membership, and more than 430 chapters have been established throughout the United States and Puerto Rico. TriBeta is a registered student organization through the Campus Activities and Involvement Center.

Gamma Sigma Epsilon

Gamma Sigma Epsilon, a national honorary chemical society, was founded at Davidson College on December 19, 1919. The society recognizes academic excellence in chemistry and fosters a more comprehensive and cooperative study of chemistry and related scientific disciplines. The organization now has 35 active chapters in 22 states, and is growing rapidly. The Alpha Epsilon chapter was established at UNCW in 2001. Eligibility for membership includes junior or senior standing, a 3.35 GPA on at least 30 hours of chemistry courses, and a 3.35 GPA.

Kappa Delta Pi International Honor Society in Education

Kappa Delta Pi International Honor Society in Education is committed to recognizing excellence and fostering mutual cooperation, support, and professional growth for educational professionals.

Lambda Pi Eta Honor Society

Lambda Pi Eta is the official communication studies honor society of the National Communication Association (NCA). As a member of the Association of College Honor Societies (ACHS), LPH has over 400 active chapters at four-year colleges and universities worldwide. LPH was founded in 1985 at the University of Arkansas. LPH became a part of the National Communication Association (NCA) in 1988, and the official honor society of the NCA in July 1995. LPH is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Epsilon Economics Honor Society

Omicron Delta Epsilon was founded by Professor John R. Commons at the University of Wisconsin in 1915. Its objectives include conferring distinction for high scholastic achievement in economics and stimulating and promoting student interest in all aspects of economics. ODE is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Kappa Society, Inc.

Omicron Delta Kappa (ODK) is the National Leadership Honor Society that recognizes and encourages superior scholarship, leadership, and exemplary character. Membership in ODK is a mark of the highest distinction and honor.
The society recognizes achievements in scholarship; athletics; campus or community service; social, religious activities, and campus government; journalism, speech and mass media; and the creative and performing arts. Emphasis is placed on the development of the whole person, both as a member of the college community and as a contributor to a better society. ODK is a registered student organization through the Campus Activities and Involvement Center.

Order of Omega

Order of Omega is a leadership honor society for members of Greek-letter organizations. Order of Omega recognizes juniors and seniors who have exemplified high standards in the areas of scholarship, leadership, involvement within their respective organization, and within the Greek, campus, and local communities. Members are selected from the top 3 percent of fraternity and sorority members at each institution. To date, over 500 chapters have been chartered throughout North America, each sharing the common goal of recognizing the many outstanding student leaders at their institution.

Phi Alpha National Honor Society in Social Work

Phi Alpha is a nationally recognized honor society for both undergraduate and graduate students majoring in social work. Founded in 1960, Phi Alpha now includes over 225 chapters. The Eta Omega Chapter of Phi Alpha was established at UNCW in 1998. The society recognizes students for excellence in scholarship and achievement in the field of social work. Eligibility for membership requires students to major in a CSEW-accredited social work program, have completed 9 semester hours of social work courses, achieved a minimum social work GPA of 3.25, and a minimum overall GPA of 3.00. Phi Alpha is registered as a student organization through the Campus Activities and Involvement Center.

Psi Chi National Honor Society in Psychology

Psi Chi is the national honor society in psychology. It was founded in 1929 in New Haven, Connecticut, to encourage, stimulate and maintain excellence in scholarship, and to advance the science of psychology. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. The University of North Carolina

Wilmington Chapter of Psi Chi was chartered on May 1, 1981, and is one of approximately 675 chapters nationwide. Psi Chi is registered as a student organization through the Campus Activities and Involvement Center.

A further list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html

Chancellor's List and Dean's List

Each semester, outstanding scholarship is recognized in the following tiered manner:

Chancellor's List

The Chancellor's List is composed of the names of all full-time undergraduates who earn a 4.0 semester GPA on all work taken. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Dean's List

The Dean's List is composed of the names of all full-time undergraduates who earn at least a 3.5 semester GPA on all work taken with no grades "B-" or below. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Student-Athlete Support Services (SASS)

Student-Athlete Support Services is a joint effort between Academic Affairs and the UNCW Athletic Department, which seeks to support the academic enrichment and life skill development of every Seahawk student-athlete. SASS Academic Coordinators work diligently to meet the needs of student-athletes' healthy balance of athletic demands while maintaining satisfactory academic standards.
Once student-athletes are admitted to the university, Student-Athlete Support Services Academic Coordinators assist them with registration, sequencing and scheduling of required courses, and selection of a major. They also arrange tutoring

assistance and monitor student-athletes' grades, class attendance, study habits, and progress toward a degree. When a student-athlete declares his or her major, the Academic Coordinators continue to monitor academic performance and progress in conjunction with the student-athlete's departmental advisor.
Central to the role of SASS is the maintenance of a strong working relationship between the program advisors and the university's athletic department and coaches. The Academic Coordinators are knowledgeable about NCAA and CAA rules that apply to eligibility for practice and competition. They are available for consultation when unusual or difficult rule interpretations are needed. They also play a key role in the athletic certification process for all student-athletes.

Student-Athlete Academic Eligibility Requirements

Student-Athlete Support Services helps to monitor the academic progress of each student-athlete as it relates to NCAA, CAA and institutional rules and regulations. The following are examples of rules applying to a student-athlete's academic progress:

- Student-athletes must be enrolled in no fewer than 12 semester hours (full-time) during the fall and spring semesters to be eligible for practice, competition and financial aid.
- Student-athletes must earn at least six (6) semester hours each semester to be eligible for the following semester.
- Student-athletes must earn 18 semester hours during the regular academic year (fall and spring).
- The NCAA requires student-athletes to maintain progress towards a degree and has set benchmarks they must meet throughout their career. Student-athletes must earn: 24 hours prior to the start of their third semester; 40% of a degree prior to the start of their fifth semester; 60% of a degree prior to the start of their seventh semester; 80% of a degree prior to the start of their ninth semester.
- The NCAA requires a student-athlete to designate a major by the beginning of their fifth semester, or to be
  taking major courses that lead to a degree, as certified by the dean or an appropriate academic advisor.
- Student-athletes must meet UNCW and NCAA minimum cumulative grade point averages in order to compete.
- In order to determine initial athletic eligibility, all student-athletes must be approved through the NCAA Eligibility Center.

A number of other policies affect a student-athlete's participation in a varsity sport. Additional information can be found in the *Student-Athlete Handbook*.

NCAA Academic Requirements for Continuing Eligibility

The minimum guidelines defining satisfactory progress toward a degree for student-athletes are as follows:

Year 1 - Freshman

• Earn a minimum of 6 credit hours each semester to maintain eligibility for the following semester.

By the beginning of Year 2

• Earn 18 credit hours during the regular academic year (fall and spring semesters).
• Earn 24 credit hours before the start of the third semester of enrollment.
• Maintain at least a 1.80 cumulative GPA.

Year 2 - Sophomore

• Earn a minimum of 6 credit hours each semester to maintain eligibility the following semester.
• Maintain at least a 1.80 cumulative GPA through the third semester for eligibility the following semester.

By the beginning of Year 3

• Earn 18 credit hours during the regular academic year (fall and spring semesters).
• Declare a major.
• Meet 40% of degree requirements.
• Maintain at least a 1.90 cumulative GPA.

Year 3 - Junior

• Complete a minimum of 6 degree applicable hours each semester for eligibility the following semester.
• Maintain at least a 1.90 cumulative GPA through the fifth semester for eligibility the following semester.

By the beginning of Year 4

• Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
• Meet 60% of degree requirements.

• Maintain at least a 2.00 cumulative GPA.

Year 4 - Senior

• Earn a minimum of 6 degree applicable hours each semester for eligibility the following semester.
• Maintain at least a 2.00 cumulative GPA through the seventh semester for eligibility the following semester.

By the beginning of Year 5

• Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
• Earn 80% of degree requirements.
• Maintain at least a 2.00 cumulative GPA.

Student Health

Abrons Student Health Center

The mission of the UNCW Abrons Student Health Center (SHC) is to provide student centered, affordable, quality health and preventive services to the students ofUNCW. Our goal is to help students stay as healthy as possible so that they can fully engage in and out of the classroom. We see ourselves as a key component of student success here on campus.
Services include confidential diagnosis and treatment of general and acute medical problems, psychiatric medication management, nutrition services, allergy injections, immunizations, laboratory services, women's health care, contraception services, men's health assessment and preventive services. The health fee is included in student fees and entitles students taking six or more credit hours to unlimited visits. There are additional charges for services such as lab tests, immunizations, administration of allergy shots, and annual exams and physicals. Students taking less than six hours will be entitled to health services upon payment of the health fee. The Abrons Student Health Center does not routinely issue excuses for class absences due to illness. For more information, or to make an appointment, please call 910-962-3280 or visit us on the web at Student Health Center.
All students are required to submit a completed "Medical History Form and

Immunization Record" upon being admitted to UNCW. For more information, refer to the

North Carolina General Statute 130A-155.1 establishes specific immunization requirements for all students enrolled in North Carolina colleges or universities. It is the responsibility of the Student Health Center to monitor the immunization record of each student to ensure compliance with state law and university requirements.

All students are required to complete and sign the "Medical History Form and Immunization Record." If a student is under the age of 18, a parent or guardian must sign the form as well. The form, along with additional instructions, can be found at https://uncw.edu/healthservices/shc_newstudents.html.

Immunizations that are REQUIRED pursuant to NC state law (current as of January 5, 2025):

*Please read below for further information

· **Diphtheria, tetanus and pertussis vaccine:** Three doses are required for individuals entering college or university. Individuals entering college or university for the first time on or after July 1, 2008 must have had three doses of tetanus/diphtheria toxoid; one of which must be tetanus/diphtheria/pertussis.

· **Polio vaccine:** Three doses are required for individuals entering college or university. An individual attending school that has attained his or her 18th birthday is not required to receive polio vaccine.

· **Measles vaccine:** Two doses at least 28 days apart are required for individuals entering college or university. The requirement for a second dose does not apply to individuals who entered school, college or university for the first time before July 1, 1994. A person who has been diagnosed prior to January 1, 1994 by a physician (or designee, such as a nurse practitioner or physician assistant) as having measles (rubeola), or an individual who has been documented by serological testing to have a protective antibody titer against measles, is not required to receive measles vaccine. Individuals born before 1957 are not required to receive measles vaccine except in measles outbreak situations.

· **Mumps vaccine:** Two doses are required for individuals entering college or university. A physician's diagnosis is not acceptable for mumps disease(s). Individuals must be immunized or have laboratory confirmation of disease, or have been documented by serological testing to have a protective antibody against mumps. Individuals born before 1957 are not required to receive the mumps vaccine. Individuals that entered college or university before July 1, 1994 are not required

to receive the vaccine. Individuals that entered school, college or university before July 1, 2008 are not required to receive the second dose of mumps vaccine.

· **Rubella vaccine:** One dose is required for individuals entering college or university. A physician's diagnosis is not acceptable for rubella disease(s). Individuals must be immunized or have laboratory confirmation of rubella disease, or have been documented by serological testing to have a protective antibody titer against rubella. Any individual who has attained his or her fiftieth birthday is not required to receive rubella vaccine except in outbreak situations. Any individual who entered college or university after his or her thirtieth birthday, and before February 1, 1989, is not required to receive rubella vaccine except in outbreak situations.

· **Hepatitis B Vaccine:** Three doses are required for individuals entering college or university. Hepatitis B vaccine is not required if an individual was born before July 1, 1994.

· **Varicella Vaccine:** One dose is required for individuals entering college or university that were born on or after April 1, 2001. An individual who has laboratory confirmation of varicella disease immunity or has been documented by serological testing to have a protective antibody titer against varicella, or who has documentation from a physician, nurse practitioner, or physician assistant verifying history of varicella disease, is not required to receive varicella vaccine. The documentation shall include the name of the individual with a history of varicella disease, the approximate date or age of infection, and a healthcare provider signature. Individuals born before April 1, 2001 are not required to receive varicella vaccine.

· **Meningococcal conjugate (MenACWY) vaccine:** Two doses. One dose is required for individuals entering the seventh grade or by 12 years of age, whichever comes first, on or after July 1, 2015. A booster dose is required for individuals entering the 12th grade or by 17 years of age, whichever comes first. Individuals who entered seventh grade before July 1, 2015 are not required to receive the first dose. The booster dose does not apply to individuals who entered the 12th grade before August 1, 2020. If the first dose is administered on or after the 16th birthday, a booster dose is not required. Individuals born before January 1, 2003 shall not be required to receive meningococcal conjugate vaccine.

Immunization requirements taken directly from https://www.immunize.nc.gov/schools/collegesuniversities.htm.

International Students and/or non-US Citizens: Vaccines are required as noted above. Additionally, international students are required to have a Tb skin test (PPD, TST or QuantiFERON Gold) that has been administered and read at an appropriate medical facility within 12 months prior to the first day of class. (Chest x-ray required if test is positive.)

Notes:

a. Immunization records must bear either the administering provider's signature, name, address and phone number or the official stamp of the health care facility at which the immunizations were administered. Immunization records printed from a state registry are also an acceptable form of

proof.
b. Laboratory proof of immunity to Measles (Rubeola), Mumps, Rubella (German Measles), or Varicella is acceptable.

Failure to comply with North Carolina immunization requirements will result in administrative withdrawal from the university.
section of this catalogue.

Student Health Insurance

All undergraduate students taking six or more credits will be required to have health insurance to attend UNCW. Those unable to show proof of existing coverage will automatically be enrolled in the university-sponsored insurance plan. Details are available on the Abrons Student Health Center website.
See also:
Health insurance is required for all UNCW students who meet the following three criteria:

- Enrolled in a minimum of 6 credit hours per semester for undergraduates or 1 credit hour for graduate students, and
- Enrolled in a main-campus degree-seeking program, and
- Eligible to pay the UNCW student health fee.

Students who have their own insurance and do not want to purchase the insurance through the school must complete an on-line waiver each term, providing details about their current insurance plan. Any student who does not waive out of the insurance plan will be charged the premium and automatically enrolled in the program.

Health Promotion

Health Promotion, located in the Hundley Health Education Center in the Student Recreation Center, is UNCW's central resource for health education programs and services. The staff and peer educators develop and implement campus-wide programs designed to encourage healthy attitudes, practices, and behaviors as well as to reduce the illegal and high-risk use of alcohol and other drugs and the consequences that the members of this campus community experience as a result. Health Promotion is also the home for the CRC Hawks, UNCW's recovery

community.
Staffed by three prevention professionals, a registered dietitian and a group of peer educators, the office offers programs on nutrition, sexual health, cold/flu prevention, stress management and other health topics. The registered dietitian provides individual counseling and programs for weight management, disease prevention/management, sports nutrition, disordered eating, vegetarian and vegan diets, and other nutrition concerns. All requests for information or consultation are handled confidentially, whether for personal interest, for a friend, or for a class assignment.
There are resources including brochures and handouts on health-related topics, as well as books, magazines, and DVDs available for loan. Resident Assistants, professors, and organizations can request a program through our website. For more information, please call 910-962-4135, or visit us on the web at www.uncw.edu/healthpromo.

Pharmacy

The UNCW Pharmacy is located in DePaolo Hall within the Abrons Student Health Center suite. Students can fill prescriptions written by UNCW providers as well as off-campus providers and may purchase over 100 over-the-counter medications and products. Crutches are also available for purchase. For more information, please call 910-962-3016 or visit us on the web at Student Health Center.

Counseling Center

The staff of the Counseling Center believes that a student's successful progress towards their degree is affected by a number of personal, social and academic factors. We offer a variety of services to support a student's academic and personal success including individual personal counseling, group counseling and personal development workshops. In addition, consultation services and outreach programs (including the In Harmony Initiative, focused on the mind-body connection) are offered for residence halls, classes, student organizations, as well as other campus departments and offices. An important role of the Counseling Center is working with students to develop the necessary skills and awareness to successfully meet their college life demands.

The Counseling Center is staffed by licensed counseling professionals including counselors, social workers and psychologists, as well as post-doctoral Psychology Fellows and occasionally other advanced trainees who have specific interests and skills in working within a university setting. Some common student concerns addressed at the Counseling Center include depression, anxiety, homesickness, relationships, coming out, cultural adjustment, family issues and grief. Assistance is also available for students with concerns related to sexual assault, substance abuse and body image. The transition to college can be particularly trying for students managing previously diagnosed conditions or on-going psychological concerns. The Counseling Center can assist students and families with identifying local providers who can keep support structures intact and provide longer term services.
Enrolled students are eligible for counseling services, which are confidential and accessible. Initial consultations and counseling appointments are available weekdays. After-hours and on weekends, phone consultation with an on-call counselor is available for students experiencing a psychological crisis by calling the Counseling Center at (910) 962-3746 and choosing the option that allows the caller to speak with a counselor.
When seeking services, students engage in an initial consultation with a counselor who will assess the student's needs and determine the services that will best meet those needs. If a student's needs require attention that is beyond the Counseling Center's scope of practice, the counselor will work to connect the student with appropriate off-campus services. Students are encouraged to come and talk with a counselor about any concerns that are hindering their academic or personal success.
For additional information about the services and programs offered by the Counseling Center, please call (910) 962-3746, come by our offices on the second floor of DePaolo Hall, or visit our Web site: www.uncw.edu/counseling. Also, check our social media platforms, including UNCW Counseling Center - Youtube and Pinterest page for additional resources.

Student Organizations

There are approximately 280 student organizations registered with Student Involvement and Leadership at UNCW. These organizations include: political, professional, academic, multicultural, religious, service, honorary, governing,

graduate, special interest groups, student media, Greek-letter, sports clubs, and ethnic and religious organizations. These organizations help develop the UNCW community through the activities and affiliations they create. Many of the clubs are showcased during the fall Involvement Carnival held in late August/early September. You can find out information about these organizations in the Campus Activities and Involvement Center in the Fisher Student Center, Room 2029 or on WaveLink, UNCW's student organization and departmental management platform that offers a variety of opportunities to highlight events, showcase resources, and collaborate with others.

Fraternity and Sorority Life

Fraternities and Sororities are social organizations that can help personalize the college experience. Greek Life offers a smooth transition to college, life-long friendships, leadership opportunities, scholastic support, and philanthropic and community engagement opportunities. Each type of organization recruits its members differently and at different times - contact us to learn more! Students interested in fraternity and sorority opportunities can find out about upcoming events on WaveLink at https://uncw.campuslabs.com/engage/organization/ofsl.

International Student Organization

The International Student Organization is a support group, a social network, and a promoter of international programs. The group consists of American students who have traveled and studied abroad and international students who are enrolled at the university. The organization hopes to foster an international presence on the campus and to help international students become familiar with American culture, the local area, and university life.

Leadership Development

At UNCW we believe every student is capable of practicing leadership because it is not about a position or title;, it's about the desire and drive to create *positive change*. Student Involvement and Leadership in the department of Campus Life offers workshops, retreats, and personalized coaching that equips students with the

skills and tools needed to successfully practice leadership on campus, in the community, and in their careers. Students interested in leadership development opportunities can find out about upcoming events on WaveLink at https://uncw.campuslabs.com/engage/organization/caic/events

Student Community Engagement

Community engagement is much more than a service hour requirement - we make it a priority to connect students with the community in ways that make a positive impact for both the organizations and the volunteers. This can be through volunteer work (on campus, in Wilmington and in other cities like Atlanta, New Orleans, or Asheville), philanthropy projects (like donating a Thanksgiving meal or holiday gifts), or by donating blood (we host monthly drives with the American Red Cross). Students interested in community engagement opportunities can find out about upcoming events on GivePulse: https://uncw.givepulse.com/group/1027-University-of-North-Carolina-Wilmington

Student Government Association: Representing the Voice and Vision of UNCW Students

The Student Government Association (SGA) is a democratic organization, permitting expression of student opinion, working for the best interest of the university and upholding a high standard of morals and conduct. SGA embodies UNCW's shared governance commitment through partnerships with the UNCW administration, Faculty Senate and Staff Senate. Student activity fee money supports the Student Government Association in its objectives and activities. Officers, class representatives, and at-large representatives are elected by the student body. Executive Committees are comprised of Appropriations, Diversity and Inclusion, Marketing, Communications, and Health & Wellness; Senate committees are comprised of Student Services, Campus Services, Academic Affairs, Internal Affairs, and External Affairs. The Student Government Association is also a member of the North Carolina Association of Student Governments. Contact the SGA Office or visit them on the second floor of the Fisher Center to learn more!

Student Awards

Some of the organizations listed below are registered with the university through the Campus Activities & Involvement Center as student organizations. For more information about those honor societies, please visit https://uncw.campuslabs.com/engage/organizations

A. Farrell Teague Merit Scholarship for Rising Seniors (Junior)

The Teague Scholarship was created by Arthur Farrell Teague and is used to assist rising seniors who have achieved a high level of academic and extracurricular success during their time at UNCW. Every year a recipient is chosen as the recipient of "The Teague Award." The scholarship is considered a merit scholarship and the recipient will be selected on demonstrated academic ability and special achievement, and must have a comprehensive GPA above 3.5. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Adrian D. Hurst Award

Established by Adrian D. Hurst, emeritus professor of mathematics, this award recognizes a UNCW junior or senior math major who has achieved the highest overall academic grade point average. The award is presented each spring in the form of a plaque.

Biological Sciences Achievement Award

This award was established by the faculty of the Department of Biology and Marine Biology to honor annually the graduating senior biology major who has achieved the highest academic standing. The recipient is identified on a permanent plaque in Friday Hall.

Distinguished Engagement Award (Junior or Senior)

The Distinguished Engagement Award is presented to a select group of junior, senior, and transfer students who have made a significant contribution to UNCW over the course of their

undergraduate experience. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Excellence in Engagement Award (Sophomore or Junior)

The Excellence in Engagement Award is presented to a select group sophomore, junior, and transfer students for outstanding contributions to improving the quality of student life during their time at UNCW. Recipients must currently be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Hoggard Medal For Achievement

"The Hoggard Medal" presented through the generosity of the late Dr. John T. Hoggard, is awarded annually to one graduating senior who, in the opinion of the faculty, has shown the most improvement during their years at the university. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Margaret Walthour Lippitt Scholarship

The New Student Leader Award is designed to honor a first-year student with a 3.00 GPA or higher who has demonstrated leadership potential, service to UNCW and the community, personal integrity, and significant involvement in campus organizations. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Martha M. Duncan Scholarship (Sophomore or Junior)

The Martha M. Duncan Scholarship is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The recipient serves as a "LEAD Fellow" for Student Involvement and Leadership in the department of Campus Life for their scholarship year. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Rachel Freeman Service Leadership Award

The Freeman Award, established in honor of the late Mae "Rachel" Freeman, is given to a senior with a cumulative GPA of 2.67 who has demonstrated commitment to bettering the lives of others, leading through examples of service, and the ability to work with others to create social change. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Pat Leonard Senior Medallion Award (Seniors Graduating in May or December)

The Pat Leonard Senior Medallion Award is the most prestigious award presented by the Division of Student Affairs on behalf of the university community. The award was renamed in 2021 to honor Pat Leonard, the late Vice Chancellor for Student Affairs, and her 37 years of exemplary service to UNCW. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 3.0. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award

The Duffy Student Sustainability Award is presented to one student who has been at UNCW at least one semester during the academic year. The recipient must be in good standing with the university and have a minimum 3.0 GPA. The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award was created in March of 2015 to honor the efforts of Lizzy, particularly for spearheading the proposal for The Green Initiative Fund, which brought support, resources and visibility to sustainability at UNCW. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

The Walter Schmid Physics Award

This award has been established in honor of the late Walter Schmid, engineer and inventor, to reward a senior bachelor of science physics major for excellence in physics. The award consists of an engraved plaque and a physics encyclopedia.

UNCW Laureate Award (Sophomore or Junior)

The UNCW Laureate Award, inspired by the Nobel Peace Prize, is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

William A. Bryan Senior Leader Award

Student Involvement and Leadership in the department of Campus Life, with the support of the Alumni Association, sponsors the William A. Bryan Senior Leader Award. The award is given to a senior with a cumulative GPA of 3.00 who has demonstrated outstanding leadership on campus and/or in the community. Special emphasis is placed on integrity, creativity, ability to collaborate, and service to others. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Honor Societies at UNCW

Beta Alpha Psi

Beta Alpha Psi is a national scholastic and professional accounting fraternity. The primary objective of the fraternity is to encourage and give recognition to scholastic and professional excellence in the field of accounting. This includes promoting the study and practice of accounting; providing opportunities for self-development and association among members and practicing accountants; and encouraging a sense of ethical, social, and public responsibility. Beta Alpha Psi was founded in 1919. The Iota Alpha chapter at UNCW was chartered in 1996 and is a registered student organization through the Campus Activities and Involvement Center.

Beta Beta Beta National Biological Honor Society

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 175,000 persons have been accepted into lifetime membership, and more than 430 chapters have been established throughout the United States and Puerto Rico. TriBeta is a registered student organization through the Campus Activities and Involvement Center.

Gamma Sigma Epsilon

Gamma Sigma Epsilon, a national honorary chemical society, was founded at Davidson College on December 19, 1919. The society recognizes academic excellence in chemistry and fosters a more comprehensive and cooperative study of chemistry and related scientific disciplines. The organization now has 35 active chapters in 22 states, and is growing rapidly. The Alpha Epsilon chapter was established at UNCW in 2001. Eligibility for membership includes junior or senior standing, a 3.35 GPA on at least 30 hours of chemistry courses, and a 3.35 GPA.

Kappa Delta Pi International Honor Society in Education

Kappa Delta Pi International Honor Society in Education is committed to recognizing excellence and fostering mutual cooperation, support, and professional growth for educational professionals.

Lambda Pi Eta Honor Society

Lambda Pi Eta is the official communication studies honor society of the National Communication Association (NCA). As a member of the Association of College Honor Societies (ACHS), LPH has over 400 active chapters at four-year colleges and universities worldwide. LPH was founded in 1985 at the University of Arkansas. LPH became a part of the National Communication Association (NCA) in 1988, and the official honor society of the NCA in July 1995. LPH is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Epsilon Economics Honor Society

Omicron Delta Epsilon was founded by Professor John R. Commons at the University of Wisconsin in 1915. Its objectives include conferring distinction for high scholastic achievement in economics and stimulating and promoting student interest in all aspects of economics. ODE is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Kappa Society, Inc.

Omicron Delta Kappa (ODK) is the National Leadership Honor Society that recognizes and encourages superior scholarship, leadership, and exemplary character. Membership in ODK is a mark of the highest distinction and honor.

The society recognizes achievements in scholarship; athletics; campus or community service; social, religious activities, and campus government; journalism, speech and mass media; and the creative and performing arts. Emphasis is placed on the development of the whole person, both

as a member of the college community and as a contributor to a better society. ODK is a registered student organization through the Campus Activities and Involvement Center.

Order of Omega

Order of Omega is a leadership honor society for members of Greek-letter organizations. Order of Omega recognizes juniors and seniors who have exemplified high standards in the areas of scholarship, leadership, involvement within their respective organization, and within the Greek, campus, and local communities. Members are selected from the top 3 percent of fraternity and sorority members at each institution. To date, over 500 chapters have been chartered throughout North America, each sharing the common goal of recognizing the many outstanding student leaders at their institution.

Phi Alpha National Honor Society in Social Work

Phi Alpha is a nationally recognized honor society for both undergraduate and graduate students majoring in social work. Founded in 1960, Phi Alpha now includes over 225 chapters. The Eta Omega Chapter of Phi Alpha was established at UNCW in 1998. The society recognizes students for excellence in scholarship and achievement in the field of social work. Eligibility for membership requires students to major in a CSEW-accredited social work program, have completed 9 semester hours of social work courses, achieved a minimum social work GPA of 3.25, and a minimum overall GPA of 3.00. Phi Alpha is registered as a student organization through the Campus Activities and Involvement Center.

Psi Chi National Honor Society in Psychology

Psi Chi is the national honor society in psychology. It was founded in 1929 in New Haven, Connecticut, to encourage, stimulate and maintain excellence in scholarship, and to advance the science of psychology. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. The University of North Carolina Wilmington Chapter of Psi Chi was chartered on May 1, 1981, and is one of approximately 675 chapters nationwide. Psi Chi is registered as a student organization through the Campus Activities and Involvement Center.

A further list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html

Chancellor's List and Dean's List

Each semester, outstanding scholarship is recognized in the following tiered manner:

Chancellor's List

The Chancellor's List is composed of the names of all full-time undergraduates who earn a 4.0 semester GPA on all work taken. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Dean's List

The Dean's List is composed of the names of all full-time undergraduates who earn at least a 3.5 semester GPA on all work taken with no grades "B-" or below. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Transition Programs

https://uncw.edu/seahawk-life/support-success/transition-programs/
The Transition Programs Office is responsible for providing comprehensive programs that will assist undergraduate students and their families in their transition to the university. These programs expose new and transfer students to the educational opportunities within UNCW, introduce them to the academic and co-curricular life of the institution, and assist them in their on-going transition to the university beyond orientation. Transition Programs also assists parents and family members in supporting their student's success through frequent communication and engagement opportunities. In addition, Transition Programs is responsible for the coordination and implementation of Commencement.

University Admission Requirements

•

For First-Year Students for Summer Session II and Fall

For Transfer Applicants for Summer and Fall

Application priority deadline is March 1

After March 1, the university may accept transfer applications on a space available basis and reserves the right to return an application and fee without processing the application.

Application status and admission notification is viewable in the application portal.

A non-refundable $100 enrollment deposit is required on or before May 1 or by the date specified in the applicant status portal, whichever is latest, from all admitted students intending to

enroll at UNCW.

The university reserves the right to withdraw admission, registration, housing assignments, or orientation registration for any admitted student who does not pay the $100 enrollment deposit by the designated deadline.

For Transfer Applicants for Spring (January) Semester

Application deadline is October 15.

Application status and admission notification is viewable in the application portal.

A non-refundable $100 enrollment deposit is required on or before December 1 or by the date specified in the applicant status portal, whichever is latest, from all admitted students intending to enroll at UNCW.

For Transfer Online Accelerated Program (OAP) Applicants

The OAP application has multiple application deadlines, the dates can be found by visiting the program websites.

Application status and admission notification is viewable in the application portal.

For Former (Re-Enrolling) Students

Students applying to re-enroll should direct all inquiries to the Office of Admissions.

After the Office of Admissions receives all required documentation for re-enrolling, applications are processed within one to two weeks.

The Fall application deadline is July 15.

The Spring application deadline is November 15.

The Summer application deadline is June 15.

Applicants seeking re-enrollment at UNCW will be charged a non-refundable $80 application fee.

UNCW graduates will have their application fee waived automatically after applying.

For Permission Students (Special Undergraduate and Permission Visiting) for Fall and Spring

1. The Fall application deadline is July 15.
2. Spring application deadline is November 15.
3. New students must register and remain enrolled in the term for which they were admitted. Students who decide to begin enrollment in a term later than their admission term must contact the Office of Admissions to submit a new application for the later term.

For Summer Visiting Students

1. The Summer application deadline is June 15.
2. The summer term includes two sessions. Any applicant admitted for summer is eligible to take classes in the first session, second session or both sessions. Summer admission is limited to summer enrollment exclusively.
3. Students who decide to enroll in a term later than their admission term must contact the Office of Admissions to submit a new application for the later term.

-

Admission to the university is competitive. Applicants may apply to enter the university at the beginning of the fall semester and at the second session of the summer term. The university encourages rigorous coursework during high school and awards credit based on scores earned on Advanced Placement (AP), and International Baccalaureate (IB) exams, and/or grades on college level courses taken during high school. Students should consult their high school counselor for further information. The university honors Common Application, NACAC, College Board and ACT Application Fee Waiver forms if properly signed.
Additionally, listed below are the high school minimum course requirements, as

established by the Board of Governors of the University of North Carolina system, for consideration for admission to the University of North Carolina Wilmington. Meeting the high school minimum course requirements does not infer or guarantee admission to UNCW.

Four (4) course units in English

- emphasizing grammar, composition, and literature
- algebra I and II, geometry, and one (1) unit beyond algebra II,
- algebra I and II, and two (2) units beyond algebra II, or
- Common core math I, II, and III, and one unit beyond common core math III; or
- integrated math I, II, and III, and one (1) unit beyond integrated math III
- NC Math 1, 2, 3, and one unit beyond NC Math 3 identified as meeting the 4th level mathematics requirement for admission to UNC System institutions.
- one (1) unit in a life science (for example, biology, ecology, zoology)
- one (1) non-life science unit (for example, astronomy, chemistry, earth science, environmental science, physical science, physics)
- one (1) laboratory science unit
- one unit must be U.S. history
-

Note: these courses should be seleccted in alignment with a student's academic and career objectives. Completion of two sequential world language courses is recommended.

- The difficulty of the coursework taken (advanced, college prep, honors, advanced placement, International Baccalaureate, dual enrolled, etc.)
- Grades, grade point average, and/or class rank
- Standardized test scores–SAT and/or ACT (optional for applicants with a weighted GPA of 2.80 or higher)
- Recommendation from school counselor or core academic teacher (optional)
- Extracurricular activities, community activities, talents, interests, work experience and/or life experience

- The required essay and short answer.

1. Submit a completed application by one of the two deadline dates (November 1, early action or February 1, regular decision).
2. Submit a non-refundable $80 application fee or official application for waiver with the application.
3. Submit an official transcript directly from all the high schools attended to the Office of Undergraduate Admissions, University of North Carolina Wilmington, 601 S. College Road, Wilmington, North Carolina 28403-5904. We cannot accept transcripts directly from the student.
4. Complete the required essay and short answer, and submit with the application.
5. Request that an optional recommendation from a school counselor or core academic teacher be submitted directly to the Office of Admissions at UNCW.
6. Submit the optional SAT or the ACT. If not reported on the high school transcript, SAT and ACT scores must be submitted directly from either The College Board or ACT (UNCW College Codes are: SAT #5907, ACT #3174).

•

Transfer applicants may apply to enter the university at the beginning of the fall term, summer term or spring term.

Students seeking transfer admission to the University of North Carolina Wilmington must have graduated from an accredited high school, earned a General Equivalency Diploma (GED), or obtained an Adult High School Diploma. Additionally, they must have completed college coursework at another institution after finishing secondary education.

Applicants under the age of 21 who have not completed 24 hours of transferable college coursework must meet North Carolina high school minimum course requirements. Additional recommendations for transfer admission are provided on the website.

UNCW does not admit by major or program. Admission requirements for particular programs of study at UNCW may differ from minimum admission standards. Transfer applicants should refer to the requirements listed for specific programs/majors within the specific college/school.

Application Procedure for Transfer Students

Students seeking transfer admission are required to comply with the following procedures:

1. Submit a complete application by the appropriate application deadline date.
2. Submit a non-refundable application fee with the application.
3. Submit an official transcript from each college or university attended, including dual enrollment credit. It is the applicant's responsibility to request that official transcripts are submitted by each institution attended to the Office of Admissions by the application deadline date.
4. Submit official military transcripts (if applicable) to the UNCW Office of Admissions.
5. Have an official high school transcript or GED sent to the Office of Admissions by the application deadline date.

Auditing allows a student to enroll and attend a class without receiving academic credit. Audited curses do not count towards full-time status, loan deferment, or financial aid eligibility. Audit students pay regular tuition and fees for audited classes. Current UNCW students, faculty, and staff who wish to audit a class should complete the online Application for Audit/Graded Audit Courses through the Office of the
Registrar: https://uncw.edu/myuncw/academics/registrar/students/registration/graded-audit-course.
Applicants who are not current UNCW students, faculty, or staff can apply online through the UNCW Application for Audit and Senior Citizen Audit Students.
The Spring application will open on November 1 and close on the first day of classes. The Summer and Fall application will open on April 1 and close on the first day of classes. In addition to the application, applicants must submit the non-refundable application fee. If admitted, students will need to request an audit through the Office of the Registrar.
For more information, visit https://uncw.edu/admissions/undergraduate/non-degree/auditing.

-

Applicants to UNCW's graduate programs should direct all inquiries concerning admission to the Graduate School. Please refer to the Graduate School website for admission requirements.

-

The University of North Carolina Wilmington welcomes interest and inquiry from international students, defined as those who are not U.S. citizens or who are not U.S. permanent residents. In addition to meeting academic requirements, international applicants for first-year and transfer admission must submit scores (TOEFL, IELTS, DET, iTEP or PTE) to demonstrate English proficiency if English is not their native language, or if they do not meet other established criteria for waiving submission of test scores, as detailed on the Web site: https://www.uncw.edu/admissions/INTLEnglish.html. International students requesting UNCW's F-1 visa sponsorship must also provide documentation proving that the financial obligations associated with their study at the university can be fully met. For details on international admission requirements and a list of all required documents, please refer to the Web site: www.uncw.edu/intladmissions. UNCW admits international students for every semester. Certain academic programs require a separate, additional application in order to be admitted to those programs; for example, the Cameron School of Business and the School of Nursing.
The Office of International Programs will advise international exchange students. Visit Web site https://www.uncw.edu/intprogs/.

-

Students from other colleges or universities who intend to return to their home institution may attend UNCW as visiting students. The university does not assume responsibility for determining a student's course selection when such credits are to be transferred elsewhere. Transcripts of work completed at UNCW must be requested through the Office of the Registrar to assure a record of academic work is sent to the home institution of the visiting student. Enrollment as a visiting student from another institution in no way obligates the university to continue a student's enrollment at UNCW at the expiration of the visiting period. All application deadline dates apply to visiting students.
Students should apply as a visiting student using the non-degree seeking undergraduate application, submit the non-refundable application fee, and an official transcript from their current or most recently attended college or university. Visiting students must be in good academic standing at their current or most recently attended institution and have attained at least a 2.50 cumulative GPA with 24 transferable credit hours complete at the time of application to be considered for admission. A student may only attend as a visiting student for two consecutive semesters (not including summer session).

North Carolina General Assembly Session Law 2017-57, Senate Bill 257, Section 10.12.(a) authorized the Board of Governors to promulgate rules permitting residents of North Carolina who have attained the age of 65 and who meet applicable admissions standards to audit courses, tuition-free, on a space available basis.

Auditing allows a student to enroll and attend a class without receiving academic credit. Audited courses do not count toward full-time status, loan deferment, or financial aid eligibility. Audit students pay regular tuition and fees for audited classes.

Senior citizens 65 and older who are not currently enrolled at UNCW and wish to audit a class will need to apply online through the UNCW Application for Audit and Senior Citizen Audit Students.

The Spring application will open on November 1 and close on the first day of classes. The Summer and Fall application will open on April 1 and close on the first day of classes. In addition to the application, applicants must submit the non-refundable application fee. If admitted, students will need to request an audit through the Office of the Registrar. For more information, visit https://uncw.edu/admissions/undergraduate/non-degree/auditing.

Senior citizens who wish to take courses **for credit** must apply through the Admissions Office. Tuition and fees will apply.

Senior citizens registering for more than (4) credit hours will need to comply with

the immunization requirements under North Carolina state law. Please contact Student Health Services at (910) 962-3280 for more information.

- High school students who wish to pursue academic courses on the collegiate level while attending high school may enroll at UNCW if they meet the qualifications for participation in this program. This program is available to students whose primary residence is New Hanover, Pender and Brunswick County. Eligible students must have (1) completed two calendar years as a student at a high school or homeschool and (2) earned enough credits to be designated a junior or senior year in high school. Exceptions are not made to the program requirements. Not all UNCW courses will be available to dual-enrolled high school students, depending upon the requirements of or restriction for the course. For instance, courses that have a component that includes international or overnight travel are not available. Applications for dual-enrollment are available online at https://uncw.edu/admissions/undergraduate/non-degree/dual-enrollment. Students may enter this program for the fall, spring, or summer terms and may only register for two undergraduate courses per term. Students are responsible for all tuition and fees associated with the registered course(s). Applications and course selections for fall and summer terms should be received in the UNCW Office of Admissions by April 1. Applications and course selections for spring term should be received in the UNCW Office of Admissions by November 1. Students are required to submit a new application for every semester they wish to take classes at UNCW. Late applications will not be considered. https://uncw.edu/admissions/undergraduate/non-degree/dual-enrollment.

- A student who has graduated from a four-year accredited college or university and wishes to take undergraduate classes without pursuing a second degree can apply to UNCW as a special undergraduate student. This application option is also available for students who need to take classes toward completion of teacher certification or licensure requirements. Please note that any student who wishes to earn a second Undergraduate degree must apply as a transfer student. Special Undergraduate students must have graduated with a Bachelor's degree from a four-year regionally accredited institution in good academic standing.

Students must submit the application through the UNCW Application Portal and submit the non-refundable application fee, as well as an official transcript from their degree awarding institution. Applicants must submit their application and all required materials by the posted deadline for their desired entry term.

•

North Carolina General Statute 130A-155.1 establishes specific immunization requirements for all students enrolled in North Carolina colleges or universities. It is the responsibility of the Student Health Center to monitor the immunization record of each student to ensure compliance with state law and university requirements. All students are required to complete and sign the "Medical History Form and Immunization Record." If a student is under the age of 18, a parent or guardian must sign the form as well. The form, along with additional instructions, can be found at https://uncw.edu/healthservices/shc_newstudents.html.

Immunizations that are REQUIRED pursuant to NC state law (current as of January 5, 2025):

*Please read below for further information

· **Diphtheria, tetanus and pertussis vaccine:** Three doses are required for individuals entering college or university. Individuals entering college or university for the first time on or after July 1, 2008 must have had three doses of tetanus/diphtheria toxoid; one of which must be tetanus/diphtheria/pertussis.

· **Polio vaccine:** Three doses are required for individuals entering college or university. An individual attending school that has attained his or her 18th birthday is not required to receive polio vaccine.

· **Measles vaccine:** Two doses at least 28 days apart are required for individuals entering college or university. The requirement for a second dose does not apply to individuals who entered school, college or university for the first time before July 1, 1994. A person who has been diagnosed prior to January 1, 1994 by a physician (or designee, such as a nurse practitioner or physician assistant) as having measles (rubeola), or an individual who has been documented by serological testing to have a protective antibody titer against measles, is not required to receive measles vaccine. Individuals born before 1957 are not required to receive measles vaccine except in measles outbreak situations.

· **Mumps vaccine:** Two doses are required for individuals entering college or university. A

physician's diagnosis is not acceptable for mumps disease(s). Individuals must be immunized or have laboratory confirmation of disease, or have been documented by serological testing to have a protective antibody against mumps. Individuals born before 1957 are not required to receive the mumps vaccine. Individuals that entered college or university before July 1, 1994 are not required to receive the vaccine. Individuals that entered school, college or university before July 1, 2008 are not required to receive the second dose of mumps vaccine.

· **Rubella vaccine:** One dose is required for individuals entering college or university. A physician's diagnosis is not acceptable for rubella disease(s). Individuals must be immunized or have laboratory confirmation of rubella disease, or have been documented by serological testing to have a protective antibody titer against rubella. Any individual who has attained his or her fiftieth birthday is not required to receive rubella vaccine except in outbreak situations. Any individual who entered college or university after his or her thirtieth birthday, and before February 1, 1989, is not required to receive rubella vaccine except in outbreak situations.

· **Hepatitis B Vaccine:** Three doses are required for individuals entering college or university. Hepatitis B vaccine is not required if an individual was born before July 1, 1994.

· **Varicella Vaccine:** One dose is required for individuals entering college or university that were born on or after April 1, 2001. An individual who has laboratory confirmation of varicella disease immunity or has been documented by serological testing to have a protective antibody titer against varicella, or who has documentation from a physician, nurse practitioner, or physician assistant verifying history of varicella disease, is not required to receive varicella vaccine. The documentation shall include the name of the individual with a history of varicella disease, the approximate date or age of infection, and a healthcare provider signature. Individuals born before April 1, 2001 are not required to receive varicella vaccine.

· **Meningococcal conjugate (MenACWY) vaccine:** Two doses. One dose is required for individuals entering the seventh grade or by 12 years of age, whichever comes first, on or after July 1, 2015. A booster dose is required for individuals entering the 12th grade or by 17 years of age, whichever comes first. Individuals who entered seventh grade before July 1, 2015 are not required to receive the first dose. The booster dose does not apply to individuals who entered the 12th grade before August 1, 2020. If the first dose is administered on or after the 16th birthday, a booster dose is not required. Individuals born before January 1, 2003 shall not be required to receive meningococcal conjugate vaccine.

Immunization requirements taken directly from https://www.immunize.nc.gov/schools/collegesuniversities.htm.

International Students and/or non-US Citizens: Vaccines are required as noted above. Additionally, international students are required to have a Tb skin test (PPD, TST or QuantiFERON Gold) that has been administered and read at an appropriate medical facility within 12 months prior to the first day of class. (Chest x-ray required if test is positive.)

Notes:

a. Immunization records must bear either the administering provider's signature, name, address and phone number or the official stamp of the health care facility at which the immunizations were administered. Immunization records printed from a state registry are also an acceptable form of proof.

b. Laboratory proof of immunity to Measles (Rubeola), Mumps, Rubella (German Measles), or Varicella is acceptable.

Failure to comply with North Carolina immunization requirements will result in administrative withdrawal from the university.

- Online Accelerated Programs are completely online degree programs, offered within a shortened seven-week session, consisting of six separate sessions per year. These programs have different application deadlines than traditional Undergraduate programs. Those dates, and other important admission information, can be found by visiting the program websites.

- All new undergraduate students are required to attend an orientation program prior to the beginning of their first term. The purpose of orientation is to acquaint new students with academic requirements, campus resources, and engagement opportunities.

  During main campus orientation, first-year and transfer students will work with an academic advisor, take placement tests as needed, meet their peers, learn about campus resources and register for courses. Registration for orientation is required in advance. More information about orientation can be found at https://www.uncw.edu/orientation.

  All new undergraduate students enrolling in online degree programs will be required to complete an online orientation which will include modules about academics, campus and technology resources, and an overview of e-learning. Academic advising will be provided virtually. Program specific orientations may also be required. For more information, please refer to Distance Education & eLearning webpage, https://uncw.edu/myuncw/academics/deel/online-education/online-orientation

  Re-enrolling students admitted to any degree program are not required to participate in orientation, as they previously completed the orientation requirement (either in person or online) at the time of their initial enrollment.

- UNCW's safety program complies with the State Occupational Safety and Health Act of 1973.
- Applicants who are denied regular admission to the university may be considered for enrollment as unclassified students under special circumstances. No student who has graduated from high school less than two years prior to application may be considered for unclassified status. Unclassified status does not constitute admission to any degree program at the university.
An unclassified student may enroll in up to 18 credit hours of courses in a semester, but may attempt no more than a cumulative total of 30 credit hours while unclassified. If the student does not qualify for degree status after 30 credit hours have been attempted, the student's enrollment will end and the student may not reapply for admission. Unclassified students are subject to all applicable academic regulations of the university. Unclassified students are not eligible for federally funded financial aid programs. See also Conversion from Unclassified Status in the University Regulations section of this catalogue.

Application Deadline and Notification Dates

For First-Year Students for Summer Session II and Fall

	Application Deadline	Decision Notification Mailing Dates
	November 1	January 20
	February 1	March 15

1. The university reserves the right to refuse to review applications for first-year admission that are not submitted by February 1.
    1. A non-refundable $100 enrollment deposit is required on or before May 1 from all admitted students intending to enroll at UNCW.
    2. The university reserves the right to cancel admission, registration, housing assignments, or orientation registration for any admitted student who does not pay the enrollment deposit by May 1.

For Transfer Applicants for Summer and Fall

1. Application priority deadline is March 1
2. After March 1, the university may accept transfer applications on a space available basis and reserves the right to return an application and fee without processing the application.
3. Application status and admission notification is viewable in the application portal.
4. A non-refundable $100 enrollment deposit is required on or before May 1 or by the date specified in the applicant status portal, whichever is latest, from all admitted students intending to enroll at UNCW.
5. The university reserves the right to withdraw admission, registration, housing assignments, or orientation registration for any admitted student who does not pay the $100 enrollment deposit by the designated deadline.

For Transfer Applicants for Spring (January) Semester

1. Application deadline is October 15.
2. Application status and admission notification is viewable in the application portal.
3. A non-refundable $100 enrollment deposit is required on or before December 1 or by the date specified in the applicant status portal, whichever is latest, from all admitted students intending to enroll at UNCW.

For Transfer Online Accelerated Program (OAP) Applicants

1. The OAP application has multiple application deadlines, the dates can be found by visiting the program websites.
2. Application status and admission notification is viewable in the application portal.

For Former (Re-Enrolling) Students

1. Students applying to re-enroll should direct all inquiries to the Office of Admissions.
2. After the Office of Admissions receives all required documentation for re-enrolling, applications are processed within one to two weeks.
3. The Fall application deadline is July 15.
4. The Spring application deadline is November 15.
5. The Summer application deadline is June 15.
6. Applicants seeking re-enrollment at UNCW will be charged a non-refundable $80 application fee.
7. UNCW graduates will have their application fee waived automatically after applying.

For Permission Students (Special Undergraduate and Permission Visiting) for Fall and Spring

1. The Fall application deadline is July 15.
2. Spring application deadline is November 15.
3. New students must register and remain enrolled in the term for which they were admitted. Students who decide to begin enrollment in a term later than their admission term must contact the Office of Admissions to submit a new application for the later term.

For Summer Visiting Students

1. The Summer application deadline is June 15.
2. The summer term includes two sessions. Any applicant admitted for summer is eligible to take classes in the first session, second session or both sessions. Summer admission is limited to summer enrollment exclusively.
3. Students who decide to enroll in a term later than their admission term must contact the Office of Admissions to submit a new application for the later term.

Admission – Audit Students

Auditing allows a student to enroll and attend a class without receiving academic credit. Audited curses do not count towards full-time status, loan deferment, or financial aid eligibility. Audit students pay regular tuition and fees for audited classes. Current UNCW students, faculty, and staff who wish to audit a class should

complete the online Application for Audit/Graded Audit Courses through the Office of the
Registrar: https://uncw.edu/myuncw/academics/registrar/students/registration/graded-audit-course.
Applicants who are not current UNCW students, faculty, or staff can apply online through the UNCW Application for Audit and Senior Citizen Audit Students.
The Spring application will open on November 1 and close on the first day of classes. The Summer and Fall application will open on April 1 and close on the first day of classes. In addition to the application, applicants must submit the non-refundable application fee. If admitted, students will need to request an audit through the Office of the Registrar.
For more information, visit https://uncw.edu/admissions/undergraduate/non-degree/auditing.

Admission – Dual–Enrolled High School Students

High school students who wish to pursue academic courses on the collegiate level while attending high school may enroll at UNCW if they meet the qualifications for participation in this program. This program is available to students whose primary residence is New Hanover, Pender and Brunswick County. Eligible students must have (1) completed two calendar years as a student at a high school or homeschool and (2) earned enough credits to be designated a junior or senior year in high school. Exceptions are not made to the program requirements. Not all UNCW courses will be available to dual-enrolled high school students, depending upon the requirements of or restriction for the course. For instance, courses that have a component that includes international or overnight travel are not available.
Applications for dual-enrollment are available online at https://uncw.edu/admissions/undergraduate/non-degree/dual-enrollment.
Students may enter this program for the fall, spring, or summer terms and may only register for two undergraduate courses per term. Students are responsible for all tuition and fees associated with the registered course(s). Applications and course selections for fall and summer terms should be received in the UNCW Office of Admissions by April 1. Applications and course selections for spring term should be received in the UNCW Office of Admissions by November 1. Students are required to submit a new application for every semester they wish to take classes at UNCW.

Late applications will not be considered. https://uncw.edu/admissions/undergraduate/non-degree/dual-enrollment.

Admission – First-Year Students

Admission to the university is competitive. Applicants may apply to enter the university at the beginning of the fall semester and at the second session of the summer term. The university encourages rigorous coursework during high school and awards credit based on scores earned on Advanced Placement (AP), and International Baccalaureate (IB) exams, and/or grades on college level courses taken during high school. Students should consult their high school counselor for further information. The university honors Common Application, NACAC, College Board and ACT Application Fee Waiver forms if properly signed.
Additionally, listed below are the high school minimum course requirements, as established by the Board of Governors of the University of North Carolina system, for consideration for admission to the University of North Carolina Wilmington. Meeting the high school minimum course requirements does not infer or guarantee admission to UNCW.

Four (4) course units in English

• emphasizing grammar, composition, and literature

Four (4) course units of mathematics, in any of the following combinations:

• algebra I and II, geometry, and one (1) unit beyond algebra II,
• algebra I and II, and two (2) units beyond algebra II, or
• Common core math I, II, and III, and one unit beyond common core math III; or
• integrated math I, II, and III, and one (1) unit beyond integrated math III
• NC Math 1, 2, 3, and one unit beyond NC Math 3 identified as meeting the 4th level mathematics requirement for admission to UNC System institutions.

Three (3) course units in science

• one (1) unit in a life science (for example, biology, ecology, zoology)
• one (1) non-life science unit (for example, astronomy, chemistry, earth science, environmental science, physical science, physics)

• one (1) laboratory science unit

Two (2) course units in social science

• one unit must be U.S. history

Two additional academic courses from English, mathematics, science, social studies, world languages, or computer science.

•

Note: these courses should be seleccted in alignment with a student's academic and career objectives. Completion of two sequential world language courses is recommended.

The Admissions Committee will also consider:

• The difficulty of the coursework taken (advanced, college prep, honors, advanced placement, International Baccalaureate, dual enrolled, etc.)
• Grades, grade point average, and/or class rank
• Standardized test scores–SAT and/or ACT (optional for applicants with a weighted GPA of 2.80 or higher)
• Recommendation from school counselor or core academic teacher (optional)
• Extracurricular activities, community activities, talents, interests, work experience and/or life experience
• The required essay and short answer.

Application Procedure for First-Year Students

Applicants are required to comply with the following:

1. Submit a completed application by one of the two deadline dates (November 1, early action or February 1, regular decision).
2. Submit a non-refundable $80 application fee or official application for waiver with the application.
3. Submit an official transcript directly from all the high schools attended to the Office of Undergraduate Admissions, University of North Carolina Wilmington, 601 S. College Road, Wilmington, North Carolina 28403-5904. We cannot accept transcripts directly from the student.
4. Complete the required essay and short answer, and submit with the application.

5. Request that an optional recommendation from a school counselor or core academic teacher be submitted directly to the Office of Admissions at UNCW.
6. Submit the optional SAT or the ACT. If not reported on the high school transcript, SAT and ACT scores must be submitted directly from either The College Board or ACT (UNCW College Codes are: SAT #5907, ACT #3174).

It is important that the required application materials reach the university by the appropriate application deadline date so that all matters relating to the application may be complete before the final notification date and the opening of the semester in which the student expects to enroll.

Admission – Graduate Students

Applicants to UNCW's graduate programs should direct all inquiries concerning admission to the Graduate School. Please refer to the Graduate School website for admission requirements.

Admission – International Students

The University of North Carolina Wilmington welcomes interest and inquiry from international students, defined as those who are not U.S. citizens or who are not U.S. permanent residents. In addition to meeting academic requirements, international applicants for first-year and transfer admission must submit scores (TOEFL, IELTS, DET, iTEP or PTE) to demonstrate English proficiency if English is not their native language, or if they do not meet other established criteria for waiving submission of test scores, as detailed on the Web site: https://www.uncw.edu/admissions/INTLEnglish.html. International students requesting UNCW's F-1 visa sponsorship must also provide documentation proving that the financial obligations associated with their study at the university can be fully met. For details on international admission requirements and a list of all required documents, please refer to the Web site: www.uncw.edu/intladmissions. UNCW admits international students for every semester. Certain academic programs require a separate, additional application in order to be admitted to those programs; for example, the Cameron School of Business and the School of Nursing.
The Office of International Programs will advise international exchange students. Visit Web site https://www.uncw.edu/intprogs/.

Admission – Professional Colleges, Schools, and Select Programs

Degree Programs in the following schools;

- Cameron School of Business
- Watson College of Education
- College of Health and Human Services

and Bachelor's Degree Programs in;

- Biology, B.A.
- Biology, B.S.
- Communication Studies, B.A.
- Computer Science, B.S.
- Creative Writing, B.F.A.
- Environmental Sciences, B.S.
- Film Studies, B.A.
- Music, B.A.
- Psychology, B.A.

Applications may be obtained from the appropriate school or department following admission to the university.

Admission – Re-Enrolling Students

See

The University of North Carolina Wilmington both encourages and requires intentional pursuit of your degree. In order to remain at the university, all students must meet the requirements outlined below.

Insufficient Academic Progress

An undergraduate is automatically placed on Insufficient Academic Progress if Satisfactory Academic Progress (SAP) is not met. SAP is generally defined as completing 67% of all attempted hours, excluding transfer hours. This is determined by dividing the number of credit hours successfully completed, defined as having earned a D- or better, by the total number of credit hours attempted.

When a student is placed on Insufficient Academic Progress, a notation is placed on the student's transcript. It is important to note that students on Insufficient Academic Progress may not be making timely progress towards degree completion. It is the responsibility of the student to arrange regular meetings with his or her academic

advisor or department chair/director to discuss these issues and to consider specific academic intervention strategies.

Students should refer to the Scholarship and Financial Aid (OSFA) section related to Policy on Return of Title IV Funds for information about how Insufficient Academic Progress impacts financial aid eligibility.

Academic Standing Policy

The academic standing policy is designed to keep students on track to degree completion. Academic standing is calculated to determine a student's eligibility to enroll in courses. There are four academic standings: Good, Concerning, Warning, and Appeal Required. Students will be notified of their academic standing. Academic programming may be required, as per each college's discretion, for students who are not in good standing.

Good

All new students will begin with a standing of Good. Students who earn a 2.000 or higher cumulative GPA will continue to have a standing of Good and may enroll in fall, spring, or summer courses.

Concerning

Students who begin a semester with a standing of Good and earn less than a 2.000 cumulative GPA during that semester will have a standing of Concerning. Students with a standing of Concerning may enroll in fall, spring, or summer courses. Students who begin a semester with a standing of Concerning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Warning

Students who begin a semester with a standing of Concerning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Warning. Students with a standing of Warning may enroll in fall, spring, or summer courses. Students who begin a semester with a standing of Warning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Appeal Required

Students who begin a semester with a standing of Warning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Appeal Required and will not be permitted to enroll in courses and any registered courses may be dropped. Students with a standing of Appeal Required who wish to re-enroll must submit an appeal requesting permission to enroll in courses. This appeal will go to a campus-wide Academic Standing Appeal committee that consists of Deans or their

delegates, the Director of the Center for Academic Advising, the Director Financial Aid and Scholarships, the Dean of Students, and the Registrar. Students must meet with their advisor to begin the appeal. While appeals will be considered on a rolling basis throughout the year, to enter a specific term, students must submit the appeal 10 business days before the drop/add deadline.

The standings above determine eligibility to enroll in courses at UNCW; however, they do not determine eligibility to enroll in specific programs or colleges.

Readmission

Undergraduate students who left the university in good academic standing for one fall or spring semester do not need to apply for readmission. For those not enrolled at the university for two or more consecutive, regular semesters (excluding summer), a readmission application is required. Applications for readmission and submission deadlines are available from the Office of Undergraduate Admissions. Readmission to the university does not guarantee readmission to individual academic programs.

Three-year Forgiveness Policy

Any degree-seeking undergraduate student who has not been enrolled at UNCW for three or more years may choose to take advantage of the Three-year Forgiveness Policy. A student must be readmitted and then notify the University of their intention to take advantage of the Three-year Forgiveness policy by the last day of drop/add for the semester in which the student is readmitted. Three-year Forgiveness status, once applied, may not be changed, and will have the following academic consequences:

1. All original coursework attempted is visible on the academic transcript.
2. Any grade of C or higher earned prior to the granting of the Three-year Forgiveness policy will be included in earned credit hours.
3. Any grade of C- or lower earned prior to the granting of the Three-year Forgiveness policy will be excluded from earned credit hours.
4. A failing grade received as a result of a brokered private resolution or adjudicated academic dishonesty shall not be replaced if the course is repeated. A student may not appeal this outcome to any faculty or administrative level.
5. The student's grade point average will be calculated only for those courses taken after the granting of the Three-year Forgiveness policy.
6. The student will retain all Course Repeat and Grade Replacement options.
7. The course withdrawal bank will reset to 16 credit hours.
8. The student will be ineligible for Degrees with Distinction.
9. This policy may only be applied once.

Admission – Senior Citizens (65+ years of age) Tuition Free Audit

North Carolina General Assembly Session Law 2017-57, Senate Bill 257, Section 10.12.(a) authorized the Board of Governors to promulgate rules permitting residents of North Carolina who have attained the age of 65 and who meet applicable admissions standards to audit courses, tuition-free, on a space available basis.

Auditing allows a student to enroll and attend a class without receiving academic credit. Audited courses do not count toward full-time status, loan deferment, or financial aid eligibility. Audit students pay regular tuition and fees for audited classes.

Senior citizens 65 and older who are not currently enrolled at UNCW and wish to audit a class will need to apply online through the UNCW Application for Audit and Senior Citizen Audit Students.

The Spring application will open on November 1 and close on the first day of classes. The Summer and Fall application will open on April 1 and close on the first day of classes. In addition to the application, applicants must submit the non-refundable application fee. If admitted, students will need to request an audit through the Office of the Registrar. For more information, visit https://uncw.edu/admissions/undergraduate/non-degree/auditing.

Senior citizens who wish to take courses **for credit** must apply through the Admissions Office. Tuition and fees will apply.

Senior citizens registering for more than (4) credit hours will need to comply with the immunization requirements under North Carolina state law. Please contact Student Health Services at (910) 962-3280 for more information.

Admission – Special Undergraduate Students

A student who has graduated from a four-year accredited college or university and wishes to take undergraduate classes without pursuing a second degree can apply to UNCW as a special undergraduate student. This application option is also available for students who need to take classes toward completion of teacher certification or licensure requirements. Please note that any student who wishes to

earn a second Undergraduate degree must apply as a transfer student.
Special Undergraduate students must have graduated with a Bachelor's degree from a four-year regionally accredited institution in good academic standing.
Students must submit the application through the UNCW Application Portal and submit the non-refundable application fee, as well as an official transcript from their degree awarding institution. Applicants must submit their application and all required materials by the posted deadline for their desired entry term.

Admission – Transfer Students

Transfer applicants may apply to enter the university at the beginning of the fall term, summer term or spring term.
Students seeking transfer admission to the University of North Carolina Wilmington must have graduated from an accredited high school, earned a General Equivalency Diploma (GED), or obtained an Adult High School Diploma. Additionally, they must have completed college coursework at another institution after finishing secondary education.
Applicants under the age of 21 who have not completed 24 hours of transferable college coursework must meet North Carolina high school minimum course requirements. Additional recommendations for transfer admission are provided on the website.
UNCW does not admit by major or program. Admission requirements for particular programs of study at UNCW may differ from minimum admission standards. Transfer applicants should refer to the requirements listed for specific programs/majors within the specific college/school.

Application Procedure for Transfer Students

Students seeking transfer admission are required to comply with the following procedures:

1. Submit a complete application by the appropriate application deadline date.
2. Submit a non-refundable application fee with the application.
3. Submit an official transcript from each college or university attended, including dual enrollment credit. It is the applicant's responsibility to request that official transcripts are submitted by each institution attended to the Office of Admissions by the application deadline date.
4. Submit official military transcripts (if applicable) to the UNCW Office of Admissions.
5. Have an official high school transcript or GED sent to the Office of Admissions by the

application deadline date.

See also:

- Students transferring to UNCW from another accredited college or university will submit their transcripts to the Office of Admission as part of the application process. Transfer credit may be accepted from institutions accredited by the following bodies:
  - Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
  - Accrediting Commission for Community and Junior Colleges (ACCJC)
  - Higher Learning Commission (HLC)
  - Middle States Commission on Higher Education (MSCHE)
  - New England Commission of Higher Education (NECHE)
  - Northwest Commission on Colleges and Universities (NWCCU)
  - Western Association of Schools and Colleges (WASC)
- https://uncw.edu/seahawk-life/support-success/transition-programs/
  The Transition Programs Office is responsible for providing comprehensive programs that will assist undergraduate students and their families in their transition to the university. These programs expose new and transfer students to the educational opportunities within UNCW, introduce them to the academic and co-curricular life of the institution, and assist them in their on-going transition to the university beyond orientation. Transition Programs also assists parents and family members in supporting their student's success through frequent communication and engagement opportunities. In addition, Transition Programs is responsible for the coordination and implementation of Commencement.

Admission – Visiting Students

Students from other colleges or universities who intend to return to their home institution may attend UNCW as visiting students. The university does not assume responsibility for determining a student's course selection when such credits are to be transferred elsewhere. Transcripts of work completed at UNCW must be requested through the Office of the Registrar to assure a record of academic work is sent to the home institution of the visiting student. Enrollment as a visiting student from another institution in no way obligates the university to continue a student's enrollment at UNCW at the expiration of the visiting period. All application deadline

dates apply to visiting students.
Students should apply as a visiting student using the non-degree seeking undergraduate application, submit the non-refundable application fee, and an official transcript from their current or most recently attended college or university.
Visiting students must be in good academic standing at their current or most recently attended institution and have attained at least a 2.50 cumulative GPA with 24 transferable credit hours complete at the time of application to be considered for admission. A student may only attend as a visiting student for two consecutive semesters (not including summer session).

Medical History Form and Immunization Record

North Carolina General Statute 130A-155.1 establishes specific immunization requirements for all students enrolled in North Carolina colleges or universities. It is the responsibility of the Student Health Center to monitor the immunization record of each student to ensure compliance with state law and university requirements.
All students are required to complete and sign the "Medical History Form and Immunization Record." If a student is under the age of 18, a parent or guardian must sign the form as well. The form, along with additional instructions, can be found at https://uncw.edu/healthservices/shc_newstudents.html.

Immunizations that are REQUIRED pursuant to NC state law (current as of January 5, 2025):

Vaccine	Number Doses Required Before School Entry*
Diptheria, tetanus and pertussis	3 doses
Polio	3 doses
Measles	2 doses
Mumps	2 doses
Rubella	1 dose
Hepatitis B (Hep B)	3 doses
Varicella	1 dose
Meningoccal conjugate (MenACWY)	2 doses

*Please read below for further information

· **Diphtheria, tetanus and pertussis vaccine:** Three doses are required for individuals entering college or university. Individuals entering college or university for the first time on or after July 1, 2008 must have had three doses of tetanus/diphtheria toxoid; one of which must be tetanus/diphtheria/pertussis.

· **Polio vaccine:** Three doses are required for individuals entering college or university. An individual attending school that has attained his or her 18th birthday is not required to receive polio vaccine.

· **Measles vaccine:** Two doses at least 28 days apart are required for individuals entering college or university. The requirement for a second dose does not apply to individuals who entered school, college or university for the first time before July 1, 1994. A person who has been diagnosed prior to January 1, 1994 by a physician (or designee, such as a nurse practitioner or physician assistant) as having measles (rubeola), or an individual who has been documented by serological testing to have a protective antibody titer against measles, is not required to receive measles vaccine. Individuals born before 1957 are not required to receive measles vaccine except in measles outbreak situations.

· **Mumps vaccine:** Two doses are required for individuals entering college or university. A physician's diagnosis is not acceptable for mumps disease(s). Individuals must be immunized or have laboratory confirmation of disease, or have been documented by serological testing to have a protective antibody against mumps. Individuals born before 1957 are not required to receive the mumps vaccine. Individuals that entered college or university before July 1, 1994 are not required to receive the vaccine. Individuals that entered school, college or university before July 1, 2008 are not required to receive the second dose of mumps vaccine.

· **Rubella vaccine:** One dose is required for individuals entering college or university. A physician's diagnosis is not acceptable for rubella disease(s). Individuals must be immunized or have laboratory confirmation of rubella disease, or have been documented by serological testing to have a protective antibody titer against rubella. Any individual who has attained his or her fiftieth birthday is not required to receive rubella vaccine except in outbreak situations. Any individual who entered college or university after his or her thirtieth birthday, and before February 1, 1989, is not required to receive rubella vaccine except in outbreak situations.

· **Hepatitis B Vaccine:** Three doses are required for individuals entering college or university. Hepatitis B vaccine is not required if an individual was born before July 1, 1994.

· **Varicella Vaccine:** One dose is required for individuals entering college or university that were born on or after April 1, 2001. An individual who has laboratory confirmation of varicella disease immunity or has been documented by serological testing to have a protective antibody titer against varicella, or who has documentation from a physician, nurse practitioner, or physician assistant verifying history of varicella disease, is not required to receive varicella vaccine. The documentation shall include the name of the individual with a history of varicella disease, the approximate date or age of infection, and a healthcare provider signature. Individuals born before April 1, 2001 are not required to receive varicella vaccine.

· **Meningococcal conjugate (MenACWY) vaccine:** Two doses. One dose is required for

individuals entering the seventh grade or by 12 years of age, whichever comes first, on or after July 1, 2015. A booster dose is required for individuals entering the 12th grade or by 17 years of age, whichever comes first. Individuals who entered seventh grade before July 1, 2015 are not required to receive the first dose. The booster dose does not apply to individuals who entered the 12th grade before August 1, 2020. If the first dose is administered on or after the 16th birthday, a booster dose is not required. Individuals born before January 1, 2003 shall not be required to receive meningococcal conjugate vaccine.

Immunization requirements taken directly from https://www.immunize.nc.gov/schools/collegesuniversities.htm.

International Students and/or non-US Citizens: Vaccines are required as noted above. Additionally, international students are required to have a Tb skin test (PPD, TST or QuantiFERON Gold) that has been administered and read at an appropriate medical facility within 12 months prior to the first day of class. (Chest x-ray required if test is positive.)

Notes:

a. Immunization records must bear either the administering provider's signature, name, address and phone number or the official stamp of the health care facility at which the immunizations were administered. Immunization records printed from a state registry are also an acceptable form of proof.

b. Laboratory proof of immunity to Measles (Rubeola), Mumps, Rubella (German Measles), or Varicella is acceptable.

Failure to comply with North Carolina immunization requirements will result in administrative withdrawal from the university.

Online Accelerated Program

Online Accelerated Programs are completely online degree programs, offered within a shortened seven-week session, consisting of six separate sessions per year. These programs have different application deadlines than traditional Undergraduate programs. Those dates, and other important admission information, can be found by visiting the program websites.

Safety and Health Program

UNCW's safety program complies with the State Occupational Safety and Health

Act of 1973.

Unclassified Enrollment Permission

Applicants who are denied regular admission to the university may be considered for enrollment as unclassified students under special circumstances. No student who has graduated from high school less than two years prior to application may be considered for unclassified status. Unclassified status does not constitute admission to any degree program at the university.

An unclassified student may enroll in up to 18 credit hours of courses in a semester, but may attempt no more than a cumulative total of 30 credit hours while unclassified. If the student does not qualify for degree status after 30 credit hours have been attempted, the student's enrollment will end and the student may not reapply for admission. Unclassified students are subject to all applicable academic regulations of the university. Unclassified students are not eligible for federally funded financial aid programs. See also Conversion from Unclassified Status in the University Regulations section of this catalogue.

University Regulations

- The University of North Carolina is a community of high academic standards where academic integrity is valued. UNCW students are committed to honesty and truthfulness in academic inquiry and in the pursuit of knowledge. Any member of the university community who has reasonable grounds to believe that an infraction of the Student Academic Honor Code has occurred has an obligation to report the alleged violation. This obligation is a core value of the Honor Code and must be fulfilled by each and every member of the university.

  Academic dishonesty takes many forms, from blatant acts of cheating, bribery, or similar misdeeds to the more subtle forms of plagiarism, all of which are totally unacceptable in an institution of higher learning. Reporting and adjudication procedures have been developed to enforce the policy of academic integrity, to ensure justice, and to protect individual rights. Complete details may be found in the Student Academic Honor Code (03.100 Academic Honor Code | UNCW) and the Faculty Handbook (https://www.uncw.edu/facsen/documents/Faculty_Handbook.pdf).

- A list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html
  Also see: [[permalink=4128|new:{'title':1}]][[/permalink]]

- Students and their advisors confer when necessary, but they must confer at least once before every registration period to review goals, plans for achieving them, and any problems encountered or anticipated. Students have the responsibility to understand and meet the requirements for the curriculum under which they are studying and should seek advice as appropriate.
  For more information, please see [[permalink=4163|new:{'title':1}]][[/permalink]].

- The auditing of courses without credit is approved by special permission of the Office of the Registrar and of the instructor involved. Students who are approved as auditors may enroll in the course if space is available on the first day of classes. Individuals not regularly enrolled as students in the university who wish to audit courses will be classified as special students and will be required to pay regular tuition and fees, unless otherwise exempted. Enrolled students are permitted to audit courses and must pay the same tuition and fees as required in courses where credit is earned. Courses taken as an Audit will not count towards the calculation of a student's full-time academic status. See also [[permalink=4195|new:{'title':1}]][[/permalink]]. Students are encouraged to consult the [[permalink=1232|new:{'title':1}]][[/permalink]] because auditing courses may influence Federal Financial Aid.
  See also: [[permalink=4147|new:{'title':1}]][[/permalink]]

- An instructor of any course may cancel a student's registration in his/her course if the registered student fails to attend the first class meeting of the term and fails to notify the instructor of his/her desire to remain enrolled within 24 hours of the class meeting time. Student appeals resulting from emergencies or other extenuating circumstances will be considered on a case-by-case basis by the appropriate

department chair/school director. Students who wish to drop or withdraw from a class should not assume they have done so by not attending the first class or subsequent classes.
The appropriate dean's office should notify the relevant department chairperson of late-arrival students who cannot attend the first class meeting because of illness or other reasons approved by a dean of the college or the professional schools.
If an instructor takes cancellation action, the registration openings resulting from this action will be offered to students seeking enrollment in the courses during the official drop/add period.

- All declarations of majors, double majors, and/or minors, as well as any changes to degree programs shall be made through the Major Declaration/Curricular Updates system. Students are advised to consult with their advisor in the original major before changing majors.

- It is the obligation of every student to notify the Office of the Registrar in writing of any change in name. Documentation in the form of a government-issued identification (such as valid driver's license or voter registration card) plus a photo identification is required for name changes.
Change of address and telephone may be updated by way of the student information system through mySeaport.

- Students are expected to be present at all regular class meetings and examinations for the courses in which they are registered. All faculty members are responsible for setting policy concerning the role of attendance in determining grades for their classes. It is the responsibility of the students to learn and comply with the policies set for each class for which they are registered.
An instructor of any course may cancel a student's registration in his/her course if the registered student fails to attend the first class meeting of the term and fails to notify the instructor of his/her desire to remain enrolled withing 24 hours of the class meeting time. Student appeals resulting from emergencies or other extenuating circumstances will be considered on a case-by-case basis by the appropriate department chair/school director. Students who wish to drop or withdraw from a

class should not assume they have done so by not attending the first class or subsequent classes.
North Carolina General Statute 116-11(3a) and UNC policy authorize a minimum of two excused absences each academic year for religious observances required by the faith of a student. Students must submit a request for an excused absence, within MySeaport - Students, seven days prior to the religious observance. The student shall be given the opportunity to make up any tests or other work missed due to an excused absence for a religious observance.

- Students are classified as freshmen, sophomores, juniors, and seniors. Semester hours passed are used to determine these classifications. In order to graduate in eight semesters, a student must average 30 hours each year.
The required number of hours passed for each classification is as follows:

- The *Code of Student Life* is the primary source of information regarding the rights, responsibilities, and expected levels of conduct of students in the university community. The *Code of Student Life* is available in hard copy at the Office of the Dean of Students and online at www.uncw.edu/cosl.

- An unclassified student who has not previously attended another college or university and has met all requirements for admission as a degree candidate may apply to the Office of Admissions to convert to degree status upon completing a minimum of 15 credit hours with a "C" (2.00) average or better on all work attempted. These minimum 15 credit hours must include ENG 101 and three hours of basic mathematics with a grade of "C" (2.00) or better in each of these courses.
An unclassified student who has previously attended another college or university and has met all requirements for admission as a degree candidate may apply to convert to degree status if the student has completed ENG 101 and three hours of basic mathematics with a "C' (2.00) or better in each of these courses and if the student has achieved a grade point average of at least 2.00 on all work attempted at all institutions attended.
Unclassified students intending to pursue a degree are advised to apply for degree status prior to the application deadline established for the semester. Acceptance

into certain degree programs will depend on the student's prior college performance.
See also section on Degree Programs and Requirements in this catalogue.

- Credit for Prior Learning provides transfer credit in recognition of previously completed academic and non-academic college level learning. There are several methods of receiving UNCW credit for academic work previously completed or for acquired but academically uncredited knowledge and experience. The categories of credit that may be granted include:
- Transfer Credit from a 2-year or 4-year College or University
- Examination
- Military Education and Training
- Certification or Licensure
- Industry or Corporate Experience
- Portfolio Assessment

1. Advanced Placement Exam: Students may receive credit by examination for achieving acceptable scores on a variety of Advanced Placement exams offered through the College Entrance Examination Board. A website listing of the examinations, required minimum scores, course equivalents, and credits awarded is available online athttp://www.uncw.edu/reg/transfercredit-examAP.htm. Incoming students should have the score reports sent to the Office of Admissions for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.
1. International Baccalaureate Exam: Students may receive credit by examination for achieving acceptable scores on the "High Level" International Baccalaureate (HL IB) examinations. A student who earns the minimum required score or better on the International Baccalaureate examinations will receive appropriate college credit. A website listing of the examinations, required minimum scores, course

equivalents, and credits awarded is available online athttp://www.uncw.edu/reg/transfercredit-examHLIB.htm. Incoming students should have the score reports sent to the Office of Admissions for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.

1. AP and IB Exam Credit Revocation: Students can revoke Advanced Placement and International Baccalaureate credits earned in high school with approval from a Dean or designee of the student's College unless a higher- level course for which it is a prerequisite has been successfully completed. Students who choose to revoke credit for a course may not subsequently receive credit by examination for that course. The decision to revoke credit is final and students must consult with their academic adviser before making the request.
1. College Level Examination Program (CLEP): Students may receive credit for a variety of courses by achieving a passing score on one of the College-Level Examination Program (CLEP) tests. Students can register for the offered tests at University Testing Services,https://uncw.edu/testingservices/national/index.html. Students should have the score reports sent to the Registrars Office for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.
1. Cambridge International Examination: Students achieving acceptable scores on the Cambridge International Examination (CIE) and/or Cambridge Advanced International Certificate of Education (AICE) Diploma may be eligible for credit. A website listing of the A and/or AS Level subject examinations, required grade, and credits awarded is available athttps://uncw.edu/reg/transfercredit-examCIE.html. Examination grades should be sent to the Office of the Registrar. Individual departments continue to review and determine appropriate credit awarded for each subject.
1. College Exemption: Students who have been exempted with credit from courses at an accredited college or university may be exempted with credit from appropriate courses at the University of North Carolina Wilmington. When the exemption is based on a test result, the student should have a copy of the score report sent to the Office of Admissions for evaluation concerning placement and

credit

1. Challenge Exams: In cases in which a student has demonstrated knowledge of a particular field by more advanced course work or experience, exemptions may be granted on an individual basis by the appropriate department chairperson. Such credit may involve satisfactory performance on a department-designed examination or project.

- To be included in the Dean's List at the close of each semester, students must meet one of the following criteria:

1. Students carrying 12-14 hours must earn a grade point average of 3.50 or better with no grade less than "B" (3.00).
2. Students carrying 15 hours or more must earn a grade point average of 3.20 or better with no grade less than "B" (3.00).
3. Students participating in the Honors Scholars College who are carrying 12-14 total hours but are not receiving a grade for the current semester of honors work shall be eligible for the Dean's List if their grade point average on the remaining 9-11 hours otherwise meets current standards for the Dean's List.

- Undergraduate students admitted as first time, first year students may declare and be accepted into a major field of study after completing a minimum of 24 semester hours at the university. After one semester of enrollment, first time, first year students who have earned 30 or more credit hours including UNCW and transfer credit may declare their major with permission from the Director of Center for Academic Advising.

Undergraduate students admitted as transfer students are required to select a major or a pre-major at the time of admission to UNCW. Advising of transfer students is done within the chosen major field or Center for Academic Advising when appropriate.

In unique situations and with permission of both the Director of Center for Academic Advising and the Dean of the receiving College or School or designee, a student may declare their major before the end of their first semester. Colleges, schools, departments, and programs with admission requirements have a pre-major, and that academic unit provides discipline-specific advice. Students accepted into a pre-major status are expected to complete full admission requirements for the major within three semesters.

- Three degrees with distinction are granted to graduating students based on all work attempted in meeting requirements for the degree as follows:
  Cum Laude for an overall average of 3.50
  Magna Cum Laude for an overall average of 3.70
  Summa Cum Laude for an overall average of 3.90
  If transfer students first have a UNCW GPA of 3.5 or higher, degrees with distinction are granted to transfer students under the following conditions:
  1. The student must have the required overall average on all work attempted (including all transfer courses attempted).
  2. The student must have the required average on work attempted at the University of North Carolina Wilmington.
- Because the university must officially respond to requests for a determination of a student's enrollment status from outside agencies as well as university offices, the following policy is provided:

  UNDERGRADUATE—REGULAR TERM

  Full-time status requires a minimum enrollment of 12 credit hours.
  Three-quarter-time status requires a minimum enrollment of 9 credit hours.
  Half-time status requires a minimum enrollment of 6 credit hours.

  UNDERGRADUATE—SUMMER SCHOOL

  Full-time status requires a minimum enrollment of 12 credit hours across all sessions in the summer term.
  Three-quarter-time status requires a minimum enrollment of 9 credit hours across all sessions in the summer term.
  Half-time status requires a minimum enrollment of 6 credit hours across all sessions in the summer term.
  Enrollment status for determining financial aid eligibility is calculated across all sessions in the summer term.
- The University of North Carolina Wilmington regards e-mail as an official method of communication with students, staff and faculty. The UNCW e-mail address is the official address for faculty, staff and student electronic communications. Faculty, staff and students assume full responsibility for the decision to forward e-mail, and any failure to receive e-mail communications due to an alternative e-mail service does not necessarily constitute a defense for failure to respond. While e-mail is an official method of communication, it is not the only official method of communication

and does not exclude alternate methods such as written or oral communications. All members of the university community must maintain good e-mail management habits and adhere to the standards of responsible use specified in the UNCW Responsible Use of Electronic Resources Policy (https://uncw.edu/policies/documents/07.100.00-responsible-use-of-it-resources.pdf) if the institution is to maintain a quality, collaborative computing environment.

- University policy requires the scheduling of final examinations. Under this policy, the final examination schedule provides a three-hour period for each examination and allows a maximum of four examinations per day. The length of the final examination, up to a maximum of three hours, is at the discretion of the instructor. The final examination schedule is published at the beginning of each semester. Courses offered during the day have final examinations during the day. Night courses have final examinations at night.
  A student who is scheduled to take three or more final examinations in one calendar day may have one or more rescheduled so that no more than two per day are required. To reschedule an exam the student must notify the three (or four) instructors and the appropriate dean(s) of this desire at least two weeks before the beginning of the final examination period. It will be the responsibility of the instructors, working with the student, to reschedule the exam(s) and so inform the student and the appropriate dean(s) at least one week before the beginning of the final examination period.
  Rescheduling of a final examination for an entire class may be done only with the approval of the appropriate dean.

- Any student considering a grade appeal should understand that each faculty member has the academic freedom and responsibility to determine grades according to any method, chosen by the faculty member, that is professionally acceptable, communicated to everyone in the class, and applied to all students equally. However, prejudiced or capricious academic evaluation by a faculty member is a violation of a student's rights and is the valid ground for a grade appeal.
  Any student who contests a course grade shall first attempt to resolve the matter

with the instructor involved. Failing to reach a satisfactory resolution, the student may appeal the grade in accordance with the procedures outlined below. These procedures are not to be used in cases involving student academic dishonesty. An appeal must be made no later than the last day of the next succeeding regular semester. Grades not appealed by that time become permanent.

1. The student shall present the appeal in writing to the chairperson of the department within which the contested grade was awarded. The written statement shall limit itself to citations of evidence pertaining to the valid ground for the appeal. By conferring with the student and the instructor, the chairperson will seek resolution by mutual agreement.
2. Failing such resolution, the department chairperson shall transmit the written appeal to the appropriate dean who will convene the Grade Appeals Committee.
3. The Grade Appeals Committee shall consist of the convening dean and five faculty members appointed by the dean. If the committee affirms the instructor's decision, the dean will notify in writing the faculty member, the student, and the department chairperson as appropriate. If the committee supports the student's appeal, it shall prescribe the method by which the student will be reevaluated. The grade resulting from the prescribed reevaluation is final and may not be further appealed.

•

Unless modified in accordance with established procedures, each grade assigned by faculty (including a grade in a course that has been repeated), or a grade of "W" is permanent and cannot be removed from a student's official record or transcript.

The University of North Carolina Wilmington uses the grade point system and semester hour credit for calculating student achievement. Plus (+) or minus (-) grades may be awarded at the discretion of the faculty. Grade symbols used are the following:

*Earned grade points equal quality points

The grade point average (GPA) is determined by dividing the accumulated number of grade points (quality points) earned at UNCW by the accumulated number of attempted hours earned at UNCW. Hours for which grades of "F" or "WF" have been assigned are included in the calculation of the GPA. Grades of "I," "IP," "W," "NR," "Z" and "P" are not included in the calculation of the GPA.

At the discretion of the instructor and in compliance with policies governing appropriate conditions for assigning a grade of Incomplete, a student may be given a grade of Incomplete when the work in the course has not been completed for reasons beyond the control of the student. All incomplete grades must be removed

according to a deadline established by the instructor, but no later than the end of the next regular semester, otherwise the "I" becomes "F" and cannot be changed. A student must not register for the class when attempting to remove a grade of Incomplete. No student will be allowed to graduate with an Incomplete grade on his/her academic record. Such grades that have not been resolved at the time of graduation will be converted to an "F." If a student meets graduation requirements, despite the "F," the appropriate degree will be awarded.

An "IP" is assigned to departmental honors projects (499) in semesters other than their final one. Upon successful completion of the entire project, "IP" grades from previous semesters are converted to letter grades, and grade points are retroactively awarded.

Grades of "P" and "F" can be assigned to internships designated by a 498 number as described in the section on Internships. The credit hours earned with a "P" will count towards the number of hours required to graduate but will be excluded from the computation of the GPA. Grades of "F" will be included in the computation of the GPA.

Term grades may be accessed via mySeaport.

- All indebtedness to the university must be satisfactorily settled before a diploma will be issued.

- Placeholders are fictitious courses that act as reference points for coursework generated through interinstitutional transfer. If visible on the transcript, the course will be upgraded as 'NG' (Non-Graded) with zero credit hours. The following courses exist as placeholders for interinstitutional relationships with other campuses.
  - EXC 294 (Exchange) - appears on an academic transcript with an NG grade and zero credit hours
  - STA 294 (Study Abroad) - only appears within registration; appears until foreign transcript is received and processed, then removed
  - UPS 294 (University of Paris Sorbonne) - only appears within registration; appears until foreign transcript is received and processed, then removed
  - UNCX with any course number (UNC Online) - only appears within registration
- Isaac Bear Early College High School opened in the fall of 2006 as a partnership

between the North Carolina New Schools Project, New Hanover County Schools and the University of North Carolina Wilmington. As an early college high school, students participate in an
accelerated high school education program which offers honors courses to prepare students for the rigor of college.
Students enrolled in UNCW classes while enrolled at Isaac Bear Early College High School will be governed by the academic policies of the UNCW catalogue. Upon admission to UNCW, Isaac Bear Early College High School graduates will begin as degree seeking undergraduates. Such students will maintain the cumulative GPA and credit hours earned. However, all other policies will restart as if the student was not enrolled during high school.

- Students may be permitted to earn credits toward degree requirements at UNCW through course work at other regionally-accredited two- and four-year colleges and universities in the United States and abroad, as well as through distance education. To receive permission, a student must submit an online "Permission for Transient Study" request and obtain the approval of his/her department chairperson (or the dean of University College) prior to registering for the course(s). The online transient study request link and instructions are available
at http://www.uncw.edu/reg/transfercredit-transStudy.htm. The permission form must be on file in the Office of the Registrar prior to the student's leaving campus. Any exception to the residency requirement requires the signature of the department chair and dean. See also Residency Requirement.

- All new undergraduate students are required to attend an orientation program prior to the beginning of their first term. The purpose of orientation is to acquaint new students with academic requirements, campus resources, and engagement opportunities.
During main campus orientation, first-year and transfer students will work with an academic advisor, take placement tests as needed, meet their peers, learn about campus resources and register for courses. Registration for orientation is required in advance. More information about orientation can be found
at https://www.uncw.edu/orientation.
All new undergraduate students enrolling in online degree programs will be required

to complete an online orientation which will include modules about academics, campus and technology resources, and an overview of e-learning. Academic advising will be provided virtually. Program specific orientations may also be required. For more information, please refer to Distance Education & eLearning webpage, https://uncw.edu/myuncw/academics/deel/online-education/online-orientation

Re-enrolling students admitted to any degree program are not required to participate in orientation, as they previously completed the orientation requirement (either in person or online) at the time of their initial enrollment.

-

Students who have a cumulative grade point average of 2.00 or higher and who have successfully completed 45 hours, with at least 12 hours at UNCW, may take up to 9 hours of elective courses on a pass/fail basis. The intent of this option is to encourage students to explore areas of interest beyond their major or minor without concern about compromising their academic record. Students should be selective in choosing such courses. A change of major might mean that a course taken on a pass/fail basis must later be retaken for a grade. In addition, graduate and professional schools and future employers may evaluate such course work differently from graded courses. The following restrictions apply:

- A student may enroll in a course on a pass/fail basis only with the permission of the instructor.
- No more than one course may be taken on a pass/fail basis in a semester or summer session.
- Courses used to fulfill university studies requirements or the requirements of the student's major, minor, or certificate program may not be taken on a pass/fail basis. Courses repeated to replace a grade may not be taken on a pass/fail basis.
- Students may not change the designation (from graded to pass/fail or from pass/fail to graded) after the drop/add period.
- Pass/fail students are required to complete all course work and examinations and are graded as if they were taking the course for a grade. Students who achieve a passing average receive a grade of "P" for the course. A "P" grade is equivalent to a "D-" or better.
- Credit hours in courses for which a student has earned a "P" are counted toward the hours required for graduation, but are excluded in the computation of the student's grade point average. Grades of "F" are included in the computation of the grade point average.
- Internships do not count in these elective pass/fail courses.
- Students should be aware of the ramifications which could result from using the pass/fail option:

1. Many graduate schools will not consider "P" grades for entry into a program.
2. Many institutions do not award transfer credit for "P" grades.
3. Pass/fail hours will not be used in the calculation of Dean's List.

- For information on credit available by examination through CLEP, IB, AP, etc., see the Credit by Examination section of this page.
  Placement into appropriate starting courses in Math, English, and World Languages is in part through examination as detailed below, but is at the discretion of the placing department's chair.

- In accordance with policy adopted by the Board of Governors of the University of North Carolina and the Board of Trustees of UNCW, disciplinary proceedings against a student, faculty member, administrator, or other employee will be initiated when the alleged conduct is deemed to affect the interest of UNCW. The penalties that may be imposed range from written warnings with probationary status to expulsion from enrollment and discharge from employment.
  The full text of the policy appears in the *UNCW Policies and Procedures Manual*, the *Faculty Handbook*, and the *Code of Student Life*.

- https://uncw.edu/myuncw/about/university-administration/academic-affairs/policies-guidelines/posthumous-degrees
  A posthumous baccalaureate or graduate degree may be conferred upon a student who dies prior to but close to completion of all requirements of the degree being pursued. The University of North Carolina Wilmington awards such degrees in recognition of the academic achievement of the deceased student. In doing so it acknowledges the loss to the university, family and friends and extends to them the opportunity to share in the academic success of the deceased student.
  To be eligible for the award of a posthumous degree, an undergraduate student

generally must have met the following conditions:

- At the time of death, the student was enrolled in his/her senior year.
- The student was in good academic and disciplinary standing and was successfully progressing toward completion of requirements for the degree to be awarded. In particular, at the time of death the student had a 2.0 GPA or better, was within 15 credit hours of completion of all requirements or in the final term of completion of all their requirements, and had satisfied the university's Residency Requirement as described in University Regulations within the Undergraduate Catalogue.
- The student must have declared a major and completed at least one half of the requirements for the major that will be recorded on the diploma.
- At the time of death, the student was enrolled in good academic standing and had made significant progress toward academic requirements for earning the degree.
- For degrees requiring thesis, dissertation, or other creative/practicum activity, the student must have completed all course and other requirements pursuant to the degree and must have been near completion of the dissertation/thesis/equivalent product; and the student's committee must have determined the scholarship to be substantial work and worthy of the degree.
- For degrees requiring primarily coursework, the student should have completed at least 90 percent of academic requirements for earning the degree. This is typically in the last two semesters or year of study.
- In cases where requirements for awarding a doctorate have not been met, a master's degree could be awarded if an appropriate master's degree exists within the student's home department/school, all requirements for the degree have been satisfied, and the action is supported by the student's committee.

1. Upon learning of the death of a University of North Carolina Wilmington student, the Vice Chancellor for Student Affairs (or designee) will notify the relevant dean.
2. The dean shall ascertain the academic and disciplinary standing of the student. The dean's office will work with the department chair. The departmental faculty, department head and dean will determine if the student's overall record merits further consideration and if recommendation that the posthumous award be granted; such information will be communicated to the Provost.
3. The Provost will weigh all the information relating to each case independently and will prepare a recommendation to the Chancellor. If the Chancellor supports the recommendation, it will be presented to the Board of Trustees for final approval.
4. If the Board of Trustees approves, the Chancellor's Office will notify the Registrar.

1. The family of the deceased will be notified of the approval by the Vice Chancellor for Student Affairs (or designee).
2. The degree will be conferred at a future commencement exercise determined by the Provost and Vice Chancellor for Student Affairs.

1. Names of all recipients of posthumous degrees will be listed separately, along with degree and major, in the commencement program.
2. Special recognition of these students will be made by the Chancellor just prior to the individual recognition of all degree candidates present at the ceremony.

3. Families who choose to attend commencement activities will be provided reserved seating and the Chancellor will note their presence as he or she recognizes the posthumous degree recipients.
4. A diploma will be provided to the families who choose to attend commencement activities or mailed to families who choose not to participate.
3. The posthumous nature of the award will be indicated on the diploma, the student's permanent record and in the commencement program.
4. If the major department does so certify, the Registrar shall enter final grades of "P" in classes in which the student was enrolled.

- To graduate in four years, a student must successfully complete all graduation requirements and an average annual course load of 30 semester hours. This course load requires the student to take approximately 15-16 hours per semester or earn hours through summer enrollment. Among the factors responsible for extending the time necessary to complete degree requirements beyond four years are a student's late decision to change majors, requiring additional course work; part-time employment while enrolled; family responsibilities; and unilateral decisions to take fewer than the recommended average of 15.5 hours per semester.

- Registration occurs immediately prior to each term and is limited to the time period specified in the university calendar. Classes may not be added after the last day of registration and the add/drop deadline. Degree students may take up to 18 hours without special permission. Students who have a cumulative grade point average of 3.50 or higher may be allowed, with special permission of the appropriate dean, to carry up to 21 semester hours.

Cancellation of Registration Due to Failure to Pay Tuition and Fees

Students who fail to pay or make suitable arrangements for payment of tuition and fees will have their registrations cancelled. Non-payment does not constitute official withdrawal from the university. If a student registered, but decides not to attend UNCW, the student MUST notify the Office of the Registrar in writing prior to the first day of the term. Please see Charge for Late Payment of Tuition and Fees in the section on Expenses, subsection, Tuition and Fees.

- The University of North Carolina Wilmington has routinely made public certain

information about its students. Typically, UNCW releases the names of students who are selected by the various honorary societies, receive scholarships, make the Dean's List, hold offices, or are members of athletic teams.

The University of North Carolina defines the term directory information to include the following information: the student's name, college and major field of study, participation in officially recognized activities and sports, dates of attendance, degrees earned, honors and awards received, and the most recent previous educational agency or institution attended by the student. The university will make public information about each student limited to these categories in ways such as those described above. Of course, information from all these categories is not made public in every listing.

Students who do not wish to have their directory information made public without their prior consent must complete a "Request To Prevent or Allow Disclosure of Directory Information" form in the Office of the Registrar.

Family Educational Rights and Privacy Act (FERPA)

Certain personally identifiable information about students ("education records") may be maintained at the Office of the President of the University of North Carolina, which serves the Board of Governors of the university system. This student information may be the same as, or derivative of, information maintained by a constituent institution of the university; or it may be additional information. Whatever their origins, education records maintained at the Office of the President are subject to the federal Family Educational Rights and Privacy Act of 1974 (FERPA).

FERPA provides that a student may inspect his or her education records. If the student finds the records to be inaccurate, misleading, or otherwise in violation of the student's privacy rights, the student may request amendment to the record.

FERPA also provides that a student's personally identifiable information may not be released to someone else unless (1) the student has given a proper consent for disclosure or (2) provisions of FERPA or federal regulations issued pursuant to FERPA permit the information to be released without the student's consent.

A student may file with the U.S. Department of Education a complaint concerning failure of the Office of the President or an institution to comply with FERPA.

The policies of the Office of the President of the University of North Carolina concerning FERPA may be inspected in the office at each constituent institution designated to maintain the FERPA policies of the institution. Policies of the Office of the President may also be accessed in the Office of the Secretary of The University

of North Carolina, Office of the President, 910 Raleigh Road, Chapel Hill, NC 27515-2688.

Further details about FERPA and FERPA procedures at the Office of the President are to be found in the referenced policies. Questions about the policies may be directed to Legal Section, Office of the President, The University of North Carolina, Office of the President Annex Building, 910 Raleigh Road, Chapel Hill, NC (mailing address P.O. Box 2688, Chapel Hill, NC 27515-2688; telephone: 919-962-4588).

•

Students who receive a grade of "C" (2.00) or better in a course may not repeat the course but may audit without credit. Students who repeat a course in which they have earned credit or for which transfer credit has been awarded, will have the status changed to audit during the term the course is repeated. Students who wish to have the grade for the course repeat show on their transcripts without the course counting in their credit total or grade point average may arrange this before the end of add/drop by submitting an online Graded Course Audit Registration Form. The form and instructions are available in the Office of the Registrar or online at http://www.uncw.edu/reg.
Students who receive a grade below a "C" (2.00) in a course taken at UNCW may repeat the course at UNCW. For the first three different courses repeated, the previous grade and hours of credit for the repeated course will not be used in calculating the student's grade point average and hours toward graduation. All grades shall remain on the student's transcript.
In interpreting the policy it is to be understood that:

1. the term "first three times" means
1. that the policy is automatically operative for a student the first time that the student repeats a course, and
2. that the three repeats involve three different courses;

2. a student may go beyond three course repeats, but such repeats will not enjoy the privilege of the policy;
3. all students will be able to enjoy the benefits of this policy irrespective of prior course repeat activity;
4. this policy does not govern the repeating of graduate courses (see the Graduate Catalogue for the appropriate policy).

- A student may elect to major in two separate disciplines on the condition that the student meets all requirements for each major. A student who completes 120 hours and all requirements for more than one major in the same baccalaureate program will have only one degree conferred, but all majors will be printed on the transcript. A student who completes 120 credit hours and meets all requirements for majors in different baccalaureate programs may have both degrees conferred. A student may not simultaneously receive two different baccalaureate degrees within the same department (e.g., a B.S. and a B.A. degree).
  A student may not normally receive a second baccalaureate degree in a department in which a degree has been earned previously. An exception may be made only when a department has an established policy regarding the circumstances in which a second degree may be awarded.
  A student who returns to the university after the initial graduation to complete the requirements for a second major may have the additional major added to the official record upon written notification from the department chairperson that all departmental requirements have been met satisfactorily. A new diploma will be issued reflecting the new major and will be subject to the replacement diploma fee.

- A student with a baccalaureate degree from UNCW may receive a second baccalaureate degree in a different major. The student must meet all the requirements for the second degree and major, including 30 hours in residency, at least 15 semester hours in the major at the 300-400 level, and course work that meets the spirit of UNCW's current university studies requirements.

- Students are expected to request the awarding of degrees prior to the conclusion of their current academic program by applying to graduate. An application for graduation must be submitted online by the date specified in the university calendar for the desired graduation term. A diploma fee is added to the student's account at

the time of application.
Students may qualify for the bachelor's degree by completing successfully (1) the university studies requirements, (2) the residency requirement, (3) an approved course of study in an academic major, (4) a minimum of 120 semester hours of credit, and (5) fifty percent (one-half) of the minimum semester hours required in the degree must be earned through enrollment in a regionally-accredited 4-year college or university, and (6) a minimum grade point average of 2.00. Graduation will be certified at the end of the term in which all academic requirements are complete. Upon completion of all requirements, the student will receive the appropriate degree from the following list: Bachelor of Arts, the Bachelor of Fine Arts, the Bachelor of Music, the Bachelor of Science, the Bachelor of Science in Nursing, or the Bachelor of Social Work. In advising and registering students, the deans, the Office of the Registrar and advisors try to make certain that every student who intends to graduate from the university registers for those courses that are required for a degree. The student, however, must assume the final responsibility for meeting the graduation requirements set forth in the university catalogue. All degree requirements must be completed within six years of a student's catalogue.
All graduation requirements must be met before the first day of the subsequent terms, as shown below:

Commencement Participation

A student shall be permitted to participate in the commencement ceremony if the student demonstrates that degree program requirements for graduation are or will be met with the completion of one educational experience (e.g., course, internship, practicum, fieldwork) as defined by their Dean's office or up to 8 credit hours of coursework during the term immediately following the commencement ceremony. Students who meet these requirements must notify the Office of the Registrar by the posted deadline in the semester of their intent to participate in the ceremony. Their names will not be published in the Commencement Program.

To qualify for the bachelor's degree, students must be enrolled in a degree program at UNCW and must have completed: (1) a minimum of 25 percent of the credit hours required for graduation through courses offered at UNCW and (2) 15 semester hours in the major at the 300-400 level. Exceptions to requirement (2) may be made only with the approval of the department chair or school director, and the appropriate dean. Requirement (1) may not be waived.To qualify for the bachelor's degree, students must be enrolled in a degree program at UNCW and must have completed: (1) a minimum of 25 percent of the credit hours required for graduation through courses offered at UNCW and (2) 15 semester hours in the major at the 300-400 level. Exceptions to requirement (2) may be made only with the approval of the department chair or school director, and the appropriate dean. Requirement (1) may not be waived.

-

The University of North Carolina Wilmington both encourages and requires intentional pursuit of your degree. In order to remain at the university, all students must meet the requirements outlined below.

Insufficient Academic Progress

An undergraduate is automatically placed on Insufficient Academic Progress if Satisfactory Academic Progress (SAP) is not met. SAP is generally defined as completing 67% of all attempted hours, excluding transfer hours. This is determined by dividing the number of credit hours successfully completed, defined as having earned a D- or better, by the total number of credit hours attempted.

When a student is placed on Insufficient Academic Progress, a notation is placed on the student's transcript. It is important to note that students on Insufficient Academic Progress may not be making timely progress towards degree completion. It is the responsibility of the student to arrange regular meetings with his or her academic advisor or department chair/director to discuss these issues and to consider specific academic intervention strategies.

Students should refer to the Scholarship and Financial Aid (OSFA) section related to Policy on Return of Title IV Funds for information about how Insufficient Academic Progress impacts financial aid eligibility.

Academic Standing Policy

The academic standing policy is designed to keep students on track to degree completion. Academic standing is calculated to determine a student's eligibility to enroll in courses. There are four academic standings: Good, Concerning, Warning,

and Appeal Required. Students will be notified of their academic standing. Academic programming may be required, as per each college's discretion, for students who are not in good standing.

Good

All new students will begin with a standing of Good. Students who earn a 2.000 or higher cumulative GPA will continue to have a standing of Good and may enroll in fall, spring, or summer courses.

Concerning

Students who begin a semester with a standing of Good and earn less than a 2.000 cumulative GPA during that semester will have a standing of Concerning. Students with a standing of Concerning may enroll in fall, spring, or summer courses. Students who begin a semester with a standing of Concerning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Warning

Students who begin a semester with a standing of Concerning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Warning. Students with a standing of Warning may enroll in fall, spring, or summer courses. Students who begin a semester with a standing of Warning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Appeal Required

Students who begin a semester with a standing of Warning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Appeal Required and will not be permitted to enroll in courses and any registered courses may be dropped. Students with a standing of Appeal Required who wish to re-enroll must submit an appeal requesting permission to enroll in courses. This appeal will go to a campus-wide Academic Standing Appeal committee that consists of Deans or their delegates, the Director of the Center for Academic Advising, the Director Financial Aid and Scholarships, the Dean of Students, and the Registrar. Students must meet with their advisor to begin the appeal. While appeals will be considered on a rolling basis throughout the year, to enter a specific term, students must submit the appeal 10 business days before the drop/add deadline.

The standings above determine eligibility to enroll in courses at UNCW; however, they do not determine eligibility to enroll in specific programs or colleges.

Readmission

Undergraduate students who left the university in good academic standing for one

fall or spring semester do not need to apply for readmission. For those not enrolled at the university for two or more consecutive, regular semesters (excluding summer), a readmission application is required. Applications for readmission and submission deadlines are available from the Office of Undergraduate Admissions. Readmission to the university does not guarantee readmission to individual academic programs.

Three-year Forgiveness Policy

Any degree-seeking undergraduate student who has not been enrolled at UNCW for three or more years may choose to take advantage of the Three-year Forgiveness Policy. A student must be readmitted and then notify the University of their intention to take advantage of the Three-year Forgiveness policy by the last day of drop/add for the semester in which the student is readmitted. Three-year Forgiveness status, once applied, may not be changed, and will have the following academic consequences:

1. All original coursework attempted is visible on the academic transcript.
2. Any grade of C or higher earned prior to the granting of the Three-year Forgiveness policy will be included in earned credit hours.
3. Any grade of C- or lower earned prior to the granting of the Three-year Forgiveness policy will be excluded from earned credit hours.
4. A failing grade received as a result of a brokered private resolution or adjudicated academic dishonesty shall not be replaced if the course is repeated. A student may not appeal this outcome to any faculty or administrative level.
5. The student's grade point average will be calculated only for those courses taken after the granting of the Three-year Forgiveness policy.
6. The student will retain all Course Repeat and Grade Replacement options.
7. The course withdrawal bank will reset to 16 credit hours.
8. The student will be ineligible for Degrees with Distinction.
9. This policy may only be applied once.

•

Students share in the responsibility for maintaining an environment in which the rights of each member of the UNCW community are respected. When asked to report to any university office, a student is expected to appear at the time specified or to arrange another appointment. The university conduct system is a cumulative process; consequently, any student found responsible for violating the *UNCW Code of Student Life* may sanction proportional to the severity of the offense(s) and/or related to being found responsible on multiple occasions. All students and their guests shall be responsible for conducting themselves in a manner that helps to

enhance an environment of learning in which the rights, dignity, and freedom of each member of the academic community are respected.
In accordance with the Family Educational Rights and Privacy Act (FERPA), upon full participation in university orientation, an individual is considered a UNCW student in attendance and shall maintain that status unless an official university withdrawal is submitted. Students with pending academic or non-academic charges will not be allowed to formally withdraw from the university until the disciplinary process has been completed.

-

UNCW is committed to maintaining a positive learning and working environment for students, faculty, and staff. The University prohibits Sex/Gender-Based Harassment, to include sexual assault, sexual exploitation, sexual violence, stalking, and complicity in the commission of any act prohibited by this policy. These offenses are unlawful, undermine the character and purpose of the University, and will not be tolerated. The Student Gender-Based/Sexual Misconduct Policy reflects UNCW's continued commitment to provide a safe and non-discriminatory environment for all members of our campus community consistent with the provisions of applicable local and federal laws. The *Student Gender-Based/Sexual Misconduct Policy* is available in hard copy at the Office of Title IX and Clery Compliance in DePaolo Hall Room 1003 and online at: http://uncw.edu/policies/documents/04130StudentGenderBasedSexualMisconductPolicy.pdf.

-

Supplementary Math Credit

Students who complete MAT 161 with a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 112. Students who complete MAT 162 with a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 161. Students who complete MAT 261 with

a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 161 and MAT 162.

Supplementary World Language Credit

Students who complete, with a grade of "C" (2.00) or better, a French, German, Japanese, Latin, Portuguese or Spanish course numbered 201 or higher (excluding literature and culture classes taught in English) shall be granted supplemental credit as follows:

· For completion of a 200-level course, student will receive 3 credit hours for the prior course in the sequence. For completion ofSPN 215, students will receive 3 credit hours forSPN 201.

· For completion of a 300-level course in French, German, Latin or Spanish, student will receive 6 credit hours for 201 and 202.

· For completion ofSPN 315, students will receive 6 credit hours forSPN 201andSPN 215.

This credit may be used to fulfill university studies requirements."

•

Transcripts are permanent student records maintained by the Office of the Registrar. A transcript provides an unabridged chronological listing of the academic history of a student's study at the University of North Carolina Wilmington. This document is forwarded at the request of the student or former student to persons or agencies for their use in reviewing the academic performance of the student.

The Office of the Registrar issues transcripts to students. Currently enrolled students may request their transcript through mySeaport. Former students may request their transcript through the online ordering portal. Valid picture ID is required for personal pick up of printed transcripts. The fee for each transcript is $8.00 plus delivery costs.

Unless modified in accordance with established procedures, each grade assigned by faculty (including a grade of "W" or a grade in a course that has been repeated) is permanent and cannot be removed from a student's official record or transcript.

- Students may be permitted to earn credits toward degree requirements at UNCW through course work at other regionally-accredited two- and four-year colleges and universities in the United States and abroad, as well as through distance education. To receive permission, a student must submit an online "Permission for Transient Study" request and obtain the approval of his/her department chairperson (or the dean of University College) prior to registering for the course(s). The online transient study request link and instructions are available at http://www.uncw.edu/reg/transfercredit-transStudy.htm. The permission form must be on file in the Office of the Registrar prior to the student's leaving campus. Any exception to the residency requirement requires the signature of the department chair and dean. See also Residency Requirement.

- Students transferring to UNCW from another accredited college or university will submit their transcripts to the Office of Admission as part of the application process. Transfer credit may be accepted from institutions accredited by the following bodies:
  - Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
  - Accrediting Commission for Community and Junior Colleges (ACCJC)
  - Higher Learning Commission (HLC)
  - Middle States Commission on Higher Education (MSCHE)
  - New England Commission of Higher Education (NECHE)
  - Northwest Commission on Colleges and Universities (NWCCU)
  - Western Association of Schools and Colleges (WASC)

- In defining a credit hour, UNC Wilmington recognizes the University of North Carolina policy on scheduled instructional time or equivalent per credit hour and the Federal definition and Carnegie unit recommendations.
  1. For courses taught in a traditional classroom format, a credit hour is normally granted for completion of at least one 50 minute session of classroom instruction per week for 15 weeks, or the equivalent time per semester, and a minimum of 2 hours per week for 15 weeks of out-of-class student work, or the equivalent time per semester.
  2. Alternatively, a credit hour may be granted for at least an equivalent amount of work as required in item 1 above for other academic activities or instructional

modes of delivery, such as distance education, blended distance and face-to-face instruction, laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.
https://uncw4.sharepoint.com/Shared%20Documents/Web/aa/credithourdefinitionpolicy.pdf

- A student may drop any or all courses without academic penalty through the posted drop-add period for the academic term. Any student who withdraws from the university or from individual courses by the withdrawal deadline will receive a grade of "W" for each course withdrawal. A grade of "W" will not affect the student's grade point average. After the posted withdrawal deadline, a grade of "WF" will be assigned for each course withdrawal and will count as GPA hours. If a student is suspended after the deadline for withdrawal with a "W," each instructor shall assign a grade of "WF" or "W" based upon the student's academic performance prior to the suspension. Excluding course withdrawals due to extenuating circumstances, students are limited to a maximum of 16 hours of course withdrawals. After the initial 16 credit hour threshold has been exhausted, students will be required to remain in the course and subject to the grade earned at the conclusion of the semester. Full term withdrawals will not count towards a student's 16-hour course withdrawal threshold.
  A student may withdraw from an individual class or classes by the withdrawal deadline via MySeaport - Students or by reporting to the Office of the Registrar before or on the last day for withdrawal, as indicated in the university calendar. Students participating in abbreviated terms need to be cognizant that the withdrawal period may be very brief. All students should carefully note the last day to withdraw from classes as found in the university calendar.
  To withdraw from all classes and the university at any other time during the semester, the student must submit a full term withdrawal request via mySeaport. No withdrawals ("W" or "WF") shall be processed during the final exam period. Refer to the Expenses section of this catalogue for information on the refund policy for complete withdrawal.
  Should extenuating circumstances warrant, the grade of "WF" assigned for course withdrawals after the withdrawal deadline may be changed to a '"W". Documented extenuating circumstances may include: death of an immediate family member; traumatic and unforeseen circumstances that are considered beyond a student's

control; serious emotional instability, physical injury or illness that has resulted in the student's inability to complete academic responsibilities in a given term. Students should note that poor standing in a course does not constitute an extenuating circumstance in and of itself. Withdrawals due to extenuating circumstances are still subject to all financial aid and SAP rules and calculations. It is the student's responsibility to initiate an appeal for this change by submitting a written request and supporting written documentation. The student must initiate the appeal with the associate dean who oversees the student's major or Center for Academic Advising director, as appropriate. The Center for Academic Advising may approve or deny this request for a "W." In cases where the request is denied, the student may submit, *within ten regular class days of the dated decision*, a written request for consideration with supporting documentation to the Committee on Withdrawal Appeals. *Grounds for appeals are limited to substantive new evidence or material procedural irregularity*. All decisions made by the Committee on Withdrawal Appeals are final. The written request with supporting documentation must be made as soon as possible after circumstances requiring the withdrawal. At the latest, by the last day of classes in the semester following the one for which the withdrawal is requested. A grade of "WF" that is not appealed successfully remains a permanent part of the student's academic record.

Students should refer to the Scholarships and Financial Aid section related to Policy on Return of Title IV Funds for information about how dropping or withdrawing impacts financial aid eligibility.

Academic Honor Code

The University of North Carolina is a community of high academic standards where academic integrity is valued. UNCW students are committed to honesty and truthfulness in academic inquiry and in the pursuit of knowledge. Any member of the university community who has reasonable grounds to believe that an infraction of the Student Academic Honor Code has occurred has an obligation to report the alleged violation. This obligation is a core value of the Honor Code and must be fulfilled by each and every member of the university.

Academic dishonesty takes many forms, from blatant acts of cheating, bribery, or similar misdeeds to the more subtle forms of plagiarism, all of which are totally unacceptable in an institution of higher learning. Reporting and adjudication

procedures have been developed to enforce the policy of academic integrity, to ensure justice, and to protect individual rights. Complete details may be found in the Student Academic Honor Code (03.100 Academic Honor Code | UNCW) and the Faculty
Handbook (https://www.uncw.edu/facsen/documents/Faculty_Handbook.pdf).

Academic Honor Societies

A list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html
Also see:

Student Awards

Some of the organizations listed below are registered with the university through the Campus Activities & Involvement Center as student organizations. For more information about those honor societies, please visit https://uncw.campuslabs.com/engage/organizations

A. Farrell Teague Merit Scholarship for Rising Seniors (Junior)

The Teague Scholarship was created by Arthur Farrell Teague and is used to assist rising seniors who have achieved a high level of academic and extracurricular success during their time at UNCW. Every year a recipient is chosen as the recipient of "The Teague Award." The scholarship is considered a merit scholarship and the recipient will be selected on demonstrated academic ability and special achievement, and must have a comprehensive GPA above 3.5. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Adrian D. Hurst Award

Established by Adrian D. Hurst, emeritus professor of mathematics, this award recognizes a UNCW junior or senior math major who has achieved the highest overall academic grade point average. The award is presented each spring in the form of a plaque.

Biological Sciences Achievement Award

This award was established by the faculty of the Department of Biology and Marine Biology to honor annually the graduating senior biology major who has achieved the highest academic standing. The recipient is identified on a permanent plaque in Friday Hall.

Distinguished Engagement Award (Junior or Senior)

The Distinguished Engagement Award is presented to a select group of junior, senior, and transfer students who have made a significant contribution to UNCW over the course of their undergraduate experience. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Excellence in Engagement Award (Sophomore or Junior)

The Excellence in Engagement Award is presented to a select group sophomore, junior, and transfer students for outstanding contributions to improving the quality of student life during their time at UNCW. Recipients must currently be in good standing with the university and possess a minimum cumulative GPA of 2.75. The award is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Hoggard Medal For Achievement

"The Hoggard Medal" presented through the generosity of the late Dr. John T. Hoggard, is awarded annually to one graduating senior who, in the opinion of the faculty, has shown the most improvement during their years at the university. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Margaret Walthour Lippitt Scholarship

The New Student Leader Award is designed to honor a first-year student with a 3.00 GPA or higher who has demonstrated leadership potential, service to UNCW and the community, personal integrity, and significant involvement in campus organizations. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Martha M. Duncan Scholarship (Sophomore or Junior)

The Martha M. Duncan Scholarship is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The recipient serves as a "LEAD Fellow" for Student Involvement and Leadership in the department of Campus Life for their scholarship year. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

Rachel Freeman Service Leadership Award

The Freeman Award, established in honor of the late Mae "Rachel" Freeman, is given to a senior

with a cumulative GPA of 2.67 who has demonstrated commitment to bettering the lives of others, leading through examples of service, and the ability to work with others to create social change. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Pat Leonard Senior Medallion Award (Seniors Graduating in May or December)

The Pat Leonard Senior Medallion Award is the most prestigious award presented by the Division of Student Affairs on behalf of the university community. The award was renamed in 2021 to honor Pat Leonard, the late Vice Chancellor for Student Affairs, and her 37 years of exemplary service to UNCW. Recipients must be in good standing with the university and possess a minimum cumulative GPA of 3.0. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award

The Duffy Student Sustainability Award is presented to one student who has been at UNCW at least one semester during the academic year. The recipient must be in good standing with the university and have a minimum 3.0 GPA. The Carolyn Elizabeth (Lizzy) Duffy Student Sustainability Award was created in March of 2015 to honor the efforts of Lizzy, particularly for spearheading the proposal for The Green Initiative Fund, which brought support, resources and visibility to sustainability at UNCW. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

The Walter Schmid Physics Award

This award has been established in honor of the late Walter Schmid, engineer and inventor, to reward a senior bachelor of science physics major for excellence in physics. The award consists of an engraved plaque and a physics encyclopedia.

UNCW Laureate Award (Sophomore or Junior)

The UNCW Laureate Award, inspired by the Nobel Peace Prize, is presented to one sophomore or junior student. The recipient must be in good standing with the university and possess a minimum cumulative GPA of 3.00. The scholarship is presented annually at the Division of Student Affairs Cornerstone Awards Banquet.

William A. Bryan Senior Leader Award

Student Involvement and Leadership in the department of Campus Life, with the support of the Alumni Association, sponsors the William A. Bryan Senior Leader Award. The award is given to a senior with a cumulative GPA of 3.00 who has demonstrated outstanding leadership on campus and/or in the community. Special emphasis is placed on integrity, creativity, ability to collaborate,

and service to others. The award is presented annually at the Division of Student Affairs Senior Excellence Luncheon.

Honor Societies at UNCW

Beta Alpha Psi

Beta Alpha Psi is a national scholastic and professional accounting fraternity. The primary objective of the fraternity is to encourage and give recognition to scholastic and professional excellence in the field of accounting. This includes promoting the study and practice of accounting; providing opportunities for self-development and association among members and practicing accountants; and encouraging a sense of ethical, social, and public responsibility.
Beta Alpha Psi was founded in 1919. The Iota Alpha chapter at UNCW was chartered in 1996 and is a registered student organization through the Campus Activities and Involvement Center.

Beta Beta Beta National Biological Honor Society

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 175,000 persons have been accepted into lifetime membership, and more than 430 chapters have been established throughout the United States and Puerto Rico. TriBeta is a registered student organization through the Campus Activities and Involvement Center.

Gamma Sigma Epsilon

Gamma Sigma Epsilon, a national honorary chemical society, was founded at Davidson College on December 19, 1919. The society recognizes academic excellence in chemistry and fosters a more comprehensive and cooperative study of chemistry and related scientific disciplines. The organization now has 35 active chapters in 22 states, and is growing rapidly. The Alpha Epsilon chapter was established at UNCW in 2001. Eligibility for membership includes junior or senior standing, a 3.35 GPA on at least 30 hours of chemistry courses, and a 3.35 GPA.

Kappa Delta Pi International Honor Society in Education

Kappa Delta Pi International Honor Society in Education is committed to recognizing excellence and fostering mutual cooperation, support, and professional growth for educational professionals.

Lambda Pi Eta Honor Society

Lambda Pi Eta is the official communication studies honor society of the National Communication Association (NCA). As a member of the Association of College Honor Societies (ACHS), LPH has over 400 active chapters at four-year colleges and universities worldwide. LPH was founded in 1985 at the University of Arkansas. LPH became a part of the National Communication Association (NCA) in 1988, and the official honor society of the NCA in July 1995. LPH is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Epsilon Economics Honor Society

Omicron Delta Epsilon was founded by Professor John R. Commons at the University of Wisconsin in 1915. Its objectives include conferring distinction for high scholastic achievement in economics and stimulating and promoting student interest in all aspects of economics. ODE is a registered student organization through the Campus Activities and Involvement Center.

Omicron Delta Kappa Society, Inc.

Omicron Delta Kappa (ODK) is the National Leadership Honor Society that recognizes and encourages superior scholarship, leadership, and exemplary character. Membership in ODK is a mark of the highest distinction and honor.
The society recognizes achievements in scholarship; athletics; campus or community service; social, religious activities, and campus government; journalism, speech and mass media; and the creative and performing arts. Emphasis is placed on the development of the whole person, both as a member of the college community and as a contributor to a better society. ODK is a registered student organization through the Campus Activities and Involvement Center.

Order of Omega

Order of Omega is a leadership honor society for members of Greek-letter organizations. Order of Omega recognizes juniors and seniors who have exemplified high standards in the areas of scholarship, leadership, involvement within their respective organization, and within the Greek, campus, and local communities. Members are selected from the top 3 percent of fraternity and sorority members at each institution. To date, over 500 chapters have been chartered throughout North America, each sharing the common goal of recognizing the many outstanding student leaders at their institution.

Phi Alpha National Honor Society in Social Work

Phi Alpha is a nationally recognized honor society for both undergraduate and graduate students majoring in social work. Founded in 1960, Phi Alpha now includes over 225 chapters. The Eta Omega Chapter of Phi Alpha was established at UNCW in 1998. The society recognizes students for excellence in scholarship and achievement in the field of social work. Eligibility for membership

requires students to major in a CSEW-accredited social work program, have completed 9 semester hours of social work courses, achieved a minimum social work GPA of 3.25, and a minimum overall GPA of 3.00. Phi Alpha is registered as a student organization through the Campus Activities and Involvement Center.

Psi Chi National Honor Society in Psychology

Psi Chi is the national honor society in psychology. It was founded in 1929 in New Haven, Connecticut, to encourage, stimulate and maintain excellence in scholarship, and to advance the science of psychology. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. The University of North Carolina Wilmington Chapter of Psi Chi was chartered on May 1, 1981, and is one of approximately 675 chapters nationwide. Psi Chi is registered as a student organization through the Campus Activities and Involvement Center.

A further list of academic honor societies with verified chapters at UNCW may be found at https://www.uncw.edu/aa/Academic_Honor_Societies.html

Chancellor's List and Dean's List

Each semester, outstanding scholarship is recognized in the following tiered manner:

Chancellor's List

The Chancellor's List is composed of the names of all full-time undergraduates who earn a 4.0 semester GPA on all work taken. Eligibility for this designation will be determined once all grades for the semester have been posted and any incomplete or IP grades have been converted.

Dean's List

The Dean's List is composed of the names of all full-time undergraduates who earn at least a 3.5 semester GPA on all work taken with no grades "B-" or below. Eligibility for this designation will be determined once all grades for the semester

have been posted and any incomplete or IP grades have been converted.

Academic Standing and Accreditation

The University of North Carolina Wilmington (UNCW) is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award bachelor's, master's and doctoral degrees. Degree-granting institutions also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of UNCW may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

The Watson College of Education is accredited by the National Council for Accreditation of Teacher Education. The School of Nursing is accredited by the Commission on Collegiate Nursing Education. The Cameron School of Business is accredited by the Association to Advance Collegiate Schools of Business International.

The University also holds membership in the Association of American Colleges and Universities, the American Placement Council, the Consortium for Oceanographic Research and Education, the Council for Advancement and Support of Education, the Council of Graduate Schools, and the Association of Public and Land-Grant Universities. It is on the list of schools approved by the American Chemical Society and is an accredited institutional member of the National Association of Schools of Music. The parks and recreation management curriculum is accredited by the Council on Accreditation for Recreation, Park Resources, and Leisure Services. The athletic training education program is accredited by the Commission on Accreditation of Athletic Training Education. The master's degree in psychology concentration in applied behavior analysis is designated as an approved course sequence by the Behavior Analyst Certification Board, Inc., and the concentration in substance abuse treatment is designated an approved course sequence by the North Carolina Substance Abuse Professional Practice Board. The Master of Public Administration program is accredited by the National Association of Schools of Public Affairs and Administration. The bachelor's and master's degree programs in social work are accredited by the Council on Social Work Education.

Those wishing to review accreditation and certification documents should contact

the provost's office.

Advising

Students and their advisors confer when necessary, but they must confer at least once before every registration period to review goals, plans for achieving them, and any problems encountered or anticipated. Students have the responsibility to understand and meet the requirements for the curriculum under which they are studying and should seek advice as appropriate.
For more information, please see (https://uncw.edu/academics/advising/advising-center/)
The Center for Academic Advising is the first academic home for all first-year and undeclared transfer students. Support is provided for specific student populations including pre-professional, military, early college, first-year spring admits, and students between majors. Academic advising, curricular programs, and a number of academic support programs are provided by the Center for Academic Advising staff. The Center for Academic Advising is dedicated to providing assistance and support for new students as they transition into the academic environment. Pre-professional student support is co-sponsored between the Center for Academic Advising and the College of Health and Human Services. Pre-professional student support is available for all students and alums looking to pursue graduate and professional degrees in health sciences and law.

Center for Academic Advising

Academic advising is essential to a successful educational experience. Our rich general education program, University Studies, provides our students with a strong academic foundation to build upon as they pursue their major and career interests. Center for Academic Advising advisors work with students to support their transition into a new academic environment. First-Year and undeclared transfer students declare their major once they have fulfilled academic requirements based on their major.
Students are advised by a professional advisor who provides students with guidance and encouragement in selecting courses and deciding on majors, meeting academic

requirements, maintaining required scholastic standards, and considering possible career choices. Advisors meet with students whenever needed, however; it is mandatory for students to meet with their advisor at least twice in the first semester and to support student academic transition and course registration.
Center for Academic Advising advisors provide referrals to various specialized support services within the university to assist students in overcoming personal and academic difficulties, exploring academic options, and achieving academic and personal success. Advisors also monitor their students' mid-semester academic progress and end-of-semester grades. Advisors provide students with critical and timely information related to academic policies, procedures and regulations. Students are encouraged to read all communications from their advisor and the Center for Academic Advising. The Center for Academic Advising implements several intervention programs to help students recover from academic difficulty to regain academic eligibility.

Center for Academic Advising Curriculum

The Center for Academic Advisingoffers a number of credit-bearing courses that support students in making a successful adjustment to college life, developing academic skills, and enriching their educational experience:UNI 101 First-Year Seminar,UNI 201 Transfer Seminar
First-Year Seminar [[permalink=1398|tooltip:{'title':1}]]%prefix% %code%[[/permalink]]
The First-Year Seminar is a graduation requirement taken by all First Year students in their first semester of enrollment. The course provides incoming First year students with skills, strategies, resources, and information necessary to make successful academic, personal, and social transitionto UNCW.The learning outcomes of this course assist students in making a successful adjustment to university life, developingeffective academic strategies and problem solving skills, enhancing information literacy competency, establishing an academic plan, and engaging in career exploration. The small class size allows for mentor relationships with instructors and academic advisors.
Transfer Seminar [[permalink=3119|tooltip:{'title':1}]]%prefix% %code%[[/permalink]]
The Transfer Seminar is a 3 credit, elective seminar-style course that supports

transfer students in their transition to UNCW. Students earn 6 hours towards graduation – 3 hours of Information Literacy and 3 hours of Explorations Beyond the Classroom. UNI 201 is only open to transfer students in their first semester (fall or spring) at UNCW. Students will leave UNI 201 with an academic and career plan; a résumé and cover letter; academic strategies and skills; knowledge of campus resources, opportunities, and policies; library and research skills; and community with other transfer students, advisors, and peer mentors.

.

Auditing

The auditing of courses without credit is approved by special permission of the Office of the Registrar and of the instructor involved. Students who are approved as auditors may enroll in the course if space is available on the first day of classes. Individuals not regularly enrolled as students in the university who wish to audit courses will be classified as special students and will be required to pay regular tuition and fees, unless otherwise exempted. Enrolled students are permitted to audit courses and must pay the same tuition and fees as required in courses where credit is earned. Courses taken as an Audit will not count towards the calculation of a student's full-time academic status. See also
Students who receive a grade of "C" (2.00) or better in a course may not repeat the course but may audit without credit. Students who repeat a course in which they have earned credit or for which transfer credit has been awarded, will have the status changed to audit during the term the course is repeated. Students who wish to have the grade for the course repeat show on their transcripts without the course counting in their credit total or grade point average may arrange this before the end of add/drop by submitting an online Graded Course Audit Registration Form. The form and instructions are available in the Office of the Registrar or online at http://www.uncw.edu/reg.
Students who receive a grade below a "C" (2.00) in a course taken at UNCW may repeat the course at UNCW. For the first three different courses repeated, the previous grade and hours of credit for the repeated course will not be used in

calculating the student's grade point average and hours toward graduation. All grades shall remain on the student's transcript.

In interpreting the policy it is to be understood that:

1. the term "first three times" means
1. that the policy is automatically operative for a student the first time that the student repeats a course, and
2. that the three repeats involve three different courses;
2. a student may go beyond three course repeats, but such repeats will not enjoy the privilege of the policy;
3. all students will be able to enjoy the benefits of this policy irrespective of prior course repeat activity;
4. this policy does not govern the repeating of graduate courses (see the Graduate Catalogue for the appropriate policy).

Students enrolled in a special topics course for a grade replacement must enroll in the same topic for which they originally received an unsatisfactory grade. Grades earned in repeated courses will not be used to replace grades earned as part of a degree once it has been conferred.

Note: A failing grade received owing to admitted or adjudicated academic dishonesty shall not be replaced if the course is repeated. Both the penalty grade and the new grade shall appear on the student's transcript and count in the student's grade point average. A student may not appeal the policy stated in this paragraph to any faculty or administrative level.

. Students are encouraged to consult the

The primary mission of the Office of Scholarships & Financial Aid (OSFA) is to assist prospective and currently enrolled students and their families in securing the most suitable financial aid as the student pursues a degree or teaching certificate at UNCW. Through our outreach efforts, we support the University's mission, including the commitment to public service and the encouragement of access to college. To this end, we administer federal, state and institutional student financial aid programs in excess of $100M to assist UNCW students.

Eligibility for the majority of our programs is determined using the U.S. Department of Education's Federal Methodology.

UNCW offers assistance in the form of scholarships, grants, loans, and Federal Work-Study jobs or a combination of these programs. For most graduate students, federal student loans are the primary source of financial assistance. Students are encouraged to file the Free Application for Federal Student Aid (FAFSA) every October 1st to receive priority consideration for aid. Aid funds are disbursed to

the students' account at the beginning of each semester. Aid will continue to be disbursed through the rest of the semester as student's financial aid files become complete. Refunds for overpayments of aid are processed regularly for students who have a credit balance. In order to receive a refund, the student needs to access the Student Accounts website to set up for e-refund to ensure there is no refunding delay. Contact Student Accounts at (910) 962-4281 with any questions about refunds.

To apply for Federal or State financial aid or institutional need-based aid, degree-seeking and teacher certificate students must submit a FAFSA. Some students must submit other documentation as requested by the OSFA. To receive federally-funded financial aid, students must be making satisfactory academic progress as determined by the OSFA; be a U.S. citizen or eligible non-citizen; and meet other criteria as specified by the U.S. Department of Education including at least half-time enrollment status. Questions concerning financial aid at UNCW should be directed to the OSFA. The office is located in the Warwick Center.

Office: (910) 962-3177 **FAX**: (910) 962-3851

Office of Scholarships & Financial Aid Website

Office of Scholarships & Financial Aid questions: e-mail: finaid@uncw.edu

Veterans Services questions: **e-mail**: veterans@uncw.edu

Student Accounts & Cashier's Office: Student Acocunt Information

Graduate Enrollment Status for Financial Aid Purposes

For financial aid purposes, the following definitions apply for determining graduate enrollment status during the academic year (fall, spring and summer semesters), but this could be assessed differently by external areas like U.S. Department of Veteran's Affairs:

Enrollment Status	Graduate Level Credit Hours*
Full time	9 or more
3/4 time	6.0 - 8.5
1/2 time	4.5 - 5.5
Less than 1/2 time	0 - 4.0

*Number of credit hours in which the student is enrolled at the end of the drop/add period. Students enrolled in a master's program must be earning credit hours in a

qualified program in order to be eligible for financial aid. Note: a student may also be considered full-time when enrolled for less than nine hours if one of several conditions are met. See full-time status under the Academic Regulations and Procedures section.

Graduate students must be enrolled at least half-time in graduate-level courses to qualify for most financial aid programs.

Total credit hours for all summer sessions are used to define enrollment status in summer semester for financial aid purposes.

In order to receive a refund in the first session of Summer School, graduate students must be registered for at least 4.5 hours during Summer I. If the student registers for 3 hours in each session, the refund will not be available until the first day of class of the second session. All students, including graduate students, must be attending at least half-time prior to a refund being issued.

Classes may be held until Summer II aid is applied to your account. Students are responsible for book money and living expenses until Summer II classes start at the end of June.

Students who need summer school aid must complete a summer school application available at www.uncw.edu/finaid after March 1. In order to have summer school aid processed in time to hold classes, the application must be received no later than one week prior to the start of the session you are attending.

The OSFA provides financial aid outreach to educate prospective and currently enrolled students on the financial aid process and on how to manage loans. For more, contact our office or join our Chat Tuesday financial literacy programming offered year-round: https://uncw.edu/seahawk-life/money-matters/financial-aid.

because auditing courses may influence Federal Financial Aid.

See also:

Auditing allows a student to enroll and attend a class without receiving academic credit. Audited curses do not count towards full-time status, loan deferment, or financial aid eligibility. Audit students pay regular tuition and fees for audited classes. Current UNCW students, faculty, and staff who wish to audit a class should complete the online Application for Audit/Graded Audit Courses through the Office of the

Registrar: https://uncw.edu/myuncw/academics/registrar/students/registration/graded-audit-course.

Applicants who are not current UNCW students, faculty, or staff can apply online through the UNCW Application for Audit and Senior Citizen Audit Students.
The Spring application will open on November 1 and close on the first day of classes. The Summer and Fall application will open on April 1 and close on the first day of classes. In addition to the application, applicants must submit the non-refundable application fee. If admitted, students will need to request an audit through the Office of the Registrar.
For more information, visit https://uncw.edu/admissions/undergraduate/non-degree/auditing.

Cancellation of Course Registration Policy

An instructor of any course may cancel a student's registration in his/her course if the registered student fails to attend the first class meeting of the term and fails to notify the instructor of his/her desire to remain enrolled within 24 hours of the class meeting time. Student appeals resulting from emergencies or other extenuating circumstances will be considered on a case-by-case basis by the appropriate department chair/school director. Students who wish to drop or withdraw from a class should not assume they have done so by not attending the first class or subsequent classes.
The appropriate dean's office should notify the relevant department chairperson of late-arrival students who cannot attend the first class meeting because of illness or other reasons approved by a dean of the college or the professional schools.
If an instructor takes cancellation action, the registration openings resulting from this action will be offered to students seeking enrollment in the courses during the official drop/add period.

Change of Major or Minor

All declarations of majors, double majors, and/or minors, as well as any changes to degree programs shall be made through the Major Declaration/Curricular Updates system. Students are advised to consult with their advisor in the original major before changing majors.

Change of Name, Address, or Telephone

It is the obligation of every student to notify the Office of the Registrar in writing of any change in name. Documentation in the form of a government-issued identification (such as valid driver's license or voter registration card) plus a photo identification is required for name changes.
Change of address and telephone may be updated by way of the student information system through mySeaport.

Class Attendance

Students are expected to be present at all regular class meetings and examinations for the courses in which they are registered. All faculty members are responsible for setting policy concerning the role of attendance in determining grades for their classes. It is the responsibility of the students to learn and comply with the policies set for each class for which they are registered.
An instructor of any course may cancel a student's registration in his/her course if the registered student fails to attend the first class meeting of the term and fails to notify the instructor of his/her desire to remain enrolled withing 24 hours of the class meeting time. Student appeals resulting from emergencies or other extenuating circumstances will be considered on a case-by-case basis by the appropriate department chair/school director. Students who wish to drop or withdraw from a class should not assume they have done so by not attending the first class or subsequent classes.
North Carolina General Statute 116-11(3a) and UNC policy authorize a minimum of two excused absences each academic year for religious observances required by the faith of a student. Students must submit a request for an excused absence, within MySeaport - Students, seven days prior to the religious observance. The student shall be given the opportunity to make up any tests or other work missed due to an excused absence for a religious observance.

Classification of Students

Students are classified as freshmen, sophomores, juniors, and seniors. Semester hours passed are used to determine these classifications. In order to graduate in eight semesters, a student must average 30 hours each year.

The required number of hours passed for each classification is as follows:

Less than 30 semester hours credit	-	Freshman
From 30-59 semester hours credit	-	Sophomore
From 60-89 semester hours credit	-	Junior
More than 89 semester hours credit	-	Senior

Code of Student Life

The *Code of Student Life* is the primary source of information regarding the rights, responsibilities, and expected levels of conduct of students in the university community. The *Code of Student Life* is available in hard copy at the Office of the Dean of Students and online at www.uncw.edu/cosl.

Conversion from Unclassified Status

An unclassified student who has not previously attended another college or university and has met all requirements for admission as a degree candidate may apply to the Office of Admissions to convert to degree status upon completing a minimum of 15 credit hours with a "C" (2.00) average or better on all work attempted. These minimum 15 credit hours must include ENG 101 and three hours of basic mathematics with a grade of "C" (2.00) or better in each of these courses.
An unclassified student who has previously attended another college or university and has met all requirements for admission as a degree candidate may apply to convert to degree status if the student has completed ENG 101 and three hours of basic mathematics with a "C' (2.00) or better in each of these courses and if the student has achieved a grade point average of at least 2.00 on all work attempted at all institutions attended.
Unclassified students intending to pursue a degree are advised to apply for degree status prior to the application deadline established for the semester. Acceptance into certain degree programs will depend on the student's prior college performance.
See also section on Degree Programs and Requirements in this catalogue.

Credit for Prior Learning

Credit for Prior Learning provides transfer credit in recognition of previously completed academic and non-academic college level learning. There are several methods of receiving UNCW credit for academic work previously completed or for acquired but academically uncredited knowledge and experience. The categories of credit that may be granted include:

- Transfer Credit from a 2-year or 4-year College or University
- Examination
- Military Education and Training
- Certification or Licensure
- Industry or Corporate Experience
- Portfolio Assessment

Transfer Credit from a 2-year or 4-year College or University

Students transferring to UNCW from another accredited college or university submit their transcripts to the Office of Admission as part of the application process. Credit will be awarded for all transferable courses earned at another institution for which a grade of C or better is earned and all official agreements will be followed (e.g. Comprehensive Articulation Agreement). Students may submit an appeal of their transferred credits through the Registrar's Office. To graduate, students must meet the university's Residency Requirement (see policy). Hours attempted, and grade points earned at other institutions are not used in calculating grade point averages.Transfer credit is used in evaluating eligibility for "Degrees with Distinction." Colleges and Schools may have more restrictive limits based on the needs of the degree programs as published in thecatalogue.

Examination

Credit by examination is available at UNCW for undergraduate students in the following circumstances:

1. Advanced Placement Exam: Students may receive credit by examination for achieving acceptable scores on a variety of Advanced Placement exams offered through the College Entrance Examination Board. A website listing of the examinations, required minimum scores, course equivalents, and credits awarded is available online athttp://www.uncw.edu/reg/transfercredit-examAP.htm. Incoming students should have the score reports sent to the Office of Admissions for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.
1. International Baccalaureate Exam: Students may receive credit by examination for achieving acceptable scores on the "High Level" International Baccalaureate (HL IB) examinations. A student who earns the minimum required score or better on the International Baccalaureate examinations will receive appropriate college credit. A website listing of the examinations, required minimum scores, course equivalents, and credits awarded is available online athttp://www.uncw.edu/reg/transfercredit-examHLIB.htm. Incoming students should have the score reports sent to the Office of Admissions for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.
1. AP and IB Exam Credit Revocation: Students can revoke Advanced Placement and International Baccalaureate credits earned in high school with approval from a Dean or designee of the student's College unless a higher- level course for which it is a prerequisite has been successfully completed. Students who choose to revoke credit for a course may not subsequently receive credit by examination for that course. The decision to revoke credit is final and students must consult with their academic adviser before making the request.
1. College Level Examination Program (CLEP): Students may receive credit for a variety of courses by achieving a passing score on one of the College-Level Examination Program (CLEP) tests. Students can register for the offered tests at

University Testing Services,https://uncw.edu/testingservices/national/index.html. Students should have the score reports sent to the Registrars Office for evaluation concerning placement and credit. Individual departments have determined the specific courses for which credit will be given.

1. Cambridge International Examination: Students achieving acceptable scores on the Cambridge International Examination (CIE) and/or Cambridge Advanced International Certificate of Education (AICE) Diploma may be eligible for credit. A website listing of the A and/or AS Level subject examinations, required grade, and credits awarded is available athttps://uncw.edu/reg/transfercredit-examCIE.html. Examination grades should be sent to the Office of the Registrar. Individual departments continue to review and determine appropriate credit awarded for each subject.
1. College Exemption: Students who have been exempted with credit from courses at an accredited college or university may be exempted with credit from appropriate courses at the University of North Carolina Wilmington. When the exemption is based on a test result, the student should have a copy of the score report sent to the Office of Admissions for evaluation concerning placement and credit
1. Challenge Exams: In cases in which a student has demonstrated knowledge of a particular field by more advanced course work or experience, exemptions may be granted on an individual basis by the appropriate department chairperson. Such credit may involve satisfactory performance on a department-designed examination or project.

Military Education and Training

UNCW awards credit for courses taken while enlisted in the armed forces. An official military course transcript is required to conduct credit evaluation. A Joint Services Transcript, Community College of the Air Force, or in some cases education through the Department of Defense schools not recorded on other transcripts are accepted for credit. Contact the Office of Admissions for further information (admissions@uncw.edu).

Certification or Licensure

Students who have received industry-recognized credentials or designations obtained through certification exams may be eligible to receive academic credit. Programs determine which certifications or professional training programs qualify for academic credit. An eligible certification is defined as an industry-recognized credential or designation that is obtained once a student has successfully passed a certification exam. Certification differs from licensure in that it validates specific industry-valued competencies rather than serving as a legal requirement for practicing a profession. The Office of the Registrar in conjunction with academic colleges is developing a list of industry certifications. Final determination of credit awards is made within the academic program, and it is the student's responsibility to verify their eligibility and provide the necessary documentation for consideration. No more than 30 credit hours may be awarded through the portfolio assessment process and/or certifications or licensure credit and all limitations on transfer credit remain in place. See Residency Requirement and Requirements for Graduation.

Industry or Corporate Experience

Students with previous Industry or Corporate work experience may be eligible for academic credit based on their work experience. Eligible experiences include non-collegiate instructional programs, such as, but not limited to, those for apprenticeships and workplace training that demonstrate competencies required relevant to degree or certificate completion. To qualify, students must successfully complete an approved portfolio development course, document the industry or corporate experience as part of the course, and submit the portfolio to the appropriate academic department for review. However, completing the course does not guarantee that academic credit will be awarded. Final determination of credit awards is made by the academic program. Students are responsible for confirming, in advance, whether their program grants credit for work experience before enrolling in an approved portfolio development course.

Portfolio Assessment

Students may earn credit for non-academic credentials and/or prior work experience through enrollment in an approved portfolio development course. This program, which requires the completion of a portfolio or portfolios, respects and honors learning that is gained through work, volunteering, or other life experiences or accomplishments. Course credit may be awarded to students who create portfolios to demonstrate they have learned similar materials through experience that other students learn in the classroom. Program directors, department chairs or their faculty designees review the portfolios to determine whether the student should receive credit.

All students seeking to earn Credit by Portfolio Assessment from UNCW must be enrolled UNCW students and must enroll in and successfully complete a UNCW Portfolio Development course. Only portfolios, created by students enrolled in an approved UNCW Portfolio Development course and demonstrating experiences that match the learning outcomes of a UNCW course, can be evaluated by UNCW faculty for credit. Individual departments will set criteria for the consideration of any such credit and retain full discretion within established credit hour limits. No more than 30 credit hours may be awarded through the portfolio assessment process and/or certifications or licensure credit and all limitations on transfer credit remain in place. See Residency Requirement and Requirements for Graduation. Contact the Office of Admissions for further information (admissions@uncw.edu).

Dean's List

To be included in the Dean's List at the close of each semester, students must meet one of the following criteria:

1. Students carrying 12-14 hours must earn a grade point average of 3.50 or better with no grade less than "B" (3.00).
2. Students carrying 15 hours or more must earn a grade point average of 3.20 or better with no grade less than "B" (3.00).
3. Students participating in the Honors Scholars College who are carrying 12-14 total hours but are not receiving a grade for the current semester of honors work shall be eligible for the Dean's List if their grade point average on the remaining 9-11 hours otherwise meets current standards for the Dean's List.

Students carrying 11 hours or fewer are not eligible for the Dean's List. Pass/fail hours will not be used in the calculation of Dean's List.

Declaration of Major

Undergraduate students admitted as first time, first year students may declare and be accepted into a major field of study after completing a minimum of 24 semester hours at the university. After one semester of enrollment, first time, first year students who have earned 30 or more credit hours including UNCW and transfer credit may declare their major with permission from the Director of Center for Academic Advising.

Undergraduate students admitted as transfer students are required to select a major or a pre-major at the time of admission to UNCW. Advising of transfer students is done within the chosen major field or Center for Academic Advising when appropriate.

In unique situations and with permission of both the Director of Center for Academic Advising and the Dean of the receiving College or School or designee, a student may declare their major before the end of their first semester. Colleges, schools, departments, and programs with admission requirements have a pre-major, and that academic unit provides discipline-specific advice. Students accepted into a pre-major status are expected to complete full admission requirements for the major within three semesters.

Degrees with Distinction

Three degrees with distinction are granted to graduating students based on all work attempted in meeting requirements for the degree as follows:

Cum Laude for an overall average of 3.50

Magna Cum Laude for an overall average of 3.70

Summa Cum Laude for an overall average of 3.90

If transfer students first have a UNCW GPA of 3.5 or higher, degrees with distinction are granted to transfer students under the following conditions:

1. The student must have the required overall average on all work attempted (including all transfer courses attempted).
2. The student must have the required average on work attempted at the University of North Carolina Wilmington.

Grades issued by a foreign institution are not calculated into the UNCW grade point average in determining degrees with distinction.

For the purposes of the commencement ceremony, including the distribution of honor cords and the printing of the commencement program, distinctions are calculated based on the grades up to, but not including, the student's final term. Students who complete the Departmental Honors Program satisfactorily will be graduated "With Honors" in the discipline in which the special work is undertaken. Students who complete the University Honors Program will have the additional designation "University Honors."

Determining Enrollment Status

Because the university must officially respond to requests for a determination of a student's enrollment status from outside agencies as well as university offices, the following policy is provided:

UNDERGRADUATE—REGULAR TERM

Full-time status requires a minimum enrollment of 12 credit hours.
Three-quarter-time status requires a minimum enrollment of 9 credit hours.
Half-time status requires a minimum enrollment of 6 credit hours.

UNDERGRADUATE—SUMMER SCHOOL

Full-time status requires a minimum enrollment of 12 credit hours across all sessions in the summer term.
Three-quarter-time status requires a minimum enrollment of 9 credit hours across all sessions in the summer term.
Half-time status requires a minimum enrollment of 6 credit hours across all sessions in the summer term.
Enrollment status for determining financial aid eligibility is calculated across all sessions in the summer term.

E-Mail

The University of North Carolina Wilmington regards e-mail as an official method of communication with students, staff and faculty. The UNCW e-mail address is the official address for faculty, staff and student electronic communications. Faculty, staff and students assume full responsibility for the decision to forward e-mail, and any failure to receive e-mail communications due to an alternative e-mail service does not necessarily constitute a defense for failure to respond. While e-mail is an official method of communication, it is not the only official method of communication and does not exclude alternate methods such as written or oral communications. All

members of the university community must maintain good e-mail management habits and adhere to the standards of responsible use specified in the UNCW Responsible Use of Electronic Resources
Policy (https://uncw.edu/policies/documents/07.100.00-responsible-use-of-it-resources.pdf) if the institution is to maintain a quality, collaborative computing environment.

Equal Opportunity, Diversity, and Unlawful Harassment

Reaffirmation of Commitment to Equal Education and Employment Opportunity

The University of North Carolina at Wilmington is committed to and will provide equality of educational and employment opportunity for all persons regardless of race, sex, sexual orientation, gender identity or expression, marital status, pregnancy, age (40 or older), color, national origin, ethnicity, religion, sexual orientation, political affiliation, National Guard or veteran status, military service member status, genetic information, disability or relationship to other university constituents – except where sex, age, or ability represent bona fide educational or occupational qualifications or where marital status is a statutorily established eligibility criterion for State funded employee benefit programs. This affirmation is published in accordance with 41 CFR Part 60 and is implemented in accordance with Title VII and Title IX of the Civil Rights Act of 1964, as amended; Executive Order 11246; the Rehabilitation Act of 1973; the Vietnam Era Veterans' Readjustment Assistance Act of 1974; the Civil Rights Restoration Act of 1988; and NC General Statutes Chapters 116 and 126.
To ensure that equal educational and employment opportunity exists throughout the university, a results-oriented equal opportunity/affirmative action program has been implemented to overcome the effects of past discrimination and to eliminate any artificial barriers to educational or employment opportunities for all qualified individuals that may exist in any of our programs. The University of North Carolina at Wilmington is committed to this program and is aware that with its implementation, positive benefits will be received from the greater representation and development of previously under-utilized human resources

Statement on Diversity in the University Community

In the pursuit of excellence, UNC Wilmington actively fosters, encourages, and promotes inclusiveness, mutual respect, acceptance, and open-mindedness among students, faculty, staff, and the broader community. Diversity is an educational benefit that enhances academic experience and fosters free exchange of ideas from multiple perspectives. Diversity includes, but is not limited to race, sex, gender, gender identity, marital status, pregnancy, age, color, national origin, ethnicity, religion, disability, sexual orientation, political affiliation, National Guard or veteran status, military service member status, genetic information, educational disadvantage, socio-economic circumstances, language, and history of overcoming adversity.

Unlawful Harassment, Discrimination, Sexual Misconduct and Retaliation

The University of North Carolina at Wilmington affirms that students and employees are entitled to an educational and employment environment free from unlawful harassment or discrimination based on that individual's race, sex, sexual orientation, gender identity or expression, marital status, pregnancy, age (40 or older), color, national origin, ethnicity, religion, color, disability, sexual orientation, political affiliation, National Guard or veteran status, military service member status, genetic information, disability or relationship to other university constituents and expressly prohibits unlawful harassment or discrimination of any individual among the university community engaged in educational or employment pursuits. Further, no student or employee shall be subject to retaliation for bringing a good faith complaint pertaining to unlawful harassment or discrimination or for protesting such behavior directed against another member of the university community.
For more information concerning ways in which our multicultural learning community may be nurtured and protected or complaint resolution procedures, contact the Office of Institutional Diversity and Inclusion, the Office of the Dean of Students, the Office of Academic Affairs, or the Office of Human Resources.

Improper Personal Relationships Between Students and Employees

1. **Purpose**

   This policy sets forth professional conduct standards for all employees who are involved in the instruction, supervision or evaluation of students. The university does not condone amorous relationships between students and employees. Members of the university community should avoid such liaisons, which can harm affected students and damage the integrity of the academic enterprise. Even if a relationship is not prohibited by this policy, it can raise risk management and conflict of interest concerns; thus, the University would discourage it. Further, sexual relationships between unmarried persons can result in criminal liability. In two types of situations, university prohibition and punishment of amorous relationships is deemed necessary: 1) when the employee is responsible for evaluating or supervising the affected student; and 2) when the student is a minor, as defined by North Carolina law.

2. **Prohibited Conduct**

1. It is misconduct, subject to disciplinary action, for a university employee, incident to any instructional, research, administrative or other university employment responsibility or authority, to evaluate or supervise any enrolled student of the institution with whom he or she has an amorous relationship or to whom he or she is related by blood, law or marriage.
2. It is misconduct, subject to disciplinary action, for a university employee to engage in sexual activity with any enrolled student of the university, other than his or her spouse, who is a minor below the age of 18 years.

3. **Definition of Terms**

1. "Amorous relationship" exists when, without the benefit of marriage, two persons as consenting partners

1. Have a sexual union; or
2. Engage in a romantic partnering or courtship that may or may not have been consummated sexually.

2. "Evaluate or supervise" means:

1. To assess, determine or influence a) one's academic performance, progress or potential or b) one's entitlement to or eligibility for any institutionally conferred right, benefit or opportunity; or
2. To oversee, manage or direct one's academic or other institutionally prescribed activities.

3. "Related by blood, law or marriage" means:

1. Parent and child
2. Brother and sister
3. Grandparent and grandchild
4. Aunt and/or uncle and niece and/or nephew
5. First cousins
6. Stepparent and stepchild
7. Spouses
8. Parents-in-law and children-in-law
9. Brothers-in-law and sisters-in-law
10. Guardian and ward

4. Reporting Policy Violations

1. The university encourages individuals to report alleged violations to the department chair, dean, director or vice chancellor of the division or department in which the employee involved in the relationship is employed. The dean, director or vice chancellor, in consultation with the Associate Vice Chancellor for Human Resources, Provost, and General Counsel (or respective designees), shall determine whether to authorize a formal investigation of the allegations.
2. Self-reporting is required to avoid potential conflicts of interest, or the appearance of a conflict. If the potential for such a conflict arises, the employee is required to disclose the possibility of a potential conflict to his or her immediate supervisor and efforts are to be made to eliminate any potential source of the conflict. Moreover, self-reporting is required to manage or resolve existing conflicts of interest arising from prohibited conduct defined in Section II.
3. The university considers the filing of a false or malicious report as a violation of this policy, and the individual who reports shall be subject to prompt and appropriate disciplinary action.

5. Investigatory Procedures

1. If a formal investigation is authorized, the pertinent vice chancellor will form a fact finding team of two impartial and unbiased individuals who interview the employee, the affected student, the complainant, and any other individual believed to have pertinent factual knowledge necessary to determine the validity of the allegations. Relevant documents should also be reviewed. The fact finding team takes notes of all individuals who are interviewed. The investigation should gather relevant information to determine whether there is a policy violation or a risk management or conflict of interest concern. As such, they may determine information including, but not limited to:
    1. Whether the reported relationship does exist and the nature of the relationship;
    2. Whether the relationship has created a conflict of interest;
    3. Options for eliminating any conflict of interest, with an emphasis on avoiding any negative impact to the student's academic progress; and
    4. The appropriateness of any academic, evaluative, and/or supervisory decisions made by the employee when the conflict of interest existed.
2. In general, the complainant, employee, and affected student may be accompanied by another member of the university community during the interview, so long as the individual does not participate in or interfere with the interview. This person's role is simply as an observer. Representation by legal counsel during the interview is prohibited. All parties to an investigation must be instructed on the confidential nature of the matter, and the prohibition against retaliation for reporting policy violations and/or participating in an investigation.
3. The fact finding team shall prepare a written report of factual findings, which shall be considered a confidential personnel record. Human Resources will serve as a consultant to the process to ensure consistency of treatment. In the case of a faculty member, the report shall be submitted to the pertinent department chair, dean, and the provost, with a copy to the Associate Vice Chancellor for Human Resources. In the case of a non-faculty member, the report shall be submitted to the pertinent supervisor, vice chancellor, and the Associate Vice Chancellor for Human Resources. The subject employee shall be afforded a full opportunity to participate in

the fact finding before the report is finalized. The employee may appeal a determination based on the investigation and report in accordance with Section VII.

4. A senior officer, in consultation with the General Counsel, shall make a determination of whether a policy violation has occurred. The standard of proof shall be a preponderance of the evidence, which means that there is greater than a 50% chance that the employee has engaged in prohibited conduct.
5. If, following consultation with the Associate Vice Chancellor for Human Resources and General Counsel, the fact finding team finds or is presented with evidence of harassment, violence, sexual activity with a minor, or other sexual misconduct, the matter will be referred to the Director of Title IX and Clery Compliance and/or University Police, as appropriate, and handled in accordance with Policy 02.205, Unlawful Discrimination, Harassment, and Sexual Misconduct.
6. Results of the investigation, the report, and any subsequent disciplinary action shall be kept confidential to the extent allowed by the Family Educational Rights and Privacy Act ("FERPA") and the North Carolina Human Resources Act (G.S. §§ 126-22 et. seq.). The investigating administrator(s) shall forward all related documentation as soon as possible following resolution to Human Resources for retention.
7. Reasonable efforts should be made to address the concern in as timely a manner as possible, which should be within sixty (60) calendar days of receiving the complaint. The Associate Vice Chancellor for Human Resources should be advised on any investigation and/or resolution that takes longer than sixty (60) calendar days. This should be accomplished through a status report provided by the investigating administrator(s).

6. Corrective Action

Any disciplinary action imposed for a violation of this policy shall be made in accordance with the disciplinary procedures applicable to the faculty or staff member's category of employment. Sanctions may include a letter of reprimand or warning, suspension without pay, or dismissal from employment. Disciplinary action shall be decided by the appropriate vice chancellor, or designee, in consultation with the Associate Vice Chancellor for Human Resources.

7. Appeal Procedures

A. A subject employee may appeal a determination following an investigation to the Office of Human Resources, who will forward it to an appropriate senior officer who has not participated in the investigation or subsequent disciplinary decision for review and decision. The employee may appeal a determination on the basis of:

1. Material procedural irregularities occurring during the investigation; or
2. Discovery of new evidence that was not available during the investigation and that may have a substantial impact on the outcome of the investigation.

B. Dissatisfaction with the university's determination is not grounds for an appeal.

C. A subject employee seeking to appeal the determination on approved grounds must file a

written appeal statement within thirty (30) calendar days after notice of the decision. Appeal statements must include grounds for the appeal.

D. Disciplinary actions may be appealed in accordance with the disciplinary policies applicable to the faculty or staff member's category of employment.

Opportunities for Involvement and Avenues of Redress

For more information concerning ways in which our multicultural learning community may be nurtured and protected, contact Institutional Diversity and Inclusion, the Office of the Dean of Students, or Human Resources.

For complaint processes and administrative review procedures pertaining to perceived violations of the university's policies pertaining to equal educational and employment opportunity, personal discrimination, sexual harassment, or improper personal relationships, see the Code of Student Life or the Faculty Handbook or contact the University EEO/AA Officer, UNCW Human Resources, 601 S. College Road, Wilmington, NC 28403-5960, Phone (910) 962-3160, Fax (910) 962-3840.

For questions concerning program access or compliance, contact the ADA Compliance Officer, UNCW Environmental Health and Safety Office, Wilmington, NC 28403-5974, Phone (910) 962-4287.

Seahawk Respect Compact

In the pursuit of excellence, UNC Wilmington actively fosters, encourages, and promotes inclusiveness, mutual respect, acceptance, and open-mindedness among students, faculty, staff and the broader community.

- We affirm the dignity of all persons.
- We promote the right of every person to participate in the free exchange of thoughts and opinions within a climate of civility and mutual respect.
- We strive for openness and mutual understanding to learn from differences in people, ideas and opinions.
- We foster an environment of respect for each individual, even where differences exist, by eliminating prejudice and discrimination through education and interaction with others.

Therefore, we expect members of the campus community to honor these principles as fundamental to our ongoing efforts to increase access to and inclusion in a community that nurtures learning and growth for all.

Final Examination Policy

University policy requires the scheduling of final examinations. Under this policy, the final examination schedule provides a three-hour period for each examination and allows a maximum of four examinations per day. The length of the final examination, up to a maximum of three hours, is at the discretion of the instructor.
The final examination schedule is published at the beginning of each semester. Courses offered during the day have final examinations during the day. Night courses have final examinations at night.
A student who is scheduled to take three or more final examinations in one calendar day may have one or more rescheduled so that no more than two per day are required. To reschedule an exam the student must notify the three (or four) instructors and the appropriate dean(s) of this desire at least two weeks before the beginning of the final examination period. It will be the responsibility of the instructors, working with the student, to reschedule the exam(s) and so inform the student and the appropriate dean(s) at least one week before the beginning of the final examination period.
Rescheduling of a final examination for an entire class may be done only with the approval of the appropriate dean.

Grade Appeal Procedure

Any student considering a grade appeal should understand that each faculty member has the academic freedom and responsibility to determine grades according to any method, chosen by the faculty member, that is professionally acceptable, communicated to everyone in the class, and applied to all students equally. However, prejudiced or capricious academic evaluation by a faculty member is a violation of a student's rights and is the valid ground for a grade appeal.
Any student who contests a course grade shall first attempt to resolve the matter with the instructor involved. Failing to reach a satisfactory resolution, the student may appeal the grade in accordance with the procedures outlined below. These procedures are not to be used in cases involving student academic dishonesty. An appeal must be made no later than the last day of the next succeeding regular semester. Grades not appealed by that time become permanent.

1. The student shall present the appeal in writing to the chairperson of the department within which the contested grade was awarded. The written statement shall limit itself to citations of evidence pertaining to the valid ground for the appeal. By conferring with the student and the

instructor, the chairperson will seek resolution by mutual agreement.

2. Failing such resolution, the department chairperson shall transmit the written appeal to the appropriate dean who will convene the Grade Appeals Committee.
3. The Grade Appeals Committee shall consist of the convening dean and five faculty members appointed by the dean. If the committee affirms the instructor's decision, the dean will notify in writing the faculty member, the student, and the department chairperson as appropriate. If the committee supports the student's appeal, it shall prescribe the method by which the student will be reevaluated. The grade resulting from the prescribed reevaluation is final and may not be further appealed.

Grades and Reports

Unless modified in accordance with established procedures, each grade assigned by faculty (including a grade in a course that has been repeated), or a grade of "W" is permanent and cannot be removed from a student's official record or transcript.

The University of North Carolina Wilmington uses the grade point system and semester hour credit for calculating student achievement. Plus (+) or minus (-) grades may be awarded at the discretion of the faculty. Grade symbols used are the following:

Grade	Grade Points*	
A	4.00	Excellent
A-	3.67	
B+	3.33	
B	3.00	Good
B-	2.67	
C+	2.33	
C	2.00	Average
C-	1.67	
D+	1.33	
D	1.00	Passing
D-	0.67	
F	0.00	Failure
I	Incomplete	
IP	In Progress (Multi-Term Courses and Projects)	

W	Withdrawn
WF	Failure/Late Withdrawal
NR	Not Reported by Faculty
Z	Under Appeal
P	Satisfactory Work

*Earned grade points equal quality points

The grade point average (GPA) is determined by dividing the accumulated number of grade points (quality points) earned at UNCW by the accumulated number of attempted hours earned at UNCW. Hours for which grades of "F" or "WF" have been assigned are included in the calculation of the GPA. Grades of "I," "IP," "W," "NR," "Z" and "P" are not included in the calculation of the GPA.

At the discretion of the instructor and in compliance with policies governing appropriate conditions for assigning a grade of Incomplete, a student may be given a grade of Incomplete when the work in the course has not been completed for reasons beyond the control of the student. All incomplete grades must be removed according to a deadline established by the instructor, but no later than the end of the next regular semester, otherwise the "I" becomes "F" and cannot be changed. A student must not register for the class when attempting to remove a grade of Incomplete. No student will be allowed to graduate with an Incomplete grade on his/her academic record. Such grades that have not been resolved at the time of graduation will be converted to an "F." If a student meets graduation requirements, despite the "F," the appropriate degree will be awarded.

An "IP" is assigned to departmental honors projects (499) in semesters other than their final one. Upon successful completion of the entire project, "IP" grades from previous semesters are converted to letter grades, and grade points are retroactively awarded.

Grades of "P" and "F" can be assigned to internships designated by a 498 number as described in the section on Internships. The credit hours earned with a "P" will count towards the number of hours required to graduate but will be excluded from the computation of the GPA. Grades of "F" will be included in the computation of the GPA.

Term grades may be accessed via mySeaport.

Indebtedness

All indebtedness to the university must be satisfactorily settled before a diploma will be issued.

Interinstitutional Placeholders

Placeholders are fictitious courses that act as reference points for coursework generated through interinstitutional transfer. If visible on the transcript, the course will be upgraded as 'NG' (Non-Graded) with zero credit hours. The following courses exist as placeholders for interinstitutional relationships with other campuses.

- EXC 294 (Exchange) - appears on an academic transcript with an NG grade and zero credit hours
- STA 294 (Study Abroad) - only appears within registration; appears until foreign transcript is received and processed, then removed
- UPS 294 (University of Paris Sorbonne) - only appears within registration; appears until foreign transcript is received and processed, then removed
- UNCX with any course number (UNC Online) - only appears within registration

Internships

Several programs in the College of Humanities, Social Sciences, and the Arts, College of Science and Engineering, College of Education, College of Health and Human Services, and the Cameron School of Business offer students the opportunity to earn academic credit within a work environment external to the program. The purpose of the internship experience is to enhance, supplement, and integrate the learning that occurs in formal classroom settings. Permission of the dean and program offering the internship is required to enroll, and the program places limits on the number of credit hours earned applicable toward graduation. Internships designated by a 498 number will be graded on a Pass (P), Fail (F) basis. These credit hours earned will count towards the number of hours required to graduate, but the grade of Pass (P) will be excluded from the computation of the GPA. For further information on internships, refer to the courses numbered 498 in the course listings and then contact the departments offering them.

Isaac Bear Early College High School Students

Isaac Bear Early College High School opened in the fall of 2006 as a partnership between the North Carolina New Schools Project, New Hanover County Schools and the University of North Carolina Wilmington. As an early college high school, students participate in an
accelerated high school education program which offers honors courses to prepare students for the rigor of college.
Students enrolled in UNCW classes while enrolled at Isaac Bear Early College High School will be governed by the academic policies of the UNCW catalogue. Upon admission to UNCW, Isaac Bear Early College High School graduates will begin as degree seeking undergraduates. Such students will maintain the cumulative GPA and credit hours earned. However, all other policies will restart as if the student was not enrolled during high school.

Off-Campus Courses

Students may be permitted to earn credits toward degree requirements at UNCW through course work at other regionally-accredited two- and four-year colleges and universities in the United States and abroad, as well as through distance education. To receive permission, a student must submit an online "Permission for Transient Study" request and obtain the approval of his/her department chairperson (or the dean of University College) prior to registering for the course(s). The online transient study request link and instructions are available
at http://www.uncw.edu/reg/transfercredit-transStudy.htm. The permission form must be on file in the Office of the Registrar prior to the student's leaving campus. Any exception to the residency requirement requires the signature of the department chair and dean. See also Residency Requirement.

Pass/Fail Courses

Students who have a cumulative grade point average of 2.00 or higher and who have successfully completed 45 hours, with at least 12 hours at UNCW, may take up to 9 hours of elective courses on a pass/fail basis. The intent of this option is to encourage students to explore areas of interest beyond their major or minor without

concern about compromising their academic record. Students should be selective in choosing such courses. A change of major might mean that a course taken on a pass/fail basis must later be retaken for a grade. In addition, graduate and professional schools and future employers may evaluate such course work differently from graded courses. The following restrictions apply:

- A student may enroll in a course on a pass/fail basis only with the permission of the instructor.
- No more than one course may be taken on a pass/fail basis in a semester or summer session.
- Courses used to fulfill university studies requirements or the requirements of the student's major, minor, or certificate program may not be taken on a pass/fail basis. Courses repeated to replace a grade may not be taken on a pass/fail basis.
- Students may not change the designation (from graded to pass/fail or from pass/fail to graded) after the drop/add period.
- Pass/fail students are required to complete all course work and examinations and are graded as if they were taking the course for a grade. Students who achieve a passing average receive a grade of "P" for the course. A "P" grade is equivalent to a "D-" or better.
- Credit hours in courses for which a student has earned a "P" are counted toward the hours required for graduation, but are excluded in the computation of the student's grade point average. Grades of "F" are included in the computation of the grade point average.
- Internships do not count in these elective pass/fail courses.
- Students should be aware of the ramifications which could result from using the pass/fail option:

1. Many graduate schools will not consider "P" grades for entry into a program.
2. Many institutions do not award transfer credit for "P" grades.
3. Pass/fail hours will not be used in the calculation of Dean's List.

Placement by Examination

For information on credit available by examination through CLEP, IB, AP, etc., see the Credit by Examination section of this page.

Placement into appropriate starting courses in Math, English, and World Languages is in part through examination as detailed below, but is at the discretion of the placing department's chair.

English

Placement: https://uncw.edu/myuncw/academics/colleges/chssa/departments/english/placement

Math Placement

Test: https://uncw.edu/myuncw/academics/colleges/cse/departments/math-statistics/student-resources/undergraduate/placement-test

World Language and Cultures Placement

Test: https://uncw.edu/myuncw/academics/colleges/chssa/departments/world-languages/undergrad-student-resources/placement-test

Policy Statement on Illegal Drugs

In accordance with policy adopted by the Board of Governors of the University of North Carolina and the Board of Trustees of UNCW, disciplinary proceedings against a student, faculty member, administrator, or other employee will be initiated when the alleged conduct is deemed to affect the interest of UNCW. The penalties that may be imposed range from written warnings with probationary status to expulsion from enrollment and discharge from employment.
The full text of the policy appears in the *UNCW Policies and Procedures Manual*, the *Faculty Handbook*, and the *Code of Student Life*.

Posthumous Degree

https://uncw.edu/myuncw/about/university-administration/academic-affairs/policies-guidelines/posthumous-degrees

A posthumous baccalaureate or graduate degree may be conferred upon a student who dies prior to but close to completion of all requirements of the degree being pursued. The University of North Carolina Wilmington awards such degrees in recognition of the academic achievement of the deceased student. In doing so it acknowledges the loss to the university, family and friends and extends to them the opportunity to share in the academic success of the deceased student.
To be eligible for the award of a posthumous degree, an undergraduate student generally must have met the following conditions:

- At the time of death, the student was enrolled in his/her senior year.
- The student was in good academic and disciplinary standing and was successfully progressing toward completion of requirements for the degree to be awarded. In particular, at the time of death the student had a 2.0 GPA or better, was within 15 credit hours of completion of all requirements or in the final term of completion of all their requirements, and had satisfied the university's Residency Requirement as described in University Regulations within the Undergraduate Catalogue.
- The student must have declared a major and completed at least one half of the requirements for the major that will be recorded on the diploma.

To be eligible for the award of a posthumous degree, a graduate student generally must have met the following conditions:

- At the time of death, the student was enrolled in good academic standing and had made

significant progress toward academic requirements for earning the degree.

- For degrees requiring thesis, dissertation, or other creative/practicum activity, the student must have completed all course and other requirements pursuant to the degree and must have been near completion of the dissertation/thesis/equivalent product; and the student's committee must have determined the scholarship to be substantial work and worthy of the degree.
- For degrees requiring primarily coursework, the student should have completed at least 90 percent of academic requirements for earning the degree. This is typically in the last two semesters or year of study.
- In cases where requirements for awarding a doctorate have not been met, a master's degree could be awarded if an appropriate master's degree exists within the student's home department/school, all requirements for the degree have been satisfied, and the action is supported by the student's committee.

Approval Process

The process for identifying and considering candidates for the award of degrees posthumously shall be as follows:

1. Upon learning of the death of a University of North Carolina Wilmington student, the Vice Chancellor for Student Affairs (or designee) will notify the relevant dean.
2. The dean shall ascertain the academic and disciplinary standing of the student. The dean's office will work with the department chair. The departmental faculty, department head and dean will determine if the student's overall record merits further consideration and if recommendation that the posthumous award be granted; such information will be communicated to the Provost.
3. The Provost will weigh all the information relating to each case independently and will prepare a recommendation to the Chancellor. If the Chancellor supports the recommendation, it will be presented to the Board of Trustees for final approval.
4. If the Board of Trustees approves, the Chancellor's Office will notify the Registrar.

Awarding of Posthumous Degrees

Upon approval by the Board of Trustees, the following procedure will be followed:

1. The family of the deceased will be notified of the approval by the Vice Chancellor for Student Affairs (or designee).
2. The degree will be conferred at a future commencement exercise determined by the Provost and Vice Chancellor for Student Affairs.

1. Names of all recipients of posthumous degrees will be listed separately, along with degree and major, in the commencement program.
2. Special recognition of these students will be made by the Chancellor just prior to the individual recognition of all degree candidates present at the ceremony.
3. Families who choose to attend commencement activities will be provided reserved seating and

the Chancellor will note their presence as he or she recognizes the posthumous degree recipients.

4. A diploma will be provided to the families who choose to attend commencement activities or mailed to families who choose not to participate.
3. The posthumous nature of the award will be indicated on the diploma, the student's permanent record and in the commencement program.
4. If the major department does so certify, the Registrar shall enter final grades of "P" in classes in which the student was enrolled.

Extraordinary Circumstances

Exceptions to these guidelines may be made when the student's death occurred during or as a result of participation in university-sponsored activities, or when chronic illness prevented current enrollment.

Exceptions may also be considered when extraordinary circumstances prevail. For example, the student died while carrying out a heroic deed, or while performing outstanding service to the University or community, or after having completed an outstanding academic record, piece of original research, or creative project; and other exceptional cases. In such cases, appropriate justification should be prepared and presented as part of Step 2 of the Approval Process (above). All other approval steps remain the same.

DEGREES IN MEMORIAM

A Degree in Memoriam is a recognition provided to honor a deceased student's progress toward the degree. The Degree in Memoriam is not included in the official count of degrees.

For undergraduate and graduate degrees and certificates: Any student who was in good standing at the University at the time of their death and who does not meet the requirements necessary to be awarded a posthumous degree may be awarded a Degree in Memoriam. Degrees in Memoriam will read "Bachelor of Arts in Memoriam," "Bachelor of Science in Memoriam," "Master of Arts in Memoriam," "Doctor of Philosophy in Memoriam," etc., depending upon the degree the student was pursuing at the time of death. Undergraduate students who have not declared a major will be awarded the "Bachelor of Arts in Memoriam." The approval process for a degree in memoriam shall be the same as that for approval of a posthumous

degree. Degrees in memoriam will be delivered to the student's family by the Division of Student Affairs.

Progress Toward Graduation in Four Years

To graduate in four years, a student must successfully complete all graduation requirements and an average annual course load of 30 semester hours. This course load requires the student to take approximately 15-16 hours per semester or earn hours through summer enrollment. Among the factors responsible for extending the time necessary to complete degree requirements beyond four years are a student's late decision to change majors, requiring additional course work; part-time employment while enrolled; family responsibilities; and unilateral decisions to take fewer than the recommended average of 15.5 hours per semester.

Registration

Registration occurs immediately prior to each term and is limited to the time period specified in the university calendar. Classes may not be added after the last day of registration and the add/drop deadline. Degree students may take up to 18 hours without special permission. Students who have a cumulative grade point average of 3.50 or higher may be allowed, with special permission of the appropriate dean, to carry up to 21 semester hours.

Cancellation of Registration Due to Failure to Pay Tuition and Fees

Students who fail to pay or make suitable arrangements for payment of tuition and fees will have their registrations cancelled. Non-payment does not constitute official withdrawal from the university. If a student registered, but decides not to attend UNCW, the student MUST notify the Office of the Registrar in writing prior to the first day of the term. Please see Charge for Late Payment of Tuition and Fees in the section on Expenses, subsection, Tuition and Fees.

Release of Directory Information

The University of North Carolina Wilmington has routinely made public certain information about its students. Typically, UNCW releases the names of students who are selected by the various honorary societies, receive scholarships, make the Dean's List, hold offices, or are members of athletic teams.

The University of North Carolina defines the term directory information to include the following information: the student's name, college and major field of study, participation in officially recognized activities and sports, dates of attendance, degrees earned, honors and awards received, and the most recent previous educational agency or institution attended by the student. The university will make public information about each student limited to these categories in ways such as those described above. Of course, information from all these categories is not made public in every listing.

Students who do not wish to have their directory information made public without their prior consent must complete a "Request To Prevent or Allow Disclosure of Directory Information" form in the Office of the Registrar.

Family Educational Rights and Privacy Act (FERPA)

Certain personally identifiable information about students ("education records") may be maintained at the Office of the President of the University of North Carolina, which serves the Board of Governors of the university system. This student information may be the same as, or derivative of, information maintained by a constituent institution of the university; or it may be additional information. Whatever their origins, education records maintained at the Office of the President are subject to the federal Family Educational Rights and Privacy Act of 1974 (FERPA).

FERPA provides that a student may inspect his or her education records. If the student finds the records to be inaccurate, misleading, or otherwise in violation of the student's privacy rights, the student may request amendment to the record.

FERPA also provides that a student's personally identifiable information may not be released to someone else unless (1) the student has given a proper consent for disclosure or (2) provisions of FERPA or federal regulations issued pursuant to FERPA permit the information to be released without the student's consent.

A student may file with the U.S. Department of Education a complaint concerning failure of the Office of the President or an institution to comply with FERPA.

The policies of the Office of the President of the University of North Carolina concerning FERPA may be inspected in the office at each constituent institution designated to maintain the FERPA policies of the institution. Policies of the Office of the President may also be accessed in the Office of the Secretary of The University of North Carolina, Office of the President, 910 Raleigh Road, Chapel Hill, NC 27515-2688.

Further details about FERPA and FERPA procedures at the Office of the President

are to be found in the referenced policies. Questions about the policies may be directed to Legal Section, Office of the President, The University of North Carolina, Office of the President Annex Building, 910 Raleigh Road, Chapel Hill, NC (mailing address P.O. Box 2688, Chapel Hill, NC 27515-2688; telephone: 919-962-4588).

Repeating of Courses

Students who receive a grade of "C" (2.00) or better in a course may not repeat the course but may audit without credit. Students who repeat a course in which they have earned credit or for which transfer credit has been awarded, will have the status changed to audit during the term the course is repeated. Students who wish to have the grade for the course repeat show on their transcripts without the course counting in their credit total or grade point average may arrange this before the end of add/drop by submitting an online Graded Course Audit Registration Form. The form and instructions are available in the Office of the Registrar or online at http://www.uncw.edu/reg.
Students who receive a grade below a "C" (2.00) in a course taken at UNCW may repeat the course at UNCW. For the first three different courses repeated, the previous grade and hours of credit for the repeated course will not be used in calculating the student's grade point average and hours toward graduation. All grades shall remain on the student's transcript.
In interpreting the policy it is to be understood that:

1. the term "first three times" means
1. that the policy is automatically operative for a student the first time that the student repeats a course, and
2. that the three repeats involve three different courses;
2. a student may go beyond three course repeats, but such repeats will not enjoy the privilege of the policy;

3. all students will be able to enjoy the benefits of this policy irrespective of prior course repeat activity;
4. this policy does not govern the repeating of graduate courses (see the Graduate Catalogue for the appropriate policy).

Students enrolled in a special topics course for a grade replacement must enroll in the same topic for which they originally received an unsatisfactory grade. Grades earned in repeated courses will not be used to replace grades earned as part of a degree once it has been conferred.

Note: A failing grade received owing to admitted or adjudicated academic dishonesty shall not be replaced if the course is repeated. Both the penalty grade and the new grade shall appear on the student's transcript and count in the student's grade point average. A student may not appeal the policy stated in this paragraph to any faculty or administrative level.

Requirements for a Double Major or a Double Degree

A student may elect to major in two separate disciplines on the condition that the student meets all requirements for each major. A student who completes 120 hours and all requirements for more than one major in the same baccalaureate program will have only one degree conferred, but all majors will be printed on the transcript.

A student who completes 120 credit hours and meets all requirements for majors in different baccalaureate programs may have both degrees conferred. A student may not simultaneously receive two different baccalaureate degrees within the same department (e.g., a B.S. and a B.A. degree).

A student may not normally receive a second baccalaureate degree in a department in which a degree has been earned previously. An exception may be made only when a department has an established policy regarding the circumstances in which a second degree may be awarded.

A student who returns to the university after the initial graduation to complete the requirements for a second major may have the additional major added to the official record upon written notification from the department chairperson that all departmental requirements have been met satisfactorily. A new diploma will be issued reflecting the new major and will be subject to the replacement diploma fee.

Requirements for Another Baccalaureate Degree

A student with a baccalaureate degree from UNCW may receive a second baccalaureate degree in a different major. The student must meet all the requirements for the second degree and major, including 30 hours in residency, at least 15 semester hours in the major at the 300-400 level, and course work that meets the spirit of UNCW's current university studies requirements.

Requirements for Graduation

Students are expected to request the awarding of degrees prior to the conclusion of their current academic program by applying to graduate. An application for graduation must be submitted online by the date specified in the university calendar for the desired graduation term. A diploma fee is added to the student's account at the time of application.

Students may qualify for the bachelor's degree by completing successfully (1) the university studies requirements, (2) the residency requirement, (3) an approved course of study in an academic major, (4) a minimum of 120 semester hours of credit, and (5) fifty percent (one-half) of the minimum semester hours required in the degree must be earned through enrollment in a regionally-accredited 4-year college or university, and (6) a minimum grade point average of 2.00.

Graduation will be certified at the end of the term in which all academic requirements are complete. Upon completion of all requirements, the student will receive the appropriate degree from the following list: Bachelor of Arts, the Bachelor of Fine Arts, the Bachelor of Music, the Bachelor of Science, the Bachelor of Science in Nursing, or the Bachelor of Social Work. In advising and registering students, the deans, the Office of the Registrar and advisors try to make certain that every student who intends to graduate from the university registers for those courses that are required for a degree. The student, however, must assume the final responsibility for meeting the graduation requirements set forth in the university catalogue. All degree requirements must be completed within six years of a student's catalogue.

All graduation requirements must be met before the first day of the subsequent terms, as shown below:

Graduation Term	Date All Requirements Must be Met
Spring	First Day of Summer Term
Summer	First Day of Fall Term

Fall	First Day of Spring Term

Commencement Participation

A student shall be permitted to participate in the commencement ceremony if the student demonstrates that degree program requirements for graduation are or will be met with the completion of one educational experience (e.g., course, internship, practicum, fieldwork) as defined by their Dean's office or up to 8 credit hours of coursework during the term immediately following the commencement ceremony. Students who meet these requirements must notify the Office of the Registrar by the posted deadline in the semester of their intent to participate in the ceremony. Their names will not be published in the Commencement Program.

Residency Requirement

To qualify for the bachelor's degree, students must be enrolled in a degree program at UNCW and must have completed: (1) a minimum of 25 percent of the credit hours required for graduation through courses offered at UNCW and (2) 15 semester hours in the major at the 300-400 level. Exceptions to requirement (2) may be made only with the approval of the department chair or school director, and the appropriate dean. Requirement (1) may not be waived.To qualify for the bachelor's degree, students must be enrolled in a degree program at UNCW and must have completed: (1) a minimum of 25 percent of the credit hours required for graduation through courses offered at UNCW and (2) 15 semester hours in the major at the 300-400 level. Exceptions to requirement (2) may be made only with the approval of the department chair or school director, and the appropriate dean. Requirement (1) may not be waived.

Retention, Dismissal and Re-Enrollment

The University of North Carolina Wilmington both encourages and requires intentional pursuit of your degree. In order to remain at the university, all students must meet the requirements outlined below.

Insufficient Academic Progress

An undergraduate is automatically placed on Insufficient Academic Progress if Satisfactory Academic Progress (SAP) is not met. SAP is generally defined as

completing 67% of all attempted hours, excluding transfer hours. This is determined by dividing the number of credit hours successfully completed, defined as having earned a D- or better, by the total number of credit hours attempted.

When a student is placed on Insufficient Academic Progress, a notation is placed on the student's transcript. It is important to note that students on Insufficient Academic Progress may not be making timely progress towards degree completion. It is the responsibility of the student to arrange regular meetings with his or her academic advisor or department chair/director to discuss these issues and to consider specific academic intervention strategies.

Students should refer to the Scholarship and Financial Aid (OSFA) section related to Policy on Return of Title IV Funds for information about how Insufficient Academic Progress impacts financial aid eligibility.

Academic Standing Policy

The academic standing policy is designed to keep students on track to degree completion. Academic standing is calculated to determine a student's eligibility to enroll in courses. There are four academic standings: Good, Concerning, Warning, and Appeal Required. Students will be notified of their academic standing. Academic programming may be required, as per each college's discretion, for students who are not in good standing.

Good

All new students will begin with a standing of Good. Students who earn a 2.000 or higher cumulative GPA will continue to have a standing of Good and may enroll in fall, spring, or summer courses.

Concerning

Students who begin a semester with a standing of Good and earn less than a 2.000 cumulative GPA during that semester will have a standing of Concerning. Students with a standing of Concerning may enroll in fall, spring, or summer courses.

Students who begin a semester with a standing of Concerning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Warning

Students who begin a semester with a standing of Concerning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Warning. Students with a standing of Warning may enroll in fall, spring, or summer courses. Students who begin a semester with a standing of Warning and earn a cumulative GPA of 2.000 or above will return to Good standing.

Appeal Required

Students who begin a semester with a standing of Warning and do not earn a cumulative GPA of 2.000 or above will progress to a standing of Appeal Required and will not be permitted to enroll in courses and any registered courses may be dropped. Students with a standing of Appeal Required who wish to re-enroll must submit an appeal requesting permission to enroll in courses. This appeal will go to a campus-wide Academic Standing Appeal committee that consists of Deans or their delegates, the Director of the Center for Academic Advising, the Director Financial Aid and Scholarships, the Dean of Students, and the Registrar. Students must meet with their advisor to begin the appeal. While appeals will be considered on a rolling basis throughout the year, to enter a specific term, students must submit the appeal 10 business days before the drop/add deadline.

The standings above determine eligibility to enroll in courses at UNCW; however, they do not determine eligibility to enroll in specific programs or colleges.

Readmission

Undergraduate students who left the university in good academic standing for one fall or spring semester do not need to apply for readmission. For those not enrolled at the university for two or more consecutive, regular semesters (excluding summer), a readmission application is required. Applications for readmission and submission deadlines are available from the Office of Undergraduate Admissions. Readmission to the university does not guarantee readmission to individual academic programs.

Three-year Forgiveness Policy

Any degree-seeking undergraduate student who has not been enrolled at UNCW for three or more years may choose to take advantage of the Three-year Forgiveness Policy. A student must be readmitted and then notify the University of their intention to take advantage of the Three-year Forgiveness policy by the last day of drop/add for the semester in which the student is readmitted. Three-year Forgiveness status, once applied, may not be changed, and will have the following academic consequences:

1. All original coursework attempted is visible on the academic transcript.
2. Any grade of C or higher earned prior to the granting of the Three-year Forgiveness policy will be included in earned credit hours.
3. Any grade of C- or lower earned prior to the granting of the Three-year Forgiveness policy will be excluded from earned credit hours.
4. A failing grade received as a result of a brokered private resolution or adjudicated academic

dishonesty shall not be replaced if the course is repeated. A student may not appeal this outcome to any faculty or administrative level.

5. The student's grade point average will be calculated only for those courses taken after the granting of the Three-year Forgiveness policy.
6. The student will retain all Course Repeat and Grade Replacement options.
7. The course withdrawal bank will reset to 16 credit hours.
8. The student will be ineligible for Degrees with Distinction.
9. This policy may only be applied once.

Reverse Transfer Program

The Reverse Transfer Program is a collaborative effort between North Carolina's Community Colleges and the University of North Carolina's 16 constituent institutions. Students who transfer to UNC Wilmington from one of the 58 North Carolina community colleges are given the opportunity to combine the credits earned at UNCW with credit already earned at the community college to determine if the associate degree requirements have been met. Students have the opportunity to opt-in to this program at the time of admission as a transfer student. There is no cost to participate. For more information, contact the Office of the Registrar.
Eligibility: Students must have earned at least 16 college-level credit hours at one community college applicable towards their degree, to be eligible to participate. After earning a total of 60 combined credits, the student's UNCW records will be sent back to their previous community college for evaluation. The community college will contact students via their UNCW email, with further details, if the Associate degree is awarded.

Service-Learning

Several UNCW courses employ service-learning opportunities. Service learning is an innovative method of teaching and learning that combines thoughtfully organized service to the community with other means of instruction. Community service-projects are integrated into and enhance the academic curriculum of students, fitting naturally into the philosophy and pedagogy of a variety of disciplines and fostering civic responsibility. Both students and the community benefit from service learning. Service-learning courses have several strengths, not the least of which is that they are adaptable to the needs of the community while providing structured time for the students to reflect on the service experience.

Student Conduct

Students share in the responsibility for maintaining an environment in which the rights of each member of the UNCW community are respected. When asked to report to any university office, a student is expected to appear at the time specified or to arrange another appointment. The university conduct system is a cumulative process; consequently, any student found responsible for violating the *UNCW Code of Student Life* may sanction proportional to the severity of the offense(s) and/or related to being found responsible on multiple occasions. All students and their guests shall be responsible for conducting themselves in a manner that helps to enhance an environment of learning in which the rights, dignity, and freedom of each member of the academic community are respected.
In accordance with the Family Educational Rights and Privacy Act (FERPA), upon full participation in university orientation, an individual is considered a UNCW student in attendance and shall maintain that status unless an official university withdrawal is submitted. Students with pending academic or non-academic charges will not be allowed to formally withdraw from the university until the disciplinary process has been completed.

Student Gender-Based/Sexual Misconduct Policy

UNCW is committed to maintaining a positive learning and working environment for students, faculty, and staff. The University prohibits Sex/Gender-Based Harassment, to include sexual assault, sexual exploitation, sexual violence, stalking, and complicity in the commission of any act prohibited by this policy. These offenses are unlawful, undermine the character and purpose of the University, and will not be tolerated. The Student Gender-Based/Sexual Misconduct Policy reflects UNCW's continued commitment to provide a safe and non-discriminatory environment for all members of our campus community consistent with the provisions of applicable local and federal laws. The *Student Gender-Based/Sexual Misconduct Policy* is available in hard copy at the Office of Title IX and Clery Compliance in DePaolo Hall Room 1003 and online
at: http://uncw.edu/policies/documents/04130StudentGenderBasedSexualMisconductPolicy.pdf.

Supplemental Credit

Supplementary Math Credit

Students who complete MAT 161 with a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 112. Students who complete MAT 162 with a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 161. Students who complete MAT 261 with a grade of "C" (2.00) or better and who receive no advanced placement credit, no transfer credit, and no prior credit at UNCW in mathematics will receive credit for MAT 161 and MAT 162.

Supplementary World Language Credit

Students who complete, with a grade of "C" (2.00) or better, a French, German, Japanese, Latin, Portuguese or Spanish course numbered 201 or higher (excluding literature and culture classes taught in English) shall be granted supplemental credit as follows:

· For completion of a 200-level course, student will receive 3 credit hours for the prior course in the sequence. For completion ofSPN 215, students will receive 3 credit hours forSPN 201.

· For completion of a 300-level course in French, German, Latin or Spanish, student will receive 6 credit hours for 201 and 202.

· For completion ofSPN 315, students will receive 6 credit hours forSPN 201andSPN 215.

This credit may be used to fulfill university studies requirements."

Transcripts

Transcripts are permanent student records maintained by the Office of the Registrar. A transcript provides an unabridged chronological listing of the academic history of a student's study at the University of North Carolina Wilmington. This document is forwarded at the request of the student or former student to persons or agencies for

their use in reviewing the academic performance of the student.
The Office of the Registrar issues transcripts to students. Currently enrolled students may request their transcript through mySeaport. Former students may request their transcript through the online ordering portal. Valid picture ID is required for personal pick up of printed transcripts. The fee for each transcript is $8.00 plus delivery costs.
Unless modified in accordance with established procedures, each grade assigned by faculty (including a grade of "W" or a grade in a course that has been repeated) is permanent and cannot be removed from a student's official record or transcript.

Transfer of Credit

Students transferring to UNCW from another accredited college or university will submit their transcripts to the Office of Admission as part of the application process. Transfer credit may be accepted from institutions accredited by the following bodies:

- Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
- Accrediting Commission for Community and Junior Colleges (ACCJC)
- Higher Learning Commission (HLC)
- Middle States Commission on Higher Education (MSCHE)
- New England Commission of Higher Education (NECHE)
- Northwest Commission on Colleges and Universities (NWCCU)
- Western Association of Schools and Colleges (WASC)

Credit awarded from an institution whose accrediting body is recognized by the U.S. Department of Education as an Institutional Accrediting Agency may be considered for transfer provided the credits are not of a vocational, trade, or technical nature and are not outside the scope of UNCW's mission.
Credit will be awarded for all transferable courses earned at another institution for which a grade of C or better is earned and all official agreements will be followed (e.g. Comprehensive Articulation Agreement). Students may submit an appeal of their transferred credits through the Registrar's Office.
To graduate, students must meet the university's Residency Requirement (see policy). Hours attempted, and grade points earned at other institutions are not used in calculating grade point averages.Transfer credit is used in evaluating eligibility for "Degrees with Distinction". Colleges and Schools may have more restrictive limits based on the needs of the degree programs as published in thecatalogue.

UNCW Policy on Defining a Credit Hour

In defining a credit hour, UNC Wilmington recognizes the University of North Carolina policy on scheduled instructional time or equivalent per credit hour and the Federal definition and Carnegie unit recommendations.
1. For courses taught in a traditional classroom format, a credit hour is normally granted for completion of at least one 50 minute session of classroom instruction per week for 15 weeks, or the equivalent time per semester, and a minimum of 2 hours per week for 15 weeks of out-of-class student work, or the equivalent time per semester.
2. Alternatively, a credit hour may be granted for at least an equivalent amount of work as required in item 1 above for other academic activities or instructional modes of delivery, such as distance education, blended distance and face-to-face instruction, laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Withdrawal Policy for Undergraduate Students

A student may drop any or all courses without academic penalty through the posted drop-add period for the academic term. Any student who withdraws from the university or from individual courses by the withdrawal deadline will receive a grade of "W" for each course withdrawal. A grade of "W" will not affect the student's grade point average. After the posted withdrawal deadline, a grade of "WF" will be assigned for each course withdrawal and will count as GPA hours. If a student is suspended after the deadline for withdrawal with a "W," each instructor shall assign a grade of "WF" or "W" based upon the student's academic performance prior to the suspension. Excluding course withdrawals due to extenuating circumstances, students are limited to a maximum of 16 hours of course withdrawals. After the initial 16 credit hour threshold has been exhausted, students will be required to remain in the course and subject to the grade earned at the conclusion of the semester. Full term withdrawals will not count towards a student's 16-hour course withdrawal threshold.
A student may withdraw from an individual class or classes by the withdrawal

deadline via MySeaport - Students or by reporting to the Office of the Registrar before or on the last day for withdrawal, as indicated in the university calendar. Students participating in abbreviated terms need to be cognizant that the withdrawal period may be very brief. All students should carefully note the last day to withdraw from classes as found in the university calendar.

To withdraw from all classes and the university at any other time during the semester, the student must submit a full term withdrawal request via mySeaport. No withdrawals ("W" or "WF") shall be processed during the final exam period. Refer to the Expenses section of this catalogue for information on the refund policy for complete withdrawal.

Should extenuating circumstances warrant, the grade of "WF" assigned for course withdrawals after the withdrawal deadline may be changed to a '"W". Documented extenuating circumstances may include: death of an immediate family member; traumatic and unforeseen circumstances that are considered beyond a student's control; serious emotional instability, physical injury or illness that has resulted in the student's inability to complete academic responsibilities in a given term. Students should note that poor standing in a course does not constitute an extenuating circumstance in and of itself. Withdrawals due to extenuating circumstances are still subject to all financial aid and SAP rules and calculations.

It is the student's responsibility to initiate an appeal for this change by submitting a written request and supporting written documentation. The student must initiate the appeal with the associate dean who oversees the student's major or Center for Academic Advising director, as appropriate. The Center for Academic Advising may approve or deny this request for a "W." In cases where the request is denied, the student may submit, *within ten regular class days of the dated decision*, a written request for consideration with supporting documentation to the Committee on Withdrawal Appeals. *Grounds for appeals are limited to substantive new evidence or material procedural irregularity*. All decisions made by the Committee on Withdrawal Appeals are final. The written request with supporting documentation must be made as soon as possible after circumstances requiring the withdrawal. At the latest, by the last day of classes in the semester following the one for which the withdrawal is requested. A grade of "WF" that is not appealed successfully remains a permanent part of the student's academic record.

Students should refer to the Scholarships and Financial Aid section related to Policy on Return of Title IV Funds for information about how dropping or withdrawing

impacts financial aid eligibility.

Center for Academic Advising

Center for Academic Advising

UNI 101 - First-Year Seminar

Course Description:
Seminar course designed to support first-year students in optimizing their UNCW experience. With instructor as mentor, approaches to critical thinking are emphasized as students explore the goals of liberal arts learning, academic ethics and strategies, UNCW's common reading, information literacy, self-management, and effective group collaboration.
Credit Hours: 3 Additional Restrictions/Requirements:
Must be taken in the first semester of full-time attendance at UNCW.
University Studies: ["Foundations/First Year Seminar", "Building Competencies/Information Literacy"] Course Repeatability: Course may not be repeated. Maximum Repeatable Hours: 3

UNI 102 - First Yr Seminar-Dept. Partnership

Course Description:
This is a variable credit course 1-3 credits, depending on the need of the department and will either stand alone as a UNI 102 (3 credit course) fulfilling the First Year Seminar requirement or be linked to an Introductory course for the curriculum of the department. This course is designed to ensure that University Studies First Year Seminar requirements are met in connection with partner courses in specific disciplines.
Credit Hours: 1 To 3 Course Repeatability: Course may not be repeated. Maximum Repeatable Hours: 3

UNI 110 - Leadership and Service Seminar

Course Description:
Applied learning experience related to leadership and active citizenship concepts.

Identification of community needs and implementation of effective action that promotes positive social change. Emphasis on critical analysis of the needs of the individual and the community, local and global.
Credit Hours: 1 Prerequisite Courses: UNI 101 Additional Restrictions/Requirements:
Prerequisite course and enrollment in the ExCEL Learning Community.
Course Repeatability: Course may not be repeated. Maximum Repeatable Hours: 1

UNI 120 - Civic Engagement for Pre-Health Students

Course Description:
Prerequisite: Restricted to pre-health students registered with University College pre-professional programs. Civic engagement opportunities and leadership concepts for pre-health students. Applied learning experiences related to civic engagement to include identification of community health care issues and implementation of civic engagement, volunteering, reflection, building leadership skills, and educating others while working towards a successful graduate school application process.
Credit Hours: 2 Additional Restrictions/Requirements:
Sophomore, junior or senior standing and departmental approval required.
University Studies: ["Explorations Beyond the Classroom"] Course Repeatability: Course may not be repeated. Maximum Repeatable Hours: 2

UNI 201 - Transfer Seminar

Course Description:
Open to transfer students during the first semester of full-time enrollment at UNCW. Seminar course designed to support transfer students in transitioning to campus and optimizing their UNCW learning experience. Critical thinking, information literacy skills, discussion, and group collaboration are emphasized as students focus on issues often important to transfer student success and college success in general.
Credit Hours: 3 University Studies: ["Building Competencies/Information Literacy", "Explorations Beyond the Classroom"] Course Repeatability: Course may not be repeated. Maximum Repeatable Hours: 3

Center for Academic Advising

(https://uncw.edu/academics/advising/advising-center/)
The Center for Academic Advising is the first academic home for all first-year and undeclared transfer students. Support is provided for specific student populations

including pre-professional, military, early college, first-year spring admits, and students between majors. Academic advising, curricular programs, and a number of academic support programs are provided by the Center for Academic Advising staff. The Center for Academic Advising is dedicated to providing assistance and support for new students as they transition into the academic environment. Pre-professional student support is co-sponsored between the Center for Academic Advising and the College of Health and Human Services. Pre-professional student support is available for all students and alums looking to pursue graduate and professional degrees in health sciences and law.

Center for Academic Advising

Academic advising is essential to a successful educational experience. Our rich general education program, University Studies, provides our students with a strong academic foundation to build upon as they pursue their major and career interests. Center for Academic Advising advisors work with students to support their transition into a new academic environment. First-Year and undeclared transfer students declare their major once they have fulfilled academic requirements based on their major.

Students are advised by a professional advisor who provides students with guidance and encouragement in selecting courses and deciding on majors, meeting academic requirements, maintaining required scholastic standards, and considering possible career choices. Advisors meet with students whenever needed, however; it is mandatory for students to meet with their advisor at least twice in the first semester and to support student academic transition and course registration.

Center for Academic Advising advisors provide referrals to various specialized support services within the university to assist students in overcoming personal and academic difficulties, exploring academic options, and achieving academic and personal success. Advisors also monitor their students' mid-semester academic progress and end-of-semester grades. Advisors provide students with critical and timely information related to academic policies, procedures and regulations. Students are encouraged to read all communications from their advisor and the Center for Academic Advising. The Center for Academic Advising implements several intervention programs to help students recover from academic difficulty to regain academic eligibility.

Center for Academic Advising Curriculum

The Center for Academic Advisingoffers a number of credit-bearing courses that support students in making a successful adjustment to college life, developing academic skills, and enriching their educational experience:UNI 101 First-Year Seminar,UNI 201 Transfer Seminar

First-Year Seminar UNI 101

The First-Year Seminar is a graduation requirement taken by all First Year students in their first semester of enrollment. The course provides incoming First year students with skills, strategies, resources, and information necessary to make successful academic, personal, and social transitionto UNCW.The learning outcomes of this course assist students in making a successful adjustment to university life, developingeffective academic strategies and problem solving skills, enhancing information literacy competency, establishing an academic plan, and engaging in career exploration. The small class size allows for mentor relationships with instructors and academic advisors.

Transfer Seminar UNI 102

The Transfer Seminar is a 3 credit, elective seminar-style course that supports transfer students in their transition to UNCW. Students earn 6 hours towards graduation – 3 hours of Information Literacy and 3 hours of Explorations Beyond the Classroom. UNI 201 is only open to transfer students in their first semester (fall or spring) at UNCW. Students will leave UNI 201 with an academic and career plan; a résumé and cover letter; academic strategies and skills; knowledge of campus resources, opportunities, and policies; library and research skills; and community with other transfer students, advisors, and peer mentors.

Student-Athlete Support Services is a joint effort between Academic Affairs and the UNCW Athletic Department, which seeks to support the academic enrichment and life skill development of every Seahawk student-athlete. SASS Academic Coordinators work diligently to meet the needs of student-athletes' healthy balance of athletic demands while maintaining satisfactory academic standards.

Once student-athletes are admitted to the university, Student-Athlete Support

Services Academic Coordinators assist them with registration, sequencing and scheduling of required courses, and selection of a major. They also arrange tutoring assistance and monitor student-athletes' grades, class attendance, study habits, and progress toward a degree. When a student-athlete declares his or her major, the Academic Coordinators continue to monitor academic performance and progress in conjunction with the student-athlete's departmental advisor.
Central to the role of SASS is the maintenance of a strong working relationship between the program advisors and the university's athletic department and coaches. The Academic Coordinators are knowledgeable about NCAA and CAA rules that apply to eligibility for practice and competition. They are available for consultation when unusual or difficult rule interpretations are needed. They also play a key role in the athletic certification process for all student-athletes.

Student-Athlete Academic Eligibility Requirements

Student-Athlete Support Services helps to monitor the academic progress of each student-athlete as it relates to NCAA, CAA and institutional rules and regulations. The following are examples of rules applying to a student-athlete's academic progress:

- Student-athletes must be enrolled in no fewer than 12 semester hours (full-time) during the fall and spring semesters to be eligible for practice, competition and financial aid.
- Student-athletes must earn at least six (6) semester hours each semester to be eligible for the following semester.
- Student-athletes must earn 18 semester hours during the regular academic year (fall and spring).
- The NCAA requires student-athletes to maintain progress towards a degree and has set benchmarks they must meet throughout their career. Student-athletes must earn: 24 hours prior to the start of their third semester; 40% of a degree prior to the start of their fifth semester; 60% of a degree prior to the start of their seventh semester; 80% of a degree prior to the start of their ninth semester.
- The NCAA requires a student-athlete to designate a major by the beginning of their fifth semester, or to be
taking major courses that lead to a degree, as certified by the dean or an appropriate academic advisor.
- Student-athletes must meet UNCW and NCAA minimum cumulative grade point averages in

order to compete.
- In order to determine initial athletic eligibility, all student-athletes must be approved through the NCAA Eligibility Center.
- Earn a minimum of 6 credit hours each semester to maintain eligibility for the following semester.
- Earn 18 credit hours during the regular academic year (fall and spring semesters).
- Earn 24 credit hours before the start of the third semester of enrollment.
- Maintain at least a 1.80 cumulative GPA.
- Earn a minimum of 6 credit hours each semester to maintain eligibility the following semester.
- Maintain at least a 1.80 cumulative GPA through the third semester for eligibility the following semester.
- Earn 18 credit hours during the regular academic year (fall and spring semesters).
- Declare a major.
- Meet 40% of degree requirements.
- Maintain at least a 1.90 cumulative GPA.
- Complete a minimum of 6 degree applicable hours each semester for eligibility the following semester.
- Maintain at least a 1.90 cumulative GPA through the fifth semester for eligibility the following semester.
- Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
- Meet 60% of degree requirements.
- Maintain at least a 2.00 cumulative GPA.
- Earn a minimum of 6 degree applicable hours each semester for eligibility the following semester.
- Maintain at least a 2.00 cumulative GPA through the seventh semester for eligibility the following semester.
- Earn 18 degree applicable hours during the regular academic year (fall and spring semesters).
- Earn 80% of degree requirements.
- Maintain at least a 2.00 cumulative GPA.
- University Studies Program

Center for Academic Advising Curriculum

The Center for Academic Advising offers a number of credit-bearing courses that support students in making a successful adjustment to college life, developing academic skills, and enriching their educational experience: UNI 101 First-Year Seminar, UNI 201 Transfer Seminar, UNI 120 Civic Engagement for Pre-Health Students.

First-Year Seminar UNI 101

The First-Year Seminar is a graduation requirement taken by all freshmen in their first semester on campus. The course provides incoming freshmen with skills, strategies, resources, and information necessary to make a successful academic, personal, and social transition to UNCW. The learning outcomes of this course assist students in making a successful adjustment to university life, developing effective academic strategies and problem solving skills, enhancing information literacy competency, establishing an academic plan, and engaging in career exploration. The small class size allows for mentor relationships with instructors and academic advisors.

Transfer Seminar UNI 201

The Transfer Seminar is a 3 credit, elective seminar-style course that supports transfer students in their transition to UNCW. Students earn 6 hours towards graduation – 3 hours of Information Literacy and 3 hours of Writing Intensive Competencies. UNI 201 is only open to transfer students in their first semester (fall or spring) at UNCW. Students will leave UNI 201 with an academic and career plan; a résumé and cover letter; academic strategies and skills; knowledge of campus resources, opportunities, and policies; library and research skills; and community with other transfer students, advisors, and peer mentors.

Civic Engagement for Pre-Health Students UNI 120

Civic Engagement for Pre-Health Students is a course designed to facilitate civic engagement for pre-health students. Students will gain a better understanding of becoming an engaged citizen in the pre-health community by volunteering, reflecting on experiences, building leadership skills and educating others. This course will provide pre-health students with opportunities to engage in meaningful service in the local community and gain a broad understanding of strong leadership that can impact change in healthcare while preparing for a successful graduate school application process. This course fulfills the Explorations Beyond the Classroom graduation requirement.

About the Center for Academic Advising

Academic advising is essential to a successful educational experience. Our rich general education program, University Studies, provides our students with a strong academic foundation to build upon as they pursue their major and career interests. Center for Academic Advising advisors work with students to support their transition into a new academic environment. Freshmen and undeclared transfer students declare their major once they have fulfilled appropriate requirements based on their major.

Students are advised by a professional advisor who provides students with guidance and encouragement in selecting courses and deciding on majors, meeting academic requirements, maintaining required scholastic standards, and considering possible career choices. Advisors meet with students whenever needed, however; it is mandatory for students to meet with their advisors at least twice in their first semester and once thereafter to assist with their academic transitions and to plan for course registration.

Center for Academic Advising advisors can provide students with referrals to various specialized support services within the university to assist them in overcoming personal and academic difficulties, exploring academic options, and achieving academic and personal success. Advisors also monitor their students' mid-semester academic progress and their end-of-semester grades and support students who are looking for new opportunities or experiencing academic difficulty. Advisors provide students with critical and timely information related to academic policies, procedures and regulations. Students are encouraged to read all communications from their advisor and Center for Academic Advising. The Center for Academic Advising implements several intervention programs to help students recover from academic difficulty to regain academic eligibility.

Pre-Professional Programs

Center for Academic Advising and the College of Health and Human Services jointly offers Pre-Professional Programs including one-on-one advising, programming and courses for all students interested in pursuing a graduate degree in legal education or admission to a professional school of health. Advisors are available by appointment or during drop-in hours and can assist students with navigating application timelines, requirements, and program prerequisites. Students are encouraged to get involved with volunteer opportunities, leadership roles in campus

clubs and organizations, and take advantage of the Pre-Professional Programs' curricular programs and workshops that are offered to enhance their candidacy for graduate programs. Students can enroll with Pre-Professional Programs electronically by logging into MySeaport. For more information regarding pre-professional advising at UNCW, visit the Pre-Professional Programs website at www.uncw.edu/preprofessional or call (910) 962-3245.

Pre-Health

Students who are considering graduate programs in Allopathic Medicine, Chiropractic, Dentistry, Occupational Therapy, Optometry, Osteopathic Medicine, Pharmacy, Physical Therapy, Physician Assistant, Podiatry, Public Health, and Veterinary Medicine are considered pre-health students. Pre-Health is not a major and students are not required to major in science to pursue a pre-health profession. While many students pursue majors in the natural sciences, they do so because of their interest in those fields rather than strictly to prepare for graduate school. Students can choose to declare any major and remain eligible for graduate school as long as the student satisfies the prerequisite courses necessary for admission.

Undeclared students with less than 24 credit hours can find course recommendations available on the Pre-Professional Programs website: at https://uncw.edu/preprofessional/prehealth/iDeclndex.html.

Declared students with 24 or more credit hours can find more information about Pre-Health Programs as well as setting an appointment with a Pre-Health Coach on the Pre-Health Programs website at: https://uncw.edu/preprofessional/prehealth/iDeclndex.html.

Pre-Law

Students who plan to prepare for law school may select a major in any discipline that fulfills the requirements for a baccalaureate degree at UNCW. The College of Humanities, Social Sciences, and the Arts offers a pre-law minor designed to prepare students with the foundational knowledge, critical thinking abilities, and other essential skills to success in the field of law.

Students should be aware of the Association of American Law Schools'

recommendation to identify basic skills and insights it believes fundamental to the later attainment of legal competence. These are (a) comprehension and expression in words; (b) critical understanding of human institutions and values with which the law deals; and (c) creative power in thinking. In order to develop these capacities, the association recommends a pre-legal education of the "broadest scope." To accomplish these goals, UNCW offers a wide range of pre-law courses. Regardless of the major, the pre-law student should be zealous in the selection of electives that will facilitate critical understanding of economic, political, and social institutions. Additional recommendations are available on the Pre-Professional Programs website at https://uncw.edu/academics/advising/university-college/student-populations/preprofessional/

University Studies

The University of North Carolina Wilmington offers undergraduate programs leading to the Bachelor of Arts, the Bachelor of Fine Arts, the Bachelor of Music, the Bachelor of Science, the Bachelor of Science in Nursing, and the Bachelor of Social Work degrees. Graduate programs lead to the Master of Arts, Master of Arts in Teaching, Master of Business Administration, Master of Education, Master of Fine Arts in creative writing, Master of Public Administration, Master of School Administration, Master of Science, Master of Science in Accountancy, Master of Science Nursing, Master of Social Work, Doctor of Education in educational leadership, Doctor of Nursing Practice and Doctor of Philosophy in marine biology and applied and experimental psychological science degrees. Professional undergraduate programs include those offered in the Cameron School of Business, the Watson College of Education, and the College of Health and Human Services (School of Health and Applied Human Services, School of Nursing, and School of Social Work). Pre-professional programs are offered in allied health, health-related careers, dentistry, law, medicine, optometry, pharmacy, physical therapy, podiatry and veterinary medicine. The university offers special programs in marine and environmental sciences, 2+2 and 3+2 programs in engineering, as well as a number of opportunities for students to enrich their course of study throughout their academic careers as undergraduates.

University Studies Program

–

The University Studies Program at UNCW encourages students to begin a life-long journey of engaged inquiry and societal contribution. As a consciously integrated component of each student's overall educational experience, the program reflects our institution's fundamental commitment to fostering ethical and intellectual development and to promoting the growth of well-informed, creative, literate members of society. The University Studies Program first establishes the basis of an essential liberal education through a multi-faceted exploration of our diverse intellectual heritage. As it extends through each student's educational career, the University Studies Program builds upon this foundation through a course of study designed to cultivate the skills and capacities students require to respond to and anticipate the complexities of modern citizenship in an inclusive and creative manner.

Students who meet the requirements of the University Studies program will:

Goal 1.	Acquire foundational knowledge, theories and perspectives in a variety of disciplines (*Foundational Knowledge*);
Goal 2.	Engage in rigorous, open-minded and imaginative inquiry (*Inquiry*);
Goal 3.	Locate, evaluate, and effectively use information by applying a variety of academic and technological skills (*Information Literacy*);
Goal 4.	Integrate multiple methods and perspectives to critically examine complex problems (*Critical Thinking*);
Goal 5.	Effectively express meaningful ideas in speech and writing (*Thoughtful Expression*);

Students who have not qualified for advanced placement but who because of special circumstances may have writing competencies equal or superior to those required in ENG 101, ENG 103, or ENG 201 may present evidence of these writing competencies to the chairperson of the Department of English and request a waiver. At the chair's discretion, either or both requirements may be waived. This waiver does not grant academic credit.

First-Year Seminar

Students who meet any of the following conditions will be waived from the UNI 101 requirement:

- Transfer students.
- Re-enrolling students who have returned and have 27 hours of academic credit (UNCW and transfer credit).
- The Associate Provost for Academic Advising will determine if an academically ineligible re-instated student needs to meet this requirement.

Mathematics

Students who have not qualified for advanced placement but who may have competencies equal or superior to those required for successful completion of MAT 151 or MAT 161 may, at the discretion of the chairperson of the Department of Mathematics and Statistics, take a waiver examination for either of these courses. An acceptable score on this exam waives the requirement that one of the introductory mathematics courses be taken. This waiver does not grant academic credit.

Lifetime Wellness

Students who meet either of the following conditions will be waived from the Lifetime Wellness requirement: 1.) Current military personnel or veterans who have served two or more years active duty; and 2.) students who are 55 or older.

Students with Existing Degrees

For students who already possess an undergraduate degree from an accredited college or university that is not part of the UNC system, the Director of University Studies (or her/his designee), after consultation with the chair(s) of the academic unit(s) through which the student is pursuing the second degree, will determine the extent to which the previous course work meets the spirit of UNCW's current University Studies requirements and will determine any remaining requirements to be completed.

Students who are transferring to UNCW for a second baccalaureate after having earned a baccalaureate at any UNC system institution will be given a waiver for all University Studies requirements in the Core Curriculum, as well as three credits each in the Writing Intensive and the

Information Literacy competencies.

Required Physical Activity as part of the Lifetime Wellness Requirement

As part of the Lifetime Wellness requirement (currently fulfilled only by WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen), you will be required to participate in physical activity. It is strongly suggested that you visit a medical professional and obtain a physical prior to the beginning of WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen. If you have not previously had a physical within 14 months of the start of class, you may be required to obtain a physical and place it on file with the Student Health Center prior to being allowed to participate in the class. This decision will be based upon information you will provide your instructor on the first day of class. If a physical is required, you will have 14 days to complete the physical in order to continue in the course. Failure to obtain a physical after being instructed to do so could result in being dropped from WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen. Any restrictions placed on your participation following a physical, however, will not adversely affect your grade.

University Studies Waiver

North Carolina Community College transfer students, who have earned an AA, AS, AE, AFA, AATP, or ASTP degree meeting the requirements of the North Carolina Comprehensive Articulation Agreement (CAA)will receive a waiver of all University Studies requirements in the Core Curriculum, as well as three credits each in the Writing Intensive and the Information Literacy competencies.
Students transferring from a UNC system institution who have completed the General Education requirements at that institution will receive a waiver of all University Studies requirements in the Core Curriculum, as well as three credits each in the Writing Intensive and the Information Literacy competencies.
All other transfer students will be held to University Studies in its entirety.

University Studies Program

University Studies Program

The University Studies Program at UNCW encourages students to begin a life-long journey of engaged inquiry and societal contribution. As a consciously integrated component of each student's overall educational experience, the program reflects our institution's fundamental commitment to fostering ethical and intellectual development and to promoting the growth of well-informed, creative, literate members of society. The University Studies Program first establishes the basis of an essential liberal education through a multi-faceted exploration of our diverse intellectual heritage. As it extends through each student's educational career, the University Studies Program builds upon this foundation through a course of study designed to cultivate the skills and capacities students require to respond to and anticipate the complexities of modern citizenship in an inclusive and creative manner.

Students who meet the requirements of the University Studies program will:

Goal 1. Acquire foundational knowledge, theories and perspectives in a variety of disciplines (*Foundational Knowledge*);

Goal 2. Engage in rigorous, open-minded and imaginative inquiry (*Inquiry*);

Goal 3. Locate, evaluate, and effectively use information by applying a variety of academic and technological skills (*Information Literacy*);

Goal 4. Integrate multiple methods and perspectives to critically examine complex problems (*Critical Thinking*);

Goal 5. Effectively express meaningful ideas in speech and writing (*Thoughtful Expression*);

Goal 6. Demonstrate basic proficiency in speaking, listening, writing and reading in a language in addition to English (*Foreign Language*);

Goal 7. Describe and examine the importance and implications of human diversity (*Diversity*);

Goal 8. Describe and examine the intellectual and ethical responsibilities of active global citizenship (*Global Citizenship*).

Required Physical Education
Transfer Students and University Studies

University Studies Requirements:

Any courses added to University Studies *during* and *after* a student's catalogue year are **eligible to fulfill** University Studies requirements. If a student takes a course *before* its addition to University Studies, the course *may not* automatically fulfill University Studies requirements. Transfer courses fulfill University Studies requirements based on the date of their catalogue year.

Curriculum Categories:

The Core Curriculum

I. Foundations
II. Approaches and Perspectives

Other Requirements

III. Building Competencies
IV. Explorations Beyond the Classroom
V. Critical Reasoning

Waiver of Requirements:

English:

Students who have not qualified for advanced placement but who because of special circumstances may have writing competencies equal or superior to those required in ENG 101, ENG 103, or ENG 201 may present evidence of these writing competencies to the chairperson of the Department of English and request a waiver. At the chair's discretion, either or both requirements may be waived. This waiver does not grant academic credit.

First-Year Seminar

Students who meet any of the following conditions will be waived from the UNI 101 requirement:

- Transfer students.
- Re-enrolling students who have returned and have 27 hours of academic credit (UNCW and transfer credit).
- The Director of University College will determine if an academically ineligible re-instated student needs to meet this requirement.

Mathematics:

Students who have not qualified for advanced placement but who may have competencies equal or superior to those required for successful completion of MAT 151 or MAT 161 may, at the discretion of the chairperson of the Department of Mathematics and Statistics, take a waiver examination for either of these courses. An acceptable score on this exam waives the requirement that one of the introductory mathematics courses be taken. This waiver does not grant academic credit.

Lifetime Wellness:

Students who meet either of the following conditions will be waived from the Lifetime Wellness requirement: 1.) Current military personnel or veterans who have served two or more years active duty; and 2.) students who are 55 year of age or greater.

Students with Existing Degrees:

For students who already possess an undergraduate degree from an accredited college or university, including UNCW, the dean of Undergraduate Studies (or her/his designee), after consultation with the chair(s) of the academic unit(s) through which the student is pursuing the second degree, will determine the extent to which the previous course work meets the spirit of UNCW's current University Studies requirements and will determine any remaining requirements to be completed.

Students who are transferring to UNCW for a second baccalaureate after having earned a baccalaureate at any UNC institution with a general education requirement will be given a waiver for the following University Studies requirements: First Year Seminar, Composition; Lifetime Wellness; Mathematics and Statistics; Aesthetic, Interpretive, & Literary

Perspectives; Historical and Philosophical Approaches; Scientific Approaches to the Natural World; and Understanding Human Institutions and Behaviors. For the foreign language requirement, all students should first consult with the dean of the College of Humanities, Social Sciences, and the Arts.

Required Physical Activity as part of the Lifetime Wellness requirement:

As part of the Lifetime Wellness requirement (currently fulfilled only by WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen), you will be required to participate in physical activity. It is strongly suggested that you visit a medical professional and obtain a physical prior to the beginning of WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen. If you have not previously had a physical within 14 months of the start of class, you may be required to obtain a physical and place it on file with the Student Health Center prior to being allowed to participate in the class. This decision will be based upon information you will provide

your instructor on the first day of class. If a physical is required, you will have 14 days to complete the physical in order to continue in the course. Failure to obtain a physical after being instructed to do so could result in being dropped from WPA 101 Wellness and Physical Activity and WPAL 101 WPAL 101 - Wellness and Physical Activity Lab - Olsen. Any restrictions placed on your participation following a physical, however, will not adversely affect your grade.

Transfer Students and University Studies

North Carolina Community College transfer students, who have earned an AA or AS degree meeting the requirements of the North Carolina Comprehensive Articulation Agreement (CAA) will receive a waiver of Foundations and Approaches & Perspectives requirements with the exception of Lifetime Wellness; foreign language; and 3 credits from Living in Our Diverse Nation or Living in a Global Society. They will also receive a waiver of 3 credits each of Writing Intensive, Information Literacy and Critical Reasoning competency requirements. AS and AA degree-holding transfer students will be held to all other University Studies requirements. All other transfer students will be

held to University Studies in its entirety, with the exception of First Year Seminar.

University Studies includes both lower division general education components and graduation requirements related to the major. For those articulation agreements specifying transfer of lower division general education requirements, lower division general education components of University Studies include: Foundations, Approaches & Perspectives (only 3 credits of Living in Our Global Society or Living in Our Diverse Nation may apply as lower division credit), 3 credits of Critical Reasoning, 3 credits of Writing Intensive Competency, and 3 credits of Information Literacy Competency. Note that other credit meeting University Studies requirements may transfer on a course-by-course basis and some courses may be exempted by specific agreements (e.g. lifetime wellness and foreign language requirements by the Comprehensive Articulation Agreement).

Undergraduate Degrees Offered By Type

Major

Art History, B.A.

The Art History major provides a dynamic and diverse pathway for studying the Arts and the historical contexts in which they were produced. Art History is a truly multidisciplinary major, one where students learn and work within the tenets of History, Philosophy, Sociology, Psychology, and Anthropology, among others. A major in Art History develops critical and analytical thinking, enhances oral and written communication skills, develops a broadened world view and historical perspective, and more. Majors will discover that a wide variety of career options are available to them thanks to the skill set with which they will leave UNCW.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.A. degree in Art History, a student must successfully complete an oral defense of their research in ARH 476 .

Applied Learning Requirement

To satisfy the applied learning requirement for the B.A. degree in Art History, a student must successfully complete ARH 476.

Requirements for a Major in Art History for the B.A. Degree

Core Courses (12 Credit Hours)

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 204 - Art of the Modern World

Examination of major monuments, artists, and artistic developments from the 19th to the late 20th century, primarily in Europe and the Americas. Study of the relationship between works of art and the historical,

political, religious, and philosophical context of the societies that produced and made use of them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 476 - Art History Capstone Seminar

Integration of principles, theories, and methods learned throughout the art history major. Students creatively analyze, synthesize, and evaluate learned knowledge in a research project with a focus that changes yearly. The course culminates in a research paper and art exhibition (directed by one faculty member), working with original art and artifacts presented in a venue on the UNCW campus, and concluding in an oral defense presentation.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Senior

standing.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Required Core Elective Courses (12 Credit Hours)

12 hours in Art History at the 300-400 level according to the distribution requirements listed below:

3 Credit Hours: Pre-1600 (300 level)

ARH 300 - Egyptian Art

A study of the art and culture of ancient Egypt, from 3000 BC to the third century BC. Emphasis on architecture, sculpture, and painting as related to Egyptian history, culture, and religion.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 301 - Ancient Greek Art

A study of the art of the Aegean and ancient Greece, from 3000 B.C. to the first century B.C. Emphasis on architecture, painting, and sculpture as related to ancient history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 302 - Ancient Roman Art

A study of the art of Etruria and Rome from the sixth century B.C. to 350 A.D. Emphasis on architecture, painting, and sculpture as related to ancient history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 303 - Medieval Art

Study of European art from Early Christian times through the Gothic period in Europe. Emphasis on architecture, painting, sculpture, and graphics as related to medieval history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 304 - Northern Renaissance Art

Study of the art in Northern Europe, exclusive of Italy, from 1200 to 1600 A.D. Emphasis on architecture, painting, sculpture, and graphics as related to the history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of

instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 305 - Italian Renaissance Art

Study of art in Italy from 1200 to 1600 A.D. Emphasis on architecture, painting, sculpture, and graphics as related to history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ARH 321 - Art and Archaeology of the Ancient Near East

Study of art and archaeology as well as the history of Ancient Near East (Mesopotamia, Syria, Turkey, Iran) beginning with state formation in the 4th millennium BCE and ending with the Persian Empire in the 4th

century BCE.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 380 - Early Christian and Byzantine Art

Study of early Christian visual culture from the Late Roman through the Byzantine Empire, concluding with images of the 8th century iconoclastic controversy.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 381 - Classical Myth in Western Art

Exploration of how Greek mythological stories have been used in the Western artistic tradition, following key mythological figures who regularly appear in art from the tenth century BCE to today, addressing changes in tradition, narrative, and intent.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

3 Credit Hours: Since 1600 (300 level)

ARH 306 - Baroque & Rococo Art

Study of the aesthetic, social, and political dimensions of Baroque and Rococo art from its origins in Europe through its diffusion into the Americas, Africa, and Asia. Focus on visual and material culture characterized by the expanding trade networks, colonization, technological innovations, and religious reform of the global Baroque period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ARH 307 - Nineteenth Century European Art

Study of nineteenth century European art with an emphasis on architecture, painting, sculpture, and graphics as related to European history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 309 - Art of the United States

Study of art in the United States from first explorations to World War II, exclusive of that produced by indigenous peoples. Emphasis on architecture, painting, sculpture, and graphics as related to history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ARH 311 - Contemporary Art

Broad survey of contemporary art from 1960 to the present. Western (American, European) art will be considered alongside art from other regions of the world such as Asia, Africa, and the Middle East. Special emphasis will be placed on the relationship between contemporary art and the social contexts and changes that mark this period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ARH 312 - Women in Art

Historical survey of women artists and their artistic contributions, as well as an examination of the religious, mythological, and secular images of women in art.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

ARH 313 - Modern Architecture & Urbanism

Study of the built environment globally from the 19th century until today. Considers modernity in relation to architecture, urbanism, and the theories of these disciplines. A chronological and thematically organized examination of key movements, architects, projects, debates, and technologies.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204.
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 314 - Art of the Cold War, 1945-1989

Examination of the major artistic developments of the mid-twentieth century during the Cold War period. Exploration of significant currents of art production, key players, movements, and institutions on a global scale,

reflecting the worldwide implications of Cold War tensions.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 320 - African Art

Study of sub-Saharan African art and architecture from prehistoric times to the present. Special emphasis placed on form, content, function, and meaning, as well as the impact of African art on modern and African American art.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of

Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 325 - Islamic Art

Study of the art and architecture of the Islamic world from the 7th century to the 17th century. Emphasis on architecture, painting, and metal arts as related to the history and culture of Muslim peoples. Special attention is focused on intersection and exchange between Islam and the west.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 330 - Art of the Non-Western World

Study of the history of art and diverse cultures in Asia, the Islamic World, the Americas, Oceania, and Africa. Emphasis on objects of fine art and material culture placed within their cultural contexts.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 384 - History of Graphic Design

Examines the evolution of graphic design from prehistory through postmodern design and the digital revolution. Explores the history of visual communication as developed by ancient cultures through the present day with an emphasis on commercial design, illustration, typographic development and technological invention.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of

Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 385 - History Of Printmaking

Survey of printed pictures from the 15th century to the present. Emphasis on the evolution of printmaking with specific attention to its practical applications, as well as its function as fine art.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 386 - History of Photography

Introduction to the history of photography from its invention in 1839 until the present day. Emphasis on the development of techniques, imagery, and aesthetics of photography as art and documentation.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 391 - Introduction to Art Museums

Introduction to the history and theory of art museums and cultural institutions dedicated to the preservation and exhibition of art, visual and material culture. Critical examination of art museums through topics including curating, education, ethics, contemporary issues, and technology.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204.
Course Repeatability: Course may not be repeated.

6 Credit Hours: Special Topics (400 level)

ARH 401 - Special Topics in Ancient Art

Research and exploration of select themes in Ancient art. Examples of themes: Greek Sculpture, Roman Sculpture, Pompeii.

Credit Hours: 3

Prerequisite Courses: ARH 201 and ARH 202 and ARH 204, or consent of the instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ARH 402 - Special Topics in Medieval and Early Modern Art

Research and exploration into selected themes in Medieval and Early Modern art, such as the Gothic cathedral, pilgrimage arts, manuscripts and incunabula; Jan van Eyck or other specific artists.

Credit Hours: 3

Prerequisite Courses: ARH 201 and ARH 202 and ARH 204, or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 403 - Special Topics in the Art of the Modern World

Research and exploration into selected themes in Modern and Contemporary art from a global perspective, beginning with the Impressionists and including women and artists of color. Investigation and discussion of aesthetics in cultural, social, religious, and/or political contexts.

Credit Hours: 3

Prerequisite Courses: ARH 201 and ARH 202 and ARH 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Elective Courses (18 Credit Hours)

•A minimum of 9 hours of additonal 300-400 level ARH courses.

•A maximum of 9 hours of supporting area courses

(300-400 level). Supporting area courses must be related to ARH field of study as approved by faculty advisor.

Total Credit Hours: 42

Additional Information

No more than 3 hours of ARH 491 or 3 hours of ARH 498 may be counted toward the major.

A grade of C or better is required for each course counted toward the major.

To complete a double major in art history and studio art, a student must completeART 101, ART 102, ART 111,ART 203, ART 211, ART 476, and 21 hours chosen from at least two different studio areas.

Bachelor of Science in Nursing, B.S.N.

The baccalaureate program in the School of Nursing is approved by the North Carolina Board of Nursing and

accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street, NW, Suite 750, Washington, DC 20001, (202) 887-6791.In order to be eligible to begin practice as a registered nurse, each graduate must obtain a satisfactory score on the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

The purpose of the baccalaureate program in nursing is to prepare a generalist who possesses the knowledge, skills, and competencies with which to practice family-centered nursing in a variety of current and emerging health care delivery systems. In addition, the program is designed to provide a foundation for graduate nursing education. Through interactions with clients–individual persons, families and communities–and other health care professionals, nursing graduates will contribute toward meeting the wide-ranging needs of the region, state, and the larger community.

Students in the nursing major must select one of three options: prelicensure for individuals who are not already licensed as registered nurses, RN-BSN (Registered Nurse to Bachelor of Science) for individuals who possess the registered nurse license, or Accelerate (2nd Degree) for those individuals who

possess a bachelors degree in another field and are not already licensed as registered nurses. The program of study for the School of Nursing as described in this catalogue, is consistent with national accreditation standards, and approved by the North Carolina Board of Nursing, the University Curriculum Committee, and the Faculty Senate.

Curriculum Plan:

The learning outcomes of the BSN curriculum program outcomes align with the new AACN Essentials, Code of Ethics, and QSEN.

Student Learning Outcomes:
1) Demonstrate foundational clinical judgement and innovative practice by integration, translation, and application of nursing knowledge. (AACN:1, COE: 1&4)
2) Apply evidence based, individualized holistic care to achieve positive health outcomes. (AACN:2, COE 1,2,3, QSEN 1)
3) Collaborate with other health professionals, community partners and the public to protect human rights, promote health and reduce health disparities. (AACN:3, COE 8)
4) Apply evidence-based knowledge to advance

individual and population health. (AACN:4, COE:7, QSEN:3)
5) Integrate safety and quality as essential components of practice. (AACN:5, COE:3, QSEN 4&5)
6) Promote interprofessional collaboration with care team members, patients, families, and communities to optimize care. (AACN:6, COE: 6&8, QSEN:2)
7) Integrate knowledge of healthcare systems through innovation and evidenced-based practice to optimize care. (AACN:7, COE: 1,3,4,7,8,9)
8) Utilize informatics and healthcare technology to improve delivery of nursing care. (AACN:8, COE:4, QSEN:6)
9) Integrate nursing values and integrity to promote social justice in professional nursing practice and health policy. (AACN:9, COE: 4,5,9)
10) Engage in behaviors that foster personal health, resilience, well-being, lifelong learning and support the acquisition of nursing expertise and leadership skills. (AACN:10, COE:5,7,9)

B.S.N., Bachelor of Science in Nursing, Prelicensure Option

Program Coordinator: Melissa D. Scott, PhD, RN, CNEcl

(Nursing (BSN) Prelicensure I UNCW)

Requirements for the B.S.N. Degree, Prelicensure Option:

Prerequisite Courses: (31-34 Credits)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions, confidence intervals, hypothesis testing, correlation and regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

or

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

or

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

or

PSY 225 - Introductory Statistics for the Behavioral Sciences

Introduction to the statistical techniques most often used by behavioral scientists for either descriptive purposes or hypothesis testing. Parametric techniques are emphasized, but nonparametric tests are included.

Credit Hours: 6

Prerequisite Courses: PSY 105 and (MAT 101 or higher [excluding MAT 105, MAT 141, and MAT 142],

STT 210, or STT 215) and (BIO 105 or BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Class is restricted to students with Junior standing (or above).

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Psychology

Choose one of the following:

PAR 101 - The Big Questions: Introduction to Philosophy

Introduction to various philosophers and philosophical problems from historical, critical, and other perspectives. Addresses the big questions of human existence, such as: What is right and wrong? Does God exist? How do we know anything about the world around us? Students learn what a philosophical question is and discover just how pervasive philosophical assumptions are in life.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 115 - Introduction to Ethics

An introduction to fundamental principles, theories, and problems in ethics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 205 - American Philosophy

A survey of American philosophical thought from colonial times to the present. Readings from such American thinkers as Jonathan Edwards, the Federalist authors, Thoreau, James, Dewey and Quine.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PAR 211 - Philosophy of Human Nature

A survey and evaluation of past and present theories of human nature; to include such topics as nature and culture, freedom and rationality, issues in gender identity, and theories of education and human development.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

Choose one of the following:

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Note:

Completion of these courses will satisfy university studies requirements in the social and behavioral sciences and the natural and mathematical sciences.

Core Courses (54 Credits):

NSG 300 - Health Assessment and Core Nursing Concepts

This course introduces the student to the core concepts of nursing that are essential to the role of the professional nurse in caring for individuals, families, and communities. The course will focus

on normal assessment skills across the lifespan as a component of core nursing care. Didactic concepts will be applied in the laboratory setting for demonstration of assessment skills using varying degrees of technology.

Credit Hours: 4 (3 lecture/1 lab)

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 302 - Foundational Nursing Care of Adults

This course introduces the student to the core concepts of nursing essential to the role of the professional nurse when caring for adult patients, their families, and communities in a variety of clinical settings. Course content will emphasize foundational, evidenced-based skills using the nursing process, and techniques of safe nursing practice for health promotion.

Credit Hours: 1 To 5

Additional Restrictions/Requirements: Admission to

the Undergraduate Nursing Program.
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation Fee Additional Student Fee Link

Major Restriction Nursing

NSG 304 - Introduction to Professional Nursing

This course introduces the student to the core concepts of professional nursing. Course content includes nursing history, theory and an introduction to American Nurses Association Code of Ethics, legal standards of the nursing scope of practice through regulatory bodies and evolving issues in the profession. Students will learn the quality safety standards education for nurses and the standards for interprofessional collaboration.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program.
University Studies: Writing Intensive

Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 306 - Pathopharmacology I

Introduces basic concepts of pathophysiology and pharmacotherapeutics, building on basic anatomy and physiology, microbiology, and chemistry content obtained from earlier courses. The pathophysiology of common disease conditions affecting human beings across the lifespan are explored. This course also examines basic drug classifications, concepts and principles of pharmacology with special consideration for the nursing role in developing a comprehensive approach to the clinical application of drug therapy.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 311 - Focused Care for Adults Across the Lifespan

This course will build on previous concepts of adult nursing and special populations across the life span (including women's health and geriatrics) that are essential to the role of the professional nurse in caring for individuals, families, and communities. The course will focus on complex adult assessment skills as a component of core nursing care, and the nursing process. Didactic concepts will be applied in the laboratory setting for demonstration of assessment skills using varying degrees of technology.

Credit Hours: 3 (2 lecture/1 lab)

Prerequisite Courses: NSG 300, NSG 302 (C or better).
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation FeeAdditional Student Fees Link

NSG 313 - Nursing Care of Women's Health Across the Lifespan

This course introduces core concepts of nursing essential to the role of the professional nurse caring for

women across the lifespan. The course content will assist the learner in improving health promotion and restoration for women through all phases of life, including the care of women in the prenatal, perinatal, and postnatal periods. Professional nursing values of patient centered care, lifelong learning and quality improvement are components of classroom and clinical learning. Newborn nursing assessment will be included as part of the complete postpartum (includes mother/baby/family) phase. Applications of concepts and essential psychomotor skills are demonstrated in clinical experiences working with culturally diverse families.

Credit Hours: 3 (2 lecture/1 clinical)

Prerequisite Courses: NSG 300, NSG 302, NSG 306 (C or better).
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 314 - Nursing Care of Children

This course introduces core concepts of nursing essential to the role of the professional nurse caring for

children and their families, in the child's natural environments (i.e. home or school) within the community and in acute care settings. Content will include strategies for improving child health status based on diverse needs of the child and their family, in the context of the child's situational environment. Professional values of patient and family centered care, life-long learning, and quality improvement will be emphasized. Essential psychomotor skills will be applied via experiences caring for children in a variety of clinical agencies.

Credit Hours: 4 (2 lecture/2 clinical)

Prerequisite Courses: NSG 300, NSG 302, NSG 306 (C or better)
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 319 - Pathopharmacology II

This course builds on basic concepts of pathophysiology and pharmacotherapeutics from earlier courses. The pathophysiology of disease conditions affecting human beings across the lifespan

are explored, along with pharmacotherapeutics related to these disease conditions. Nursing implications relative to the utilization of drug therapy are examined.

Credit Hours: 3

Prerequisite Courses: NSG 306 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 317 - Introduction to Evidence Based Practice and Research

Course content includes an overview of current issues in knowledge development in nursing including the process of research utilization and evidence-based practice. Student will conduct analytic critiques of the research literature for scientific merit, synthesize these critiques for application to practice, and develop strategies for providing leadership to make evidence-based practice a reality in current and future work settings.

Credit Hours: 3

Prerequisite Courses: NSG 304 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 422 - Mental Health Nursing Across the Lifespan

This course introduces core concepts of nursing essential to the role of the professional nurse caring for patients with mental health disorders across the lifespan. The course content will include health promotion and restoration for the patients and their families, along with professional values of patient centered care, lifelong learning, and quality improvement. Applications of concepts and essential therapeutic communication and psychomotor skills are demonstrated in clinical experiences working with

culturally diverse patients in various agencies.

Credit Hours: 3 (2 Lecture/1 clinical)

Prerequisite Courses: NSG 311 , NSG 314, NSG 319 (C or better).
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 424 - Nursing Leadership and Management

Introduces core concepts of leadership and management for the professional nurse. The course will focus on leadership and management theories, health systems organization, role development, and the legal and ethical considerations that impact care delivery and quality.

Credit Hours: 3

Prerequisite Courses: NSG 317 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.

Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 430 - Population and Public Health Nursing

This course introduces the student to the core concepts essential to the role of the professional nurse in population health. The course focuses on health promotion, and disease and injury prevention based on determinants of local, national, and global health. Content is guided from theories in nursing, psychology, and sociology. Course content will examine how health care delivery systems, public health agencies, and community-based organizations collaborate for health promotion, risk reduction, and disease management and control in vulnerable populations

Credit Hours: 3 (2 lecture/1 clinical)

Prerequisite Courses: NSG 313, NSG 314, NSG 426 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 426 - Acute and Complex Nursing Care of Adults

This course will build upon core nursing concepts essential to the role of the professional nurse when caring for individuals, families, and communities with complex health problems. This course will focus on advanced concepts and response to changes in condition for patients with acute and chronic illnesses. Emphasis will be placed on the nursing process, clinical reasoning and professional integrity. Advanced psychomotor skills and concepts in nursing care will be applied in lab and various clinical experiences.

Credit Hours: 6 (3 lecture/3 clinical)

Prerequisite Courses: NSG 311, NSG 313, NSG 317,

NSG 319 (C or better).
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation Fee Additional Student Fee Link

Major Restriction Nursing

NSG 432 - Advocacy and Policy

This course focuses on social, psychological, economic, political, legal, ethical, and diverse environments which shape health care delivery systems in the United States. There will be critical analyses related to health policy, health care reform, health care systems, and determinants of health. It also explores how the nurse can advocate for change in health policy.

Credit Hours: 3

Prerequisite Courses: NSG 424 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 434 - Capstone: Prioritization and Application of Nursing Care

Synthesizes information from previous courses to prepare the student for transition to practice. This course is designed to enhance the prioritization and reasoning skills needed by the nurse to manage, coordinate, and deliver safe patient-centered care. Through classroom activities and a one-to-one preceptorship with an experienced registered nurse, the student will refine psychomotor skills and deliver care that demonstrates sound clinical judgements and professional values.

Credit Hours: 5 (2 lecture/3 clinical)

Prerequisite Courses: NSG 422, NSG 426 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation Fee

Major Restriction Nursing

Nursing Electives: (6 Credits)

Must take 2 of the 4 nursing electives offered.

NSG 451 - Pediatric Nursing Care: Beyond the Basics

Building upon previous coursework related to family-centered care, ethics, and evidence-based practice, this course will equip students with specialized knowledge to advance their care of pediatric patients. Focus will include communication with interdisciplinary care team members as well as current best practice guidelines for the pediatric population. Concepts of pediatric advanced life support, family nursing assessment for the complex pediatric client, service/applied learning projects.

Credit Hours: 3

Prerequisite Courses: NSG 314, NSG 319 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 452 - Mental Health Care: Beyond the Basics

Appraise the impact of bias and stigma in the care of mental health disorder/s by examining the perspectives of mental illness from popular culture, healthcare providers, and patients. Students will focus on mitigating this bias and improving treatment from both an individual and population health focus.

Credit Hours: 3

Prerequisite Courses: NSG 422 (C or better).
Additional Restrictions/Requirements: Minimum

grade of C or better. May only be taken in final semester of nursing school.

Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 453 - Clinical Reasoning for Critical Patients

Focuses on the development and application of advanced concepts in the management of critically ill adults. The course is designed to enhance clinical reasoning, critical thinking, and skill development for nursing students aspiring to work in the emergency department and/or critical care setting. There will also be an emphasis on the nurse's role as an interdisciplinary team member and delivering patient centered care while incorporating clinical guidelines and protocols to ensure professional performance and values within legal and ethical frameworks.

Credit Hours: 3

Prerequisite Courses: NSG 426 (C or better).
Additional Restrictions/Requirements: Minimum

grade of C or better. Can only be taken in final semester of nursing school.

Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 454 - Genomics and Ethical Considerations

This course will introduce human genomics related to provision of patient and family centered health care across the lifespan. Nurses are in an ideal position to facilitate patients and families to make sense of, respond to, and use the information they receive during the genetic testing experience. This is not a course in basic genetics, rather the focus is on the nurse's role in clinical application of a working knowledge of human genetics. Using ethical principles, students will be encouraged to critically examine the social, legal, cultural, political, and professional implications of the integration of genomics into health care practices.

Credit Hours: 3

Prerequisite Courses: NSG 319 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

Total Degree Requirements: 91-94 Credits

Additional Information:

A minimum grade of "C" (2.00) is required in each nursing course. A cumulative grade point average of 2.70 or better is required for progression in the program and for graduation.

Because many of the required courses are sequential and have prerequisites, it is vital for students to complete them successfully in the proper sequence. Sample schedules are available in the Center for Academic Advising, in the School of Nursing and on the School of Nursing Web site. In addition to university studies requirements and nursing requirements, students must take elective courses to satisfy the university requirement of a minimum of 124 hours.

Bachelor of Science in Nursing, RN-BSN Option

Program Coordinator: C. Elise Thompson, PhD, MSN, RN

(RN-BSN I UNCW)

Registered Nurses wishing to obtain the B.S. degree must meet all university admissions and studies requirements. In addition to university studies requirements and nursing requirements, students must take elective courses to satisfy the university requirement of a minimum of 124 hours. Corequisite labs for BIO 240 and BIO 241 are not required for students in this program. Upon successful completion of NSG 316, RN-BSN students are granted 34 placement hours credit.

Nursing courses in the RN-BSN option are available online. Orientation is presented online and/or by special arrangement. Students must have sufficient computer skills and access to a computer that supports an internet browser (Internet Explorer or Netscape Navigator), a word processor, PowerPoint, Media Player or other video player, and e-mail. For additional information see http://www.uncw.edu/son or contact the School of Nursing.

Requirements for the B.S.N. Degree, RN-BSN Option:

Collateral Courses (24 Credits):

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and

CHML 101.
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions, confidence intervals, hypothesis testing, correlation and regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical

software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Choose one of the following:

PAR 101 - The Big Questions: Introduction to Philosophy

Introduction to various philosophers and philosophical problems from historical, critical, and other perspectives. Addresses the big questions of human existence, such as: What is right and wrong? Does God exist? How do we know anything about the world around us? Students learn what a philosophical question is and discover just how pervasive philosophical assumptions are in life.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 115 - Introduction to Ethics

An introduction to fundamental principles, theories, and problems in ethics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 205 - American Philosophy

A survey of American philosophical thought from colonial times to the present. Readings from such American thinkers as Jonathan Edwards, the Federalist authors, Thoreau, James, Dewey and Quine.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PAR 211 - Philosophy of Human Nature

A survey and evaluation of past and present theories of human nature; to include such topics as nature and culture, freedom and rationality, issues in gender identity, and theories of education and human development.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

Choose one of the following:

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Core Courses (27 Credits):

NSG 316 - Professional Nursing Practice for the Baccalaureate Nurse

This is a seminar course for registered nurses. Students will examine foundations and contemporary issues of professional nursing practice and will explore critical abilities and roles for the baccalaureate nurse in the management of quality, patient care. This course will introduce students to online learning and provide strategies for success.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the RNBSN program.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

NSG 321 - Gerontological Nursing and the End of Life Care

This course covers optimum health care for the aging client using the demographic, physiological, psychosocial and economic aspects of aging. Emphasis is placed on understanding the unique needs of the aging population, and to provide evidence-based care using interprofessional collaboration to improve care transitions, and health outcomes for older adults that promotes quality of life.

Credit Hours: 3

Prerequisite or Corequisite Courses: NSG 316 with a C or better.
Additional Restrictions/Requirements: Open only to students in the RNBSN program.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 323 - Health Assessment for Registered Nurses

This course enhances students' assessment and clinical reasoning skills. Emphasis is placed on analyzing nursing assessment findings, setting priorities, and developing a plan of care that promotes or restores health. This course explores the impact of the environment, life choices, literacy, and genomics on holistic health.

Credit Hours: 3

Prerequisite or Corequisite Courses: NSG 316 with a C or better.
Additional Restrictions/Requirements: Open only to students in the RNBSN program.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 398 - NSG 398 - Health Policy - Thompson

This course focuses on social, psychological, economic, political, legal, ethical, and diverse environments which shape health care delivery systems. Nursing practice is studied relative to inter-professional collaboration, advocacy, and leadership. Emphasis is placed on critical analyses related to health policy, health care reform, health care systems, and social determinants of health.

Credit Hours: 3

Prerequisite Courses: NSG 316 with a C or better.
Additional Restrictions/Requirements: Open only to students in the RNBSN program.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 406 - Leadership and Management in Nursing

This course introduces core concepts of leadership and management for the professional nurse. Emphasis is placed on leadership and management theories, health systems organization, role development, and the legal and ethical considerations that impact care delivery and

quality.

Credit Hours: 3

Prerequisite Courses: NSG 316 with a C or better.
Additional Restrictions/Requirements: Only open to students in the RN-BSN option.
Course Repeatability: Course may not be repeated.

NSG 408 - Population and Community Health Nursing

This course addresses the community nursing process and its relationship with client-centered care, clinical reasoning, and integrity of practice applicable to health prevention, promotion, and risk reduction in diverse settings. Content addresses social and ecological determinants of health through health education, epidemiology, case management, partnerships, and technology, examining outcomes for an evidence-based, culturally sensitive practice.

Credit Hours: 3

Prerequisite Courses: NSG 316 with a C or better.

Additional Restrictions/Requirements: Open only to students in the RNBS Program.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 415 - Research in Nursing

This course introduces the concepts of nursing research to registered nurses who are pursuing their baccalaureate degree in nursing. The course content includes a review of how to apply basic research concepts and evidence-based practice to the field of nursing science. The student will identify a health-related problem within nursing to conduct an analysis and critique of the research literature, synthesize these critiques as it applies to practice, and foster a plan of action to make evidence-based practice a reality within nursing practice.

Credit Hours: 3

Prerequisite Courses: (STT 210 with a C or better or

STT 215 with a C or better or PSY 225 with a C or better or QMM 280 with a C or better or BAN 280 with a C or better) and NSG 316 with a C or better.
Additional Restrictions/Requirements: Open only to students in the RNBSN program.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 482 - Pathophysiologic and Pharmacological Evidence Based Nursing Care

This theory course builds on basic knowledge of pathophysiology and pharmacology to enhance nursing management of health, wellness, and disease. Analysis of current pharmacological based research will provide the foundation for evidence based nursing practice. Physiological, pathophysiological, and pharmacological concepts that explain the rationale behind treatment decisions are examined.

Credit Hours: 3

Prerequisite or Corequisite Courses: NSG 316 with a C or better.
Additional Restrictions/Requirements: Open only to students in the RNBSN program.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

NSG 484 - Professional Nursing Capstone

This course synthesizes information from previous courses and clinical practice to prepare the student for professional practice as a baccalaureate-prepared registered nurse. Emphasis is placed on reflection and concept integration to promote nursing advocacy, leadership, innovation, and evidence-based management of care.

Credit Hours: 3

Prerequisite or Corequisite Courses: NSG 408 with a C or better.
Prerequisite Courses: NSG 316 with a C or better and NSG 321 with a C or better and NSG 323 with a C or

better and NSG 398 with a C or better and NSG 406 with a C or better and NSG 408 with a C or better and NSG 415 with a C or better and NSG 482 with a C or better.
Additional Restrictions/Requirements: Open only to students in RNBSN program.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Select a minimum of 3 credits from the following:

NSG 346 - Evolution of Professional Nursing

Students will examine the evolution of professional nursing in America through the study of select critical historical analyses of a significant influential event, time, concept, or person. Exposure to critical historical works will provide students a contextual perspective and enlightenment to evaluate the contemporary professional identity and practice role of the nurse.

Credit Hours: 1

Additional Restrictions/Requirements: Open only to students in RNBSN program.
Course Repeatability: Course may not be repeated.

NSG 361 - Building a Professional Nursing Career

This course focuses on building a career path in professional nursing that includes continuous engagement and lifelong learning. Engagement in professional nursing organizations, sharing best practices through presentations and use of the principles of scholarly writing, and planning for lifelong learning are presented as strategies to advance professionalism in nursing.

Credit Hours: 1

Additional Restrictions/Requirements: Open only to students in the RNBSN program.
Course Repeatability: Course may not be repeated.

NSG 385 - Palliative & End-of-Life Care Across the Lifespan

This course introduces the student to the field of palliative and end-of-life care. It will focus on a holistic approach to nursing care for the physical, psychological and spiritual needs of patients across the lifespan experiencing a wide range of illnesses. Illnesses will

include progressive, chronic or debilitating disorders. An emphasis will be placed on maintaining quality of life through palliative and end-of-life care with an understanding that patients and families have diverse values, beliefs, needs, and expectations.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the RNBSN program.
Course Repeatability: Course may not be repeated.

NSG 411 - Complementary and Alternative Therapies

This course provides a description and analysis of the growing use of complementary and alternative therapies (CATs) by consumers in contemporary society. Emphasis will be placed on ways to promote healing and optimum health in the individual, families, and communities. The student will increase their knowledge, skills, and attitudes necessary to communicate effectively with patients and health care providers about these therapies to enhance patient health and safety.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the RNBSN program.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

NSG 480 - Transcultural Nursing

Explores values and belief systems influencing health behaviors of culturally diverse groups. Emphasizes cultural, social, political, and economic forces that influence access to and use of health care resources. Identifies a conceptual basis for assessment, planning, implementation, and evaluation of health care for culturally diverse clients. Fosters cultural sensitivity to life styles, values, and concepts concerning health and health care. The goal of this course is to broaden the student's perception and understanding of health/HEALTH and illness/ILLNESS and the variety of meanings these terms carry for members of differing sociocultural populations.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in RNBSN program.
University Studies: Approaches and Perspectives/Living in a Global Society
Crosslisting: NSG 580
Course Repeatability: Course may not be repeated.

NSG 487 - Genetics and Genomics in Healthcare

This course will focus on an introduction to emerging knowledge in human molecular genetics and the related implications for health care across the lifespan through multidisciplinary perspectives. Content focuses on the application of genetics to clinical practice, including screening for genetic predisposition, the impact of genetics on health promotion and disease prevention, and the uses of genetically engineered technology and therapies. Students will be encouraged to critically examine the social, legal, cultural, political, and professional implications of the integration of genetics into health care practices.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the RNBSN program.
Course Repeatability: Course may not be repeated.

Note:

Completion of these nursing courses will satisfy 30 of the 31 credit university residency requirements.

One additional elective may be needed to fulfill university residency requirements. NSG 484 is a capstone course to be completed in the last semester of the program.

Total: 54 Credits

Placement Credits (34 Credits):

Upon successful completion of NSG 316, RN-BSN students are granted 34 placement credits.

Total Degree Requirements: 88 Credits

Additional Information:

The recommended Program of Study can be viewed on the School of Nursing website, www.uncw.edu/son; click on the RN-BSN option of the Bachelor of Science in nursing.

A minimum of "C" (2.00) is required in each nursing course. A cumulative grade point average of 2.00 or better is required for graduation.

Bachelor of Science in Nursing, Accelerated (2nd Degree) Option

Requirements for the B.S.N. Degree, Accelerated (2nd Degree) option:

Core Courses (54 Credits)

NSG 300 - Health Assessment and Core Nursing Concepts

This course introduces the student to the core concepts of nursing that are essential to the role of the professional nurse in caring for individuals, families, and communities. The course will focus on normal assessment skills across the lifespan as a component of core nursing care. Didactic concepts will be applied in the laboratory setting for demonstration of

assessment skills using varying degrees of technology.

Credit Hours: 4 (3 lecture/1 lab)

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 302 - Foundational Nursing Care of Adults

This course introduces the student to the core concepts of nursing essential to the role of the professional nurse when caring for adult patients, their families, and communities in a variety of clinical settings. Course content will emphasize foundational, evidenced-based skills using the nursing process, and techniques of safe nursing practice for health promotion.

Credit Hours: 1 To 5

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program.
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket

Professional Liability Insurance, F012 Nursing Simulation Fee Additional Student Fee Link

Major Restriction Nursing

NSG 304 - Introduction to Professional Nursing

This course introduces the student to the core concepts of professional nursing. Course content includes nursing history, theory and an introduction to American Nurses Association Code of Ethics, legal standards of the nursing scope of practice through regulatory bodies and evolving issues in the profession. Students will learn the quality safety standards education for nurses and the standards for interprofessional collaboration.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program.
University Studies: Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 306 - Pathopharmacology I

Introduces basic concepts of pathophysiology and pharmacotherapeutics, building on basic anatomy and physiology, microbiology, and chemistry content obtained from earlier courses. The pathophysiology of common disease conditions affecting human beings across the lifespan are explored. This course also examines basic drug classifications, concepts and principles of pharmacology with special consideration for the nursing role in developing a comprehensive approach to the clinical application of drug therapy.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Undergraduate Nursing Program.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 311 - Focused Care for Adults Across the Lifespan

This course will build on previous concepts of adult nursing and special populations across the life span (including women's health and geriatrics) that are essential to the role of the professional nurse in caring

for individuals, families, and communities. The course will focus on complex adult assessment skills as a component of core nursing care, and the nursing process. Didactic concepts will be applied in the laboratory setting for demonstration of assessment skills using varying degrees of technology.

Credit Hours: 3 (2 lecture/1 lab)

Prerequisite Courses: NSG 300, NSG 302 (C or better).
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation FeeAdditional Student Fees Link

NSG 313 - Nursing Care of Women's Health Across the Lifespan

This course introduces core concepts of nursing essential to the role of the professional nurse caring for women across the lifespan. The course content will assist the learner in improving health promotion and restoration for women through all phases of life, including the care of women in the prenatal, perinatal,

and postnatal periods. Professional nursing values of patient centered care, lifelong learning and quality improvement are components of classroom and clinical learning. Newborn nursing assessment will be included as part of the complete postpartum (includes mother/baby/family) phase. Applications of concepts and essential psychomotor skills are demonstrated in clinical experiences working with culturally diverse families.

Credit Hours: 3 (2 lecture/1 clinical)

Prerequisite Courses: NSG 300, NSG 302, NSG 306 (C or better).
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 314 - Nursing Care of Children

This course introduces core concepts of nursing essential to the role of the professional nurse caring for children and their families, in the child's natural environments (i.e. home or school) within the community and in acute care settings. Content will include strategies for improving child health status

based on diverse needs of the child and their family, in the context of the child's situational environment. Professional values of patient and family centered care, life-long learning, and quality improvement will be emphasized. Essential psychomotor skills will be applied via experiences caring for children in a variety of clinical agencies.

Credit Hours: 4 (2 lecture/2 clinical)

Prerequisite Courses: NSG 300, NSG 302, NSG 306 (C or better)
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 317 - Introduction to Evidence Based Practice and Research

Course content includes an overview of current issues in knowledge development in nursing including the process of research utilization and evidence-based practice. Student will conduct analytic critiques of the research literature for scientific merit, synthesize these critiques for application to practice, and develop strategies for providing leadership to make evidence-

based practice a reality in current and future work settings.

Credit Hours: 3

Prerequisite Courses: NSG 304 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 319 - Pathopharmacology II

This course builds on basic concepts of pathophysiology and pharmacotherapeutics from earlier courses. The pathophysiology of disease conditions affecting human beings across the lifespan are explored, along with pharmacotherapeutics related to these disease conditions. Nursing implications relative to the utilization of drug therapy are examined.

Credit Hours: 3

Prerequisite Courses: NSG 306 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 422 - Mental Health Nursing Across the Lifespan

This course introduces core concepts of nursing essential to the role of the professional nurse caring for patients with mental health disorders across the lifespan. The course content will include health promotion and restoration for the patients and their families, along with professional values of patient centered care, lifelong learning, and quality improvement. Applications of concepts and essential therapeutic communication and psychomotor skills are demonstrated in clinical experiences working with culturally diverse patients in various agencies.

Credit Hours: 3 (2 Lecture/1 clinical)

Prerequisite Courses: NSG 311 , NSG 314, NSG

319 (C or better).
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 424 - Nursing Leadership and Management

Introduces core concepts of leadership and management for the professional nurse. The course will focus on leadership and management theories, health systems organization, role development, and the legal and ethical considerations that impact care delivery and quality.

Credit Hours: 3

Prerequisite Courses: NSG 317 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 426 - Acute and Complex Nursing Care of Adults

This course will build upon core nursing concepts essential to the role of the professional nurse when caring for individuals, families, and communities with complex health problems. This course will focus on advanced concepts and response to changes in condition for patients with acute and chronic illnesses. Emphasis will be placed on the nursing process, clinical reasoning and professional integrity. Advanced psychomotor skills and concepts in nursing care will be applied in lab and various clinical experiences.

Credit Hours: 6 (3 lecture/3 clinical)

Prerequisite Courses: NSG 311, NSG 313, NSG 317, NSG 319 (C or better).
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation Fee Additional Student Fee Link

Major Restriction Nursing

NSG 430 - Population and Public Health Nursing

This course introduces the student to the core concepts essential to the role of the professional nurse in population health. The course focuses on health promotion, and disease and injury prevention based on determinants of local, national, and global health. Content is guided from theories in nursing, psychology, and sociology. Course content will examine how health care delivery systems, public health agencies, and community-based organizations collaborate for health promotion, risk reduction, and disease management and control in vulnerable populations

Credit Hours: 3 (2 lecture/1 clinical)

Prerequisite Courses: NSG 313, NSG 314, NSG 426 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy

Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 432 - Advocacy and Policy

This course focuses on social, psychological, economic, political, legal, ethical, and diverse environments which shape health care delivery systems in the United States. There will be critical analyses related to health policy, health care reform, health care systems, and determinants of health. It also explores how the nurse can advocate for change in health policy.

Credit Hours: 3

Prerequisite Courses: NSG 424 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Major Restriction Nursing

NSG 434 - Capstone: Prioritization and Application of Nursing Care

Synthesizes information from previous courses to prepare the student for transition to practice. This course is designed to enhance the prioritization and reasoning skills needed by the nurse to manage, coordinate, and deliver safe patient-centered care. Through classroom activities and a one-to-one preceptorship with an experienced registered nurse, the student will refine psychomotor skills and deliver care that demonstrates sound clinical judgements and professional values.

Credit Hours: 5 (2 lecture/3 clinical)

Prerequisite Courses: NSG 422, NSG 426 (C or better).
Additional Restrictions/Requirements: Minimum grade of C or better.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: F003 Student Blanket Professional Liability Insurance, F012 Nursing Simulation Fee

Major Restriction Nursing

Total Degree Requirements: 54 Credits

Additional Information

A minimum grade of "C" (2. 00) is required in each nursing course.

Biochemistry, B.S.

Biochemists study the chemistry of life processes. The science of biochemistry is of interest to students who wish to pursue careers in health-related fields, such as medicine, pharmaceutical sciences, and pharmacology – or basic research related to life processes and the study of disease.

Oral Communication Requirement:

To satisfy the oral communication requirement for the Biochemistry B.S. degree, a student must successfully complete CHM 495.

Applied Learning Requirement

To satisfy the applied learning requirement for the Biochemistry B.S. degree, a student must successfully complete CHM 495.

Critical Reasoning Requirement:

CHM 365 satisfies the critical reasoning requirement in the major.

Required Courses

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

CHM 220 - Physical and Quantitative Methods in Chemistry

Physical and quantitative methods in chemistry is an introductory course that surveys important physical and quantitative tools used in chemistry. Quantitative physical and mathematical methods are absolutely

necessary to explore important concepts in in chemistry. This course aims to teach chemistry majors how to apply the available physical and quantitative tools to chemistry using examples and problems from various areas in chemistry, such as physical, biological and analytical chemistry. The course starts from a review of basic calculus and then covers more advanced topics.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 101 or PHY 201) and (CHM 102 and CHML 102).
Course Repeatability: Course may not be repeated.

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry; activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHML 235 - Quantitative Analysis Laboratory

Laboratory techniques in classical and modern chemical analysis, including volumetric analysis, chromatography, and spectrophotometry. Application of statistical methods to laboratory data. Chemical equilibrium. This course is the lab for CHM 235.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 235.
Course Repeatability: Course may not be repeated.

CHM 320 - Physical Chemistry I: Quantum Chemistry and Spectroscopy

Overview of topics in physical chemistry stressing fundamental concepts in quantum chemistry, statistical mechanics and spectroscopy. The lab for this course is CHML 320.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 220.
Prerequisite Courses: CHM 102 and CHML 102 and (PHY 101 or PHY 201) and (MAT 151 and MAT 152) or (MAT 161 and MAT 162)
Course Repeatability: Course may not be repeated.

CHML 320 - Physical Chemistry Laboratory I

Laboratory course that will reinforce the concepts of quantum chemistry learned in the accompanying lecture course (CHM 320). Writing intensive course with a focus on writing laboratory reports in professional fashion. This course is the lab for CHM 320.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 320.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 325 - Biophysical Chemistry

Introduction to the fundamentals of thermodynamics and kinetics in the context of biochemical systems. A brief review of the structures of proteins, nucleic acids and membranes followed by a treatment of the thermodynamics and kinetics of binding reactions and phase transitions involving these macromolecules and assemblies. CHML 325 is the laboratory course for CHM 325.

Credit Hours: 3

Prerequisite Courses: BIO 201, CHM 211, CHM 220.
Course Repeatability: Course may not be repeated.

CHML 325 - Biophysical Chemistry Laboratory

Essential experimental approaches used in the study of proteins, lipids, and nucleic acids, and their interactions. The molecular structure, thermodynamics and kinetics of binding reactions, phase transitions, and other processes involving these macromolecules will be studied using calorimetry and modern spectroscopic methods.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 325.
Prerequisite Courses: CHM 220.
Course Repeatability: Course may not be repeated.

CHM 350 - Introduction to Chemical Research

Introduction to chemical investigation, including use of the chemical literature, experimental design, proposal preparation, and communication of findings.

Credit Hours: 1

Prerequisite Courses: CHM 211 or CHM 235.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Biochemistry B.S., Chemistry B.S., or Chemistry B.A.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and,

elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHML 365 - Biochemistry Laboratory

Theory and practice of biochemical techniques. Topics may include protein assays, protein purification, electrophoresis, enzyme kinetics, HPLC or proteins, buffers and pH, DNA isolation, and molecular visualization and modeling.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 365.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

CHM 466 - Biochemistry II

Examination of bioenergetics, structure and function of biomembranes, biosynthesis, degradation of fatty acids, amino acids, and nucleotides, integration of metabolism, signal transduction, and the action of hormones. Consideration of the structure and enzymology of DNA and RNA, genetic information, protein biosynthesis, and gene regulation.

Credit Hours: 3

Prerequisite Courses: CHM 365 or BIO 465.
Course Repeatability: Course may not be repeated.

CHM 495 - Senior Seminar

Discussion of selected topics.

Credit Hours: 1

Prerequisite Courses: CHM 350
Additional Restrictions/Requirements: 25 semester hours of chemistry courses including prerequisite course.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CHM 468 - Structure and Function of Nucleic Acids

Study of the structure of DNA and RNA, the denaturation and renaturation of DNA and RNA, DNA techniques including cloning, the central dogma (including DNA replication, transcription and translation), and DNA-Protein interactions.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHML 468 - Plasmid Design and Production

Study of advanced experimental skills for constructing, producing, and purifying plasmids used in the synthesis of biological macromolecules. Students will learn to design plasmids for the expression of recombinant proteins, in-vitro transcription of mRNAs, and the production of viral vectors. Course topics include DNA cloning techniques and plasmid production methods.

Credit Hours: 1

Prerequisite Courses: CHM 365 and CHML 365
Course Repeatability: Course may not be repeated.

Or

BIO 325 - Molecular Biology of the Cell

Chemical and physical properties of cells, with emphasis on molecular biology and experimental

biological systems used to elucidate cellular function. The lab for this course is BIOL 325.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Course Repeatability: Course may not be repeated.

BIOL 325 - Molecular Biology of Cell Laboratory

Experiments demonstrating basic phenomena underlying cellular function. This course is the lab for BIO 325.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 325.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Or

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 152 - Basic Calculus with Applications II

Intended for majors that emphasize techniques and applications. The second course in a two-course sequence. Topics to include further techniques and applications of integration and multivariable calculus including trigonometric functions, differential equations, probability, and sequences & series.

Credit Hours: 3

Prerequisite Courses: MAT 151 and (MAT 112 or MAT 160).
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

Or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's

equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

And at least nine semester hours, including a minimum of three semester hours from Block I:

Block I:

CHM 461 - Biochemistry of Immunity

Introduction to the reactions underlying the immune response, emphasizing biochemical principles. The principles underlying the innate and adaptive immune systems, and the structure and function of the molecules involved. Exploration of the functional immune system as a coordinated collective of individual components.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 462 - Biochemistry of Cell Signaling

Introduction to the general principles of cell signaling. The molecules responsible for signaling processes will be discussed, including synthetic or natural product molecules which affect cell signaling. Specific examples may be discussed including neurotransmission, metabolic regulation, and targeting of cell signaling proteins for therapeutic benefit.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 463 - Peptide Synthesis

Exploration of peptide synthesis techniques, covering both solution-phase and solid-phase (on-resin) methods. Includes discussions on amino acid coupling strategies, protecting group approaches, activation processes, peptide synthesizers, and ligation techniques. Prepares students for practical applications

in biochemical research, drug design, and protein chemistry by examining current methodologies and challenges in peptide assembly.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHM 467 - Bioinorganic Chemistry

Exploration of the roles that metal ions play in biochemical systems, bridging the gap between inorganic chemistry and biochemistry and providing a comprehensive understanding of how metals contribute to the structure and function of biomolecules. Examines the principles of coordination chemistry, the function of metalloenzymes, and the application of various spectroscopic techniques to study metal-containing biomolecules.

Credit Hours: 3

Prerequisite Courses: CHM 220 and CHM 365

Crosslisting: CHM 567
Course Repeatability: Course may not be repeated.

CHM 469 - Enzymology

Investigation of enzyme mechanisms and their regulation. Exploration of the theoretical and practical aspects of studying enzymes and their biological implications. A particular focus will be placed on binding, steady-state kinetics, transient kinetics, allosteric regulation, and inhibition.

Credit Hours: 3

Prerequisite Courses: CHM 365, CHM 220.
Course Repeatability: Course may not be repeated.

Block II:

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

CHM 312 - Advanced Techniques Organic Chemistry

Theory and practice of chromatographic methods of separation and spectroscopic methods of identification.

Credit Hours: 2

Prerequisite Courses: CHM 212 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHM 417 - Medicinal Chemistry

Study of the principles involved in, and the multidisciplinary nature of, modern drug design. Focus on chemical and biological principles that are fundamental to medicinal chemistry and on understanding how and why certain chemicals interact at biological targets.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 365 or BIO 465
Prerequisite Courses: CHM 212
Crosslisting: CHM 517
Course Repeatability: Course may not be repeated.

CHM 425 - Computational Chemistry

Theory and hands-on training of basic computational chemistry; including molecular mechanics, semi-empirical and ab initio molecular orbit theory, density functional theory, and molecular dynamics.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHM 445 - Inorganic Chemistry

Study of periodic relationships; crystal lattice theory; transition metals and ions; crystal field theory; organometallic structures and reactions; and reaction mechanisms. The lab for this course is CHML 445.

Credit Hours: 3

Prerequisite Courses: CHM 320 with a minimum grade of C and CHM 350 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 486 - Fundamentals of Heterocycles with Emphasis on Pharmaceuticals

Well over half of all known organic compounds and most pharmaceuticals are heterocyles (containing an atom other than C in the ring), yet their chemistry is hardly touched on in conventional courses. Topics include the nomenclature, properties, synthesis, and pharmaceutical applications of heterocycles.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 312 - Advanced Techniques of Organic Chemistry Laboratory

Advanced laboratory techniques for the synthesis, purification, and identification of organic compounds using chromatographic and spectroscopic methods including HPLC, GC-MS, UV-Vis, IR, and NMR. This course is the lab for CHM 312.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 312.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

CHML 445 - Inorganic Synthesis Laboratory

Synthesis and techniques in inorganic chemistry. Normally taken concurrently with CHM 445. This course is the lab for CHM 445.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 445.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will

design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 291 - Introductory Research

Laboratory and computational research under faculty supervision beyond what is offered in existing courses.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Freshman,

sophomore, junior, or senior standing and consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CHM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CHM 498 - Internship In Chemistry

Practical field experience and academic training related to the student's principal area of interest through a program of work and study within a business or agency. Student is supervised and evaluated jointly by

a chemistry faculty member and an on-site supervisor. (Only three hours may count toward a major in chemistry.)

Credit Hours: 1 To 3

Prerequisite Courses: CHM 212 and CHML 212 and CHM 235 and CHML 235
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, consent of instructor; and GPA of at least 2.80 in chemistry.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability Insurance Additional Course Fee Schedule

CHM 499 - Honors Work in Chemistry

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Total: 72 - 74 hours

Additional Information

An overall grade point average of "C" (2.00) is required in all CHM courses counted toward the biochemistry major.

Students working for the Biochemistry B.S. degree should arrange their work so as to take CHM 320 and CHM 325 in their junior year.

(**If CHM 291 or CHM 491 are used to fulfill requirements for the major, a student must take a combined total of 3 credit hours in CHM 291 and CHM 491. A student may only count a total of 3 credit hours of CHM 291, CHM 491, CHM 498, and CHM 499 toward the major.)

Biology, B.A.

The Biology B.A. is a flexible program that can be designed by a student and an advisor to meet personal educational goals and interests that may or may not include graduate study. The program may be used to meet a set of specific requirements; for example, certification for teaching at the secondary school level. Students in this major are qualified for a wide array of positions working in the biological sciences. Students should contact the undergraduate coordinator in the Department of Biology and Marine Biology for additional information.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine Biology a student must successfully complete BIO 495.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine Biology a student must successfully complete one of the following: honors in any science department (BIO

499, CHM 499, EVS 499, GLY 499, MAT 499, PSY 499, PHY 499); directed individual study involving hands-on experience in any science department (BIO 291, BIO 491, BIO 495, CHM 491, EVS 491, GLY 491, MAT 491, PSY 491, PHY 491); BIO 498, BIO 493; formal student teaching experience taken for UNCW credit (e.g. EDNL 406, EDN 409, EDN 411); BIO 480 or BIOL 495).

Requirements for a Major in Biology for the B.A. Degree:

Core Courses (29-33 hours)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 325 - Molecular Biology of the Cell

Chemical and physical properties of cells, with emphasis on molecular biology and experimental biological systems used to elucidate cellular function. The lab for this course is BIOL 325.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Course Repeatability: Course may not be repeated.

BIOL 325 - Molecular Biology of Cell Laboratory

Experiments demonstrating basic phenomena underlying cellular function. This course is the lab for BIO 325.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 325.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 340 - Plant Physiology

Study of plant function at the molecular, cellular, and organismic levels, with emphasis placed on unique aspects of vascular plants. Topics include water relations, solute transport, photosynthesis, nitrogen metabolism, plant hormones, photo control of development, and stress physiology.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 345 - Animal Physiology

Comparative study of physiological processes in different organisms approached through study of tissues, organs, and systems. The lab for this course is BIOL 345.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

BIOL 345 - Animal Physiology Laboratory

Introduction to the equipment and techniques for computer-based acquisition of physiological data. Experience in data analysis and presentation, and in computer simulations of physiological experiments is also included. This course is the lab for BIO 345.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 345.
University Studies: Building Competencies/Writing

Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

and

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241

Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

and

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general

chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

Elective Courses (30 hours)

A minimum of 30 hours chosen from BIO courses numbered above 299, at least two of which must be laboratory courses. No more than 10 hours from BIO 480 , BIO 491 , BIO 493 , BIO 498 , and BIO 499 can be counted towards the 30 elective hours.

Total Credit Hours: 59-63

Additional Information:

The department strongly recommends that BIO 335 and BIO 366 be completed before taking other BIO courses at the 300 or 400 level. A "C" (2.00) or better average is required on all BIO courses above 299.

Biology, B.S.

The Bachelor of Science degree in Biology is designed to meet the needs of biology majors who may wish to pursue further education in graduate school in biology or professional schools in the health sciences. The sequence of courses conforms to entrance requirements prescribed in publications of most health professional programs.

A major in the Biology B.S. program can be declared after completing 24 credit hours and BIO 201, BIOL 201,BIO 202 and BIOL 202 or equivalent courses, with a grade of 'C' (2.00) or better in both courses. Students should contact the Program Coordinator for additional information.

Program Coordinator: Dr. Jessie Jarvis

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine Biology a student must successfully complete BIO 495.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine Biology a student must successfully complete one of the following: senior seminar (BIO 495); honors in any science department (BIO 499, CHM 499, EVS 499, GLY 499, MAT 499, PSY 499, PHY 499); directed individual study involving hands-on experience in any science department (BIO 291, BIO 491, BIO 495, CHM 491, EVS 491, GLY 491, MAT 491, PSY 491, PHY 491); BIO 498, BIO 493; formal student teaching experience taken for UNCW credit (e.g. EDNL 406, EDN 409, EDN 411).

Requirements for a Major in Biology for the B.S. Degree:

Core (51-52 hours)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO

335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 325 - Molecular Biology of the Cell

Chemical and physical properties of cells, with emphasis on molecular biology and experimental biological systems used to elucidate cellular function. The lab for this course is BIOL 325.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Course Repeatability: Course may not be repeated.

BIOL 325 - Molecular Biology of Cell Laboratory

Experiments demonstrating basic phenomena underlying cellular function. This course is the lab for BIO 325.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 325.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 340 - Plant Physiology

Study of plant function at the molecular, cellular, and organismic levels, with emphasis placed on unique aspects of vascular plants. Topics include water relations, solute transport, photosynthesis, nitrogen metabolism, plant hormones, photo control of development, and stress physiology.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202, and

CHM 102 and CHML 102.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 345 - Animal Physiology

Comparative study of physiological processes in different organisms approached through study of tissues, organs, and systems. The lab for this course is BIOL 345.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

BIOL 345 - Animal Physiology Laboratory

Introduction to the equipment and techniques for computer-based acquisition of physiological data. Experience in data analysis and presentation, and in computer simulations of physiological experiments is also included. This course is the lab for BIO 345.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 345.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is

BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is

BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

and

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

or

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIOL 465 - Biochemistry Laboratory

Experiments demonstrating basic phenomena and techniques of biochemistry. This course is the lab for BIO 465.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 465.
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical

waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

PHY 106 - Physics of Sailing

Application of physics principles to sailing. Topics include kinetics, vectors, Newtonian mechanics, and fluid mechanics. Basic keelboat sailing is taught in the laboratory component, leading to American Sailing Association ASA 101, certification. Three lecture and two laboratory hours each week. Fee required.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or

MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161

Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World

Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits,

electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions,

differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics

placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Biology Option (19 hours):

Must complete general requirements for B.S. Degree in Biology. Additionally, must take a minimum of 19 hours

chosen from BIO courses numbered above 299. No more than 10 hours from BIO 480, BIO 491, BIO 493, BIO 498, and BIO 499 can be counted towards the elective 19 hours. This program is designed to meet the needs of biology majors to immediately begin a career in biology or who may wish to pursue further education in graduate school in biology or professional schools in the health sciences.

Total Credit Hours: 70-71

Additional Information:

The department strongly recommends that two out of BIO 366; BIO 335; BIO 340 or BIO 345 or BIO 240 be completed before taking other BIO courses at the 300 or 400 level. A "C" (2.00) or better average is required for BIO/BIOL courses above 299.

Pre-Health Option

This program is designed to meet the needs of biology majors who may wish to pursue further education in medical school or professional schools in the health sciences. The sequence of courses conforms to entrance requirements prescribed in publications of the Association of American Medical Colleges, the

American Association of Dental Schools, and the Council on Optometric Education of the American Optometric Association.

Students interested in health professional schools should contact Dr. Art Frampton.

Pre-Health Option Core Courses (57 hours)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine

systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant

literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or

senior standing.
Course Repeatability: Course may not be repeated.

BIOL 465 - Biochemistry Laboratory

Experiments demonstrating basic phenomena and techniques of biochemistry. This course is the lab for BIO 465.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 465.
Course Repeatability: Course may not be repeated.
and

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior

Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental

results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for

CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence;

distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Social Science/Humanities Elective Courses (6 hours)

Must take a minimum of 6 hours chosen from the courses listed below.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 336 - Sociology of Aging

Sociological theories and methods used to explain the aging process. Topics include demography, age stratification, aging and the life course, minority elderly, housing patterns, health, and social policy.

Credit Hours: 3

Prerequisite Courses: SOC 105 or GRN 101
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 337 - Medical Sociology

A sociocultural analysis of the general area of health and illness. Emphasis is given to understanding the distribution of health and illness in the United States and its impact on the patient status. The course includes a discussion of the organization and use of health care services from a sociological perspective.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 433 - Sociology of Mental Disorder

Examination of the influences of race, social class, gender, and age on the incidence and prevalence of mental disorder. Consideration of the institutions that

help those with mental disorders. Review of mental health law, including definitions of dangerousness, insanity as defense, mental health courts, and the right to treatment.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 438 - Social Epidemiology

Methods and substance of social epidemiology; demographics of illness in American society. Case studies linking environmental and behavioral variables to disease incidence examined. Specific attention to the social response to AIDS and other communicable diseases.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Pre-Health Elective Courses (12 hours)

Students must take a minimum of 12 hours chosen from courses numbered above BIO 299 and not used to satisfy other requirements. ATR 470 will also count towards biology electives. No more than 10 hours from BIO 480 , BIO 491 , BIO 493 , BIO 498 , and BIO 499 can be counted towards the 12 elective hours.Working closely with an advisor, students may select elective courses tailored to individual needs (for example; Pre-health Professional: BIO 315 , BIO 316 , BIO 320 , BIO 325 , BIO 370 , BIO 459 , BIO 465).

Total Credit Hours: 75

Pre-Veterinary Medicine Option

This program is designed to meet the needs of biology majors who may wish to pursue further education in the veterinary health sciences. The sequences of courses conform to entrance requirements prescribed in

publications of most veterinary professional programs. However, students should check each school's pre-requisites, as they can vary from school to school.

Pre-Veterinary Medicine Option Core Courses (56 hours)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab

for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 345 - Animal Physiology

Comparative study of physiological processes in different organisms approached through study of tissues, organs, and systems. The lab for this course is BIOL 345.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

BIOL 345 - Animal Physiology Laboratory

Introduction to the equipment and techniques for computer-based acquisition of physiological data. Experience in data analysis and presentation, and in computer simulations of physiological experiments is also included. This course is the lab for BIO 345.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 345.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

BIO 346 - Animal Nutrition

Exploration of the anatomy and physiology of the digestive system of domestic ruminant and non-ruminant animals, the classification of nutrients, and the application of animal nutrition and feeding.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, CHM 101, CHM 102.
Course Repeatability: Course may not be repeated.

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIOL 465 - Biochemistry Laboratory

Experiments demonstrating basic phenomena and techniques of biochemistry. This course is the lab for BIO 465.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 465.
Course Repeatability: Course may not be repeated.

and

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is

BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits,

electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of

probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Pre-Veterinary Medicine Elective Courses (11 hours)

Students must take a minimum of 11 hours chosen from BIO courses numbered above 299. PSY 457 will also count towards biology electives. No more than 10 hours from BIO 480 , BIO 491 , BIO 493 , BIO 498 , and BIO 499 can be counted towards the 11 elective hours.

Social Science/Humanities Elective Courses (6 hours)

Students must take a minimum of 6 hours chosen in any combination of Humanities and/or Social Sciences. Humanities courses include, but are not limited to, history, foreign language, literature (English, American, etc.), music, art, and theater. Social Science courses include, but are not limited to, anthropology, philosophy, political science, psychology, and sociology.

Total Credit Hours: 73

Terrestrial and Freshwater Conservation Option:

The B.S. Biology Terrestrial and Freshwater Conservation option provides a B.S. Biology degree plan that is designed for students primarily interested in the biological aspects of conservation science (e.g. community ecology, population biology, biogeography, conservation genetics and assessment of threatened or endangered species and habitats). To complete this degree option, students must complete the general requirements for B.S. Degree in Biology, and the course requirements listed below.

Students planning to attend graduate school are also encouraged to take CHM 235; MAT 152 or MAT 162; CSC 112, CSC 121.

Conservation Science Requirement (53-54 hours)

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

Elective Courses (16 hours)

Students must take a minimum 16 hours of biology elective courses numbered above 299 to be chosen from the following set of courses:

BIO 311 - Terrestrial Botany

Morphological and anatomical survey of the embryophytes (land plants) with an emphasis on life histories, evolutionary origins, and phylogenetic relationships. May include local field trips.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 322 - Biological Invasions

The scientific study of the invasion process, persistence, and spread of introduced species; ecological and economic impacts and management of introduced species; and how global change influences the impact of introduced species on human resources.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 346 - Animal Nutrition

Exploration of the anatomy and physiology of the digestive system of domestic ruminant and non-ruminant animals, the classification of nutrients, and the application of animal nutrition and feeding.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, CHM 101, CHM 102.
Course Repeatability: Course may not be repeated.

BIO 356 - Vertebrate Natural History

An introduction to the vertebrates with emphasis on systematics, adaptations, life history, behavior, and ecology. Laboratory emphasis on the identification and natural history of regional fauna. Limited field study is required.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

BIO 367 - Antarctic Ecology, Geology, History, and Policy

An in-depth examination of the frozen continent including its geologic origins, ice sheet formation, and fossil record. Its unique ecology, endemic wildlife, discovery and human history, anthropogenic impacts, and current international agreements to protect resources will also be examined. Open to juniors and seniors from all major departments. Also offered as BIO 585 with additional requirements.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 368 - Behavioral Ecology

Evolutionary approach focusing on both proximate and ultimate causes of behavior. Feeding and antipredatory behavior, habitat selection, territoriality, reproductive behavior, mating systems, parental care, animal communication, and the evolution of social behavior. Emphasis on birds, mammals, and fish.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and BIO 366
Course Repeatability: Course may not be repeated.

BIO 378 - Global Environmental Problems

Review and discussion of causes and effects of major environmental problems, with emphasis on ecosystem-level effects and interactions. Topics include extinction, deforestation, climate change, and pollution impacts.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

BIO 430 - Evolutionary Biology

Study of biological change over time through pathways of descent and through adaptation, including how biological diversity, from molecular through organismal levels, originates and is maintained. Focus on modern evolutionary analysis and applications in medicine,

agriculture, and conservation.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: ANT 430
Course Repeatability: Course may not be repeated.

BIO 452 - Mammalogy

Study of mammals, emphasizing their evolution, taxonomic relationships, structural and physiological adaption, and life histories.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 456 - Ornithology

An introduction to avian biology with an emphasis on the evolution, classification, physiology, ecology, natural history, and conservation of birds. The lab for this course is BIOL 456.

Credit Hours: 3

Corequisite Courses: BIOL 456
Prerequisite Courses: BIO 201, BIO 202, and BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIOL 456 - Ornithology Laboratory

Introduction to avian anatomy and field identification of North Carolina birds with field trips to local areas. The class may include weekend camping trips or visits to field stations in North Carolina. This course is the lab for BIO 456.

Credit Hours: 1

Corequisite Courses: BIO 456
Prerequisite Courses: BIO 201, BIO 202, and (BIO 366 or BIO 362)
Course Repeatability: Course may not be repeated.

BIO 458 - Fisheries Biology

An examination of the factors that control the population dynamics of fishes. Introduction to the

principles of fisheries science including estimation of population metrics such as age, growth, mortality, and abundance, fish stock assessment, and fishery management strategies. The lab for this course is BIOL 458.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

BIOL 458 - Fisheries Biology Laboratory

Laboratory exercises designed to compliment material presented in BIO 458 lecture. Exercise includes processing of age and growth information, modeling of growth and mortality, field sampling, abundance estimation, and single-species stock assessments. This course is the lab for BIO 458. This course is the lab for BIO 458.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 458
Course Repeatability: Course may not be repeated.

BIO 460 - Limnology

An examination of the physical, chemical, and biological characteristics of freshwater systems, particularly lakes and ponds. The lab for this course is BIOL 460.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIOL 460 - Limnology Laboratory

Field and laboratory investigations of limnological problems with an emphasis on water quality. This course is the lab for BIO 460.

Credit Hours: 1

Corequisite Courses: BIO 460
Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 475 - Plant Systematics

An introduction to identification, classification, and nomenclature of vascular plants with emphasis on the flora of southeastern North Carolina.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 480 - Field Studies in Biology

A research/experience-oriented field course offered in selected regional locales. Emphasis is placed on distribution, taxonomy, and ecology of animal and/or plant organisms. May be repeated under different subtitles.

Credit Hours: 1 To 6

Prerequisite Courses: BIO 201 and BIO 202
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. BIO 366 and credit in advanced zoology or botany recommended.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

BIO 482 - Wildlife Ecology

Principles of wildlife ecology and management, including population dynamics, diseases, techniques, behavior, habitat manipulations, policy and administration, and contemporary issues such as antihunting. Assigned field problems.

Credit Hours: 3

Prerequisite Courses: BIO 366
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 484 - Methods in Biological Research

Introduction to experimental design, data acquisition, statistical analysis, and preparation of manuscripts and presentations. Emphasis on multi-disciplinary approaches to hypothesis testing. Participation in a collaborative research project.

Credit Hours: 1 To 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.

Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

BIO 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. No more than 6 credits total may be applied to the major. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

BIO 498 - Internship in Biological Sciences

Practical field experience and training through a program of work and study within a business or agency. Students are supervised and evaluated jointly

by a biology faculty member and an on-site supervisor. (Only three semester hours may count toward biology degree requirement.)

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Junior or senior standing and major, minimum overall average of 2.00 and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 499 - Honors Work in Biology

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

EVS 400 - Wildlife Management

Introductory principals of wildlife management spanning management perspectives, managing landscapes for wildlife, and managing wildlife populations.

Credit Hours: 3

Prerequisite Courses: EVS 195, BIO 366.
Course Repeatability: Course may not be repeated.

EVS 440 - Wildlife Field Methods for Conservation

A hands-on course in the tools and techniques of wildlife field methods. Focusing on amphibians, reptiles, birds, and mammals, students learn basic applied wildlife methods employed by conservation and management agencies. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 4

Corequisite Courses: EVS 195, and STT 215 or GGY 222, or permission of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 8 **Repeat Limit:** 1

No more than 10 hours from BIO 480, BIO 491, BIO 498, and BIO 499 can be counted towards the elective 16 hours

In addition, students must take at least 1course from the following (3 hours)

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 360 - Human Dimensions of Natural Resource Management

Examines the interrelationships between the biological sciences, physical sciences, and social sciences within

the human dimensions of natural resource management framework in the context of current environmental issues. Uses contemporary management processes to solve real-world environmental problems.

Credit Hours: 3

Prerequisite Courses: EVS 195
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

Total Credit Hours: 73-74

Business Administration, B.S.

None

Degree Programs and Requirements

The B.S. in Business Administration degree is offered with concentrations in fifteen areas:

Accountancy	Information Systems
Business Analytics	International Business
Cybersecurity	Management and Leadership
Economics	Marketing- Marketing Strategy

Entrepreneurship and Business Development	Marketing - Professional Selling
Finance	Real Estate
FinTech	Supply Chain Management
Human Resource Management	

Requirements for Admission

Students who apply for and are admitted into the Cameron School of Business are initially classified as Pre-Business or Pre-Economics majors. To declare Pre-Business or Pre-Economics, students must have earned a minimum overall grade point average of 2.50 and completed MAT 150 Basic Precalculus, or MAT 160 Precalculus: Algebra & Trigonometry, or earned sufficient placement score for MAT 151 Basic Calculus.

To be formally admitted to the Bachelor of Science in Business Administration program in the Cameron School of Business, a student must meet each of the following admission requirements:

1. Completion of at least 30 credit hours.
2. Completion of each of the following courses with at least a "C-": ENG 101, ENG 201, (ENG 103 may be substituted for ENG 101 and ENG 201; MAT 151 or MAT 161; MIS 213, BAN 280; ACG 201, ACGL 201; ECN 221, and ECN 222.
3. Completion of a minimum of 12 credit hours at UNCW in the Cameron School of Business (may include courses listed in #2 above).
4. An overall grade point average of at least 2.70 on a 4.00 scale for all course work attempted at UNCW.
5. Completion of the Cameron School of Business admission application.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.S. degree in Business Administration a student must successfully complete MGT 455.

Requirements for the B.S. Degree in Business Administration:

Students may qualify for the B.S. degree by:

1. Successful completion of requirements as stated under University Regulations of this catalogue;

2. Attaining a minimum grade point average of 2.00 on all courses attempted in the Cameron School of Business;
3. Successful completion of the courses designated for the degree program. At least 50 percent of the business credit hours required for the degree program must be taken at UNCW.

a. Completion of a University Studies Program as defined in this catalogue. Students seeking the B.S. degree must include MAT 151 (or the equivalent) and ECN 221 - ECN 222 in their university studies program under categories (E.2) and (F), respectively.

b. Cameron School ACG 203; BAN 280; BLA 361; BUS 206, ENG 206; FIN 335; INB 300; MGT 350; MGT 455; MIS 213; MKT 340; SCM 370.

c. Concentration Courses (21 semester hours): Each candidate for the B.S. degree must complete one of the groups of courses shown below for a concentration. No more than 9 credit hours of required and elective concentration courses may be taken before being admitted to the CSB. A minimum of 12 hours of coursework in the concentration must be taken at UNCW.

d. Elective Courses: completion of elective courses sufficient to complete a minimum of 120 semester hours of course credit. Electives are to be chosen by the student after consulting with an advisor.

4. Students seeking the B.S. degree in Business Administration must earn a minimum grade point average of 2.00 in all business and concentration courses attempted in the Cameron School of Business. No grade below a "C-" will be accepted towards graduation in a student's concentration or business school core course in that same concentration.

5. Students who wish to complete two business concentrations may simultaneously apply up to 6 credit hours of course work towards both concentrations if the course work is approved in both concentrations. However, students must complete a minimum of 15 semester hours of course work in each concentration, in addition to the business core courses.

Concentrations

Accountancy

Take the following six courses:

ACG 301 - External Financial Reporting I

Analysis of traditional financial accounting topics and theory. Examines recent developments in accounting measurement and promulgations of the leading professional accounting organizations. ACG 301 emphasizes the development of accounting standards and theory, financial statements, and current assets.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'.
Course Repeatability: Course may not be repeated.

ACG 302 - External Financial Report II

Analysis of traditional financial accounting topics and theory. Examines recent developments in accounting measurement and promulgations of the leading professional accounting organizations. Emphasizes plant assets, long term investments, liabilities, and stockholders' equity.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a minimum grade of C
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ACG 305 - Advanced Managerial Accounting

Identifying, capturing, developing, and reporting financial and other information to support strategic planning and decision making, short run management

decisions, and management control of enterprise programs and activities. Specific topics include: strategic cost analysis, activity-based management, profit planning and budgeting, short run decision structures, and management systems for strategic and operational control.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACG 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business. Grades of C or better in prerequisite courses.
Course Repeatability: Course may not be repeated.
Major Restriction Business Administration

ACG 306 - Accounting Information Systems

An introduction to the aggregation of data in an accounting information system with an emphasis on documentation, internal controls, and transaction cycles. Laboratory projects include advanced spreadsheet functions, an accounting software package and a database package.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'. Prerequisite or corequisite: ACG 301.
Course Repeatability: Course may not be repeated.

ACG 404 - Federal Income Taxes

The study of federal income taxation of individuals with emphasis on business income and expense items and property transactions.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a grade of C or better.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business, or prerequisite course for students in the Accountancy and Business Law minor, or consent of department chair. Grade of C in ACG 301 .
Course Repeatability: Course may not be repeated.

ACG 406 - Auditing Concepts

Study of the objectives, standards, procedures and reporting requirements associated with a public accountant's role in auditing financial statements, auditing internal controls over financial reporting and performing assurance engagements. Students will learn how to make client acceptance decisions, plan and conduct audits and generate appropriate report(s) in light of competitive, legal and ethical constraints.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a minimum grade of C and ACG 306 with a minimum grade of C.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus one course from:

ACG 445 - Current Topics in Accounting

This course is a capstone course integrating concepts from the accounting curriculum, including current topics in the area of ethics and accounting fraud. The course emphasizes case studies, as well as oral and written

communication projects.

Credit Hours: 3

Prerequisite Courses: ACG 306 with a minimum grade of C
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ACG 450 - Introduction to Forensic Accounting and Fraud Examination

ACG 450 is an introduction to different types of occupational frauds, the psychology of the fraudster, different fraud detection and prevention techniques, and the role of ethics in fraud deterrence. Students will also learn techniques and technologies for fraud detection and forensic analysis.

Credit Hours: 3

Prerequisite Courses: ACG 306 with a grade of C or

better.
Additional Restrictions/Requirements: Admission to the Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction Business Administration

Total: 21 semester hours

Additional Information:

Students planning to write the CPA examination are advised that most states require 150 semester hours of college-level coursework to be licensed to practice as a Certified Public Accountant. Students with a bachelor's degree, who have not completed the 150 semester hours required for licensure, may sit for the CPA Exam in North Carolina if they have completed at least 30 semester hours of undergraduate accounting coursework (or 20 hours at the graduate level). It is recommended that students wishing to sit for the exam under North Carolina law complete UNCW's MSA program. Students must complete the Cameron School of Business Assurance of Learning assessments prior to graduation.

Business Analytics

Take the following five courses:

BAN 304 - BAN 304 - Analytics Essentials - Canel

An analytics professional/practitioner is expected to be well-versed in modern analytics tools and techniques. In this course, students will gain competence in and exposure to relevant analytics software tools. The course presents software tools in the context of real-world datasets and problems.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150
Course Repeatability: Course may not be repeated.

BAN 305 - Introduction to Business Analytics

Application of statistical methods to business problems; topics include chi-square analysis, the F distribution, one-way and two-way analysis of variance, simple and multiple regression analysis, and introduction to

forecasting with regression models; use of computer programs in solving statistical problems.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

BAN 306 - Communicating Data with Storytelling

This course provides an introduction as well as hands-on experience in descriptive analytics and data visualization. It introduces students to principles for creating meaningful analysis and displays of quantitative and qualitative data to facilitate managerial decision-making.

Credit Hours: 3

Prerequisite Courses: MATH 111 or MATH 150 or MATH 160
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS

Information Technology major
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.

Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

BAN 403 - Optimizing Data-driven Decisions

Prescriptive Analytics deals with developing analytical models to solve business problems. Prescriptive models are used when a business needs to optimize operational decisions. The solution from these models provide the best solution (profit maximization, cost minimization, minimization of resource utilization, etc.) to the operational decision problems. Students will use MS Excel and AMPL as software tools for optimization in this course.

Credit Hours: 3

Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus two courses from:

(one of which must have a BAN, MIS, or SCM prefix):

BAN 309 - Health Care Analytics

This course develops an understanding of analytics in the healthcare field. Emphasis is given to how technology and analytics impact healthcare. Analytical tools are used to solve real healthcare challenges, improve processes, and help make important healthcare business decisions.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

BAN 310 - Sports Analytics

This course introduces fundamental analytics concepts in the context of sports. A variety of sports, professional and amateur, are covered with an emphasis on using analytics techniques and tools to add value and fuel competitive advantage. Software tools will be used extensively to illustrate concepts.

Credit Hours: 3

Prerequisite Courses: BAN 280 or STT 215
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 400 - Big Data Analytics

Acquisition, management, and analysis of large sets of data that are often encountered in a business environment. Focuses on challenges specific to analysis of data at scale. Real-world applications and case studies are examined.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 304
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major

Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 416 - Transportation Analytics

This course develops skills for solving complex business problems with the aid of data analytical techniques in the transportation field. Students will develop business analysis frameworks and apply Excel-based optimization tools to assess transportation solutions.

Credit Hours: 3

Prerequisite Courses: Prerequisite: SCM 370 and admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

BAN 417 - Supply Chain Analytics

This course introduces students to quantitative models the firms use to manage supply and demand. Managing supply and demand involves managing customer preferences, classify suppliers and customers, optimize product pricing, and promotion

strategies. The applications of the above models in the hospitality industry, broadcasting, show business are discussed.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 480 - Business and Economic Forecasting

Development of an approach to forecasting through the study of time-series techniques including moving averages, exponential smoothing, regression, and Box-Jenkins.

Credit Hours: 3

Prerequisite Courses: BAN 280
Additional Restrictions/Requirements: Prerequisite

course or consent of department chair and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

BAN 485 - Introduction to Business Simulation

Introduction to simulation models as tools in the analysis of business problems. Discrete event simulation models for production and service systems are introduced through the use of a computer simulation language.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

BAN 495 - Seminar in Business Analytics

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or

senior standing and consent of the department chairperson and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

BAN 498 - Internship in Business Analytics

Involves the application of business analytic skills developed in the academic environment to problems in a real-world operating environment. The participant will receive practical training and experience under the guidance of the staff of a local business or government organization and a faculty supervisor. Available internships are filled on a competitive basis.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Consent of faculty supervisor and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FIN 441 - Financial Analytics

Adoption of big data techniques in large US business soared from 17% in 2015 to 59% in 2018, according to a recent article in the Forbes magazine. Building on this motivation, this course will be designed to introduce statistical and machine learning methods developed in the recent literature and discuss their applications in financial markets as well as industries such as banking and insurance. We start from basic regression analysis and build on to discuss advanced methods such as decision tree and neural networks. Throughout the course, the emphasis will be on practical uses rather than statistical details; however, a fair amount of background information on the fundamentals of the methods used will still be provided.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MIS 303 - Programming for Analytics

This course introduces the essential general programming concepts and techniques for data analytics. Students will learn programming foundations, application development, and how to integrate applications with business operations. The course covers hands-on issues in programming for analytics,

which includes accessing data, manipulating data objects, analyzing data using common statistical methods, generating reproducible statistical reports, and creating informative visualizations.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 305 - Data Visualization

This course provides design principles for creating displays of quantitative and qualitative data to facilitate managerial decision-making. The use of popular and powerful data visualization and dashboarding software tools is emphasized.

Credit Hours: 3

Prerequisite Courses: BAN 305
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 306 - Text Data Analytics

The past decade has witnessed an explosion of digital text-based data produced by social media platforms, websites, emails, and the digitization of historical archives. These new data sources hold enormous potential to address a range of problems in various fields. Quantitative text analytics techniques allow us to derive insights from these data. This course explores methods for pre-processing, analyzing, and visualizing text-based data. Students will use current software tools to perform data analytics.

Credit Hours: 3

Prerequisite Courses: BAN 280 or STT 215
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

MKT 444 - Digital Marketing Analytics

Focus of the class will be on learning digital marketing skills and applying them to create effective marketing strategies. Emphasis is on project-oriented assignments with an application to real-world scenarios. Offers insight into a variety of digital promotional channels, such as search engine optimization (SEM), search engine marketing (SEM), mobile marketing, and social media marketing, as well as the analytics of their effectiveness.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343
Additional Restrictions/Requirements: Prerequisite or co-requisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 475 - Advanced Supply Chain Management

This course provides a detailed analysis of the materials planning and execution systems used to manage the flow of material in service and manufacturing organizations to facilitate all stages of the supply chain. Topics include systems for demand management and forecasting techniques, inventory control systems for distribution channels, materials and capacity requirements planning systems, scheduling and order dispatching systems.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

SCM 477 - Operations Planning and Scheduling

Application of scheduling in manufacturing and service organizations. Topics include machine scheduling, job shop scheduling, project scheduling, flexible assembly system scheduling, lot sizing and scheduling, interval

scheduling, and personnel scheduling.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 478 - Supply Chain Modeling and Analysis

This course is designed to provide students with the conceptual tools to understand the structure and dynamics of complex systems by integrating performance measurement and modeling simulation methodologies. It provides the students with the solid understanding needed to effectively apply strategic management tools and techniques for increased performance and competitive advantage in businesses. Ultimately, it will prepare them to become effective systems analysts in the field.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to CSB.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 21 semester hours

Cybersecurity

Take the following four courses:

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and processes.

Credit Hours: 3

University Studies: Building

Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CYBR - 202 - Cyber Policy, Legal, Ethics, Compliance
CYBR - 307 - Essential Technical Cybersecurity for Business

MIS 320 - Network Fundamentals

Introduction to the OSI model, network topologies, IP addressing and subnet masks, simple routing techniques, and basic switching terminology. Topics include the basic functions of the seven layers of the OSI model, different classes of IP addressing and subnetting, router login scripts.

Credit Hours: 3

Prerequisite or Corequisite Courses: CIT 110 or CYBR 201 or MIS 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Cybersecurity major or declared BS Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity Minor

Plus three courses from:

CIT - 301 - Cloud Computing and Virtualization
CYBR - 322 - Information Assurance
CYBR - 324 - Network Security
CYBR - 340 - Cybersecurity Program Management
CYBR - 365 - Ethical Hacking
CYBR - 366 - Digital Forensics
CYBR - 437 - Supply Chain Cybersecurity
CYBR - 440 - Cyber Risk
CYBR - 444 - Cyber Law and Cases
CYBR - 491 - Directed Individual Study
CYBR - 495 - Seminar in Cybersecurity
CYBR - 498 - Internship
CYBR - 499 - Honors Work in Cybersecurity
MIS - 352 - Windows System Administration

CYBR 435 - Cyber Fraud and Investigation

Investigation of cyber fraud, and the study of plans and processes for a holistic approach to preventing and

mitigating fraud throughout the system lifecycle. Specific attention paid to financial fraud and the application of forensics techniques to respond to and investigate financial incidents.

Credit Hours: 3

Prerequisite Courses: ACG 201, FIN 335, CYBR 202, and (STT 215 or BAN 280).
Course Repeatability: Course may not be repeated.

Total: 21 semester hours

Additional Information:

Students pursuing this concentration cannot also pursue a Cybersecurity Minor.

Economics

Take the following five courses:

ECN 321 - Intermediate Microeconomics

A theoretical analysis of individual consumer and firm behavior and general equilibrium.

Credit Hours: 3

Prerequisite Courses: (MAT 151 or MAT 161) and ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 322 - Intermediate Macroeconomics

A theoretical analysis of the determination of aggregate income, aggregate employment, and the average price level and role of monetary and fiscal policy in the macroeconomy.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of 6 semester hours of appropriate mathematics or statistics at the 101 level or higher, with minimum grade of C-.
Course Repeatability: Course may not be repeated.

ECN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a domestic and international setting; analysis of international monetary flows; financial decision making in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: FIN 324
Course Repeatability: Course may not be repeated.

or

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite

courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 428 - Applied Regional Analysis

Theoretical and applied analysis of patterns and trends in local, state, and regional economic growth. Use of current computer-based methods in regional economic analysis including economic impact models. Applied analysis of current regional issues and government policies to address these issues.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health, nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Plus two courses from:

(one of which must be numbered above 399):

ECN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a

domestic and international setting; analysis of international monetary flows; financial decision making in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: FIN 324
Course Repeatability: Course may not be repeated.

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic perspective. Specific focus will be given to methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 327 - Health Economics

Analysis of health-care delivery using economic reasoning. Specific topics include the demand for

health, medical care, and insurance; socio-economic patterns in health-related behaviors and outcomes; physician and hospital services; private and public financing of care; regulation of the health-care marketplace; and medical innovation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Course Repeatability: Course may not be repeated.

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of

Business or declared minor in economics
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

ECN 421 - History of Economic Thought

Scientific economic thought and philosophy from ancient to modern times. Open-ended as to dates of

time period covered. Primary emphasis is on topics as opposed to schools of thought.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

ECN 427 - Labor Economics

An analysis of the demand for and the supply of labor at the individual and the aggregate level; labor unions and collective bargaining.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 428 - Applied Regional Analysis

Theoretical and applied analysis of patterns and trends in local, state, and regional economic growth. Use of current computer-based methods in regional economic analysis including economic impact models. Applied analysis of current regional issues and government policies to address these issues.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health, nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 432 - Advanced Open Economy Macroeconomics

Analysis of forces that determine output, employment, inflation, wages, and interest rates in an open-economy setting. Topics include the challenges faced by policymakers, the role of exchange rates in the macroeconomic adjustment process, guidelines for monetary policy, and interactions between the macro economy and the financial system. Special emphasis on using high frequency macroeconomic data - such as employment, retail sales, housing, and CPI releases - to assess economic trends and present research on important policy issues. This course satisfies the oral competency requirement for the B.A. degree in Economics.

Credit Hours: 3

Prerequisite Courses: ECN 322
Additional Restrictions/Requirements: Prerequisite course and admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 433 - Introduction to Speculative Markets

Elementary economics of financial futures and options markets. Mechanics of trading and coverage of existing regulations. Pricing and strategies in options and futures contracts in the markets for financial assets and commodities. Hedging, risk management and valuation.

Credit Hours: 3

Prerequisite Courses: ECN 324 and FIN 335
Additional Restrictions/Requirements: Prerequisite courses or consent of department chair and admission to Cameron School of Business.
Crosslisting: FIN 433
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ECN 495 - Seminar in Economics

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing and consent of the department chairperson and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

BAN 400 - Big Data Analytics

Acquisition, management, and analysis of large sets of data that are often encountered in a business environment. Focuses on challenges specific to analysis of data at scale. Real-world applications and case studies are examined.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 304
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

FIN 431 - Real Estate Investment Analysis

The decision-making process in real estate investment analysis including risk and return, financing alternatives, tax implications, and pricing and development alternatives.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 440 - Portfolio Design and Management

Students develop skills to analyze individual securities and then focus on investment portfolio design. These skills will ultimately be applied to UNCW's real-dollar student-managed investment fund.

Credit Hours: 3

Prerequisite Courses: FIN 330 and FIN 336
Additional Restrictions/Requirements: BS Business Administration, and admission to the Cameron School

of Business, and a B- or better in FIN 330 and FIN 336.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

FIN 441 - Financial Analytics

Adoption of big data techniques in large US business soared from 17% in 2015 to 59% in 2018, according to a recent article in the Forbes magazine. Building on this motivation, this course will be designed to introduce statistical and machine learning methods developed in the recent literature and discuss their applications in financial markets as well as industries such as banking and insurance. We start from basic regression analysis and build on to discuss advanced methods such as decision tree and neural networks. Throughout the course, the emphasis will be on practical uses rather than statistical details; however, a fair amount of background information on the fundamentals of the methods used will still be provided.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

MKT 440 - Marketing Analytics

Focuses on the role of evidence-based data in decision-making and how to leverage data as a strategic asset. Emphasis on the predictive potential of data by translating vast amounts of complex data into manageable information in order to make sound decisions. The effective use of marketing metrics offers insights into customer preferences and trends and allows for the detection of patterns, the making of new associations, and the acquisition of a deeper understanding of customers.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business

Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 443 - Marketing Research Design

The development and utilization of the marketing research process and the components of a marketing research project for business decisions. Emphasis on the collection of qualitative and quantitative data to solve a specific business problem or identify opportunities used to develop and evaluate courses of marketing action.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

Total: 21 semester hours

Entrepreneurship and Business Development

Take the following four courses:

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

EBD 480 - Managing Emerging Ventures

Examination of the strategies for successful venture growth. Emphasis is placed on the challenges

associated with maintaining a high rate of growth in relatively new firms. Particular attention directed to integrating strategic, operational and cultural issues. Students develop business plans for a new venture or business development. Extensive use of case analysis.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 380.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EBD 481 - Entrepreneurial Finance and Valuation

Focus on financial planning and analysis, sources of funding, and business valuation. Particular attention directed to debt financing, valuation theory and techniques, due diligence, angel investing, venture capital funding, and public/private offerings. Extensive use of case study.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 380.
Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

EBD 490 - Business Development and Commercialization

Course focuses on commercialization of an early stage firm's product, technology and ideas. Issues such as scalability,licensing, intellectual property, project management, and the managerial side of expansion and growth will be studied. The course will also examine entrepreneurial activities commonly seen in coastal regions, such as marine science technologies, aquaculture, tourism, shipping, and other related activities. Extensive use of case study and field projects.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 380.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

And one of the following:

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.

Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

MGT 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: EBD 354
Course Repeatability: Course may not be repeated.

EBD - 393 - Corporate Entrepreneurship

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus two courses from:

BLA 461 - Commercial Law

Study of the commercial legal environment in which business enterprises operate. Examines the law of contracts, sales and warranties, security interests, commercial paper, and debtor and creditor rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.

Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EBD - 393 - Corporate Entrepreneurship

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

EBD 491 - Directed Individual Study

For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 3.00, consent of department chairman, and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

EBD 495 - Topics in Entrepreneurship and Business Development

Specific topics in entrepreneurship and business development not addressed in depth in other courses. May be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Admission to

Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: EBD 354
Course Repeatability: Course may not be repeated.

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations to their companies and to other people. Ethics experts argue students must develop the skills needed

to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Students will explore historical and contemporary cases in managerial ethics applying theories of ethical reasoning. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures,

performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 357 - Hospitality Management

The course provides a general overview of the hospitality industry and the issues related to successful management of businesses within this industry. In particular, these sectors include food service, lodging, entertainment, medical, and other related industries such as cruise lines and supplier industries. Special attention will be given to the hospitality sector in the Carolinas, and issues related to entrepreneurship within hospitality.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining, integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 348 - Professional Selling

Examination of the theory and practice of sales skills designed to provide a professional foundation to

students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Total: 21 semester hours

Finance

Take the following two courses:

FIN 330 - Principles of Investments

An introduction to alternative investments, with major emphasis on financial instruments. Practical descriptive material and relevant theoretical applications. Topics include stocks, bonds, and other financial alternatives.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222 and FIN 335
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FIN 336 - Intermediate Corporate Finance

The study of the theory and practice of corporate finance with special emphasis on the evaluation and financing of capital expenditures. Topics include cash flow determination, firm valuation, the Capital Asset Pricing Model, and an introduction to option pricing.

Credit Hours: 3

Prerequisite Courses: FIN 335
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus five courses from:

(four of which must be numbered above 399, and at least three courses must have a FIN prefix):

ECN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a domestic and international setting; analysis of international monetary flows; financial decision making in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: FIN 324
Course Repeatability: Course may not be repeated.

or

FIN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a domestic and international setting; analysis of international monetary flows; financial decision making

in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: ECN 324
Course Repeatability: Course may not be repeated.

FIN 331 - Real Estate

Principles of property management and practices relating to appraisal, sales, ownership, control, financing, and transfer of real property.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 332 - Risk Management and Insurance

An introduction to the risk management function and to the basic methods used to handle risks facing the

business enterprise, families and individuals. Emphasis is on the insurance method of handling risk with study of the concepts underlying insurance, the fundamentals of insurance contracts, and a broad selection of policy coverage in the property and liability, and life and health fields.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

FIN 430 - Investment Management

An analytical approach to the valuation of stocks, bonds and options and the placement of those securities in Markowitz-efficient portfolios. Technical and fundamental analysis, market efficiency and valuation methods are examined. Both application and theory are emphasized.

Credit Hours: 3

Prerequisite Courses: FIN 330 and FIN 335
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 440 - Portfolio Design and Management

Students develop skills to analyze individual securities and then focus on investment portfolio design. These skills will ultimately be applied to UNCW's real-dollar student-managed investment fund.

Credit Hours: 3

Prerequisite Courses: FIN 330 and FIN 336
Additional Restrictions/Requirements: BS Business Administration, and admission to the Cameron School of Business, and a B- or better in FIN 330 and FIN 336.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

FIN 431 - Real Estate Investment Analysis

The decision-making process in real estate investment analysis including risk and return, financing alternatives, tax implications, and pricing and development alternatives.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 433 - Financial Derivatives and Risk Management

Valuation of financial derivatives, including forwards, futures, options, and swaps. Application of the Black-Scholes-Merton model, the binomial option pricing model, and the cost of carry model. Use of financial derivatives for hedging, speculation, and arbirtrage and risk management.

Credit Hours: 3

Prerequisite Courses: FIN 335

Additional Restrictions/Requirements: Prerequisite course or consent of the department chair and admission to Cameron School of Business.
Crosslisting: ECN 433
Course Repeatability: Course may not be repeated.

FIN 434 - Fixed Income Securities and Derivatives

This course investigates fixed income securities (i.e. bonds) and their derivatives. The course will describe the major players in fixed income markets, the key institutions, broad empirical regularities and analytical tools that are used for pricing and risk management. Some parts of this course are analytical while others are institutional.

Credit Hours: 3

Prerequisite Courses: FIN 330
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 436 - Advanced Financial Management

Financial analysis and decision making in the modern business organization. Theoretical foundations of financial decision-making are emphasized, including both working capital and fixed capital requirements.

Credit Hours: 3

Prerequisite Courses: FIN 330 and FIN 336
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 437 - Commercial Bank Management

A study of commercial bank operations and the regulatory environment of banking. Topics will include the evolution of regulation in the United States, industry structure, analysis of bank financial statements, asset/liability management, and capital requirements.

Credit Hours: 3

Prerequisite Courses: ECN 324 and FIN 335
Additional Restrictions/Requirements: Prerequisite

courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 438 - Financial Statement Analysis

This course focuses on the analysis of financial statments. Topics covered include credit analysis, profitability analysis, revenue recognition, asset recognition, liability recognition, and equity recognition. Specific attention is given to where managers have flexibility in accounting standards and how this might impact the analysis of the firm. Students are required to synthesize material from lecture to the analysis of real companies.

Credit Hours: 3

Prerequisite Courses: FIN 335
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

FIN 441 - Financial Analytics

Adoption of big data techniques in large US business soared from 17% in 2015 to 59% in 2018, according to a recent article in the Forbes magazine. Building on this motivation, this course will be designed to introduce statistical and machine learning methods developed in the recent literature and discuss their applications in financial markets as well as industries such as banking and insurance. We start from basic regression analysis

and build on to discuss advanced methods such as decision tree and neural networks. Throughout the course, the emphasis will be on practical uses rather than statistical details; however, a fair amount of background information on the fundamentals of the methods used will still be provided.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

FIN 442 - Introduction to FinTech

This course advances the students' knowledge by exploring the ways in which new technologies are disrupting the financial services industry—driving material change in business models, products, applications and customer user interfaces and the resultant disintermediation. Amongst the significant technological trends affecting financial services into the 2020's, the class will explore AI, smart contracts,

blockchain technology, and big data. We will then turn to four sectors of specific opportunities: payments, credit, trading and risk management. We will explore the competitive and strategic landscape amongst FinTech start-ups, incumbents from big finance and big tech in the U.S., China, India, and Europe. Students will learn about technological advances in data and analytics that are enabling these innovations.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisites and admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

FIN 443 - Blockchain in Finance

The purpose of this course is to provide a sound working knowledge of cryptocurrency, blockchain and their derivatives. This course is designed for students wishing to explore blockchain technology's potential use—by entrepreneurs, investors and commercial concerns adapting to a changing world of money and finance.

Starting with the basics of Bitcoin, students will gain an understanding of the fundamentals of blockchain technology, distributed ledgers and smart ledgers. The class will examine current and potential blockchain applications in the financial, commercial and even military sectors. This will include reviews of potential use cases for payment systems, central banking, venture capital, secondary market trading, trade finance, commercial banking, post trade possessing and digital ID as well as applications in data management.

This course will examine not only the markets but also the regulatory landscape for cryptocurrencies, initial coin offerings, other tokens and crypto derivatives. By examining competing influences and the analytical tools that are used for tracking, pricing and risk management.

Some parts of the course will be fairly technical while others will be largely conceptual. Each session will be organized around one or two key topics. In addition, class notes, current articles and handouts will be used to supplement and clarify issues.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisites and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 445 - Healthcare Finance

This course is a covers numerous topics in the area of Healthcare Finance. You will learn to apply tools of Financial Management to the management of Healthcare entities. Ask anyone who works in the field of Healthcare why you need to have a special course in the topic, and they will unanimously say "because healthcare is different." To this end, we will cover topics such as the evolution the healthcare payment system in the United States (with some comparison to other countries). We will cover Revenue models and the Revenue cycle, as well as cost models. We will discuss how to measure community benefit, and we will do a deep dive into financial statements of hospitals and look at topics such as working capital management and cash management (critical issues in healthcare, but applicable to any firm). My goal is that you will leave the course with a better understanding of how

healthcare is paid for in the US and the financial skills you will need to step into any healthcare entity and be able to make sound decisions regarding the financial aspects of the firm.

Credit Hours: 3

Prerequisite Courses: FIN 335 .
Additional Restrictions/Requirements: Prerequisites and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
FIN 459 International Consultancy

FIN 495 - Seminar in Finance

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, consent of the department chairperson and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ACG 301 - External Financial Reporting I

Analysis of traditional financial accounting topics and theory. Examines recent developments in accounting measurement and promulgations of the leading professional accounting organizations. ACG 301 emphasizes the development of accounting standards and theory, financial statements, and current assets.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'.
Course Repeatability: Course may not be repeated.

ACG 302 - External Financial Report II

Analysis of traditional financial accounting topics and theory. Examines recent developments in accounting measurement and promulgations of the leading professional accounting organizations. Emphasizes plant assets, long term investments, liabilities, and stockholders' equity.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a minimum

grade of C
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ACG 305 - Advanced Managerial Accounting

Identifying, capturing, developing, and reporting financial and other information to support strategic planning and decision making, short run management decisions, and management control of enterprise programs and activities. Specific topics include: strategic cost analysis, activity-based management, profit planning and budgeting, short run decision structures, and management systems for strategic and operational control.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACG 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business. Grades of C or better in prerequisite courses.
Course Repeatability: Course may not be repeated.
Major Restriction Business Administration

ACG 404 - Federal Income Taxes

The study of federal income taxation of individuals with emphasis on business income and expense items and property transactions.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a grade of C or better.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business, or prerequisite course for students in the Accountancy and Business Law minor, or consent of department chair. Grade of C in ACG 301 .
Course Repeatability: Course may not be repeated.

BAN 400 - Big Data Analytics

Acquisition, management, and analysis of large sets of data that are often encountered in a business environment. Focuses on challenges specific to analysis of data at scale. Real-world applications and case studies are examined.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 304
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or

MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MKT 440 - Marketing Analytics

Focuses on the role of evidence-based data in decision-making and how to leverage data as a strategic asset. Emphasis on the predictive potential of data by translating vast amounts of complex data into manageable information in order to make sound decisions. The effective use of marketing metrics offers insights into customer preferences and trends and allows for the detection of patterns, the making of new associations, and the acquisition of a deeper understanding of customers.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 443 - Marketing Research Design

The development and utilization of the marketing research process and the components of a marketing research project for business decisions. Emphasis on the collection of qualitative and quantitative data to solve a specific business problem or identify opportunities used to develop and evaluate courses of marketing action.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

Total: 21 semester hours

FinTech

Take the following six courses:

FIN 330 - Principles of Investments

An introduction to alternative investments, with major emphasis on financial instruments. Practical descriptive material and relevant theoretical applications. Topics include stocks, bonds, and other financial alternatives.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222 and FIN 335
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FIN 336 - Intermediate Corporate Finance

The study of the theory and practice of corporate finance with special emphasis on the evaluation and financing of capital expenditures. Topics include cash flow determination, firm valuation, the Capital Asset Pricing Model, and an introduction to option pricing.

Credit Hours: 3

Prerequisite Courses: FIN 335
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 441 - Financial Analytics

Adoption of big data techniques in large US business soared from 17% in 2015 to 59% in 2018, according to a recent article in the Forbes magazine. Building on this motivation, this course will be designed to introduce statistical and machine learning methods developed in the recent literature and discuss their applications in financial markets as well as industries such as banking and insurance. We start from basic regression analysis and build on to discuss advanced methods such as decision tree and neural networks. Throughout the course, the emphasis will be on practical uses rather than statistical details; however, a fair amount of background information on the fundamentals of the methods used will still be provided.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

FIN 442 - Introduction to FinTech

This course advances the students' knowledge by exploring the ways in which new technologies are disrupting the financial services industry—driving material change in business models, products, applications and customer user interfaces and the resultant disintermediation. Amongst the significant technological trends affecting financial services into the 2020's, the class will explore AI, smart contracts, blockchain technology, and big data. We will then turn to four sectors of specific opportunities: payments, credit, trading and risk management. We will explore the competitive and strategic landscape amongst FinTech start-ups, incumbents from big finance and big tech in the U.S., China, India, and Europe. Students will learn about technological advances in data and analytics that are enabling these innovations.

Credit Hours: 3

Prerequisite Courses: FIN 335.

Additional Restrictions/Requirements: Prerequisites and admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

FIN 443 - Blockchain in Finance

The purpose of this course is to provide a sound working knowledge of cryptocurrency, blockchain and their derivatives. This course is designed for students wishing to explore blockchain technology's potential use—by entrepreneurs, investors and commercial concerns adapting to a changing world of money and finance.
Starting with the basics of Bitcoin, students will gain an understanding of the fundamentals of blockchain technology, distributed ledgers and smart ledgers. The class will examine current and potential blockchain applications in the financial, commercial and even military sectors. This will include reviews of potential use cases for payment systems, central banking, venture capital, secondary market trading, trade finance, commercial banking, post trade possessing and digital ID as well as applications in data management.
This course will examine not only the markets but also

the regulatory landscape for cryptocurrencies, initial coin offerings, other tokens and crypto derivatives. By examining competing influences and the analytical tools that are used for tracking, pricing and risk management.
Some parts of the course will be fairly technical while others will be largely conceptual. Each session will be organized around one or two key topics. In addition, class notes, current articles and handouts will be used to supplement and clarify issues.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisites and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MIS 303 - Programming for Analytics

This course introduces the essential general programming concepts and techniques for data analytics. Students will learn programming foundations, application development, and how to integrate applications with business operations. The course

covers hands-on issues in programming for analytics, which includes accessing data, manipulating data objects, analyzing data using common statistical methods, generating reproducible statistical reports, and creating informative visualizations.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

Plus one course from:

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These

topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

CYBR 435 - Cyber Fraud and Investigation

Investigation of cyber fraud, and the study of plans and processes for a holistic approach to preventing and mitigating fraud throughout the system lifecycle. Specific attention paid to financial fraud and the application of forensics techniques to respond to and

investigate financial incidents.

Credit Hours: 3

Prerequisite Courses: ACG 201, FIN 335, CYBR 202, and (STT 215 or BAN 280).
Course Repeatability: Course may not be repeated.

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite

courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MIS 305 - Data Visualization

This course provides design principles for creating displays of quantitative and qualitative data to facilitate managerial decision-making. The use of popular and powerful data visualization and dashboarding software tools is emphasized.

Credit Hours: 3

Prerequisite Courses: BAN 305
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 306 - Text Data Analytics

The past decade has witnessed an explosion of digital text-based data produced by social media platforms, websites, emails, and the digitization of historical archives. These new data sources hold enormous potential to address a range of problems in various fields. Quantitative text analytics techniques allow us to

derive insights from these data. This course explores methods for pre-processing, analyzing, and visualizing text-based data. Students will use current software tools to perform data analytics.

Credit Hours: 3

Prerequisite Courses: BAN 280 or STT 215
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an

emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

Total: 21 semester hours

Human Resource Management

Take the following three courses:

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 358 - Organizational Behavior

Application of behavioral science concepts in the management of organizations. Emphasis on increasing productivity on the individual, group, and organizational level. Particular attention directed to analyzing organizations, developing motivational programs, designing enriching jobs, leadership development, and managing organizational change.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 359 - Talent Acquisition

This is an advanced course designed for management and human resource students. Upon completion, students will be able to develop and execute a recruitment and selection plan that ensures the organization is able to attract and retain top talent in order to meet company objectives. Students will gain expertise in designing and conducting valid employment interviews. Attention is given to the legal environment, planning, and job analyses.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

Plus two courses from:

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace

performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 457 - Training & Talent Development

Understanding of the processes involved in developing, administering, and evaluating effective talent development programs that will increase the productivity of employees and organizations. Particular attention on assessing training needs, identifying learning objectives, and using technology in the delivery of talent development programs.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350 and MGT 356
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 458 - Total Rewards

Examination of how compensation, benefits, motivation and evaluation systems can be used to enhance the satisfaction and performance of organizational talent. Particular attention on job analysis, job evaluation, pay levels and structures, pay for performance plans, performance appraisals, benefits, and general pay administration.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356

Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

Plus two courses from:

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations to their companies and to other people. Ethics experts

argue students must develop the skills needed to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Students will explore historical and contemporary cases in managerial ethics applying theories of ethical reasoning. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 452 - Leadership and Organizational Change

Study the processes associated with transforming organizations in a world of continuous change. Particular attention on leadership skills, ethics, organizational structure, and corporate culture with the shared purpose of fostering innovation, continuous improvement, and organizational performance.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 358.
Prerequisite Courses: MGT 356.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

MGT - 453 - Leading Virtual Teams

MGT 456 - Employee and Labor Relations

Study of the current legislation affecting employee and labor relations, union organizing, collective bargaining, contract administration, union-management relations, and best practices in employee relations in both

unionized and non-unionized environments.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 457 - Training & Talent Development

Understanding of the processes involved in developing, administering, and evaluating effective talent development programs that will increase the productivity of employees and organizations. Particular attention on assessing training needs, identifying learning objectives, and using technology in the delivery of talent development programs.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350 and MGT 356
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 458 - Total Rewards

Examination of how compensation, benefits, motivation and evaluation systems can be used to enhance the satisfaction and performance of organizational talent. Particular attention on job analysis, job evaluation, pay levels and structures, pay for performance plans, performance appraisals, benefits, and general pay administration.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining,

integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 495 - Seminar in Management

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing and consent of the department chairperson and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Total: 21 semester hours

Additional information:

Students pursuing this concentration cannot also pursue a concentration in Management and Leadership.

Information Systems

Take the following five courses:

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

MIS 316 - Business Application Development

Intermediate programming in an event driven, rapid application development context. Emphasis is on writing high-quality code that is easy to debug, test, and maintain, culminating in database interaction.

Credit Hours: 3

Prerequisite or Corequisite Courses: and MIS 216 and MIS 315
Prerequisite Courses: CSC 112 or CSC 131
Additional Restrictions/Requirements: Students must take MIS 315 as a prerequisite or corequisite. Students must also take one of the following three courses (CSC 112 or CSC 131 as a prerequisite) or (MIS 216 as a prerequisite/corequisite).
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 326 Digital Transformation in Business

MIS 411 - Information Systems Analysis

Processes and methods used for identifying and documenting information systems requirements and

developing systems specifications. Topics include the systems development life cycle, analysis tools, development methodologies, and techniques for effective communication.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 315.
Prerequisite Courses: Prerequisite: CIT 213 with a minimum grade of C-, or prerequisite/corequisite: MIS 315.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

MIS 413 - Systems Design/Capstone Project

Involves the analysis, design and implementation of a real world project employing a 3-tier development process. New skills introduced include advanced web

development concepts, emerging web tools, and project management. Topics expanded are database design, systems analysis and design, UML, and technical communication.

Credit Hours: 3

Prerequisite Courses: MIS 316 and MIS 411.
Additional Restrictions/Requirements:
Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

or

MIS 480 - IT Resource Planning and Management

This course will explore the management and strategic alignment of IT resources within the organization. Topics include IT strategy, IT alignment, planning and managing technology resources and integration of emerging technology into the organization.

Credit Hours: 3

Prerequisite Courses: MIS 411 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Plus two courses from:

At least three credit hours must come from courses with an MIS prefix. No more than three credit hours

combined from MIS 491, MIS 495, and MIS 498 will count towards the Information Systems concentration.

Eligible courses:

ACG 306 - Accounting Information Systems

An introduction to the aggregation of data in an accounting information system with an emphasis on documentation, internal controls, and transaction cycles. Laboratory projects include advanced spreadsheet functions, an accounting software package and a database package.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'. Prerequisite or corequisite: ACG 301.
Course Repeatability: Course may not be repeated.

Any MIS course at 300-level or higher

BAN 305 - Introduction to Business Analytics

Application of statistical methods to business problems; topics include chi-square analysis, the F distribution, one-way and two-way analysis of variance, simple and

multiple regression analysis, and introduction to forecasting with regression models; use of computer programs in solving statistical problems.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

CIT - 410 - Web Application Development
CIT - 425 - Human-Computer Interfaces

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and processes.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

SCM 375 - Quality Management

This course introduces quantitative and qualitative concepts and applications of quality management in manufacturing and service organizations. Topics include quality design, continuous improvement, cost of quality, employee involvement in quality, team building for quality, quality circles, service quality, statistical process control, and the relationship among quality, productivity, and competitiveness.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 21 hours

International Business

The International Business concentration is designed for those students seeking career opportunities in internationally focused organizations or those students pursuing an extended or permanent work experience abroad. The International Business concentration has a cross-functional business focus and does not reside in any one Cameron School of Business department. Faculty members representing all departments work as a team to guide the program and advise students. Students in this concentration must (1) be proficient in a language other than their native language at the "intermediate mid" level of proficiency according to the ACTFL standards or its equivalent, and (2) complete a formal international experience (i.e., study abroad, international internship, exchange). The language proficiency requirement can be met by (1) passing a professionally administered language proficiency exam at the 'intermediate mid' level of proficiency, or (2) completing the intermediate sequence of the language (e.g., through the SPN/GER/FRH 202 level or equivalent) with a grade of a C- or better, or (3) completing an advanced world language course for which the 202 level of the language (or equivalent) is a prerequisite with a grade of a C- or better, or (4)

completing the requirements for a major or minor in the language. Language proficiency exams must assess written and oral communication, be professionally administered, and align to ACTFL standards. Students should contact the UNCW World Languages & Cultures Department to ensure any non-UNCW administered proficiency test meets the expected quality standards. Regarding the international experience requirement, the INB Coordinator has ultimate authority to award credit for such experiences, though generally a formalized study abroad, exchange, or international internship program offered through UNCW will meet this requirement. Virtual programs may meet this requirement with approval from the INB Coordinator.

To improve the potential students are well-prepared for an international business career, the concentration is designed to provide students with both (1) an overview of international business from a cross-functional business perspective by taking international-focused classes from various business disciplines, as well as (2) courses within a specific business discipline with international applicability. As such, students concentrating in International Business will select a track within a business discipline. Students may select

one of ten tracks within International Business. All International Business tracks are 21 semester hours. Students may not concentrate in more than one INB track, but are encouraged to add any other CSB concentration. Students may "double-count" up to six credit hours to meet the degree requirements of two different concentrations.

International Business- Business Analytics Track

INB Core

Take four of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include

managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.

Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BAN Courses

Plus take three courses from:

BAN 304 - BAN 304 - Analytics Essentials - Canel

An analytics professional/practitioner is expected to be well-versed in modern analytics tools and techniques. In this course, students will gain competence in and exposure to relevant analytics software tools. The course presents software tools in the context of real-world datasets and problems.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150
Course Repeatability: Course may not be repeated.

BAN 305 - Introduction to Business Analytics

Application of statistical methods to business problems; topics include chi-square analysis, the F distribution, one-way and two-way analysis of variance, simple and multiple regression analysis, and introduction to forecasting with regression models; use of computer programs in solving statistical problems.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

BAN 306 - Communicating Data with Storytelling

This course provides an introduction as well as hands-on experience in descriptive analytics and data visualization. It introduces students to principles for creating meaningful analysis and displays of quantitative and qualitative data to facilitate managerial decision-making.

Credit Hours: 3

Prerequisite Courses: MATH 111 or MATH 150 or MATH 160
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN

minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

BAN 403 - Optimizing Data-driven Decisions

Prescriptive Analytics deals with developing analytical models to solve business problems. Prescriptive models are used when a business needs to optimize operational decisions. The solution from these models provide the best solution (profit maximization, cost minimization, minimization of resource utilization, etc.) to the operational decision problems. Students will use MS Excel and AMPL as software tools for optimization in this course.

Credit Hours: 3

Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300.

International Business- Cybersecurity Track

INB Core

Take four of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or

senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of

Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CYBR Courses

Plus the following three courses:

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and processes.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CYBR - 322 - Information Assurance

MIS 320 - Network Fundamentals

Introduction to the OSI model, network topologies, IP addressing and subnet masks, simple routing techniques, and basic switching terminology. Topics include the basic functions of the seven layers of the OSI model, different classes of IP addressing and subnetting, router login scripts.

Credit Hours: 3

Prerequisite or Corequisite Courses: CIT 110 or CYBR 201 or MIS 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Cybersecurity major or declared BS Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity Minor

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300.

International Business- Economics Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing

Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include

organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN Courses

Plus the following four courses:

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health, nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite

courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
ECN 3XX/4XX- ECN course at 300 or 400 level

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300.

International Business- Entrepreneurship & Business Development Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international

business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered.

Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

International EBD Courses

Take the following three courses:

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

EBD Courses

Plus one course from:

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EBD - 393 - Corporate Entrepreneurship

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Additional Information

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and MGT 350.

International Business- Finance Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of

Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

FIN Courses

Plus the following four courses:

FIN 330 - Principles of Investments

An introduction to alternative investments, with major emphasis on financial instruments. Practical descriptive material and relevant theoretical applications. Topics include stocks, bonds, and other financial alternatives.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222 and FIN 335
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FIN 336 - Intermediate Corporate Finance

The study of the theory and practice of corporate finance with special emphasis on the evaluation and financing of capital expenditures. Topics include cash flow determination, firm valuation, the Capital Asset Pricing Model, and an introduction to option pricing.

Credit Hours: 3

Prerequisite Courses: FIN 335
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

FIN 4XX- 400 level elective with FIN prefix

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and FIN 335.

International Business- Human Resource Management Track

INB Core

Take two of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building

Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Plus the following four courses:

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive

Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 359 - Talent Acquisition

This is an advanced course designed for management and human resource students. Upon completion,

students will be able to develop and execute a recruitment and selection plan that ensures the organization is able to attract and retain top talent in order to meet company objectives. Students will gain expertise in designing and conducting valid employment interviews. Attention is given to the legal environment, planning, and job analyses.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and

opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

Plus one of the following courses:

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business

Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 453 Leading Virtual Teams

MGT 456 - Employee and Labor Relations

Study of the current legislation affecting employee and labor relations, union organizing, collective bargaining, contract administration, union-management relations, and best practices in employee relations in both unionized and non-unionized environments.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 457 - Training & Talent Development

Understanding of the processes involved in developing, administering, and evaluating effective talent development programs that will increase the productivity of employees and organizations. Particular

attention on assessing training needs, identifying learning objectives, and using technology in the delivery of talent development programs.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350 and MGT 356
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 458 - Total Rewards

Examination of how compensation, benefits, motivation and evaluation systems can be used to enhance the satisfaction and performance of organizational talent. Particular attention on job analysis, job evaluation, pay levels and structures, pay for performance plans, performance appraisals, benefits, and general pay administration.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and MGT 350.

International Business- Information Systems Track

INB Core

Take four of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international

business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other

cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and

Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

IS Courses

Plus the following two coures:

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

MIS 411 - Information Systems Analysis

Processes and methods used for identifying and documenting information systems requirements and developing systems specifications. Topics include the systems development life cycle, analysis tools, development methodologies, and techniques for effective communication.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 315.
Prerequisite Courses: Prerequisite: CIT 213 with a minimum grade of C-, or prerequisite/corequisite: MIS 315.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Plus take one course from:

MIS 303 - Programming for Analytics

This course introduces the essential general programming concepts and techniques for data analytics. Students will learn programming foundations, application development, and how to integrate applications with business operations. The course covers hands-on issues in programming for analytics, which includes accessing data, manipulating data objects, analyzing data using common statistical methods, generating reproducible statistical reports, and creating informative visualizations.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 310 - Web Development Languages

Study of the design and creation of web pages that support traditional screens, tablets, and smart devices. Topics include page structure, human-computer interface design, style sheets, reusability, and design concepts. Best industry practices in web development, such as client-side scripting languages and Search Engine Optimization (SEO) techniques, will also be considered.

Credit Hours: 3

Prerequisite or Corequisite Courses: or (CSC 112 or CSC 131 or MIS 216)
Prerequisite Courses: CIT 110 or MIS 213
Additional Restrictions/Requirements:

One prerequisite or corequisite course is required: Choose CIT 110 or MIS 213 as a prerequisite course or one of CSC 112, CSC 131, or MIS 216 as a pre- or corequisite course.

Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Computer Science or declared BA Digital Arts or declared Cybersecurity minor or declared Digital

Arts minor.
Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Computer Science or BA Digital Arts**Minor Restriction** Cybersecurity Minor or Digital Arts Minor

MIS 323 - Business Telecommunications and Enabling Technologies

A study of the role of telecommunications in businesses as well as emerging networking/security technologies that will enable and potentially change how organizations conduct business in a networked economy. The course covers telecommunication topics such as the network layers, architecture, design, and use of telecommunications technologies and systems (with an emphasis on local area networks). The course also focuses on various emerging technologies (e.g., cloud) and the potential business impact of these technologies.

Credit Hours: 3

Prerequisite Courses: MIS 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor or declared Public Administration minor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor or Public Administration Minor

MIS 419 - Information Technology Project Management

This course introduces the fundamentals of project management, beginning with project definition through the post-project review. There will be emphasis placed on applying project management concepts and techniques to information system projects. This includes consideration of project planning, scheduling,

budgeting, human resources and the consideration of change management required to implement projects.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 411.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration and students majoring in Information Technology B.S.
Course Repeatability: Course may not be repeated.

MIS 480 - IT Resource Planning and Management

This course will explore the management and strategic alignment of IT resources within the organization. Topics include IT strategy, IT alignment, planning and managing technology resources and integration of emerging technology into the organization.

Credit Hours: 3

Prerequisite Courses: MIS 411 with a minimum grade of C-.

Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300.

International Business- Management Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international

business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered.

Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT Courses

Take the following two courses:

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.

Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to

Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus two of the following:

EBD - 393 - Corporate Entrepreneurship

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

or

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations

to their companies and to other people. Ethics experts argue students must develop the skills needed to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 359 - Talent Acquisition

This is an advanced course designed for management and human resource students. Upon completion, students will be able to develop and execute a recruitment and selection plan that ensures the organization is able to attract and retain top talent in order to meet company objectives. Students will gain expertise in designing and conducting valid employment interviews. Attention is given to the legal environment, planning, and job analyses.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

or

MGT 457 - Training & Talent Development

Understanding of the processes involved in developing, administering, and evaluating effective talent

development programs that will increase the productivity of employees and organizations. Particular attention on assessing training needs, identifying learning objectives, and using technology in the delivery of talent development programs.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350 and MGT 356
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 358 - Organizational Behavior

Application of behavioral science concepts in the management of organizations. Emphasis on increasing productivity on the individual, group, and organizational level. Particular attention directed to analyzing organizations, developing motivational programs,

designing enriching jobs, leadership development, and managing organizational change.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and MGT 350.

International Business- Marketing Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and

governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of

Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies.

Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management

practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT Courses

Plus the following four courses:

MKT 343 - Content Marketing

Develop various forms of strategic marketing content that resonate with target audiences and help achieve marketing campaign objectives. Emphasis on curating and optimizing marketing content, including how to analyze, measure, track and report results against key

performance indicators (KPIs).

Credit Hours: 3

Prerequisite Courses: MKT 340 with a grade of C- or better
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 348 - Professional Selling

Examination of the theory and practice of sales skills designed to provide a professional foundation to students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 349 - Consumer Behavior

Behavioral science concepts and principles and how they contribute to effective and efficient marketing activities from the perspective of the consumer, marketer and public policy maker.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and

opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and MKT 340.

International Business- Supply Chain Management Track

INB Core

Take three of the following courses:

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will

cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite

courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

FIN 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: INB 439
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of

understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

SCM Courses

Take the following course:

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Plus three courses from:

SCM 371 - Logistics and Distribution Management

This course provides an in-depth study of a wide range of logistics and distribution issues facing managers. Topics include an analysis of the following components of a typical logistics system: customer service, logisitics system analysis, network analysis, facility planning, warehouse operations, traffic and transportation management, and distribution planning. Attention is directed toward the establishment of sustainable competitive advantage based on transportation, logistics and distribution activities.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 375 - Quality Management

This course introduces quantitative and qualitative concepts and applications of quality management in manufacturing and service organizations. Topics include quality design, continuous improvement, cost of quality, employee involvement in quality, team building for quality, quality circles, service quality, statistical process control, and the relationship among quality, productivity, and competitiveness.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 379 - Procurement Management

This course provides an in-depth study of the concepts, methods, and responsibilities of the purchasing function for manufacturing and service organizations. Topics include the organization role of purchasing, strategic sourcing, contract and pricing practices, negotiation, quality assurance and reliability, inventory management, lean purchasing, make-or-buy decisions, and the acquisition of transportation and other services.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: BS Business Administration and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

SCM 475 - Advanced Supply Chain Management

This course provides a detailed analysis of the materials planning and execution systems used to manage the flow of material in service and manufacturing organizations to facilitate all stages of the supply chain. Topics include systems for demand management and forecasting techniques, inventory control systems for distribution channels, materials and capacity requirements planning systems, scheduling and order dispatching systems.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

Additional Information:

Students must earn a C- or better in all courses used to fulfill the requirements of this concentration, as well as in INB 300 and SCM 370.

Management and Leadership

Take the following four courses:

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

or

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations to their companies and to other people. Ethics experts argue students must develop the skills needed to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Students will explore historical and contemporary cases in managerial ethics applying theories of ethical reasoning. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 358 - Organizational Behavior

Application of behavioral science concepts in the management of organizations. Emphasis on increasing

productivity on the individual, group, and organizational level. Particular attention directed to analyzing organizations, developing motivational programs, designing enriching jobs, leadership development, and managing organizational change.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 452 - Leadership and Organizational Change

Study the processes associated with transforming organizations in a world of continuous change. Particular attention on leadership skills, ethics, organizational structure, and corporate culture with the shared purpose of fostering innovation, continuous improvement, and organizational performance.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 358.
Prerequisite Courses: MGT 356.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Plus three courses from:

(at least two courses must have a MGT prefix):

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

FIN 438 - Financial Statement Analysis

This course focuses on the analysis of financial statments. Topics covered include credit analysis, profitability analysis, revenue recognition, asset recognition, liability recognition, and equity recognition. Specific attention is given to where managers have flexibility in accounting standards and how this might impact the analysis of the firm. Students are required to synthesize material from lecture to the analysis of real companies.

Credit Hours: 3

Prerequisite Courses: FIN 335
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed

to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MGT 353 - People Analytics

This course will prepare students to create and properly analyze existing scales pertaining to workplace performance, training, engagement, employee satisfaction, turnover intentions and other outcomes from the field of talent acquisition, management, and development.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business

Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

EBD - 393 - Corporate Entrepreneurship

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations to their companies and to other people. Ethics experts argue students must develop the skills needed to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Students will explore historical and contemporary cases in managerial ethics applying theories of ethical reasoning. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be

reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 357 - Hospitality Management

The course provides a general overview of the hospitality industry and the issues related to successful management of businesses within this industry. In particular, these sectors include food service, lodging, entertainment, medical, and other related industries such as cruise lines and supplier industries. Special attention will be given to the hospitality sector in the Carolinas, and issues related to entrepreneurship within hospitality.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 359 - Talent Acquisition

This is an advanced course designed for management and human resource students. Upon completion, students will be able to develop and execute a recruitment and selection plan that ensures the organization is able to attract and retain top talent in order to meet company objectives. Students will gain expertise in designing and conducting valid employment interviews. Attention is given to the legal environment, planning, and job analyses.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT - 453 - Leading Virtual Teams

MGT 456 - Employee and Labor Relations

Study of the current legislation affecting employee and labor relations, union organizing, collective bargaining,

contract administration, union-management relations, and best practices in employee relations in both unionized and non-unionized environments.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining, integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Please enter a description.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Junior or senior standing and consent of department chairperson and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MGT 495 - Seminar in Management

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing and consent of the department chairperson and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

MGT 499 - Honors Work in Management

Independent work for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

SCM 472 - Project Management

This course introduces the fundamentals of project management, beginning with project definition and culminating in the post-project review. Students will learn techniques, terms and guidelines that are used to manage costs, schedules, risk, group dynamics and technical aspects throughout the life cycle of the project.

Credit Hours: 3

Prerequisite Courses: SCM 370

Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 21 semester hours

Additional Information:

Students pursuing this concentration cannot also pursue a concentration in Human Resource Management.

Marketing- Marketing Strategy

Take the following five courses:

MKT 343 - Content Marketing

Develop various forms of strategic marketing content that resonate with target audiences and help achieve marketing campaign objectives. Emphasis on curating and optimizing marketing content, including how to analyze, measure, track and report results against key performance indicators (KPIs).

Credit Hours: 3

Prerequisite Courses: MKT 340 with a grade of C- or better
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 349 - Consumer Behavior

Behavioral science concepts and principles and how they contribute to effective and efficient marketing activities from the perspective of the consumer, marketer and public policy maker.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 440 - Marketing Analytics

Focuses on the role of evidence-based data in decision-making and how to leverage data as a strategic asset. Emphasis on the predictive potential of data by translating vast amounts of complex data into manageable information in order to make sound decisions. The effective use of marketing metrics offers insights into customer preferences and trends and allows for the detection of patterns, the making of new associations, and the acquisition of a deeper understanding of customers.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 443 - Marketing Research Design

The development and utilization of the marketing research process and the components of a marketing research project for business decisions. Emphasis on the collection of qualitative and quantitative data to solve a specific business problem or identify opportunities used to develop and evaluate courses of marketing action.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

MKT 445 - Marketing Strategy

Concepts of Demand Analysis, formulating marketing strategy, establishing policies and procedures, coordinating marketing action, and evaluating performance.

Credit Hours: 3

Prerequisite Courses: MKT 343
Additional Restrictions/Requirements: Senior standing, prerequisite course, and completion of an additional 9 hours of upper division marketing courses.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Plus two courses from:

MKT 342 - Social Media Marketing

Survey course of the unique aspects of marketing through social media. Focus is on the application of new and emerging social media communication systems and practices that are becoming major elements in integrated marketing communication programs.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to

Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Science in Business Administration**Minor Restriction** none

MKT 344 - Branding

This course focuses in depth on the development, cultivation and evolution (and death) of brands. The goal of this course is to prepare students to understand how build brand assets and create an enduring advantage for brands in the marketplace. Focus is applied with a multi-industry and interdisciplinary perspective.

Credit Hours: 3

Prerequisite Courses: MKT 340.
Additional Restrictions/Requirements: Admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction Admission to the Cameron School of Business

MKT 345 - Sports & Sponsorship Marketing

An overview of the marketing of sports at the professional and collegiate levels, as well as the use of sport sponsorships by commercial enterprises to help market products and services. The course will cover topics related to the economics of sports, the creation and management of sports brands, and the use of the marketing mix to increase the participation and consumption of sports products. Students will also learn how to utilize sponsorship activities, such as licensing, endorsements, and venue-naming rights, to create enduring emotional connections between sport properties and consumers.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a grade of C- or better
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 346 - Retail Management

Examination of the principles and methods of retailing. Study of social, political, ethical, and economic environments. Emphasis on market segmentation, merchandising, and managerial control.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 347 - Promotion Management

Integrated marketing communications with an emphasis on advertising, public relations, direct marketing, and sales promotion, as a component of the marketing mix and overall organizational strategy from the perspective of the marketer, advertiser, agency, consumer and public.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 348 - Professional Selling

Examination of the theory and practice of sales skills designed to provide a professional foundation to students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 441 - Sales Strategy and Technology

Focus is on key areas of modern sales technologies, changing markets, and specialized sales tactics. This course encompasses the capture and storage of data by sales professionals for assessing sales analytics to

better meet customer needs. An examination of effective negotiation techniques, market analysis, the structure of B2B markets and newly emerging sales technologies and tactics is provided.

Credit Hours: 3

Prerequisite Courses: MKT 348.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300

Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

MKT 444 - Digital Marketing Analytics

Focus of the class will be on learning digital marketing skills and applying them to create effective marketing strategies. Emphasis is on project-oriented assignments with an application to real-world scenarios. Offers insight into a variety of digital promotional channels, such as search engine optimization (SEM), search engine marketing (SEM), mobile marketing, and social media marketing, as well as the analytics of their effectiveness.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343
Additional Restrictions/Requirements: Prerequisite or co-requisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 446 - Health Care Marketing

Survey course providing a comprehensive overview of the unique aspects of medical and health care marketing environments. Emphasis is on quantitative and qualitative data to support strategic and tactical marketing recommendations regarding health care. The course examines various types of health care organizations and offers marketing solutions to providers.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Science in Business Administration

MKT 447 - Services Marketing

A study of the marketing of services with emphasis on the distinctions that exist between marketing intangibles and tangible products. The managerial

implications and strategies available in services marketing are also examined.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 448 - Sales Management

Focus on developing and maintaining an effective sales organization. Emphasis on the role of the salesperson, motivating the sales force, and designing and implementing selling strategies.

Credit Hours: 3

Prerequisite Courses: MKT 348
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 449 - Advanced Sales

The purpose of this class is to prepare students for an entry-level professional selling position beyond the scope of the introductory Professional Selling class. Students will gain advanced instruction and skill development in interpersonal communication skills, career management, unique value, team selling, personal productivity, negotiation, and other relevant topics.

Credit Hours: 3

Prerequisite Courses: MKT 348, MKT 340, Admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fees: None

MKT 495 - Seminar in Marketing

Special topics in marketing not addressed in depth in other courses. May be repeated under a different subtitle.

Credit Hours: 1 To 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Total: 21 semester hours

Marketing- Professional Selling

Take the following five courses:

MKT 343 - Content Marketing

Develop various forms of strategic marketing content that resonate with target audiences and help achieve marketing campaign objectives. Emphasis on curating and optimizing marketing content, including how to analyze, measure, track and report results against key performance indicators (KPIs).

Credit Hours: 3

Prerequisite Courses: MKT 340 with a grade of C- or better
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 348 - Professional Selling

Examination of the theory and practice of sales skills designed to provide a professional foundation to students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 441 - Sales Strategy and Technology

Focus is on key areas of modern sales technologies, changing markets, and specialized sales tactics. This course encompasses the capture and storage of data by sales professionals for assessing sales analytics to better meet customer needs. An examination of effective negotiation techniques, market analysis, the structure of B2B markets and newly emerging sales technologies and tactics is provided.

Credit Hours: 3

Prerequisite Courses: MKT 348.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 445 - Marketing Strategy

Concepts of Demand Analysis, formulating marketing strategy, establishing policies and procedures, coordinating marketing action, and evaluating performance.

Credit Hours: 3

Prerequisite Courses: MKT 343
Additional Restrictions/Requirements: Senior standing, prerequisite course, and completion of an additional 9 hours of upper division marketing courses.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 449 - Advanced Sales

The purpose of this class is to prepare students for an entry-level professional selling position beyond the scope of the introductory Professional Selling class. Students will gain advanced instruction and skill development in interpersonal communication skills, career management, unique value, team selling, personal productivity, negotiation, and other relevant topics.

Credit Hours: 3

Prerequisite Courses: MKT 348, MKT 340, Admission to Cameron School of Business.
Course Repeatability: Course may be repeated.

Maximum Repeatable Hours: 6
Additional Course Fees: None

Plus two courses from:

MKT 342 - Social Media Marketing

Survey course of the unique aspects of marketing through social media. Focus is on the application of new and emerging social media communication systems and practices that are becoming major elements in integrated marketing communication programs.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Science in Business Administration**Minor Restriction** none

MKT 344 - Branding

This course focuses in depth on the development, cultivation and evolution (and death) of brands. The goal of this course is to prepare students to understand how build brand assets and create an enduring advantage for brands in the marketplace. Focus is applied with a multi-industry and interdisciplinary perspective.

Credit Hours: 3

Prerequisite Courses: MKT 340.
Additional Restrictions/Requirements: Admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction Admission to the Cameron School of Business

MKT 345 - Sports & Sponsorship Marketing

An overview of the marketing of sports at the professional and collegiate levels, as well as the use of sport sponsorships by commercial enterprises to help market products and services. The course will cover topics related to the economics of sports, the creation and management of sports brands, and the use of the

marketing mix to increase the participation and consumption of sports products. Students will also learn how to utilize sponsorship activities, such as licensing, endorsements, and venue-naming rights, to create enduring emotional connections between sport properties and consumers.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a grade of C- or better
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 346 - Retail Management

Examination of the principles and methods of retailing. Study of social, political, ethical, and economic environments. Emphasis on market segmentation, merchandising, and managerial control.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 347 - Promotion Management

Integrated marketing communications with an emphasis on advertising, public relations, direct marketing, and sales promotion, as a component of the marketing mix and overall organizational strategy from the perspective of the marketer, advertiser, agency, consumer and public.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 349 - Consumer Behavior

Behavioral science concepts and principles and how they contribute to effective and efficient marketing activities from the perspective of the consumer,

marketer and public policy maker.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 440 - Marketing Analytics

Focuses on the role of evidence-based data in decision-making and how to leverage data as a strategic asset. Emphasis on the predictive potential of data by translating vast amounts of complex data into manageable information in order to make sound decisions. The effective use of marketing metrics offers insights into customer preferences and trends and allows for the detection of patterns, the making of new associations, and the acquisition of a deeper understanding of customers.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with

a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: MKT 340 and INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: INB 442
Course Repeatability: Course may not be repeated.

MKT 443 - Marketing Research Design

The development and utilization of the marketing research process and the components of a marketing research project for business decisions. Emphasis on the collection of qualitative and quantitative data to solve a specific business problem or identify opportunities used to develop and evaluate courses of marketing action.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

MKT 444 - Digital Marketing Analytics

Focus of the class will be on learning digital marketing skills and applying them to create effective marketing strategies. Emphasis is on project-oriented assignments with an application to real-world

scenarios. Offers insight into a variety of digital promotional channels, such as search engine optimization (SEM), search engine marketing (SEM), mobile marketing, and social media marketing, as well as the analytics of their effectiveness.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343
Additional Restrictions/Requirements: Prerequisite or co-requisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 446 - Health Care Marketing

Survey course providing a comprehensive overview of the unique aspects of medical and health care marketing environments. Emphasis is on quantitative and qualitative data to support strategic and tactical marketing recommendations regarding health care. The course examines various types of health care organizations and offers marketing solutions to providers.

Credit Hours: 3

Prerequisite Courses: MKT 340 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Science in Business Administration

MKT 447 - Services Marketing

A study of the marketing of services with emphasis on the distinctions that exist between marketing intangibles and tangible products. The managerial implications and strategies available in services marketing are also examined.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 448 - Sales Management

Focus on developing and maintaining an effective sales organization. Emphasis on the role of the salesperson, motivating the sales force, and designing and implementing selling strategies.

Credit Hours: 3

Prerequisite Courses: MKT 348
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 495 - Seminar in Marketing

Special topics in marketing not addressed in depth in other courses. May be repeated under a different subtitle.

Credit Hours: 1 To 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Total: 21 semester hours

Real Estate

Take the following five courses:

FIN 331 - Real Estate

Principles of property management and practices relating to appraisal, sales, ownership, control, financing, and transfer of real property.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

FIN 431 - Real Estate Investment Analysis

The decision-making process in real estate investment analysis including risk and return, financing

alternatives, tax implications, and pricing and development alternatives.

Credit Hours: 3

Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 428 - Applied Regional Analysis

Theoretical and applied analysis of patterns and trends in local, state, and regional economic growth. Use of current computer-based methods in regional economic analysis including economic impact models. Applied analysis of current regional issues and government policies to address these issues.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

MKT 348 - Professional Selling

Examination of the theory and practice of sales skills designed to provide a professional foundation to

students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

Plus two courses from:

BAN 480 - Business and Economic Forecasting

Development of an approach to forecasting through the study of time-series techniques including moving averages, exponential smoothing, regression, and Box-Jenkins.

Credit Hours: 3

Prerequisite Courses: BAN 280
Additional Restrictions/Requirements: Prerequisite

course or consent of department chair and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FIN 330 - Principles of Investments

An introduction to alternative investments, with major emphasis on financial instruments. Practical descriptive material and relevant theoretical applications. Topics include stocks, bonds, and other financial alternatives.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ECN 222 and FIN 335
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FIN 437 - Commercial Bank Management

A study of commercial bank operations and the regulatory environment of banking. Topics will include the evolution of regulation in the United States, industry structure, analysis of bank financial statements, asset/liability management, and capital requirements.

Credit Hours: 3

Prerequisite Courses: ECN 324 and FIN 335
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining, integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 349 - Consumer Behavior

Behavioral science concepts and principles and how they contribute to effective and efficient marketing activities from the perspective of the consumer, marketer and public policy maker.

Credit Hours: 3

Prerequisite Courses: MKT 340
Additional Restrictions/Requirements: Prerequisite

course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 440 - Marketing Analytics

Focuses on the role of evidence-based data in decision-making and how to leverage data as a strategic asset. Emphasis on the predictive potential of data by translating vast amounts of complex data into manageable information in order to make sound decisions. The effective use of marketing metrics offers insights into customer preferences and trends and allows for the detection of patterns, the making of new associations, and the acquisition of a deeper understanding of customers.

Credit Hours: 3

Prerequisite or Corequisite Courses: MKT 343 with a grade of C- or better
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MKT 445 - Marketing Strategy

Concepts of Demand Analysis, formulating marketing strategy, establishing policies and procedures, coordinating marketing action, and evaluating performance.

Credit Hours: 3

Prerequisite Courses: MKT 343
Additional Restrictions/Requirements: Senior standing, prerequisite course, and completion of an additional 9 hours of upper division marketing courses.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 449 - Advanced Sales

The purpose of this class is to prepare students for an entry-level professional selling position beyond the scope of the introductory Professional Selling class. Students will gain advanced instruction and skill development in interpersonal communication skills, career management, unique value, team selling, personal productivity, negotiation, and other relevant topics.

Credit Hours: 3

Prerequisite Courses: MKT 348, MKT 340, Admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fees: None

Total: 21 semester hours

Supply Chain Management

Take the following four courses:

SCM 371 - Logistics and Distribution Management

This course provides an in-depth study of a wide range of logistics and distribution issues facing managers. Topics include an analysis of the following components of a typical logistics system: customer service, logisitics system analysis, network analysis, facility planning, warehouse operations, traffic and transportation management, and distribution planning. Attention is directed toward the establishment of sustainable

competitive advantage based on transportation, logistics and distribution activities.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 375 - Quality Management

This course introduces quantitative and qualitative concepts and applications of quality management in manufacturing and service organizations. Topics include quality design, continuous improvement, cost of quality, employee involvement in quality, team building for quality, quality circles, service quality, statistical process control, and the relationship among quality, productivity, and competitiveness.

Credit Hours: 3

Prerequisite Courses: SCM 370

Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 472 - Project Management

This course introduces the fundamentals of project management, beginning with project definition and culminating in the post-project review. Students will learn techniques, terms and guidelines that are used to manage costs, schedules, risk, group dynamics and technical aspects throughout the life cycle of the project.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 475 - Advanced Supply Chain Management

This course provides a detailed analysis of the materials planning and execution systems used to manage the flow of material in service and manufacturing organizations to facilitate all stages of the supply chain. Topics include systems for demand management and forecasting techniques, inventory control systems for distribution channels, materials and capacity requirements planning systems, scheduling and order dispatching systems.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

Plus three courses from:

(at least one course must have a SCM prefix):

BAN 306 - Communicating Data with Storytelling

This course provides an introduction as well as hands-on experience in descriptive analytics and data visualization. It introduces students to principles for creating meaningful analysis and displays of quantitative and qualitative data to facilitate managerial decision-making.

Credit Hours: 3

Prerequisite Courses: MATH 111 or MATH 150 or MATH 160
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 309 - Health Care Analytics

This course develops an understanding of analytics in the healthcare field. Emphasis is given to how technology and analytics impact healthcare. Analytical tools are used to solve real healthcare challenges, improve processes, and help make important healthcare business decisions.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

BAN 310 - Sports Analytics

This course introduces fundamental analytics concepts in the context of sports. A variety of sports, professional and amateur, are covered with an emphasis on using analytics techniques and tools to add value and fuel competitive advantage. Software tools will be used extensively to illustrate concepts.

Credit Hours: 3

Prerequisite Courses: BAN 280 or STT 215
Additional Restrictions/Requirements: Admission to

Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to

Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

BAN 403 - Optimizing Data-driven Decisions

Prescriptive Analytics deals with developing analytical models to solve business problems. Prescriptive models are used when a business needs to optimize operational decisions. The solution from these models provide the best solution (profit maximization, cost minimization, minimization of resource utilization, etc.) to the operational decision problems. Students will use MS Excel and AMPL as software tools for optimization in this course.

Credit Hours: 3

Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

BAN 417 - Supply Chain Analytics

This course introduces students to quantitative models the firms use to manage supply and demand. Managing supply and demand involves managing customer preferences, classify suppliers and customers, optimize product pricing, and promotion strategies. The applications of the above models in the hospitality industry, broadcasting, show business are discussed.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 480 - Business and Economic Forecasting

Development of an approach to forecasting through the study of time-series techniques including moving averages, exponential smoothing, regression, and Box-Jenkins.

Credit Hours: 3

Prerequisite Courses: BAN 280
Additional Restrictions/Requirements: Prerequisite course or consent of department chair and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

BAN 485 - Introduction to Business Simulation

Introduction to simulation models as tools in the analysis of business problems. Discrete event simulation models for production and service systems are introduced through the use of a computer simulation language.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

CYBR - 437 - Supply Chain Cybersecurity

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

SCM 365 - Health Care Operations Management

Application of management tools to examine the health care value chain. Topics include designing health care delivery systems, capacity planning and decision making under uncertainty, process failure, learning and improvement, and innovations in health care.

Credit Hours: 3

Prerequisite Courses: BAN 280
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 372 - Service Operations Management

Study of the tools necessary to effectively manage a service organization. Particular attention will be paid to subtle relationships among the systems, strategy, and technology that define service delivery systems and their implications for customer satisfaction and profitability. Topics include service strategy and market position, role of the information resource, the service delivery system, service facility location, service quality, and managing supply and demand.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 374 - Introduction to Six Sigma

This course covers the complete Six Sigma Green Belt body of knowledge. Through lectures, applications and case studies, the course focuses on the background, value proposition, methodology, techniques and statistical tools of Six Sigma.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 376 - Transportation Management

This course develops an understanding of the strategic role of freight transportation systems in supply chain networks. Emphasis is given to the components of transportation systems, including their technological features, operational processes, and cost conditions, the buyer-seller channels for acquiring transportation services, and the strategic and tactical alternatives for transport procurement.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of

Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 378 - Product and Service Development

This course provides basic product/service development concepts, a knowledge base for conversing with those familiar with product/service concepts, and builds both quantitative and qualitative analysis skills needed for designing and developing products and services.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 379 - Procurement Management

This course provides an in-depth study of the concepts, methods, and responsibilities of the purchasing function for manufacturing and service organizations. Topics include the organization role of purchasing, strategic sourcing, contract and pricing practices, negotiation, quality assurance and reliability, inventory management, lean purchasing, make-or-buy decisions, and the acquisition of transportation and other services.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: BS Business Administration and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

SCM 476 - Sustainable Supply Chain Systems

This course focuses on analyzing the implications of environmental considerations in logistics decisions. The course stresses learning how businesses can succeed while tackling sustainability challenges, emphasizing

the fundamental tools and techniques required for analyzing and designing environmentally sustainable supply chain systems. The course covers carbon footprint, sustainable logistics, closed-loop supply chains, reverse logistics and sustainable supply chain strategy. Students work on a team project that evaluates the sustainable supply chain strategy of an industry or a publicly traded company.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 477 - Operations Planning and Scheduling

Application of scheduling in manufacturing and service organizations. Topics include machine scheduling, job shop scheduling, project scheduling, flexible assembly system scheduling, lot sizing and scheduling, interval scheduling, and personnel scheduling.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 478 - Supply Chain Modeling and Analysis

This course is designed to provide students with the conceptual tools to understand the structure and dynamics of complex systems by integrating performance measurement and modeling simulation methodologies. It provides the students with the solid understanding needed to effectively apply strategic management tools and techniques for increased performance and competitive advantage in businesses. Ultimately, it will prepare them to become effective systems analysts in the field.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite

course and admission to CSB.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 495 - Seminar in Operations Management

This course may be repeated under a different subtitle.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, consent of the department chair and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

SCM 498 - Internship in Operations Management

Involves the application of quantitative and systems skills developed in the academic environment to problems in a real-world operating environment. The participant will receive practical training and experience under the guidance of the staff of a local business or government organization and a faculty supervisor. Available internships are filled on a competitive basis.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Consent of faculty supervisor and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Total: 21 semester hours

General Business Option for Nontraditional Students:

Nontraditional students who are unable to satisfy the requirements of the other business concentrations because of their full-time occupation may, with prior approval of the Dean's Office, select seven three-credit hour CSB undergraduate courses numbered 300 and above. A grade of C- or better is required in the 21 hours of coursework approved for the track. Students who pursue the general business track may not complete a second concentration.

Transatlantic Business School Alliance (TABSA)-International Dual Degree Program

The Transatlantic Business School Alliance (TABSA) program is a dual degree program designed for those students who have a high proficiency in a foreign language and are seeking career opportunities in international business. Upon completion of the program the student will receive a B.S. degree in business administration from UNCW as well as a business degree from the TABSA host institution. Currently UNCW has four host institutions, (1) KEDGE in Marseille, France that awards the International BBA, (2) Hochschule Bremen in Bremen, Germany that awards a Diplom-Kauffrau/Kaufmann (FH), (3) Hertfordshire in London, UK that awards the B.A. Honours International Business, and (4) the University of Valencia, Spain that awards the Graduato Europeo en Direccion de Empresas (GEDE). Students in the program pay tuition and fees to UNCW. Transportation, housing and other living costs are the responsibility of the student. Students electing to enter the Transatlantic Business School Alliance (TABSA)-International Dual Degree Program must complete the required coursework at UNCW and meet admission requirements for the

Cameron School of Business, approximately 70-79 credit hours in their two years at UNCW. The last two years of study will be completed at a TABSA European member institution. TABSA students studying at our partners in France, Spain, or Germany are required to complete an internship. At completion, students receive a Bachelor of Science in business degree from UNCW as well as the partner institution's equivalent degree. Successful completion of the International Dual Degree Program requires a highly structured program of study beginning in the freshman year at UNCW.

Courses which must be completed at UNCW may include:

ENG 103 - College Writing and Reading (Advanced)

College-level writing and reading for advanced students. Extensive practice in composing processes and in gathering, analyzing, synthesizing, and documenting information from sources.

Credit Hours: 3

Additional Restrictions/Requirements: Special

competence demonstrated in an English placement test, Advanced Placement test, or CLEP test.
University Studies: Foundations/Composition, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

At least four semesters of foreign language designated by the host institution to include two 300 or higher level courses;

HST 102 - Europe in the World II

Introduction to modern European history. Examination of Europe's transformations and global interactions through the discussion of significant events, groups, and individuals that contributed to developments such as the French Revolution and the rise of democracy, the Industrial Revolution and the modern economy, world wars and dictatorships.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 202 - Modern Philosophy: Descartes to Kant

Introduction to the major topics of Western philosophy during the modern period, including skepticism, the existence of God, and the source of our ideas. Analysis of the thought of philosophers such as Descartes,

Elizabeth of Bohemia, Locke, Berkeley, Leibniz, Hume, and Kant.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

WPA 101 - Wellness and Physical Activity

Introduces students to the fundamental concepts and practical experiences associated with the physical, emotional, intellectual, social and spiritual components of wellness. Promotes behavioral changes to enhance well-being and lifelong maintenance of personal health and fitness. Lecture and physical activity/lab are required components. Prerequisite for online lab sections: Permission of instructor.

Credit Hours: 1

Prerequisite or Corequisite Courses: WPAL 101
Additional Restrictions/Requirements: Prerequisite

for ext online lecture section: Extension student status.
University Studies: Lifetime Wellness
Course Repeatability: Course may not be repeated.

WPAL 101 - WPAL 101 - Wellness and Physical Activity Lab - Olsen

Participation in physical activity, increased awareness and development of using physical activity to enhance all aspects of well-being, increased awareness and development of a well-rounded lifestyle. Physical Activity and Wellness LAB is a 1-credit course. The purpose of this course is threefold: 1) to provide you with instruction and guidance during participation in lifetime physical activities (i.e., cardiovascular, resistance and flexibility) to improve your fitness, health and wellness, 2) to recognize the multidimensional nature of wellness and its reciprocal relationship with physical activity, and 3) to enhance self-awareness and self-management skills associated with lifelong physical activity. Course activities and assignments are specifically designed to improve your knowledge, beliefs, motivations, skills, and behaviors to aid in your lifetime journey of being active.

Credit Hours: 1

Prerequisite or Corequisite Courses: WPA 101
Additional Restrictions/Requirements: Prerequisite for online lecture/lab sections: Extension student status. Prerequisite for online lab sections: Permission of instructor.
University Studies: Lifetime Wellness
Course Repeatability: Course may not be repeated.

A life science and a physical science (one must be a lab course), (7 hours total)*; A literature course*; A fine arts course*;

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the

underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

ACGL 201 - Financial Accounting Lab

This course is the lab for ACG 201.

Credit Hours: 1

Corequisite Courses: ACG 201
Course Repeatability: Course may not be repeated.

ACG 203 - Managerial Accounting

An introduction to the concepts and techniques used by management to analyze and interpret accounting data in the organization.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACGL 201
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in government. Examines how the legal environment is influenced by changing social and ethical values. Topics include agency, antitrust, forms of business

organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

BUS 498 - Internship in Business

The chairperson may consider grade point average and individual course grades as they pertain to the internship being considered.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Junior or senior standing, consent of department chairperson, and admission to Cameron School of Business.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FIN 335 - Principles of Financial Management

An introduction to the finance function of business enterprise and to the analytical techniques used in making investment and financing decisions.

Credit Hours: 3

Prerequisite Courses: Prerequisite ACG 201, ECN 222 and (BAN 280 or STT 215); or prerequisite STT 315 and corequisite MAT 381.
Course Repeatability: Course may not be repeated.

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

Note:

(* Indicates UNCW University Studies Program courses.) Students wishing to participate in the program should obtain a list of the specific courses to be taken at UNCW and the host institution from the Cameron School of Business Academic Advising & Career Success Center.

Chemistry, B.A.

The Department of Chemistry and Biochemistry offers two programs leading to undergraduate degrees in chemistry. The Bachelor of Science degree, certified by the American Chemical Society, prepares students intending to pursue a graduate degree or a career in chemistry. The Bachelor of Arts degree provides a broad chemistry-based background in preparation for a chemistry-related career or for those planning to teach chemistry. The minor in chemistry is designed for students who are majoring in other disciplines but would like additional coursework in chemistry.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.S. or B.A. degree in Chemistry a student must successfully complete CHM 495.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Chemistry a student must successfully complete CHM 495.

Requirements for a Major in Chemistry for the B.A. Degree:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

CHM 220 - Physical and Quantitative Methods in Chemistry

Physical and quantitative methods in chemistry is an introductory course that surveys important physical and quantitative tools used in chemistry. Quantitative physical and mathematical methods are absolutely necessary to explore important concepts in in

chemistry. This course aims to teach chemistry majors how to apply the available physical and quantitative tools to chemistry using examples and problems from various areas in chemistry, such as physical, biological and analytical chemistry. The course starts from a review of basic calculus and then covers more advanced topics.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 101 or PHY 201) and (CHM 102 and CHML 102).
Course Repeatability: Course may not be repeated.

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry; activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHML 235 - Quantitative Analysis Laboratory

Laboratory techniques in classical and modern chemical analysis, including volumetric analysis, chromatography, and spectrophotometry. Application of statistical methods to laboratory data. Chemical equilibrium. This course is the lab for CHM 235.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 235.
Course Repeatability: Course may not be repeated.

CHM 312 - Advanced Techniques Organic Chemistry

Theory and practice of chromatographic methods of separation and spectroscopic methods of identification.

Credit Hours: 2

Prerequisite Courses: CHM 212 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHM 320 - Physical Chemistry I: Quantum Chemistry and Spectroscopy

Overview of topics in physical chemistry stressing fundamental concepts in quantum chemistry, statistical mechanics and spectroscopy. The lab for this course is CHML 320.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 220.
Prerequisite Courses: CHM 102 and CHML 102 and (PHY 101 or PHY 201) and (MAT 151 and MAT 152) or (MAT 161 and MAT 162)
Course Repeatability: Course may not be repeated.

CHM 350 - Introduction to Chemical Research

Introduction to chemical investigation, including use of the chemical literature, experimental design, proposal preparation, and communication of findings.

Credit Hours: 1

Prerequisite Courses: CHM 211 or CHM 235.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Biochemistry B.S., Chemistry B.S., or Chemistry B.A.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 445 - Inorganic Chemistry

Study of periodic relationships; crystal lattice theory; transition metals and ions; crystal field theory; organometallic structures and reactions; and reaction mechanisms. The lab for this course is CHML 445.

Credit Hours: 3

Prerequisite Courses: CHM 320 with a minimum grade of C and CHM 350 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 495 - Senior Seminar

Discussion of selected topics.

Credit Hours: 1

Prerequisite Courses: CHM 350
Additional Restrictions/Requirements: 25 semester hours of chemistry courses including prerequisite course.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

or

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 152 - Basic Calculus with Applications II

Intended for majors that emphasize techniques and applications. The second course in a two-course sequence. Topics to include further techniques and applications of integration and multivariable calculus including trigonometric functions, differential equations, probability, and sequences & series.

Credit Hours: 3

Prerequisite Courses: MAT 151 and (MAT 112 or MAT 160).
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include

kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

And at least seven semester hours including one laboratory course from:

CHML 312 - Advanced Techniques of Organic Chemistry Laboratory

Advanced laboratory techniques for the synthesis, purification, and identification of organic compounds using chromatographic and spectroscopic methods including HPLC, GC-MS, UV-Vis, IR, and NMR. This course is the lab for CHM 312.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 312.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

CHML 320 - Physical Chemistry Laboratory I

Laboratory course that will reinforce the concepts of quantum chemistry learned in the accompanying lecture course (CHM 320). Writing intensive course with a focus on writing laboratory reports in professional fashion. This course is the lab for CHM 320.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 320.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 321 - Physical Chemistry II: Thermodynamics and Kinetics

An overview of topics in physical chemistry stressing fundamental concepts in thermodynamics and kinetics. The lab for this course is CHML 321.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHML 321 - Physical Chemistry Laboratory II

This course is the lab for CHM 321.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: CHM 321.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 325 - Biophysical Chemistry

Introduction to the fundamentals of thermodynamics and kinetics in the context of biochemical systems. A brief review of the structures of proteins, nucleic acids and membranes followed by a treatment of the thermodynamics and kinetics of binding reactions and phase transitions involving these macromolecules and assemblies. CHML 325 is the laboratory course for CHM 325.

Credit Hours: 3

Prerequisite Courses: BIO 201, CHM 211, CHM 220.
Course Repeatability: Course may not be repeated.

CHML 325 - Biophysical Chemistry Laboratory

Essential experimental approaches used in the study of proteins, lipids, and nucleic acids, and their

interactions. The molecular structure, thermodynamics and kinetics of binding reactions, phase transitions, and other processes involving these macromolecules will be studied using calorimetry and modern spectroscopic methods.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 325.
Prerequisite Courses: CHM 220.
Course Repeatability: Course may not be repeated.

CHML 365 - Biochemistry Laboratory

Theory and practice of biochemical techniques. Topics may include protein assays, protein purification, electrophoresis, enzyme kinetics, HPLC or proteins, buffers and pH, DNA isolation, and molecular visualization and modeling.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 365.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHM 380 - Forensic Chemistry

Theory and applications of trace organics and metals analyses, fiber and polymer analyses, toxicology, serology, drug and DNA chemistry, fingerprinting techniques, and chain of custody procedures. The optional 3-hour laboratory (CHML 380) may be registered for separately.

Credit Hours: 3

Prerequisite Courses: CHM 211 and CHML 211
Course Repeatability: Course may not be repeated.

CHML 380 - Forensic Chemistry Laboratory

Laboratory techniques in forensic chemistry, including analyses of trace organics, metals and analyses, fibers and polymers; toxicology; serology; drug and DNA chemistry; fingerprinting; and chain of custody procedures.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 380.
Prerequisite Courses: CHM 211 and CHML 211.
Course Repeatability: Course may not be repeated.

CHM 415 - Physical Organic Chemistry

Theoretical and physical organic chemistry, including chemical bonding, stereochemistry and conformational analysis with applications to selected reaction mechanisms.

Credit Hours: 3

Prerequisite Courses: CHM 212.
Course Repeatability: Course may not be repeated.

CHM 417 - Medicinal Chemistry

Study of the principles involved in, and the multidisciplinary nature of, modern drug design. Focus on chemical and biological principles that are fundamental to medicinal chemistry and on understanding how and why certain chemicals interact at biological targets.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 365 or BIO 465
Prerequisite Courses: CHM 212
Crosslisting: CHM 517
Course Repeatability: Course may not be repeated.

CHM 425 - Computational Chemistry

Theory and hands-on training of basic computational chemistry; including molecular mechanics, semi-empirical and ab initio molecular orbit theory, density functional theory, and molecular dynamics.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHM 435 - Instrumental Analysis

Study of modern analytical instrumentation and techniques. Emphasis on spectroscopic, separation, electrochemical, and materials analysis techniques.

Credit Hours: 3

Corequisite Courses: CHML 435.
Prerequisite Courses: CHM 235 and CHML 235 and CHM 312 with grades of "C-" or better, and PHY 102 or PHY 202.
Course Repeatability: Course may not be repeated.

CHML 435 - Instrumental Analysis Lab

Theory and application of modern analytical instrumentation and techniques. Emphasis on atomic spectroscopy, molecular spectroscopy, chromatography, electrochemistry, mass spectrometry, statistical analysis, report writing, and laboratory safety.

Credit Hours: 2

Corequisite Courses: CHM 435.
Prerequisite Courses: CHML 235
Course Repeatability: Course may not be repeated.

CHML 445 - Inorganic Synthesis Laboratory

Synthesis and techniques in inorganic chemistry. Normally taken concurrently with CHM 445. This course is the lab for CHM 445.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 445.
Course Repeatability: Course may not be repeated.

CHM 461 - Biochemistry of Immunity

Introduction to the reactions underlying the immune response, emphasizing biochemical principles. The principles underlying the innate and adaptive immune systems, and the structure and function of the molecules involved. Exploration of the functional immune system as a coordinated collective of individual components.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 462 - Biochemistry of Cell Signaling

Introduction to the general principles of cell signaling. The molecules responsible for signaling processes will be discussed, including synthetic or natural product molecules which affect cell signaling. Specific examples may be discussed including neurotransmission, metabolic regulation, and targeting of cell signaling proteins for therapeutic benefit.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 463 - Peptide Synthesis

Exploration of peptide synthesis techniques, covering both solution-phase and solid-phase (on-resin) methods. Includes discussions on amino acid coupling strategies, protecting group approaches, activation

processes, peptide synthesizers, and ligation techniques. Prepares students for practical applications in biochemical research, drug design, and protein chemistry by examining current methodologies and challenges in peptide assembly.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHM 466 - Biochemistry II

Examination of bioenergetics, structure and function of biomembranes, biosynthesis, degradation of fatty acids, amino acids, and nucleotides, integration of metabolism, signal transduction, and the action of hormones. Consideration of the structure and enzymology of DNA and RNA, genetic information, protein biosynthesis, and gene regulation.

Credit Hours: 3

Prerequisite Courses: CHM 365 or BIO 465.
Course Repeatability: Course may not be repeated.

CHM 467 - Bioinorganic Chemistry

Exploration of the roles that metal ions play in biochemical systems, bridging the gap between inorganic chemistry and biochemistry and providing a comprehensive understanding of how metals contribute to the structure and function of biomolecules. Examines the principles of coordination chemistry, the function of metalloenzymes, and the application of various spectroscopic techniques to study metal-containing biomolecules.

Credit Hours: 3

Prerequisite Courses: CHM 220 and CHM 365
Crosslisting: CHM 567
Course Repeatability: Course may not be repeated.

CHM 468 - Structure and Function of Nucleic Acids

Study of the structure of DNA and RNA, the denaturation and renaturation of DNA and RNA, DNA techniques including cloning, the central dogma (including DNA replication, transcription and translation), and DNA-Protein interactions.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHML 468 - Plasmid Design and Production

Study of advanced experimental skills for constructing, producing, and purifying plasmids used in the synthesis of biological macromolecules. Students will learn to design plasmids for the expression of recombinant proteins, in-vitro transcription of mRNAs, and the production of viral vectors. Course topics include DNA cloning techniques and plasmid production methods.

Credit Hours: 1

Prerequisite Courses: CHM 365 and CHML 365
Course Repeatability: Course may not be repeated.

CHM 469 - Enzymology

Investigation of enzyme mechanisms and their regulation. Exploration of the theoretical and practical

aspects of studying enzymes and their biological implications. A particular focus will be placed on binding, steady-state kinetics, transient kinetics, allosteric regulation, and inhibition.

Credit Hours: 3

Prerequisite Courses: CHM 365, CHM 220.
Course Repeatability: Course may not be repeated.

CHM 475 - Chemical Oceanography

Introduction to chemical oceanography, including discussion of sources, distribution, forms of occurrence of chemical species in seawater; chemistry of salty solutions; air-sea interactions; marine carbonate system; organic compounds and trace elements in seawater; estuarine chemistry.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CHM 102 and CHML 102. Recommended prerequisite or corequisite: CHM 235 and OCN 150.
Course Repeatability: Course may not be repeated.

CHM 480 - Chemistry Education Research and Practice

Selected topics from chemistry education research. Focus on current research about learning theories, epistemology, representations of chemical structure, technology use in the chemistry classroom, and laboratories.

Credit Hours: 3

Prerequisite Courses: CHM 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CHM 580
Course Repeatability: Course may not be repeated.

CHM 485 - Industrial and Polymer Chemistry

An overview of major industrial processes, the synthesis and significance of major industrial chemicals. Polymer chemistry to include synthesis, properties, and applications is covered. Some specialty topics such as pharmaceutical chemistry and agricultural chemistry are also briefly covered.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 486 - Fundamentals of Heterocycles with Emphasis on Pharmaceuticals

Well over half of all known organic compounds and most pharmaceuticals are heterocyles (containing an atom other than C in the ring), yet their chemistry is hardly touched on in conventional courses. Topics include the nomenclature, properties, synthesis, and pharmaceutical applications of heterocycles.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 490 - Special Topics In Chemistry

Selected topics in chemistry that are beyond the scope of regular course offerings.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing and consent of instructor.
Crosslisting: CHM 592
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CHM 291 - Introductory Research

Laboratory and computational research under faculty supervision beyond what is offered in existing courses.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Freshman, sophomore, junior, or senior standing and consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CHM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further

information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CHM 498 - Internship In Chemistry

Practical field experience and academic training related to the student's principal area of interest through a program of work and study within a business or agency. Student is supervised and evaluated jointly by a chemistry faculty member and an on-site supervisor. (Only three hours may count toward a major in chemistry.)

Credit Hours: 1 To 3

Prerequisite Courses: CHM 212 and CHML 212 and CHM 235 and CHML 235

Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, consent of instructor; and GPA of at least 2.80 in chemistry.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability Insurance Additional Course Fee Schedule

CHM 499 - Honors Work in Chemistry

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Note:

**A student may only count a total of 3 credit hours of CHM 291, CHM 491, CHM 498, and CHM 499 toward the major.

Total: 61 - 63 hours

Interest Areas:

Consult with your advisor about recommended courses for particular interest areas.

Additional Information:

An overall grade point average of "C" (2.00) is required in all chemistry courses counted toward the major.

Chemistry, B.S.

The Department of Chemistry and Biochemistry offers two programs leading to undergraduate degrees in chemistry. The Bachelor of Science degree, certified by the American Chemical Society, prepares students intending to pursue a graduate degree or a career in chemistry. The Bachelor of Arts degree provides a broad chemistry-based background in preparation for a chemistry-related career or for those planning to teach chemistry. The minor in chemistry is designed for students who are majoring in other disciplines but would like additional coursework in chemistry.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.S. or B.A. degree in Chemistry a student must successfully complete CHM 495.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Chemistry a student must successfully complete CHM 495.

Requirements for a Major in Chemistry for the B.S. Degree:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in

CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly

recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for

this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

CHM 220 - Physical and Quantitative Methods in Chemistry

Physical and quantitative methods in chemistry is an introductory course that surveys important physical and quantitative tools used in chemistry. Quantitative physical and mathematical methods are absolutely necessary to explore important concepts in in chemistry. This course aims to teach chemistry majors how to apply the available physical and quantitative tools to chemistry using examples and problems from various areas in chemistry, such as physical, biological and analytical chemistry. The course starts from a review of basic calculus and then covers more advanced topics.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 101 or PHY 201) and (CHM 102 and CHML 102).
Course Repeatability: Course may not be repeated.

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry;

activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHML 235 - Quantitative Analysis Laboratory

Laboratory techniques in classical and modern chemical analysis, including volumetric analysis, chromatography, and spectrophotometry. Application of statistical methods to laboratory data. Chemical equilibrium. This course is the lab for CHM 235.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 235.
Course Repeatability: Course may not be repeated.

CHM 312 - Advanced Techniques Organic Chemistry

Theory and practice of chromatographic methods of separation and spectroscopic methods of identification.

Credit Hours: 2

Prerequisite Courses: CHM 212 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHM 320 - Physical Chemistry I: Quantum Chemistry and Spectroscopy

Overview of topics in physical chemistry stressing fundamental concepts in quantum chemistry, statistical mechanics and spectroscopy. The lab for this course is CHML 320.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 220.
Prerequisite Courses: CHM 102 and CHML 102 and (PHY 101 or PHY 201) and (MAT 151 and MAT 152) or (MAT 161 and MAT 162)
Course Repeatability: Course may not be repeated.

CHML 320 - Physical Chemistry Laboratory I

Laboratory course that will reinforce the concepts of quantum chemistry learned in the accompanying lecture course (CHM 320). Writing intensive course with a focus on writing laboratory reports in professional fashion. This course is the lab for CHM 320.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 320.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 321 - Physical Chemistry II: Thermodynamics and Kinetics

An overview of topics in physical chemistry stressing fundamental concepts in thermodynamics and kinetics. The lab for this course is CHML 321.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHML 321 - Physical Chemistry Laboratory II

This course is the lab for CHM 321.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: CHM 321.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 350 - Introduction to Chemical Research

Introduction to chemical investigation, including use of the chemical literature, experimental design, proposal preparation, and communication of findings.

Credit Hours: 1

Prerequisite Courses: CHM 211 or CHM 235.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Biochemistry B.S., Chemistry B.S., or Chemistry B.A.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 435 - Instrumental Analysis

Study of modern analytical instrumentation and techniques. Emphasis on spectroscopic, separation, electrochemical, and materials analysis techniques.

Credit Hours: 3

Corequisite Courses: CHML 435.

Prerequisite Courses: CHM 235 and CHML 235 and CHM 312 with grades of "C-" or better, and PHY 102 or PHY 202.
Course Repeatability: Course may not be repeated.

CHML 435 - Instrumental Analysis Lab

Theory and application of modern analytical instrumentation and techniques. Emphasis on atomic spectroscopy, molecular spectroscopy, chromatography, electrochemistry, mass spectrometry, statistical analysis, report writing, and laboratory safety.

Credit Hours: 2

Corequisite Courses: CHM 435.
Prerequisite Courses: CHML 235
Course Repeatability: Course may not be repeated.

CHM 445 - Inorganic Chemistry

Study of periodic relationships; crystal lattice theory; transition metals and ions; crystal field theory; organometallic structures and reactions; and reaction mechanisms. The lab for this course is CHML 445.

Credit Hours: 3

Prerequisite Courses: CHM 320 with a minimum grade of C and CHM 350 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 445 - Inorganic Synthesis Laboratory

Synthesis and techniques in inorganic chemistry. Normally taken concurrently with CHM 445. This course is the lab for CHM 445.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 445.
Course Repeatability: Course may not be repeated.

CHM 495 - Senior Seminar

Discussion of selected topics.

Credit Hours: 1

Prerequisite Courses: CHM 350
Additional Restrictions/Requirements: 25 semester hours of chemistry courses including prerequisite

course.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CHML 312 - Advanced Techniques of Organic Chemistry Laboratory

Advanced laboratory techniques for the synthesis, purification, and identification of organic compounds using chromatographic and spectroscopic methods including HPLC, GC-MS, UV-Vis, IR, and NMR. This course is the lab for CHM 312.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 312.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

Or

CHML 365 - Biochemistry Laboratory

Theory and practice of biochemical techniques. Topics may include protein assays, protein purification, electrophoresis, enzyme kinetics, HPLC or proteins,

buffers and pH, DNA isolation, and molecular visualization and modeling.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 365.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and

Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162

Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

Electives

Plus 6 hours from the following electives, with at least 3 hours from courses in Block I

Block I

CHM 325 - Biophysical Chemistry

Introduction to the fundamentals of thermodynamics and kinetics in the context of biochemical systems. A brief review of the structures of proteins, nucleic acids and membranes followed by a treatment of the thermodynamics and kinetics of binding reactions and phase transitions involving these macromolecules and assemblies. CHML 325 is the laboratory course for CHM 325.

Credit Hours: 3

Prerequisite Courses: BIO 201, CHM 211, CHM 220.
Course Repeatability: Course may not be repeated.

CHM 380 - Forensic Chemistry

Theory and applications of trace organics and metals analyses, fiber and polymer analyses, toxicology, serology, drug and DNA chemistry, fingerprinting techniques, and chain of custody procedures. The optional 3-hour laboratory (CHML 380) may be registered for separately.

Credit Hours: 3

Prerequisite Courses: CHM 211 and CHML 211
Course Repeatability: Course may not be repeated.

CHM 415 - Physical Organic Chemistry

Theoretical and physical organic chemistry, including chemical bonding, stereochemistry and conformational analysis with applications to selected reaction mechanisms.

Credit Hours: 3

Prerequisite Courses: CHM 212.
Course Repeatability: Course may not be repeated.

CHM 417 - Medicinal Chemistry

Study of the principles involved in, and the multidisciplinary nature of, modern drug design. Focus on chemical and biological principles that are fundamental to medicinal chemistry and on understanding how and why certain chemicals interact at biological targets.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 365 or BIO 465
Prerequisite Courses: CHM 212
Crosslisting: CHM 517
Course Repeatability: Course may not be repeated.

CHM 425 - Computational Chemistry

Theory and hands-on training of basic computational chemistry; including molecular mechanics, semi-empirical and ab initio molecular orbit theory, density functional theory, and molecular dynamics.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHM 461 - Biochemistry of Immunity

Introduction to the reactions underlying the immune response, emphasizing biochemical principles. The principles underlying the innate and adaptive immune systems, and the structure and function of the molecules involved. Exploration of the functional immune system as a coordinated collective of individual components.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 462 - Biochemistry of Cell Signaling

Introduction to the general principles of cell signaling. The molecules responsible for signaling processes will be discussed, including synthetic or natural product molecules which affect cell signaling. Specific examples may be discussed including neurotransmission, metabolic regulation, and targeting of cell signaling

proteins for therapeutic benefit.

Credit Hours: 3

Prerequisite Courses: CHM 365.
Course Repeatability: Course may not be repeated.

CHM 463 - Peptide Synthesis

Exploration of peptide synthesis techniques, covering both solution-phase and solid-phase (on-resin) methods. Includes discussions on amino acid coupling strategies, protecting group approaches, activation processes, peptide synthesizers, and ligation techniques. Prepares students for practical applications in biochemical research, drug design, and protein chemistry by examining current methodologies and challenges in peptide assembly.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHM 466 - Biochemistry II

Examination of bioenergetics, structure and function of biomembranes, biosynthesis, degradation of fatty acids, amino acids, and nucleotides, integration of metabolism, signal transduction, and the action of hormones. Consideration of the structure and enzymology of DNA and RNA, genetic information, protein biosynthesis, and gene regulation.

Credit Hours: 3

Prerequisite Courses: CHM 365 or BIO 465.
Course Repeatability: Course may not be repeated.

CHM 467 - Bioinorganic Chemistry

Exploration of the roles that metal ions play in biochemical systems, bridging the gap between inorganic chemistry and biochemistry and providing a comprehensive understanding of how metals contribute to the structure and function of biomolecules. Examines the principles of coordination chemistry, the function of metalloenzymes, and the application of various spectroscopic techniques to study metal-containing biomolecules.

Credit Hours: 3

Prerequisite Courses: CHM 220 and CHM 365
Crosslisting: CHM 567
Course Repeatability: Course may not be repeated.

CHM 468 - Structure and Function of Nucleic Acids

Study of the structure of DNA and RNA, the denaturation and renaturation of DNA and RNA, DNA techniques including cloning, the central dogma (including DNA replication, transcription and translation), and DNA-Protein interactions.

Credit Hours: 3

Prerequisite Courses: CHM 365
Course Repeatability: Course may not be repeated.

CHM 469 - Enzymology

Investigation of enzyme mechanisms and their regulation. Exploration of the theoretical and practical aspects of studying enzymes and their biological

implications. A particular focus will be placed on binding, steady-state kinetics, transient kinetics, allosteric regulation, and inhibition.

Credit Hours: 3

Prerequisite Courses: CHM 365, CHM 220.
Course Repeatability: Course may not be repeated.

CHM 480 - Chemistry Education Research and Practice

Selected topics from chemistry education research. Focus on current research about learning theories, epistemology, representations of chemical structure, technology use in the chemistry classroom, and laboratories.

Credit Hours: 3

Prerequisite Courses: CHM 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CHM 580
Course Repeatability: Course may not be repeated.

CHM 485 - Industrial and Polymer Chemistry

An overview of major industrial processes, the synthesis and significance of major industrial chemicals. Polymer chemistry to include synthesis, properties, and applications is covered. Some specialty topics such as pharmaceutical chemistry and agricultural chemistry are also briefly covered.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 486 - Fundamentals of Heterocycles with Emphasis on Pharmaceuticals

Well over half of all known organic compounds and most pharmaceuticals are heterocyles (containing an atom other than C in the ring), yet their chemistry is hardly touched on in conventional courses. Topics include the nomenclature, properties, synthesis, and pharmaceutical applications of heterocycles.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 291 - Introductory Research

Laboratory and computational research under faculty supervision beyond what is offered in existing courses.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Freshman, sophomore, junior, or senior standing and consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CHM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CHM 499 - Honors Work in Chemistry

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Block II

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current

topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHM 475 - Chemical Oceanography

Introduction to chemical oceanography, including discussion of sources, distribution, forms of occurrence of chemical species in seawater; chemistry of salty solutions; air-sea interactions; marine carbonate system; organic compounds and trace elements in seawater; estuarine chemistry.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CHM 102 and CHML 102. Recommended prerequisite or corequisite: CHM 235 and OCN 150.
Course Repeatability: Course may not be repeated.

CHM 490 - Special Topics In Chemistry

Selected topics in chemistry that are beyond the scope of regular course offerings.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing and consent of instructor.
Crosslisting: CHM 592
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CHM 498 - Internship In Chemistry

Practical field experience and academic training related to the student's principal area of interest through a program of work and study within a business or agency. Student is supervised and evaluated jointly by a chemistry faculty member and an on-site supervisor. (Only three hours may count toward a major in chemistry.)

Credit Hours: 1 To 3

Prerequisite Courses: CHM 212 and CHML 212 and CHM 235 and CHML 235

Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, consent of instructor; and GPA of at least 2.80 in chemistry.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability Insurance Additional Course Fee Schedule

Additional Information:

An overall grade point average of "C" (2.00) is required in all chemistry courses counted toward the major. Students working for the B.S. degree should arrange their work so as to take CHM 320 and CHM 321 in the junior year. (**If CHM 291 or CHM 491 are used to fulfill requirements from Block I, a student must take a combined total of 3 credit hours in CHM 291 and CHM 491, and a comprehensive written report is required. A student may only count up to a total of 3 credit hours of CHM 291, CHM 491, CHM 498, and CHM 499 toward the major.)

Clinical Research, B.S.

Program Coordinator: Annemarie Petroff, MS I
Program Coordinator & Lecturer

(Clinical Research, B.S. Details | UNCW)

The UNCW Clinical Research Program prepares individuals for participation in the science and business of developing drugs, biologics, and biomedical devices with emphasis on pre-approval human clinical trials and post-marketing safety studies. Most graduates work for pharmaceutical and biotechnology companies, contract research organizations, clinical research service providers, or clinical sites enrolling clinical trial subjects. This is an online distance education program that requires 2 semesters of internship at a clinical research organization.

The Clinical Research Program is not a nursing or laboratory-based program.

Student Learning Outcomes

Upon completion of the BS in Clinical Research curriculum, the graduate will be able to:

1. Explain scientific concepts related to the design and analysis of clinical trials. Explain the care of patients, aspects of human subject protection, and safety in the conduct of a clinical trial.

2. Describe how investigational products are developed and regulated.
3. Explain the study management (adverse event identification and reporting, post-market surveillance, and pharmacovigilance), and handling of investigational product.
4. Explain the operations at the site level to run a study (financial and personnel aspects).
5. Demonstrate how data are acquired and managed during a clinical trial, including source data, data entry, queries, quality control, and correction and the concept of a locked database.
6. Demonstrate the principles and practice of leadership and professionalism in clinical research.
7. Describe elements of communication within the site and between the site and sponsor, CRO, and regulators including the teamwork skills necessary for conducting a clinical trial.

Requirements for a Major in Clinical Research for the B.S. Degree:

Collateral Courses (28 hrs)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

MAT 101 - The Art of Mathematics

Exploration of real-life contexts which discuss geometry, rates of growth, consumer statistics, and practical probabilities so students can utilize quantitative information in degree programs and make personal, professional, and civic decisions.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions, confidence intervals, hypothesis testing, correlation and regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Complete one of the following sequences:

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXSL 216 - Human Anatomy and Physiology I Laboratory

EXSL 216 is the study of the anatomical and functional characteristics of the human body including the skeletal, muscular, circulatory, and respiratory systems with emphasis on health and physical activity.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 216.
Course Repeatability: Course may not be repeated.

EXS 217 - Human Anatomy and Physiology II

Examines six major organ systems that include the human nervous, endocrine, immune, digestive, urinary and reproductive systems as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 217
Prerequisite Courses: EXS 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXSL 217 - Human Anatomy and Physiology II Laboratory

EXSL 217 provides the laboratory experience for EXS 217 via examining the anatomy and physiology of the nervous, endocrine, immune, digestive, urinary and reproductive systems including the special senses and metabolism.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 217.
Course Repeatability: Course may not be repeated.

OR

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

Core Courses (52 hrs):

CLR 301 - Introduction to Clinical Research

Provides overview of people, terminology, execution, and regulations involved in clinical research process. Focuses on phases of biopharmaceutical product development and protection of human subjects. Emphasis on FDA evaluation of new products for the

pharmaceutical and biotechnology industries. Open to non-majors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

CLR 310 - Clinical Research Writing and Communications

Examines principles and practice of scientific writing in clinical research field with emphasis on critical thinking, researching, and writing processes. Includes writing of such documents as standard operating procedures, proposals, literature reviews, short reports and letters.

Credit Hours: 3

Prerequisite or Corequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minor.
University Studies: Building Competencies/Writing Intensive

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction Restricted to Clinical Research majors**Minor Restriction** Restricted to Clinical Research minors

CLR 325 - Pharmacotherapeutics

Focuses on therapeutic uses and effects of drugs. Discusses drug classes that may be encountered in clincal protocols during new drug development. Reviews various medical conditions and summarizes basic pathophysiology, clinical presentation, diagnosis, desired outcome, disease prevention, pharmacologic and non-pharmocologic therapy.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Restricted to Clincal Research majors and minors.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 330 - Fundamentals of Biopharmaceutical Product Development

This completely on-line course provides an overview of the development of pharmaceutical and biotechnology products for the marketplace. This course reviews the theoretical and practical aspects of the discovery of new entities, the preclinical process, chemistry manufacturing and controls (CMC), manufacturing and scale-up of candidate products, over-the-counter and generic drugs, production and stability of marketed products as well as the overall costs of drug development.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minors.
Course Repeatability: Course may not be repeated.
Major Restriction Restricted to Clinical Research majors**Minor Restriction** Restricted to Clinical Research minors

CLR 340 - Study and Site Management for Clinical Trials

Operational aspects of clinical trials at the site level, including financial, personnel, and legal considerations. Introduces relevant regulations and guidelines including ICH GCP. Includes discussion of roles, responsibilities, and perspectives of the subject, clinical study coordinator, prinicipal investigator, sponsor, and contract research organization.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Only open to students within the Clinical Research major.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 350 - Understanding Medical Terminology and Clinical Endpoints

Audio-visual approach to study of medical terminology, body systems, diagnostic procedures, and pharmacology. Emphasizes word construction, spelling, usage, comprehension, pronunciation, abbreviations.

Applies terminology to clinical study endpoints commonly used to measure safety and efficacy of a biopharmaceutical product.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

CLR 410 - Collaborative Writing for Clinical Studies

Focuses on collaborative writing approaches, style, and sources of information used to create clinical research documents. Encourages critical thinking by summarizing information from multiple sources with varying degrees of quality.

Credit Hours: 3

Prerequisite Courses: CLR 310 with a C or better.
Additional Restrictions/Requirements: Restricted to students with declared major in Clinical Research.
University Studies: Building Competencies/Writing Intensive

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 420 - Regulatory Affairs

In-depth coverage of the requirements for worldwide marketing applications. Examination of the regulatory review process and regulatory agency interactions. Emphasis on late phase of clinical investigations and marketing considerations, including safety reporting.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minor.
Course Repeatability: Course may not be repeated.
Major Restriction Restricted to Clinical Research majors**Minor Restriction** Restricted to Clinical Research minors

CLR 430 - Managing and Monitoring Clinical Trials

Reviews theoretical principles and practices guiding trial monitoring, project management, and trial phases including planning, initiation, monitoring and closing. Discusses roles and responsibilities of people and groups focusing on protocol development, site monitoring, quality assurance, data management and overall trial management.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better and CLR 330 with a C or better and CLR 340 with a C or better.
Additional Restrictions/Requirements: Restricted to Clinical Research majors.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 440 - Bioanalytics

Examines study designs and statistical analyses commonly used in biopharmaceutical clinical trials and post-marketing studies with focus on interpreting descriptive and inferential statistics. Explores techniques such as randomization, blinding, and

placebo-control. Reviews industry processes for data analysis. Discusses basic concepts in epidemiology, pharmacoeconomics, psychometrics/patient-reported outcomes.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better and CLR 330 with a C or better and CLR 350 with a C or better.
Additional Restrictions/Requirements: Restricted to CLR majors and CLR minors.
University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 450 - Data Management

Examines role and responsibilities of data management in clinical research. Topics include organization, collection, review, and tracking of data; technology platforms; case report form design, and regulations. Includes an applied component to learn data structure

and manipulation.

Credit Hours: 4

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Open only to students in the CLR major and CLR minor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

CLR 470 - The Business of Clinical Research

Examines financial aspects of clinical research spanning from individual studies to the business models supporting clinical research organizations. Focuses on contract research services, vendor management, study team labor costs, contracts and proposals. Disucsses accountability for study budgets at the individual level.

Credit Hours: 3

Corequisite Courses: CLR 497

Additional Restrictions/Requirements: Open to Clinical Research majors only.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 496 - Clinical Research Internship I

Students must work with faculty placement in prior semester. Practical experience, 14 hours weekly at clinical research site, includes online course with learning modules that enhance the experience and discuss issues arising in the practicum. Students and participating organizations are matched to provide a comprehensive clinical research experience.

Credit Hours: 6

Prerequisite Courses: CLR 301 with a C or better and CLR 310 with a C or better and CLR 325 with a C or better and CLR 330 with a C or better and CLR 340 with a C or better and CLR 350 with a C or better.
Additional Restrictions/Requirements: Restricted to Clinical Research majors.
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 6
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

CLR 497 - Clinical Research Internship II

Students must work with faculty on placement in prior semester. Continuation of practical experience, 14 hours weekly at clinical research site, includes online courses with learning modules that enhance the experience and discuss issues arising in the practicum. Students and participating organizations are matched to provide a compreshensive clinical research experience.

Credit Hours: 6

Prerequisite Courses: CLR 496 with a P.
Additional Restrictions/Requirements: Restricted to Clinical Research majors.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 6
Additional Course Fee Schedule

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

Select one of the following as a Core Course elective (3-4 hrs):

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

ECN 327 - Health Economics

Analysis of health-care delivery using economic reasoning. Specific topics include the demand for health, medical care, and insurance; socio-economic patterns in health-related behaviors and outcomes; physician and hospital services; private and public

financing of care; regulation of the health-care marketplace; and medical innovation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Course Repeatability: Course may not be repeated.

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and

technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GRN 101 - Introduction to Gerontology

Introduction to the social, psychological, physiological, and philosophical aspects of aging through reading, writing, and fieldwork.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

PSY 245 - Drugs and Behavior

Psychological aspects of drug use and abuse. Emphasis on the effects of major psychoactive drugs (including alcohol) on behavior, the psychological determinants of drug use, and treatment of drug abuse.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PSY 425 - Psychometrics

Introduction to theories and research related to the practice of psychological test construction, including a survey of intelligence, achievement and personality tests, and laboratory experience demonstrating development and applications of these tests.

Credit Hours: 6

Prerequisite Courses: (PSY 246 or PSY 264 or PSY 247) and PSY 355.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 305 - Statistical Programming

Introduction to statistical programming in SAS with emphasis on data step programming; applications to data management and report generation, simulation, graphical and numerical analysis of univariate and multivariate data. Comparison of current statistical software.

Credit Hours: 3

Prerequisite Courses: STT 215
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 350 - Survey Sampling

Elementary survey sampling on the design and analysis of sample surveys. Topics include design of questionnaires; methods of data collection; sample-survey designs including simple random sampling, stratified sampling, cluster sampling, and systematic sampling; ratio and regression estimation; two-stage cluster sampling; sampling from wildlife populations; sources of errors.

Credit Hours: 3

Additional Restrictions/Requirements: An introductory statistics course from any department.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Degree Requirements: 83-84 hours

Additional Information:

A "C" (2.00) or better is required in each required CLR core course to progress. A cumulative grade point average of 2.00 or better is required for graduation.

A "C" (2.0) or better is required in all required non-CLR courses to apply to/progress in the program.

All required CLR 300 level courses must be taken prior to enrollment in internship (CLR 496).

Many of the required courses are sequential, have prerequisites, and may be offered only once a year; therefore, it is imperative that students consult with the academic advisor and follow the prescribed program of study. Students are also expected to complete the university studies requirements during the freshman and sophomore years because of the rigor and concentration of lab courses and the internship in the major. The recommended 15-17 semester hour course load each semester is necessary to complete the program in four academic years. In addition to the university studies and required prerequisite courses, elective credits are also included in the 124 hours required for graduation. To qualify for the Bachelor of Science in Clinical Research, 25% of the total semester hours must be taken in residence at UNCW.

Coastal Engineering, B.S.

The B.S. Coastal Engineering program teaches students to address critical issues affecting coastal

communities around the world by applying fundamentals of engineering in a problem-based learning environment. The program focuses on foundational courses in mathematics, statics, and fluid mechanics and specialized courses in coastal processes, numerical modeling, and field techniques. Students are prepared for careers in consulting, local, state, and federal government, and cutting-edge research.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Coastal Engineering, a student must successfully complete EGN 495.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Coastal Engineering, a student must successfully complete EGN 495.

Requirements for a Major in Coastal Engineering for the B.S. Degree

Core Courses (71 Credit Hours)

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

EGN 101 - Introduction to Engineering

Profession and practice of engineering. Ethics, professionalism, unit systems, problem solving, data presentation, communication, teamwork, and design.

Credit Hours: 2

Additional Restrictions/Requirements: This course is restricted to Freshman students only.
University Studies: Foundations/First Year Seminar
Course Repeatability: Course may not be repeated.

EGN 102 - Introduction to Coastal Engineering

Introduction to the field of coastal engineering and its relationship to other engineering disciplines (civil, structural, environmental) and sciences (geology, oceanography). Examination of basic wave mechanics, tide theory, coastal storm processes and sediment transport processes to support a basic understanding of coastal erosion and approaches to address coastal erosion.

Credit Hours: 3

Prerequisite Courses: EGN 101 (C- or better), MAT 161
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EGN 201 - Engineering Statics

An introduction to concepts in engineering based on forces in equilibrium. Topics include basic force concepts and equilibrium analysis, distributed forces, centroids, moments of inertia, application to structural elements. Upon completion, students should be able to solve problems which require the ability to analyze systems of forces in static equilibrium.

Credit Hours: 3

Prerequisite Courses: PHY 201.
Course Repeatability: Course may not be repeated.

EGN 220 - Engineering Graphics

Introduction to basic engineering graphics principles, skills and practices using Computer Aided Drafting and Design (CADD) software. Topics include sketching, selection of methods and tools, and hands on use of current CADD software applications. Considers design, creation of drawings, plan sheets, and cross-sections, calculations, and assembly of construction drawings.

Course Repeatability: Course may not be repeated.

EGN 301 - Mechanics of Solids

Elementary analysis of deformable solids subjected to force systems. Topics include material behavior; relationship between external forces acting on elastic and inelastic bodies and the resulting behavior; stress and deformation of bars, beams, shafts, pressure vessels, stress and strain; combined stresses; columns.

Credit Hours: 3

Prerequisite Courses: EGN 201 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 310 - Fluid Mechanics for Engineers

Fluid mechanics uses knowledge from mathematics, physics, statics, and dynamics to analyze problems involving the fluid medium. Topics include fluid properties, hydrostatic pressure, pressure on surfaces, conservative equations of mass, momentum and energy, pumps and turbines, open channel flows, and pipe flows in relation to real world engineering problems.

Credit Hours: 3

Prerequisite Courses: MAT 361 and EGN 201 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 311 - Coastal Engineering and Fluids Lab

Applied methods in laboratory investigations into coastal engineering and fluid mechanics principles in a sequence of seven experiments: hydrostatic pressure on submerged surface, stability of a floating body, flow from a hole, hydraulic jump, flow measurement, wave measurements in a wave flume, and beach sediment analysis.

Credit Hours: 1

Prerequisite Courses: EGN 330 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 320 - Water Resources Engineering

Introduction to quantitative methods in water resource systems. Topics include hydrology, precipitation, hydrograph analysis, reservoir and steam routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law;dams; reserviors; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.

Credit Hours: 3

Prerequisite Courses: EGN 310 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 330 - Coastal Wave Mechanics

Examination of the mechanics of water wave motion using linear and non-linear wave theories. Exploration of wave generation, forecasting and measurement.

Covers wave propagation and transformation from offshore to the nearshore where waves interact with the bottom causing shoaling, breaking and initiating sediment movement.

Credit Hours: 3

Prerequisite Courses: MAT 361
Course Repeatability: Course may not be repeated.

EGN 340 - Matlab for Engineering Analysis

An introduction to the MATrix LABoratory (MATLAB) software. Topics to be covered include: basic programming; data management and manipulation; curve fitting and interpolation; image processing; advanced 3D plotting and movie generation; and basic applied numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 261.
Course Repeatability: Course may not be repeated.

EGN 400 - Fundamentals of Engineering Review

Review of topics on the National Council of Examiners for Engineering and Surveying (NCEES) Fundamentals of Engineering (FE) exam. Students become familiar with exam topics and get hands-on problem-solving skills. All 14 topics for the "Other Disciplines" exam specification are covered.

Credit Hours: 1

Prerequisite Courses: EGN 301 (C- or better), EGN 320 (C- or better), and EGN 340 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 402 - Dredging and Beach Nourishment

This course will examine types of dredges and their operation and the process of dredging for beach nourishment. Students will learn about the elements of beach nourishment design including cross-shore and planform design considerations, borrow areas (upland, offshore and inlets), environmental effects of beach nourishment and current dredging/beach nourishment costs. Numerical modeling of beach and dune erosion, shoreline change and storm induced impacts will be introduced. Local examples and ongoing beach

nourishment projects will be examined.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 410 - Field Methods in Coastal Engineering

Introduction to the concepts, instrumentation, and field methods used to observe physical processes specific to the highly-dynamic coastal environment, such as wind, waves, currents, tides, and sediment transport. Hands-on experience in operating, deploying, and analyzing data from sensors that measure waves and currents, as well as with advanced surveying techniques for monitoring beach morphology (e.g., LIDAR, RTK GPS, and SONAR).

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 420 - Applied Coastal Modeling

Provides the knowledge and tools necessary to apply state of the art numerical models in coastal settings. Specific models vary depending on the instructor's expertise. Examples include ADCIRC, FUNWAVE, DELFT3D, or XBeach.

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 430 - Coastal Structures

Examine the functional design of coastal structures distinguishing between groins, jetties, seawalls, breakwaters, revetments and bulkhealds. Hydraulic design and structural stability as a result of breaking and non-breaking wave loading are also covered. In addtion, students examine the materials used and cost implications of coastal structures.

Credit Hours: 3

Prerequisite Courses: EGN 301 (C- or better) and

EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 495 - Engineering Capstone I

A coastal engineering design-focused senior capstone experience with students working either individually or in small teams to research, evaluate alternatives, prepare design documents (plans and specifications) and present solutions to a design review board composed of faculty, local government agencies and/or consultants.

Credit Hours: 4

Additional Restrictions/Requirements: Senior standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and

limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series

solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

9 hours, of which 6 hours must be at the 300 level or higher, and including *at least one course from List A and one from List B:*

LIST A:

EGN 401, EGN 490, EGN 498, EGN 499

LIST B:

BIO 487, CHM 377, EVS 364, EVS 476, MAT 335, MAT 365, MAT 367, OCN 350, PHY 315, PHY 470, PHY 480, PHY 475, STT 315

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

EGN 210 - Engineering Economic Analysis

This course is focused on engineering and managerial decision making. Topics will include the theory of interest; equivalent annual costs; present worth; internal rates of return; benefit/cost ratios. Techniques in cost minimization models and sensitivity analysis will be developed in the context of engineering examples.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EGN 401 - Sediment Transport Processes

This course will examine the physical processes of sandy beaches, coastal sediments, surf zone dynamics, beach profile evolution and cross-shore and longshore sediment transport. The class will also cover beach profile response and sediment transport as a result of waves, currents and storms.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 490 - Special Topics in Coastal Engineering

Selected topics in coastal engineering that are beyond the scope of regular course offerings. May be repeated under a separate course title.

Credit Hours: 1 To 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

EGN 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in the catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or

senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

EGN 498 - Internship in Engineering

Practical experience and academic training in the student's principal area of interest. Joint supervision and evaluation by a engineering faculty member and an on-site supervisor.

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50 and a GPA in EGN courses of at least 2.80. Students must be pre-approved by the faculty supervisor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

EGN 499 - Honors Work in Coastal Engineering

Independent work for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 410 - Environmental Modeling

Overview of environmental modeling as used in practice. Consideration of selected abiotic and biotic models with applications to bacteria, plankton, fish, plants, trees, amphibians, reptiles, birds, and mammals. Hands-on ecological modeling with spreadsheet software.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 422 - Marine Environmental Survey Techniques

Introduction to the fundamentals of environmental marine survey techniques for conservation and management purposes. Use of bathymetric, acoustic imaging, underwater video and seabed sampling techniques to collect, process, export and characterize data related to a range of marine environments in coastal North Carolina.Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321
Additional Restrictions/Requirements: Junior/Senior standing required, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 483 - Fisheries Policy and Management

Overview of fisheries policy and management. Considers important international, national, and regional fisheries, with extended consideration of North Carolina fisheries. Reviews fisheries management agencies, policies, data sources, trends and issues. Examines common biological fishery models, fishing methods and gear, and fishery regulations. Explores methods for assessing the economic impacts of fishing and the recreational value of fishing.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 365 - Vector Calculus

A thorough study of differential and integral calculus of vector-valued functions of a vector variable. Jacobians, inverse and implicit function theorems, change of variables in multiple integrals; theorems of Green, Gauss, and Stokes; applications.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 335
Course Repeatability: Course may not be repeated.

MAT 367 - Methods of Mathematics for Scientists and Engineers

Applied mathematics topics encountered in the physical sciences and engineering disciplines: Fourier series and orthogonal functions; Fourier and Laplace transforms; elementary applications to differential

equations and boundary value problems; introduction to complex variables and residue theory.

Credit Hours: 3

Prerequisite Courses: MAT 261
Additional Restrictions/Requirements: Prerequisite course; MAT 335 recommended.
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 479 - Smart Coasts

Advanced design and analysis of Smart Coastal monitoring systems and datasets. Study and application of the techniques used to observe coastal dynamics in near real time and provide not just data but also distilled information for research, operational, and educational uses.

Credit Hours: 2

Prerequisite Courses: OCN 350.
Course Repeatability: Course may not be repeated.

PHY 315 - Computational Physics and Complexity

Corequisites: PHY 321 or MAT 361. Introduction to numerial modeling techniques for solving problems in physics and complex systems. Numerial techniques will be applied to classical mechanics, bifurcation and dynamical systems, chaotic systems, thermodynamics, optimization, cellular automata, and self-organization.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 470 - Data Analysis

Data analysis techniques used in experimental and applied physical science. Topics include propagation of errors, probability distributions, data reduction techniques, covariance and convolution, autocorrelation, linear regression, time series analysis,

and spectral analysis.

Credit Hours: 3

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone hydrodynamics, storm surge, tides, estuarine hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the

physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PHY 477 - Observational Methods in Physical Oceanography

Description of instrumentation used to measure temperature, salinity, pressure, and current in the ocean. Hands-on use of techniques and instrumentation to collect and analyze real oceanographic data. Credit is not allowed for both PHY 477 and PHY 577.

Credit Hours: 3

Prerequisite Courses: PHY 315 and PHY 475
University Studies: Explorations Beyond the

Classroom, Building Competencies/Writing Intensive
Crosslisting: PHY 577
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.
Any EGN-prefix course

Total Credit Hours: 80

Additional Information

Students must attain a grade point average of "C" (2.00) or better computed over all the courses used to fulfill the requirements of the major, and a grade of "C-"

or better for each EGN course used to fill the requirements of the major.

Note:

Students interested in the B.S. degree in Coastal Engineering are strongly advised to take the MAT 161 and EGN 101 in the fall of the freshman year.

Communication Studies, B.A.

none

Oral Requirement:

To satisfy the oral communication requirement for the B.A. degree in Communication Studies a student must successfully complete COM 101.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Communication Studies a student must successfully complete COM 400. Additional elective opportunities include COM 491, COM 498, COM 499.

Requirements for a Major in Communication Studies for the B.A. Degree:

COM 101 - Public Speaking

Preparation and delivery of public presentations, with emphasis on creativity, reasoning, evidence, organization, and delivery. Course content will also be applied to analysis of speeches by self and others.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 105 - Introduction to Communication Studies

Designed specifically for potential communication studies majors. Deeper overview of the discipline and our department. Emphasis on foundational concepts for practicing, describing, and evaluating communication; and on skills necessary to understand, evaluate, and apply research in the discipline as a communication specialist. Non majors see COM 104: Concepts in Communication Studies.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

COM 200 - Research Methods in Communication Studies

Introduction to critical thinking and overview of research methods in communication studies. Students will develop a research mindset and learn how research is used to answer questions and support claims. Methods include secondary, quantitative, qualitative, textual, and critical research.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 101
Prerequisite Courses: COM 105 with a minimum grade of B.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 301 - Rhetorical Theory

Introduction to classical and contemporary theories of rhetoric from Plato to the present. Emphasis on

applying such theories for greater description, analysis, and evaluation of rhetorical process and outcomes.

Credit Hours: 3

Prerequisite Courses: COM 200 with a minimum grade of B
Additional Restrictions/Requirements: Restricted to COM majors.
Course Repeatability: Course may not be repeated.

COM 305 - Communication Theory

Theoretical perspectives concerning how and why people communicate. Emphasis on applying theories for greater description, analysis, and evaluation of the human communication processes and outcomes.

Credit Hours: 3

Prerequisite Courses: COM 200 with a minimum grade of B
Additional Restrictions/Requirements: Restricted to COM majors.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

COM 400 - Communication Studies Capstone

Reflection and synthesis of philosophical, theoretical, and applied dimensions of curriculum and other experiences as they apply to personal and professional aspirations. Students engage in a variety of assignments that demonstrate senior-level competence in the discipline and the student's chosen sub-disciplines of study.

Credit Hours: 3

Prerequisite Courses: COM 301 or COM 305.
Additional Restrictions/Requirements: Senior COM Studies Majors
Course Repeatability: Course may not be repeated.
Major Restriction COM Studies

- plus 24 additional hours of communication studies coursework
  At least 12 of these 24 hours must be at the 300 or 400 level.

At least three of these 12 must include a 400-level course other than COM 491 or COM 498.

Restrictions:

With respect to these 24 hours, note the following restrictions on the maximum number of credit hours from these courses:

COM 104 - Concepts in Communication Studies

Introduction to communication concepts central to interpersonal relationships, organizations, mass media and other contexts of communication. Focus on concepts and skills that have a practical impact on the student's understanding and practice of communication. Designed specifically for students not intending to become communication studies majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

COM 160 - Engaging Contemporary Media

Exploration of the structures, systems, effects, conventions, and genres of contemporary media. Emphasis on improving media literacy to foster informed, critical, and discerning interaction with media.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behavior
Course Repeatability: Course may not be repeated.

COM 212 - Storytelling in the Community

Storytelling in real-life contexts with an emphasis on performing for elementary school children; theoretical foundations of performance strategies for participatory storytelling; audience-adaptation storytelling techniques for literary and personal stories. (A maximum of three hours may be used toward major degree requirements.)

Credit Hours: 3

Additional Restrictions/Requirements: Consent of

instructor.
Course Repeatability: Course may not be repeated.

COM 295 - Introductory Seminar in Communication Studies

Special topics in communication that are not explored in other courses. Additional restrictions based on topic.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: PCOM and COM Majors or permission of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2
Major Restriction PCOM and COM Majors

COM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing upper-division courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Restricted to junior and senior COM majors, with overall GPA of at least 2.50 and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2-8
Major Restriction COM

COM 495 - Advanced Seminar in Communication Studies

Advanced special topics in communication that are not dealt with in other courses. This course may be repeated under different subtitles. Additional restrictions may be required based on subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2
Major Restriction COM Majors

COM 498 - Internship in Communication Studies

Practical field experience within an organization, emphasizes reflection and application of communication theories, concepts and skills. May be repeated up to 3 times for 12 credit hours total, but only 3 credit hours count toward major. Does not fulfill COM 400-level additional course requirement.

Credit Hours: 3 or 6

Additional Restrictions/Requirements: Restricted to junior and senior COM majors, with overall GPA of at least 2.5 and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3
Additional Course Fee Schedule

Major Restriction COM Majors

Total: 42 hours

Additional Information:

A student may declare pre-communication studies (PCOM) as the intended major after earning a minimum 24 semester credit hours and a grade of "B" or above in COM 105. A PCOM major may declare communication studies (COM) as their major after earning a grade of "B" or above in COM 200. A student may repeat or audit one foundations class, either COM 105 or COM 200, one time in order to replace one grade lower than a "B" for admittance to the department. A final grade of "F" due to admitted or adjudicated academic dishonesty shall not be replaced if the course is repeated. Further, because it cannot be replaced, a failing grade in either COM 105 or COM 200 received due to admitted or adjudicated academic dishonesty shall be the grade considered for admission into the COM major and thus will disqualify a student from admission to the major. All UNCW continuing and transfer students are subject to this gateway requirement at the time of application.

A minimum "C" (2.00) average across the six core courses and 24 additional hours of communication studies coursework is required. Differently titled courses with the numbers 295 or 495 may be repeated for additional credit.

A maximum number of credit hours may be counted toward graduation from these courses as follows: COM 212 (8 hours), COM 491 (9 hours), COM 498 (12 hours).

COM 160 may be used to fulfill university studies or be counted toward the COM major but not both.

Computer Science, B.S.

The Department of Computer Science offers two programs of study leading to the Bachelor of Science degree in computer science. Both options prepare students to attend graduate school and to pursue career opportunities in computer science or closely related areas. Both options follow the systems-based approach set forth by the Association for Computing Machinery and the IEEE Computer Society for undergraduate degree programs in computer science.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Computer Science a student must successfully complete either CSC 385 or CSC 495.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Computer Science a student must successfully complete CSC 450 or CSC 355.

Requirements for a Major in Computer Science for the B.S. Degree

The Department of Computer Science offers two programs of study leading to the Bachelor of Science degree in computer science. Both options prepare students to attend graduate school and to pursue career opportunities in computer science or closely related areas. Both options follow the systems-based approach set forth by the Association for Computing Machinery and the IEEE Computer Society for undergraduate degree programs in computer science. A grade point average of "C" (2.00) or better computed over all the courses used to fulfill the requirements of the major is required; in addition, a grade point average of "C" (2.00) or better computed over all the CSC courses used to fulfill the requirements of the major is required.

A student must complete one of the following options to fulfill the degree requirements. Option 1 (Systems Option) covers the core of the Computer Science discipline and focuses on the study of the field from a scientific perspective. Option 2 (Applied Option) focuses on the use and application of Computer Science to other disciplines.

Systems Option (Option 1)

Option 1 (Systems Option), which is accredited by the Accreditation Board for Engineering and Technology (ABET), contains more thorough coverage of concepts in operating systems, scientific computing, and has more elective credit hours in upper-level computer science courses to allow you the flexibility to explore additional advanced topics.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and

Statistics
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 242 - Computer Organization

Topics include data representation, CPU organization, I/O memory and communication, machine-level representation of programs, introduction to a modern instruction set, introduction to assembly language programming.

Credit Hours: 3

Prerequisite Courses: CSC 131 with a minimum grade of C and CSC 133
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

CSC 340 - Scientific Computing

Introduction to the design, application, and performance of numerical algorithms fundamental to scientific computation. Topics may include error and error propagation; matrix applications such as finding solutions to linear systems, finding eigenvalues and eigenvectors, or finding linear principal components; optimization; basic Markov modeling; Fourier processing; and curve fitting. Emphasizes relative merits and implementations of algorithms.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and MAT 162
Course Repeatability: Course may not be repeated.

CSC 342 - Operating Systems

Study of the internal operations of operating system. Topics include system services; CPU scheduling; multi-core scheduling; threading; computer security; privileges vs. user modes; memory management; virtual memory; file systems; disk scheduling; concurrent processes; semaphores; critical sections; synchronization.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 331 with a minimum grade of "C", or instructor approval.
Prerequisite Courses: CSC 242.
Course Repeatability: Course may not be repeated.

CSC 355 - Database Design and Implementation

Introduction to database concepts and database management systems. Topics include data models (hierarchical, network, relational, parallel, distributed and NoSQL), data modeling, data description languages, data manipulation languages, database administration, data warehouses, and front-end development. A group project designing and implementing a relational database is required.

Prerequisite Courses: CSC 231 (with a minimum grade of C)
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

CSC 360 - Formal Languages and Computability

An introduction to theoretical computer science. Topics include regular expression and finite state concepts; basic automata theory; formal grammars and languages; computability; Turing machines; elementary recursive function theory.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and CSC 242
Course Repeatability: Course may not be repeated.

CSC 380 - Design and Analysis of Algorithms

Algorithm design paradigms such as divide and conquer, greedy, and dynamic programming; techniques for algorithm analysis, such as asymptotic notations and estimates, as well as time/space trade-offs. Topics may include sorting, searching, scheduling, string matching, graph algorithms, amortized analysis, and computational geometry.

Credit Hours: 3

Prerequisite Courses: CSC 133 and CSC 231 with a

minimum grade of C and MAT 161
Course Repeatability: Course may not be repeated.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information

Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

CSC 434 - Programming Languages

Comparative study of programming languages from both theoretical and applied viewpoints. Typical issues include syntax and semantics, scope and binding times, storage allocation, parameter-passing techniques, control structures, run-time representation of programs and data. Detailed examples from the imperative, functional, parallel, object-oriented, and logical programming paradigms.

Credit Hours: 3

Prerequisite Courses: CSC 331 with a minimum grade of C and CSC 360
Course Repeatability: Course may not be repeated.

CSC 450 - Software Engineering

Study of the design and production of large and small software systems. Topics include systems engineering,

software life-cycle and characterization, use of software tools, and software quality attributes including product security. Substantial software project required.

Credit Hours: 3

Prerequisite Courses: CSC 331 with a minimum grade of C.
Additional Restrictions/Requirements: Senior standing.

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science, B.S., Three-Plus-Two Computer Science and Electrical or Computer Engineering Program**Minor Restriction** Computer Science

9 additional hours of 300-400 level CSC courses

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and

limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

One of the sequences with labs

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for

the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

or

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

One additional course chosen from

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly

recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

or

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth

materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 101 - Earth Revealed Laboratory

Introduction to applied use of rock and mineral samples, maps, and models in geology. Topics include plate tectonics, mineral and rock identification and resources, geologic time, mountain building, earthquakes, volcanoes, river processes and flooding, groundwater, coastal processes and storms, energy, and climate change.

Credit Hours: 1

Prerequisite or Corequisite Courses: GLY 101.
University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches

to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL

240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

Total Credit Hours: 73

Applied Option (Option 2)

Option 2 is designed to give you a sound background in computer science and the opportunity for in-depth study of a computer science application area.

Students in the Artificial Intelligence, Digital Arts, Security, or Software Engineering concentration can take various special courses that could be used as substitutes for standard electives based on their relevance. These courses are "CSC 475 - Topics in Computer Science," "CSC 491 - Directed Individual Study," "CSC 498 - Internship in Computer Science," and "CSC 499 - Honors Work in Computer Science," which offer flexibility and individualized learning experiences. These options allow for personalized exploration or hands-on experience in specific areas, which can enrich the student's academic path depending on their interests. The use of these four courses must be advisor approved for a substitution.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 242 - Computer Organization

Topics include data representation, CPU organization, I/O memory and communication, machine-level representation of programs, introduction to a modern instruction set, introduction to assembly language programming.

Credit Hours: 3

Prerequisite Courses: CSC 131 with a minimum grade of C and CSC 133
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C'

(2.00) or better is required for taking courses for which CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

CSC 344 - Computer Networks

Introduction to computer networks, focusing on Internet architecture and protocols. Topics include layered network architectures, addressing, naming, forwarding, routing, communication reliability, client-server model, distributed computing, web and email protocols, and network security. Students acquire practical experience by using a network protocol analyzer and programming reduced versions of real Internet protocols.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 231 or CYBR 251, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 355 - Database Design and Implementation

Introduction to database concepts and database management systems. Topics include data models (hierarchical, network, relational, parallel, distributed

and NoSQL), data modeling, data description languages, data manipulation languages, database administration, data warehouses, and front-end development. A group project designing and implementing a relational database is required.

Prerequisite Courses: CSC 231 (with a minimum grade of C)
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor**.**
Course Repeatability: Course may not be repeated.

CSC 360 - Formal Languages and Computability

An introduction to theoretical computer science. Topics include regular expression and finite state concepts; basic automata theory; formal grammars and languages; computability; Turing machines; elementary recursive function theory.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and CSC 242
Course Repeatability: Course may not be repeated.

CSC 380 - Design and Analysis of Algorithms

Algorithm design paradigms such as divide and conquer, greedy, and dynamic programming; techniques for algorithm analysis, such as asymptotic notations and estimates, as well as time/space trade-offs. Topics may include sorting, searching, scheduling, string matching, graph algorithms, amortized analysis, and computational geometry.

Credit Hours: 3

Prerequisite Courses: CSC 133 and CSC 231 with a minimum grade of C and MAT 161
Course Repeatability: Course may not be repeated.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

CSC 434 - Programming Languages

Comparative study of programming languages from both theoretical and applied viewpoints. Typical issues include syntax and semantics, scope and binding times, storage allocation, parameter-passing techniques, control structures, run-time representation of programs and data. Detailed examples from the

imperative, functional, parallel, object-oriented, and logical programming paradigms.

Credit Hours: 3

Prerequisite Courses: CSC 331 with a minimum grade of C and CSC 360
Course Repeatability: Course may not be repeated.

CSC 450 - Software Engineering

Study of the design and production of large and small software systems. Topics include systems engineering, software life-cycle and characterization, use of software tools, and software quality attributes including product security. Substantial software project required.

Credit Hours: 3

Prerequisite Courses: CSC 331 with a minimum grade of C.
Additional Restrictions/Requirements: Senior standing.

University Studies: Building Competencies/Writing

Intensive, Explorations Beyond the Classroom, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science, B.S., Three-Plus-Two Computer Science and Electrical or Computer Engineering Program**Minor Restriction** Computer Science

6 additional hours of 300-400 level CSC courses

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and

Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Artificial Intelligence Concentration (18 Credit Hours)

The Artificial Intelligence (AI) concentration is ideal for students who desire to learn how to program computer systems to 'learn' from data and perform complex tasks. AI includes studying topics such as generative AI, computer vision, natural language processing, robotics, machine learning, deep learning, and knowledge acquisition and representation.

Required Courses (9 hours):

- CSC 302 - Introduction to Artificial Intelligence
- CSC 322 - Data & Machine Learning
- CSC 340 - Scientific Computing

Concentration Electives (9 hours):

Choose three courses from the following:

- CSC 402 - Advanced Artificial Intelligence
- CSC 432 - Deep Machine Learning
- CSC 433 - Natural Language Processing
- CSC 452 - Computer Vision
- CSC 472 - Generative Deep Learning

Digital Arts Concentration (18 Credit Hours)

The Digital Arts concentration trains you in computer science, studio art, and the fusion of the two. You will

develop technical, aesthetic, analytical, and problem-solving skills to work in computer-art and design-related fields such as mobile application and web design, game development, visual effects, animation, film, interactive media, and other emerging opportunities at the intersection of computer technology and the arts.

Required Courses (15 hours):

- ART 101 - Two-Dimensional Design
- ART 260 - Introduction To Graphic Design
- CSC 220 - 3-D Computer Graphics Tools and Literacy
- CSC 320 - Computer Animation
- CSC 370 - Computer Graphics

Concentration Electives (3 hours):

Choose one course from the following:

- CSC 315 - Mobile Application Development
- CSC 365 - Client-Side Web Development
- CSC 368 - Visual Design for Multi-Media
- CSC 421 - Game Development
- CSC 430 - Digital Visual Effects
- CSC 461 - Virtual Reality
- CSC 465 - Server-Side Web Development

- CSC 491 - Directed Individual Study
- CSC 498 - Internship in Computer Science
- DART 475 - Special Topics in Digital Arts

Security Concentration (18 Credit Hours)

The Security concentration will teach you the mechanics of cryptography, computer security, software vulnerabilities, and network analysis. Graduates are prepared to design and implement secure hardware, software, and network systems.

Required Courses (15 hours):

- CYBR 201 - Fundamentals of Cybersecurity
- CYBR 343 - Systems Security
- CSC/CYBR 358 - Cyber Operations
- CSC 364 - Introduction to Cryptography
- CSC/CYBR 424 - Computer Security

Concentration Electives (3 hours):

Choose one course from the following:

- CSC 342 - Operating Systems
- CSC 351 - Applied Software Security
- CSC 427 - Quantum Cryptography
- CSC 451 - Software Assurance

- CSC 464 - Advanced Cryptography and Blockchain
- CSC 465 - Server-Side Web Development
- CSC 466 - Malware Analysis
- CSC 468 - Reverse Engineering
- CSC 470 - Hardware Security
- CYBR 345 - Blockchain and Decentralized Security
- CYBR 354 - Computer and Mobile Forensics
- CYBR 363 - Artificial Intelligence for Cybersecurity

Software Engineering Concentration (18 Credit Hours)

The software engineering concentration prepares you to create high-quality and secure software systems. Courses in this concentration emphasize modern tools, large projects, and practical experiences in developing software. Subjects include web development, mobile application development, and software security.

Concentration Electives (18 hours):

Select six courses, where two courses must be at the 400 level, from the following:

- CSC 315 - Mobile Application Development
- CSC 342 - Operating Systems
- CSC 351 - Applied Software Security

- CSC 365 - Client-Side Web Development
- CSC 368 - Visual Design for Multi-Media
- CSC 421 - Game Development
- CSC 451 - Software Assurance
- CSC 458 - Software Practicum
- CSC 461 - Virtual Reality
- CSC 465 - Server-Side Web Development

Other Concentrations (18-23 Credit Hours)

Computer Science majors can expand their studies by focusing on the sciences/business with the following concentrations. These concentrations earn a Minor in the chosen program.

- Biology: Complete the requirements for the Biology Minor.
- Business: Complete the requirements for the Business Minor.
- Chemistry: Complete the requirements for the Chemistry Minor.
- Geographic Information Systems: Complete requirements for the Geospatial Technologies Minor.

- Neuroscience: Complete requirements for the Neuroscience Minor.
- Statistics: Complete requirements for the Statistics Minor.

Total Credit Hours: 73-78 (core plus concentration)

- Option 2 with Artificial Intelligence Concentration (67 hours)
- Option 2 with Digital Arts Concentration (76 hours)
- Option 2 with Security Concentration (67 hours)
- Option 2 with Software Engineering Concentration (67 hours)
- Option 2 with Biology Concentration (76 hours)
- Option 2 with Business Concentration (77 hours)
- Option 2 with Chemistry Concentration (77 hours)
- Option 2 with Geographic Information Systems Concentration (78 hours)
- Option 2 with Neuroscience Concentration (78 hours)
- Option 2 with Statistics Concentration (73 hours)

Creative Writing, B.F.A.

The Department of Creative Writing offers a major leading to the Bachelor of Fine Arts degree, the

optional Certificate in Publishing, and a minor in creative writing. The Bachelor of Fine
Arts program offers an intensive apprenticeship in writing, informed by the close study of literature, to serious, aspiring writers, among a community of accomplished professional writers. The BFA degree provides training in the art of writing within the context of studies in aesthetics, the literary tradition, the craft and profession of publishing, and broad liberal arts subject matter relevant to the student's needs and goals. Students take writing workshops in all three of the department's writing genres: fiction, poetry, and creative nonfiction.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.F.A. degree in Creative Writing, students must successfully complete CRW 496.

Applied-Learning Requirement

To satisfy the applied-learning requirement for the B.F.A. in Creative Writing, a student must successfully complete CRW 496.

Requirements for the Major in Creative Writing for the B.F.A. Degree

63 hours including 45 hours in core courses and 18 hours in related study:

Core Requirements: 45 hours

CRW 201 - Introduction to Creative Writing

Introduction to the principles and techniques of creative writing, aimed at developing the creative process. Includes lectures, reading, and writing exercises in poetry, fiction, and creative nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

CRW 203 - The Evolution of Creative Writing: Fiction, Poetry, and Creative Nonfiction

Introduction to the historical development of poetic, narrative, and other forms of creative writing. Analytical

and creative assignments develop student understanding of techniques such as metrics, point of view, and narrative structure. This course is a core requirement for the CRW major and CRW minor.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CRW 207 - Fiction Writing I: Invention and Story Craft

Instruction in writing fiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the fiction of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite:CRW 201, or prerequisite/corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 208 - Poetry Writing I: Image and Pattern

Instruction in writing poetry, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the poetry of relevant professional poets.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 209 - Creative Nonfiction I: Discovery and Story Craft

Instruction in writing creative nonfiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work, the work of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 300 - Research for Creative Writers

Instruction for writers of creative nonfiction, fiction, and poetry in searching electronic, print, and physical archives; historical artifacts; the geographical and built environment; and living sources, with special emphasis on interviewing techniques and ethics, and on integrating research into artistic writing.

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: A grade of C- or higher is required for the course to count toward the Major in Creative Writing or the Minor in Coastal and Environmental Writing. A grade point average of C (2.00) or higher is required for all courses counted toward the major or minor.
Course Repeatability: Course may not be repeated.
Major Restriction Pre-Creative Writing, Creative Writing**Minor Restriction** Coastal and Environmental Writing

One course in Reading for Craft:

CRW 302 - Creative Nonfiction: Reading for Craft

Study of the aesthetics and techniques of creative nonfiction and of the history of nonfictional forms such

as the memoir and the literary essay, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 303 - Poetry: Reading for Craft

Study of the aesthetics of poetry, poetic technique, and the history of poetic forms such as the ballad, the sonnet, the ode, and free verse, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 208
Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 304 - Forms of Dramatic Writing

Study of the aesthetics of dramatic writing, dramatic technique, and the history of dramatic forms such as tragedy, comedy, the screenplay, and the musical, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 306 - Fiction: Reading for Craft

Study of the aesthetics and technique of fiction, and the history of fictional forms such as the epic, the short story, and the novel, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 207
Additional Restrictions/Requirements: Restricted to

CRW majors and pre-CRW majors.
Course Repeatability: Course may not be repeated.

CRW 307 - Fiction Writing II: Voice and Vision

Techniques of writing fiction and development of the creative process, including writing exercises, editing, and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 207
Additional Restrictions/Requirements: Restricted to CRW and Pre-CRW majors.
Course Repeatability: Course may not be repeated.

CRW 308 - Poetry Writing II: Voice and Vision

Techniques of writing poetry and development of the creative process, including writing exercises, editing, and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 208
Course Repeatability: Course may not be repeated.

CRW 309 - Creative Nonfiction Writing II: Voice and Vision

Techniques of writing creative nonfiction and development of the creative process, including writing exercises, editing, and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 209
Course Repeatability: Course may not be repeated.

CRW 322 - Editing for Publication

Intensive course in applied self-editing. Course content focuses on grammar, spelling, writing mechanics, usage, precision, and best practices to prepare manuscripts for critique and consideration for publication. This core is a requirement for both the CRW major and the Certificate in Publishing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: CRW 207 or CRW 208 or CRW 209.
Additional Restrictions/Requirements: Restricted to

CRW and Pre-CRW majors and CRW minors.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

2 courses in:

CRW 420 - Advanced Manuscript Workshop: (Topic)

Advanced manuscript writing workshop in a single genre or mixed genres of creative writing.

Credit Hours: 3

Corequisite Courses: CRW 302, CRW 303, CRW 304, or CRW 306.
Prerequisite Courses: CRW 307 or CRW 308 or CRW 309.
Additional Restrictions/Requirements: CRW majors only.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

6 hours in:

CRW 496 - Senior Seminar in Creative Writing

Seminar addressing issues of the profession, including preparing a manuscript for submission to publishers, publishing, advanced study, the writing life, ethics, and employment. Senior thesis, chapbook created in conjunction with the UNCW Publishing Laboratory, and public oral presentation of creative work required.

Credit Hours: 6

Prerequisite Courses: CRW 420 Advanced Manuscript Workshop: Topic
Additional Restrictions/Requirements: Prerequisite courses, restricted to senior class standing, CRW majors, and consent of the department.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom/Certified Internship Program, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction BFA in Creative Writing

Related Study: 18 hours

18 hours, selected from these courses:

CRW 210 - Writing for Digital Media

Instruction in writing narrative as a foundation for digital-arts projects. Focus will be on the writing process, from story ideas to revised drafts, with the aim of applying the written works to digital-arts projects.

Credit Hours: 3

Prerequisite Courses: CRW 201 or CRW 203
Course Repeatability: Course may not be repeated.

CRW 305 - The Creative Process

Investigation through reading, lectures, discussions, writing, and exercises of the creative process in general and its particular application to literary art. Readings include studies of the creative process in a variety of other disciplines.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: CRW 207 or CRW 208 or CRW 209, or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 314 - Theory and Practice of Literary Translation

Introduction to the theory and practice of literary translation. Includes translation exercises, workshop discussion, reading on the history and theory of translation.

Credit Hours: 3

Prerequisite Courses: CRW 307 or CRW 308 or CRW 309
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

CRW 315 - Special Topics in Creative Writing

An intensive study of a particular subject in creative writing. The course varies from semester to semester and to include such topics as the short story; contemporary poets and movements or writing and the visual arts.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

CRW 316 - Playwriting I

Intensive and imaginative exploration of playwriting through various exercises designed to foster and challenge personal creativity, ensure aesthetic understanding and application, while advancing fundamentals of craft. Concludes with the creation of a ten-minute play, or short form play.

Credit Hours: 3

Crosslisting: THR 316
Course Repeatability: Course may not be repeated.

CRW 318 - Screenwriting I: Introduction to Screenwriting

Theory and practice of screenwriting an emphasis on the fundamentals of narrative structure. Students write original scripts, including a short screenplay for possible use in FST 495.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201; or prerequisite:CRW 207 or CRW 208 or CRW 209; or consent of instructor.
Additional Restrictions/Requirements: Restricted to PCRW or CRW majors.
Crosslisting: FST 318
Course Repeatability: Course may not be repeated.

CRW 320 - Special Workshop in Writing

Workshop in one or more genres of creative writing.

Credit Hours: 1 To 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

CRW 321 - Introduction to Book Publishing

Introduction to the culture and commerce of books. Examines the life cycle of a book; the people and

processes involved in book publishing including editorial practice and the issues involved in editorial decision-making; and the business, economics, and ethics of the publishing industry. Engagement in a variety of publishing activities, such as a book proposal and mock book auction.

Credit Hours: 3

Prerequisite Courses: CRW 201
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CRW 323 - Bookbuilding

Introduction to principles of effective graphic design and typography for book publishing, using desktop publishing applications in a computer lab setting and including hands-on production of several publications. Includes survey history and future trends in printing and publishing.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 324 - Special Topics in Publishing

Intensive examination of a special area of publishing, such as electronic publishing, editing poetry, or history of the book.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

CRW 325 - Literary Magazine Practicum

Applied course in the publication of a literary journal. The practical business of running a literary magazine, including editorial, marketing, and sales decisions.

Assignments include reading submissions, proofreading and fact-checking, assisting in the creation and production of promotional materials, commenting on design decisions, selecting artwork/illustrations, and meeting production deadlines.

Credit Hours: 3

Prerequisite Courses: CRW 201
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CRW 350 - Beyond the BFA

Examines the prospects of the lives of creative writers beyond college. Focus is on career options for creative writers, job searches, graduate school applications, writing the resume, interviewing for jobs, submitting creative work for publication, and considering creative/alternative professional paths.

Credit Hours: 3

Additional Restrictions/Requirements: CRW majors

and Pre-CRW majors only.
Course Repeatability: Course may not be repeated.

CRW 418 - Screenwriting II: Writing the Feature Film

The craft of screenwriting applied to the feature form.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Prerequisite course, restricted to CRW or FST majors, or consent of instructor.
Crosslisting: FST 418, FST 518
Course Repeatability: Course may not be repeated.

CRW 419 - Screenwriting III: Film Adaptation

Writing, revision, and completion of screen adaptation of literary work.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Crosslisting: FST 419, FST 519
Course Repeatability: Course may not be repeated.

CRW 425 - Advanced Topics in Publishing

Intensive examination of an advanced area of publishing, such as an area of specialization within book editing, book arts or design, the history of independent book or magazine publishng, or for a course taught by a guest instructor.

Credit Hours: 3

Prerequisite Courses: CRW 321 and CRW 323
Crosslisting: CRW 525
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CRW 460 - Publishing Practicum

Practical course in book and periodical publishing, in conjunction with the CRW Publishing Laboratory. Hands-on experience editing, designing, and producing publications such as books, chapbooks, literary broadsides, and promotional materials.

Credit Hours: 1 To 3

Prerequisite Courses: CRW 323 and (CRW 321 or CRW 322)
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CRW 498 - CRW 498 - Internship in Writing - Bass

Academic training and practical writing experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.

Credit Hours: 1

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: Prerequisite course and nine additional hours of CRW writing

courses, of which at least three are at the 300-400 level. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

CRW 499 - Honors Work in Creative Writing

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Eligibility for honors program and nine hours of literature or CRW writing courses (depending on project focus), at least three hours at the 300-400 level.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

FNA 102 - Explorations in the Creative Process

Explorations of the creative process informed by a variety of allied arts including, but not limited to:

creative writing, music, painting, sculpture, theater, dance and film. Includes lectures, readings, and creative exercises.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

Optional Non-Department Related Study, up to 6 hours

Up to 6 hours from these courses outside the Department of Creative Writing may count toward the 18 hours of Related Study: AFN 130–495; ARH 201–499, ART 101–499; CLA 209–345; ENG 190, 202–499; FST 200-499; FRH 209, 321, 322, 420, 421, 470; GER 209, 321, 331, 333; HST 101–499; LIB 101, 203; MUS 105–499; PAR 101–499; PRT 212; SPN 321, 322, 323, 421, 422; THR 110–499; WGS 210–495.

Total: 63 hours

Additional Information

Students may declare the major in Pre-Creative Writing upon completion of 24 credit hours. To gain admission to the full creative writing major and enter the BFA Program, Pre-Creative Writing majors must apply upon completion of the following courses:

- CRW 201 - Introduction to Creative Writing, with a grade of "C-" or higher
- CRW 203 - The Evolution of Creative Writing: Fiction, Poetry, and Creative Nonfiction, with a grade of "C-" or higher
- CRW 207 - Fiction Writing I: Invention and Story Craft
- CRW 208 - Poetry Writing I: Image and Pattern
- CRW 209 - Creative Nonfiction I: Discovery and Story Craft

A grade of B or higher is required in at least one of these: CRW 207, CRW 208, CRW 209.

Applications include an application page, plus a sample of the applicant's writing in fiction, poetry, and creative nonfiction. The department solicits applications in in the first month of classes during each semester. Applications are not accepted during the summer.

A grade of C- or higher is required in each course counted toward the major, and a grade point average of C (2.00) or higher for all courses counted toward the major.

Criminology, B.A.

none

Computer Requirement

To satisfy the computer requirement for the B.A. degree in Criminology a student must successfully complete CRM 301 (SOC 301).

Oral Communication Requirement

To satisfy the oral communication requirement for the B.A. degree in Criminology a student must successfully complete CRM 495 or CRM 496 (SOC 496) or CRM 499.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.A. degree in Criminology a student must successfully complete one of the following: CRM 256 (SOC

256), CRM 300 (SOC 300), CRM 301 (SOC 301), CRM 490, CRML 490, or CRM 491.

Requirements for a Major in Criminology for the B.A. Degree

Core Courses (18 Credit Hours)

CRM 105 - Introduction to Criminal Justice

Study of criminal law and the criminal justice system in the U.S. Emphasis on structure and function of police, courts and corrections.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

CRM 300 - Methods of Social Research

Introduction to logic and methods of sociological research. Topics include connections between theory and research, problem formulation and research design, conceptualization and measurement, sampling, modes of observation and analysis, ethical issues, and the political context of research. Open only to the students in the sociology or criminology major or minor.

Credit Hours: 3

Prerequisite or Corequisite Courses: STT 215 or MAT 101 or higher (excluding MAT 141 and MAT 142)
Prerequisite Courses: SOC 105 or CRM 105
University Studies: Building Competencies/Information Literacy
Crosslisting: SOC 300
Course Repeatability: Course may not be repeated.

CRM 301 - Sociological Data Analysis and Interpretation

Instruction in computer-assisted univariate and bivariate analysis and interpretation of social science

data. This course satisfies the department computer competency requirement.

Credit Hours: 3

Prerequisite Courses: CRM 105 or SOC 105, and CRM 300 or SOC 300, STT 215 or MAT 101 or higher (excluding MAT 141, MAT 142)
University Studies: Common Requirements/Critical Reasoning
Crosslisting: SOC 301
Course Repeatability: Course may not be repeated.

CRM 360 - Criminological Theory

The scientific study of criminological theories. Topics include causal logic, theory construction, evaluation of theories, the historical background and intellectual lineage of various criminological theories, and the current empirical evidence for tests of theories.

Credit Hours: 3

Prerequisite Courses: CRM 105, and SOC 255/CRM 255 or SOC 256/CRM 256.

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CRM / SOC Senior Seminar (option based on concentration choices below)

Concentrations (24 Credit Hours)

In addition, students must complete one of the concentrations below:

Option 1. Criminology

Primary Electives (6 Credit Hours)

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 315 - Victimology

Role of victims in crime and criminal justice system. Special focus on sexual battery, battered women and child abuse.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 370 - Racialization and the Criminal Justice System

Study of the relationships between racialization and criminalization. Exploration of the social, political and legal conceptions of "crime" and "justice" using critical perspectives and theories of crime.

Credit Hours: 3

Prerequisite Courses: CRM 105.
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 375 - Drugs and Crime

Examination of the impact of drug use upon families, communities and the criminal justice system. Special attention given to how drug laws have criminalized vast numbers of people within our society.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

CRM 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: SOC 376
Course Repeatability: Course may not be repeated.

CRM 377 - Restorative Justice

Study of restorative justice as a global and local reform strategy to provide meaningful justice options to people whose lives have been impacted by crime. Explores the theory, practice, and empirical findings associated with restorative justice. Applied learning is central to this class in that circle process is used throughout the semester as a platform for instruction.

Credit Hours: 3

Prerequisite Courses: CRM 105 and CRM 255 / SOC 255 or CRM 256 /SOC 256, or permission of instructor.
Course Repeatability: Course may not be repeated.

CRM 420 - Collective Violence

Analysis of group violence and its control. Topics include the theory and strategy of mass violence, terrorism, genocide, riots and revolutions, and historical and contemporary forms of warfare and the examination of case studies to identify the influence of society, culture, and politics on such events, as well as the impact these events have on society.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Nine hours in CRM.
Course Repeatability: Course may not be repeated.

Secondary Electives (6 Credit Hours)

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 307 - Police in Society

Analysis of role and behavior of police in the U.S. Special attention to social environment and political climate affecting the police.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 320 - Criminal Courts

Analysis of structure and function of U.S. criminal courts. Examines relationships among the courthouse work-group (police, prosecutor, defense attorney, judge) and the role of witnesses, victims, defendants and jurors.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 330 - Corrections

Study of societal patterns of punishment, alternatives to incarceration, consequences of imprisonment and correctional strategies of rehabilitation and deterrence.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 380 - Criminal Law

Basic concepts of statutory and common law. Topics include: definition of crime; elements of major crimes; criminal responsibility; defenses to criminal charges; inchoate and group criminality; and limitations of the criminal law. Special focus on North Carolina law.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 381 - Criminal Procedure

Basic concepts of procedural law. Topics include the nationalization of the Bill of Rights, searchers, seizures, probable cause, warrants, arrest, self-incrimination, right to counsel, and double jeopardy.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 390 - Media, Crime, and Justice

Examination of the relationship between mass media, crime, and criminal justice with special emphasis on how media images affect crime and justice attitudes, ideology, and policy. Includes examination of entertainment and news media in both electronic and print forms.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 395 - Topical Seminar

Discussion of selected topics in criminology and criminal justice.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Sophomore, junior, or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 460 - Crime and Public Policy

Study of crime policies in the justice system with emphasis on theoretical and empirical merits of various crime reduction strategies. Qualitative and quantitative

methods used to evaluate crime control policies.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 490 - Criminal Justice Practicum

Field placement in various criminal justice agencies. Integrates practical experience with classroom knowledge. Practicum students required to participate in one-hour weekly seminar (CRML 490). The lab for this course is CRML 490.

Credit Hours: 3

Corequisite Courses: CRML 490
Additional Restrictions/Requirements: Senior standing in criminology.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

CRML 490 - Criminal Justice Laboratory

Classroom discussion of selected topics related to criminal justice practicum. This course is the lab for CRM 490.

Credit Hours: 1

Corequisite Courses: CRM 490
Course Repeatability: Course may not be repeated.

CRM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and

consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Social Science Electives (9 Credit Hours)

FSC 211 - Fundamentals of Forensic Science

Survey of theories, methods, techniques and applications of various forensic science disciplines. Topics include but are not limited to: crime scene and death investigation; body identification; forensic biology and chemistry; pattern, trace, and imprint evidence analysis; and forensic behavioral science.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 275 - Forensic Psychology

Investigation of psychological factors relevant to the legal system including: eyewitness identification and false memories, confessions, jury decision making, the insanity defense and mental health law, expert psychological testimony in court, criminal profiling, risk management, treatment of the mentally ill in corrections.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 220 - Sociology of Death and Dying

Examination of the sociological dimensions of death in modern society. The social organizational and cultural dimensions of death will be considered in terms of rites of passage, bureaucratization, social movements, cultural differences, and historical and contemporary contexts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 250 - Issues in Social Justice

Overview of the sociological study of social justice and policies that proclaim to promote social justice in the United States. Examines various forms of institutionalized inequality on the basis of social class, race/ethnicity, gender and sexuality.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 260 - Poverty Studies

Examination of the nature and extent of poverty in the United States. Discussion of poverty measurement, characteristics, poverty population, international comparisons, underlying causes of poverty and

government programs and policies that address poverty.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 315 - Urban Sociology

Analysis of the history and development, social organization, and problems of the city.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 321 - Immigration and U.S. Society

Sociological considerations of immigration with a focus on the U.S. Major topics include why people migrate,

the role of immigration and the immigration system in the larger society, how immigrants impact U.S. society, how social locations and institutions shape immigrants' lives.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 335 - The Sociology of Deviant Behavior

Analysis of certain behavior in terms of deviations from norms. Application of sociological and psychological concepts and theory to deviant behavior, and critical evaluation of non-sociological research and theories.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: CRM 335
Course Repeatability: Course may not be repeated.

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 345 - Sociology of the Family

Origin and development of the family as a social institution from an historical and comparative approach; analysis of forms and functions of the family; socialization, mate selection, procreation.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 347 - Sociology of Education

Historical-comparative sociological analysis of formal education systems in modern societies. Examination of sociological theories of education as they apply to political economy, stratification, social selection, cultural reproduction, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation, Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 350 - Gender and Society

Focus on gender in social life. Theoretical explanations of gender differentiation, with an emphasis on socialization, stratification, family, work, education, politics, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 360 - Social Theory

An introduction to major theoretical perspectives in sociology including functional theory; conflict theory; exchange theory; interactionist theory; and structural theory.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and six additional hours in sociology.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 365 - Social Psychology

A sociological analysis of human social interaction. Topics include symbolic interaction, socialization, interpersonal relations. Focus is on social and cultural influences on individual and group behavior.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: CRM 376
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 380 - Social Classes

Examination of social stratification as the system of distribution of privilege, power and prestige in modern and traditional societies. Discussion of major theories and theorists of stratification; the structure and process of systems of social inequality; the causes, correlates and consequences of socially structured inequality.

Credit Hours: 3

Prerequisite Courses: SOC 105

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 433 - Sociology of Mental Disorder

Examination of the influences of race, social class, gender, and age on the incidence and prevalence of mental disorder. Consideration of the institutions that help those with mental disorders. Review of mental health law, including definitions of dangerousness, insanity as defense, mental health courts, and the right to treatment.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social

organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: CRM 449
Course Repeatability: Course may not be repeated.

Senior Seminar (3 Credit Hours)

CRM 495 - Senior Seminar

A topical seminar for students to apply the theories and methods they have learned as a major. Fulfills oral competency requirement. The seminar is the capstone course for majors.

Credit Hours: 3

Prerequisite Courses: CRM 255 (SOC 255), or CRM

256 (SOC 256), CRM 301 (SOC 301), CRM 360.
Additional Restrictions/Requirements: Prerequisite courses and senior standing.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CRM 499 - Honors Work in Criminal Justice

Independent work for honors students in which students apply criminological theory and methods to a major research project and paper that is then presented orally before an examining committee. Honors work is typically completed in two 3 credit hour semesters. **This course serves as an alternative to the CRM 495capstone requirement for criminology majors.**Satisfies College of Arts and Sciences oral communication requirement.

Credit Hours: 2 To 3

Prerequisite Courses: (CRM 255 or CRM 256) and CRM 300 and CRM 301
Additional Restrictions/Requirements: Junior or senior standing, prerequisite courses, and eligibility for

honors program.
University Studies: Writing Intensive, Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Option 2. Criminal Justice (24 Credit Hours)

Primary Electives (6 Credit Hours)

CRM 307 - Police in Society

Analysis of role and behavior of police in the U.S. Special attention to social environment and political climate affecting the police.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 320 - Criminal Courts

Analysis of structure and function of U.S. criminal courts. Examines relationships among the courthouse work-group (police, prosecutor, defense attorney, judge) and the role of witnesses, victims, defendants

and jurors.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 330 - Corrections

Study of societal patterns of punishment, alternatives to incarceration, consequences of imprisonment and correctional strategies of rehabilitation and deterrence.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 377 - Restorative Justice

Study of restorative justice as a global and local reform strategy to provide meaningful justice options to people whose lives have been impacted by crime. Explores the theory, practice, and empirical findings associated with restorative justice. Applied learning is central to this class in that circle process is used throughout the

semester as a platform for instruction.

Credit Hours: 3

Prerequisite Courses: CRM 105 and CRM 255 / SOC 255 or CRM 256 /SOC 256, or permission of instructor.
Course Repeatability: Course may not be repeated.

CRM 380 - Criminal Law

Basic concepts of statutory and common law. Topics include: definition of crime; elements of major crimes; criminal responsibility; defenses to criminal charges; inchoate and group criminality; and limitations of the criminal law. Special focus on North Carolina law.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 381 - Criminal Procedure

Basic concepts of procedural law. Topics include the nationalization of the Bill of Rights, searchers, seizures, probable cause, warrants, arrest, self-incrimination, right to counsel, and double jeopardy.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 460 - Crime and Public Policy

Study of crime policies in the justice system with emphasis on theoretical and empirical merits of various crime reduction strategies. Qualitative and quantitative methods used to evaluate crime control policies.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

Secondary Electives (6 Credit Hours)

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 315 - Victimology

Role of victims in crime and criminal justice system. Special focus on sexual battery, battered women and child abuse.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 335 - The Sociology of Deviant Behavior

Analysis of certain behavior in terms of deviations from norms. Application of sociological and psychological concepts and theory to deviant behavior, and critical evaluation of non-sociological research and theories.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Crosslisting: SOC 335.
Course Repeatability: Course may not be repeated.

CRM 370 - Racialization and the Criminal Justice System

Study of the relationships between racialization and criminalization. Exploration of the social, political and legal conceptions of "crime" and "justice" using critical perspectives and theories of crime.

Credit Hours: 3

Prerequisite Courses: CRM 105.
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 375 - Drugs and Crime

Examination of the impact of drug use upon families, communities and the criminal justice system. Special attention given to how drug laws have criminalized vast numbers of people within our society.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

CRM 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: SOC 376
Course Repeatability: Course may not be repeated.

CRM 390 - Media, Crime, and Justice

Examination of the relationship between mass media, crime, and criminal justice with special emphasis on how media images affect crime and justice attitudes, ideology, and policy. Includes examination of entertainment and news media in both electronic and print forms.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 394 - Departmental Study Abroad

This course designation is for students studying abroad and taking a course offered by their study abroad institution that does not transfer in as a Criminology course. This allows students to apply this course to their major.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3

CRM 395 - Topical Seminar

Discussion of selected topics in criminology and criminal justice.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Sophomore, junior, or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 420 - Collective Violence

Analysis of group violence and its control. Topics include the theory and strategy of mass violence, terrorism, genocide, riots and revolutions, and historical and contemporary forms of warfare and the examination of case studies to identify the influence of society, culture, and politics on such events, as well as the impact these events have on society.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Nine hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Junior or Senior Standing
Crosslisting: SOC 449
Course Repeatability: Course may not be repeated.

CRM 490 - Criminal Justice Practicum

Field placement in various criminal justice agencies. Integrates practical experience with classroom

knowledge. Practicum students required to participate in one-hour weekly seminar (CRML 490). The lab for this course is CRML 490.

Credit Hours: 3

Corequisite Courses: CRML 490
Additional Restrictions/Requirements: Senior standing in criminology.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

CRML 490 - Criminal Justice Laboratory

Classroom discussion of selected topics related to criminal justice practicum. This course is the lab for CRM 490.

Credit Hours: 1

Corequisite Courses: CRM 490
Course Repeatability: Course may not be repeated.

CRM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Social Science Electives (9 Credit Hours)

FSC 211 - Fundamentals of Forensic Science

Survey of theories, methods, techniques and applications of various forensic science disciplines. Topics include but are not limited to: crime scene and

death investigation; body identification; forensic biology and chemistry; pattern, trace, and imprint evidence analysis; and forensic behavioral science.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 275 - Forensic Psychology

Investigation of psychological factors relevant to the legal system including: eyewitness identification and false memories, confessions, jury decision making, the insanity defense and mental health law, expert psychological testimony in court, criminal profiling, risk management, treatment of the mentally ill in corrections.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 220 - Sociology of Death and Dying

Examination of the sociological dimensions of death in modern society. The social organizational and cultural dimensions of death will be considered in terms of rites of passage, bureaucratization, social movements, cultural differences, and historical and contemporary contexts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 250 - Issues in Social Justice

Overview of the sociological study of social justice and policies that proclaim to promote social justice in the United States. Examines various forms of institutionalized inequality on the basis of social class,

race/ethnicity, gender and sexuality.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 260 - Poverty Studies

Examination of the nature and extent of poverty in the United States. Discussion of poverty measurement, characteristics, poverty population, international comparisons, underlying causes of poverty and government programs and policies that address poverty.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 315 - Urban Sociology

Analysis of the history and development, social organization, and problems of the city.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 321 - Immigration and U.S. Society

Sociological considerations of immigration with a focus on the U.S. Major topics include why people migrate, the role of immigration and the immigration system in the larger society, how immigrants impact U.S. society, how social locations and institutions shape immigrants' lives.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 335 - The Sociology of Deviant Behavior

Analysis of certain behavior in terms of deviations from norms. Application of sociological and psychological concepts and theory to deviant behavior, and critical evaluation of non-sociological research and theories.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: CRM 335
Course Repeatability: Course may not be repeated.

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 345 - Sociology of the Family

Origin and development of the family as a social institution from an historical and comparative approach; analysis of forms and functions of the family; socialization, mate selection, procreation.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 347 - Sociology of Education

Historical-comparative sociological analysis of formal education systems in modern societies. Examination of sociological theories of education as they apply to political economy, stratification, social selection, cultural reproduction, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation, Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 350 - Gender and Society

Focus on gender in social life. Theoretical explanations of gender differentiation, with an emphasis on socialization, stratification, family, work, education, politics, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 360 - Social Theory

An introduction to major theoretical perspectives in sociology including functional theory; conflict theory; exchange theory; interactionist theory; and structural theory.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and six additional hours in sociology.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 365 - Social Psychology

A sociological analysis of human social interaction. Topics include symbolic interaction, socialization, interpersonal relations. Focus is on social and cultural influences on individual and group behavior.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: CRM 376
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 380 - Social Classes

Examination of social stratification as the system of distribution of privilege, power and prestige in modern and traditional societies. Discussion of major theories and theorists of stratification; the structure and process of systems of social inequality; the causes, correlates and consequences of socially structured inequality.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 433 - Sociology of Mental Disorder

Examination of the influences of race, social class, gender, and age on the incidence and prevalence of

mental disorder. Consideration of the institutions that help those with mental disorders. Review of mental health law, including definitions of dangerousness, insanity as defense, mental health courts, and the right to treatment.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: CRM 449
Course Repeatability: Course may not be repeated.

Senior Seminar (3 Credit Hours):

CRM 495 - Senior Seminar

A topical seminar for students to apply the theories and methods they have learned as a major. Fulfills oral competency requirement. The seminar is the capstone course for majors.

Credit Hours: 3

Prerequisite Courses: CRM 255 (SOC 255), or CRM 256 (SOC 256), CRM 301 (SOC 301), CRM 360.
Additional Restrictions/Requirements: Prerequisite courses and senior standing.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CRM 499 - Honors Work in Criminal Justice

Independent work for honors students in which students apply criminological theory and methods to a major research project and paper that is then presented orally before an examining committee. Honors work is typically completed in two 3 credit hour semesters. **This course serves as an alternative to the CRM 495capstone requirement for criminology majors.**Satisfies College of Arts and Sciences oral communication requirement.

Credit Hours: 2 To 3

Prerequisite Courses: (CRM 255 or CRM 256) and CRM 300 and CRM 301
Additional Restrictions/Requirements: Junior or senior standing, prerequisite courses, and eligibility for honors program.
University Studies: Writing Intensive, Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Option 3. Public Criminology (21 Credit Hours)

This option provides students with intensive training in using sociology/criminology to inform real life social issues. Students will engage in activities that seek to address social problems within the local community and disseminate these research findings beyond the academy. In addition to the required core courses, students must complete:

Senior Seminars (9 Credit Hours)

CRM 391 - Public and Applied Sociology and Criminology Seminar

Application of sociological tools to real-life issues in a variety of social settings. Methods may include surveys, interviews, focus groups, secondary data analysis, and evaluation applications. Development of proposals for research projects conducted in a second, sequenced course in the following semester.

Credit Hours: 3

Prerequisite or Corequisite Courses: SOC 301 or CRM 301.
Prerequisite Courses: SOC 300 or CRM 300, and CRM 360.

University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Crosslisting: SOC 391
Course Repeatability: Course may not be repeated.

CRM 496 - Practicum in Public and Applied Sociology and Criminology

Completion of student research proposed and approved in CRM/SOC 391, as well as completion of a practicum or internship. The second course in a two-semester capstone sequence.

Credit Hours: 6

Prerequisite Courses: SOC 300 or CRM 300, and SOC 301 or CRM 301, and CRM 360, and SOC 391 or CRM 391.
Additional Restrictions/Requirements: Junior or senior class standing.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning

Crosslisting: SOC 496
Course Repeatability: Course may not be repeated.

Electives (12 Credit Hours)

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 307 - Police in Society

Analysis of role and behavior of police in the U.S. Special attention to social environment and political climate affecting the police.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 315 - Victimology

Role of victims in crime and criminal justice system. Special focus on sexual battery, battered women and child abuse.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 320 - Criminal Courts

Analysis of structure and function of U.S. criminal courts. Examines relationships among the courthouse

work-group (police, prosecutor, defense attorney, judge) and the role of witnesses, victims, defendants and jurors.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 330 - Corrections

Study of societal patterns of punishment, alternatives to incarceration, consequences of imprisonment and correctional strategies of rehabilitation and deterrence.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 370 - Racialization and the Criminal Justice System

Study of the relationships between racialization and criminalization. Exploration of the social, political and legal conceptions of "crime" and "justice" using critical

perspectives and theories of crime.

Credit Hours: 3

Prerequisite Courses: CRM 105.
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 375 - Drugs and Crime

Examination of the impact of drug use upon families, communities and the criminal justice system. Special attention given to how drug laws have criminalized vast numbers of people within our society.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

CRM 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: SOC 376
Course Repeatability: Course may not be repeated.

CRM 380 - Criminal Law

Basic concepts of statutory and common law. Topics include: definition of crime; elements of major crimes; criminal responsibility; defenses to criminal charges; inchoate and group criminality; and limitations of the criminal law. Special focus on North Carolina law.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 381 - Criminal Procedure

Basic concepts of procedural law. Topics include the nationalization of the Bill of Rights, searchers, seizures, probable cause, warrants, arrest, self-incrimination, right to counsel, and double jeopardy.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 390 - Media, Crime, and Justice

Examination of the relationship between mass media, crime, and criminal justice with special emphasis on how media images affect crime and justice attitudes, ideology, and policy. Includes examination of entertainment and news media in both electronic and print forms.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 395 - Topical Seminar

Discussion of selected topics in criminology and criminal justice.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Sophomore, junior, or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 420 - Collective Violence

Analysis of group violence and its control. Topics include the theory and strategy of mass violence, terrorism, genocide, riots and revolutions, and historical and contemporary forms of warfare and the examination of case studies to identify the influence of society, culture, and politics on such events, as well as the impact these events have on society.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Nine hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 490 - Criminal Justice Practicum

Field placement in various criminal justice agencies. Integrates practical experience with classroom knowledge. Practicum students required to participate in one-hour weekly seminar (CRML 490). The lab for this course is CRML 490.

Credit Hours: 3

Corequisite Courses: CRML 490
Additional Restrictions/Requirements: Senior standing in criminology.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

CRML 490 - Criminal Justice Laboratory

Classroom discussion of selected topics related to criminal justice practicum. This course is the lab for CRM 490.

Credit Hours: 1

Corequisite Courses: CRM 490
Course Repeatability: Course may not be repeated.

CRM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further

information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Total Credit Hours: 39-42

Options 1 and 2: 42 hours (minimum) Option 3: 39 hours (minimum)

Additional Information

An overall average of "C" (2.00) or better must be maintained in all criminology courses used to satisfy the major and minor. Students must receive a "C" or higher in all of their core criminology courses. Students may only receive one "D" in their criminology electives. (A D- does not count as a D).

Cybersecurity, B.S.

The B.S. in Cybersecurity was created jointly by faculty from the Congdon School of Supply Chain, Business Analytics and Information Systems within the Cameron School of Business and faculty from the Department of Computer Science within the College of Science and Engineering. As such, it draws upon expertise of both information systems and computer science.

The major is targeted to students interested in courses that highlight computer, network, and information security.

Student's pursuing the cybersecurity program of study will learn computing-based foundations, crosscutting concepts that are broadly applicable across the range of cybersecurity specializations, knowledge containing essential cybersecurity skills, and ethical and professional responsibilities associated with the field.

Students should contact the program coordinator for additional information.

Requirements for the B.S. in Cybersecurity

A student must complete the following to fulfill the degree requirements. A grade point average of 'C' (2.00) or better computer over all the courses used to fulfill the requirements of the major is required. No grade below 'C-' will be accepted towards the graduation in a core or required course.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Cybersecurity a student must successfully complete CYBR 322.

Core Requirements (43 Credit Hours)

These are the core courses required by every student.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or

more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and processes.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CYBR 202 - Cyber Policy, Legal, Ethics, Compliance

Exploration of the intersection between cybersecurity and policy, law, ethics, privacy, compliance, and law enforcement. Examination of applicable laws and policies related to cyber defense. Topics include privacy and the internet, the effectiveness of cybersecurity applications in preventing crime and abuse, and the application of ethical concepts in cybersecurity.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 201.
University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

CSC 344 - Computer Networks

Introduction to computer networks, focusing on Internet architecture and protocols. Topics include layered network architectures, addressing, naming, forwarding, routing, communication reliability, client-server model, distributed computing, web and email protocols, and network security. Students acquire practical experience by using a network protocol analyzer and programming reduced versions of real Internet protocols.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 231 or CYBR 251, or instructor approval.
Course Repeatability: Course may not be repeated.

Or

MIS 320 - Network Fundamentals

Introduction to the OSI model, network topologies, IP addressing and subnet masks, simple routing techniques, and basic switching terminology. Topics

include the basic functions of the seven layers of the OSI model, different classes of IP addressing and subnetting, router login scripts.

Credit Hours: 3

Prerequisite or Corequisite Courses: CIT 110 or CYBR 201 or MIS 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Cybersecurity major or declared BS Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity Minor

For Applied Track

CYBR 245 - Cryptography and Data Security

Introduction to basic concepts in cryptography, including encryption/decryption, sender authentication, data integrity, non-repudiation, attack classification

(ciphertext-only, known plaintext, chosen plaintext, chosen ciphertext), secret key (symmetric) cryptography and public key (asymmetric) cryptography, and information-theoretic security (one-time pad, Shannon Theorem). Introduction to data security topics authenticity, anonymity, and integrity.

Credit Hours: 3

Prerequisite Courses: CYBR 201 with a C or better and CSC 131 with a C or better.
Additional Restrictions/Requirements: CYBR 201 with a C or better and CSC 131 with a C or better.
Course Repeatability: Course may not be repeated.

CYBR 322 - Information Assurance

Exploration of the concepts of information assurance, audit and security assessment to measure compliance with applicable laws and regulations, and cyber risk management. Hands-on experience applying the NIST Risk Management Framework to government systems to protect the system's unique mission.

Prerequisite Courses: CYBR 201

Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administation**Minor Restriction** Cybersecurity

CIT 225 - Linux Administration

Install, configure, securely administer Linux operating system platforms. Topics include Linux operating systems concepts, system installation and configuration, introduction to networking (protocols, IP addressing, ports, subnetting), security, firewalls, packet filtering, networked file systems, lightweight directory access protocol, virtualization, Linux-Windows integration, and Linux shell programming.

Credit Hours: 3

Prerequisite Courses: CSC 121 or CSC 131 with a grade of "C-" or better in either course, or instructor approval.
Course Repeatability: Course may not be repeated.

MIS 352 - Windows Systems Administration

Provides students with skill to perform basic operations involved in system administration of Microsoft Windows based systems. Provides students with the ability to apply methods such as managing applications, services, and network ports to improve the robustness of operating systems.

Credit Hours: 3

Prerequisite Courses: MIS 320 or MIS 323 or CSC 344 with a minimum grade of C-
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Intelligent Systems Engineering major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Intelligent Systems Engineering**Minor Restriction** Cybersecurity Minor

CIT 301 - Cloud Computing & Virtualization

Survey, configuration, and deployment of cloud computing technologies and services, including but not limited to: virtualization environments, SaaS, PaaS, DaaS, IaaS, mass storage, virtualization compute resources, SQL and non-SQL databases, cloud development tools, deployment models, load balancing, automatic provisioning, Internet of Things, VPNs, firewalls, security, two-factor authentication, legal/privacy issues.

Credit Hours: 3

Corequisite Courses: Co-requisite: CSC 344 or MIS 320.
Prerequisite Courses: Prerequisite: CIT 225.
Course Repeatability: Course may not be repeated.

CYBR 324 - Network Security

Study of the concepts used when defending a network and exploration of the basic tools and techniques that can be employed to protect a network and communication assets from cyber threats. Study of the knowledge required to administer and maintain a comprehensive enterprise security infrastructure. Introduction to common security architectures for the protection of information systems and data.

Credit Hours: 3

Prerequisite Courses: MIS 320 or MIS 323 or CSC 344
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 343 - Systems Security

Application of security concepts to ensure the confidentiality, integrity, and availability of the computer operating system. Operating systems/security concepts are applied in the context of operating system hardening.

Credit Hours: 3

Prerequisite Courses: (MIS 352 and CIT 225) or (CSC 242 and CYBR 201)
Course Repeatability: Course may not be repeated.

CYBR 365 - Ethical Hacking

Introduction to organizational security posture improvement through penetration testing and ethical hacking. Study of ways to exploit vulnerabilities to gain access to a system. Exploration of common security architectures for the protection of information systems and data.

Credit Hours: 3

Prerequisite Courses: CIT 225 and MIS 352

Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 to 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50, GPA in CYBR courses of at least 2.80, and consent of

instructor, program coordinator, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CYBR 495 - Seminar in Cybersecurity

Individual reports and group discussions of field, laboratory and/or library research on selected topics in cybersecurity. May only be taken once for credit in the major.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction For cybersecurity majors only.

CYBR 498 - Internship in Cybersecurity

Academic training and practical experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site

activity. Written experience report and oral presentation required.

Credit Hours: 3

Additional Restrictions/Requirements: Open to students of junior or senior standing who have been approved by the faculty supervisor, department chair, and dean.
Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 499 - Honors in Cybersecurity

Individual study for honors students.

Credit Hours: 3

Additional Restrictions/Requirements: Instructor approval for honors students only.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

Applied Cybersecurity Concentration (21 Credit Hours)

Required courses:

CYBR 340 - Cybersecurity Program Management

Explores methods used to raise general security awareness. Reviews current industry practices, contingency planning, and systems specific plans (e.g., change management). Examines the roles involved in planning and managing security. Students develop necessary skills to adapt policies to achieve

confidentiality, integrity, and availability of organizational assets and data.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 437 - Supply Chain Cybersecurity

Explores security issues associated with building complex systems out of third-party components; the authorities and processes for the approval of their operation; how security principles can be applied to

improve security throughout the system or product lifecycle; and the basics of industrial control systems and vulnerabilities they are likely to have.

Credit Hours: 3

Prerequisite Courses: CYBR 202 and CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 440 - Cyber Risk

Introduction to risk assessment models, methodologies, and processes. Examination of how cybersecurity risks are part of an organizations' overall risk. Study of the techniques and guidelines used to perform a

cybersecurity risk assessment of a system, process, or organization and appropriate mitigations.

Prerequisite Courses: CYBR 245 and CYBR 322 and (MIS 320 or CSC 344)
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

Elective Group 1 (Choose 6 Credit Hours)

Courses can only count as Elective Group 1 or 2, not both.

CYBR 431 - Cloud Security

Introduction to cloud security architecture and exploration of the guiding security design principles,

design patterns, industry standards, and associated technologies. Study of regulatory compliance requirements critical to the design, implementation, delivery, and management of secure cloud-based services.

Credit Hours: 3

Prerequisite Courses: CIT 301.
Course Repeatability: Course may not be repeated.

CYBR 435 - Cyber Fraud and Investigation

Investigation of cyber fraud, and the study of plans and processes for a holistic approach to preventing and mitigating fraud throughout the system lifecycle. Specific attention paid to financial fraud and the application of forensics techniques to respond to and investigate financial incidents.

Credit Hours: 3

Prerequisite Courses: ACG 201, FIN 335, CYBR 202, and (STT 215 or BAN 280).
Course Repeatability: Course may not be repeated.

CYBR 445 - Certified Information Systems Security Professional

Study of Certified Information Systems Security Professional (CISSP) domains.

Credit Hours: 3

Prerequisite Courses: CYBR 322 and CYBR 324
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity or Cameron School of Business Admission

CYBR 446 - Certified Information Systems Auditor

Study of Certified Information Systems Auditor (CISA) domains.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 340
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information

Technology**Minor Restriction** Cybersecurity or Cameron School of Business Admission

MIS 310 - Web Development Languages

Study of the design and creation of web pages that support traditional screens, tablets, and smart devices. Topics include page structure, human-computer interface design, style sheets, reusability, and design concepts. Best industry practices in web development, such as client-side scripting languages and Search Engine Optimization (SEO) techniques, will also be considered.

Credit Hours: 3

Prerequisite or Corequisite Courses: or (CSC 112 or CSC 131 or MIS 216)
Prerequisite Courses: CIT 110 or MIS 213
Additional Restrictions/Requirements:

One prerequisite or corequisite course is required: Choose CIT 110 or MIS 213 as a prerequisite course or one of CSC 112, CSC 131, or MIS 216 as a pre- or corequisite course.

Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Computer Science or declared BA Digital Arts or declared Cybersecurity minor or declared Digital Arts minor.
Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Computer Science or BA Digital Arts**Minor Restriction** Cybersecurity Minor or Digital Arts Minor

MIS 327 - Data Center Management

This course introduces fundamentals of storage, networking, and computing infrastructure in a modern data center environment; terminology and basic concepts relating to storage, networking, and computing technologies. Data Center architecture and enabling concepts such as virtualization, pooling, provisioning, monitoring, scaling, business continuity, backup, replication, cloud computing, security, flexibility, management, and cost considerations are

covered.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity

MIS 363 - Advanced Telecommunications

The architecture, components, operations, and security of routers and switches in small networks, introduction to wireless local area networks (WLAN) and to scale for large, complex networks, including wide area network (WAN) technologies are described. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application

programming interfaces (API) and configuration management tools enable network automation.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor

MIS 419 - Information Technology Project Management

This course introduces the fundamentals of project management, beginning with project definition through the post-project review. There will be emphasis placed on applying project management concepts and techniques to information system projects. This includes consideration of project planning, scheduling,

budgeting, human resources and the consideration of change management required to implement projects.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 411.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration and students majoring in Information Technology B.S.
Course Repeatability: Course may not be repeated.

CIT 410 - Web Application Development

Structured approach to building and maintaining dynamic and interactive Web sites. Emphasis on application, design and development. Students gain a thorough understanding of server-side scripting, form validation, and Web-site security while advancing their understanding of database design principles and SQL. Students create a database-driven Website.

Credit Hours: 3

Prerequisite Courses: MIS 310 or CSC 365.
Course Repeatability: Course may not be repeated.

Elective Group 2 (Choose 6 Credit Hours)

CSC 351 - Applied Software Security

Introduction to the development of secure software applications. Consideration of software vulnerability analysis, secure programming best practices, overflows, input sanitization, password security, command injection, database development, and web application development and vulnerabilities. Design, analysis, and implementation of a secure web application.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a grade of C or better, or CYBR 251 with a grade of C or better, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 464 - Advanced Cryptography and Cryptanalysis

Examination of advanced constructs in modern cryptography, including Diffie-Hellman key exchange, Merkle trees, ElGamal encryption, and fully homomorphic encryption. Introduction to cryptanalysis techniques for analyzing and decoding ciphers.

Credit Hours: 3

Prerequisite Courses: CSC 364
Course Repeatability: Course may not be repeated.

CSC 466 - Malware Analysis

Fundamentals of basic malware analysis through static and behavioral analysis of malicious software. Coverage of the compilation process that takes human readable code to compiled machine readable code and to numerous tools used for malware analysis.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or higher or CSC 231 with a C or higher) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 468 - Reverse Engineering

Coverage of the binary analysis skills necessary to discover the true nature of any executable binary. Examination of the high-level language constructs, including branching statements, looping functions and network socket code, critical to performing a thorough and professional reverse engineering analysis of a binary file.

Credit Hours: 3

Prerequisite Courses: CYBR 251 with a C or better or (CSC 231 with a C or better and CSC 242) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 470 - Hardware Security

Overview of computer hardware security. Topics include side channel attacks, physical unclonable functions, TRNG, supply chain management, hardware Trojans, the power grid, and smart cities.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or better

or CSC 242) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

CYBR 340 - Cybersecurity Program Management

Explores methods used to raise general security awareness. Reviews current industry practices, contingency planning, and systems specific plans (e.g., change management). Examines the roles involved in planning and managing security. Students develop necessary skills to adapt policies to achieve confidentiality, integrity, and availability of organizational assets and data.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor

Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 354 - Computer and Mobile Forensics

Introduction to the concepts in computer and forensics investigations. Recovery and analysis of digital evidence using industry best practices and standard commercial and open source tools. Development of comprehensive investigative forensic reports. Coverage of the legal and ethical considerations of computer crime investigations.

Credit Hours: 3

Prerequisite Courses: CYBR 343 and CSC 344 or MIS 320
Course Repeatability: Course may not be repeated.

CYBR 424 - Security Tools Engineering

Design and implementation of software solutions to achieve security goals using data captured on

computer systems and networks. Topics include: advanced network forensics, network defense tools and principles, and advanced intrusion detection and prevention implementations.

Credit Hours: 3

Prerequisite Courses: (CSC 231 with a C or better or CYBR 251 with a C or better) and (CSC 344 or MIS 320)
Crosslisting: CSC 424.
Course Repeatability: Course may not be repeated.

CYBR 432 - SOC Operations

Introduction to security operations centers (SOC). Study of processes used for operations such as incident response, vulnerability assessment, and threat investigation. Introduction to software tools to manage SOC activities such as security information and event management (SIEM) systems, vulnerability scanners, intrusion detection systems (IDS), and intrusion prevention systems (IPS).

Prerequisite Courses: CYBR 202, CYBR

365 and CYBR 366
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

CYBR 437 - Supply Chain Cybersecurity

Explores security issues associated with building complex systems out of third-party components; the authorities and processes for the approval of their operation; how security principles can be applied to improve security throughout the system or product lifecycle; and the basics of industrial control systems and vulnerabilities they are likely to have.

Credit Hours: 3

Prerequisite Courses: CYBR 202 and CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology

or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 440 - Cyber Risk

Introduction to risk assessment models, methodologies, and processes. Examination of how cybersecurity risks are part of an organizations' overall risk. Study of the techniques and guidelines used to perform a cybersecurity risk assessment of a system, process, or organization and appropriate mitigations.

Prerequisite Courses: CYBR 245 and CYBR 322 and (MIS 320 or CSC 344)
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared

Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 442 - Cyber Politics

Introduction to key aspects of cyberspace's emergence as the fifth domain of strategic warfare, the center of human communication, and an integral part of social governance. Study of cyber politics as an area related to political philosophy, international economics, and realpolitik in diplomacy and warfare.

Credit Hours: 3

Prerequisite Courses: CYBR 202.
Course Repeatability: Course may not be repeated.

CYBR 444 - Cyber Law and Cases

Introduction to the U.S state laws, federal laws, and regulatory policies, as well as international laws that regulate cyberspace activities. Coverage of cyberspace

and the legal/policy background that individuals, businesses, and governments must understand to conduct cyber actions within the limits of legal authority.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 462 - Artificial Intelligence for Cybersecurity

Study of Artificial Intelligence (AI) and Machine Learning (ML) to solve cybersecurity problems. Coverage of fundamental and advanced knowledge in

applying AI and ML techniques to real-world datasets to learn about Cyber Threat Intelligence (CTI), malware analysis, and classification, etc.

Credit Hours: 3

Prerequisite Courses: CSC 358 or CYBR 358, and CSC 302.
Crosslisting: CSC 462.
Course Repeatability: Course may not be repeated.

Cyber Operations Concentration (21 Credit Hours)

Required courses:

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT

160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CYBR 251 - Secure Programming Foundations

Exploration of programming and machine constructs behind code vulnerabilities and best practices for developing secure programs. Introduction to low-level code mechanics in C and assembly language frequently leveraged in code exploitation. Study of programming principles that guard against software vulnerabilities, including pointers, hardware control, overflows, input sanitization, data obfuscation, secure design, and static analysis.

Credit Hours: 3

Prerequisite Courses: CSC 131.
Course Repeatability: Course may not be repeated.

CYBR 358 - Cyber Operations

Introduction to cyber operations concepts, with specific focus on the computing aspects. Topics include: Basics

of cyber operations including a cyber operations procedures, applicable laws, and information assurance, and information assurance architectures.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 343
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Elective Group 1 (Choose 6 Credit Hours)

Courses can only count as Elective Group 1 or 2, not both.

CYBR 345 - Blockchain and Decentralized Security

Introduction of principles, applications, and implementation of blockchain technologies, smart contracts, and other secure decentralized systems. Explorations of the cryptographic principles underlying decentralized systems and create applications leveraging these technologies.

Credit Hours: 3

Prerequisite Courses: CSC 364 or CYBR 245
Course Repeatability: Course may not be repeated.

CYBR 354 - Computer and Mobile Forensics

Introduction to the concepts in computer and forensics investigations. Recovery and analysis of digital evidence using industry best practices and standard commercial and open source tools. Development of comprehensive investigative forensic reports. Coverage of the legal and ethical considerations of computer crime investigations.

Credit Hours: 3

Prerequisite Courses: CYBR 343 and CSC 344 or MIS 320
Course Repeatability: Course may not be repeated.

CYBR 363 - Artificial Intelligence for Cybersecurity

Introduction to fundamental knowledge in applying AI and ML techniques to real-world datasets. Students are

introduces to supervised and unsupervised learning models, applications to internet traffic and anomaly detection, and ethics, fairness, and bias in data-drive cybersecurity.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a C or better or CYBR 251 with a C or better and STT 215 or BAN 280
Course Repeatability: Course may not be repeated.

CYBR 424 - Security Tools Engineering

Design and implementation of software solutions to achieve security goals using data captured on computer systems and networks. Topics include: advanced network forensics, network defense tools and principles, and advanced intrusion detection and prevention implementations.

Credit Hours: 3

Prerequisite Courses: (CSC 231 with a C or better or CYBR 251 with a C or better) and (CSC 344 or MIS 320)

Crosslisting: CSC 424.
Course Repeatability: Course may not be repeated.

CYBR 475 - Topics in Cybersecurity

Topics of current interest in cybersecurity not covered in existing courses. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction Open to cybersecurity majors only.

CSC 351 - Applied Software Security

Introduction to the development of secure software applications. Consideration of software vulnerability analysis, secure programming best practices, overflows, input sanitization, password security, command injection, database development, and web application development and vulnerabilities. Design, analysis, and implementation of a secure web application.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a grade of C or better, or CYBR 251 with a grade of C or better, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 364 - Introduction to Cryptography

Formalizing security, hash functions, symmetric and public-key encryptions are some of the main topics of this course. Early ciphers like the Caesar shift and the Vigenère cipher and modern techniques like RSA, Diffie-Hellman protocol and their theoretical foundations, practical applications and the vulnerabilities of each encryption system will be discussed.

Credit Hours: 3

Prerequisite Courses: CSC 133 and CSC 231 with a grade of C or higher or CYBR 251 with a grade of C or higher.
Course Repeatability: Course may not be repeated.

CSC 427 - Quantum Cryptography

Explores the use of quantum effects, such as quantum entanglement and uncertainty, to implement cryptographic tasks with levels of security that are impossible to achieve classically.
Quantum cryptography is an alternative approach in which cryptographic schemes that are resistant to quantum adversaries are proposed.

Credit Hours: 3

Prerequisite Courses: CSC 364.
Course Repeatability: Course may not be repeated.

CSC 464 - Advanced Cryptography and Cryptanalysis

Examination of advanced constructs in modern cryptography, including Diffie-Hellman key exchange, Merkle trees, ElGamal encryption, and fully homomorphic encryption. Introduction to cryptanalysis techniques for analyzing and decoding ciphers.

Credit Hours: 3

Prerequisite Courses: CSC 364
Course Repeatability: Course may not be repeated.

CSC 466 - Malware Analysis

Fundamentals of basic malware analysis through static and behavioral analysis of malicious software. Coverage of the compilation process that takes human readable code to compiled machine readable code and to numerous tools used for malware analysis.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or higher or CSC 231 with a C or higher) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 468 - Reverse Engineering

Coverage of the binary analysis skills necessary to discover the true nature of any executable binary. Examination of the high-level language constructs, including branching statements, looping functions and network socket code, critical to performing a thorough and professional reverse engineering analysis of a

binary file.

Credit Hours: 3

Prerequisite Courses: CYBR 251 with a C or better or (CSC 231 with a C or better and CSC 242) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 470 - Hardware Security

Overview of computer hardware security. Topics include side channel attacks, physical unclonable functions, TRNG, supply chain management, hardware Trojans, the power grid, and smart cities.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or better or CSC 242) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

Elective Group 2 (Choose 6 Credit Hours)

Courses can only count as Elective Group 1 or 2, not both.

CYBR 325 - Secure Database Management

Introduction to database security theories and applications. Consideration of threats in database systems and applications of security concepts. Topics include data integrity and authentication, and information storage security.

Credit Hours: 3

Prerequisite Courses: CIT 110, MIS 213, or CYBR 201.
Course Repeatability: Course may not be repeated.

CYBR 340 - Cybersecurity Program Management

Explores methods used to raise general security awareness. Reviews current industry practices, contingency planning, and systems specific plans (e.g., change management). Examines the roles involved in planning and managing security. Students develop necessary skills to adapt policies to achieve confidentiality, integrity, and availability of organizational assets and data.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 345 - Blockchain and Decentralized Security

Introduction of principles, applications, and implementation of blockchain technologies, smart contracts, and other secure decentralized systems. Explorations of the cryptographic principles underlying decentralized systems and create applications leveraging these technologies.

Credit Hours: 3

Prerequisite Courses: CSC 364 or CYBR 245
Course Repeatability: Course may not be repeated.

CYBR 354 - Computer and Mobile Forensics

Introduction to the concepts in computer and forensics investigations. Recovery and analysis of digital evidence using industry best practices and standard commercial and open source tools. Development of comprehensive investigative forensic reports. Coverage of the legal and ethical considerations of computer crime investigations.

Credit Hours: 3

Prerequisite Courses: CYBR 343 and CSC 344 or MIS 320
Course Repeatability: Course may not be repeated.

CYBR 362 - Information Assurance Policy

Exploration of Information Assurance (IA) policies and frameworks from the organizational mechanics of developing policies to the psychology of

implementation. Review of various information security and assurance concepts in clear, simple terms such as governance, regular mandates, business drivers, legal considerations and more while effectively balancing technical knowledge and soft skills.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity and BS Information Technology**Minor Restriction** Cybersecurity

CYBR 363 - Artificial Intelligence for Cybersecurity

Introduction to fundamental knowledge in applying AI and ML techniques to real-world datasets. Students are introduces to supervised and unsupervised learning models, applications to internet traffic and anomaly

detection, and ethics, fairness, and bias in data-drive cybersecurity.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a C or better or CYBR 251 with a C or better and STT 215 or BAN 280
Course Repeatability: Course may not be repeated.

CYBR 364 - Web Applications Security

Introduction to web application security principles focusing on identifying and mitigating top ten vulnerabilities through common application testing methodologies. Exploration of various web application architectures and backend & frontend technologies. Hands-on application of security testing tools and techniques to assess and enhance the security posture of web applications throughout their development life cycle.

Credit Hours: 3

Prerequisite Courses: CSC 131 or MIS 316
Additional Restrictions/Requirements: Admission to

Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

CYBR 366 - Digital Forensics

Introduction to digital forensics and evidence-handling techniques for different types of information technologies and forms of data. Exploration of the basic principles of digital forensics. Introduction to the legal requirements for collecting, seizing, and protecting digital evidence. Application of digital forensics techniques throughout an investigation life cycle.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 324
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared

Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 368 - CCNA Security

Exploration of network protocols, services, and infrastructures. Exploration of detection and analysis of cybersecurity threats using common open-source tools. Monitoring of a security policy. Review of security controls. Exploration of essential tasks to secure a network. Review of methods for malicious access prevention to computer networks, hosts, and data.

Credit Hours: 3

Prerequisite Courses: MIS 320 or CSC 344
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.

Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

CYBR 424 - Security Tools Engineering

Design and implementation of software solutions to achieve security goals using data captured on computer systems and networks. Topics include: advanced network forensics, network defense tools and principles, and advanced intrusion detection and prevention implementations.

Credit Hours: 3

Prerequisite Courses: (CSC 231 with a C or better or CYBR 251 with a C or better) and (CSC 344 or MIS 320)
Crosslisting: CSC 424.
Course Repeatability: Course may not be repeated.

CYBR 431 - Cloud Security

Introduction to cloud security architecture and exploration of the guiding security design principles, design patterns, industry standards, and associated technologies. Study of regulatory compliance

requirements critical to the design, implementation, delivery, and management of secure cloud-based services.

Credit Hours: 3

Prerequisite Courses: CIT 301.
Course Repeatability: Course may not be repeated.

CYBR 432 - SOC Operations

Introduction to security operations centers (SOC). Study of processes used for operations such as incident response, vulnerability assessment, and threat investigation. Introduction to software tools to manage SOC activities such as security information and event management (SIEM) systems, vulnerability scanners, intrusion detection systems (IDS), and intrusion prevention systems (IPS).

Prerequisite Courses: CYBR 202, CYBR 365 and CYBR 366
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or

declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

CYBR 435 - Cyber Fraud and Investigation

Investigation of cyber fraud, and the study of plans and processes for a holistic approach to preventing and mitigating fraud throughout the system lifecycle. Specific attention paid to financial fraud and the application of forensics techniques to respond to and investigate financial incidents.

Credit Hours: 3

Prerequisite Courses: ACG 201, FIN 335, CYBR 202, and (STT 215 or BAN 280).
Course Repeatability: Course may not be repeated.

CYBR 437 - Supply Chain Cybersecurity

Explores security issues associated with building complex systems out of third-party components; the authorities and processes for the approval of their operation; how security principles can be applied to

improve security throughout the system or product lifecycle; and the basics of industrial control systems and vulnerabilities they are likely to have.

Credit Hours: 3

Prerequisite Courses: CYBR 202 and CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 440 - Cyber Risk

Introduction to risk assessment models, methodologies, and processes. Examination of how cybersecurity risks are part of an organizations' overall risk. Study of the techniques and guidelines used to perform a

cybersecurity risk assessment of a system, process, or organization and appropriate mitigations.

Prerequisite Courses: CYBR 245 and CYBR 322 and (MIS 320 or CSC 344)
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 442 - Cyber Politics

Introduction to key aspects of cyberspace's emergence as the fifth domain of strategic warfare, the center of human communication, and an integral part of social governance. Study of cyber politics as an area related to political philosophy, international economics, and realpolitik in diplomacy and warfare.

Credit Hours: 3

Prerequisite Courses: CYBR 202.
Course Repeatability: Course may not be repeated.

CYBR 444 - Cyber Law and Cases

Introduction to the U.S state laws, federal laws, and regulatory policies, as well as international laws that regulate cyberspace activities. Coverage of cyberspace and the legal/policy background that individuals, businesses, and governments must understand to conduct cyber actions within the limits of legal authority.

Credit Hours: 3

Prerequisite Courses: CYBR 322
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.

Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 445 - Certified Information Systems Security Professional

Study of Certified Information Systems Security Professional (CISSP) domains.

Credit Hours: 3

Prerequisite Courses: CYBR 322 and CYBR 324
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity or Cameron School of Business Admission

CYBR 446 - Certified Information Systems Auditor

Study of Certified Information Systems Auditor (CISA) domains.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 340
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity or Cameron School of Business Admission

CYBR 475 - Topics in Cybersecurity

Topics of current interest in cybersecurity not covered in existing courses. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction Open to cybersecurity majors only.

CSC 351 - Applied Software Security

Introduction to the development of secure software applications. Consideration of software vulnerability analysis, secure programming best practices, overflows, input sanitization, password security, command injection, database development, and web

application development and vulnerabilities. Design, analysis, and implementation of a secure web application.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a grade of C or better, or CYBR 251 with a grade of C or better, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 364 - Introduction to Cryptography

Formalizing security, hash functions, symmetric and public-key encryptions are some of the main topics of this course. Early ciphers like the Caesar shift and the Vigenère cipher and modern techniques like RSA, Diffie-Hellman protocol and their theoretical foundations, practical applications and the vulnerabilities of each encryption system will be discussed.

Credit Hours: 3

Prerequisite Courses: CSC 133 and CSC 231 with a

grade of C or higher or CYBR 251 with a grade of C or higher.
Course Repeatability: Course may not be repeated.

CSC 427 - Quantum Cryptography

Explores the use of quantum effects, such as quantum entanglement and uncertainty, to implement cryptographic tasks with levels of security that are impossible to achieve classically.
Quantum cryptography is an alternative approach in which cryptographic schemes that are resistant to quantum adversaries are proposed.

Credit Hours: 3

Prerequisite Courses: CSC 364.
Course Repeatability: Course may not be repeated.

CSC 464 - Advanced Cryptography and Cryptanalysis

Examination of advanced constructs in modern cryptography, including Diffie-Hellman key exchange, Merkle trees, ElGamal encryption, and fully homomorphic encryption. Introduction to cryptanalysis

techniques for analyzing and decoding ciphers.

Credit Hours: 3

Prerequisite Courses: CSC 364
Course Repeatability: Course may not be repeated.

CSC 466 - Malware Analysis

Fundamentals of basic malware analysis through static and behavioral analysis of malicious software. Coverage of the compilation process that takes human readable code to compiled machine readable code and to numerous tools used for malware analysis.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or higher or CSC 231 with a C or higher) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 468 - Reverse Engineering

Coverage of the binary analysis skills necessary to discover the true nature of any executable binary.

Examination of the high-level language constructs, including branching statements, looping functions and network socket code, critical to performing a thorough and professional reverse engineering analysis of a binary file.

Credit Hours: 3

Prerequisite Courses: CYBR 251 with a C or better or (CSC 231 with a C or better and CSC 242) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 470 - Hardware Security

Overview of computer hardware security. Topics include side channel attacks, physical unclonable functions, TRNG, supply chain management, hardware Trojans, the power grid, and smart cities.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or better or CSC 242) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

MIS 363 - Advanced Telecommunications

The architecture, components, operations, and security of routers and switches in small networks, introduction to wireless local area networks (WLAN) and to scale for large, complex networks, including wide area network (WAN) technologies are described. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor

Total Credit Hours: 64

Digital Arts, B.A.

The B.A. in Digital Arts is an interdisciplinary major combining courses from the Departments of Art and Art History and Computer Science. The program develops students' technical, aesthetic, design, programming, analytical, and problem-solving skills. It prepares them to work in computer-art and design-related fields such as mobile-application and web design, game development, 3D modeling and animation, visual effects, interactive media, and other emerging opportunities at the cross-section of computer technology and the arts. The curriculum also provides a foundation needed to pursue research at the graduate level in areas such as graphics, virtual reality, simulation, and human-computer interaction.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. Degree in Digital Arts, a student must successfully complete an oral defense of their final project for ART 496 or any other approved oral intensive course.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Digital Arts, a student must successfully complete ART 496.

Requirements for a Major in Digital Arts for the B.A. Degree:

Core Art Courses (18 credit hours)

ART 101 - Two-Dimensional Design

Study of the principles of two-dimensional design and introduction to color theory.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 111 - Drawing Fundamentals

Fundamentals of drawing; investigation of processes and visual concepts with emphasis on charcoal.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 211 - Beginning Life Drawing

Drawing from the model: structure, geometric form, and composition using various media: pencil, charcoal, India ink, etc.

Credit Hours: 3

Prerequisite Courses: ART 111
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 260 - Introduction To Graphic Design

Basic principles of graphic design and communication. Projects focus on the graphic expression of form through two-dimensional composition to communicate information, concepts, and emotions, and combine development of computer software skills with off-line creative processes and production methods.

Credit Hours: 3

Prerequisite Courses: ART 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 282 - Introduction to Digital Photography

Introduction to digital photography concepts and methods. Considers the design, processing, critiquing, and display of images created with digital cameras and printed with digital media.

Credit Hours: 3

Prerequisite Courses: ART 101 or ART 105 or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 496 - Digital Arts Capstone

Final portfolio project integrating the principles, skills, and techniques explored in the digital arts major. Research project is determined by the student and developed in ongoing consultation with peers and digital arts faculty. Course culminates with a

presentation of the project on the UNCW campus and project documentation.

Credit Hours: 3

Prerequisite Courses: ART 211, CSC 331 with a minimum grade of "C", and CSC 368
Additional Restrictions/Requirements: Senior standing.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Core Art History Courses (9 credit hours)

Choose two courses from the following list:

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

or

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

or

ARH 204 - Art of the Modern World

Examination of major monuments, artists, and artistic developments from the 19th to the late 20th century, primarily in Europe and the Americas. Study of the relationship between works of art and the historical, political, religious, and philosophical context of the societies that produced and made use of them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

and

Choose one 3-credit ARH course at the 300-400 level.

Core Computer Science Courses (26 credit hours)

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for

computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and

Statistics
Course Repeatability: Course may not be repeated.

CSC 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3-D computer graphics using high-level software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and shading, alternative rendering techniques, and providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CSC 112 or CSC 131. Prerequisite or corequisite: ART 260 or ART 282.
Crosslisting: ART 220, FST 220
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms.

Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which

CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

CSC 365 - Client-Side Web Development

Development of applications for the World Wide Web focusing on client-side languages. Introduction to current principles, standards, and best practices in website design, usability, accessibility, and management through project-based skills. Development in standards-compliant markup, styling, and scripting, including web services programming.

Credit Hours: 3

Prerequisite Courses: CSC 231 or permission of instructor.
Course Repeatability: Course may not be repeated.

CSC 368 - Visual Design for Multi-Media

Combined studio/lecture course that examines technologies and basic principles of the Internet specific to visual interface design and interactivity. Topics covered include technical, functional, and aesthetic issues related to basic graphic design and

page design principles; site planning and implementation; graphic production using software and designing for user experience.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of "C" and ART/CSC/FST 220
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 370 - Computer Graphics

Introduction to geometric modeling for graphic programming. Topics include transformations for modeling, viewing, and projection; geometric modeling of curves and surfaces; hidden-surface removal; clipping; graphical buffers; material simulation; texture mapping; and lighting.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum

grade of C and MAT 162
Course Repeatability: Course may not be repeated.

Core Math Courses (8 credit hours)

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration;

infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Electives (9 credit hours)

Choose 3 classes from the following list of approved electives.

ART 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color and lighting.

Credit Hours: 3

Prerequisite Courses: ART 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CSC 320, FST 320
Course Repeatability: Course may not be repeated.

ART 273 - Digital Illustration

Introduction to the practice and theory of digital art & illustration. Exploration of the core concepts and techniques in digital image making, photo manipulation, and content production using industry-standard software applications.

Credit Hours: 3

Prerequisite Courses: ART 101 and ART 111.
Course Repeatability: Course may not be repeated.

ART 311 - Intermediate Life Drawing

Drawing from the model: structure, composition, and development of personal expression.

Credit Hours: 3

Prerequisite Courses: ART 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 360 - Intermediate Graphic Design

Further investigation into graphic design creative processes and study of graphic communication through lectures, projects, and readings. Continuing development of software proficiency, critical and analytical skills. Emphasis on both practical and speculative approaches to design problems and their synthesis into formal solutions.

Credit Hours: 3

Prerequisite Courses: ART 260
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 370 - 3D Printing and Laser Cutting

Exploration of 3D printing and laser cutting for art and design. Study of digital art culture including contemporary artistic, political, and ethical issues in the field.

Credit Hours: 3

Prerequisite Courses: ART 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 371 - Video Art & Projection Mapping

An exploration of time-based media, video art and projected light, with instruction on the history and use of analog and digital methods, including a variety of video projection mapping software to create immersive environments or to add moving textures and images to sculpture, installation, performance, and architecture.

Credit Hours: 3

Prerequisite Courses: ART 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

CSC 315 - Mobile Application Development

Concepts and technologies for developing applications on mobile devices, including mobile-platform programming, memory-management, object-oriented paradigms, model-view-controller design, mobile-centric frameworks for networking, multimedia, location-based services, and interface design. Application design, programming, and implementation for a current mobile platform.

Prerequisite Courses: CSC 331 with a minimum grade of "C".
Course Repeatability: Course may not be repeated.

CSC 421 - Game Development

Design and implementation of computer games, including design, modeling, and animation of meshes for game characters and environments using 3D software, scene and object representation, graphics pipeline, collision detection, picking, graphics optimization, basic physics and Artificial Intelligence for games, and code modifications and additions for a game engine.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 320 or CSC 370.
Prerequisite Courses: CSC 220 and (CSC 331 with a minimum grade of C).
Course Repeatability: Course may not be repeated.

CSC 430 - Digital Visual Effects

Exploration of digital image and video representation and manipulation for motion-picture visual effects. Topics include image storage and compression, film and video formats, compositing, filtering, scripting for graphics and visual effects, photorealistic lighting and rendering, virtual cinematography, camera tracking, and particle effects.

Credit Hours: 3

Prerequisite Courses: (CSC 370 or ART 320 or FST 320), or CSC 370.
Crosslisting: FST 430
Course Repeatability: Course may not be repeated.

CSC 461 - Virtual Reality

Study of the fundamentals of virtual reality (VR) and virtual environment technology (VET). Topics include human perception and cognition; scientific research, training, and industry; building good user experiences; and other topics. Students are required to develop a VR-based application as a final project and paper.

Credit Hours: 3

Prerequisite Courses: CSC 331 with a grade of "C" or better.
Course Repeatability: Course may not be repeated.

Total: 70 credit hours

Additional Information

A grade point average of 'C' (2.0) or better computed over all the courses used to fill the requirements of the major are required.

Economics, B.A.

While the B.S. degree in business administration with a concentration in economics requires the completion of core classes in many business disciplines, the B.A. degree in economics is, in essence, a liberal arts

program that focuses on economics. Because of the relatively small number of required hours in the B.A. major, students are provided the flexibility to pursue a second major, a minor, or classes that will prepare them for employment opportunities or graduate work. The B.A. is especially recommended for students who desire to pursue graduate work in economics, public policy, and law.

Requirements for Admission

Students who apply for and are admitted into the Cameron School of Business are initially classified as Pre-Business or Pre-Economics majors. To declare Pre-Business or Pre-Economics, students must have earned a minimum overall grade point average of 2.50 and completed MAT 150 Basic Precalculus, or MAT 160 Precalculus: Algebra & Trigonometry, or earned sufficient placement score for MAT 151 Basic Calculus with Applications I or MAT 161 Calculus with Analytical Geometry.

To be formally admitted to the Bachelor of Arts in Economics program in the Cameron School of Business, a student must meet each of the following admission requirements:

1. Completion of a minimum of 12 credit hours at UNCW.
2. Completion of at least 30 credit hours.
3. Completion of each of the following courses with at least a "C-": MAT 151 or MAT 161; BAN 280 or STT 215; ECN 221 and ECN 222.
4. An overall grade point average of a least 2.70 on a 4.00 scale for all course work attempted at UNCW.
5. Completion of the Cameron School of Business admission application.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Economics, a student must successfully complete COM 101 or ECN 432.

Requirements for a B.A. Degree in Economics:

Students may qualify for the B.A. degree by:

1. Successful completion of requirements as stated under University Regulations of this catalogue;
2. Attaining a minimum grade point average of 2.00 on all courses attempted in the Cameron School of Business;

3. Successful completion of the courses designated for the degree program (At least 50 percent of the business credit hours required for the degree program must be taken at UNCW):
   a. Completion of a University Studies Program as defined in this catalogue
   b. Cameron School of Business Economics Core Requirements (39 semester hours)
   c. Elective Courses: completion of elective courses sufficient to complete a minimum of 120 semester hours of course credit. Electives are to be chosen by the student after consulting with the faculty advisor.
4. Students seeking the B.A. degree in Economics must earn a minimum grade point average of 2.00 in all business and economics courses attempted in the Cameron School of Business. No grade below a "C-" in the major will be accepted towards graduation.
5. Admission to the Cameron School of Business is required for enrollment in 300- and 400-level business courses with the following exceptions: ECN 324; ECN 325; ECN 327; ECN 330.

Economics Core courses must include:

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 321 - Intermediate Microeconomics

A theoretical analysis of individual consumer and firm behavior and general equilibrium.

Credit Hours: 3

Prerequisite Courses: (MAT 151 or MAT 161) and ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 322 - Intermediate Macroeconomics

A theoretical analysis of the determination of aggregate income, aggregate employment, and the average price level and role of monetary and fiscal policy in the macroeconomy.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of 6 semester hours of appropriate mathematics or statistics at the 101 level or higher, with minimum grade of C-.
Course Repeatability: Course may not be repeated.

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

ECN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a domestic and international setting; analysis of international monetary flows; financial decision making in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: FIN 324
Course Repeatability: Course may not be repeated.

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and

incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for

business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 477 - Advanced Econometrics and Research Methods

An introduction to the formalization of economic hypotheses into testable relationships and the application of appropriate statistical techniques. Theoretical aspects are covered, but primary emphasis is on computer application utilizing regression analysis.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (BAN 280 or STT 215) and ECN 377.
Additional Restrictions/Requirements: Prerequisite

courses and either admission to Cameron School of Business or declared minor in Economics.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Plus nine hours of Economics Electives

At least six hours numbered between 300 to 490, and at least three hours numbered between 400 to 490. MAT 335 may be taken as one of these electives.

Total: 39 hours

Additional Information:

Students who wish to pursue graduate studies (economics graduate school, law school, etc.) should consult a faculty advisor early in the major to identify elective courses outside the economics program that will aid them in gaining acceptance to graduate school.

Education of Young Children, B.A.

The Education of Young Children (EYC) program offers a Bachelor of Arts degree leading to Birth through

Kindergarten (B-K) teacher licensure in North Carolina, as well as courses for individuals who wish to add Birth-Kindergarten or Preschool Add-on licensure to an existing degree or license.

Target Audience: The Education of Young Children program is designed for people who will assume leadership roles as teachers, consultants, and directors of early childhood education programs in public and private schools. Program Goals: The goal of the Education of Young Children program at UNCW is to assist in providing an appropriate education of young children (birth through kindergarten) through the preparation of teachers who are well educated and professionally competent.

Upon completion of the undergraduate Education of Young Children program (EYC), the student should be able to:

- Demonstrate understanding of the typical and atypical course of development, including the underlying processes and prominent characteristics, of children from birth through kindergarten.

- Delineate major philosophical, historical, and legal bases and characteristics of the field of early childhood education, including special education.
- Acquire knowledge and skill in creating and adapting learning environments which are developmentally appropriate (including methods for sensorimotor, cognitive, adaptive, language/communication, social, aesthetic, emotional and physical development) for young children with a wide range of learning and maturational needs.
- Demonstrate knowledge of the trends, issues, and research in early intervention and early childhood education.
- Demonstrate the ability to create environments and engage in interactions that are sensitive to diversity (e.g., cultural, linguistic, geographic, ethnic, and socioeconomic), as well as promoting an anti-bias perspective.
- Demonstrate sensitivity and respect for differences in families, view parents as partners in the education process, and establish collaborative relationships with them.

- Establish a pattern of reflective learning and inquiry leading towards confidence, professionalism, and effectiveness in the role of educator of young children.

Degree Requirements for Education of Young Children:

University Studies:

Students should follow university studies requirements of the University of North Carolina Wilmington as outlined in the University Studies section of the catalogue.

The major in education of young children requires 75 hours of interdisciplinary and education courses for Licensure Option or 72 hours of interdisciplinary and education courses for Non-Licensure Option:

Interdisciplinary Core: (16 hours)

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as

issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 204 - Introduction to Early Childhood Education

This introductory course is designed for students who are interested in early childhood education and early intervention as professional careers. It examines the theoretical bases for teaching and early intervention with young children birth through five and their families. Content includes an overview of the historical roots, current issues, program models, and goals of early childhood education as well as an introduction to professional standards and organizations. Particular emphasis is placed on environments and interactions that are responsive to children's developmental, individual, and cultural needs. Field experiences required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia,

with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PSY 220 - Child Psychology

Human psychological development through childhood and early adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 345 - Sociology of the Family

Origin and development of the family as a social institution from an historical and comparative approach; analysis of forms and functions of the family; socialization, mate selection, procreation.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Interdisciplinary Specialty: (47 hours)

EDN 280 - Play and Creative Arts

Study of play behaviors and fine arts curriculum from birth to age five. Designed to prepare students to plan and deliver play-based and developmentally appropriate experiences that foster children's engagement in the cultural and performing arts (drama, dance, vocal and instrumental music, and visual art). Theory and practices for promoting play and developing creativity will be emphasized.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

EDN 302 - Child Observation and Assessment

Designed to develop a broad set of child and family observation skills and ability to conduct and interpret variety of means of child assessment, both formal and informal. Methods of assessment will include systematic observations, use of screening instruments, interview techniques, rating scales, portfolios and anecdotal records. Includes knowledge of assessment with culturally diverse populations and children with special needs. Field experiences required. The lab for this course is EDNL 302.

Credit Hours: 3

Corequisite Courses: EDNL 302
Course Repeatability: Course may not be repeated.

EDNL 302 - Field Experience in Early Childhood Education

Provides students with opportunities for application of concepts through forty-five hours of fieldwork with young children and their families in a variety of community settings including public schools, preschools, childcare centers, and private homes under the supervision of licensed service providers. This course is the lab for EDN 302 and requires 30 hours of field experience.

Credit Hours: 3

Corequisite Courses: EDN 302
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 382 - Literacy Development in the Early Years

Designed to inform students of the theory and research that has influenced the development of principles and strategies for promoting emergent literacy. Developmentally appropriate literacy activities will be explored along with ways to use individualized assessment to gauge children's current abilities and to

use and build upon what children bring to oral language, reading, and writing. The roles of supportive adults, print-rich environments and principles of multicultural learning will be investigated. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite course and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 383 - Mathematics and Science for the Early Years

Designed to acquaint B-K teachers with the curriculum, materials and methods used to teach basic concepts in mathematics and science to young children. Emphasis will be given to developmentally appropriate materials and experiences to promote power of observation and to encourage emergent conceptual abilities and cognitive processing skills. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite course and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 424 - Child Guidance

This course is designed to introduce students to theories, principles and techniques for developmentally appropriate guidance of young children birth through five years. Emphasis is placed on guidance techniques, strategies and appropriate interventions that teachers can use to facilitate young children's autonomy and self-discipline while promoting development of self-concept and prosocial behaviors. The effect of the environment and adult-child interaction on guidance will be examined. Class activities include lectures, small and large group discussions, cooperative learning activities, video illustrations, case analyses, problem solving exercises, and field experience reflections. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

EDN 430 - Preschool Curriculum

Provides students the understandings, skills, and abilities necessary to implement an effective preschool program. Emphasis placed on knowledge of the curriculum content and the effective combinations and correlations of these contents for a preschool program. Activities include lectures, discussions, demonstration, individual, and group projects. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDNL 430 - Field Experience in Kindergarten

Provides students with opportunities for application of concepts through forty-five hours of fieldwork with kindergarten-aged children. Students will be acquainted with a variety of instructional strategies, materials, methods of instruction and technology currently used in kindergarten programs.

Credit Hours: 3

Corequisite Courses: EDN 430.
Prerequisite Courses: EDN 204.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 450 - Infant and Toddler Program Models

Designed to inform students of the goals, philosophies and program characteristics of exemplary programs in very early childhood education (birth to age three). Developmentally appropriate settings and activities for infants and toddlers will be studied, and ways of working with parents will be explored. Optimal caregiving strategies and skills needed for providing a quality program for infants and toddlers will be

emphasized. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 451 - Adaptive Practices in Early Childhood

Designed to develop both planning and intervention skills for working with young children with special needs and their families. Students will plan educational programs, which include use of specific intervention techniques and practices from recognized early intervention programs for children showing a typical development. Attention will be given to adopting strategies to include exceptional children in programs for typically developing young children. Field experiences required.

Credit Hours: 3

Corequisite Courses: EDNL 451.
Prerequisite Courses: EDN 204 or EDN 203 or SED 250.
Additional Restrictions/Requirements: Corequisite course, prerequisite courses and admission to Watson College of Education.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EDNL 451 - Field Experience in Special Education

Provides students with opportunities for application of concepts through thirty hours of fieldwork with young children and their families in a variety of community settings including public schools, preschools, and childcare facilities under the supervision of licensed service providers. This course is the lab for EDN 451 and requires 30 hours of field experience.

Credit Hours: 2

Corequisite Courses: EDN 451.

Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Corequisite course, prerequisite course and admission to Watson College of Education and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 452 - Early Intervention

This course is designed to inform students of the goals, philosophies, and program characteristics of exemplary programs in early childhood education for children with disabilities (birth to age three). Developmentally appropriate settings and activities for infants and toddlers with disabilities will be explored.

Credit Hours: 3

Prerequisite Courses: EDN 204 and SED 250.
Additional Restrictions/Requirements: Prerequisite courses and admission to Watson College of

Education.
Course Repeatability: Course may not be repeated.

EDN 460 - Administration of Preschool Programs

The administration of early childhood education programs will be studied, including planning, scheduling, enrollment, licensure and evaluation of programs operating in various settings. Relevant federal and state legislation, policies and regulations will be examined. Public policy questions in the United States and the implications of policy decisions for program administration will be examined. Possibilities for integrating child and parent education will also be explored. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite course and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

SED 250 - Introduction to Special Education

Survey of major categories of exceptionality including intellectual disabilities, learning disabilities, behavioral and emotional disorders, attention deficits and hyperactivity, communication disorders, sensory impairments, multiple and severe disabilities, physical and health impairments, and giftedness. Includes study of definitions, characteristics, etiology, psycho-social implications, educational interventions, and current issues. At least 6 field experience hours required.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PSY 320 - Psychology of Infancy and Early Childhood

An in-depth examination of development from conception through kindergarten age. Both normal and a typical development are considered from a

biopsychosocial perspective. Methodological and theoretical issues are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 223
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 311 - Child Abuse and Neglect

Study of the knowledge base, laws, and professional roles associated with contemporary child welfare practice. Identification of child maltreatment, reporting procedures and community-based interdisciplinary practice issues are emphasized. Upon acceptance to the NC Child Welfare Education Collaborative, students must complete both SWK 311 and SWK 312 before admission to a DSS field placement.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order

to progress in the program.
Course Repeatability: Course may not be repeated.

Professional Semester, Licensure Option: (12 hours)

EDN 463 - Child, Family, and Teacher Relations

This course is designed to enable students to develop their knowledge of the elements of partnership with families in early childhood settings. The course develops an understanding of traditional and non-traditional families, structural and lifestyle variations and parenting in diverse cultures and at-risk families. Approaches for establishing and sustaining collaboration among professionals, parents, caregivers and community agencies on behalf of children with and without special needs will be explored. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite course and admission to the Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 465 - Student Teaching in Early Childhood Education (B-K)

A full-time practicum experience with young children and their families in an approved early childhood setting. Students will engage in a variety of supervised activities assuming an increasing amount of responsibility for all phases of an educational program for young children and their families. Emphasis is on the teacher intern as a decision maker and reflective practitioner.

Credit Hours: 10

Additional Restrictions/Requirements: Admission to Watson College of Education and completion of all specialty area coursework. A 2.70 GPA on all work at UNCW is required.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability InsuranceAdditional Course Fee Schedule

Professional Semester, Non-Licensure Option: (9 hours)

EDN 463 - Child, Family, and Teacher Relations

This course is designed to enable students to develop their knowledge of the elements of partnership with families in early childhood settings. The course develops an understanding of traditional and non-traditional families, structural and lifestyle variations and parenting in diverse cultures and at-risk families. Approaches for establishing and sustaining collaboration among professionals, parents, caregivers and community agencies on behalf of children with and without special needs will be explored. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite course and admission to the Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 467 - Non-Licensure Practicum

Must receive program approval to enroll. A supervised practicum experience working with children and/or their families in a school or community setting. Designed for students who are completing a degree in education without earning licensure, this practicum promotes integration of the knowledge, skills, and dispositions required to be an effective educator. The practicum placement is selected to be consistent with the student's career goals. Placement and field hours must be approved by the instructor. This course does not fulfill the requirements for North Carolina teacher licensure.

Credit Hours: 6 to 12

Additional Restrictions/Requirements: Admission to Watson College of Education and consent of instructor. Must receive full program approval to enroll. Not guaranteed. Does not result in licensure (licensure test requirement waived for elementary majors).

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning

Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisiors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Elementary Education, B.A.

The elementary program is primarily concerned with preparing initially licensed teachers for K-6 license in the state of North Carolina. The target audience is undergraduate students who wish to meet eligibility requirements for a K-6 elementary teaching license.

The program of study includes a 4 semester sequence of courses in teaching methods and elementary content, and a series of increasingly comprehensive field experience. The culminating capstone is a semester long internship. For licensure it is required to take the required state exam(s) during the program.

Degree Requirements for a B.A. in Elementary Education

University Studies

Students should follow university studies requirements of the University of North Carolina Wilmington as outlined in the Academic Programs and University Studies section of the catalogue. The major in elementary education requires 78 - 81 hours (63 hours of education courses and 15 - 20 hours in an academic concentration) as follows:

Professional Core (18 Credit Hours)

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 240 - Foundational Literacy Skills Instruction

Emphasizes the assessment of and instruction in word recognition and other early and foundational literacy skills, especially those that develop oral language and connect speech to print.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 300 - Elementary School Programs and Practices

Focus on the purposes of the elementary school in today's society and the varied philosophical and theoretical stances used to design programs and select practices that will meet the needs of diverse learners. Ten hours of field experience required.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including

microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Professional Education (31 Credit Hours)

EDN 319 - Meeting Needs of Special Students In Elementary Schools

This course will focus on strategies for meeting needs of individuals in elementary school classrooms. Students will study alternative methods for dealing with pupil differences that have an impact on academic and social behaviors. Characteristics of children with academic, intellectual, social-emotional, physical, cultural and language differences will be examined. Field experiences required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 322 - Foundations of Number and Algebraic Reasoning (K-6)

Focus on the curriculum, materials, and methods appropriate for the teaching of number and algebraic reasoning for the kindergarten through sixth grade level. Field experience required. The lab for this course is EDNL 322.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of 6 semester hours of appropriate mathematics or statistics at the 101 level or higher, with minimum grade of C-.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EDN 325 - Foundations of Geometry, Measurement and Data (K-6)

Focus on the curriculum, materials, and methods appropriate for the teaching of geometry, measurement and data for the kindergarten through sixth grade level. Field experience required.

Credit Hours: 3

Prerequisite Courses: EDN 322
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDNL 322 - Math Laboratory

This course is designed to provide students with supervised tutorial experiences with school-aged children. Focus on observation of students, development of math lesson plans, math instruction for individual students, evaluation of student performance, interacting with parents, and reflecting on instructional performance. This course is the lab for EDN 322.

Credit Hours: 0.5

Corequisite Courses: EDN 322

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 330 - Teaching Diverse Learners (K-6)

Examines a range of aspects of diversity, with a view toward understanding the impact of these forces on teaching and learning. Uses an interdisciplinary approach that draws from academic and community resources and experiences to immerse students in practice and research related to multicultural education and multiple dimensions of diversity.

Credit Hours: 3

Prerequisite Courses: EDN 300 and EDN 301
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDNL 331 - Apprentice Field Experience I

Designed to provide supervised extended experiences in public elementary school classrooms. Students will complete field experience requirements of enrolled

methods courses and will assist with small group instruction and general classroom responsibilities. Field placement will require 4 hours, one day per week for entire semester.

Credit Hours: 1

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDNL 332 - Apprentice Field Experience II

Designed to provide supervised extended experiences in public elementary school classrooms. Students will complete field experience requirements of methods courses and will plan and teach whole group lessons. Field placement will require one full day per week for entire semester.

Credit Hours: 1

Prerequisite Courses: EDNL 331
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDNL 333 - Apprentice Field Experience III

Designed to provide supervised extended experiences in public elementary school classrooms. Students will complete field experience requirements of methods courses and will plan and teach multiple lessons. Field placement will require students to teach for two intensive weeks in school.

Credit Hours: 1

Prerequisite Courses: EDNL 331
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 334 - Social Studies Curriculum and Instruction (K-6)

An overview of the goals of social studies education and how this affects various patterns of organizing curricular content. The implications of learner developmental characteristics for selecting approaches to instruction from history as well as the social and behavioral sciences will be explored. Emphasis on selection and preparation of appropriate materials including the strategies of inquiry, critical thinking, mapping and graphing, simulation, and problem solution. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and 6 hours of social studies content.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 336 - The Teaching of Science (K-6)

Methods of teaching the biological, earth and physical sciences. Applications of the sciences to classroom experimentation and investigation. Examination of contemporary curricula used at the elementary school level. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of two science courses, one of which must have a laboratory component, with minimum grade of C-.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 340 - Applied Literacy Methods

This course emphasizes the instructional application of foundational and advanced literacy skills with a focus on the role of comprehension and research-based tools to support vocabulary acquisition, fluency, and reading for meaning. The lab for this course is EDNL 340.

Credit Hours: 3

Corequisite Courses: EDNL 340
Prerequisite Courses: EDN 240
Course Repeatability: Course may not be repeated.

EDNL 340 - Reading Laboratory

This course is designed to provide students with supervised tutorial experiences with school-aged children. Focus on observation of students, development of literacy lesson plans, literacy instruction for individual students, evaluation of student performance, interacting with parents, and reflecting on instructional performance.

Credit Hours: 0.5

Corequisite Courses: EDN 340
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 348 - Differentiated Literacy Assessment and Instruction

This final course in the literacy course sequence emphasizes the culmination of theory, practice, and assessment of literacy teaching and learning in classrooms, especially methods of differentiation across diverse student populations. A field experience is required.

Credit Hours: 3

Corequisite Courses: EDNL 332 and EDNL 333
Prerequisite Courses: EDN 340
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 414 - Integrating the Arts in the Elementary Curriculum

Designed to provide experiences with visual art, music, drama, and dance that will prepare students to plan and deliver appropriate experiences for elementary students. Attention will be given to understanding the arts in culture, the needs of young children in the arts, the creative process, the skills and concepts of the arts, and connections to other disciplines. Emphasis will be

on integrating arts instruction in other areas of the curriculum. Field experience required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester (14 Credit Hours)

EDN 411 - Student Teaching (K-6; 6-9)

A full-time practicum experience within the area of specialization. Students will engage in a variety of supervised instructional activities, assuming an increasing amount of responsibility for all phases of classroom instruction. Practicum are offered in the areas of elementary education (K-6), middle grades education (6-9), and special education.

Credit Hours: 12

Corequisite Courses: For elementary education majors, EDN 413 and EDN 419 .
Additional Restrictions/Requirements: All courses in

the professional core and specialty areas appropriate for the concentration for K-6, 6-9 majors and a 2.70 GPA on all work attempted at UNCW.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 413 - Classroom Management Seminar (K-6)

This course is designed to assist student interns in establishing and maintaining a positive elementary classroom climate for diverse learners. It will provide a forum for discussion for interns by involving current classroom teachers and making use of field placements experiences. A survey of K-6 management techniques grounded in current teaching practice will be shared.

Credit Hours: 1

Corequisite Courses: EDN 411 and EDN 419
Course Repeatability: Course may not be repeated.

EDN 419 - Seminar in Education (K-6)

Designed as a culmination of professional study and an initiation into student teaching and the teaching profession. Provides opportunities to extend and apply understandings of the roles of the teacher as a decision-maker, particularly in the areas of planning, instruction, management, and evaluation.

Credit Hours: 1

Corequisite Courses: EDN 411
Additional Restrictions/Requirements: Corerequisite course, all courses in the professional core and professional education areas appropriate for the concentration for K-6, and a 2.7 GPA on all work attempted at UNCW.
Course Repeatability: Course may not be repeated.

Professional Semester Non-Licensure (limited to specific situations, see program requirements)

Program has stringent requirements for permission to enroll in non licensure practicum (including, but not limited to, attempt at EDN 411)

EDN 467 - Non-Licensure Practicum

Must receive program approval to enroll. A supervised practicum experience working with children and/or their families in a school or community setting. Designed for students who are completing a degree in education without earning licensure, this practicum promotes integration of the knowledge, skills, and dispositions required to be an effective educator. The practicum placement is selected to be consistent with the student's career goals. Placement and field hours must be approved by the instructor. This course does not fulfill the requirements for North Carolina teacher licensure.

Credit Hours: 6 to 12

Additional Restrictions/Requirements: Admission to Watson College of Education and consent of instructor. Must receive full program approval to enroll. Not guaranteed. Does not result in licensure (licensure test requirement waived for elementary majors).

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning

Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in all education courses, as well as courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point average of 2.70 is required for eligibility for the practicum semester.

Academic Concentration

An academic concentration of 15 semester hours is required. Academic concentrations may be chosen from one of the following ten concentrations: *Early Childhood Education requires 20 hours. *English as a Second Language concentration requires 18 hours.

Behavioral Studies (15 Credit Hours)

Psychology: Minimum of 3 hours

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PSY 270 - Cross-Cultural Psychology

Psychological study of the impact of culture on behavior. Topics including cultural effects on perception, cognition, personality, emotions, development, and mental health will be examined. Emphasis on application of cultural frames of reference to living in a global society.

Credit Hours: 3

Prerequisite Courses: PSY 105
University Studies: Approaches and Perspectives/Living in a Global Society

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 271 - Psychology of Human Diversity

The contribution of psychology to the understanding of diversity in our society. Biopsychosocial aspects of diversity and methods of increasing understanding and inclusiveness will be emphasized. The psychological nature of stereotyping, discrimination, and prejudice will be examined.

Credit Hours: 3

Prerequisite Courses: PSY 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or any PSY 001-499 course for a minimum of 3 hours.

Sociology: Minimum of 3 hours

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 350 - Gender and Society

Focus on gender in social life. Theoretical explanations of gender differentiation, with an emphasis on socialization, stratification, family, work, education, politics, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 380 - Social Classes

Examination of social stratification as the system of distribution of privilege, power and prestige in modern

and traditional societies. Discussion of major theories and theorists of stratification; the structure and process of systems of social inequality; the causes, correlates and consequences of socially structured inequality.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CRM 105 - Introduction to Criminal Justice

Study of criminal law and the criminal justice system in the U.S. Emphasis on structure and function of police, courts and corrections.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SWK 235 - Introduction to Social Work and the Social Welfare System

Social welfare institution and the social work profession in the United States; the values, methods and roles of social workers and the history of the system.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors

Course Repeatability: Course may not be repeated. Or, a minimum of 3 hours from any SOC, CRM, SWK or HEA course numbered 001-499. Three credit hours of Watson College of Education Study Abroad can be substituted for any of the above courses.

*Early Childhood Education (20 Credit Hours)

EDN 302 - Child Observation and Assessment

Designed to develop a broad set of child and family observation skills and ability to conduct and interpret variety of means of child assessment, both formal and informal. Methods of assessment will include systematic observations, use of screening instruments, interview techniques, rating scales, portfolios and anecdotal records. Includes knowledge of assessment with culturally diverse populations and children with special needs. Field experiences required. The lab for this course is EDNL 302.

Credit Hours: 3

Corequisite Courses: EDNL 302
Course Repeatability: Course may not be repeated.

EDNL 302 - Field Experience in Early Childhood Education

Provides students with opportunities for application of concepts through forty-five hours of fieldwork with young children and their families in a variety of community settings including public schools, preschools, childcare centers, and private homes under the supervision of licensed service providers. This course is the lab for EDN 302 and requires 30 hours of field experience.

Credit Hours: 3

Corequisite Courses: EDN 302
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 424 - Child Guidance

This course is designed to introduce students to theories, principles and techniques for developmentally

appropriate guidance of young children birth through five years. Emphasis is placed on guidance techniques, strategies and appropriate interventions that teachers can use to facilitate young children's autonomy and self-discipline while promoting development of self-concept and prosocial behaviors. The effect of the environment and adult-child interaction on guidance will be examined. Class activities include lectures, small and large group discussions, cooperative learning activities, video illustrations, case analyses, problem solving exercises, and field experience reflections. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

EDN 430 - Preschool Curriculum

Provides students the understandings, skills, and abilities necessary to implement an effective preschool program. Emphasis placed on knowledge of the curriculum content and the effective combinations and

correlations of these contents for a preschool program. Activities include lectures, discussions, demonstration, individual, and group projects. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 450 - Infant and Toddler Program Models

Designed to inform students of the goals, philosophies and program characteristics of exemplary programs in very early childhood education (birth to age three). Developmentally appropriate settings and activities for infants and toddlers will be studied, and ways of working with parents will be explored. Optimal caregiving strategies and skills needed for providing a quality program for infants and toddlers will be emphasized. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Prerequisite courses and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 451 - Adaptive Practices in Early Childhood

Designed to develop both planning and intervention skills for working with young children with special needs and their families. Students will plan educational programs, which include use of specific intervention techniques and practices from recognized early intervention programs for children showing a typical development. Attention will be given to adopting strategies to include exceptional children in programs for typically developing young children. Field experiences required.

Credit Hours: 3

Corequisite Courses: EDNL 451.

Prerequisite Courses: EDN 204 or EDN 203 or SED 250.
Additional Restrictions/Requirements: Corequisite course, prerequisite courses and admission to Watson College of Education.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EDNL 451 - Field Experience in Special Education

Provides students with opportunities for application of concepts through thirty hours of fieldwork with young children and their families in a variety of community settings including public schools, preschools, and childcare facilities under the supervision of licensed service providers. This course is the lab for EDN 451 and requires 30 hours of field experience.

Credit Hours: 2

Corequisite Courses: EDN 451.
Prerequisite Courses: EDN 204 or EDN 203.
Additional Restrictions/Requirements: Corequisite

course, prerequisite course and admission to Watson College of Education and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Practicum for Elementary Education Majors with EYC Concentration

EDN 411 is a typical 14-week internship for Elementary Education majors. It must be conducted in a kindergarten classroom. Grades for EDN 411, EDN 413 and EDN 419 (Practicum) will be based entirely on the intern's performance in the kindergarten classroom. Practicum semester will conclude with 3 full days of participant observation in an approved preschool setting during the final three days of the last week of the internship, the transition week. Interns pursuing the EYC Academic Concentration will be placed in a preschool classroom. For the entire school day of each of the three days of observation, interns pursuing EYC Academic Concentration will observe the children, the

teacher and the routines of the day and work with children under the direction of their partnership teacher.

*English as a Second Language (18 Credit Hours)

TSL 265 - Culture, Advocacy and Policy for ESL Teachers

This course will introduce students to the field of English as a second language, including cultural, social, and political contexts of linguistic diversity from historical and critical perspectives. Topics include legal and administrative aspects of the field, including national and state regulations. A 10-hour participatory observation experience is required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

TSL 312 - English Grammar for Teachers

This course is designed to explore language, English grammar, mechanics, and usage from a pedagogical perspective. Students will explore the structure of the English language with emphasis placed on how to teach grammatical concepts to others.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

TSL 326 - Applied Linguistics for ESL

Students will analyze all aspects of the English language with emphasis on understanding the nature and structure of the language that English language learners bring into the classroom.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

All courses above may be taken prior to admission to Watson College of Education.

TSL 417 - Second Language Methods

Students will be introduced to the instructional cycle used with English language learners. Topics include the design and implementation of instruction. The course includes a 30 hour field experience component.

Credit Hours: 3

Prerequisite Courses: EDN 316
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

TSL 418 - Assessment for English Language Learners

Students will address issues of assessment for non-native English speakers. Topics include classroom assessment, program evaluation, language proficiency assessment, and standardized assessment.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

TSL 423 - Second Language Acquisition

Students will be introduced to the field of Second Language Acquisition. Topics include basic concepts in first and second language acquisition and relationships between the two, key research, theories and principles in the field of English as a second language and how they relate to the academic achievement of English language learners.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

*Required Field Hours: TSL 265 has 10 hours; TSL 417 has 25-30 hours.

Fine Arts (15 Credit Hours)

Fine Arts History and Culture - Minimum of 3 Hours:

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life

to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

FNA 101 - Cultures of the World Through Music and Dance

Examination of a variety of musical styles and dance forms from around the world, with attention to cultural issues and practices. Includes participation in dance and musical experiences.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FNA 102 - Explorations in the Creative Process

Explorations of the creative process informed by a variety of allied arts including, but not limited to: creative writing, music, painting, sculpture, theater, dance and film. Includes lectures, readings, and creative exercises.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 115 - Music in Society

Comparative study of representative works and aesthetic movements in classical, jazz, popular, and global music traditions from varied historical periods and geographic regions. Focus on how music reflects sociocultural influences, identities, and perspectives in the United States, while also revealing the interconnectedness of peoples and cultures from past centuries to the present day.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 116 - History of Jazz

A survey of the evolution of this American art form from its African roots and European influences to the present. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 117 - American Music

A survey of American composers, musicians, and music making from the earliest days of European settlement to the present. Includes a variety of styles: folk, religious, concert, rock, and more. Technical knowledge of music helpful, but not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in

Our Diverse Nation
Course Repeatability: Course may not be repeated.

THR 112 - Dance Appreciation

Appreciation of dance as an art form. The study of dance as a reflection and expression of various cultures from pre-history to present. Includes exposure to contemporary concert dance through films and televised or live performance. Introductory experience in selected dance techniques.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 121 - Introduction to Theatre

Appreciation of theatre through an understanding of its artistic elements, history, dramatic literature, and audience involvement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or, a minimum of 3 hours from any ARH, FNA, MUS or THR course numbered 001-499. Music - Minimum of 3 Hours:

MUS 106 - Exploring Music

Explores the creative process of making music while developing an understanding of basic musical concepts. Designed for students with no musical background who wish to increase their understanding of music. Emphasis on music listening, playing classroom instruments, group singing, improvisation, and music literacy.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive and Literary

Perspectives and Living in a Global Society
Course Repeatability: Course may not be repeated.

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

MUS 150 - Introduction to Music Listening

Guided listening to representative works from Western classical, jazz, popular, and global music traditions. Development of ability to describe elements of compositions and style using basic musical vocabulary. Concert attendance required in addition to the regular class meeting time.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 184 - Jazz Ensemble

The development of idiomatic performance techniques of jazz music in a variety of styles and mediums through the study of its musicians, as well as

performance practices throughout its history. (Intended for students who have had instrumental experience.) May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 185 - Symphonic Band

The Symphonic Band is an outstanding ensemble consisting of highly talented woodwind, brass and percussion players, including both music majors and non-music majors. Enrollment is open to all UNCW students with previous instrumental experience and the necessary skills to perform on a wind or percussion instrument. Three rehearsal hours per week and typically two concerts each semester. May be repeated

for credit.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 186 - University Chorale

Singers study and perform repertoire of various historical periods and styles appropriate for large chorus. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Auditions and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

MUS 187 - Orchestra

Study and performance of the orchestral literature; meets a minimum of two hours per week and gives two or three performances per semester. Section 001 is the Wilmington Symphony Orchestra, membership by audition only; Section 002 is the UNCW String Ensemble, open to UNCW students without audition. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Or, a minimum of 3 hours from any MUS course numbered 001-499. Theatre - Minimum of 3 Hours:

THR 130 - Improvisation

Exploration of spontaneous dramatic playing through intensive exercises and theatre games meant to generate greater individual freedom and self-discipline, as well as to employ improvisation techniques in acting to develop characterization, stage movement, and ensemble performance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 136 - Movement Exploration

Study through creative dance techniques of the body's potential as a tool for creative expression. Exploration of the relationship of dance to other art forms. Solo and group work using basic art concepts and the individual's own experience as materials for movement improvisation and composition. No dance training necessary.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Crosslisting: PED 136
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 230 - Acting For Non-Majors

An introduction to basic acting techniques for non-majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or, a minimum of 3 hours from any COM or THR course numbered 001-499. Three credit hours of Watson College of Education Study Abroad can be substituted for any of the above courses.

International Studies (15 Credit Hours)

Semester Abroad - Minimum 9 hours from any of the following areas: Anthropology Economics Literature Art/Music Environmental Studies Political Science Conversational Language Geography Religion Comparative Education Geology Sociology Cultural History History

Specialty Study - Minimum of 6 Hours:

ANT 105 - Introduction to Anthropology

Introduction to the physical, archaeological, linguistic, and ethnological fields of anthropology; biological and cultural evolution of man.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and

EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FRH 302 - Grammar and Composition I

Thorough study of French grammatical structures and nuances, with attention to the contrasts between French and English. Intensive practice in writing, editing and revising papers written in genres such as landscape descriptions, literary portraits, narration of events, and critical essays.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

FRH 303 - Grammar and Composition II

Thorough study of French grammatical structures and nuances, with attention to the contrasts between French and English. Intensive practice in writing, editing, and revising papers written in genres such as analytical essays, reviews of films, books, music, and other artistic performances, literary analyses, and personal and business correspondence.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

GER 301 - Advanced German

Not open to native speakers. Continued review of the grammatical structure of the language. Application of the language in composition, convention, and reading. Intensive work on increasing vocabulary, idiomatic usage, and overall accuracy. Development of advanced language proficiency. Culmination of the lower-level language sequence.

Credit Hours: 3

Prerequisite Courses: GER 202
University Studies: Approaches and Perspectives/Living in a Global Society, Building

Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GGY 101 - Modern World Geography

The theory, techniques, and professional applications of modern geographic science. Examines geography as a broad interdisciplinary science focused on places, spatial patterns, and the intersection between human activities and the natural world. Includes discussion of the historical origins and modern relevance of geographic thought.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 180 - World Regional Geography

Regional survey of historical, physical, economic, and cultural geography of world regions. Fundamental locational geography as the foundation for a clear world

view and an understanding of global interdependence.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 111 - Politics and Government in Global Perspective

Survey for non-majors of politics and governmental institutions within and among nation states. Attention will also be given to the role of political theory and ideology in the governance of states.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 202 - Contemporary American Political Issues

Important political issues and their relationship to the overall American political process. Topics are selected from, but not limited to: education policy; health care policy; federal deficit and debt policy; and minorities and politics.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or, any ANT, EVS, FRH, GER, GGY, HST, PLS, SOC or SPN course numbered 001-499.

Language Arts (15 Credit Hours)

Oral Communication - Minimum of 3 Hours:

COM 104 - Concepts in Communication Studies

Introduction to communication concepts central to interpersonal relationships, organizations, mass media and other contexts of communication. Focus on concepts and skills that have a practical impact on the student's understanding and practice of communication. Designed specifically for students not intending to become communication studies majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

COM 116 - Performance of Literature

Analysis of poetry, prose, and ethnographic texts through the medium of oral performance. Emphasis is on literary selection, textual analysis, performance analysis and characterization, and other strategies and skills.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

COM 220 - Interpersonal Communication

Introduction to the theory and practice of relational communication in face-to-face and social media situations and contexts. Focus is on improving interpersonal communication skills through understanding verbal, nonverbal, and relational

processes.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

THR 230 - Acting For Non-Majors

An introduction to basic acting techniques for non-majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or any COM course numbered 001-499.

Literature - Minimum of 3 Hours:

ENG 110 - Introduction to Literature

Introduction to reading and responding to literature in a variety of genres, such as poetry, fiction, drama, and literary non-fiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 211 - British Literature to 1800

A survey of representative British text from the Anglo-Saxon period through the eighteenth century. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 212 - British Literature Since 1800

A survey of representative British texts of the nineteenth and twentieth centuries. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ENG 223 - American Literature to 1870

A survey of representative texts from colonial and early America and of the Romantic era.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 224 - American Literature Since 1870

A survey of representative texts from the eras of American Realism and the twentieth century.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 225 - World Literature to 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. Work from ancient times to approximately 1600.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 226 - World Literature Since 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. 1600 to the present.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 227 - World Anglophone Literatures

A theme-based literature course featuring literatures written in English from locations other than US and UK. May be repeated under a different subtitle.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a

Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 230 - Women In Literature

Modern literature by and about women. Focuses on changes in images and roles of women. May include fiction, poetry, drama, and nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 232 - African American Literature

Introduction to the African American literary tradition through a focus on genre, historical era, or major themes, such as nationalism, religion, or urban culture. Topics/historical periods may vary according to instructor.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 290 - Themes in Literature

An interdisciplinary study of a significant theme, such as war and peace, justice, love, youth and age, focusing primarily on literary works but also drawing on sources from other fields, including art, music, and history. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:ENG 103 or ENG 201, or consent of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Or any ENG course numbered 001-499.

Writing - Minimum of 3 Hours:

CRW 201 - Introduction to Creative Writing

Introduction to the principles and techniques of creative writing, aimed at developing the creative process. Includes lectures, reading, and writing exercises in poetry, fiction, and creative nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

CRW 203 - The Evolution of Creative Writing: Fiction, Poetry, and Creative Nonfiction

Introduction to the historical development of poetic, narrative, and other forms of creative writing. Analytical and creative assignments develop student

understanding of techniques such as metrics, point of view, and narrative structure. This course is a core requirement for the CRW major and CRW minor.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CRW 314 - Theory and Practice of Literary Translation

Introduction to the theory and practice of literary translation. Includes translation exercises, workshop discussion, reading on the history and theory of translation.

Credit Hours: 3

Prerequisite Courses: CRW 307 or CRW 308 or CRW 309
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Or any CRW or ENG course numbered 001-499. Three credit hours of Watson College of Education Study Abroad can be substituted for any of the above courses.

Mathematics and Technology (15 Credit Hours)

MAT 141 - Concepts of Mathematics: Number, Operations, and Problem Solving

A conceptual examination of mathematics content that is aligned with elementary and middle grades curricula. Topics include the real number system and related

operations.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

MAT 142 - Concepts of Mathematics: Geometry, Measurement, and Problem Solving

A conceptual examination of mathematics content that is aligned with elementary and middle grades curricula. Topics include geometry, measurement, probability, and data analysis.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions,

differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics

placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Or any MAT or STT course numbered 001-499.

Technology - Minimum of 3 Hours:

CSC 112 - Introduction to Computer Programming

Introduction to programming in a high-level language. Algorithms, computer systems, data representation, survey of computer applications, elementary programming techniques, debugging and verification of programs. The language to be used will be specified in the schedule of classes. Recommended primarily for non computer science majors.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 121 - Programming Concepts I

Problem-solving methods and algorithms in a modern high-level programming language. Introduces classes and objects; control structures; arrays; characters and strings. Emphasis on programming style and the design, coding, and testing of complete programs.

Credit Hours: 4

Prerequisite Courses: MAT 111.
Additional Restrictions/Requirements: Recommended primarily for information technology majors. Will not transfer to the computer science major or minor. A grade of "C" (2.00) or better is required to take MIS 316. Available online only.
University Studies: Building Competencies/Quantitative and Logical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT

160.

University Studies: Foundations/Mathematics and Statistics

Course Repeatability: Course may not be repeated.

Or any CSC or MIS course numbered 001-499. Three credit hours of Watson College of Education Study Abroad can be substituted for any of the above courses.

Physical Activity, Wellness and Childhood Obesity (15 Credit Hours)

Required:

HFE 345 - Childhood Obesity

Focuses on the methods used in the assessment, prevention and treatment of childhood obesity. In addition, this course will examine the etiology of obesity and the role that human behaviors and an active lifestyle play in the overall health and well-being of children.

Credit Hours: 3

University Studies: Understanding Human Institutions

and Behaviors
Course Repeatability: Course may not be repeated.

Choose 12 hours from the following courses:

CHHS 210 - Creating Happiness and Well-Being

An introduction to the study of topics related to happiness and its impact on quality of life. Students will learn principles and theoretical models targeted at increasing and/or sustaining happiness. The course will focus on big-picture issues and real-world applications.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

HEA 105 - Individual Well-Being

Topical areas and issues in health explored within the physical, emotional, social, environmental, intellectual, and spiritual dimensions of personal wellness.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 207 - Nutrition and Behavior

Application of the principles of nutrition as related to health; various levels of wellness; and practices of health care. Emphasis on basics of sound nutrition, requirements of various food elements, diet planning, diet patterns for specific age groups, nutritional fads and weight control.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 304 - Comprehensive School Health Education, Grades K-12

An overview of the school health education program. Emphasis on methods and materials for health instruction in grades K-12.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

HFE 386 - Physical Activity Pedagogy I

Provides students theory, technique, and methods of developing and implementing developmentally appropriate healthful living for grades K-5. Emphasis on teaching effectiveness, planning, writing learning objectives, integration of technology and contemporary curricular models. Field experience is required.

Credit Hours: 4

Prerequisite Courses: HFE 235 with a C- or better or PED 235 with a C- or better.
Course Repeatability: Course may not be repeated.

HFE 415 - Adapted Physical Activity

Provide students theoretical and practical knowledge to plan and implement appropriate physical activity programs for individuals with disabilities in integrated and inclusive settings.

Credit Hours: 0

Prerequisite Courses: (EXS 216 with a C- or better and EXSL 216 with a C- or better) or (BIO 240 with a C- or better and BIOL 240 with a C- or better).
Additional Restrictions/Requirements: Senior standing, prerequisite courses, or consent of instructor.
University Studies: Writing Intensive, Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability Insurance Additional Course Fee Schedule

Science and Health (15 Credit Hours)

Health - Minimum of 3 Hours: Any HEA course numbered 001-499.

Science - Minimum of 3 Hours:

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 150 - Humans and Ecology

Introduction to the principles of ecology including concepts of succession, biotic communities, biodiversity, limits on population growth and conservation of natural resources.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EDN 426 - Island Ecology for Educators

Through interaction with resources and experts students will develop readily accessible, web-based materials through engagement in field based exploration of plants and animals of coastal ecosystems and environmental issues. This course focuses on both science content and pedagogical resource development.

Credit Hours: 3

Crosslisting: EVS 426
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 135 - Prehistoric Life

Introduction to the field of paleontology and the fossil record; the succession of life from its earliest beginnings through the Age of Dinosaurs to modern Man; evolutionary, environmental and ecological analyses of fossil plants and animals based on biologic and geologic principles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PHY 103 - Great Ideas in Physics

Introduces the nature of science to the nonscientist by emphasizing the concepts underlying four great ideas in physics: the conservation of energy, the second law

of thermodynamics, the relativity of time, and the wave-particle duality of nature. Explores the mutual influence of science and the humanities (literature, philosophy, history, and the arts).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PHY 104 - Physics Everyone Should Know

Prepares individuals with the physics needed to be effective world leaders by stressing conceptual understanding rather than mathematics with applications to current events. Physics is critical to our understanding of energy, space, global warming, nuclear power, and technology.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 105 - Introductory Physics

Survey of topics in physics for non-science majors covering the fundamentals of mechanics, heat, light, sound, and electricity and magnetism, and their application in today's society.

Credit Hours: 0 To 4

Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 220 - The Physics of Music

An introduction to the physical principles underlying music. Study of resonance, the overtone series, and timbre for both acoustic and electronic instruments, as well as psychoacoustics, pitch, and Western and non-Western musical scales. Familiarity with pre-college trigonometry and algebra is presumed.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PHY 260 - Introduction to Astronomy

Descriptive course in principles, theories, and techniques of astronomy. Occasional night viewings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Or any BIO, PHY, CHM, EVS, GGY or GLY course numbered 001-499. Three credit hours Watson College of Education of Study Abroad can be substituted for any of the above courses.

Social Studies (15 Credit Hours)

Geography - Minimum of 3 Hours:

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours

each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 180 - World Regional Geography

Regional survey of historical, physical, economic, and cultural geography of world regions. Fundamental locational geography as the foundation for a clear world view and an understanding of global interdependence.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls

upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

Or any GGY course numbered 001-499. Political Science - Minimum of 3 Hours:

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

PLS 111 - Politics and Government in Global Perspective

Survey for non-majors of politics and governmental institutions within and among nation states. Attention will also be given to the role of political theory and ideology in the governance of states.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 202 - Contemporary American Political Issues

Important political issues and their relationship to the overall American political process. Topics are selected from, but not limited to: education policy; health care policy; federal deficit and debt policy; and minorities and politics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Or any PLS course numbered 001-499. Social Sciences - Minimum of 3 Hours:

AFN 130 - Introduction to Africana Studies

Interdisciplinary exploration of the collective experiences of the African Diaspora, which includes Africans and people of African descent in various continents and countries in addition to the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or any AFN, ANT, ECN, HST, PLS or SOC course numbered 001-499. Three hours of Watson College of Education Study Abroad can be substituted for any of the above courses.

Special Education (15 Credit Hours)

SED 351 - Learning and Behavioral Disorders in a Diverse Society

Designed to examine the complex variety of learners with behavioral or emotional disorders and learning disabilities. Emphasis on etiology, assessment, diagnosis, characteristics, theories, historical influences, teaching strategies, and current trends. At

least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SED 352 - Behavioral Development

Designed to develop an understanding of social/emotional development and effective principles and strategies to promote positive behavioral development. Focus will be on positive behavioral support, functional behavioral assessment, teaching pro-social behaviors and social skills, establishing affective environments, parent training and effective behavior change strategies. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 356 - Severe Disabilities

Study of etiology, definitions, characteristics and programming needs of persons with moderate, severe, and profound intellectual disabilities, low functioning autism, and multiple disabilities. Current approaches to treatment and education of persons with severe disabilities in a variety of settings and across the life span will be included. Students will be expected to develop a basic knowledge of the various aspects of severe disabilities and use that knowledge to make informed decisions about appropriate practices in the education of this population. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 352.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 368 - Teaching Reading to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching reading skills to

students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and identifying accommodations and modifications appropriate to the needs of students. Focus includes the application of instructional sequences that adhere to the guidelines for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. The lab for this course is SEDL 368.

Credit Hours: 3

Corequisite Courses: SEDL 368
Prerequisite Courses: EDN 301, SED 372
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SED 369 - Teaching Mathematics to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching mathematics skills to students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and

identifying accommodations and modifications appropriate to the needs of students. Focus includes the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. The lab for this course is SEDL 369.

Credit Hours: 3

Corequisite Courses: SEDL 369
Prerequisite Courses: EDN 301, SED 374
Course Repeatability: Course may not be repeated.

SED 372 - Program Development in Special Education

Development of skills in planning educational programs for students with exceptionalities. Includes writing lesson plans, unit plans, individualized educational programs, family service plans, and transition plans; task analysis; legal requirements and roles of the special education teacher. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: EDN 301, SED 374
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

SEDL 368 - Teaching Reading to Learners with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit reading instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. This course is the lab for SED 368.

Credit Hours: 1

Corequisite Courses: SED 368
Prerequisite Courses: EDN 301
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEDL 369 - Teaching Mathematics to Students with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit mathematics instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. This course is the lab for SED 369.

Credit Hours: 1

Corequisite Courses: SED 369
Prerequisite Courses: EDN 301
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Total Credit Hours: 78-83

English, B.A.

None

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in English a student must successfully complete ENG 204 or ENG 205.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in English a student must successfully complete ENG 495 or ENG 496.

Applied Learning Requirement:

To satisfy the applied-learning requirement for the B.A. degree in English a student must successfully complete one of the following courses: ENG 204, ENG 205, ENG 311, ENG 319, ENG 491, ENG 395, ENG 496, ENG 498, ENG 499; or EDN 402, EDN 408, EDN 409.

Requirements for a Major in English for the B.A. Degree:

An overall average of "C" (2.00) or better is required among courses taken to satisfy the requirements of the major.

Literary and Cultural Studies Option

This option cultivates students' intellectual curiosity and knowledge of various literatures, critical theories and the heterogeneous nature of today's textual productions. Within our courses, students hone their analytical skills through close, critical reading of primary and secondary texts; learn research and technological skills; and sharpen their writing and communication skills.

Two courses from the following:

ENG 361 - Studies in Short Fiction

A study of the short story and novella, with emphasis on the structural features and historical development of these genres. Works from one or more periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 362 - Studies in the Novel

An in-depth exploration of the novel as a genre. Works may be from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 363 - Studies in Nonfiction

Types of nonfiction prose, including biography, autobiography, memoirs, journals, and various essay forms. Works from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 364 - Studies in Poetry

An in-depth study of poetry with emphasis on form, style, and interpretation. Poems from a variety of periods, writers, and traditions. May be repeated under

a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 365 - Studies in Drama

A variety of plays representing tragedy, comedy, and modern forms. Works from a variety of periods, authors, and traditions with some attention to dramatic criticism. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Crosslisting: THR 365
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

6 Hours in Period Studies:

Two courses from the following:

ENG 330 - The Age of Chaucer

A survey of works written in medieval England. Includes selections from The Canterbury Tales and Chaucer's other works, and representative works in such genres as chronicle, biography, epic, romance, dream vision, and drama.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 331 - The Age of Elizabeth

English literature of the sixteenth and early seventeenth centuries. Includes poetry by Spenser and Shakespeare, plays by Marlowe and Jonson, and prose by More and Sidney.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated

ENG 334 - The Age of Milton

Emphasis on the works of Milton. May include works by such writers as Donne, Herbert, and Bacon.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 335 - Restoration and Eighteenth Century Literature

Study of representative texts written between 1660 and 1800, which may include such genres as the early novel, the comedy of manners, and the political satire.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 336 - British Romanticism

Study of representative texts from the Romantic period, 1780-1830. Emphasis may focus on historical and political contexts and/or development of aesthetic tradition. May include such writers as Wollstonecraft, Blake, Wordsworth, Coleridge, the Shelleys, Austen, and Keats.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 337 - Victorian Literature

Study of representative texts from the Victorian era, 1830-1900, against the historical and cultural backdrop

of urbanization, industrialism, and the rise of the British Empire. May include writers such as Tennyson, the Brownings, Arnold, the pre-Raphaelites, Dickens, Eliot, and Gaskell.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 338 - British Modernism

Study of a broad range of writings from the first half of the twentieth century. May include writers such as Conrad, Lawrence, Joyce, Woolf, Yeats, Shaw, and Auden.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 349 - Early American Literature

Study of major authors and texts in American literature before 1830, focusing on the colonial and early national periods.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 350 - American Romanticism

Study of the major writers, 1820-1865, whose works fashioned a national literary identity known as the American Renaissance. May include such writers as Emerson, Thoreau, Hawthorne, Poe, Whitman, and Melville.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 351 - American Realism

Studies of major writers in the period of emerging industrialism and urbanization after the Civil War. May include such writers as Howells, Twain, James, Wharton, Crane, Cather, and Dreiser.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 352 - American Modernism

Study of a broad range of writings from the first half of the twentieth century. May Include such writers as Eliot, Pound, Stevens, O'Neill, Hemingway, Fitzgerald, Porter, Faulkner, and Hurston.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 357 - African American Literary Tradition to 1945

In-depth exploration of the African American literary tradition from its beginning to 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 358 - African American Literary Tradition Since 1945

In-depth exploration of the African American literary tradition since 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 369 - Twenty-First Century Literature

In-depth exploration of literature in a variety of genres (fiction, poetry, drama, and non-fiction) produced in the twenty-first century. Works may be selected from multiple writers, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette, Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 372 - Postmodern Literature

Study of a broad range of literature in a variety of genres from the postmodern period (1945 to 2001). Possible authors may include John Ashbery, Margaret Atwood, Toni Morrison, Alice Notley, Thomas Pynchon, Vladimir Nabokov, and Salmon Rushdie.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

6 hours in Diverse Literary Cultures:

Two courses from the following:

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian

and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean, and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 344 - Latino Voices in American Literature

ENG 204 or ENG 205 recommended but not required. Study of literature that reflects the Latino heritage of

American-born writers or immigrants to the U.S. who write in English. May include such authors as Sandra Cisneros, Richard Rodriguez, Cristina Garcia, Ilan Stevens, Julia Alvarez, and Oscar Hijnelos.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 356 - Indigenous American Literature

Study of past and present literatures of various Indigenous peoples of the Americas. May include oral traditions, tales, poetry, fiction, drama, and song, as well as more recent engagements with digital and electronic media.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 357 - African American Literary Tradition to 1945

In-depth exploration of the African American literary tradition from its beginning to 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 358 - African American Literary Tradition Since 1945

In-depth exploration of the African American literary tradition since 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette, Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 373 - Women's Literary Traditions

Study of gender issues, themes, and character portrayal in literature by women, as well as consideration of the ways in which women writers both follow and challenge literary conventions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 377 - Queer Literature

In-depth exploration of queer identities, experiences, and narrative forms. Will include historical as well as

contemporary narratives, queer history and culture, queer and trans theory, and a variety of genres.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 385 - Multicultural Young Adult Literature

Advanced examination of multicultural literature for adolescents.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

12 Hours in Electives:

Four courses from the following:

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

The development of the English language from Old English to the present; changes in sounds, vocabulary, syntax, meaning, and spelling; formation of American dialects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 324 - Topics in Linguistics

The study of a selected topic in human language. Content varies from semester to semester. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 325 - Studies in Sociolinguistics

ENG 204 or ENG 205 recommended but not required. An examination of the way language varies according to social characteristics such as age, gender, ethnicity, class, individual style, social networks, and language attitudes.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 330 - The Age of Chaucer

A survey of works written in medieval England. Includes selections from The Canterbury Tales and Chaucer's other works, and representative works in such genres as chronicle, biography, epic, romance, dream vision, and drama.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 331 - The Age of Elizabeth

English literature of the sixteenth and early seventeenth centuries. Includes poetry by Spenser and Shakespeare, plays by Marlowe and Jonson, and prose by More and Sidney.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
Course Repeatability: Course may not be repeated

ENG 332 - Shakespeare's Early Plays and Poems

Study of selected plays written before 1600 and selected poems. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 333 - Shakespeare's Later Plays

A study of selected plays written after 1600. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 334 - The Age of Milton

Emphasis on the works of Milton. May include works by such writers as Donne, Herbert, and Bacon.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 335 - Restoration and Eighteenth Century Literature

Study of representative texts written between 1660 and 1800, which may include such genres as the early novel, the comedy of manners, and the political satire.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 336 - British Romanticism

Study of representative texts from the Romantic period, 1780-1830. Emphasis may focus on historical and political contexts and/or development of aesthetic tradition. May include such writers as Wollstonecraft, Blake, Wordsworth, Coleridge, the Shelleys, Austen, and Keats.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 337 - Victorian Literature

Study of representative texts from the Victorian era, 1830-1900, against the historical and cultural backdrop of urbanization, industrialism, and the rise of the British Empire. May include writers such as Tennyson, the Brownings, Arnold, the pre-Raphaelites, Dickens, Eliot,

and Gaskell.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 338 - British Modernism

Study of a broad range of writings from the first half of the twentieth century. May include writers such as Conrad, Lawrence, Joyce, Woolf, Yeats, Shaw, and Auden.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean, and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 344 - Latino Voices in American Literature

ENG 204 or ENG 205 recommended but not required. Study of literature that reflects the Latino heritage of American-born writers or immigrants to the U.S. who write in English. May include such authors as Sandra Cisneros, Richard Rodriguez, Cristina Garcia, Ilan Stevens, Julia Alvarez, and Oscar Hijnelos.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 349 - Early American Literature

Study of major authors and texts in American literature before 1830, focusing on the colonial and early national periods.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 350 - American Romanticism

Study of the major writers, 1820-1865, whose works fashioned a national literary identity known as the American Renaissance. May include such writers as Emerson, Thoreau, Hawthorne, Poe, Whitman, and Melville.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 351 - American Realism

Studies of major writers in the period of emerging industrialism and urbanization after the Civil War. May include such writers as Howells, Twain, James, Wharton, Crane, Cather, and Dreiser.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 352 - American Modernism

Study of a broad range of writings from the first half of the twentieth century. May Include such writers as Eliot, Pound, Stevens, O'Neill, Hemingway, Fitzgerald, Porter, Faulkner, and Hurston.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 356 - Indigenous American Literature

Study of past and present literatures of various Indigenous peoples of the Americas. May include oral traditions, tales, poetry, fiction, drama, and song, as

well as more recent engagements with digital and electronic media.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 357 - African American Literary Tradition to 1945

In-depth exploration of the African American literary tradition from its beginning to 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and

Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 358 - African American Literary Tradition Since 1945

In-depth exploration of the African American literary tradition since 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 361 - Studies in Short Fiction

A study of the short story and novella, with emphasis on the structural features and historical development of these genres. Works from one or more periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 362 - Studies in the Novel

An in-depth exploration of the novel as a genre. Works may be from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 363 - Studies in Nonfiction

Types of nonfiction prose, including biography, autobiography, memoirs, journals, and various essay forms. Works from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 364 - Studies in Poetry

An in-depth study of poetry with emphasis on form, style, and interpretation. Poems from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 365 - Studies in Drama

A variety of plays representing tragedy, comedy, and modern forms. Works from a variety of periods, authors, and traditions with some attention to dramatic criticism. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Crosslisting: THR 365
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 369 - Twenty-First Century Literature

In-depth exploration of literature in a variety of genres (fiction, poetry, drama, and non-fiction) produced in the twenty-first century. Works may be selected from multiple writers, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette,

Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 372 - Postmodern Literature

Study of a broad range of literature in a variety of genres from the postmodern period (1945 to 2001). Possible authors may include John Ashbery, Margaret Atwood, Toni Morrison, Alice Notley, Thomas Pynchon, Vladimir Nabokov, and Salmon Rushdie.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 373 - Women's Literary Traditions

Study of gender issues, themes, and character portrayal in literature by women, as well as consideration of the ways in which women writers both follow and challenge literary conventions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 374 - Twentieth-Century American and British Poetry

Study of major authors, texts, forms, styles, and movements in twentieth-century American and British poetry.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 376 - Environmental Literature

Study of a broad range of literature from multiple periods and genres, examining how humans define and engage the environment in terms of aesthetics and

imagination, politics and policy, culture and identity, religion and science, and conservation and sustainability.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 377 - Queer Literature

In-depth exploration of queer identities, experiences, and narrative forms. Will include historical as well as contemporary narratives, queer history and culture, queer and trans theory, and a variety of genres.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 378 - Film and Literature

Study of the theory and practice of adapting literature into film as well as the formal, historical, social, and technological relationships between writing and filmmaking.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 379 - Comics and Graphic Narratives

Study of the medium of comics, with emphasis on formal, historical, and theoretical approaches to understanding and interpreting comic books, cartoons, and other types of graphic narrative.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 381 - Literature for Young Adults

Advanced examination of literature for adolescents. Intended for anyone interested in adolescent literature and adolescent culture as well as for future teachers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 382 - Ways of Teaching Literature

A survey of written, oral, visual, and dramatic responses to literary texts. Response-based approaches to the study of literature appropriate for middle and secondary teaching.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 383 - Classics Reconsidered

Study of classic works of poetry, fiction, and drama commonly taught in high school English classes. Includes an examination of what constitutes a literary 'classic,' who labels classics, and how the social status of certain literary works influences what is commonly taught in high school English classes. Especially recommended for prospective teachers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 385 - Multicultural Young Adult Literature

Advanced examination of multicultural literature for adolescents.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 390 - Studies in Literature

A selected literary theme, movement, period, influence, or genre. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 391 - Science Fiction and Fantasy

An in-depth exploration of the science fiction and fantasy genres. Works may be selected from a variety of writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 392 - Protest Literature

An in-depth exploration of protest literature as a form of cultural resistance and agent of sociopolitical change. Works may be selected from a variety of writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 395 - Crime Literature

An in-depth exploration of crime literature; may include hardboiled/detective fiction, noir, true crime, and police procedurals from a variety of writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 397 - Sports Literature

An in-depth exploration of sports literature in a variety of genres. Works may be selected from multiple writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 201, or consent of instructor. ENG 205 recommended but not required.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 398 - Religion, Spirituality, and Literature

An in-depth exploration of religious and spiritual literature in a variety of genres (poetry, fiction, drama, nonfiction, and sacred text). Works will be selected from multiple writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 490 - Topics in Literature

The study of a selected literary theme, movement, period, influence, or genre. May be repeated under a different subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Nine hours of literature courses, at least three hours at the 300-400 level, or consent of instructor.
Crosslisting: ENG 509
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Study section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing; nine hours of literature or writing courses (depending on project focus), at least three of which are at the 300-400 level; overall GPA of at least 2.00; and consent of instructor, department chair, and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 495 - Senior Seminar in Literary and Cultural Studies

Intensive opportunity for research experience under faculty supervision of an author or topic in literature. Emphasis on individualized work, which may include oral reports, a longer research project, and appropriate bibliographic assignments. Required of English majors in the Literature Option; fulfills seminar requirements for majors in the Teacher Licensure Option. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: ENG 205.
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, and three additional hours in ENG literature or language at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may be repeated
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 396 - Horror Literature

An in-depth exploration of the horror genre in literature, film, and criticism. Works may be selected from a variety of writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

3 hours in Senior Seminar in Literary and Cultural Studies:

ENG 495 - Senior Seminar in Literary and Cultural Studies

Intensive opportunity for research experience under faculty supervision of an author or topic in literature. Emphasis on individualized work, which may include oral reports, a longer research project, and appropriate bibliographic assignments. Required of English majors in the Literature Option; fulfills seminar requirements for majors in the Teacher Licensure Option. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: ENG 205.
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, and three additional hours in ENG literature or language at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Critical Reasoning

Course Repeatability: Course may be repeated
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

Additional Information:

Students in the "Literary and Cultural Studies" option should complete only TWO courses (6 credits) at the 200-level: ENG 205 and ENG 286. The remaining 36 credit hours are to be completed in courses at the 300-level and 400-level. Genre Studies courses may be repeated only ONCE if the subject matter is different. Any repeated genre course will count in the "Electives" category. No courses may be double-counted across categories.

Professional Writing Option

This option prepares students to analyze and address a variety of writing situations, to read texts critically, and to write in an effective, informed, and ethical manner in a range of organizational contexts. Many courses incorporate technologies for writing, research, and communication.

Requirements are:

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric. Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 496 - Senior Seminar in Writing/Rhetoric

Intensive study of a theme, issue, or genre in writing/rhetoric. Provides significant student engagement. Required of English majors in Professional Writing Option; fulfills seminar requirement for Teacher Licensure.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

3 hours in Editing:

One course from the following:

ENG 309 - Technical Editing

Focus on the fundamentals of effective writing, organization, and design in order to develop the language and proficiencies necessary to edit print and digital texts used in a range of organizations.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

3 hours in Rhetorical Theory:

One course from the following:

ENG 388 - Rhetorical Theory to 1900

Survey of major theories in rhetoric as they apply to written discourse from classical era to the end of the nineteenth century.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204 or ENG 205, or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 389 - Rhetorical Theory since 1900

Survey of major theories in rhetoric as they apply to written discourse from the start of the twentieth century to the present.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204 or ENG 205, or consent of instructor.
University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

6 hours in Approaches to the Discipline:

Two courses from the following:

ENG 303 - Reading and Writing Arguments

Instruction in rhetorical principles and their use in both analyzing and constructing persuasive texts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 316 - Analyzing Style

Analysis of written style, emphasizing rhetorical principles and textual features. Application of stylistic principles in the creation of written texts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 326 - Writing with Artificial Intelligence

Introduction to the intersection of Artificial Intelligence (AI), writing, and content operations within the field of professional writing. Explores the fundamentals of AI and its application in automating and optimizing the content creation and distribution process.

University Studies: Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 417 - Research Methods in Professional Writing

Preparation and practice for applied research projects in the field of professional writing. Focus on both qualitative and quantitative methodologies including rhetorical approaches, ethnomethodologies, discourse analysis, network analysis, and usability.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

3 hours in Writing in Context:

One course from the following:

ENG 304 - Writing for Teachers

Introduction to theories of composing, rhetoric, assessment, and literacy pedagogy for prospective teachers. Emphasis on analyzing student texts and engaging in various writing projects appropriate for professional development.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 307 - Composition Theory

Explores the most current ideas about writers and writing by considering various theoretical lenses in the field. Examines topics such as the multiple stages of

compositing, genre conventions, and the role of revision.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 318 - Writing and Activism

Study of visual and textual elements of documents generated in the service of activist causes. Themes may include propaganda, grassroots and electronic activism, and the negotiation of power.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

3 hours in Professional Genres:

One course from the following:

ENG 305 - Professional Review Writing

Critical and analytical writing intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 306 - Essay Writing

Instruction in the genre and craft of the essay, with emphasis on the use of close observation, research, and reflection.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively.

Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 404 - Advanced Professional Writing

Focus on the development of research, analysis, composition, and design strategies needed to complete complex writing projects within organizational contexts and create effective texts for a range of audiences. Topics may include user experience design, search

engine optimization, and project management.

Credit Hours: 3

Prerequisite Courses: ENG 314 or ENG 319
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 414 - Writing for the Web

Explores visual rhetoric and new media theories to inform the analysis and production of texts in Web formats. Topics may include writing content for existing Web outlets, markup conventions, search engine optimization, and modification of Content Managment System (CMS) and html/css templates.

Credit Hours: 3

Prerequisite Courses: ENG 314 or ENG 319
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

9 additional hours of ENG writing courses:

Three courses from the following:

ENG 202 - Introduction to Journalism

Introduction to news values, style, and writing. Focus is on writing news leads and news stories under deadline pressure. Also included: note taking, interviewing, and an introduction to feature writing.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 302 - Journalism Workshop

Continuation of ENG 202. Focus is on gathering news from various community and campus sources and writing in news style under deadline pressure. Also

included: some attention to feature and editorial writing.

Credit Hours: 3

Prerequisite Courses: ENG 202
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 303 - Reading and Writing Arguments

Instruction in rhetorical principles and their use in both analyzing and constructing persuasive texts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 304 - Writing for Teachers

Introduction to theories of composing, rhetoric, assessment, and literacy pedagogy for prospective

teachers. Emphasis on analyzing student texts and engaging in various writing projects appropriate for professional development.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 305 - Professional Review Writing

Critical and analytical writing intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 306 - Essay Writing

Instruction in the genre and craft of the essay, with emphasis on the use of close observation, research, and reflection.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 307 - Composition Theory

Explores the most current ideas about writers and writing by considering various theoretical lenses in the field. Examines topics such as the multiple stages of compositing, genre conventions, and the role of revision.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 309 - Technical Editing

Focus on the fundamentals of effective writing, organization, and design in order to develop the language and proficiencies necessary to edit print and digital texts used in a range of organizations.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 315 - Topics in Writing and Rhetoric

A focused study of a theme, issue, or genre in writing or rhetoric.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 316 - Analyzing Style

Analysis of written style, emphasizing rhetorical principles and textual features. Application of stylistic principles in the creation of written texts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 317 - Writing about Film

Instruction and practice in the techniques of writing essays about film. Writing assignments might include

reviews, features, scholarly articles or theoretical essays.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite FST 205; or prerequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: FST 317
Course Repeatability: Course may not be repeated.

ENG 318 - Writing and Activism

Study of visual and textual elements of documents generated in the service of activist causes. Themes may include propaganda, grassroots and electronic activism, and the negotiation of power.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric. Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 388 - Rhetorical Theory to 1900

Survey of major theories in rhetoric as they apply to written discourse from classical era to the end of the nineteenth century.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204 or ENG 205, or consent of instructor.
University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

ENG 389 - Rhetorical Theory since 1900

Survey of major theories in rhetoric as they apply to written discourse from the start of the twentieth century to the present.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204 or ENG 205, or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 393 - Writing in the Scientific Disciplines

Rigorous introduction to writing for academic science contexts. Critically examines the current state of academic science writing and explores the multiple practical strategies scientists use to communicate in professional settings.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 404 - Advanced Professional Writing

Focus on the development of research, analysis, composition, and design strategies needed to complete complex writing projects within organizational contexts and create effective texts for a range of audiences. Topics may include user experience design, search engine optimization, and project management.

Credit Hours: 3

Prerequisite Courses: ENG 314 or ENG 319
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 414 - Writing for the Web

Explores visual rhetoric and new media theories to inform the analysis and production of texts in Web formats. Topics may include writing content for existing Web outlets, markup conventions, search engine optimization, and modification of Content Managment System (CMS) and html/css templates.

Credit Hours: 3

Prerequisite Courses: ENG 314 or ENG 319
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 417 - Research Methods in Professional Writing

Preparation and practice for applied research projects in the field of professional writing. Focus on both qualitative and quantitative methodologies including rhetorical approaches, ethnomethodologies, discourse analysis, network analysis, and usability.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Study section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing; nine hours of literature or writing courses (depending on project focus), at least three of which are at the 300-400 level; overall GPA of at least 2.00; and consent of instructor, department chair, and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 498 - Internship in Writing

Minimum GPA applies. Academic training and practical writing experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of the internship coordinator.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

3 hours in the English language:

One course from the following:

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 321 - Structure of the English Language

Study of the grammatical structure of the English language and the process by which we create and comprehend English sentences. Emphasis on recent syntactic models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 322 - Language and Meaning

Study of factors that shape meaning in verbal and nonverbal communication. Topics may include the language of persuasion, propaganda, and prejudice; language and culture; conversation and logic; and vernacular languages.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 323 - History of the English Language

The development of the English language from Old English to the present; changes in sounds, vocabulary, syntax, meaning, and spelling; formation of American

dialects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 324 - Topics in Linguistics

The study of a selected topic in human language. Content varies from semester to semester. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 325 - Studies in Sociolinguistics

ENG 204 or ENG 205 recommended but not required. An examination of the way language varies according to social characteristics such as age, gender, ethnicity, class, individual style, social networks, and language attitudes.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

Additional Information:

No more than 12 hours may be at the 200 level.

Teacher Licensure Option

This option prepares students to teach English at the secondary level and to make contributions as active professionals.

Requirements for the Teacher Education Program:

ENG 205 - Introduction to Literary and Cultural Studies

An immersive introduction to literary and cultural studies, focusing on a single text. Students will learn how to write literary and cultural criticism, with an emphasis on interpretative methods, practical research skills, and discipline-specific conventions of citation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 304 - Writing for Teachers

Introduction to theories of composing, rhetoric, assessment, and literacy pedagogy for prospective teachers. Emphasis on analyzing student texts and engaging in various writing projects appropriate for professional development.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the

use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 332 - Shakespeare's Early Plays and Poems

Study of selected plays written before 1600 and selected poems. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 333 - Shakespeare's Later Plays

A study of selected plays written after 1600. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 211 - British Literature to 1800

A survey of representative British text from the Anglo-Saxon period through the eighteenth century. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 212 - British Literature Since 1800

A survey of representative British texts of the nineteenth and twentieth centuries. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ENG 223 - American Literature to 1870

A survey of representative texts from colonial and early America and of the Romantic era.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 224 - American Literature Since 1870

A survey of representative texts from the eras of American Realism and the twentieth century.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 225 - World Literature to 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. Work from ancient times to approximately 1600.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 226 - World Literature Since 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. 1600 to the present.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 381 - Literature for Young Adults

Advanced examination of literature for adolescents. Intended for anyone interested in adolescent literature and adolescent culture as well as for future teachers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 382 - Ways of Teaching Literature

A survey of written, oral, visual, and dramatic responses to literary texts. Response-based approaches to the study of literature appropriate for middle and secondary teaching.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 383 - Classics Reconsidered

Study of classic works of poetry, fiction, and drama commonly taught in high school English classes. Includes an examination of what constitutes a literary 'classic,' who labels classics, and how the social status of certain literary works influences what is commonly taught in high school English classes. Especially recommended for prospective teachers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

3 hours in Diverse Literary Cultures:

One course from the following:

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean, and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 344 - Latino Voices in American Literature

ENG 204 or ENG 205 recommended but not required. Study of literature that reflects the Latino heritage of American-born writers or immigrants to the U.S. who write in English. May include such authors as Sandra Cisneros, Richard Rodriguez, Cristina Garcia, Ilan Stevens, Julia Alvarez, and Oscar Hijnelos.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and

Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 356 - Indigenous American Literature

Study of past and present literatures of various Indigenous peoples of the Americas. May include oral traditions, tales, poetry, fiction, drama, and song, as well as more recent engagements with digital and electronic media.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 357 - African American Literary Tradition to 1945

In-depth exploration of the African American literary tradition from its beginning to 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 358 - African American Literary Tradition Since 1945

In-depth exploration of the African American literary tradition since 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette, Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 373 - Women's Literary Traditions

Study of gender issues, themes, and character portrayal in literature by women, as well as consideration of the ways in which women writers both follow and challenge literary conventions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 377 - Queer Literature

In-depth exploration of queer identities, experiences, and narrative forms. Will include historical as well as contemporary narratives, queer history and culture, queer and trans theory, and a variety of genres.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing

Intensive
Course Repeatability: Course may not be repeated.

ENG 385 - Multicultural Young Adult Literature

Advanced examination of multicultural literature for adolescents.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

3 hour in the English language:

One course from the following:

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children

learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 321 - Structure of the English Language

Study of the grammatical structure of the English language and the process by which we create and comprehend English sentences. Emphasis on recent syntactic models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 322 - Language and Meaning

Study of factors that shape meaning in verbal and nonverbal communication. Topics may include the language of persuasion, propaganda, and prejudice; language and culture; conversation and logic; and vernacular languages.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 323 - History of the English Language

The development of the English language from Old English to the present; changes in sounds, vocabulary, syntax, meaning, and spelling; formation of American dialects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 324 - Topics in Linguistics

The study of a selected topic in human language. Content varies from semester to semester. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 325 - Studies in Sociolinguistics

ENG 204 or ENG 205 recommended but not required. An examination of the way language varies according to social characteristics such as age, gender, ethnicity, class, individual style, social networks, and language attitudes.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

Six additional hours of English electives at the 300 or 400 level:

ENG 495 - Senior Seminar in Literary and Cultural Studies

Intensive opportunity for research experience under faculty supervision of an author or topic in literature. Emphasis on individualized work, which may include oral reports, a longer research project, and appropriate bibliographic assignments. Required of English majors in the Literature Option; fulfills seminar requirements for

majors in the Teacher Licensure Option. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: ENG 205.
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, and three additional hours in ENG literature or language at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may be repeated
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 496 - Senior Seminar in Writing/Rhetoric

Intensive study of a theme, issue, or genre in writing/rhetoric. Provides significant student engagement. Required of English majors in Professional Writing Option; fulfills seminar requirement for Teacher Licensure.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205
Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Additional Information:

No more than 12 hours may be at the 200 level. Students must take at least one course from the early survey courses (ENG 211, ENG 223 and ENG 225) and at least one course from the later survey courses (ENG 212, ENG 224 and ENG 226). For information on admissions criteria for the Teacher Education Program and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Total: 42 hours

Courses in Other Departments:

Up to 6 hours of appropriate courses from outside the department may be counted toward the major or minor.

Environmental Sciences, B.S.

Program Coordinator: Dr. Chris Dumas

The B.S. in Environmental Sciences prepares students for careers in enviromental science and management. Typical employers include local, state and federal government agencies, science and engineering consulting firms, environmental nonprofit organizations, and the environmental management divisions of corporations. The B.S. in Environmental Sciences offers seven program options, six of which prepare the student to take a certification exam or to meet additional requirements for professional certification within their respective fields. The seventh option, Cross-Disciplinary, is available to facilitate pairing an EVS major with a minor or a double major.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Environmental Sciences, a student must successfully complete EVS 495.

Applied Learning Requirement

To satisfy the Applied Learning requirement for the B.S. degree in Environmental Sciences, a student must successfully complete one of the following: a practicum experience in environmental science, EVS 497 (minimum 1 credit); a directed individual study related to EVS in any approved department, such as EVS 491 (minimum 1 credit); an honors project related to EVS in any approved department, such as EVS 499 or HON 499 (6 credits); or a formal student teaching experience (e.g. EDN 411).

Requirements for a Major in Environmental Sciences for the B.S. Degree

The B.S. degree in Environmental Sciences consists of 80-85 credit hours total, comprised of 42 hours of General Core requirements plus 38-43 hours of Option requirements. A student must select one of seven Options in environmental science: Ecological Restoration and Management, Wildlife Management,

Fisheries Management, Wetlands Management, Environmental Education, Sustainability, or Cross-Disciplinary.

General Core Requirements for all Environmental Sciences Majors (42 Credit Hours)

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVSL 195 - Environmental Sciences Lab

Laboratory analysis of environmental principles, resources, and problems. Application of scientific and social principles to solving current environmental problems. This course is the lab for EVS 195.

Credit Hours: 1

Prerequisite or Corequisite Courses: EVS 195
Additional Restrictions/Requirements: EVSL 195 may be taken in the same semester as EVS 195 or in a semester subsequent to EVS 195.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 295 - Career Preparation and Networking in EVS

Research and career preparation and networking course required for EVS majors. Engagement with professionals in the EVS field while building research skills and portfolio for career preparation.

Prerequisite Courses: EVS 195 or EVS 205
Additional Restrictions/Requirements: Cannot be taken concurrently with EVS 495. Cannot be taken after student receives credit for EVS 495. Not available to OAP enrolled students.
Course Repeatability: Course may not be repeated.

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches

to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

MAT 150 - Basic Precalculus

Study of fundamental concepts of algebra, functions using graphical and algebraic approaches, and applications that are essential to the study of basic calculus. Covers linear, quadratic, polynomial, rational, radical, piecewise, composite, inverse, exponential, and logarithmic functions. Preparatory course for basic calculus, MAT 151.

Credit Hours: 3

Additional Restrictions/Requirements: No credit granted for MAT 150 after the completion of a MAT course numbered 151 or higher with a grade of C- or better.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

or

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 393 - Writing in the Scientific Disciplines

Rigorous introduction to writing for academic science contexts. Critically examines the current state of academic science writing and explores the multiple practical strategies scientists use to communicate in professional settings.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

or

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

or

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic

perspective. Specific focus will be given to methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

or

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221

Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

EVS 360 - Human Dimensions of Natural Resource Management

Examines the interrelationships between the biological sciences, physical sciences, and social sciences within the human dimensions of natural resource management framework in the context of current environmental issues. Uses contemporary management processes to solve real-world environmental problems.

Credit Hours: 3

Prerequisite Courses: EVS 195
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 495 - Seminar in Environmental Sciences

Individual reports and group discussions of the results of student field, laboratory, or library research on selected topics in environmental planning and policies.

Credit Hours: 0 to 3

Prerequisite Courses: EVS 195 and ENG 393.

Additional Restrictions/Requirements: Senior standing. In addition, all students require consent of instructor, who provides an override for the lecture portion of the course and a separate override for the lab portion of the course. Students must take both the lecture and the lab concurrently.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction EVS**Minor Restriction** EVS
Applied Learning Requirement:

EVS 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in the catalogue.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor and department chair.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

or

EVS 497 - Practicum in Environmental Sciences

Advanced field placement experience in governmental, corporate, NGO or other setting in the environmental field. Provides extended opportunity for fieldwork, research, and creative projects. Relates theory to practical application in the field. 40 hours of field work for each credit hour. Additional liability insurance expense may be necessary.

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Declared major in EVS, 2.00 GPA overall, and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

or

EVS 499 - Honors Work in Environmental Sciences

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

or

HON 499 - Interdisciplinary Honors Work

Independent work for honors students that emphasizes interdisciplinary study.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Ecological Restoration and Management Option

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

(Note: The BIO 20x and BIOL 20x course not taken to fulfill the core requirement.)

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 363 - Coral Reef Ecology

Ecology and physiology of coral reef organisms, emphasizing processes that contribute to the function and complexity of coral reef ecosystems. Reef information and geology, coral biology and physiology, ecological interactions, human effects, global effects, and conversation will be considered. The lab for this course is BIOL 363.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

or

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

or

EVS 489 - Wetlands Ecology and Management

Introduction to principles of wetland science emphasizing identification and management. Examination of biological, physical, chemical, and ecological aspects of wetland ecosystems at local, landscape, and global scales, with a focus on

classification and legal protection of wetlands in North Carolina. Experience in techniques for identification and delineation of wetland ecosystems.

Credit Hours: 4

Prerequisite Courses: EVS 195 and BIO 366, or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 469 - Restoration Ecology

Study of the ecological processes that underlie the restoration of natural communities in ecosystems. Examination of all aspects of restoration work, including planning and monitoring. Consideration of a variety of disturbance types, including agricultural, natural resource extraction, waste management, urbanization, and tourism. Off campus field trips required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: BIO 366.

Additional Restrictions/Requirements: Junior status or higher.
Course Repeatability: Course may not be repeated.

EVS 400 - Wildlife Management

Introductory principals of wildlife management spanning management perspectives, managing landscapes for wildlife, and managing wildlife populations.

Credit Hours: 3

Prerequisite Courses: EVS 195, BIO 366.
Course Repeatability: Course may not be repeated.

or

EVS 433 - Tree and Forest Measurement

Study of forest mensuration including skills needed to take accurate forest measurements using essential forestry tools. Topics include foundations of forestry; forest ecology; essential tree and forest measurements such as tree age, height, and basal area; and key forestry topics such as tree regeneration, prescribed fire, and forest understory. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 444 - Wildland Fire Behavior and Fuels

Introduction to wildland fire behavior. Topics include fuels, weather, and topography and how these factors shape fire behavior and fire management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 450 - Avian Conservation and Management

Exploration of the primary threats to North American bird populations, the ecological mechanisms that influence avian populations, and management solutions

that can enhance the conservation of avifauna.

Credit Hours: 3

Prerequisite Courses: EVS 195.
Additional Restrictions/Requirements: Junior or Senior status.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

or

EVS 452 - Offshore Energy & Resource Management

Introduction to the fundamental concepts behind offshore energy and resource management. Examination of a range of marine resources, including offshore oil and gas; wave, wind and tidal energy; and marine minerals. Discussion of the historical evolution, technological developments, challenges and potential impacts of each offshore resource. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

or

EVS 483 - Fisheries Policy and Management

Overview of fisheries policy and management. Considers important international, national, and

regional fisheries, with extended consideration of North Carolina fisheries. Reviews fisheries management agencies, policies, data sources, trends and issues. Examines common biological fishery models, fishing methods and gear, and fishery regulations. Explores methods for assessing the economic impacts of fishing and the recreational value of fishing.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

EVS 484 - Agriculture and the Environment

Interdisciplinary exploration of the impacts of crop and animal agriculture on terrestrial, aquatic, and marine environments. Topics include natural habitat impacts, sediment transport, nutrient runoff, land conversion, and concentrated feeding operations. Emphasis on building student communication skills and competency in critical analysis of current environmental issues.

Credit Hours: 3

Prerequisite Courses: EVS 195.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

EVS 410 - Environmental Modeling

Overview of environmental modeling as used in practice. Consideration of selected abiotic and biotic models with applications to bacteria, plankton, fish, plants, trees, amphibians, reptiles, birds, and mammals. Hands-on ecological modeling with spreadsheet software.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

EVS 422 - Marine Environmental Survey Techniques

Introduction to the fundamentals of environmental marine survey techniques for conservation and management purposes. Use of bathymetric, acoustic imaging, underwater video and seabed sampling techniques to collect, process, export and characterize

data related to a range of marine environments in coastal North Carolina.Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321
Additional Restrictions/Requirements: Junior/Senior standing required, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 441 - Advanced Environmental Field Methods

Survey of methods, techniques, and tools used to gather and analyze data in environmental fieldwork with application to environmental issues and management. Field trips required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

EVS 455 - Geospatial Analysis for Coastal Management

Examination of coastal issues and management using a problem-based GIS approach. Topics include developing a GIS, managing data acquired from different sources, creating new data, describing data, and generating desired outputs. Student projects utilize various GIS programs, extensions and equipment. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321, or instructor approval.
Course Repeatability: Course may not be repeated.

or

EVS 456 - Land Survey Technology for Natural Resource Management

Introduction to the operation and application of land survey technology for natural resource management. Consideration of equipment operation, best practices in natural resource surveys, project planning, and data

analysis. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 2

Prerequisite Courses: GGY 321, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 477 - Environmental Site Assessment

Study of ASTM guidelines for environmental site assessment, emphasis on historic overview, regulations, and preparation methods associated with environmental site assessment. Lecture and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 414 - Wildland Fire Ecology

This course examines abiotic and biotic adaptations and effects of fire. Prescribed fire restoration and management will also be discussed in addition to new challenges that are emerging from climate change, fire suppression, and growing populations in areas where wildland fires occur.

Credit Hours: 3

Prerequisite Courses: EVS 195, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

BIO 489 - Benthic Ecology

The scientific study of the organisms and processes that structure coastal benthic communities. Benthic communities encompass the vast seafloor areas of estuaries and oceans and support aquatic communities, fisheries, larger species of interest, and critical ecosystem processes.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, BIO 366.
Course Repeatability: Course may not be repeated.

EVS 445 - Environmental Conservation

A scientific exploration of conservation theories and practices to understand the challenges of protecting, maintaining, and restoring biological diversity to Earth's many environs.

Credit Hours: 3

Prerequisite Courses: EVS 195, EVSL 195, BIO 366, BIOL 366.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

EVS 474 - Wildland Fire Management

Study of wildland fire management. Focus on the suppression of wild fires and the use of controlled burning as a natural resource management tool. Participation in practical field training including controlled burns. Participants must meet physical fitness guidelines. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

Choose two (may not select both GLY 226 and GGY 235):

GLY 226 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3) surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120
Crosslisting: GGY 235
Course Repeatability: Course may not be repeated.

or

GGY 235 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3) surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120
Crosslisting: GLY 226
Course Repeatability: Course may not be repeated.

or

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

or

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

or

GGY 437 - Soils in the Earth Sciences

Pedogenic processes, morphology, classification, and geographic distribution of soils. Lab includes field description of soil profiles and laboratory analysis of soil samples. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GGY 130 or GLY 101 or GLY 201 or EVS 195.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive

Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

Option Total: 38 Credit Hours

Wildlife Management Option

(Note: The BIO 20x and BIOL 20x course not taken to fulfill the core requirement.)

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building

Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is

BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 315 - Comparative Vertebrate Anatomy

Comparative morphology and phylogenetic interrelationships of vertebrate animals; representative

organisms dissected in laboratory.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 354 - Herpetology

Study of reptiles and amphibians with emphasis on their evolution, physiology, ecology, behavior, and conservation. Laboratory focuses on species identification and field techniques for studying

herpetofauna. Several field trips to local areas.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

or

BIO 452 - Mammalogy

Study of mammals, emphasizing their evolution, taxonomic relationships, structural and physiological adaption, and life histories.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

or

BIO 456 - Ornithology

An introduction to avian biology with an emphasis on the evolution, classification, physiology, ecology, natural history, and conservation of birds. The lab for this course is BIOL 456.

Credit Hours: 3

Corequisite Courses: BIOL 456
Prerequisite Courses: BIO 201, BIO 202, and BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 475 - Plant Systematics

An introduction to identification, classification, and nomenclature of vascular plants with emphasis on the flora of southeastern North Carolina.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

COM 101 - Public Speaking

Preparation and delivery of public presentations, with emphasis on creativity, reasoning, evidence, organization, and delivery. Course content will also be applied to analysis of speeches by self and others.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

EVS 321 - Analyzing and Communicating Environmental Issues

Studies how current environmental issues are discussed, communicated, and presented to a broad range of audiences. Students research current environmental topics and make presentations, which are peer-reviewed and critiqued.

Credit Hours: 3

Prerequisite Courses: EVS 195 or EVS 205.
Course Repeatability: Course may not be repeated.

EVS 400 - Wildlife Management

Introductory principals of wildlife management spanning management perspectives, managing landscapes for wildlife, and managing wildlife populations.

Credit Hours: 3

Prerequisite Courses: EVS 195, BIO 366.
Course Repeatability: Course may not be repeated.

EVS 440 - Wildlife Field Methods for Conservation

A hands-on course in the tools and techniques of wildlife field methods. Focusing on amphibians, reptiles, birds, and mammals, students learn basic applied wildlife methods employed by conservation and management agencies. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 4

Corequisite Courses: EVS 195, and STT 215 or GGY 222, or permission of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 8 **Repeat Limit:** 1

EVS 445 - Environmental Conservation

A scientific exploration of conservation theories and practices to understand the challenges of protecting, maintaining, and restoring biological diversity to Earth's many environs.

Credit Hours: 3

Prerequisite Courses: EVS 195, EVSL 195, BIO 366, BIOL 366.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

Option Total: 43 Credit Hours

Wetlands Management Option

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

(Note: The BIO 20x and BIOL 20x course not taken to fulfill the core requirement.)

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches

to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

EVS 422 - Marine Environmental Survey Techniques

Introduction to the fundamentals of environmental marine survey techniques for conservation and management purposes. Use of bathymetric, acoustic

imaging, underwater video and seabed sampling techniques to collect, process, export and characterize data related to a range of marine environments in coastal North Carolina.Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321
Additional Restrictions/Requirements: Junior/Senior standing required, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 477 - Environmental Site Assessment

Study of ASTM guidelines for environmental site assessment, emphasis on historic overview, regulations, and preparation methods associated with environmental site assessment. Lecture and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or

senior standing or consent of the instructor.
Course Repeatability: Course may not be repeated.

or

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EVS 445 - Environmental Conservation

A scientific exploration of conservation theories and practices to understand the challenges of protecting,

maintaining, and restoring biological diversity to Earth's many environs.

Credit Hours: 3

Prerequisite Courses: EVS 195, EVSL 195, BIO 366, BIOL 366.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

EVS 455 - Geospatial Analysis for Coastal Management

Examination of coastal issues and management using a problem-based GIS approach. Topics include developing a GIS, managing data acquired from different sources, creating new data, describing data, and generating desired outputs. Student projects utilize various GIS programs, extensions and equipment. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321, or instructor approval.
Course Repeatability: Course may not be repeated.

EVS 489 - Wetlands Ecology and Management

Introduction to principles of wetland science emphasizing identification and management. Examination of biological, physical, chemical, and ecological aspects of wetland ecosystems at local, landscape, and global scales, with a focus on classification and legal protection of wetlands in North

Carolina. Experience in techniques for identification and delineation of wetland ecosystems.

Credit Hours: 4

Prerequisite Courses: EVS 195 and BIO 366, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Choose 3 from (may not select both GLY 226 and GGY 235):

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

or

GLY 226 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3)

surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120
Crosslisting: GGY 235
Course Repeatability: Course may not be repeated.

or

GGY 235 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3) surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY

120
Crosslisting: GLY 226
Course Repeatability: Course may not be repeated.

or

BIO 387 - Biological Impacts of Coastal Management

Overview of the impacts of coastal management efforts on species of concern and broader ecosystem dynamics. Exploration of how coastal activities and coastal management related to fisheries, aquaculture, shoreline processes, and water quality may directly and indirectly impact coastal ecosystem composition and resiliency, populations of endangered species, and broader connections with the ocean foods webs.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202.
Additional Restrictions/Requirements: Junior or senior standing or consent of instructors
Course Repeatability: Course may not be repeated.

or

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

or

OCN 451 - Coastal Wetlands

Analysis of types of coastal wetlands and their evolution. Discussion of physical, chemical, geological, and biological processes controlling development and maintenance of these systems in response to natural and anthropogenic forcing factors.

Credit Hours: 3

Prerequisite Courses: OCN 350
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone hydrodynamics, storm surge, tides, estuarine hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

Choose two from:

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

or

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

or

GGY 437 - Soils in the Earth Sciences

Pedogenic processes, morphology, classification, and geographic distribution of soils. Lab includes field

description of soil profiles and laboratory analysis of soil samples. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GGY 130 or GLY 101 or GLY 201 or EVS 195.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Option Total: 38 Credit Hours

Environmental Education Option

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

(Note: The BIO 20x and BIOL 20x course not taken to fulfill the core requirement.)

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

EVS 424 - Environmental Nonprofit Organizations

Introduction to the unique issues facing environmental nonprofit organizations when addressing wicked problems in conservation, sustainability, and environment. Practical application and examination of real-world case studies provides a foundation to examine best practices in outreach, education, systems

thinking, and adaptive management from local and global frameworks in environmental nonprofit organizations.

Credit Hours: 3

Additional Restrictions/Requirements: Junior/Senior standing required or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 428 - Environmental Interpretation in Protected Areas

Exploration of key concepts related to environmental interpretation in terrestrial and marine protected areas. Focus on, and experience in, the development and implementation of environmental interpretive materials (e.g., brochures, signage, exhibits) and activities (e.g., talks, guided tours, field trips). Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

EVS 441 - Advanced Environmental Field Methods

Survey of methods, techniques, and tools used to gather and analyze data in environmental fieldwork with application to environmental issues and management. Field trips required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 363 - Foundations of Environmental Education

Exploration of environmental education in a wide array of contexts and with diverse audiences. Topics include how to apply relevant theory, prior environmental education research, and key concepts to enhance diverse environmental education programs (e.g., urban, rural, in-person, online, single-day, residential).

Credit Hours: 3

Prerequisite Courses: EVS 195
Course Repeatability: Course may not be repeated.

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 427 - Research and Evaluation in Environmental Education

Exploration of the practical skills necessary to conduct program evaluation and research and the importance of these efforts in the environmental education field.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 465 - Education for Sustainable Development

Study of educational strategies and methods for implementing priority action areas of sustainable development goals. Focus on sustainable development education as practiced in the field in different countries under varying circumstances using a case study approach. Evaluation of the relative success of alternative teaching methods related to sustainable development across locations and cultures.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Option Electives: 12 credits total from list below, 9 of which must be at the 300-400 level. Maximum of 5 credits allowed from EVS 491, EVS 497, EVS 499 or HON 499. Credits taken to fulfill other parts of the degree may not double count here.

Any EVS 200-499

Any course numbered 300-499 from BIO, CHM, GGY, GLY, OCN, PHY
MAT 151, 112, 152, 161, 162, 335, 361
STT 305, 350, 411, 412
ANT 206, 309, 329
CHHS 350
COM 211, 212, 220, 256, 257, 265, 313, 344, 346
EDN 301, 302, 304, 320, 336, 338, 426, 460
ENG 313, 318, 376
INT 314
LED 211, 311
MGT 351, 358, 452
OCN 250
PLS 350, 361, 362, 434
PSY 217, 220, 221
REC 359, 372, 451
SED 351, 352
SOC 240, 250, 303, 347, 350

Option Total: 40 Credit Hours

Sustainability Option

a. Foundations (6 credits)

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

b. People (6 credits)

EVS 465 - Education for Sustainable Development

Study of educational strategies and methods for implementing priority action areas of sustainable development goals. Focus on sustainable development education as practiced in the field in different countries under varying circumstances using a case study approach. Evaluation of the relative success of alternative teaching methods related to sustainable development across locations and cultures.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 468 - Hazards, Risks, and Community Resilience

Overview of natural hazards and disasters, focusing on their social, economic and environmental impacts and the complex and interconnected systems affected by environmental and social change. This course also provides an exploration into alternative and sustainable ways to view, study, and manage hazards in the U.S, as well as disaster-resilient communities, higher environmental quality, inter- and intra-generational equality, economic sustainability, and improved quality of life.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

c. Planet (6 credits)

EVS 484 - Agriculture and the Environment

Interdisciplinary exploration of the impacts of crop and animal agriculture on terrestrial, aquatic, and marine environments. Topics include natural habitat impacts, sediment transport, nutrient runoff, land conversion, and concentrated feeding operations. Emphasis on

building student communication skills and competency in critical analysis of current environmental issues.

Credit Hours: 3

Prerequisite Courses: EVS 195.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

and

EVS 441 - Advanced Environmental Field Methods

Survey of methods, techniques, and tools used to gather and analyze data in environmental fieldwork with application to environmental issues and management. Field trips required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

EVS 422 - Marine Environmental Survey Techniques

Introduction to the fundamentals of environmental marine survey techniques for conservation and management purposes. Use of bathymetric, acoustic imaging, underwater video and seabed sampling techniques to collect, process, export and characterize data related to a range of marine environments in coastal North Carolina.Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321
Additional Restrictions/Requirements: Junior/Senior standing required, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 433 - Tree and Forest Measurement

Study of forest mensuration including skills needed to take accurate forest measurements using essential forestry tools. Topics include foundations of forestry; forest ecology; essential tree and forest measurements

such as tree age, height, and basal area; and key forestry topics such as tree regeneration, prescribed fire, and forest understory. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

EVS 456 - Land Survey Technology for Natural Resource Management

Introduction to the operation and application of land survey technology for natural resource management. Consideration of equipment operation, best practices in natural resource surveys, project planning, and data analysis. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 2

Prerequisite Courses: GGY 321, or permission of

instructor.
Course Repeatability: Course may not be repeated.

d. Economy (6 credits)

EVS 466 - Sustainable Tourism

Introduction to concepts and principles of sustainable tourism development, emphasizing implications for management and planning. Cases from the U.S. and around the world are used to examine and discuss issues and practices of sustainable tourism development within different geocultural contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

or

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their

productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

and

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

or

INT 363 - Global Political Economy

Explores the dynamic ways in which markets, states, and societies interact with one another, within a context of increasing global economic, political, and cultural interdependence. The course combines a focus on Global Political Economy's main theoretical approaches with the analysis of stringent issues triggered by the expansion and intensification of economic, political, and cultural life at a global level.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

PLS 327 - Science, Technology, and Innovation Policy

Contemporary issues in the study and critique of science, technology and innovation policy including an

overview of dynamics at the interface of science, politics and policy. Topic examples include: public and private spending on research and development (R&D), responsible innovation, governing artificial intelligence, science advice, integrity in science, evidence-based decision making, ethics in intellectual property.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or Senior standing.
Course Repeatability: Course may not be repeated.

or

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

or

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health, nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing

Intensive

Course Repeatability: Course may not be repeated.

Option Electives: 15 credits total, 12 of which must be at the 300-400 level. Maximum of 5 credits allowed from EVS 491, EVS 497, EVS 499 or HON 499. Credits taken to fulfill other parts of the degree may not double count here.

Option Total: 39 Credit Hours

Cross-Disciplinary Option

a. 21 credits in EVS 200-499 not fulfilling other parts of the degree. Maximum of 5 credits from EVS 491, EVS 497, EVS 499, HON 499.

b. 18 additional credits consistent with the career goals of the student. Students are encouraged to select courses leading to a minor or double-major to complement the EVS B.S. degree.

Option Total: 39 Credit Hours

Total Credit Hours: 80-85

Exercise Science, B.S.

Program Coordinator: Alex McDaniel, DHSc, LAT, CSCS I Program Coordinator & Associate Professor

(Exercise Science, B.S. Details I UNCW)

The Exercise Science program is a competency-driven curriculum for students who are interested in applying the scientific principles of exercise, fitness, health and wellness within the clinical, government, corporate, industrial, private, commercial and academic venues. Exercise Science students must complete the exercise science core courses and then, choose one of two concentrations: The Allied Health concentration or The Exercise Physiology Certification concentration. The Allied Health concentration provides a platform leading to careers such as, but not limited to, physical therapy, physician assistant, occupational therapy and clinical exercise physiology. The Exercise Physiology Certification concentration, when combined with nationally-recognized certifications, leads to careers such as, but not limited to, personal training, strength and conditioning specialist, commercial/corporate employee fitness director and exercise physiologist.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.S. degree in Exercise Science a student must successfully complete EXS 310.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.S. degree in Exercise Science a student must successfully complete EXS 497.

Requirements for a Major in Exercise Science for the B.S. Degree:

Prerequisites: Exercise Physiology Certification Concentration

Students wishing to declare a major in Exercise Science with the Exercise Physiology Certification Concentration must:

- Complete a minimum of 24 semester hours;
- Achieve a cumulative UNCW GPA of 2.70 or better (transfer students should consult with an EXS advisor);
- Attain a minimum grade of "C" in each of the following courses:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXS 210 - Introduction to Exercise Science

This foundational course is designed to introduce students to the field of exercise science by providing a curriculum overview, explanation of the sub-disciplines, professional organizations and certifications, and potential careers in the field of Exercise Science and related allied-health professions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MAT 150 - Basic Precalculus

Study of fundamental concepts of algebra, functions using graphical and algebraic approaches, and applications that are essential to the study of basic calculus. Covers linear, quadratic, polynomial, rational, radical, piecewise, composite, inverse, exponential, and logarithmic functions. Preparatory course for basic calculus, MAT 151.

Credit Hours: 3

Additional Restrictions/Requirements: No credit granted for MAT 150 after the completion of a MAT course numbered 151 or higher with a grade of C- or better.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Prerequisites: Allied Health Concentration

Students wishing to declare a major in Exercise Science with the Allied Health Concentration must:

- Complete a minimum of 24 semester hours;
- Achieve a cumulative UNCW GPA of 3.0 or better (transfer students should consult with an EXS advisor);
- Attain a minimum grade of "C" in the following courses:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXS 210 - Introduction to Exercise Science

This foundational course is designed to introduce students to the field of exercise science by providing a curriculum overview, explanation of the sub-disciplines, professional organizations and certifications, and potential careers in the field of Exercise Science and related allied-health professions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MAT 150 - Basic Precalculus

Study of fundamental concepts of algebra, functions using graphical and algebraic approaches, and applications that are essential to the study of basic calculus. Covers linear, quadratic, polynomial, rational, radical, piecewise, composite, inverse, exponential, and logarithmic functions. Preparatory course for basic calculus, MAT 151.

Credit Hours: 3

Additional Restrictions/Requirements: No credit

granted for MAT 150 after the completion of a MAT course numbered 151 or higher with a grade of C- or better.

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning

Course Repeatability: Course may not be repeated.

Once admitted to the Exercise Science program, students are required to complete the Exercise Science Core Requirements and one of the Exercise Science Concentrations. The specific requirements are listed below.

Exercise Science Core Requirements (31 credits):

Complete one of the following sequences:

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXSL 216 - Human Anatomy and Physiology I Laboratory

EXSL 216 is the study of the anatomical and functional characteristics of the human body including the skeletal, muscular, circulatory, and respiratory systems with emphasis on health and physical activity.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 216.
Course Repeatability: Course may not be repeated.

EXS 217 - Human Anatomy and Physiology II

Examines six major organ systems that include the human nervous, endocrine, immune, digestive, urinary and reproductive systems as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 217
Prerequisite Courses: EXS 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXSL 217 - Human Anatomy and Physiology II Laboratory

EXSL 217 provides the laboratory experience for EXS 217 via examining the anatomy and physiology of the nervous, endocrine, immune, digestive, urinary and reproductive systems including the special senses and metabolism.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 217.
Course Repeatability: Course may not be repeated.

OR

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

Complete all of the following courses:

EXS 310 - Research Methods in Exercise Science

Methods of research in the field of exercise science. Identification of research problems, sampling methods, data analysis and interpretation, and planning of evaluation studies.

Credit Hours: 3

Prerequisite Courses: EXS 210 with a "C" or better or RSP 324
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

OR

CHHS 411 - Research & Evaluation Methods in Human Services

This course introduces research design and analysis necessary to examine, apply, and utilize science in interdisciplinary human service settings. Course content includes an overview of current issues in knowledge development including the process of research utilization and evidence based practice. The student will conduct analytic critiques of the research literature for scientific merit, synthesize these critiques for application to practice, and develop strategies for providing leadership to make evidence based practice a reality in current and future work settings.

Credit Hours: 3

Prerequisite or Corequisite Courses: SWK 496 with a C or better
Prerequisite Courses: (SWK 321 with a C or better and SWK 496 with a C or better), or EXS 210

with a C or better, or RTH 380 with a C or better, or RSP 300 with a C or better.
Additional Restrictions/Requirements: All prerequisite courses must have a minimum grade of "C" or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may not be repeated.

EXS 320 - Exercise Physiology

This course is designed to enhance knowledge with respect to the physiological considerations and associated mechanisms related to physical activity, exercise, and performance.

Credit Hours: 3

Corequisite Courses: EXSL 320.
Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), (EXS 216 with a "C" or

better and EXSL 216 with a "C" or better) or (BIO 240 with a "C" or better and BIOL 240 with a "C" or better) and (EXS 310 with a "C" or better or CHHS 411 with a "C" or better).
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXSL 320 - Exercise Physiology Laboratory

Laboratory is designed to relate theoretical knowledge attained wihtin EXS 320 into application. Students will experience the skill-related learning outcomes that parallel the American College of Sports Medicine (ACSM) Job Task Analysis (JTA).

Credit Hours: 1

Corequisite Courses: EXS 320
Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or

better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better)
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 1

EXS 321 - Biomechanics

Neuromuscular and mechanical principles of human movement with emphasis on movement analysis most often encountered in fitness activities and sport skills.

Credit Hours: 3

Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), (EXS 216 with a "C" or better and EXSL 216 with a "C" or better) or (BIO 240 with a "C" or better and BIOL 240 with a "C" or better)

and (EXS 310 with a "C" or better OR CHHS 411 with a "C" or better).
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission by instructor at the time the course begins.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 322 - Sports Nutrition

Relationship of exercise, physical activity, and performance to human nutrition. In-depth information on human energy systems, weight management, macronutrients, micronutrients, and ergogenic aids.

Credit Hours: 3

Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), EXS 310 with a "C" or better or CHHS 411 with a "C" or better.
Additional Restrictions/Requirements: Restricted to

Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 411 - Exercise Prescription I

Concepts of health related physical fitness with emphasis on the design of an individualized exercise program for all ages within an apparently healthy population.

Credit Hours: 3

Corequisite Courses: EXSL 411
Prerequisite Courses: EXS 320 with a "C" or better and EXSL 320 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) or permission of instructor. Must have minimum cumulative GPA of 2.70.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXSL 411 - Exercise Prescription I Laboratory

Concepts of health related physical fitness with emphasis on screening, fitness assessment and the design of an individualized exercise program for all ages within an apparently healthy population.

Credit Hours: 1

Corequisite Courses: EXS 411
Additional Restrictions/Requirements: Restricted to Exercise Science majors only or permission of instructor.

Course Repeatability: Course may not be repeated.

EXS 412 - Facilitating Behavior Change

Study of behavioral principles as they relate to exercise participants, the exercise environment and adherence to a physically active lifestyle. Emphasis on practical application of behavior modification strategies related to exercise adherence.

Credit Hours: 3

Prerequisite Courses: EXS 320 with a "C" or better

and EXSL 320 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors or permission of instructor.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 497 - Advanced Field Experience in Exercise Science

Minimum of 90 hours of supervised applied learning experience in an exercise science-related agency or organization to better understand the depth and breadth of career opportunities in the industry, and to apply academic coursework to meet personal and professional goals.

Credit Hours: 3

Prerequisite Courses: EXS 411 with a "C" or better and EXSL 411 with a "C" or better.
Additional Restrictions/Requirements: Restricted to

Exercise Science (EXS) majors only or permission of instructor.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Exercise Science Concentrations (22 Credits)

In addition to the Exercise Science Core Requirements, students are required to complete one of the following Exercise Science Concentrations listed below: 1) Exercise Physiology Certification Concentration or 2) Allied Health Concentration.

Exercise Physiology Certification Concentration

Complete all of the following courses:

EXS 313 - Measurement and Evaluation in Exercise Science

Application of measurment and evaluation theories, concepts, and practices to the planning and administration of effective physical activity programs; includes basic statistical techniques and interpretation of data.

Credit Hours: 3

Prerequisite Courses: EXS 210 with a "C" or better.
Course Repeatability: Course may not be repeated.

EXS 314 - Entrepreneurship, Leadership, and Legal Concepts in the Health and Fitness Industry

Introduction to legal aspects of amateur sport and physical activity emphasizing knowledge required of the exercise science and sport professional. Focus upon current terminology, legal procedures and operations, and case studies. Furthermore, this course will focus upon managerial theories and its applications in exercisescience and allied-health organizations. Specific topics include organizational theories, communication, leadership, motivation, managerial skills, functions of management, issues of policies, marketing, and financial aspects of management.

Credit Hours: 3

Prerequisite Courses: EXS 210.
Course Repeatability: Course may not be repeated.

EXS 410 - Essentials of Strength Training and Conditioning I

This course is a comprehensive overview of the scientific foundations of strength and conditioning. Emphasis will be placed on the exercise sciences, including anatomy, exercise physiology, biomechanics, nutrition, and the psychology of performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite: EXS 320 with a "C" or better and EXSL 320 with a "C" or better. Prerequisite or corequisite: EXS 321.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 420 - Essentials of Strength Training and Conditioning II

This course is designed to provide an in-depth overview of the practical/applied principles of strength and conditioning. Emphasis is placed on applying knowledge of testing and evaluation, exercise techniques, organization and administration and program design.

Credit Hours: 3

Corequisite Courses: EXSL 420
Prerequisite Courses: EXS 410 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXSL 420 - Essentials of Strength Training and Conditioning II Laboratory

Course is a comprehensive overview of the practical/applied principles of strength and conditioning. Emphasis is placed on developing skills in fitness testing, exercise technique, organization and administration, and program design. Two laboratory

hours each week.

Credit Hours: 1

Corequisite Courses: EXS 420
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.

EXS 421 - Exercise Prescription II

Emphasis on the design of safe and appropriate individualized exercise programs for persons of all ages with acute and chronic health-related conditions. The topics include benefits and risks, screening, pre-exercise evaluations, fitness testing, and exercise prescription.

Credit Hours: 3

Prerequisite Courses: EXS 411 with a "C" or better and EXSL 411 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of

instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

HFE 350 - Motor Behavior

Motor skill acquisition, control, and performance. Physiological and psychological principles of human growth and development. Includes analysis of the sequential progression of fundamental motor skills from infancy through adulthood with primary focus on school-age children.

Credit Hours: 3

Prerequisite Courses: (BIO 240 with a C- or better and BIOL 240 with a C- or better) or (EXS 216 with a C- or better and EXSL 216 with a C- or better).
Course Repeatability: Course may not be repeated.

Select a minimum of three credits from the following:

ATR 220 - Functional and Structural Kinesiology

Prerequisite: BIO 201; Corequisites: BIO 240, BIOL 240 and BIO 241, BIOL 241 or EXS 216, EXSL 216 and EXS 217. This course is designed to provide students with a foundation of structural anatomy and basic kinesiology concepts, with a focus on anatomy of the skelton, muscles, and ligaments in relation to functional human movement.

Credit Hours: 3

Corequisite Courses: BIO 240 and BIOL 240 and BIO 241 and BIOL 241 and EXS 216 and EXSL 216 and EXS 217
Prerequisite Courses: BIO 201
Course Repeatability: Course may not be repeated.

ATR 470 - Medical Terminology for Health Professions

The course is designed for students to build a foundational understanding of medical terminology with appropriate application to pathological conditions of the various body systems. Focus on preparing students to use appropriate medical documentation skills consistent with today's allied health care professions.

Credit Hours: 3

Prerequisite Courses: EXS 216 or BIO 240.
Course Repeatability: Course may not be repeated

CHHS 350 - Leadership Skills for Adventure Exercise

This course is a 3-credit hour course designed to provide skills necessary for wilderness travel and outdoor adventure. It will emphasize effective leadership for adventure programming, knowledge of backpacking skills, wilderness and remote first aid, proper physical conditioning, route finding, equipment selection, and an understanding and respect for the environment. This course incorporates lecture sessions followed by an adventure trip, where students can apply course principals and skills. Specifically, we will meet face-to-face for 3 hours weekly over the final 10 weeks of school, experience a 4-day adventure trip over (add specific dates each semester here), and then reflect on the adventure experience upon our return (via online assignment).

Credit Hours: 3

Additional Restrictions/Requirements: This course will require participation in vigorous physical activity (i.e. over ground walking while wearing a backpack equivalent to about 30% of your body weight). Students must complete a Physical Activity Readiness Questionnaire (PAR-Q) on the first day of class. If deemed necessary, students must follow up and get approval to participate in the course from a medical doctor.
Course Repeatability: Course may be repeated.

EXS 200 - Suspension Training System

This foundational course will provide students with fundamental knowledge, technique, and application of the suspension training system. This course will also introduce progressive applications of the suspension training system, specifically, proprioceptive and balance training, relation components to rehabilitiation, and sports specificity.

Credit Hours: 2

Course Repeatability: Course may not be repeated.

EXS 201 - Principles and Application of Group Exercise Instruction

This course is designed to provide theoretical knowledge and practical skills in preparation for group exercise instruction and sitting for a national certification exam in group fitness instruction. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the instructor–participant relationship, principles of motivation to encourage adherence in the group fitness setting, effective instructor-to-participant communication techniques, methods for enhancing group leadership, and the group fitness instructor's (GFI's) professional role.

Course Repeatability: Course may not be repeated.

EXS 292 - Trial Course

EXS 331 - Applied Biomechanics in Strength and Conditioning

Neuromuscular and mechanical principles of human movement with emphasis on movement analysis related to strength and conditioning.

Credit Hours: 3

Prerequisite or Corequisite Courses: EXS 321.
Prerequisite Courses: EXS 310.
Course Repeatability: Course may not be repeated.
Major Restriction Exercise Science

EXS 440 - Selected Topics Exercise Science

Selected topics in exercise science, including exercise prescription and program planning for pediatric, adolescent, adult, and elderly populations.

Credit Hours: 3

Prerequisite Courses: EXS 320 and EXS 313
Additional Restrictions/Requirements: Senior standing.
Course Repeatability: Course may not be repeated.

EXS 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in the catalogue.

Credit Hours: 1 to 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.7, and consent of instructor, director and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

EXS 494 - Exercise Science Study Abroad II

This course provides Exercise Science advanced undergraduate study abroad opportunities.

Credit Hours: 1 to 6

Additional Restrictions/Requirements: Instructor approval
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.

HFE 345 - Childhood Obesity

Focuses on the methods used in the assessment, prevention and treatment of childhood obesity. In addition, this course will examine the etiology of obesity and the role that human behaviors and an active lifestyle play in the overall health and well-being of children.

Credit Hours: 3

University Studies: Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

WPA 210 - Plant-Based Living for Wellness

This course is designed to explore plant-based living including if plant-based diets may offset the world's population growth and environmental concerns related to factory farms and climate change, the role of plant-based lifestyles, physical activity, and stress management in chronic disease prevention, reviewing scientific literature regarding plant-based living, and the principles of planning a healthful whole food plant-based meal plan.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Allied Health Concentration

Select a minimum of 6 credits from the following:

CHHS 350 - Leadership Skills for Adventure Exercise

This course is a 3-credit hour course designed to provide skills necessary for wilderness travel and outdoor adventure. It will emphasize effective leadership for adventure programming, knowledge of backpacking skills, wilderness and remote first aid, proper physical conditioning, route finding, equipment selection, and an understanding and respect for the environment. This course incorporates lecture sessions followed by an adventure trip, where students can apply course principals and skills. Specifically, we will meet face-to-face for 3 hours weekly over the final 10 weeks of school, experience a 4-day adventure trip over (add specific dates each semester here), and then reflect on the adventure experience upon our return

(via online assignment).

Credit Hours: 3

Additional Restrictions/Requirements: This course will require participation in vigorous physical activity (i.e. over ground walking while wearing a backpack equivalent to about 30% of your body weight). Students must complete a Physical Activity Readiness Questionnaire (PAR-Q) on the first day of class. If deemed necessary, students must follow up and get approval to participate in the course from a medical doctor.
Course Repeatability: Course may be repeated.

EXS 292 - Trial Course

EXS 314 - Entrepreneurship, Leadership, and Legal Concepts in the Health and Fitness Industry

Introduction to legal aspects of amateur sport and physical activity emphasizing knowledge required of the exercise science and sport professional. Focus upon current terminology, legal procedures and operations, and case studies. Furthermore, this course will focus

upon managerial theories and its applications in exercisescience and allied-health organizations. Specific topics include organizational theories, communication, leadership, motivation, managerial skills, functions of management, issues of policies, marketing, and financial aspects of management.

Credit Hours: 3

Prerequisite Courses: EXS 210.
Course Repeatability: Course may not be repeated.

EXS 313 - Measurement and Evaluation in Exercise Science

Application of measurment and evaluation theories, concepts, and practices to the planning and administration of effective physical activity programs; includes basic statistical techniques and interpretation of data.

Credit Hours: 3

Prerequisite Courses: EXS 210 with a "C" or better.
Course Repeatability: Course may not be repeated.

EXS 331 - Applied Biomechanics in Strength and Conditioning

Neuromuscular and mechanical principles of human movement with emphasis on movement analysis related to strength and conditioning.

Credit Hours: 3

Prerequisite or Corequisite Courses: EXS 321.
Prerequisite Courses: EXS 310.
Course Repeatability: Course may not be repeated.
Major Restriction Exercise Science

EXS 410 - Essentials of Strength Training and Conditioning I

This course is a comprehensive overview of the scientific foundations of strength and conditioning. Emphasis will be placed on the exercise sciences, including anatomy, exercise physiology, biomechanics, nutrition, and the psychology of performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite: EXS 320 with a

"C" or better and EXSL 320 with a "C" or better. Prerequisite or corequisite: EXS 321.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 420 - Essentials of Strength Training and Conditioning II

This course is designed to provide an in-depth overview of the practical/applied principles of strength and conditioning. Emphasis is placed on applying knowledge of testing and evaluation, exercise techniques, organization and administration and program design.

Credit Hours: 3

Corequisite Courses: EXSL 420
Prerequisite Courses: EXS 410 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXSL 420 - Essentials of Strength Training and Conditioning II Laboratory

Course is a comprehensive overview of the practical/applied principles of strength and conditioning. Emphasis is placed on developing skills in fitness testing, exercise technique, organization and administration, and program design. Two laboratory hours each week.

Credit Hours: 1

Corequisite Courses: EXS 420
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.

EXS 421 - Exercise Prescription II

Emphasis on the design of safe and appropriate individualized exercise programs for persons of all ages with acute and chronic health-related conditions. The

topics include benefits and risks, screening, pre-exercise evaluations, fitness testing, and exercise prescription.

Credit Hours: 3

Prerequisite Courses: EXS 411 with a "C" or better and EXSL 411 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Exercise Science (EXS) majors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EXS 491 Directed Individual Study **
EXS 494 - Exercise Science Study Abroad**
**EXS 491 or EXS 494 may only contribute 3 credits toward this requirement.

Select a minimum of 16 credits from the following:

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical

perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ATR 470 - Medical Terminology for Health Professions

The course is designed for students to build a foundational understanding of medical terminology with appropriate application to pathological conditions of the various body systems. Focus on preparing students to use appropriate medical documentation skills consistent with today's allied health care professions.

Credit Hours: 3

Prerequisite Courses: EXS 216 or BIO 240.
Course Repeatability: Course may not be repeated

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

BIOL 246 - Microbiology of Human Diseases Laboratory

Must be taken after or concurrent with BIO 246 lecture. An introduction to basic microbiological laboratory techniques necessary to isolate, identify, stain, culture, and control microorganisms of interest. Special emphasis is placed upon clinical applications through research and completion of historical and clinical case studies. This course is the lab for BIO 246.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 246.
Course Repeatability: Course may not be repeated.

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of

bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIOL 465 - Biochemistry Laboratory

Experiments demonstrating basic phenomena and techniques of biochemistry. This course is the lab for BIO 465.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 465.
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

HFE 345 - Childhood Obesity

Focuses on the methods used in the assessment, prevention and treatment of childhood obesity. In addition, this course will examine the etiology of obesity and the role that human behaviors and an active lifestyle play in the overall health and well-being of children.

Credit Hours: 3

University Studies: Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

HFE 350 - Motor Behavior

Motor skill acquisition, control, and performance. Physiological and psychological principles of human growth and development. Includes analysis of the

sequential progression of fundamental motor skills from infancy through adulthood with primary focus on school-age children.

Credit Hours: 3

Prerequisite Courses: (BIO 240 with a C- or better and BIOL 240 with a C- or better) or (EXS 216 with a C- or better and EXSL 216 with a C- or better).
Course Repeatability: Course may not be repeated.

HFE 415 - Adapted Physical Activity

Provide students theoretical and practical knowledge to plan and implement appropriate physical activity programs for individuals with disabilities in integrated and inclusive settings.

Credit Hours: 0

Prerequisite Courses: (EXS 216 with a C- or better and EXSL 216 with a C- or better) or (BIO 240 with a C- or better and BIOL 240 with a C- or better).
Additional Restrictions/Requirements: Senior standing, prerequisite courses, or consent of instructor.

University Studies: Writing Intensive, Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability Insurance Additional Course Fee Schedule

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical

waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PSY 220 - Child Psychology

Human psychological development through childhood and early adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 324 - Psychology of Aging

A study of the psychological aspects of human aging. Topics include the effects of normal and diseased aging on perceptual and cognitive functioning, personality and social relationships, and physical and emotional health.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

*May apply no more than 6 credits from PSY courses to the Allied Health Concentration requirements.

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions, confidence intervals, hypothesis testing, correlation and

regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Total Credits: 67 credits

Additional Information:

A grade of "C" (2.00) or better is required in each course within the Exercise Science major requirements (core and concentration areas). Students must provide current written documentation of adult first aid and CPR (including AED) certifications during the term they expect to graduate.

Film Studies, B.A.

The film studies major prepares students to participate in a world increasingly shaped by moving pictures. The major is founded on the principle that the study of cinema and the artistic production of motion pictures complement one another, and all film studies majors perform substantial work in both areas. Through courses that offer a foundation for understanding cinema—and its relation to culture, history, technology and aesthetics—the film studies major teaches students to create and analyze moving images, to produce research, and to make art.

Admission Requirements

Admission to the Film Studies (FST) major is based solely upon a student's grade in FST 200 - Introduction to Film Study, the department's foundational course, which teaches and evaluates skills that students use in all other courses in the Film Studies major. Students who earn a "C" or better in FST 200 will be admitted to the major upon application.

To apply to the FST major, students must first declare a PFST (pre-Film Studies) major. Upon earning a "C" or better in FST 200, students may then declare the FST major. For purposes of admission to the FST major, the department only credits students' first or second grade in FST 200 (i.e., students may repeat the course once).

Students seeking an internship course in film studies must have a minimum of 12 hours in previous film studies courses, junior or senior standing, and an overall grade-point average of 3.0 or better. To enroll in an internship course, students must submit an application to receive permission from the chair of the Department of Film Studies.

A student in film studies must complete all requirements for the major with an overall 2.00 GPA or better.

Competency Requirements for a Major in Film Studies for the B.A. Degree:

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. in Film Studies, a student must successfully complete FST 495 or FST 496.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. in Film Studies, a student must successfully complete one of the following courses: FST 301, FST 302, FST 363, FST 451, FST 493, FST 495, or FST 498.

Writing Requirement:

To satisfy the writing requirement for the B.A. in Film Studies, a student must successfully complete one of the following courses: FST 317 (ENG 317), FST 363, FST 367, FST 368, FST 440, FST 445, FST 480, FST 496, or another course designated by the department as "writing intensive."

Course Requirements for a Major in Film Studies for the B.A. Degree:

The major consists of 47 hours, distributed as follows. No course may satisfy more than one Course Requirement within the major. However, a course that satisfies a Course Requirement may also be used to satisfy one or more Competency Requirements for the major.

Three Core courses:

FST 200 - Introduction to Film Study

Introduction to film study, including analysis of cinematography, editing, mise-en-scène, sound, and narrative. Films drawn from various national cinemas, representing diverse styles, periods, and genres. Intended for prospective majors in film studies.

Credit Hours: 4

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

FST 201 - Introduction to Film Production

Study and application of cinematic concepts and techniques. Students complete a series of collaborative exercises exploring narrative, documentary, and experimental film forms.

Credit Hours: 4

Prerequisite Courses: Prerequisite or corequisite: FST 200.
Additional Restrictions/Requirements: Restricted to PFST or FST majors.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Major Restriction Pre-Film Studies or Film Studies

FST 205 - Introduction to World Cinema

Survey of key tendencies in international cinema from the silent era to the present. Case studies include films from Europe, the Soviet Union, Asia, Africa, and the Americas, examined within their historical contexts.

Credit Hours: 3

Prerequisite Courses: FST 200
Additional Restrictions/Requirements: Restricted to FST majors.
University Studies: Living in a Global Society
Course Repeatability: Course may not be repeated.

Two Film History courses:

FST 370 - Early Cinema

Historical overview of pre-cinema and pre-sound cinema, situating early filmmaking in its technological, stylistic, and critical contexts.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 371 - History of Documentary Film

Historical overview of non-fiction filmmaking. Emphasizes critical approaches to documentary film practices and traditions.

Credit Hours: 3

Prerequisite Courses: Prequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 372 - History of Avant-Garde Film

Historical overview emphasizing critical approaches to avant-garde film practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 373 - History of Animation

Historical overview of modes, traditions, and theories of animation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 375 - Studies in Global Film History

Historical overview of an international cinema or a period in global cinema. Teaches approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 376 - American Cinema 1927-1960

History and aesthetics of American cinema from the beginning of sound film until the break-up of the studio system, focusing on the height of the Hollywood studio era. Classical genres and styles, and prominent Hollywood filmmakers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 377 - American Cinema Since 1961

History and aesthetics of American cinema since the end of the studio era, emphasizing the continuities and breaks with the "Classical Hollywood Cinema."

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 378 - History of New Wave Cinemas

Historical overview of New Wave Cinemas, a transnational response to classical filmmaking. Emphasizes critical approaches to New Wave film practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or consent of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 379 - Studies in Film History

Historical overview of a major period in film. Approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 381 - History of Russian and Soviet Cinema

Survey of Russian and Soviet cinema from the 1900s to the present, focusing on Sergei Eisenstein, Dziga Vertov, Andrei Tarkovsky, and other directors, as well as the cultural, political, and economic forces that influenced their films.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 475 - Advanced Studies in Global Film History

Advanced study of an international cinema or a period in global cinema. Teaches approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Crosslisting: FST 579, FST 589
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 479 - Advanced Studies in Film History

Advanced study of a major period in film. Teaches approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Crosslisting: FST 579
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

One Global Cinema course:

FST 375 - Studies in Global Film History

Historical overview of an international cinema or a period in global cinema. Teaches approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 378 - History of New Wave Cinemas

Historical overview of New Wave Cinemas, a transnational response to classical filmmaking. Emphasizes critical approaches to New Wave film practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or consent of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 380 - Introduction to Bollywood Cinema

Survey of India's Bollywood cinema from the silent period to the present. Emphasizes historical and critical approaches to Bollywood cinema, as well as studies of censorship, cinephilia, and popular visual culture.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 381 - History of Russian and Soviet Cinema

Survey of Russian and Soviet cinema from the 1900s to the present, focusing on Sergei Eisenstein, Dziga Vertov, Andrei Tarkovsky, and other directors, as well as the cultural, political, and economic forces that influenced their films.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building

Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FST 382 - Contemporary Latin American Cinema

Critical examination of the production and distribution of contemporary Latin American film, with an emphasis on film style, genre, economics, and globalization.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FST 383 - Introduction to Latin American Cinema

Survey of the history and aesthetics of Latin American film, from the "Golden Age" of Mexican cinema to the development of the New Latin American Cinema of the 1960s, up to more recent work of the contemporary renaissance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FST 384 - Contemporary French Cinema

Recent tendencies in French cinema, including new filmmakers, movements, genres, critical approaches, theories, formats, and filmmaking styles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 385 - Japanese Cinema

Japanese cinema from the classical period to the present day. Emphasizes critical and historical approaches to Japanese cinema, as well as studies of

key filmmakers, including Kurosawa, Mizoguchi, Ozu, Suzuki, and Kitano.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 386 - Introduction to German Cinema

Analysis of films from the "Golden Age" of the Weimar Republic, the Third Reich, the New Wave, East German films, and current German and Austrian cinema. Works by Lang, Riefenstahl, Wenders, Reitz, Fassbinder, von Trotta, and recent films.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Crosslisting: GER 385
Course Repeatability: Course may not be repeated.

FST 387 - Introduction to French Cinema

Analysis of selected films from the silent era to the present, including the classical period, the New Wave, Francophone cinema, and recent French cinema, situated in their historical contexts.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 389 - Studies in World Cinema

Study of a selected topic in world cinema. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 475 - Advanced Studies in Global Film History

Advanced study of an international cinema or a period in global cinema. Teaches approaches to film historiography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Crosslisting: FST 579, FST 589
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 480 - Special Topics in World Cinema

Advanced study of a selected topic in world cinema. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: FST 205
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: FST 589
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

One Comprehensive Production Practicum:

FST 301 - Film Tools and Techniques

Instruction in the techniques and technologies of digital filmmaking, including camera, lenses, lighting, grip, sound, and set protocol.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors, or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 302 - Intermediate Film Production

A comprehensive practicum in motion picture preproduction, production, and post-production, concentrating on documentary, narrative or experimental cinema. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Two Film Production courses:

FST 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3-D computer graphics using high-level software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and shading, alternative rendering techniques, and

providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CSC 112 or CSC 131. Prerequisite or corequisite: ART 260 or ART 282.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 220, CSC 220
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

FST 301 - Film Tools and Techniques

Instruction in the techniques and technologies of digital filmmaking, including camera, lenses, lighting, grip, sound, and set protocol.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors, or consent of instructor.
Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 302 - Intermediate Film Production

A comprehensive practicum in motion picture preproduction, production, and post-production, concentrating on documentary, narrative or experimental cinema. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 318 - Screenwriting I: Introduction to Screenwriting

Theory and practice of screenwriting with an emphasis on the fundamentals of narrative structure. Students

write original scripts, including a short screenplay for possible use in FST 495.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201; or CRW 207 or CRW 208 or CRW 209.
Additional Restrictions/Requirements: Restricted to FST majors, PCRW or CRW majors, or consent of instructor.
Crosslisting: CRW 318
Course Repeatability: Course may not be repeated.

FST 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color, and lighting.

Credit Hours: 3

Prerequisite Courses: FST 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 320, CSC 320
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

FST 330 - Producing

Focuses on duties of a producer through a project "life cycle": development, financing, pre-production, production, post-production, marketing, and distribution. Emphasizes production management, budgeting, and scheduling. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 331 - Introduction to Editing

An introduction to the techniques and aesthetics of non-linear motion picture editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201, or permission of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 334 - 6x1: Variations on the One-Minute Film

Instruction and practice in alternative/experimental forms of filmmaking (16mm hand-processing, stop motion animation, cameraless filmmaking, and collage) through the creation of six 1-minute projects.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201, or permission of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 335 - Acting for the Camera

Explores acting techniques particular to the mediums of film and video.

Credit Hours: 3

Prerequisite Courses: THR 231 or THR 332
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: THR 335
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 393 - Sound Recording

Instruction in the techniques, aesthetics, and equipment for recording sound for motion pictures.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 394 - Sound Design

Instruction in creating motion picture soundtracks and in techniques and aesthetics of sound editing and mixing.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.

FST 396 - Studio Seminar in Film Production

Introduction to the process of studio film production, from development to distribution. Topics include

locations, production design, casting, cinematography, make-up, costume design, film sound and scoring, editing, and post-production. Lecture and discussion, guest speakers, and on-site observation at Screen Gems Studios and other filmmaking sites in Wilmington.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 398 - Practicum in Film Production

Selected topics in film production. May be repeated under different subtitles.

Credit Hours: 1 To 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST major or consent of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 399 - Film Directing

In-class exercises focusing on scene dynamics, communicating with actors, blocking, and capturing action and performance with the camera.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 401 - Advanced Practicum in Cinematography

Selected topics in advanced cinematography. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301
Crosslisting: FST 501
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

FST 415 - Topics in Environmental Film Production

Instruction in production practices as they apply to themes of the environment and ecology. May be repeated under different subheadings.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302.
Additional Restrictions/Requirements: Permission of instructor
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 416 - Advanced Practicum in Film Production

Selected topics in advanced film production. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Crosslisting: FST 516
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 418 - Screenwriting II: Writing the Feature Film

The craft of screenwriting applied to the feature form.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Restricted to CRW or FST majors or consent of instructor.
Crosslisting: CRW 418, FST 518
Course Repeatability: Course may not be repeated.

FST 419 - Screenwriting III: Film Adaptation

Writing, revision, and completion of screen adaptation of literary work.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Restricted to CRW or FST majors or consent of instructor.
Crosslisting: CRW 419, FST 519
Course Repeatability: Course may not be repeated.

FST 430 - Digital Visual Effects

Exploration of digital image and video representation and manipulation for motion-picture visual effects. Includes image storage and compression, film and video formats, compositing, filtering, scripting for graphics and visual effects, photorealistic lighting and rendering, virtual cinematography, camera tracking, and particle effects.

Credit Hours: 3

Prerequisite Courses: CSC 320, or ART 320, or FST 320.

Crosslisting: CSC 430, FST 522.
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

FST 432 - Expanded Cinema

Modes of media production in expanded cinema. Topics may include video installation, video mapping, building interactive media environments, creating experimental animations, and live cinema. May be repeated under different subheadings.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Junior or Senior standing, permission of instructor
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 433 - Modes of Animation Production

Applied instruction in selected animation forms and techniques. Topics might include motion graphics, gif animation and character animation. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201.
Additional Restrictions/Requirements: Junior or Senior standing, permission of instructor
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 493 - Directed Seminar in Production

Students work under the direction of a faculty filmmaker to create a motion picture.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours of production at the 300 level or above, and consent of the chair of Film Studies.
Crosslisting: FST 517
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 495 - Senior Seminar in Film Production

Collaborative production of a short experimental, documentary, narrative, or animated motion picture. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 497 - Applied Post Production

Hands-on application of editing theory and post-production techniques, practices, and technology. Students create a finished film using raw footage from previousFST 495 projects; exceptions upon approval.

Credit Hours: 3

Prerequisite Courses: FST 331

Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 498 - Internship in Film Studies

Study and practical work experience related to film studies, supervised and evaluated by faculty. May be repeated with permission of the chair of Film Studies.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, consent of chair of Film Studies, an overall 3.00 minimum GPA, and a minimum of 12 hours in film studies (FST courses).
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

THR 230 - Acting For Non-Majors

An introduction to basic acting techniques for non-majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Two Capstone Courses

One Capstone in Film Production:

FST 493 - Directed Seminar in Production

Students work under the direction of a faculty filmmaker to create a motion picture.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours of production at the 300

level or above, and consent of the chair of Film Studies.
Crosslisting: FST 517
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 495 - Senior Seminar in Film Production

Collaborative production of a short experimental, documentary, narrative, or animated motion picture. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 497 - Applied Post Production

Hands-on application of editing theory and post-production techniques, practices, and technology. Students create a finished film using raw footage from previousFST 495 projects; exceptions upon approval.

Credit Hours: 3

Prerequisite Courses: FST 331
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

One Capstone in Critical Studies:

FST 496 - Senior Seminar in Film Study

Intensive study of a major topic in film studies. Emphasis on individualized work, which may include reports, a longer research project, or a research essay. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 205

Additional Restrictions/Requirements: Prerequisite course, junior or senior standing, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: FST 569
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Electives:

12 hours selected from courses with FST prefix at the 200, 300, or 400 level

Total: 47 hours

French, B.A.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in French a student must successfully complete FRH 301.

Applied Learning Requirement:

To satisfy the applied-learning requirement for foreign language, a student must complete 6 credit hours of

study abroad (at the intermediate level or above) or 3 credit hours of internship, directed individual study, practicum, honors, or service learning.

Requirements for a Major in French for the B.A. Degree:

Including FRH 201-FRH 202 or the equivalent and thirty hours at the 300-400 level of which at least 6 hours must be at the 400 level. FRH 294, FRH 394, and FRH 494 may be repeated under different subtitles. Only 3 of the hours at the 400 level may be obtained by means of a FRH 491 or FRH 498.

Total: 36 hours

Additional Information:

A grade of "C-" or better is required in each course counted toward the major and a grade point average of 2.000 or better for all courses counted towards the major. Also required is a passing score on the departmental French oral proficiency exam.

Geography and Geospatial Sciences, B.A.

The B.A. in Geography and Geospatial Sciences is a flexible program that meets a wide variety of personal educational goals and interests. Geographers study all aspects of places (including physical, environmental, and societal patterns), analyzing geospatial data to address changing patterns through time. The B.A. in Geography and Geospatial Science is commonly combined with a second major or minor to define a specific area of focus, and prepares students for careers and graduate study in geospatial, earth and environmental sciences.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Geography and Geospatial Sciences a student must successfully complete GGY 395.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Geography and Geospatial Sciences a student must successfully complete one of the following courses: GGY 322, GGY 333, GGY 335, GGY 424, GGY 426, GGY 428, GGY 433, GGY 437, GGY

473, GGY 491, GGY 494, GGY 498, GGY 499, GLY 390 or OCN 390.

Requirements for a Major in Geography and Geospatial Sciences for the B.A. Degree:

Core requirements:

GGY 101 - Modern World Geography

The theory, techniques, and professional applications of modern geographic science. Examines geography as a broad interdisciplinary science focused on places, spatial patterns, and the intersection between human activities and the natural world. Includes discussion of the historical origins and modern relevance of geographic thought.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 220 - Cartography and Data Visualization

Introduction to fundamental cartographic and geospatial data visualization principles that provide students the ability to describe, generate, and evaluate relevant products (maps, graphs, charts). The course uses examples from physical geography and human landscapes to practice the principles defined in the Essential Body of Knowledge used in geospatial professions.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology,

forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 365 - Written Communication in Geography

Development of written scientific communication skills for topics related to geography and geospatial sciences.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

GGY 395 - Oral Communication in Geography

Development of oral presentation and computer application skills in Geography.

Credit Hours: 1

Prerequisite or Corequisite Courses: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

Total: 25 hours

Elective Requirements:

In addition, students must complete a minimum of 18 elective hours consisting of any GGY courses beyond the core, and up to 10 hours from among:

GLYL 100 - Earth Systems Laboratory

Survey level laboratory exploration of earth materials, atmospheric and ocean environments, surficial processes, climate change, and their impacts on society. Designed to complement lecture content in introductory earth science courses but can be taken as a stand-alone course.

Credit Hours: 1

University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 226 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3) surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120
Crosslisting: GGY 235
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical

variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 390 - Field Methods in Oceanography

Applied study of ocean materials and processes in field settings. Introduction to methods and techniques used in geosciences, with emphasis on coastal and marine environments, including field measurement, sample retrieval, and data analysis. Colloquium and required field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: OCN 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Critical Reasoning, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Total: 43 hours

Geography majors are strongly encouraged to pursue a minor or second major, and to carefully select courses that will define their main area of interest.

Additional Information:

GLY 390 or OCN 390 may be repeated once for a total of 4 credit hours.

GGY courses listed as core requirements that are not counted toward the core may count as elective hours.

A "C" (2.00) or better average is required on all courses that count toward the major.

At least 14 hours toward the Geography and Geospatial Sciences B.A. must be at the 300-400 levels.

The Geography and Geospatial Sciences major is designed to prepare students for a variety of careers and to allow for complementary study in allied

disciplines. Geography and Geospatial Sciences majors are strongly encouraged to pursue a minor or second major, and to carefully select courses that will define their main area of interest.

For example, working closely with an advisor, students may select elective courses tailored to specific areas of interest such as:

- Applied Geography (GGY 215, GGY 220, GGY 421, GGY 424, GGY 426, GGY 428, GGY 429, GGY 473, or a second major or minor in GIS Remote Sensing and UAS, Computer Science, or Information Technology).
- Human-Environment Geography (GGY 340, GGY 383, GGY 435, GGY 438, GGY 473, GGY 475, or a second major or minor in International Studies, Anthropology, or Environmental Sciences).
- Physical Geography (GGY 333, GGY 335, GGY 420, GGY 432, GGY 433, GGY 436, GGY 437, GGY 439, or a second major or minor in Geology, Geoscience, or Oceanography).

Geology, B.S.

The B.S. degree in geology focuses on scientific study of Earth; common rocks and minerals, processes that form and alter basic Earth materials, and key events in the geologic evolution of the planet. Specifically, the B.S. in geology is designed for students intending to pursue advanced studies in geology or who intend to attain licensure as a professional geologist.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Geology, a student must successfully complete GLY 395.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Geology, a student must complete either GLY 470 and GLY 471 (total of 5 hours) or GLY 498 (6 hours).

Requirements for a Major in Geology for the B.S. Degree

Core Courses (27 Credit Hours)

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 101 - Earth Revealed Laboratory

Introduction to applied use of rock and mineral samples, maps, and models in geology. Topics include plate tectonics, mineral and rock identification and resources, geologic time, mountain building, earthquakes, volcanoes, river processes and flooding, groundwater, coastal processes and storms, energy, and climate change.

Credit Hours: 1

Prerequisite or Corequisite Courses: GLY 101.
University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 132 - The Earth Through Time

Geologic history of the earth and the fossil record. Methods of dating rocks and fossils, interpreting ancient environments and the age of the earth. Field trips.

Credit Hours: 4

Prerequisite Courses: GLY 101 or GLY 120 or GGY 130.
Course Repeatability: Course may not be repeated.

GLY 201 - Mineralogy

Introduction to the formation, chemistry, symmetry, structure and natural occurrence of minerals. Principles of physical properties, crystal chemistry,

crystallography, and mineral genesis. Study of the geologically important rock-forming mineral groups and associations. Introduction to optical mineralogy and the use of the petrographic microscope. Computer applications in geology. Required field trip(s).

Credit Hours: 4

Prerequisite Courses: Prerequisite:GLY 101 or GLY 120 and GLYL 120 or GGY 130. Prerequisite or corequisite: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

GLY 310 - General Petrology

Survey of the major igneous, sedimentary, and metamorphic rock groups. Emphasis is on classification, textural features, mode of occurrence, environments of origin and economic importance. Laboratory stresses rock identification and typical rock associations. Required field trips.

Credit Hours: 4

Prerequisite Courses: GLY 201 or GLY 205
Course Repeatability: Course may not be repeated.

GLY 365 - Written Communication in Geology

Development of written scientific communication skills for topics related to the geosciences.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

GLY 395 - Oral Communication in Geology

Includes oral presentations and computer applications in Geology.

Credit Hours: 1

Prerequisite or Corequisite Courses: Prerequisite or

Corequisite: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

GLY 431 - Sedimentology and Stratigraphy

Introduction to the observation, description, and interpretation of sediment and sedimentary rock; the physical and chemical processes controlling weathering, sediment transport, deposition, and diagenesis; and the interpretation of depositional environments and layered rock successions. Field trips; fees may be required. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GLY 310 or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GLY 441 - Structural Geology

Introduction to the mechanics, fabrics, and geometry of rock deformation, including stress-strain relationships,

folds and folding, and faulting and fracturing of rocks. Required field trip.

Credit Hours: 4

Prerequisite Courses: GLY 132 and GLY 310
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Options

In addition to the Geology core courses, students must complete one of the options below.

Option 1: Academic (39-41 Credit Hours)

This option is designed for students intending to pursue advanced or graduate studies. Electives in this option should be chosen to complement the student's expected areas of advanced study, and might include course work in other disciplines such as biology, chemistry, geography, or physics. In addition to the B.S. core, students must complete:

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 470 - Field Course in Geology

Intensive geological field mapping in various geological settings. Capstone emphasis on prior geological knowledge, critical thinking, and problem-solving skills. Interpretation of field data and solving field-based

problems in small groups under direct faculty supervision. Includes preparation of geological maps and cross sections using digital topographic map, detailed lithologic descriptions outcrop questions and local geologic history. Course fees apply. Students must register for lecture and laboratory.

Credit Hours: 4

Prerequisite Courses: (GLY 310 or GLY 311 and GLY 416) and GLY 431, GLY 390, GLY 441 and GLY 471.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 471 - Techniques in Applied Geology

A companion course to GLY 470 providing experience in advanced techniques of geologic map reading and interpretation, data and location acquisition, mineral and rock description, sketching and sampling, structural

mapping, and map and cross section design and format. Field trip required. Individual and group activities required. Course fees required.

Credit Hours: 1

Prerequisite Courses: Prerequisites: (GLY 310 or GLY 311 and GLY 416) and GLY 441. Prerequisites or corequisites: GLY 390 and GLY 431.
Additional Restrictions/Requirements: Prerequisite and corequisite courses, or consent of instructor.
Course Repeatability: Course may not be repeated.

10 hours of GLY electives selected from courses above the 299 level

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 152 - Basic Calculus with Applications II

Intended for majors that emphasize techniques and applications. The second course in a two-course sequence. Topics to include further techniques and applications of integration and multivariable calculus including trigonometric functions, differential equations, probability, and sequences & series.

Credit Hours: 3

Prerequisite Courses: MAT 151 and (MAT 112 or MAT 160).
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

or

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

or

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

Option 1 Total Credit Hours: 66-68

Option 2: Professional (33-36 Credit Hours)

This option is designed for students who intend to enter the job market after graduation and who intend to pursue licensure as a professional geologist. Elective courses should be chosen to complement the student's intended career path and might include courses from other disciplines such as geography and environmental

studies. In addition to the B.S. core, students must complete:

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and

required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 426 - Geohydrology

Geology of groundwater and related aspects of surface waters. Methods of ground water resource evaluation, protection, exploitation, and contaminant remediation.

Credit Hours: 3

Prerequisite Courses: (GLY 101 or GLY 120 or OCN 150 or GGY 130), and (MAT 112 or MAT 160 or MAT 152 or MAT 161)

Additional Restrictions/Requirements: Junior or senior standing in geology, geoscience, geography, oceanography and/or environmental sciences, prerequisite courses, and consent of instructor.
Crosslisting: GLY 526
Course Repeatability: Course may not be repeated.

GLY 465 - Introduction to Geophysics

Integrated application of geophysical methods to solve environmental and geologic problems. Includes discussion of reflection/refraction seismology, ground penetrating radar and gravity. Two lectures and three laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GLY 101 and (MAT 112 or MAT 160 or MAT 152 or MAT 161)
Crosslisting: GLY 565.
Course Repeatability: Course may not be repeated.

GLY 470 - Field Course in Geology

Intensive geological field mapping in various geological settings. Capstone emphasis on prior geological

knowledge, critical thinking, and problem-solving skills. Interpretation of field data and solving field-based problems in small groups under direct faculty supervision. Includes preparation of geological maps and cross sections using digital topographic map, detailed lithologic descriptions outcrop questions and local geologic history. Course fees apply. Students must register for lecture and laboratory.

Credit Hours: 4

Prerequisite Courses: (GLY 310 or GLY 311 and GLY 416) and GLY 431, GLY 390, GLY 441 and GLY 471.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 471 - Techniques in Applied Geology

A companion course to GLY 470 providing experience in advanced techniques of geologic map reading and

interpretation, data and location acquisition, mineral and rock description, sketching and sampling, structural mapping, and map and cross section design and format. Field trip required. Individual and group activities required. Course fees required.

Credit Hours: 1

Prerequisite Courses: Prerequisites: (GLY 310 or GLY 311 and GLY 416) and GLY 441. Prerequisites or corequisites: GLY 390 and GLY 431.
Additional Restrictions/Requirements: Prerequisite and corequisite courses, or consent of instructor.
Course Repeatability: Course may not be repeated.

or

GLY 498 - Internship in Geology

Practical training experience with agency or business conducting geological services. Jointly evaluated by geology faculty member and on-site supervisor.

Credit Hours: 1 to 6

Additional Restrictions/Requirements: Junior or

senior standing and major, minimum GPA 2.50 overall, and consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Plus 10 hours of GLY electives selected from courses above the 299 level.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

MAT 112 - Trigonometry

Topics from trigonometry and algebra review. Includes trigonometric functions, identities and equations. (No credit granted after the completion, with a grade of "C-" or better, of a mathematics course numbered 152 or higher.)

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or satisfactory performance on the UNCW mathematics placement test.

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

or

MAT 160 - Precalculus: Algebra & Trigonometry

Study of fundamental concepts of algebra and trigonometry, functions using graphical and algebraic approaches, and applications that are essential to the study of calculus. Covers linear, quadratic, polynomial, rational, radical, piecewise, composite, inverse, exponential, logarithmic, and trigonometric functions. Preparatory course for MAT 161.

Credit Hours: 5

Additional Restrictions/Requirements: No credit granted for MAT 160 after the completion of a MAT course numbered 161 or higher, with a grade of "C-" or better.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Option 2 Total Credit Hours: 60-63

Geology B.S. Total Credit Hours: 60-68

Geosciences, B.A.

This program focuses on the scientific study of Earth; forces acting upon and within it; and the makeup and behavior of the solids, liquids, and gases comprising the planet. The B.A. in Geosciences is designed for students who desire a broad liberal arts education that prepares them for careers such as environmental consulting, energy and resource management, and Geoscience education.

The B.A. in Geosciences is a flexible option that allows students to concentrate their coursework in selected areas of geology, earth surface processes, weather and climate, geospatial science, or oceanography. Because of the flexible degree requirements, many students are able to pursue a second major or minor in addition to the B.A. Geosciences.

Requirements for a Major in Geosciences for the B.A. Degree

Oral Communication Requirement

For the B.A. degree in Geosciences, a student must successfully complete GLY 395 or GGY 395 or OCN 395.

Applied Learning Requirement

For the B.A. degree in Geosciences, a student must successfully complete GLY 390 or GGY 390 or OCN 390.

Core Courses (20 Credit Hours)

> Students must complete one of the following courses:

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

> Students must also complete at least 1 laboratory course from GLYL 100, GLYL 101, GLYL 120, GGY 130* or OCNL 150. *GGY 130 lecture includes the GGY 130 lab, therefore, an additional laboratory is not required.

GLYL 101 - Earth Revealed Laboratory

Introduction to applied use of rock and mineral samples, maps, and models in geology. Topics include plate tectonics, mineral and rock identification and resources, geologic time, mountain building, earthquakes, volcanoes, river processes and flooding,

groundwater, coastal processes and storms, energy, and climate change.

Credit Hours: 1

Prerequisite or Corequisite Courses: GLY 101.
University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLYL 100 - Earth Systems Laboratory

Survey level laboratory exploration of earth materials, atmospheric and ocean environments, surficial processes, climate change, and their impacts on society. Designed to complement lecture content in introductory earth science courses but can be taken as a stand-alone course.

Credit Hours: 1

University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

In addition, students must complete the following courses:

GLY 132 - The Earth Through Time

Geologic history of the earth and the fossil record. Methods of dating rocks and fossils, interpreting ancient environments and the age of the earth. Field trips.

Credit Hours: 4

Prerequisite Courses: GLY 101 or GLY 120 or GGY 130.
Course Repeatability: Course may not be repeated.

GLY 201 - Mineralogy

Introduction to the formation, chemistry, symmetry, structure and natural occurrence of minerals. Principles of physical properties, crystal chemistry, crystallography, and mineral genesis. Study of the geologically important rock-forming mineral groups and associations. Introduction to optical mineralogy and the use of the petrographic microscope. Computer applications in geology. Required field trip(s).

Credit Hours: 4

Prerequisite Courses: Prerequisite:GLY 101 or GLY 120 and GLYL 120 or GGY 130. Prerequisite or corequisite: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 365 - Written Communication in Geography

Development of written scientific communication skills for topics related to geography and geospatial sciences.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

GLY 365 - Written Communication in Geology

Development of written scientific communication skills for topics related to the geosciences.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

OCN 365 - Written Communication in Oceanography

Development of written scientific communication skills for topics related to the oceanography discipline.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

GGY 390 - Field Methods in Geography

Applied study of geographic processes in field settings. Introduction to methods and techniques used in geography including sampling design, field measurements, data collection, and data analysis. Colloquium and required field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: GGY 101 or GGY 130 or GGY 215.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability Insurance

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

OCN 390 - Field Methods in Oceanography

Applied study of ocean materials and processes in field settings. Introduction to methods and techniques used in geosciences, with emphasis on coastal and marine environments, including field measurement, sample retrieval, and data analysis. Colloquium and required

field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: OCN 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Critical Reasoning, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GGY 395 - Oral Communication in Geography

Development of oral presentation and computer application skills in Geography.

Credit Hours: 1

Prerequisite or Corequisite Courses: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

GLY 395 - Oral Communication in Geology

Includes oral presentations and computer applications in Geology.

Credit Hours: 1

Prerequisite or Corequisite Courses: Prerequisite or Corequisite: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

OCN 395 - Oral Communication in Oceanography

Development of oral presentation skills for topics related to the oceanography discipline.

Credit Hours: 1

Prerequisite or Corequisite Courses: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

Elective Courses (21 Credit Hours)

Students must complete 21 hours of electives, of which 12 hours must be above the 299-level. At least six hours above the 299-level must be in GLY, GGY, or OCN. Students may select electives from any GLY, GGY, or OCN courses above the 299-level, and from the following:

ANT 207 - Archaeology

An exploration of the objectives, theories, methodologies and interpretive tools utilized in the study of humankind's past. Both prehistoric and historic cultures will be examined. The lab for this course is ANTL 207.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

ANT 307 - Archaeology of the Americas

Exploration of the peopling of the Americas and various New World indigenous groups, with an emphasis on chiefdom and state level societies. Archaeological, ethnohistorical, and epicgraphic evidence is used to study the Aztec and Maya of Mesoamerica, the Mississippians and Puebloan Indians of North America, and Andean civilizations of South America.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ANT 309 - Environmental Anthropology

A study of cultural adaptations as responses of human populations to varied environments; this course will focus upon cultural vs. biological adaptation from the archaeological past to the ethnographic present.

Credit Hours: 3

Prerequisite Courses: ANT 105 or ANT 206 or ANT 207
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 311 - Field Methods in Archaeology

Exploration of archaeological field methods through scientific excavation, recording, and sampling of sites of past human occupation. Focus on training in field and some laboratory methods at archaeological sites in the US or abroad.

Credit Hours: 3 To 6

Prerequisite Courses: ANT 207
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

ANT 312 - Collapse. The Fall of Complex Civilizations

A sampler of political and systemic collapses over the course of world history, applying theories of collapse to case studies including Easter Island, Mesopotamia, the Maya, and Rome. Evaluation of various theories explaining collapses and their relation to contemporary political trends and imperatives.

Credit Hours: 3 To 6

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ANT 375 - Archaeological Sciences

A problem-centered approach to evaluating, using, and integrating commonly used scientific techniques. Students will learn the basics of many of these techniques including dating, macroscopic, microscopic, chemical, and biological, with a special emphasis on synthesizing science and archaeology into a seamless, anthropologically effective reconstruction of the human past.

Credit Hours: 3

Prerequisite Courses: ANT 207
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 430 - Evolutionary Biology

Advanced survey of organizational principles of the genetic apparatus of prokaryotes and eukaryotes. Emphasis of the course directed to critical evaluation of current concepts and models of evolutionary dynamics using relevant illustrative examples from the literature.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: BIO 430
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and

relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 378 - Global Environmental Problems

Review and discussion of causes and effects of major environmental problems, with emphasis on ecosystem-level effects and interactions. Topics include extinction, deforestation, climate change, and pollution impacts.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

BIO 430 - Evolutionary Biology

Study of biological change over time through pathways of descent and through adaptation, including how biological diversity, from molecular through organismal levels, originates and is maintained. Focus on modern evolutionary analysis and applications in medicine, agriculture, and conservation.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: ANT 430
Course Repeatability: Course may not be repeated.

BIO 460 - Limnology

An examination of the physical, chemical, and biological characteristics of freshwater systems, particularly lakes and ponds. The lab for this course is BIOL 460.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Junior or

senior standing.
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

EDN 337 - Inquiry--The Method of Science

Assumes initial level competency in curriculum and methods of science. Focuses on conceptualization of

and rationale for using inquiry method of teaching science. Provides opportunities to acquire and practice skills needed to utilize method and to guide scientific investigation at K-12 levels.

Credit Hours: 3

Additional Restrictions/Requirements: A course in science methods or the completion of 15 hours toward a concentration or major in science or consent of instructor.
Course Repeatability: Course may not be repeated.

EDN 338 - The Teaching of Science (6-9)

This course includes a survey of curriculum and methods for teaching science in grades 6-9. There is an emphasis on scientific inquiry, topics that integrate learning across science disciplines, and the social implications of science and technology. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.

Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and basic studies science courses.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 383 - Mathematics and Science for the Early Years

Designed to acquaint B-K teachers with the curriculum, materials and methods used to teach basic concepts in mathematics and science to young children. Emphasis will be given to developmentally appropriate materials and experiences to promote power of observation and to encourage emergent conceptual abilities and cognitive processing skills. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 204.
Additional Restrictions/Requirements: Prerequisite

course and admission to Watson College of Education.
Course Repeatability: Course may not be repeated.

EDN 406 - Theory and Practice in Teaching Secondary Science (9-12)

Emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed. Field experiences required (10-20 contact hours). The lab for this course is EDNL 406.

Credit Hours: 3

Corequisite Courses: EDNL 406
Prerequisite Courses: EDN 301
Course Repeatability: Course may not be repeated.

EGN 310 - Fluid Mechanics for Engineers

Fluid mechanics uses knowledge from mathematics, physics, statics, and dynamics to analyze problems involving the fluid medium. Topics include fluid properties, hydrostatic pressure, pressure on surfaces,

conservative equations of mass, momentum and energy, pumps and turbines, open channel flows, and pipe flows in relation to real world engineering problems.

Credit Hours: 3

Prerequisite Courses: MAT 361 and EGN 201 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 311 - Coastal Engineering and Fluids Lab

Applied methods in laboratory investigations into coastal engineering and fluid mechanics principles in a sequence of seven experiments: hydrostatic pressure on submerged surface, stability of a floating body, flow from a hole, hydraulic jump, flow measurement, wave measurements in a wave flume, and beach sediment analysis.

Credit Hours: 1

Prerequisite Courses: EGN 330 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 320 - Water Resources Engineering

Introduction to quantitative methods in water resource systems. Topics include hydrology, precipitation, hydrograph analysis, reservoir and steam routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law;dams; reserviors; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.

Credit Hours: 3

Prerequisite Courses: EGN 310 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 330 - Coastal Wave Mechanics

Examination of the mechanics of water wave motion using linear and non-linear wave theories. Exploration of wave generation, forecasting and measurement. Covers wave propagation and transformation from offshore to the nearshore where waves interact with the bottom causing shoaling, breaking and initiating sediment movement.

Credit Hours: 3

Prerequisite Courses: MAT 361
Course Repeatability: Course may not be repeated.

EGN 340 - Matlab for Engineering Analysis

An introduction to the MATrix LABoratory (MATLAB) software. Topics to be covered include: basic programming; data management and manipulation; curve fitting and interpolation; image processing; advanced 3D plotting and movie generation; and basic applied numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 261.
Course Repeatability: Course may not be repeated.

EGN 401 - Sediment Transport Processes

This course will examine the physical processes of sandy beaches, coastal sediments, surf zone dynamics, beach profile evolution and cross-shore and longshore sediment transport. The class will also cover beach profile response and sediment transport as a

result of waves, currents and storms.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 402 - Dredging and Beach Nourishment

This course will examine types of dredges and their operation and the process of dredging for beach nourishment. Students will learn about the elements of beach nourishment design including cross-shore and planform design considerations, borrow areas (upland, offshore and inlets), environmental effects of beach nourishment and current dredging/beach nourishment costs. Numerical modeling of beach and dune erosion, shoreline change and storm induced impacts will be introduced. Local examples and ongoing beach nourishment projects will be examined.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 410 - Field Methods in Coastal Engineering

Introduction to the concepts, instrumentation, and field methods used to observe physical processes specific to the highly-dynamic coastal environment, such as wind, waves, currents, tides, and sediment transport. Hands-on experience in operating, deploying, and analyzing data from sensors that measure waves and currents, as well as with advanced surveying techniques for monitoring beach morphology (e.g., LIDAR, RTK GPS, and SONAR).

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 420 - Applied Coastal Modeling

Provides the knowledge and tools necessary to apply state of the art numerical models in coastal settings. Specific models vary depending on the instructor's expertise. Examples include ADCIRC, FUNWAVE, DELFT3D, or XBeach.

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 430 - Coastal Structures

Examine the functional design of coastal structures distinguishing between groins, jetties, seawalls, breakwaters, revetments and bulkhealds. Hydraulic design and structural stability as a result of breaking and non-breaking wave loading are also covered. In addtion, students examine the materials used and cost implications of coastal structures.

Credit Hours: 3

Prerequisite Courses: EGN 301 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

ENG 393 - Writing in the Scientific Disciplines

Rigorous introduction to writing for academic science contexts. Critically examines the current state of

academic science writing and explores the multiple practical strategies scientists use to communicate in professional settings.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 441 - Advanced Environmental Field Methods

Survey of methods, techniques, and tools used to gather and analyze data in environmental fieldwork with application to environmental issues and management. Field trips required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 477 - Environmental Site Assessment

Study of ASTM guidelines for environmental site assessment, emphasis on historic overview, regulations, and preparation methods associated with environmental site assessment. Lecture and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 478 - Hazardous Waste Operations and Emergency Response

Study of the physical and chemical hazards present at hazardous waste sites and those encountered during environmental clean-ups, as well as OSHA regulations pertaining to those sites. The class will meet the 40 CFR 1910.120 requirements for 40+ hours of training and OSHA certification will be issued.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of instructor.
Crosslisting: EVS 578
Course Repeatability: Course may not be repeated.

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 226 - Principles of Hydrology

Covers the three main components of terrestrial hydrology: (1) atmospheric water, precipitation, and

surface-atmosphere interactions; (2) groundwater, infiltration, substance flow, and aquifers; and (3) surface water, watersheds, rivers and floods. Lectures and exercises focus on collecting and interpreting hydrological data to address environmental issues.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120
Crosslisting: GGY 235
Course Repeatability: Course may not be repeated.

HST 190 - History Unlimited: A Short History of Nearly Everything

Multi-disciplinary course designed to cover the history of the universe from the big bang until today. Draws on perspectives and methods of both anthropology and history. Topics include the physical structure and composition of the the earth, how it was formed, the emergence of life with particular focus on the evolution of humans, the organiztion and development of human societies, analysis of important historical periods such as agricultural, scientific and industrial revolutions. This

course does not fulfill requirements towards either the history or the anthropology majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Explorations Beyond the Classroom
Crosslisting: ANT 190
Course Repeatability: Course may not be repeated.

HST 329 - History of Science and Technology in the Modern World

Examination of themes in the history of science and technology since the Scientific Revolution, such as controversies in science and technology, history of technology/biotechnology, history of American Science, and science and technology since 1900. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

HST 496 - Topics in the History of Science and Technology

Intensive study of a selected theme in the History of Science and Technology. Examples of topics include: "Positivism", "Occult Studies and the Renaissance", "The Second Industrial Revolution". May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: HST 290
Additional Restrictions/Requirements: Any history survey (HST 101 - HST 249) and prerequisite course, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 586
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 345 - Philosophy of Science

Introduce students to major topics from the philosophy of science, including the nature of scientific explanations, the role of natural laws within scientific practice, the methods for revising scientific theories, and the proper interpretation of physical theories like relativity and quantum mechanics.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 360 - Philosophy of Evolution

Examination of philosophical issues found in the study of evolution: origins of the theory; impact on science; methodology of Darwinian and contemporary evolutionary studies; concepts of species, natural selection and adaptation and its mechanisms; application of evolutionary theory of human culture; and debates over creationism and sociobiology.

Credit Hours: 3

Prerequisite Courses: PAR 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms of the conservation laws for mass, momentum and

energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 416 - Introduction to Material Science

The course introduces students to the physics governing the properties of materials in general. Topics include atomic structure and bonding and how these influence the structure (crystalline and amorphous) of solids, the origin of the physical (i.e., electrical, thermal, and mechanical) properties of solids, diffusion dynamics, and phase transistions.

Credit Hours: 3

Prerequisite Courses: PHY 202
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PHY 478 - Geophysical Fluid Dynamics

The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and atmosphere. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, and geostrophic adjustment. Credit is not allowed for both PHY 478 and PHY 578.

Credit Hours: 3

Corequisite Courses: PHY 475
Prerequisite Courses: PHY 350
Crosslisting: PHY 578
Course Repeatability: Course may not be repeated.

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone hydrodynamics, storm surge, tides, estuarine hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

PLS 209 - Environmental Politics

Role of politics in environmental policy. Topics include the politics of the environmental movement, the environment as a public policy issue, and the

development and impact of environmental policy.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation,

biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

REC 366 - Coastal Recreation Resource Management

An in-depth study of coastal legislation, resources, issues and management. Special attention is given to understanding recreation in the coastal zone, conflicts among competing coastal resource users, and current issues pertaining to North Carolina's coastal environment.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 41

Additional Information

A "C" (2.00) or better average is required on all courses taken within the department, and "C" (2.00) or better average on all required courses above the 199 level in the department.

German Studies, B.A.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in German studies a student must successfully complete GER 307, or GER 495, or GER 496.

Applied Learning Requirement:

To satisfy the applied-learning requirement for foreign language, a student must complete 3 credit hours of study abroad (at the intermediate level or above) or 3 credit hours of internship, directed individual study, practicum, honors, or service learning.

Requirements for a Major in German Studies for the B.A. Degree:

Including GER 201 and GER 202 or the equivalent. Thirty hours must be completed at the 300-400 level. GER 307 is required. No more than 6 hours may be obtained by means of a German Studies course taught in English. At least 6 hours must be at the 400 level. No more than 3 hours obtained by means of GER 491 or GER 498 will count towards the major.

Total: 36 hours

Additional Information:

A grade of "C-" or better is required in each course counted toward the major and a "C" (2.00) average or better for all courses counted toward the major. All majors must complete a series of German proficiency exams in order to graduate.

Healthful Living and Fitness Education, B.A.

Program Coordinator: Amelia (Kit) Huelskamp, Ph.D., M.A. I Program Coordinator & Associate Professor

(Healthful Living & Fitness Education Details I UNCW)

The Healthful Living and Fitness Education program is designed for students who want to enter K-12 teaching or the health, wellness and fitness industries. Students

must complete the core courses and then, choose from one of two concentrations: the K-12 Teacher Licensure concentration or the Lifetime Fitness and Health concentration. The K-12 Teacher Licensure concentration is accredited by the Council for the Accreditation of Educator Preparation (CAEP), and prepares students to teach, coach and assume leadership positions in K-12 schools. The Lifetime Fitness and Health concentration prepares students for a career in the health and fitness industry. A Master of Education (MED) degree and a Master of Arts in Teaching (MAT) are also offered, in conjunction with the Watson College of Education.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Healthful Living and Fitness Education, a student must successfully complete HFE 235.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Healthful Living and Fitness Education, a

student must successfully complete EDN 409 or HFE 348.

Requirements for a Major in Healthful Living and Fitness Education for the B.A. Degree:

I. Core (33 hours)

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXSL 216 - Human Anatomy and Physiology I Laboratory

EXSL 216 is the study of the anatomical and functional characteristics of the human body including the

skeletal, muscular, circulatory, and respiratory systems with emphasis on health and physical activity.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 216.
Course Repeatability: Course may not be repeated.

HEA 207 - Nutrition and Behavior

Application of the principles of nutrition as related to health; various levels of wellness; and practices of health care. Emphasis on basics of sound nutrition, requirements of various food elements, diet planning, diet patterns for specific age groups, nutritional fads and weight control.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 210 - Substance Abuse Prevention

Prevention education methods and strategies for substance abuse prevention for all age groups and

diverse populations. Special emphasis on evidence-based prevention strategies including both curriculum-based and community-programming tactics. Students will work with outside agencies to review current use of substance abuse prevention programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HFE 221 - First Aid and Injury Care

This course is designed to introduce students to the mechanisms, underlying prevention, and care of various injuries and illnesses associated with an active lifestyle. Topics include: emergency procedures, legal concerns and injury prevention and care. It also includes instruction to potentially obtain certification in the following: CPR/AED for the Healthcare Provider.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HFE 235 - Foundations of Health and Physical Education

Introductory course in the Health and Applied Human Sciences teacher education program that examines historical, sociological, and philosophical foundations of health and physical education. The course addresses past and current trends in K-12 health and physical education. The course introduces the national and state education standards for healthful living.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HFE 350 - Motor Behavior

Motor skill acquisition, control, and performance. Physiological and psychological principles of human growth and development. Includes analysis of the sequential progression of fundamental motor skills from infancy through adulthood with primary focus on school-age children.

Credit Hours: 3

Prerequisite Courses: (BIO 240 with a C- or better and BIOL 240 with a C- or better) or (EXS 216 with a

C- or better and EXSL 216 with a C- or better).
Course Repeatability: Course may not be repeated.

HFE 385 - Health and Physical Education Curriculum Development

Provides conceptual tools and analytical skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Provides the student with the knowledge, skills and resources to develop curricular materials consistent with state and national guidelines.

Credit Hours: 3

Prerequisite Courses: HFE 235 with a C- or better or PED 235 with a C- or better.
Course Repeatability: Course may not be repeated.

HFE 387 - Physical Activity Pedagogy II

Provides students theory, technique, and methods of developing and implementing developmentally appropriate healthful living for grades 6-12. Emphasis

on teaching effectiveness, planning, writing learning objectives, integration of technology and contemporary curricular models. Field experience is required.

Credit Hours: 0

Prerequisite Courses: HFE 235 with a C- or better or PED 235 with a C- or better.
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

HFE 391 - Health Behavior Theory Applications

The course will utilize authentic application of health behavior theory constructs to current health issues and trends (nutrition, physical activity, obesity, safer sex practices, alcohol, tobacco, and other drugs) to improve teaching and behavior modification effectiveness.

Credit Hours: 3

University Studies: Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

HFE 415 - Adapted Physical Activity

Provide students theoretical and practical knowledge to plan and implement appropriate physical activity programs for individuals with disabilities in integrated and inclusive settings.

Credit Hours: 0

Prerequisite Courses: (EXS 216 with a C- or better and EXSL 216 with a C- or better) or (BIO 240 with a C- or better and BIOL 240 with a C- or better).
Additional Restrictions/Requirements: Senior standing, prerequisite courses, or consent of instructor.
University Studies: Writing Intensive, Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability Insurance Additional Course Fee Schedule

II. Concentration (37-43 hours)

Students must select one of the following concentrations:

K-12 Teacher Licensure Concentration (43 semester hours)

This concentration prepares students to become physical education and health teachers in K-12 schools. Students must obtain a 2.7 cumulative GPA and be admitted to the Watson College of Education prior to enrollment in EDN 352 and EDN 409.

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EDN 352 - Developing Reading and Writing Competence in the Middle Grades

Develops understanding of reading and writing processes in the broad context of communication. Presents strategies for fostering and evaluating interest, fluency, and skill in reading and writing, both in developmental literary classes and in middle level, content subjects. Topics include organizational and instructional strategies for the development of reading and writing ability, techniques for motivating and guiding readers and writers, and strategies for study and comprehension, which support learning in all areas of the middle school curriculum. Field experiences required.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Watson School of Education.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 409 - Student Teaching

Physical education and music education majors do not need to take corequisite course. Students will be assigned full-time to practicum sites within their areas of specializations. During the course, students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practical are offered in the following areas of specialization: biology, chemistry, English, French, geology, history, mathematics, music, physical education (and health), physics, social studies, and Spanish.

Credit Hours: 12

Corequisite Courses: EDN 408
Additional Restrictions/Requirements: Corequisite course, and as specified for EDN 408.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

HEA 205 - Human Sexuality

Taught from a health educator perspective, focusing on empirically based information covering: human sexual response, development of sex roles and orientation, reproduction, birth control, and STI's. Provides opportunities for students to review their beliefs in the context of the historic, cultural and social factors that impact how we perceive sexuality.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 304 - Comprehensive School Health Education, Grades K-12

An overview of the school health education program. Emphasis on methods and materials for health instruction in grades K-12.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

HFE 300 - Principles of the edTPA: Teacher Performance Assessment

This course provides Healthful Living Education majors with opportunities to apply content and skills from their education coursework to teacher licensure assessments such as the edTPA. The course focuses on how teacher candidates can use educational theory, health behavior theory, academic language, differentiation, and developmentally appropriate practices to be successful in obtaining a teaching license in the state of North Carolina. Co-requisite: HEA 304 OR HFE 386.

Credit Hours: 1

Corequisite Courses: HEA 304
Additional Restrictions/Requirements: Restricted to Healthful Living and Fitness Education majors, K-12 Teacher Licensure Track.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Major Restriction Healthful Living and Fitness Education

HFE 410 - Seminar in Physical Education

Culmination of professional study and initiation into student teaching and the teaching profession. Provides opportunities to extend and apply understandings of the roles of the teacher as a decision-maker, particularly in the areas of planning, instruction, management, and evaluation.

Credit Hours: 1

Prerequisite or Corequisite Courses: EDN 409 with a C- or better.
Course Repeatability: Course may not be repeated.

HFE 345 - Childhood Obesity

Focuses on the methods used in the assessment, prevention and treatment of childhood obesity. In addition, this course will examine the etiology of obesity and the role that human behaviors and an active lifestyle play in the overall health and well-being of children.

Credit Hours: 3

University Studies: Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

HFE 386 - Physical Activity Pedagogy I

Provides students theory, technique, and methods of developing and implementing developmentally appropriate healthful living for grades K-5. Emphasis on teaching effectiveness, planning, writing learning objectives, integration of technology and contemporary curricular models. Field experience is required.

Credit Hours: 4

Prerequisite Courses: HFE 235 with a C- or better or PED 235 with a C- or better.
Course Repeatability: Course may not be repeated.

ATR 220 - Functional and Structural Kinesiology

Prerequisite: BIO 201; Corequisites: BIO 240, BIOL 240 and BIO 241, BIOL 241 or EXS 216, EXSL 216 and EXS 217. This course is designed to provide students with a foundation of structural anatomy and

basic kinesiology concepts, with a focus on anatomy of the skelton, muscles, and ligaments in relation to functional human movement.

Credit Hours: 3

Corequisite Courses: BIO 240 and BIOL 240 and BIO 241 and BIOL 241 and EXS 216 and EXSL 216 and EXS 217
Prerequisite Courses: BIO 201
Course Repeatability: Course may not be repeated.

Lifetime Fitness & Health Concentration (37 semester hours)

This concentration prepares students for a career in the health and fitness industry.

ATR 220 - Functional and Structural Kinesiology

Prerequisite: BIO 201; Corequisites: BIO 240, BIOL 240 and BIO 241, BIOL 241 or EXS 216, EXSL 216 and EXS 217. This course is designed to provide students with a foundation of structural anatomy and basic kinesiology concepts, with a focus on anatomy of

the skelton, muscles, and ligaments in relation to functional human movement.

Credit Hours: 3

Corequisite Courses: BIO 240 and BIOL 240 and BIO 241 and BIOL 241 and EXS 216 and EXSL 216 and EXS 217
Prerequisite Courses: BIO 201
Course Repeatability: Course may not be repeated.

EXS 321 - Biomechanics

Neuromuscular and mechanical principles of human movement with emphasis on movement analysis most often encountered in fitness activities and sport skills.

Credit Hours: 3

Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), (EXS 216 with a "C" or better and EXSL 216 with a "C" or better) or (BIO 240

with a "C" or better and BIOL 240 with a "C" or better) and (EXS 310 with a "C" or better OR CHHS 411 with a "C" or better).
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission by instructor at the time the course begins.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

EXS 314 - Entrepreneurship, Leadership, and Legal Concepts in the Health and Fitness Industry

Introduction to legal aspects of amateur sport and physical activity emphasizing knowledge required of the exercise science and sport professional. Focus upon current terminology, legal procedures and operations, and case studies. Furthermore, this course will focus upon managerial theories and its applications in exercisescience and allied-health organizations. Specific topics include organizational theories, communication, leadership, motivation, managerial skills, functions of management, issues of policies, marketing, and financial aspects of management.

Credit Hours: 3

Prerequisite Courses: EXS 210.
Course Repeatability: Course may not be repeated.

GRN 101 - Introduction to Gerontology

Introduction to the social, psychological, physiological, and philosophical aspects of aging through reading, writing, and fieldwork.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

HEA 325 - Health and Aging

An introduction to health characteristics of the aging population. Topics include biomedical changes of various body systems and lifestyle factors such as nutrition, stress, drugs, exercise and sexuality. Field experience required.

Credit Hours: 3

Prerequisite Courses: GRN 101
Course Repeatability: Course may not be repeated.

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CHHS 350 - Leadership Skills for Adventure Exercise

This course is a 3-credit hour course designed to provide skills necessary for wilderness travel and outdoor adventure. It will emphasize effective leadership for adventure programming, knowledge of backpacking skills, wilderness and remote first aid, proper physical conditioning, route finding, equipment selection, and an understanding and respect for the environment. This course incorporates lecture sessions followed by an adventure trip, where students can apply course principals and skills. Specifically, we will meet face-to-face for 3 hours weekly over the final 10

weeks of school, experience a 4-day adventure trip over (add specific dates each semester here), and then reflect on the adventure experience upon our return (via online assignment).

Credit Hours: 3

Additional Restrictions/Requirements: This course will require participation in vigorous physical activity (i.e. over ground walking while wearing a backpack equivalent to about 30% of your body weight). Students must complete a Physical Activity Readiness Questionnaire (PAR-Q) on the first day of class. If deemed necessary, students must follow up and get approval to participate in the course from a medical doctor.
Course Repeatability: Course may be repeated.

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EXS 314 Entrepreneurship, Leadership, and Legal Concepts in the Health and Fitness Industry *OR* CHHS 350 Leadership Skills for Adventure Exercise

HFE 336 - Coaching, Sport, and Society

The application of philosophical and psychological knowledge and principles to the administration and coaching of sports. This course also explores the role of sports around the world, and how the games we watch and play shape identity, culture, and society.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

HFE 345 - Childhood Obesity

Focuses on the methods used in the assessment, prevention and treatment of childhood obesity. In addition, this course will examine the etiology of obesity and the role that human behaviors and an active lifestyle play in the overall health and well-being of children.

Credit Hours: 3

University Studies: Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

WPA 210 - Plant-Based Living for Wellness

This course is designed to explore plant-based living including if plant-based diets may offset the world's population growth and environmental concerns related to factory farms and climate change, the role of plant-

based lifestyles, physical activity, and stress management in chronic disease prevention, reviewing scientific literature regarding plant-based living, and the principles of planning a healthful whole food plant-based meal plan.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EXS 322 - Sports Nutrition

Relationship of exercise, physical activity, and performance to human nutrition. In-depth information on human energy systems, weight management, macronutrients, micronutrients, and ergogenic aids.

Credit Hours: 3

Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), EXS 310 with a "C" or better or CHHS 411 with a "C" or better.

Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

HFE 348 - Practicum in Lifetime Fitness and Health

Supervised practicum in a health and fitness setting. Relates theory to practical application in the field. Placements chosen from community, commercial, personal training, fitness and sports settings for people of all ages. Requires a minimum of 100 hours of field work.

Credit Hours: 3

Prerequisite Courses: HFE 390 with a C- or better or PED 390 with a C- or better.
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

HFE 386 - Physical Activity Pedagogy I

Provides students theory, technique, and methods of developing and implementing developmentally appropriate healthful living for grades K-5. Emphasis on teaching effectiveness, planning, writing learning objectives, integration of technology and contemporary curricular models. Field experience is required.

Credit Hours: 4

Prerequisite Courses: HFE 235 with a C- or better or PED 235 with a C- or better.
Course Repeatability: Course may not be repeated.

CHHS 425 - Applications in Health and Wellness Coaching

In this course, students will learn and apply mindfulness, relationship and communication health and wellness coaching skills. This course will introduce students to evidence-based techniques such as motivational interviewing and solution focused coaching

to build capacity for lasting behavioral change. Coaching session and program structure and ethical and legal issues will be explored. The curriculum is aligned with the standards published by the National Board for Health and Wellness Coaching.

Credit Hours: 3

Corequisite Courses: CHHS 426.
Prerequisite Courses: CHHS 325.
Course Repeatability: Course may not be repeated.

AND

CHHS 426 - Health and Wellness Coaching Skills Lab

This course is designed to provide students with the opportunity to develop practical skills to become a capable, competent health and wellness coach. Students will engage in didactic learning with peers to practice health and wellness coaching skills. The course utilizes the standards published by the National Board for Health and Wellness Coaching to assess practical skills.

Credit Hours: 1

Corequisite Courses: CHHS 425.
Prerequisite Courses: CHHS 325.
Course Repeatability: Course may not be repeated.

HFE 390 - Advanced Concepts of Personal Training

This course provides students with the necessary theoretical competencies required of a qualified personal trainer. Each content domain covered on the NCSF national certification exam is supported by activities and teaching strategies so students may successfully challenge the NCSF-CPT exam upon completion of the program.

Credit Hours: 3

Prerequisite Courses: EXS 216 and EXSL 216
Course Repeatability: Course may not be repeated.

REC 380 - Marketing for Tourism, Recreation, and Sport

Development of marketing plans and strategies for recreation, sport and tourism industries. Emphasis on analyzing the marketing process and planning the marketing mix.

Credit Hours: 3

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Degree Requirements: 70-76 hours

Additional Information for Teacher Licensure:

Students within the K-12 Teacher Licensure Track are required to take 18 hours in an academic concentration area. Healthful Living and Fitness Education majors in the K-12 Teacher Licensure concentration are encouraged to the Community Health concentration. The 18 hours of health content for the Community Health concentration are satisfied through the completion of the following courses: HEA 205, HEA

207, HEA 210, HEA 304, HFE 221, and HFE 391 which are embedded within the degree core requirements and the K-12 Teacher Licensure concentration.

In order to be eligible for an internship, students must:

- Be admitted to the Watson College of Education
- Have a cumulative GPA of 2.7 or better
- Have completed all required education courses and ideally all academic major courses
- Complete an application for internship at least one semester in advance of the intended student teaching semester and attend orientation meetings
- Earn a grade of 'C-' or better in all required health and physical education courses.

Information Technology, B.S.

The Information Technology (IT) major is an interdisciplinary major shared by two departments: the Department of Computer Science in the College of Science and Engineering and the Congdon School of Supply Chain, Business Analytics, and Information Systems in the Cameron School of Business. Admission to the Cameron School of Business is not

required for students in the IT major. The program develops students' skills in the critical and practical understanding of information technology and prepares them for information technology-related work and/or further study at the graduate level. The curriculum provides a foundation for information technology professionals to have a perspective of the rapidly expanding and evolving science of technology and how it can be managed and leveraged to support business activities. The primary educational objective of the program is to produce graduates who can enter into and advance in the professions of information technology, as well as continue their education and obtain advanced degrees in this and related fields.

The B.S. Information Technology degree is offered with the following concentration areas: Business Application Development, Business Data Management, Cloud Computing, Computer Science, Criminology, Cyber Security, General Information Technology, and Networking and Communications.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Information Technology a student must

successfully complete CSC 385, which is taken as part of the core requirements for the degree.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information

Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

Applied Learning Requirement

The Applied Learning Requirement for the B.S. degree in Information Technology is satisfied upon successful completion of MIS 411, which is taken as part of the core requirements for the degree.

MIS 411 - Information Systems Analysis

Processes and methods used for identifying and documenting information systems requirements and developing systems specifications. Topics include the systems development life cycle, analysis tools, development methodologies, and techniques for effective communication.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 315.
Prerequisite Courses: Prerequisite: CIT 213 with a minimum grade of C-, or prerequisite/corequisite: MIS

315.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Requirements for a Major in Information Technology for the B.S. Degree

A student must complete the following to fulfill the degree requirements. A grade point average of 'C' (2.00) or better computed over all the courses used to fulfill the requirements of the major is required. No grade below 'C-' will be accepted towards graduation in a core or required course.

Core Courses (30 Credit Hours)

CIT 110 - Fluency in Information Technology

Information representation, the Internet and HTML, algorithmic thinking and programming, language

translation, modeling and abstraction, algorithmic complexity and non-computability, machine architecture and parallel computation, networks and communication, database principles, multimedia, social impacts of computing.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CIT 225 - Linux Administration

Install, configure, securely administer Linux operating system platforms. Topics include Linux operating systems concepts, system installation and configuration, introduction to networking (protocols, IP addressing, ports, subnetting), security, firewalls, packet filtering, networked file systems, lightweight directory access protocol, virtualization, Linux-Windows integration, and Linux shell programming.

Credit Hours: 3

Prerequisite Courses: CSC 121 or CSC 131 with a grade of "C-" or better in either course, or instructor approval.
Course Repeatability: Course may not be repeated.

CIT 380 - Platform Technologies

Study of basic operation of platform technologies, including general purpose computers and peripherals, and communication infrastructure such as transmission systems (copper, wireless, optical fiber), networking and networking devices. Introduces digital data representation, including number systems and character encodings.

Credit Hours: 3

Prerequisite Courses: CIT 225 and MIS 352.
Course Repeatability: Course may not be repeated.

CIT 410 - Web Application Development

Structured approach to building and maintaining dynamic and interactive Web sites. Emphasis on application, design and development. Students gain a thorough understanding of server-side scripting, form

validation, and Web-site security while advancing their understanding of database design principles and SQL. Students create a database-driven Website.

Credit Hours: 3

Prerequisite Courses: MIS 310 or CSC 365.
Course Repeatability: Course may not be repeated.

CIT 425 - Human-Computer Interfaces

Human-computer interaction for information technology professionals. Analysis and design of systems from the point of view of HCI.

Credit Hours: 3

Prerequisite Courses: MIS 310
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CYBR 324 - Network Security

Study of the concepts used when defending a network and exploration of the basic tools and techniques that

can be employed to protect a network and communication assets from cyber threats. Study of the knowledge required to administer and maintain a comprehensive enterprise security infrastructure. Introduction to common security architectures for the protection of information systems and data.

Credit Hours: 3

Prerequisite Courses: MIS 320 or MIS 323 or CSC 344
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

MIS 310 - Web Development Languages

Study of the design and creation of web pages that support traditional screens, tablets, and smart devices. Topics include page structure, human-computer interface design, style sheets, reusability, and design concepts. Best industry practices in web development, such as client-side scripting languages and Search Engine Optimization (SEO) techniques, will also be considered.

Credit Hours: 3

Prerequisite or Corequisite Courses: or (CSC 112 or CSC 131 or MIS 216)
Prerequisite Courses: CIT 110 or MIS 213
Additional Restrictions/Requirements:

One prerequisite or corequisite course is required: Choose CIT 110 or MIS 213 as a prerequisite course or one of CSC 112, CSC 131, or MIS 216 as a pre- or corequisite course.

Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Computer Science or declared BA Digital Arts or declared Cybersecurity minor or declared Digital

Arts minor.
Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Computer Science or BA Digital Arts**Minor Restriction** Cybersecurity Minor or Digital Arts Minor

MIS 352 - Windows Systems Administration

Provides students with skill to perform basic operations involved in system administration of Microsoft Windows based systems. Provides students with the ability to apply methods such as managing applications, services, and network ports to improve the robustness of operating systems.

Credit Hours: 3

Prerequisite Courses: MIS 320 or MIS 323 or CSC 344 with a minimum grade of C-
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS

Cybersecurity major or declared BS Intelligent Systems Engineering major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Intelligent Systems Engineering**Minor Restriction** Cybersecurity Minor

MIS 411 - Information Systems Analysis

Processes and methods used for identifying and documenting information systems requirements and developing systems specifications. Topics include the systems development life cycle, analysis tools, development methodologies, and techniques for effective communication.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 315.
Prerequisite Courses: Prerequisite: CIT 213 with a minimum grade of C-, or prerequisite/corequisite: MIS 315.
Additional Restrictions/Requirements: Admission to

Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

MIS 480 - IT Resource Planning and Management

This course will explore the management and strategic alignment of IT resources within the organization. Topics include IT strategy, IT alignment, planning and managing technology resources and integration of emerging technology into the organization.

Credit Hours: 3

Prerequisite Courses: MIS 411 with a minimum grade of C-.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Required Courses (25 Credit Hours)

CIT 213 - Introduction to Databases: Techniques and Technologies

Fundamental concepts of database management systems, including advantages of using database management systems, data modeling, relational database design, query-building, security, privacy and ethical issues, and introductions to Web-based processing, Big Data concepts, and non-relational models.

Credit Hours: 3

Prerequisite Courses: CIT 110
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or

more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

MIS 320 - Network Fundamentals

Introduction to the OSI model, network topologies, IP addressing and subnet masks, simple routing techniques, and basic switching terminology. Topics include the basic functions of the seven layers of the OSI model, different classes of IP addressing and subnetting, router login scripts.

Credit Hours: 3

Prerequisite or Corequisite Courses: CIT 110 or CYBR 201 or MIS 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Cybersecurity major or declared BS Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity Minor

CSC 344 - Computer Networks

Introduction to computer networks, focusing on Internet architecture and protocols. Topics include layered network architectures, addressing, naming, forwarding, routing, communication reliability, client-server model, distributed computing, web and email protocols, and network security. Students acquire practical experience by using a network protocol analyzer and programming reduced versions of real Internet protocols.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 231 or CYBR 251, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

MIS 316 - Business Application Development

Intermediate programming in an event driven, rapid application development context. Emphasis is on writing high-quality code that is easy to debug, test, and maintain, culminating in database interaction.

Credit Hours: 3

Prerequisite or Corequisite Courses: and MIS 216 and MIS 315

Prerequisite Courses: CSC 112 or CSC 131
Additional Restrictions/Requirements: Students must take MIS 315 as a prerequisite or corequisite. Students must also take one of the following three courses (CSC 112 or CSC 131 as a prerequisite) or (MIS 216 as a prerequisite/corequisite).
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Concentration Courses (12-13 Credit Hours)

Students choose one of the following concentrations. Students who wish to complete two concentrations may simultaneously apply up to 3 credit hours of course work towards both concentrations if the course is approved in both concentrations. Students may, with prior approval of the Dean's Office, select four three-credit hour courses in MIS, CIT, or CSC undergraduate

courses numbered 300 and above for the generalist concentration. Students who pursue the General Information Technology concentration may not complete a second concentration. A grade of C- or better is required in the 12 hours of coursework approved for the concentration.

Business Applications Development (12 Credit Hours)

Business Applications Development is the process of creating computer programs to perform the different tasks that a business requires. Applications help businesses interact with customers, automate processes, and increase efficiency. Graduates of the BAD concentration know how to manage the key steps of the app building process and deliver apps of value.

Required Course (3 Credit Hours)

MIS 419 - Information Technology Project Management

This course introduces the fundamentals of project management, beginning with project definition through the post-project review. There will be emphasis placed

on applying project management concepts and techniques to information system projects. This includes consideration of project planning, scheduling, budgeting, human resources and the consideration of change management required to implement projects.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 411.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration and students majoring in Information Technology B.S.
Course Repeatability: Course may not be repeated.

Concentration Electives (9 Credit Hours)

Choose three courses from the following:

CSC 315 - Mobile Application Development

Concepts and technologies for developing applications on mobile devices, including mobile-platform programming, memory-management, object-oriented paradigms, model-view-controller design, mobile-centric frameworks for networking, multimedia,

location-based services, and interface design. Application design, programming, and implementation for a current mobile platform.

Prerequisite Courses: CSC 331 with a minimum grade of "C".
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

CYBR 364 - Web Applications Security

Introduction to web application security principles focusing on identifying and mitigating top ten vulnerabilities through common application testing methodologies. Exploration of various web application architectures and backend & frontend technologies. Hands-on application of security testing tools and techniques to assess and enhance the security posture of web applications throughout their development life cycle.

Credit Hours: 3

Prerequisite Courses: CSC 131 or MIS 316
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

MIS 303 - Programming for Analytics

This course introduces the essential general programming concepts and techniques for data

analytics. Students will learn programming foundations, application development, and how to integrate applications with business operations. The course covers hands-on issues in programming for analytics, which includes accessing data, manipulating data objects, analyzing data using common statistical methods, generating reproducible statistical reports, and creating informative visualizations.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 328 - Application Lifecycle Management

Modern software development processes, practices, and management. Topics include development operations (DevOps) techniques such as configuration

management, platform deployment and testing & monitoring of applications. Students will have hands-on experience with an enterprise level application lifecycle management system.

Credit Hours: 3

Prerequisite Courses: MIS 316
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 331 - Mobile Applications Development

The course focuses on cross platform development of mobile applications. Topics covered include mobile app development with integration and interface design, working with persistent data, list, hardware/sensors and business issues including app publishing and distribution. Course delivery includes lectures, hands-on exercises, and projects covering app development

across various platforms.

Credit Hours: 3

Prerequisite Courses: MIS 216
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 413 - Systems Design/Capstone Project

Involves the analysis, design and implementation of a real world project employing a 3-tier development process. New skills introduced include advanced web development concepts, emerging web tools, and project management. Topics expanded are database design, systems analysis and design, UML, and technical communication.

Credit Hours: 3

Prerequisite Courses: MIS 316 and MIS 411.
Additional Restrictions/Requirements:
Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Business Data Management (12 Credit Hours)

Business Data Management is the practice of collecting, keeping, and using business data securely, efficiently, and cost-effectively. Graduates of the BDM concentration know how to create, access, and update data across a diverse data tier; store data in the cloud and on premises; provide high availability and disaster recovery; utilize data in various apps and systems; ensure data privacy.

Required Course (3 Credit Hours)

MIS 327 - Data Center Management

This course introduces fundamentals of storage, networking, and computing infrastructure in a modern data center environment; terminology and basic concepts relating to storage, networking, and computing technologies. Data Center architecture and enabling concepts such as virtualization, pooling, provisioning, monitoring, scaling, business continuity, backup, replication, cloud computing, security, flexibility, management, and cost considerations are covered.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity

Concentration Electives (9 Credit Hours)

Choose three courses from the following. At least three credit hours of the concentration electives must come from courses with an MIS prefix.

BAN 305 - Introduction to Business Analytics

Application of statistical methods to business problems; topics include chi-square analysis, the F distribution, one-way and two-way analysis of variance, simple and multiple regression analysis, and introduction to forecasting with regression models; use of computer programs in solving statistical problems.

Credit Hours: 3

Prerequisite Courses: BAN 280.
Course Repeatability: Course may not be repeated.

BAN 306 - Communicating Data with Storytelling

This course provides an introduction as well as hands-on experience in descriptive analytics and data visualization. It introduces students to principles for creating meaningful analysis and displays of quantitative and qualitative data to facilitate managerial decision-making.

Credit Hours: 3

Prerequisite Courses: MATH 111 or MATH 150 or MATH 160
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration or BS Information Technology

BAN 402 - Predictive Analytics

Leveraging data to add value to business is of critical importance in our modern society. This course will focus on the analysis of data in order to create

predictions and will examine a variety of predictive techniques to extract information from data. These topics will include: multiple linear regression, logistic regression, classification, clustering, text mining, neural networks, and others. This course will also discuss the challenges presented by large datasets and describe techniques such as data cleaning and visualization.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 305.
Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business and student in the BAN minor.
Course Repeatability: Course may not be repeated.
Major Restriction Information Technology (IT)**Minor Restriction** Business Analytics (BAN)

BAN 403 - Optimizing Data-driven Decisions

Prescriptive Analytics deals with developing analytical models to solve business problems. Prescriptive models are used when a business needs to optimize

operational decisions. The solution from these models provide the best solution (profit maximization, cost minimization, minimization of resource utilization, etc.) to the operational decision problems. Students will use MS Excel and AMPL as software tools for optimization in this course.

Credit Hours: 3

Prerequisite Courses: BAN 304.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

CYBR 322 - Information Assurance

Exploration of the concepts of information assurance, audit and security assessment to measure compliance with applicable laws and regulations, and cyber risk management. Hands-on experience applying the NIST Risk Management Framework to government systems to protect the system's unique mission.

Prerequisite Courses: CYBR 201
Additional Restrictions/Requirements: Admission to

the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administation**Minor Restriction** Cybersecurity

MIS 303 - Programming for Analytics

This course introduces the essential general programming concepts and techniques for data analytics. Students will learn programming foundations, application development, and how to integrate applications with business operations. The course covers hands-on issues in programming for analytics, which includes accessing data, manipulating data objects, analyzing data using common statistical methods, generating reproducible statistical reports, and creating informative visualizations.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 305 - Data Visualization

This course provides design principles for creating displays of quantitative and qualitative data to facilitate managerial decision-making. The use of popular and powerful data visualization and dashboarding software tools is emphasized.

Credit Hours: 3

Prerequisite Courses: BAN 305
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 306 - Text Data Analytics

The past decade has witnessed an explosion of digital text-based data produced by social media platforms, websites, emails, and the digitization of historical archives. These new data sources hold enormous potential to address a range of problems in various fields. Quantitative text analytics techniques allow us to derive insights from these data. This course explores methods for pre-processing, analyzing, and visualizing text-based data. Students will use current software tools to perform data analytics.

Credit Hours: 3

Prerequisite Courses: BAN 280 or STT 215
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

MIS 326 - Digital Transformation in Business

Introduction to the intersection of digital technologies and the transformation of modern business functions. Focus on cloud computing, the Internet of Things, and artificial intelligence, with consideration of business strategies, models, and operations. Based on real-world case discussions and hands-on exercises with practice in critical thinking and other soft skills.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.

Major Restriction BS Business Administration or BS Information Technology

MIS 329 - Reporting and Business Intelligence

Modern operational reporting and business intelligence (BI) techniques facilitate enterprise decision making by supporting data manipulation, analysis, and visualization. This class is a study of reporting and BI processes, practices, and management and their role in enterprise decision making. Topics include data manipulation and analysis, data visualization, interactive dashboards, reporting, charting, and graphs generation. The class will consist of hands-on experience with a modern, enterprise-level report writing software.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Major Restriction BS Business Administration or BS Information Technology

MIS 330 - Data Storage and Management

Design, construction, and management of hybrid storage. Topics include storage of documents, key-value pairs, objects, files, tables and caches, data and storage area networks. Techniques to be covered include replication, compression, authentication, authorization, load balancing, and data management. The course includes hands-on experience with modern, enterprise-level storage products.

Credit Hours: 3

Prerequisite Courses: MIS 327
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major.
Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology

Cloud Computing (12 Credit Hours)

Cloud computing is essential for information technology practitioners as it provides specialized knowledge and skills that align with the increasing demand for cloud-based solutions in the industry. This concentration equips professionals with the expertise needed to effectively design and manage cloud infrastructures, making them more competitive in a rapidly evolving job market.

Required Courses (9 Credit Hours)

CIT 301 - Cloud Computing & Virtualization

Survey, configuration, and deployment of cloud computing technologies and services, including but not limited to: virtualization environments, SaaS, PaaS, DaaS, IaaS, mass storage, virtualization compute resources, SQL and non-SQL databases, cloud development tools, deployment models, load balancing, automatic provisioning, Internet of Things, VPNs, firewalls, security, two-factor authentication, legal/privacy issues.

Credit Hours: 3

Corequisite Courses: Co-requisite: CSC 344 or MIS 320.
Prerequisite Courses: Prerequisite: CIT 225.
Course Repeatability: Course may not be repeated.

CIT 361 - Cloud DevOps

An exploration of DevOps practices in cloud environments. Students learn how to leverage cloud infrastructure, automation tools, and continuous integration/continuous deployment (CI/CD) pipelines to streamline development and delivery. Students are equipped to implement and manage cloud-based DevOps pipelines.

Credit Hours: 3

Prerequisite Courses: CIT 301 and MIS 316
Course Repeatability: Course may not be repeated.

CYBR 431 - Cloud Security

Introduction to cloud security architecture and exploration of the guiding security design principles, design patterns, industry standards, and associated

technologies. Study of regulatory compliance requirements critical to the design, implementation, delivery, and management of secure cloud-based services.

Credit Hours: 3

Prerequisite Courses: CIT 301.
Course Repeatability: Course may not be repeated.

Concentration Electives (3 Credit Hours)

Choose one course from the following:

CIT 461 - Cloud Web Services

An in-depth exploration of a cloud platform including learning to use the platform to develop scalable, secure, and efficient web applications. Topics include serverless computing, databases, storage solutions, and APIs. Provides students with the tools to design and implement cloud-native web applications.

Credit Hours: 3

Prerequisite Courses: CIT 361 and CYBR 431
Course Repeatability: Course may not be repeated.

CIT 498 - Internship in Information Technology

Academic training and practical experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Written experience report and oral presentation required.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fee Schedule

Computer Science (13 Credit Hours)

The computer science concentration provides students with a more in-depth understanding of computer programming and allows students to take higher level courses in database management, client and server-side web programming, and mobile app development.

Required Courses (7 Credit Hours)

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

Concentration Electives (6 Credit Hours)

Choose two courses from the following:

CSC 315 - Mobile Application Development

Concepts and technologies for developing applications on mobile devices, including mobile-platform programming, memory-management, object-oriented paradigms, model-view-controller design, mobile-centric frameworks for networking, multimedia, location-based services, and interface design. Application design, programming, and implementation for a current mobile platform.

Prerequisite Courses: CSC 331 with a minimum

grade of "C".
Course Repeatability: Course may not be repeated.

CSC 355 - Database Design and Implementation

Introduction to database concepts and database management systems. Topics include data models (hierarchical, network, relational, parallel, distributed and NoSQL), data modeling, data description languages, data manipulation languages, database administration, data warehouses, and front-end development. A group project designing and implementing a relational database is required.

Prerequisite Courses: CSC 231 (with a minimum grade of C)
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor**.**
Course Repeatability: Course may not be repeated.

CSC 365 - Client-Side Web Development

Development of applications for the World Wide Web focusing on client-side languages. Introduction to current principles, standards, and best practices in website design, usability, accessibility, and

management through project-based skills. Development in standards-compliant markup, styling, and scripting, including web services programming.

Credit Hours: 3

Prerequisite Courses: CSC 231 or permission of instructor.
Course Repeatability: Course may not be repeated.

CSC 465 - Server-Side Web Development

Hands-on development of dynamic web applications via server-side languages and corresponding database APIs; implementation of industry best practices regarding data; secure authentication; digital certificates; session-handling; introduction to cryptography and e-commerce. Practical experience with form validation and website security using database principles and query techniques.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 365 or

permission of instructor.
Course Repeatability: Course may not be repeated.

Criminology (12 Credit Hours)

Assumes completion of CRM 105 to fulfill university studies credit for "Understanding Human Institution Behaviors." By applying criminological principles, IT professionals can better anticipate potential threats and design systems that mitigate risks, ultimately enhancing the overall security posture of organizations.

Required Course (3 Credit Hours)

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

Concentration Electives (9 Credit Hours)

Choose three courses from the following:

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

CRM 301 - Sociological Data Analysis and Interpretation

Instruction in computer-assisted univariate and bivariate analysis and interpretation of social science

data. This course satisfies the department computer competency requirement.

Credit Hours: 3

Prerequisite Courses: CRM 105 or SOC 105, and CRM 300 or SOC 300, STT 215 or MAT 101 or higher (excluding MAT 141, MAT 142)
University Studies: Common Requirements/Critical Reasoning
Crosslisting: SOC 301
Course Repeatability: Course may not be repeated.

CRM 390 - Media, Crime, and Justice

Examination of the relationship between mass media, crime, and criminal justice with special emphasis on how media images affect crime and justice attitudes, ideology, and policy. Includes examination of entertainment and news media in both electronic and print forms.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 460 - Crime and Public Policy

Study of crime policies in the justice system with emphasis on theoretical and empirical merits of various crime reduction strategies. Qualitative and quantitative methods used to evaluate crime control policies.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CYBR 366 - Digital Forensics

Introduction to digital forensics and evidence-handling techniques for different types of information technologies and forms of data. Exploration of the basic principles of digital forensics. Introduction to the legal requirements for collecting, seizing, and protecting digital evidence. Application of digital forensics techniques throughout an investigation life cycle.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 324
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CIT 498 - Internship in Information Technology

Academic training and practical experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Written experience report and oral presentation required.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fee Schedule

Cybersecurity (12 Credit Hours)

Students completing the cybersecurity concentration will graduate with essential skills needed as part of the Center of Academic Excellence in Cyber Defense Education (CAE-CD) designated by the NSA and the DHS and will have the skills necessary for thinking critically about cybersecurity issues.

Required Courses (9 Credit Hours)

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and

processes.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CYBR 322 - Information Assurance

Exploration of the concepts of information assurance, audit and security assessment to measure compliance with applicable laws and regulations, and cyber risk management. Hands-on experience applying the NIST Risk Management Framework to government systems to protect the system's unique mission.

Prerequisite Courses: CYBR 201
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.

Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administation**Minor Restriction** Cybersecurity

CYBR 365 - Ethical Hacking

Introduction to organizational security posture improvement through penetration testing and ethical hacking. Study of ways to exploit vulnerabilities to gain access to a system. Exploration of common security architectures for the protection of information systems and data.

Credit Hours: 3

Prerequisite Courses: CIT 225 and MIS 352
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information

Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

Concentration Electives (3 Credit Hours)

Choose one course from the following:

CIT 301 - Cloud Computing & Virtualization

Survey, configuration, and deployment of cloud computing technologies and services, including but not limited to: virtualization environments, SaaS, PaaS, DaaS, IaaS, mass storage, virtualization compute resources, SQL and non-SQL databases, cloud development tools, deployment models, load balancing, automatic provisioning, Internet of Things, VPNs, firewalls, security, two-factor authentication, legal/privacy issues.

Credit Hours: 3

Corequisite Courses: Co-requisite: CSC 344 or MIS 320.
Prerequisite Courses: Prerequisite: CIT 225.
Course Repeatability: Course may not be repeated.

CYBR 245 - Cryptography and Data Security

Introduction to basic concepts in cryptography, including encryption/decryption, sender authentication, data integrity, non-repudiation, attack classification (ciphertext-only, known plaintext, chosen plaintext, chosen ciphertext), secret key (symmetric) cryptography and public key (asymmetric) cryptography, and information-theoretic security (one-time pad, Shannon Theorem). Introduction to data security topics authenticity, anonymity, and integrity.

Credit Hours: 3

Prerequisite Courses: CYBR 201 with a C or better and CSC 131 with a C or better.
Additional Restrictions/Requirements: CYBR 201 with a C or better and CSC 131 with a C or better.
Course Repeatability: Course may not be repeated.

CYBR 251 - Secure Programming Foundations

Exploration of programming and machine constructs behind code vulnerabilities and best practices for developing secure programs. Introduction to low-level code mechanics in C and assembly language

frequently leveraged in code exploitation. Study of programming principles that guard against software vulnerabilities, including pointers, hardware control, overflows, input sanitization, data obfuscation, secure design, and static analysis.

Credit Hours: 3

Prerequisite Courses: CSC 131.
Course Repeatability: Course may not be repeated.

CYBR 362 - Information Assurance Policy

Exploration of Information Assurance (IA) policies and frameworks from the organizational mechanics of developing policies to the psychology of implementation. Review of various information security and assurance concepts in clear, simple terms such as governance, regular mandates, business drivers, legal considerations and more while effectively balancing technical knowledge and soft skills.

Credit Hours: 3

Prerequisite Courses: CYBR 322

Additional Restrictions/Requirements: Admission to Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity and BS Information Technology**Minor Restriction** Cybersecurity

CYBR 364 - Web Applications Security

Introduction to web application security principles focusing on identifying and mitigating top ten vulnerabilities through common application testing methodologies. Exploration of various web application architectures and backend & frontend technologies. Hands-on application of security testing tools and techniques to assess and enhance the security posture of web applications throughout their development life cycle.

Credit Hours: 3

Prerequisite Courses: CSC 131 or MIS 316
Additional Restrictions/Requirements: Admission to

Cameron School of Business or declared Cybersecurity major or declared Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity

CYBR 366 - Digital Forensics

Introduction to digital forensics and evidence-handling techniques for different types of information technologies and forms of data. Exploration of the basic principles of digital forensics. Introduction to the legal requirements for collecting, seizing, and protecting digital evidence. Application of digital forensics techniques throughout an investigation life cycle.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 324
Additional Restrictions/Requirements: Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared

Cybersecurity minor
Course Repeatability: Course may not be repeated.
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

MIS 363 - Advanced Telecommunications

The architecture, components, operations, and security of routers and switches in small networks, introduction to wireless local area networks (WLAN) and to scale for large, complex networks, including wide area network (WAN) technologies are described. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to

Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor

MIS 367 - Emerging Network Technologies

This course investigates cloud computing models, techniques, and architectures. Cloud computing has evolved as a very important computing model, which enables information, software, and other shared resources to be provisioned over the network as services in an on-demand manner. Students will be exposed to the current practices in cloud computing. Topics may include distributed computing models and technologies, Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), Software-as-a-Service (SaaS), virtualization, security and privacy issues, performance and system issues, capacity planning, disaster recovery, Cloud OS, federated clouds, challenges in implementing clouds, data centers,

hypervisor CPU and memory equipment, cloud-hosted applications, and other advanced and research topics in cloud computing. Course work will include homework assisgnments, presentations, and a term project that will provide exposure to scientific research in cloud computing.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology**Minor Restriction** Cybersecurity Minor

General Information Technology (12 Credit Hours)

A general technologist has the option to select courses and IT areas of interest. They can use those skills to determine how best to improve a specific industry and

how to incorporate new technology and solve problems.

Networking and Communications (12 Credit Hours)

Networking and telecommunications form the backbone of effective communication and data transfer within and between organizations. Mastering these skills enables IT professionals to design, implement, and troubleshoot network infrastructures, ensuring reliable connectivity and optimal performance for users and applications.

Required Courses (9 Credit Hours)

CIT 301 - Cloud Computing & Virtualization

Survey, configuration, and deployment of cloud computing technologies and services, including but not limited to: virtualization environments, SaaS, PaaS, DaaS, IaaS, mass storage, virtualization compute resources, SQL and non-SQL databases, cloud development tools, deployment models, load balancing, automatic provisioning, Internet of Things, VPNs, firewalls, security, two-factor authentication, legal/privacy issues.

Credit Hours: 3

Corequisite Courses: Co-requisite: CSC 344 or MIS 320.
Prerequisite Courses: Prerequisite: CIT 225.
Course Repeatability: Course may not be repeated.

MIS 326 - Digital Transformation in Business

Introduction to the intersection of digital technologies and the transformation of modern business functions. Focus on cloud computing, the Internet of Things, and artificial intelligence, with consideration of business strategies, models, and operations. Based on real-world case discussions and hands-on exercises with practice in critical thinking and other soft skills.

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 110
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major
Course Repeatability: Course may not be repeated.

Major Restriction BS Business Administration or BS Information Technology

MIS 363 - Advanced Telecommunications

The architecture, components, operations, and security of routers and switches in small networks, introduction to wireless local area networks (WLAN) and to scale for large, complex networks, including wide area network (WAN) technologies are described. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor

Concentration Electives (3 Credit Hours)

Choose one course from the following:

CIT 361 - Cloud DevOps

An exploration of DevOps practices in cloud environments. Students learn how to leverage cloud infrastructure, automation tools, and continuous integration/continuous deployment (CI/CD) pipelines to streamline development and delivery. Students are equipped to implement and manage cloud-based DevOps pipelines.

Credit Hours: 3

Prerequisite Courses: CIT 301 and MIS 316
Course Repeatability: Course may not be repeated.

or

CYBR 431 - Cloud Security

Introduction to cloud security architecture and exploration of the guiding security design principles, design patterns, industry standards, and associated technologies. Study of regulatory compliance requirements critical to the design, implementation, delivery, and management of secure cloud-based services.

Credit Hours: 3

Prerequisite Courses: CIT 301.
Course Repeatability: Course may not be repeated.
or, 3 credits from some combination of CIT 491, MIS 491, CIT 498 and MIS 498

CIT 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Enrichment Courses and Programs section in the catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MIS 491 - Directed Individual Study

Please enter a description.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Junior or senior standing and consent of the department chairperson and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CIT 498 - Internship in Information Technology

Academic training and practical experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Written experience report and oral presentation

required.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fee Schedule

MIS 498 - Internship in Information Systems

The participant will receive practical training and experience under the guidance of the staff of a business or government organization and a faculty supervisor.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Consent of faculty supervisor and admission to Cameron School of Business.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 6
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Total Credit Hours: 67-68

Intelligent Systems Engineering, B.S.

Dr. Clayton Ferner

The program in Intelligent System Engineering is a 4-year interdisciplinary program involving both the engineering and the computing domain. In addition to the successful completion of university studies requirements for UNCW, the B.S. curriculum requires math and science foundations, engineering core courses and an area of concentration. The concentration areas include: 1. Machine Learning and Artificial Intelligence, 2. Cybersecurity, and 3. Cyber-physical Systems (smart networked systems with embedded sensors and actuators that are designed to interact with the real-world and support real-time, guaranteed performance in safety-critical applications).

The program is supported by computer science and engineering faculty with strengths in machine learning, artificial intelligence, data science, cybersecurity, and

cyber-physical systems, robotics, and Internet of Things. Program goals for student learning outcomes include:

i) ensure a thorough preparation in the fundamentals of science and engineering,

ii) provide a foundation for the planning, design, construction, and operation of hardware/software-based projects.

iii) a broad engineering education necessary to understand the impact of artificial intelligence and hardware/software solutions in a global, economic, environmental, and societal context,

iv) develop the ability to communicate complex engineering solutions effectively, and

v) understand professional and ethical responsibility.

Requirements for the B.S. in Intelligent Systems Engineering

In addition to completing the Core Requirements for the BS in Intelligent Systems Engineering, students must complete the requirements for one of the concentrations.

While all concentrations involve intelligent systems, the Artificial Intelligence (AI) concentration focuses on decision-making and adaptability, the Cybersecurity concentration addresses protection and threat mitigation, and the Cyber-Physical Systems (CPS) concentration integrates computation with physical processes for real-world applications.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Intelligent Systems Engineering, a student must successfully complete the following:

ISE 461 - Capstone Project I

First semester of a two-semester capstone course in Intelligent Systems Engineering. Topics include: identifying a suitable project, researching and evaluating existing solutions, proposing a new solution, performing concept definition and requirements analysis, preparing design documents (plans and

specifications), and presenting a solution to a review board.

Credit Hours: 3

Prerequisite Courses: ISE 360 and ISE 411
Additional Restrictions/Requirements: Senior Standing
Course Repeatability: Course may not be repeated.

Core Requirements: (71 Hours):

Required courses:

EGN 101 - Introduction to Engineering

Profession and practice of engineering. Ethics, professionalism, unit systems, problem solving, data presentation, communication, teamwork, and design.

Credit Hours: 2

Additional Restrictions/Requirements: This course is restricted to Freshman students only.
University Studies: Foundations/First Year Seminar
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

ISE 102 - Introduction to Intelligent Systems Engineering

Interdisciplinary introduction to intelligent systems, covering topics such as: how intelligent systems interact with the physical world through inputs and inputs, algorithms to transform inputs to outputs,

handling data in intelligent systems, binary numbers, discrete mathematics, basic logic operations, computer architecture, and problem-solving.

Credit Hours: 4

Prerequisite or Corequisite Courses: CSC 131
Prerequisite Courses: CSC 131 with a C or better
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ISE 211 - Programming for Engineers

Introduction to fundamentals of programming using C/C++, with a strong
emphasis on object-oriented programming (OOP). Structured programming in C
before transitioning to C++ to explore OOP alongside basic to intermediate data
structure implementations. Skills in both paradigms with a particular focus on
using OOP to solve complex problems effectively.

Credit Hours: 4

Prerequisite Courses: CSC 131 with a grade of C or better
Course Repeatability: Course may not be repeated.

ISE 221 - Intelligent Systems

Introduction to concepts of intelligent systems, focusing on impact on societal structures and human behavior. Exploration of AI within social institutions, examining the ethical implications and potential for societal change, emphasis on the role of intelligent systems in shaping public policies and the cooperative strategies necessary for a sustainable future.

Credit Hours: 3

Prerequisite Courses: ISE 102 or ISE 211
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ISE 250 - Embedded Systems

Introduction to computer organizations, data representation, CPU organization, I/O memory and communication, implementation of a microcontroller or microprocessor embedded systems, assembly language programming, interfacing to peripherals, interrupt handling and debugging techniques.

Credit Hours: 3

Prerequisite or Corequisite Courses: PHY 300.
Course Repeatability: Course may not be repeated.

ISE 333 - Signals, Systems, and Control

Study of linear dynamic systems, and methods for examining, evaluating, and autonomously controlling them. Examination of several standard methods for linear system analysis and design using time and frequency domain tools (such as transfer functions, pole placement, stability and performance criteria, etc.). Consideration of analytical and numerical methods to explore signals, dynamics systems, and control systems.

Credit Hours: 3

Prerequisite or Corequisite Courses: STT 315
Prerequisite Courses: PHY 202 with a grade of 'C' (2.00) or better, MAT 361 with a grade of 'C' (2.00) or better.
Course Repeatability: Course may not be repeated.

ISE 340 - Systems Engineering

Introduction to the fundamental principles of systems engineering and their application to developing complex systems. Study of how systems engineering viewpoint can address engineering challenges and the essential role of systems engineering in project management.

Credit Hours: 3

Prerequisite Courses: ISE 221 with a grade of 'C' (2.00) or better
Course Repeatability: Course may not be repeated.

ISE 350 - Principles of Cyber-Physical Systems

Introduction to the architecture, design, and analysis of cyber-physical systems (CPS), including the principles

of design, specification, and modeling. Explanation of core ideas related to CPS design including model-based design, distributed algorithms, system specification and verification, control theory, and real-time systems.

Credit Hours: 3

Prerequisite Courses: ISE 250.
Course Repeatability: Course may not be repeated.

ISE 360 - Introduction to Robotics

Focus on image-guided control of robotic manipulators, including mathematical modeling concepts and implementation via open-source software libraries, robotic manipulators, and RGBD cameras. Analysis of complex 3D motions of robotic systems and integration into a closed-loop vision control strategy via different programming tools.

Credit Hours: 3

Prerequisite Courses: ISE 211, ISE 333.
Course Repeatability: Course may not be repeated.

ISE 410 - Human-Centered Design and Engineering

Introduction to human-centered design (HCD) and engineering principles and practices. Application of these principles to the area of artificial intelligence and intelligent systems, such as autonomous vehicles, etc. Focus on developing collaborative strategies between human users and autonomous systems for safety and effectively utilizing state-of-the-art autonomous features.

Credit Hours: 3

Prerequisite Courses: ISE 360
Course Repeatability: Course may not be repeated.

ISE 411 - Fundamentals of Internet of Things

Study of the Internet of Things (IoT) and related technologies, including solving practical programs using IoT, embedded, and edge technologies, as well as IoT device programming, sensing, actuating, communications, networking, and cloud technologies.

Credit Hours: 3

Prerequisite Courses: ISE 350
Course Repeatability: Course may not be repeated.

ISE 461 - Capstone Project I

First semester of a two-semester capstone course in Intelligent Systems Engineering. Topics include: identifying a suitable project, researching and evaluating existing solutions, proposing a new solution, performing concept definition and requirements analysis, preparing design documents (plans and specifications), and presenting a solution to a review board.

Credit Hours: 3

Prerequisite Courses: ISE 360 and ISE 411
Additional Restrictions/Requirements: Senior Standing
Course Repeatability: Course may not be repeated.

ISE 462 - Capstone Project II

Second semester of a two-semester capstone course in Intelligent Systems Engineering. Topics include:

implementing the project plan, which includes working with stakeholders, executing the hardware design and implementation, developing system software, testing solutions, and deploying the solution. A functional model of the solution, a final report, and a project presentation are required.

Credit Hours: 3

Prerequisite Courses: ISE 461.
Additional Restrictions/Requirements: Senior Standing
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ISE 495 - Seminar in Intelligent Systems Engineering

Presentations on current topics in intelligent engineering education and related subjects. Speakers may come from campus, other universities, or business, industry, or government.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Status.
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 300 - Analog Circuits

Study of passive (resistors, capacitors, inductors) and active (diodes, transistors) components in AC and transient circuits, and integrated circuits utilizing them; skills such as soldering, splicing, and component

testing. Culminates in the design and construction of a functional electronic device.

Credit Hours: 4

Prerequisite Courses: PHY 202
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Artificial Intelligence Concentration (12 hours):

The AI concentration focuses on equipping students with the skills needed to design intelligent systems that enhance decision-making, automation, and user experiences across various domains. Students will gain expertise in core AI fields, including machine learning (ML), generative AI, deep learning, agent-based learning, reinforcement learning, natural language processing, and computer vision.

Required courses:

CSC 322 - Data & Machine Learning

Concepts/techniques in machine learning and multidisciplinary applications. Topics include data

cleaning/transformation; data visualization; association/correlation rules; data classification and predictive modeling (such as SVMs); performance analysis and scalability; data mining with tabular, multi-dimensional and unstructured data, including text, audio, images; big-data frameworks (such as Spark, Hadoop, HIVE, Pig); and emerging themes and challenges.

Credit Hours: 3

Prerequisite Courses: (CSC 231 or ISE 221) and MAT 161, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 432 - Deep Machine Learning

Advanced topics in deep machine learning and exploration of innovative paradigms that illuminate the future of machine learning. Capstone format emphasizing experiential approaches to solving real problems with deep machine learning.

Credit Hours: 3

Prerequisite Courses: CSC 322 or Instructor Approval
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Electives (6 hours):

Choose 6 hours of electives from the following courses:

CSC 433 - Natural Language Processing

Introduction to natural language processing, computational linguistics, and speech recognition. Exploration of both symbolic and stochastic algorithms for processing human languages. Topics include parsing, part of speech tagging, semantic representation, pragmatic analysis, discourse structure, machine translation, n-gram statistical models, Hidden Markov Models, and other stochastic techniques.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CSC 331 with a minimum grade of C. Prerequisite or Corequisite: CSC 360, or instructor approval.
Course Repeatability: Course may not be repeated.

ISE 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50, GPA in ISE courses of at least 2.80, and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

CSC 452 - Computer Vision

Analysis of how real-world information can be computationally extracted from visual data. Foundation in digital image formation and processing, feature extraction and matching, and classification. Examination of a focused area of computer vision in-depth and analysis of classical and learning-based

methods for performing a specific task such as object/scene recognition and retrieval, video tracking, or 3D reconstruction.

Credit Hours: 3

Prerequisite Courses: CSC 340 or ISE 251, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 472 - Generative Deep Learning

Introduction to deep learning tools for generation of images, text data, music, and autonomous vehicle controls. Explores the difference between discriminative models and generative models. Topics include the design and construction of models using autoencoders, variational autoencoders, generative and adversarial networks. Requires a generative capstone project.

Credit Hours: 3

Prerequisite Courses: (CSC 340 or ISE 251), and

CSC 322, or instructor approval.
Course Repeatability: Course may not be repeated.

Cybersecurity Concentration (12 hours):

The Cybersecurity concentration emphasizes securing digital systems, networks, and data against evolving threats. This concentration focuses on cryptography, network security, malware analysis, and the use of AI as a tool to predict and prevent vulnerabilities, preparing students to safeguard critical infrastructure and manage cybersecurity risks.

Required courses:

CYBR 251 - Secure Programming Foundations

Exploration of programming and machine constructs behind code vulnerabilities and best practices for developing secure programs. Introduction to low-level code mechanics in C and assembly language frequently leveraged in code exploitation. Study of programming principles that guard against software vulnerabilities, including pointers, hardware control, overflows, input sanitization, data obfuscation, secure design, and static analysis.

Credit Hours: 3

Prerequisite Courses: CSC 131.
Course Repeatability: Course may not be repeated.

ISE 444 - Wireless Sensor Networks

Fundamentals of wireless sensor networks, including hardware and radio architecture through protocols and software to applications. Sensor network architectures, hardware platforms, physical layer techniques, medium access control, routing, topology control, quality of service management, localization, time synchronization, security, storage, and other advanced topics.

Credit Hours: 3

Prerequisite Courses: ISE 350
Course Repeatability: Course may not be repeated.

Electives (6 hours):

Choose 6 hours of electives from the following courses:

CSC 464 - Advanced Cryptography and Cryptanalysis

Examination of advanced constructs in modern cryptography, including Diffie-Hellman key exchange, Merkle trees, ElGamal encryption, and fully homomorphic encryption. Introduction to cryptanalysis techniques for analyzing and decoding ciphers.

Credit Hours: 3

Prerequisite Courses: CSC 364
Course Repeatability: Course may not be repeated.

CSC 466 - Malware Analysis

Fundamentals of basic malware analysis through static and behavioral analysis of malicious software. Coverage of the compilation process that takes human readable code to compiled machine readable code and to numerous tools used for malware analysis.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or higher or CSC 231 with a C or higher) and (CSC 344 or MIS

320)) or ISE 250
Course Repeatability: Course may not be repeated.

CSC 468 - Reverse Engineering

Coverage of the binary analysis skills necessary to discover the true nature of any executable binary. Examination of the high-level language constructs, including branching statements, looping functions and network socket code, critical to performing a thorough and professional reverse engineering analysis of a binary file.

Credit Hours: 3

Prerequisite Courses: CYBR 251 with a C or better or (CSC 231 with a C or better and CSC 242) or ISE 250
Course Repeatability: Course may not be repeated.

CYBR 343 - Systems Security

Application of security concepts to ensure the confidentiality, integrity, and availability of the computer operating system. Operating systems/security concepts are applied in the context of operating system hardening.

Credit Hours: 3

Prerequisite Courses: (MIS 352 and CIT 225) or (CSC 242 and CYBR 201)
Course Repeatability: Course may not be repeated.

CYBR 358 - Cyber Operations

Introduction to cyber operations concepts, with specific focus on the computing aspects. Topics include: Basics of cyber operations including a cyber operations procedures, applicable laws, and information assurance, and information assurance architectures.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 343
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ISE 335 - Digital Signal Processing

Fundamentals of digital signal processing (DSP). Topics include: A/D-D/A conversion and quantization,

number representations and finite word length effects; FIR, IIR, and lattice filter structures, block diagram, and equivalent structures; multi-rate DSP and filterbanks; digital filter design methods and verification; and DSP hardware architecture.

Credit Hours: 3

Prerequisite Courses: ISE 333, STT 315
Course Repeatability: Course may not be repeated.

ISE 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50, GPA in ISE courses of at least 2.80, and consent of instructor, department chair, and dean.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

Cyber-Physical Systems Concentration (12 hours):

The Cyber-Physical Systems (CPS) concentration bridges computing and the physical world by focusing on embedded systems, IoT devices, real-time computing, and hardware-software co-design. It prepares students to design secure, intelligent systems that interact with physical environments, with applications in smart infrastructure, autonomous systems, and industrial automation.

Required courses:

ISE 335 - Digital Signal Processing

Fundamentals of digital signal processing (DSP). Topics include: A/D-D/A conversion and quantization, number representations and finite word length effects; FIR, IIR, and lattice filter structures, block diagram, and equivalent structures; multi-rate DSP and filterbanks; digital filter design methods and verification; and DSP hardware architecture.

Credit Hours: 3

Prerequisite Courses: ISE 333, STT 315
Course Repeatability: Course may not be repeated.

ISE 444 - Wireless Sensor Networks

Fundamentals of wireless sensor networks, including hardware and radio architecture through protocols and software to applications. Sensor network architectures, hardware platforms, physical layer techniques, medium access control, routing, topology control, quality of service management, localization, time synchronization, security, storage, and other advanced topics.

Credit Hours: 3

Prerequisite Courses: ISE 350
Course Repeatability: Course may not be repeated.

Electives (6 hours):

Choose 6 hours of electives from the following courses:

CSC 470 - Hardware Security

Overview of computer hardware security. Topics include side channel attacks, physical unclonable functions, TRNG, supply chain management, hardware Trojans, the power grid, and smart cities.

Credit Hours: 3

Prerequisite Courses: ((CYBR 251 with a C or better or CSC 242) and (CSC 344 or MIS 320)) or ISE 250
Course Repeatability: Course may not be repeated.

CYBR 343 - Systems Security

Application of security concepts to ensure the confidentiality, integrity, and availability of the computer operating system. Operating systems/security concepts are applied in the context of operating system hardening.

Credit Hours: 3

Prerequisite Courses: (MIS 352 and CIT 225) or (CSC 242 and CYBR 201)
Course Repeatability: Course may not be repeated.

CYBR 354 - Computer and Mobile Forensics

Introduction to the concepts in computer and forensics investigations. Recovery and analysis of digital evidence using industry best practices and standard commercial and open source tools. Development of comprehensive investigative forensic reports. Coverage of the legal and ethical considerations of computer crime investigations.

Credit Hours: 3

Prerequisite Courses: CYBR 343 and CSC 344 or MIS 320
Course Repeatability: Course may not be repeated.

ISE 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or

senior standing, overall GPA of at least 2.50, GPA in ISE courses of at least 2.80, and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

Total Credit Hours: 83

Interdisciplinary Studies, B.A.

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary B.A. degree in Interdisciplinary Studies. This degree program is designed to provide a distinctive learning experience for re-enrolling students, advanced transfer students, and currently enrolled UNCW students with at least junior standing who change majors. Students electing this program must have previously completed at least 60 credits (transfer credits may count towards this total) and be in good academic standing.

Students may declare as Pre-IDS if they have 60 credit hours (including transfer hours). They may declare IDS

once they have 80 credit hours, or have successfully completed IDS 200 with a grade of “C” or better.

The goal of the program is for students to acquire a core liberal arts education combined with focused knowledge and skills. The integrative program curriculum will draw on prior course work while allowing students to complete their education by focusing on a particular option such as Enterprise and Economy; Global Challenges and Problems; Justice, Social Insitutions and Human Behavior; Artificial Intelligence and Technology in the Arts and Sciences; Interdisciplinary Arts and Humanities; or Human Wellbeing.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Interdisciplinary Studies a student must successfully complete the Senior Project in IDS 400.

Requirements for a Major in Interdisciplinary Studies for the B.A. degree:

Students must complete the Core requirements (15-18 hours), an Option (12 hours), and Electives (12 hours). IDS 200 is required of all IDS majors who declare Pre-

IDS. At least 24 hours in the major must be at the 300 level or above. IDS 300 and IDS 400 may be used to partially fulfill this requirement. Courses used to satisfy core requirements cannot be used to satisfy the option requirements listed below.

Core Requirements: (15-18 hours)

IDS 200 - Interdisciplinary Studies and Modern Problems

Introduction to interdisciplinary studies and its six tracks. In order to understand each track, students study selected topics in six separate modules. Topics include but are not limited to: income inequality, access to healthcare, climate change, the ethics of incarceration, artificial intelligence and genomics, and artificial intelligence and the written word.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

IDS 300 - Introduction to Interdisciplinary Studies

Open only to students in the UNCW Seahawk Success Program. This course serves as a gateway for the UNCW Interdisciplinary Degree. Through writing and engagement with a core set of texts, students learn about different approaches to interdisciplinary studies and interdisciplinary research, as well as its applications for personal assessment and career development. Through research, a presentation, and a final project, students will reflect on their academic experiences and articulate a personal pathway through the Interdisciplinary Studies program. By the end of the course they will have established an interdisciplinary studies eportfolio that they will complete in IDS 400.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

IDS 400 - Capstone in Interdisiciplinary Studies

Engages in interdisciplinary research, analysis, and writing. Students propose solutions to practical and

topic-specific problems and develop a final paper through faculty and peer feedback. Students complete an e-portfolio that demonstrates and reflects on their academic and personal path through the IDS program.

Credit Hours: 3

Prerequisite Courses: IDS 300
Additional Restrictions/Requirements: Prerequisite course and open only to students in the UNCW Interdisciplinary Program.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Interdisciplinary Studies majors only

Global Perspectives

One of:

AFN 130 - Introduction to Africana Studies

Interdisciplinary exploration of the collective experiences of the African Diaspora, which includes Africans and people of African descent in various continents and countries in addition to the United

States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

INT 105 - Introduction to International Studies

An introductory, interdisciplinary survey of the main concepts and terminology associated with the broad, interdisciplinary field of international studies, including economic, geo-political, and socio-cultural globalization and the effects of these processes on individuals and communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 220 - Cultural and Social Globalization

Exploration of contemporary cultural and social changes in the context of globalization. The course focuses on the ways in which various global and local cultural arenas reflect and are transformed by late capitalism's societal shift towards a mode of existence where images and consumerist desires have become

the driving forces.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 317 - Dictators, Despots, and Presidents for Life

An examination of global history and current events through the lens of despotic governments and authoritarian regimes.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war,

peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Intellectual Inquiry and Contemporary Issues

One of:

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field

experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 350 - Gender and Society

Focus on gender in social life. Theoretical explanations of gender differentiation, with an emphasis on socialization, stratification, family, work, education, politics, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 210 - Introduction to Women's Studies

This course introduces students to the discipline of women's and gender studies. Status of women from a variety of historical, economic, cultural, and theoretical perspectives. Topics include masculinity, femininity, violence, reproductive health, issues in sexual orientation, and the intersectional dynamics of race, class, and gender.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Critical Reasoning

One of:

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

COM 302 - Applied Qualitative Research

Focus on applying qualitative methods in communication studies to real-life contexts. Student select topics to explore through the various methods and techniques presented in class. Students present findings in a variety of formats that are easily adaptable to inclusion in portfolios or future goals.

Credit Hours: 3

Additional Restrictions/Requirements: COM Majors or permission of instructor.

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors

ENG 303 - Reading and Writing Arguments

Instruction in rhetorical principles and their use in both analyzing and constructing persuasive texts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 115 - Introduction to Ethics

An introduction to fundamental principles, theories, and problems in ethics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and

Statistics

Course Repeatability: Course may not be repeated.

Any course within the Critical Reasoning component of University Studies

Option Requirement: (12 hours)

Twelve (12) hours in a thematic area (Interdisciplinary Arts and Humanities, Enterprise and Economy, Human Wellbeing, Global Challenges and Problems, Artificial Intelligence and Technology in the Arts and Sciences, or Social Institutions and Human Behavior). Must include at least two disciplines.

Interdisciplinary Arts and Humanities Option

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

COM 101 - Public Speaking

Preparation and delivery of public presentations, with emphasis on creativity, reasoning, evidence, organization, and delivery. Course content will also be applied to analysis of speeches by self and others.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 265 - Communication Media

Examination of the development, functions, theoretical foundations, and effects of media on individuals, society, and culture.

Credit Hours: 3

Prerequisite Courses: COM 160 or permission of instructor.
Course Repeatability: Course may not be repeated.

CRW 201 - Introduction to Creative Writing

Introduction to the principles and techniques of creative writing, aimed at developing the creative process. Includes lectures, reading, and writing exercises in poetry, fiction, and creative nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ENG 110 - Introduction to Literature

Introduction to reading and responding to literature in a variety of genres, such as poetry, fiction, drama, and literary non-fiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 210 - Mythology

The major mythological systems of Western society - Greek, Roman, and Norse. Mythology of other parts of the world, especially the Ancient Middle East, and related material are also considered.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical and Philosophical Approaches
Crosslisting: CLA 210
Course Repeatability: Course may not be repeated.

FST 110 - Concepts in Film

Introduction to key concepts in film studies and film production. Designed for non-majors in film studies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3

HST 101 - Europe in the World I

Introduction to pre-modern European history, from the development of the first city-states in the Near East, through the rise of Athens and Rome, and concluding with the Middle Ages and Early Modern Period. Specific attention is given to the globally interconnected nature of European history.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 105 - United States to 1865

American history from the pre-colonial period to the beginning of Reconstruction. Examines the impact of the country's cultural diversity through the study of the arts, law, politics, war, religion, technology, immigration, and the emergence of regional economic systems.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 106 - United States from 1865 to Present

The history of the United States since the Civil War. Examines the development of American political, social, and cultural systems, foreign policy, and the emergence of the United States as a world power.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 250 - North Carolina Indians

North Carolina Indian history from pre-Columbian times to present day. Topics include identity of North Carolina Indians; social, religious, political, and economic life; gender roles; European and American interaction; development of state and federal policy and Indian response; status of Indians in contemporary North Carolina and United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 106 - Exploring Music

Explores the creative process of making music while developing an understanding of basic musical concepts. Designed for students with no musical background who wish to increase their understanding of music. Emphasis on music listening, playing classroom instruments, group singing, improvisation, and music literacy.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive and Literary Perspectives and Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 103 - Exploring Religions

Introduction to the academic study of religion. Explores the many diverse religions practiced around the world and the ways practitioners construct religious experiences through scriptures, art, gender, race, and community.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 125 - Scriptures of the World's Religions

Introduction to the history and composition of scriptures of the world's religions from oral stories to words, images, objects, books, performances, sounds, and texts. Examines how scriptures in major Eastern and Western religions have constructed historical, political, social, and cultural realities through various forms of art from antiquity to today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

THR 121 - Introduction to Theatre

Appreciation of theatre through an understanding of its artistic elements, history, dramatic literature, and audience involvement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 165 - Playscript Analysis for Production

The study of a diverse cross-cultural section of plays, analyzed through elements of the dramatic text including character, structure, style, language, genre, and theme as they are applied in production.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

WGS 210 - Introduction to Women's Studies

This course introduces students to the discipline of women's and gender studies. Status of women from a variety of historical, economic, cultural, and theoretical perspectives. Topics include masculinity, femininity, violence, reproductive health, issues in sexual orientation, and the intersectional dynamics of race, class, and gender.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 230 - Women in Film

Survey and analysis of films by women filmmakers throughout the world. Diverse film styles, periods, and genres will be represented. Screening and discussion of cinematic works in their original language with English subtitles when needed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Crosslisting: WLC 230, FST 230
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 280 - Special Topics in Women's and Gender Studies

Study of selected topics in Women's and Gender Studies that are not considered in detail in regular course offerings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Any 300-400 level course in ARH, ENG, HST, MUS, or PAR (note that many have pre-requisites)
Other appropriate courses as determined in consultation with an advisor and approved by program director.

Enterprise and Economy Option

(At least one course must be from Cameron School of Business)

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

ACG 203 - Managerial Accounting

An introduction to the concepts and techniques used by management to analyze and interpret accounting data in the organization.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACGL 201
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in government. Examines how the legal environment is influenced by changing social and ethical values.

Topics include agency, antitrust, forms of business organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

BUS 206 - Career Essentials

Introduction to a career in business. Topics included mentoring, leadership, communication, preparation for entering a career, and the business environment.

Credit Hours: 2

Corequisite Courses: ENG 206
Additional Restrictions/Requirements: Sophomore standing or higher. Restricted to business or pre-business majors.

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 101 - Public Speaking

Preparation and delivery of public presentations, with emphasis on creativity, reasoning, evidence, organization, and delivery. Course content will also be applied to analysis of speeches by self and others.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 271 - Communication, Collaboration and Effective Groups

Theory and practice of collaborative communication. Emphasis on learning to work effectively in face-to-face and virtual groups. Focus on managing social and task dimensions of collaborative decision-making for problem solving and creative projects.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to sophomore or higher.
Course Repeatability: Course may not be repeated.

COM 272 - Introduction to Organizational Communication

Study of organizations and virtual organizations as systems created and sustained by communication processes. Topics include organizational analysis and development, diversity, leadership, culture, HR and issues relevant to the global and international marketplace.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM

COM 378 - Business and Professional Communication

Develop and refine communication skills in business environments and other professional settings. Topics include written correspondence, selection and use of communication technologies, delivery of mediated messages, and the design and delivery of professional presentations.

Credit Hours: 3

Prerequisite Courses: COM 101.
Additional Restrictions/Requirements: COM majors or Entrepreneurship minors, or permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors Only**Minor Restriction** Entrepreneurship

CSC 105 - Computing Competencies for College and the Workplace

College-level computing education for all majors focusing on software skills employers most frequently seek, technology-related social, legal and ethical issues, and foundational understanding of current

digital technologies for efficient organization and effective communication. Students will choose one additional topic of interest such as business or graphic design.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EBD 281 - Creativity and Innovation

Primary focus on the processes for fostering creativity and innovation. Emphasis on the creative process, creative problem solving, and intrapreneurship. Particular attention directed to the development of new products, services, processes, and business models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EBD 282 - Entrepreneurship for the Sciences and Engineering

This course introduces non-business, scientifically-oriented students to the process of creating new ventures and entrepreneurship in engineering and science intensive industries, such as chemical, energy, materials, bioengineering, environmental, clean-tech, pharmaceuticals, medical and biotechnology. Students gain a good sense of the excitement, complexity, and

challenges associated with the creation of new businesses, whether within an existing organization or in a startup environment. The focus is on new ventures that require long development times, large investments, integration across a wide range of technical and non-technical disciplines, and the creation and protection of intellectual property. Teaching methods will include lectures, case studies, guest speakers and individual and team projects.

Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.

EBD 301 - Entrepreneurial Finance for Non-Business Majors

Course provides students with the knowledge and skills necessary to manage cash as well as manage the necessary records in a small business. Topics include: calculating startup costs, running a monthly, quarterly and annual budget for a business, understanding the different sources of capital and how to obtain them,

projecting income and what investors, lenders and grant organizations look for in an entrepreneurial venture. SBIR/STTR funding, financial analysis and record-keeping necessary to comply with federal, state, and local tax law are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 302 - Managing & Marketing for Entrepreneurs

Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to

strategically develop the business model as it progresses through growth phases. Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Students will also learn successful exit strategies for a business. Leadership, management, positioning, legal strategies, sales strategies, and scaling strategy are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 304 - Entrepreneurship in the Arts

This course will introduce and outline the role of "art" in various marketplaces, and how the emerging arts entrepreneur operates in society. Topics include how to position and market aesthetic products, the pricing of art products, understanding consumer behavior for aesthetic products, the modes of financing, and art patronage. Course will also examine the nature of art infrastructures, such as museums, festivals, and galleries, and the overall economics of the arts in modern society.

Prerequisite or Corequisite Courses: EBD 280 or EBD 282
Course Repeatability: Course may not be repeated.

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the

creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3
