University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic perspective. Specific focus will be given to methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

EDN 211 - Principles of Leadership

This course will provide an introduction to leadership. Students will develop an understanding of the leadership theories, styles of leadership, and strategies for successful leadership. They will learn skills to enhance their leadership effectiveness in a variety of settings and will develop insights about themselves and others.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 309 - Technical Editing

Focus on the fundamentals of effective writing, organization, and design in order to develop the language and proficiencies necessary to edit print and digital texts used in a range of organizations.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FIN 335 - Principles of Financial Management

An introduction to the finance function of business enterprise and to the analytical techniques used in making investment and financing decisions.

Credit Hours: 3

Prerequisite Courses: Prerequisite ACG 201, ECN 222 and (BAN 280 or STT 215); or prerequisite STT 315 and corequisite MAT 381.
Course Repeatability: Course may not be repeated.

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to the Cameron School of Business.
University Studies: Approaches and

Perspectives/Living in a Global Society, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MIS 213 - Business Technology and Intelligence

This course is designed to introduce students to the impacts of information systems on the firm, industry, society, and the economy. The management of the information resource and issues related to accessing, processing, and distributing information within a business context are emphasized. Students will analyze the role of information systems in reaching organizational objectives including communication, collaboration, performance improvement and strategy implementation. Skill-based learning will reinforce strategic information systems concepts.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or STT 215
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and

Statistics
Course Repeatability: Course may not be repeated.
Other appropriate courses as determined in consultation with an advisor and approved by program director.

Global Challenges and Problems Option

ANT 105 - Introduction to Anthropology

Introduction to the physical, archaeological, linguistic, and ethnological fields of anthropology; biological and cultural evolution of man.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis

and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 309 - Environmental Anthropology

A study of cultural adaptations as responses of human populations to varied environments; this course will focus upon cultural vs. biological adaptation from the archaeological past to the ethnographic present.

Credit Hours: 3

Prerequisite Courses: ANT 105 or ANT 206 or ANT 207
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

ANT 317 - Social Issues in Latin America

Complex national cultures of Latin America. Contemporary issues such as the rights of native peoples, peasant land reform, urban slum settlements, development of resources, and political and economic reform movements. Case studies of individual countries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ANT 318 - Religion and Public Life Across Cultures

Exploration of the relationship between religion and politics and the increasing role of religion in public life across different cultures in the contemporary world. Students will learn about the interactions between religion, politics, and public life in countries with ties to different majoritarian religions such as the U.S.A. (Protestant Christianity), France (Catholicism), Turkey

(Sunni Islam), and India (Hinduism).

Course Repeatability: Course may not be repeated.

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists,

students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

COM 344 - Intercultural Communication

Theoretical and practical perspectives on communication effectiveness in dealing with people, groups, or organizations that are culturally different within and across national boundaries.

Credit Hours: 3

Prerequisite Courses: COM 105 with a grade of 'B' or better, or permission of instructor.
Additional Restrictions/Requirements: Restricted to Junior standing or higher.

University Studies: Approaches and Perspectives/Living in a Global Society, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

ENG 226 - World Literature Since 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. 1600 to the present.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean, and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy

implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 101 - Modern World Geography

The theory, techniques, and professional applications of modern geographic science. Examines geography as a broad interdisciplinary science focused on places, spatial patterns, and the intersection between human activities and the natural world. Includes discussion of the historical origins and modern relevance of geographic thought.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric

disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 107 - Warfare in World History

Survey of war as a transformational force in world history from the ancient Mediterranean to the modern, globalized world. Includes how technology, politics, environment, climate, geography, and economics have

impacted war. Examines how societies have waged war, responded to war, and been influenced by war.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

HST 114 - The Jews: From the Inquisition to Israel

Survey of Jewish history from the expulsion of the Jews from Spain to the modern era. Examination of how the different Jewish communities worldwide have met the challenges of a modernizing world. Topics include emancipation, religious reform and secularization, mass migrations, anti-Semitism, the Holocaust, and the founding of modern Israel. 3

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 363 - History of Modern East Asia

Survey of East Asian history from the mid-nineteenth century to the present, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 365 - History of Modern South Asia

An examination of history of South Asian history from the nineteenth century till the present. Course may be repeated for credit under different subtitles including India and Pakistan since 1947, and Ghandi and Ghandism.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 368 - History of Modern Latin America

The development of South America, Central America, Mexico, and the Caribbean from the time of independence in the early nineteenth century to the present.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 372 - History of Modern Africa

Historical survey of African history from 1800 to the present with emphasis on the abolition of slavery and the slave trade; the scramble for Africa; establishment and operation of colonial rule; independence movements; and the post-colonial period.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 382 - History of Modern Middle East

An examination of the major developments in the history of the Modern Middle East. The course may be repeated for credit under different subtitles including Women and Gender in the Middle East, the Middle East since 1914, and Palestine and Israel.

Prerequisite Courses: Any history class.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

INT 105 - Introduction to International Studies

An introductory, interdisciplinary survey of the main concepts and terminology associated with the broad, interdisciplinary field of international studies, including economic, geo-political, and socio-cultural globalization and the effects of these processes on individuals and communities.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 362 - Archaeology of Ancient Israel

Study of Ancient Israel, its peoples and cultures through archaeological artifacts and analysis of ancient writings.

Credit Hours: 3

Prerequisite Courses: PAR 103 or PAR 235
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 373 - Chinese Religions

Examination of the history, philosophies, practices, and institutions of Chinese religions through both primary texts and secondary scholarship. Focus mainly on the indigenous religions of China - Confucianism, Daoism, and 'popular' or 'folk' traditions. Course will make use of texts, films, online resources, and images.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PLS 111 - Politics and Government in Global Perspective

Survey for non-majors of politics and governmental institutions within and among nation states. Attention will also be given to the role of political theory and ideology in the governance of states.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Any 300-400 Level INT Course.
Other appropriate courses as determined in consultation with an advisor and approved by program director.

Human Wellbeing Option:

ANT 346 - Medical Anthropology

Investigation of systems of medical knowledge and healthcare; representations of health and illness; interactions between environmental, biological, and

social factors that shape risk in vulnerable communities; and encounters between Western biomedicine and non-Western healing traditions. Emphasis on applied anthropology in global health settings.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ATR 470 - Medical Terminology for Health Professions

The course is designed for students to build a foundational understanding of medical terminology with appropriate application to pathological conditions of the various body systems. Focus on preparing students to use appropriate medical documentation skills consistent with today's allied health care professions.

Credit Hours: 3

Prerequisite Courses: EXS 216 or BIO 240.
Course Repeatability: Course may not be repeated

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and

CHML 101.
Course Repeatability: Course may not be repeated.

CHHS 210 - Creating Happiness and Well-Being

An introduction to the study of topics related to happiness and its impact on quality of life. Students will learn principles and theoretical models targeted at increasing and/or sustaining happiness. The course will focus on big-picture issues and real-world applications.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

ENG 234 - Literature and Medicine

Study of a broad range of literature from multiple periods, genres, and traditions, examining the representation of illness, health, disability, patients, trauma, and healing, among other topics related to the

medical humanities.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.
University Studies: Approaches and Perspectives: Aesthetic, Interpretive, and Literacy Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

EXS 322 - Sports Nutrition

Relationship of exercise, physical activity, and performance to human nutrition. In-depth information on human energy systems, weight management, macronutrients, micronutrients, and ergogenic aids.

Credit Hours: 3

Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or

MAT 160 with a "C" or better), EXS 310 with a "C" or better or CHHS 411 with a "C" or better.
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GRN 101 - Introduction to Gerontology

Introduction to the social, psychological, physiological, and philosophical aspects of aging through reading, writing, and fieldwork.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GRN 422 - Family Health and Aging

Study of family systems theory, paradigms for caregiving, illness and life-stage challenges for caregiving, and the interface between formal caregivers and caregiving families.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 424 - Cultural Representations of Aging

This course includes the study of various representations of aging, including fine art, films, novels, poetry, and more. We will compare and contrast such creative representations of aging with scientific (e.g., scholarly literature) ways of knowing about aging. Through engaging bio-psycho-social-humanities frameworks to explore aging-related phenomena, students will develop a well-rounded understanding of a variety of topics.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 440 - Current Issues in Gerontology

Study of current issues and topics in the field of aging from an interdisciplinary and global perspective with participation in a service-learning project.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GRN 446 - Health Care Access for Older Adults

An introduction to the U.S. health care system with an emphasis on issues related to older adults, including problems of access to health care for the aging population, their families, and communities.

Credit Hours: 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: GRN 546, RTH 546
Course Repeatability: Course may not be repeated.

HEA 105 - Individual Well-Being

Topical areas and issues in health explored within the physical, emotional, social, environmental, intellectual, and spiritual dimensions of personal wellness.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 207 - Nutrition and Behavior

Application of the principles of nutrition as related to health; various levels of wellness; and practices of health care. Emphasis on basics of sound nutrition, requirements of various food elements, diet planning, diet patterns for specific age groups, nutritional fads and weight control.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 119 - History of Medicine

Survey of the history of medicine that covers the major intellectual, social, and cultural contexts foundational for our modern understanding of health and health

care.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 120 - Medical Humanities

Introduction to the various disciplines, methods, and perspectives of medical and health humanities.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

INT 332 - Global Politics of Food: An African Perspective

An examination of the global political economy of food through interdisciplinary examples from Africa with an exploration of the evolution of the human diet and traditional food production systems; the importance of culture in assigning meaning to food and how it is consumed; relationships between population, nutrition, and health; standards in the international trade of foods; the history and politics of food aid; food

sovreignity and sustainable development; and the relationship between the environment and food security.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 221 - Mindfulness and Racial Justice

Introduction to mindfulness and its application to racial justice issues and efforts. Explores mindfulness as a contemplative practice and discusses its similarities

and differences with religious contemplative practices of meditation, prayer, silence, and stillness. Adopts an intersectional approach that considers interlocking systems of oppression in the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches/Living in a Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PAR 322 - Ritual Therapy and Health in Caribbean Religions

Explores the Caribbean religious understandings of health and healing, ethnomedical and ritual therapeutics, and other metaphysical healing techniques and spaces, including *Ebo* healing of *Ifa* divination, *Palo and Santeria (Lukumi)* Botanicas. Familiarizes students with the different health and healing approaches, techniques, and spaces in the Caribbean communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PBH 105 - Explorations in Public Health

Please enter a description. General introduction to public health and how it interfaces with science and politics. Addresses the connectivity of public health and healthcare. The 3 P's of public health: prevent, protect and promote, and the roles of personal and social determinants of health are covered utilizing current public health events and initiatives. Partially satisfies University Studies II: Approaches and Perspectives/Understanding Human Institutions and Behaviors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science

of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 265 - Leisure and Society

An introduction to leisure as a significant force in contemporary life. The importance of leisure for individuals, groups and cultures is explored through social, technological, psychological, historical, philosophical, anthropological, and economic foundations.

Credit Hours: 3

Additional Restrictions/Requirements: Open to REC majors and minors or consent of instructor.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 337 - Medical Sociology

A sociocultural analysis of the general area of health and illness. Emphasis is given to understanding the distribution of health and illness in the United States and its impact on the patient status. The course includes a discussion of the organization and use of health care services from a sociological perspective.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions,

confidence intervals, hypothesis testing, correlation and regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

SWK 235 - Introduction to Social Work and the Social Welfare System

Social welfare institution and the social work profession in the United States; the values, methods and roles of social workers and the history of the system.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

SWK 311 - Child Abuse and Neglect

Study of the knowledge base, laws, and professional roles associated with contemporary child welfare practice. Identification of child maltreatment, reporting procedures and community-based interdisciplinary practice issues are emphasized. Upon acceptance to the NC Child Welfare Education Collaborative, students must complete both SWK 311 and SWK 312 before admission to a DSS field placement.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

Other appropriate courses as determined in consultation with an advisor and approved by program director.

Artificial Intelligence and Technology in the Arts and Sciences Option

ANT 207 - Archaeology

An exploration of the objectives, theories, methodologies and interpretive tools utilized in the study of humankind's past. Both prehistoric and historic cultures will be examined. The lab for this course is ANTL 207.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

ANT 210 - Biological Anthropology

Introduction to the study of human evolution. A dynamic exploration of nonhuman primates, fossilized human ancestors, and human biology. Examines the intersection of biology and culture.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

ART 370 - 3D Printing and Laser Cutting

Exploration of 3D printing and laser cutting for art and design. Study of digital art culture including contemporary artistic, political, and ethical issues in the field.

Credit Hours: 3

Prerequisite Courses: ART 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CIT 110 - Fluency in Information Technology

Information representation, the Internet and HTML, algorithmic thinking and programming, language translation, modeling and abstraction, algorithmic complexity and non-computability, machine architecture and parallel computation, networks and communication, database principles, multimedia, social impacts of computing.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 105 - Computing Competencies for College and the Workplace

College-level computing education for all majors focusing on software skills employers most frequently seek, technology-related social, legal and ethical issues, and foundational understanding of current digital technologies for efficient organization and effective communication. Students will choose one additional topic of interest such as business or graphic design.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 202 - AI Essentials: Understanding Artificial Intelligence

Introduction to Artificial Intelligence (AI) fundamentals for all majors with minimum/no computer programming skills. Exploration of AI concepts and machine learning (ML) techniques to learn when and how to use AI tools to solve problems and to create AI/ML predictive models. Practical applications of AI/ML for various domains will be studied to understand and leverage AI/ML technology.

Credit Hours: 3

Prerequisite Courses: (Sophomore or higher with a declared major) and (a MAT 100-level course) or instructor approval.
Course Repeatability: Course may not be repeated.

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of

learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EDN 322 - Foundations of Number and Algebraic Reasoning (K-6)

Focus on the curriculum, materials, and methods appropriate for the teaching of number and algebraic reasoning for the kindergarten through sixth grade level. Field experience required. The lab for this course is EDNL 322.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of 6 semester hours of appropriate mathematics or statistics at the 101 level or higher, with minimum grade of C-.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EDN 325 - Foundations of Geometry, Measurement and Data (K-6)

Focus on the curriculum, materials, and methods appropriate for the teaching of geometry, measurement and data for the kindergarten through sixth grade level. Field experience required.

Credit Hours: 3

Prerequisite Courses: EDN 322
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

ENG 104 - Introduction to Digital Humanities

Introduction to the application of digital tools for humanities research. Students explore interdisciplinary definitions of Digital Humanities (DH) and DH research methods; investigate and critique DH projects; and plan and execute their own collaborative DH projects.

Course Repeatability: Course may not be repeated.

ENG 205 - Introduction to Literary and Cultural Studies

An immersive introduction to literary and cultural studies, focusing on a single text. Students will learn how to write literary and cultural criticism, with an emphasis on interpretative methods, practical research skills, and discipline-specific conventions of citation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 309 - Technical Editing

Focus on the fundamentals of effective writing, organization, and design in order to develop the language and proficiencies necessary to edit print and digital texts used in a range of organizations.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric. Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

ENG 326 - Writing with Artificial Intelligence

Introduction to the intersection of Artificial Intelligence (AI), writing, and content operations within the field of professional writing. Explores the fundamentals of AI and its application in automating and optimizing the content creation and distribution process.

University Studies: Building Competencies/Writing Intensive, Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 367 - Digital Humanities Applications

Project-based exploration of a real world problem (social, cultural, interpretive/aesthetic). Students conduct primary and/or secondary research using digital and non-digital methods and present findings using a relevant digital medium that aligns with the project's values, goals, and audience.

Prerequisite Courses: ENG 104
Course Repeatability: Course may not be repeated.

ENG 414 - Writing for the Web

Explores visual rhetoric and new media theories to inform the analysis and production of texts in Web formats. Topics may include writing content for existing Web outlets, markup conventions, search engine optimization, and modification of Content Managment System (CMS) and html/css templates.

Credit Hours: 3

Prerequisite Courses: ENG 314 or ENG 319
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

FSC 211 - Fundamentals of Forensic Science

Survey of theories, methods, techniques and applications of various forensic science disciplines. Topics include but are not limited to: crime scene and death investigation; body identification; forensic biology and chemistry; pattern, trace, and imprint evidence analysis; and forensic behavioral science.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 112 - History of Science II: Modern Science

Growth and development of modern science. Topics include Darwin's theory of evolution, Einstein's special and general relativity, quantum mechanics, wartime science, the discovery of DNA, and the impact of science and technology on modern society.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 329 - History of Science and Technology in the Modern World

Examination of themes in the history of science and technology since the Scientific Revolution, such as controversies in science and technology, history of technology/biotechnology, history of American Science, and science and technology since 1900. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PAR 105 - Critical Reasoning With Artificial Intelligence

Introduction to the principles of proper reasoning through the use of generative AI. Exploration of how to assess the reasoning of AI and how to use AI to improve one's own argumentation. Study of the contrast between good and bad forms of reasoning as

manifested by both humans and AI.

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 312 - Ethics of Artificial Intelligence

Introduction to major topics in the ethics of artificial intelligence, including the proper role of AI in moral decision-making, the potential for AI to have moral status, the relevance of AI to issues of academic integrity, and the potential for AI to engage in racial discrimination.

Course Repeatability: Course may not be repeated.

PAR 320 - Philosophy of Mind

Selected readings drawn from classical and/or contemporary sources bearing on problems of the self, such as the issue of personal identity and the concept of a person, the problem of the relation of mind and body and the question of the nature of consciousness.

Credit Hours: 3

Prerequisite Courses: PAR 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PAR 390 - Religion and Technology

Explores how religions in the past and present are necessarily and inherently technological. Evaluates modern assumptions about the secular (i.e., non-religious) nature, digital nature, and passive work of technology. Topics vary by instructor.

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Critical Reasoning, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Other appropriate courses as determined in consultation with an advisor and approved by program director.

Justice, Social Institutions and Human Behavior Option

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 207 - Archaeology

An exploration of the objectives, theories, methodologies and interpretive tools utilized in the study of humankind's past. Both prehistoric and historic cultures will be examined. The lab for this course is ANTL 207.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

ANT 210 - Biological Anthropology

Introduction to the study of human evolution. A dynamic exploration of nonhuman primates, fossilized human ancestors, and human biology. Examines the intersection of biology and culture.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CRM 105 - Introduction to Criminal Justice

Study of criminal law and the criminal justice system in the U.S. Emphasis on structure and function of police,

courts and corrections.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations

Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 304 - Creativity, Imagination, and Innovation in Education

This course will examine the creative process in teaching, curriculum design, and educational spaces. Students will explore the ways that individuals develop, implement and evaluate new ideas, processes, and programs related to education. Students will also study the cultivation of imagination and the nurturing of innovation using real-world examples.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 370 - Gender and Education

This course will investigate the historical and contemporary issues related to gender, sexuality, and sex education. Specific topics will include: the construction of gender identity in educational settings, educational practices that reinforce or challenge gendered identities, single-sex education, and sexuality

education. Students in the course will also explore laws and policies related to gender and sexuality in education.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 400 - Immigration, Demographics, and Justice in Education

This course will consider immigration, changing demographics in the United States, the effects of these changes on schools and communities, and power structures that support and/or hinder school and community responses to changing demographics. Specific attention will be given also to differences in rural and urban demographic shifts and the effects of those shifts on education.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 425 - Educational Policy and Advocacy

In this course students will study local, state, national, and international policies related to education. Students will examine the causes and effects of specific policies for teachers, students, and communities. Students will complete an in-depth study of a group or agency that advocates for children, youth, families, and/or schools. A capstone project is included in this course.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 220 - Race and Social Justice

Introduction to philosophical issues in race and social justice. Topics include race and identity, discrimination, multiculturalism, affirmative action, anti-racism.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Historical and Philosophical

Approaches
Course Repeatability: Course may not be repeated.

PAR 313 - Justice, Rights, and the Common Good: Philosophical Perspectives on Socio-Political Issues

Exploration of philosophical issues and concepts central to an understanding of social and political life, for example function and cause, justice, liberty, equality, societal facts and laws, utopias, reason and political argument, political obligation, and the public interest.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Critical Reasoning, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PLS 204 - Judicial Politics

An analysis of the organization, powers and role of the judiciary. Topics include: the political role of judges,

factors influencing judicial policy-making, selection of judges, the role of lawyers, and judicial decision-making.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 305 - The Constitution and the Criminal Justice System

Study of U.S. Supreme Court decisions on rights of suspects, defendants, witnesses, and convicted criminals.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 310 - Legal Philosophy and Jurisprudence

Introduction to the nature, concept and sources of law and the various schools of jurisprudence. Topics

treated include natural law; historical, analytical and sociological jurisprudence; idealism; utilitarianism; legal realism; equity, justice, precedent, custom and law; and the relation of law and morality.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Crosslisting: PAR 310
Course Repeatability: Course may not be repeated.

PLS 311 - Legal Research and Writing

Students will locate, apply, and analyze law in correct and precise written form. Legal formatting and Bluebook citation will be emphasized. Iterative writing assignments will encourage students to incorporate cohesive revisions leading to critical analysis in objective and persuasive writing. Students will produce a legal memorandum and a court brief while utilizing critical written analysis of the law.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 211 - Perception and Cognition

Survey of major phenomena, methods, and theories associated with the study of perception and cognition. Topics include sensory systems, perceptual processes, attention, memory, knowledge, decision-making, and problem solving.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 217 - Learning and Behavior Change

Basic principles of conditioning, learning, and behavior change. Topics will include and introduction to classical and operant conditioning and the applications experimentally discovered principles to psychological interventions, as well as other fields such as education, business, and health.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 220 - Child Psychology

Human psychological development through childhood and early adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 245 - Drugs and Behavior

Psychological aspects of drug use and abuse. Emphasis on the effects of major psychoactive drugs (including alcohol) on behavior, the psychological determinants of drug use, and treatment of drug abuse.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 246 - Psychology of Personality

Overview of the theoretical models underlying the structure and organization of individual differences. Emphasis on empirical research evaluation the different theoretical models. Topics include the self-concept, awareness of motivation, perceived control, and the biological mechanisms influencing traits such as extraversion.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 265 - Human Sexual Behavior

Psychological aspects of human sexuality with emphasis on psychosexual development and behavior. Includes discussion of causative factors and treatment of sexual disorders and deviations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 320 - Psychology of Infancy and Early Childhood

An in-depth examination of development from conception through kindergarten age. Both normal and a typical development are considered from a biopsychosocial perspective. Methodological and

theoretical issues are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 223
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 322 - Developmental Psychopathology

The psychological disorders of childhood, including their description, etiology, assessment, and treatment. Emphasis on the theoretical and empirical bases of these disorders, focusing on relevant clinical research methods and treatment findings.

Credit Hours: 3

Prerequisite Courses: PSY 247
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 324 - Psychology of Aging

A study of the psychological aspects of human aging. Topics include the effects of normal and diseased

aging on perceptual and cognitive functioning, personality and social relationships, and physical and emotional health.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 336 - Industrial-Organizational Psychology

Psychological techniques in job analysis, personnel selection and placement, training, performance appraisal, employee motivation, employee health and satisfaction, organizational productivity and communication, group decision making, and leadership.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264

Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 352 - Health Psychology

Integrates psychological and biomedical knowledge relevant to physical health and illness. The interaction of psychological phenomena with the epidemiology, etiology, pathogenesis, treatment, and rehabilitation of physical disorders.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 366 - Psychology of Close Relationships

Personality development within close relationships including recent theoretical and empirical findings on courtship, interpersonal attraction, marriage contract, and the various stages of the family life cycle. Communication, familial functioning and dysfunctioning

are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 264 or PSY 246
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Crosslisting: CRM 255
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 235 - Introduction to Social Work and the Social Welfare System

Social welfare institution and the social work profession in the United States; the values, methods and roles of social workers and the history of the system.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Any 300-400 Level Course in ANT, CRM, or SOC (note that many have pre-requisites)
Other appropriate courses as determined in consultation with an advisor and approved by program director.

Electives: (12 hours)

Choose from courses in any option. Other appropriate courses as determined in consultation with an advisor and approved by program director. All credits that are part of any approved UNCW Minor or Certificate Program undertaken by an IDS Major can be applied to electives or an appropriate track in IDS.

Total Credit Hours: 39-42

Additional Information:

A 2.0 in the major is required for graduation. A grade of "C-" or better is required in all courses counted toward the major.

International Studies, B.A.

Dr. Florentina Andreescu, Chair

International Studies is an interdisciplinary major that focuses on social transformation and innovative responses to seemingly intractable global problems. International Studies students learn to:

- Think across disciplines
- Move between the the local and the global

- Be mindful of the realities of human lives at the center of our investigations

One of UNCW's strategic goals is to "Create an educational environment that prepares our students to be global citizens." Students are prepared to face these global issues and help create a more just and equitable world.

However, preparing students to be competitive in the global workforce is equally as important. Occupations and professions in a variety of settings increasingly emphasize global knowledge, skills and experience.

The International Studies major is designed specifically to meet these goals by offering an interdisciplinary bachelor's degree that provides a distinctive international learning experience for UNCW students. The integrative program curriculum will provide students with:

- A focus on a particular international theme or geographic area of concentration
- Exposure to other cultures, people, and places
- An understanding of one's own culture from international perspectives
- A deeper appreciation of the global society.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.A. degree in International Studies a student must successfully complete INT 490.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.A. degree in International Studies a student must successfully complete the international experience requirement.

Requirements for a Major in International Studies for the B.A. degree

Students must have a "C-" or higher in all core requirements for the major, and an overall GPA of 2.0 or higher in the major.

Core Requirements (18 Credit Hours)

INT 105 - Introduction to International Studies

An introductory, interdisciplinary survey of the main concepts and terminology associated with the broad, interdisciplinary field of international studies, including economic, geo-political, and socio-cultural globalization

and the effects of these processes on individuals and communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 300 - Interdisciplinarity and International Studies

An introduction to the rationale and application of interdisciplinarity to International Studies.

Credit Hours: 3

Prerequisite Courses: INT 105
Additional Restrictions/Requirements: Restricted to International Studies majors or minors.
University Studies: Building Competencies/Writing Intensive, Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

INT 490 - Senior Seminar in International Studies

Advanced, interdiscipline study of topics that address critical developments and debates of contemporary international importance.

Credit Hours: 3

Prerequisite Courses: INT 300
Additional Restrictions/Requirements: International Studies major, and second semester junior or senior standing.
University Studies: Building Competencies/Writing Intensive and Information Literacy
Course Repeatability: Course may not be repeated.

Global Governance. One of:

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 215 - Interdisciplinary Approaches to the Politics of Globalization

Exploration of interdisciplinary and political dimensions of globalization, including the concept of "globalization", what it means in various contexts, and the way in which it developed through the Cold War and beyond. Introduction to an international political economy perspective, which is foundational to understanding globalization and the way we study the world in International Studies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Environment and Development. One of:

INT 232 Global Development and its Critics
Credits / Units: 3

INT 230 - Sustainability: From Global Goals to Local Action

Historical overview of how sustainability has been understood, and an introduction to the 17 Sustainable Development Goals (SDGs): what they are, how progress can be measured, and how the SDGs are relevant for the management of the global systems supporting humanity.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

Global Cultural and Social Dynamics

INT 220 - Cultural and Social Globalization

Exploration of contemporary cultural and social changes in the context of globalization. The course focuses on the ways in which various global and local cultural arenas reflect and are transformed by late capitalism's societal shift towards a mode of existence where images and consumerist desires have become the driving forces.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

Language Requirement (3 Credit Hours)

Complete any Language (SPN, FRH, PRT, RUS, CHN, JPN, ITN, GER, or other language) to the 202 level, or an equivalent through the placement test, or ACTFL score to the Intermediate level.

International Experience Requirement (3 Credit Hours)

Any approved UNCW Study Abroad Program, or INT Study Abroad programs.

Students may petition for an exception to this requirement and substitute with either INT 491 (Directed Independent Study) or INT 498 (International Studies Internship)

The International Experience will apply as your University Studies applied learning requirement and can be applied to your EBC requirement as well (by petition).

INT 294 - International Student Exchange

Sophomore-level designation for UNCW students participating in a semester exchange program in another country.

Credit Hours: 12

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 394 - International Student Exchange

Junior-level designation for UNCW students participating in a semester exchange in another country.

Credit Hours: 1 To 12

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 494 - International Student Exchange

Senior-level designation for UNCW students participating in a semester exchange program in another country.

Credit Hours: 12

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Note: In order to study abroad, students must have an overall GPA of 2.5 or better.

Concentration Requirement (15 Credit Hours)

- 15 hours in a thematic area (Global Cultural and Social Dynamics, Global Governance, or Environment and Development)
- 12 hours at 300 level or above; minimum of 3 upper-level INT electives.

Global Cultural and Social Dynamics

Explores significant issues related to various aspects of human society and culture, such as immigration, human rights, social movements, conflict and justice, and civilizations: histories, languages, and religions of various regions and countries.

ANT 317 - Social Issues in Latin America

Complex national cultures of Latin America. Contemporary issues such as the rights of native peoples, peasant land reform, urban slum settlements, development of resources, and political and economic reform movements. Case studies of individual countries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ANT 318 - Religion and Public Life Across Cultures

Exploration of the relationship between religion and politics and the increasing role of religion in public life across different cultures in the contemporary world. Students will learn about the interactions between religion, politics, and public life in countries with ties to different majoritarian religions such as the U.S.A. (Protestant Christianity), France (Catholicism), Turkey (Sunni Islam), and India (Hinduism).

Course Repeatability: Course may not be repeated.

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 330 - The Immigrant Experience

Through ethnographic accounts and personal narratives from a variety of global settings, the course examines the economic, social and political factors that prompt migration and explores the cultural adaptations, ethical questions, human rights issues, and public policy debates of immigration and resettlement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 301 - International Journalism

Study of news practices across borders and within different regional contexts. Themes include foreign correspondence, news flows, and media's relationship

to globalization and development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean,

and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of

instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FNA 101 - Cultures of the World Through Music and Dance

Examination of a variety of musical styles and dance forms from around the world, with attention to cultural issues and practices. Includes participation in dance and musical experiences.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HON 212 - Honors Topical Interdisciplinary Seminar: Living in a Global Society

An in-depth investigation of a special topic related to the theme 'Living in a Global Society' using the approaches of several disciplines; may be team-taught. Topics and approaches vary. Examples are 'Brazilian Culture' and 'Germs of the World.' May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Formal enrollment in the Honors Scholars College or consent of director.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 363 - History of Modern East Asia

Survey of East Asian history from the mid-nineteenth century to the present, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 372 - History of Modern Africa

Historical survey of African history from 1800 to the present with emphasis on the abolition of slavery and the slave trade; the scramble for Africa; establishment and operation of colonial rule; independence movements; and the post-colonial period.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 377 - Topics in International History

Selected themes and events in international or transnational history. Examples of course topics

include: The Second World War, Age of Napoleon. May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.

INT 311 - Film and the Feminine Ideal in Post Communist Eastern and Central European Cinema

An introduction to gender in transitional societies, politics, and economics through the medium of film with a focus on Post Communist Eastern and Central European women.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 314 - International NGOs, Globalization, and Development

Interdisciplinary overview of theories on the role international Nongovernmental Organizations play in the development of a country including development of political and economic institutions. Focus on the mounting internal and external challenges that threaten the promise of international Nongovernmental organizations, particularly in the Global South.

Credit Hours: 3

Prerequisite Courses: INT 105 or permission of instructor.
Course Repeatability: Course may not be repeated.

INT 316 - Global Protest Movements

An examination of global protests and activism for social, political or economic change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in A Global Society, Building

Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 317 - Dictators, Despots, and Presidents for Life

An examination of global history and current events through the lens of despotic governments and authoritarian regimes.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 318 - Transitional Justice

An overview of the major theories of transitional justice that considers the range of processes and mechanisms available. Examines the legacies of human rights abuses through the exploration of the field's most emblematic case studies from a number of countries, such as South Africa, Rwanda, Argentina, Chile, and Bosnia Herzegovina.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 332 - Global Politics of Food: An African Perspective

An examination of the global political economy of food through interdisciplinary examples from Africa with an exploration of the evolution of the human diet and traditional food production systems; the importance of culture in assigning meaning to food and how it is consumed; relationships between population, nutrition, and health; standards in the international trade of foods; the history and politics of food aid; food sovreignity and sustainable development; and the relationship between the environment and food security.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 333 - China in Africa

Examination of the historical and contemporary linkages between Africa and China. This course aims to

provide students an opportunity to critically discuss and analyze China-Africa, or Africa-China, socioeconomic relations and their implications for future political relations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 336 - Modern China through Film

Examination of the social, cultural, economic, and political issues confronting modern China as constructed in feature films produced inside the country and the West including before and after the Communists came to power.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 337 - China Encounters the World

Examination of how China has encountered the world since the 17th century, with emphasis on the late 19th and 20th centuries and how China has emerged as a

major power in the 21st century.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 338 - Modern Japan through Film

An exploration of how modern Japan, from the Togugawa period (1600-1867) through the Meiji Restoration (1868), and into the contemporary Showa (1926-1989) and Heisei (1989-) eras, has been constructed and represented in feature films.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 339 - Japan Encounters the World

Focus on the emergence of Japan as a regional economic and political power in Asia, and global actor. Emphasis is given to Japan's historical transformation from isolation in the 17th century to a global power in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 351 - The Contemporary Persian Gulf

Examination of the political, social, and economic history and issues of the Persian/Arabian Gulf in the 19th, 20th, and 21st centuries.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 352 - The Contemporary Middle East

Examination of the political, social, and economic history and issues of the modern Middle East.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 360 - Global Development: African Perspectives

Examination of recent trends in global development based upon broad agendas designed and implemented under the following United Nations frameworks: the Millennium Development Goals (MDGs) and the Sustainable Development Goals (SDGs).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 361 - Ethnic Conflicts and Territorial Disputes

Examination of modern territorial disputes and ethnic conflicts in Asia, Europe, Africa and the Middle East in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 362 - International Human Rights

Examination of basic human rights principles, instruments and institutions, and an overview of current issues and debates in practical and political dynamics of human rights. Takes a multi-disciplinary approach, drawing together contributions from political and social scientists, philosophers, lawyers, and policy experts and makes extensive use of case studies to illustrate key points.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 363 - Global Political Economy

Explores the dynamic ways in which markets, states, and societies interact with one another, within a context of increasing global economic, political, and cultural interdependence. The course combines a focus on Global Political Economy's main theoretical approaches with the analysis of stringent issues triggered by the expansion and intensification of economic, political, and cultural life at a global level.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 364 - Global Populism

An exploration of old and new populist movements, the causes of their resurgence in the United States and around the world, and their possible long-term consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 365 - Globalization and Social Change

An examination of the relationship between globalization and the contemporary cultural and social changes, focusing on various global and local cultural arenas transformed by late capitalism's societal shift from a structural reliance on language and prohibition of enjoyment, to a mode of existence where images and consumerist enjoyment have become the driving force.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 366 - Comparative Political Regimes through Film

A comparison of post-cold war films produced in Russia, the USA, and China as representatives of three civilizations: Eastern-Orthodox, Confucian, and Western; as well as of three political regimes; democracy, transitional democracy, and authoritarian.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 367 - America through Foreign Eyes

An examination of how non-Americans view the United States and its citizens. The course will reveal both the positive and negative images of America and Americans, as well as how these images are created and perpetuated and their consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 369 - Edible Culture: Globalization, Food, and Identity

Study of Globalization and its relation to food consumption, health, nutrition, and food supply. Topics include food and cultural traditions, community building, construction of identities, and social relationships.

Course Repeatability: Course may be repeated.

INT 370 - Forced Migration and Refugees

Examines forced migration and the institutional response for resolving large-scale displacement, including the rights and responsibilities of different actors in the contemporary international refugee regime. Considers global and local responses to the challenges of forced migration, investigating the obstacles to providing effective support for displaced persons.

Course Repeatability: Course may not be repeated.

INT 400 - The Cinema of Globalization

Study of globalization through the lens of cinema. Film as a popular means of socialization reflects and reinforces cultural characteristics, as well as offers a complex image of political life. This course, in line with the so-called "aesthetic turn" in International Studies helps students get a richer understanding of globalization through the medium of film.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 405 - INT 405 - War in the Global System - Masters

Exploration of warfare in the post-Cold War era. Most wars today are Intrastate in nature, centered on identity, issues, and largely a consequence of decolonization processes. Explores these issues through interdisciplinary research drawn from the fields of peace studies and conflict management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 415 - Global Politics and Everyday Life in the Age of AI

Exploration of the transformative impact of AI and machine learning on global politics and daily life, analyzing social trauma, identity, and shifts in time, space, and authority. This interdisciplinary course engages lived experiences, unfolding events, and multilayered analyses to examine security, social fantasy, and ontological challenges.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 480 - Global Issues

Intensive study of a selected international topic or theme. May be repeated for credit under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, program director and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 495 - Seminar in International Studies

Research of a selected international topic or theme. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: INT 105 and INT 300
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 499 - Honors Work in International Studies

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

JPN 311 - Perspectives on Contemporary Japanese Culture

Social, economic, and political issues in contemporary Japanese culture explored through a variety of sources with particular emphasis on comparing and contrasting

Japanese and international perspectives on trends and issues of global significance including national identity, the family unit, rights and responsibilities of individuals, and sustainability. Course taught in English.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 233 - African Religions

Religions of Africa, including traditional and non-traditional religious systems, and their impact on African societies and Africanism in the Americas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 334 - Revolutionary Movements

Introduction to the social, political, and economic conditions which give rise to radical response. Examines small rebel bands, or militias (commonly referred to as 'guerrilla' movements), and 'terrorist' organizations, as well as large-scale revolutionary movements.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PSY 270 - Cross-Cultural Psychology

Psychological study of the impact of culture on behavior. Topics including cultural effects on perception, cognition, personality, emotions, development, and mental health will be examined. Emphasis on application of cultural frames of reference to living in a global society.

Credit Hours: 3

Prerequisite Courses: PSY 105
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 355 - Social Movements

Analysis of why people protest and form collectives. Examination of the research and theories in social movements with special attention to origins, dynamics, and consequences using a sociological lens.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

TSL 401 - Teaching English as a Foreign Language

Introduces students to the field of Teaching English as a foreign/international language abroad. This course is designed for people who wish to teach English abroad or tutor language learners in the US. Participants build an introductory foundation in EFL methods, cross-cultural communication and the structure of the English language.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLC 205 - Perspectives in World Cinema

Survey of selected international cinemas with emphasis on major narratives, trends, and movements examined in the context of the language, history, politics, and culture of their respective countries. Possible topics to be explored through film include national identity, (post) colonialism, ethnicity, gender, sexuality, class, globalization and transnational exchanges.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WLC 206 - Perspectives in European Cinema

Survey of selected European cinemas with emphasis on major narrative films and the cultural and historical context from which they derive. Explores the ways in which cinema constructs concepts of national identity and examines whether the cinema of a nation carries distinguishing traces of the nation's unique history, culture, and ethnic makeup.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WLC 354 - The Middle East Through Music, Film, and Literature

Explore the cultures of the Middle East through music, cinema, and literature.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Global Governance

Explores the ways different global actors (States, International Organizations, Social Movements or NGOs/INGOs or TANS, Insurgent movements) seek to manage complex international issues (global markets, trade or finance or money, power, war and conflict, conflict resolution, human rights, migration, and international law).

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CYBR 202 - Cyber Policy, Legal, Ethics, Compliance

Exploration of the intersection between cybersecurity and policy, law, ethics, privacy, compliance, and law enforcement. Examination of applicable laws and

policies related to cyber defense. Topics include privacy and the internet, the effectiveness of cybersecurity applications in preventing crime and abuse, and the application of ethical concepts in cybersecurity.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 201.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CYBR 442 - Cyber Politics

Introduction to key aspects of cyberspace's emergence as the fifth domain of strategic warfare, the center of human communication, and an integral part of social governance. Study of cyber politics as an area related to political philosophy, international economics, and realpolitik in diplomacy and warfare.

Credit Hours: 3

Prerequisite Courses: CYBR 202.
Course Repeatability: Course may not be repeated.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the

mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FRH 412 - The Francophone World

Study of representative literary and non-literary texts, films and sound recordings from French-speaking cultures in North America, the Caribbean, Africa, Asia, and elsewhere. Oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Building Competencies/Writing

Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 180 - World Regional Geography

Regional survey of historical, physical, economic, and cultural geography of world regions. Fundamental locational geography as the foundation for a clear world view and an understanding of global interdependence.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HON 212 - Honors Topical Interdisciplinary Seminar: Living in a Global Society

An in-depth investigation of a special topic related to the theme 'Living in a Global Society' using the approaches of several disciplines; may be team-taught. Topics and approaches vary. Examples are 'Brazilian Culture' and 'Germs of the World.' May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Formal enrollment in the Honors Scholars College or consent of director.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical

Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 377 - Topics in International History

Selected themes and events in international or transnational history. Examples of course topics include: The Second World War, Age of Napoleon. May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining

key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

INB 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.

Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Crosslisting: MGT 352
Course Repeatability: Course may not be repeated.

INB 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: SCM 377
Course Repeatability: Course may not be repeated.

INB 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: ECN 426
Course Repeatability: Course may not be repeated.

INB 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: FIN 439
Course Repeatability: Course may not be repeated.

INB 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: INB 300 and MKT 340
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: MKT 442
Course Repeatability: Course may not be repeated.

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 215 - Interdisciplinary Approaches to the Politics of Globalization

Exploration of interdisciplinary and political dimensions of globalization, including the concept of "globalization", what it means in various contexts, and the way in which it developed through the Cold War and beyond. Introduction to an international political economy perspective, which is foundational to understanding globalization and the way we study the world in International Studies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

INT 314 - International NGOs, Globalization, and Development

Interdisciplinary overview of theories on the role international Nongovernmental Organizations play in the development of a country including development of political and economic institutions. Focus on the mounting internal and external challenges that threaten the promise of international Nongovernmental organizations, particularly in the Global South.

Credit Hours: 3

Prerequisite Courses: INT 105 or permission of instructor.
Course Repeatability: Course may not be repeated.

INT 315 - Topics in Globalization

Intensive study of a selected topic or theme in globalization. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 316 - Global Protest Movements

An examination of global protests and activism for social, political or economic change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in A Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 317 - Dictators, Despots, and Presidents for Life

An examination of global history and current events through the lens of despotic governments and authoritarian regimes.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 318 - Transitional Justice

An overview of the major theories of transitional justice that considers the range of processes and mechanisms available. Examines the legacies of human rights abuses through the exploration of the field's most emblematic case studies from a number of countries, such as South Africa, Rwanda, Argentina, Chile, and Bosnia Herzegovina.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 319 - Insurgency

Exploration of violent and nonviolent political movements by examining structural causes, mobilization, ideologies related to insurgencies, the global dimensions related to contagion effects, and transnational insurgent movements.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 322 - Environmental Extractivism and the Anthropocene

Interdisciplinary exploration of environmental and development challenges brought about by climate change and resource extraction. Students engage with key social science approaches and different cultural perspectives on nature, ecology, and anthropogenic environmental change through diverse case studies.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 331 - The New Scramble for Africa

Interdisciplinary overview of environmental history and development in Africa from the colonial era to the present.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 332 - Global Politics of Food: An African Perspective

An examination of the global political economy of food through interdisciplinary examples from Africa with an exploration of the evolution of the human diet and traditional food production systems; the importance of culture in assigning meaning to food and how it is consumed; relationships between population, nutrition, and health; standards in the international trade of foods; the history and politics of food aid; food sovreignity and sustainable development; and the relationship between the environment and food security.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 333 - China in Africa

Examination of the historical and contemporary linkages between Africa and China. This course aims to provide students an opportunity to critically discuss and analyze China-Africa, or Africa-China, socioeconomic relations and their implications for future political relations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 336 - Modern China through Film

Examination of the social, cultural, economic, and political issues confronting modern China as constructed in feature films produced inside the country and the West including before and after the Communists came to power.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 337 - China Encounters the World

Examination of how China has encountered the world since the 17th century, with emphasis on the late 19th and 20th centuries and how China has emerged as a major power in the 21st century.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 338 - Modern Japan through Film

An exploration of how modern Japan, from the Togugawa period (1600-1867) through the Meiji Restoration (1868), and into the contemporary Showa (1926-1989) and Heisei (1989-) eras, has been constructed and represented in feature films.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 339 - Japan Encounters the World

Focus on the emergence of Japan as a regional economic and political power in Asia, and global actor. Emphasis is given to Japan's historical transformation

from isolation in the 17th century to a global power in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 344 - Russia in the World

Exploration of Russia's internal self perception as a people and state coming to terms with a new existence in the Post-Cold War World. Russia has always perceived itself to be a major global actor, and struggles against Western interpretations of it as an aberrant state, and a regional actor only.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction none**Minor Restriction** none

INT 351 - The Contemporary Persian Gulf

Examination of the political, social, and economic history and issues of the Persian/Arabian Gulf in the 19th, 20th, and 21st centuries.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 352 - The Contemporary Middle East

Examination of the political, social, and economic history and issues of the modern Middle East.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 360 - Global Development: African Perspectives

Examination of recent trends in global development based upon broad agendas designed and implemented under the following United Nations frameworks: the Millennium Development Goals (MDGs) and the Sustainable Development Goals (SDGs).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 361 - Ethnic Conflicts and Territorial Disputes

Examination of modern territorial disputes and ethnic conflicts in Asia, Europe, Africa and the Middle East in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 362 - International Human Rights

Examination of basic human rights principles, instruments and institutions, and an overview of current issues and debates in practical and political dynamics of human rights. Takes a multi-disciplinary approach, drawing together contributions from political and social scientists, philosophers, lawyers, and policy experts and makes extensive use of case studies to illustrate key points.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 363 - Global Political Economy

Explores the dynamic ways in which markets, states, and societies interact with one another, within a context of increasing global economic, political, and cultural interdependence. The course combines a focus on Global Political Economy's main theoretical approaches with the analysis of stringent issues triggered by the expansion and intensification of economic, political, and cultural life at a global level.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 364 - Global Populism

An exploration of old and new populist movements, the causes of their resurgence in the United States and around the world, and their possible long-term consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 365 - Globalization and Social Change

An examination of the relationship between globalization and the contemporary cultural and social changes, focusing on various global and local cultural arenas transformed by late capitalism's societal shift from a structural reliance on language and prohibition of enjoyment, to a mode of existence where images and consumerist enjoyment have become the driving force.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 367 - America through Foreign Eyes

An examination of how non-Americans view the United States and its citizens. The course will reveal both the positive and negative images of America and Americans, as well as how these images are created and perpetuated and their consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 369 - Edible Culture: Globalization, Food, and Identity

Study of Globalization and its relation to food consumption, health, nutrition, and food supply. Topics include food and cultural traditions, community building, construction of identities, and social relationships.

Course Repeatability: Course may be repeated.

INT 370 - Forced Migration and Refugees

Examines forced migration and the institutional response for resolving large-scale displacement, including the rights and responsibilities of different actors in the contemporary international refugee regime. Considers global and local responses to the challenges of forced migration, investigating the obstacles to providing effective support for displaced persons.

Course Repeatability: Course may not be repeated.

INT 400 - The Cinema of Globalization

Study of globalization through the lens of cinema. Film as a popular means of socialization reflects and reinforces cultural characteristics, as well as offers a complex image of political life. This course, in line with the so-called "aesthetic turn" in International Studies helps students get a richer understanding of globalization through the medium of film.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 405 - INT 405 - War in the Global System - Masters

Exploration of warfare in the post-Cold War era. Most wars today are Intrastate in nature, centered on identity, issues, and largely a consequence of decolonization processes. Explores these issues through interdisciplinary research drawn from the fields of peace studies and conflict management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 415 - Global Politics and Everyday Life in the Age of AI

Exploration of the transformative impact of AI and machine learning on global politics and daily life, analyzing social trauma, identity, and shifts in time, space, and authority. This interdisciplinary course engages lived experiences, unfolding events, and multilayered analyses to examine security, social fantasy, and ontological challenges.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 480 - Global Issues

Intensive study of a selected international topic or theme. May be repeated for credit under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, program director and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 495 - Seminar in International Studies

Research of a selected international topic or theme. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: INT 105 and INT 300
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 499 - Honors Work in International Studies

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

LED 385 - Global Applications of Leadership

This course is designed to accompany faculty-led study abroad in the Leadership Studies Minor. The course provides opportunities to learn about leadership in another country, observe and interact with

organizational leaders in multiple settings, and apply leadership theory and knowledge in an international context through completion of a leadership project.

Credit Hours: 1 To 3

Course Repeatability: Course may be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human

relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear weapons technology, why countries seek nuclear weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 463 - International Development

Examines the field of international development including economic development and governance assistance activities with attention to classic theories as well as current debates and innovative approaches.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 464 - Democracy and Authoritarianism

Integrative course focusing on scholarly literature on democracy, authoritarianism, and democratization, with an emphasis on real world examples of regime types and transitions.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 454 - International Meeting Planning

The organization and production of international corporate meetings, seminars, events, and conferences using innovative and creative programs. It focuses on international planning considerations including organizing and/or hosting international events,

managing finances internationally, cultural differences, international contracting, marketing, traveling overseas, and safety and security.

Credit Hours: 3

Prerequisite Courses: REC 381
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or STT 215
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite

courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 415 - Globalization and Development

An examination of development and globalization theories and globalization processes in the 21st century through comparative development analysis.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in sociology at the 300 level.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Environment and Development

Focus on global development trends (e.g., industrialization, urbanization, infrastructure deployment, and resource extraction) directly impacting natural environments and human/non-human livelihoods. Considers effective mitigations and solutions (e.g., agricultural policy, eco-tourism, and sustainability practices) that require cooperation and coordination across international borders.

ANT 309 - Environmental Anthropology

A study of cultural adaptations as responses of human populations to varied environments; this course will focus upon cultural vs. biological adaptation from the archaeological past to the ethnographic present.

Credit Hours: 3

Prerequisite Courses: ANT 105 or ANT 206 or ANT 207
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 150 - Humans and Ecology

Introduction to the principles of ecology including concepts of succession, biotic communities, biodiversity, limits on population growth and conservation of natural resources.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 482 - Wildlife Ecology

Principles of wildlife ecology and management, including population dynamics, diseases, techniques, behavior, habitat manipulations, policy and administration, and contemporary issues such as antihunting. Assigned field problems.

Credit Hours: 3

Prerequisite Courses: BIO 366
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of

coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHML 377 - Environmental Chemistry Laboratory

Laboratory analysis of environmental samples, including applications of standard EPA methods. This course is the lab for CHM 377.

Credit Hours: 1

Corequisite Courses: CHM 377
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to

analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221

Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 431 - International Field Experience

An interdisciplinary introduction to environmental field methods and investigation in foreign countries. Focused study on environmental issues and problems specific to host country on local, regional, and global scales. Course integrates field and classroom instruction. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 1

Prerequisite Courses: EVS 195
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 5

EVS 466 - Sustainable Tourism

Introduction to concepts and principles of sustainable tourism development, emphasizing implications for management and planning. Cases from the U.S. and around the world are used to examine and discuss issues and practices of sustainable tourism development within different geocultural contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image

analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 335 - Geomorphology

A systematic treatment of the surface processes that shape fluvial, glacial, aeolian, and coastal landforms. Themes include process mechanics, description and classification of landforms, and evolution of landform systems. Students work individually or in small groups to analyze geomorphological data in field and laboratory settings. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120 or OCN 150.
Crosslisting: GLY 335
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 420, PHY 420
Course Repeatability: Course may not be repeated.

GGY 435 - Environmental Geography

A systems approach to understanding past, present and future human impacts on the natural environment, including changes and impacts on the hydrosphere, atmosphere, biosphere, geosphere and cryosphere. A team-based learning experience emphasizing socio-environmental synthesis and concept application

through a series of case studies discussion.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 535
Course Repeatability: Course may not be repeated.

GGY 436 - Ice Age Earth

A review of the Quaternary Period, roughly the last two million years of earth history. Topics included the discovery of the ice age, climate change theory, glacial dynamics, geological and biological records of environmental change, and human evolution and migration during the Quaternary.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101 or OCN 150.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HON 212 - Honors Topical Interdisciplinary Seminar: Living in a Global Society

An in-depth investigation of a special topic related to the theme 'Living in a Global Society' using the approaches of several disciplines; may be team-taught. Topics and approaches vary. Examples are 'Brazilian Culture' and 'Germs of the World.' May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Formal enrollment in the Honors Scholars College or consent of director.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 456 - Seminar: U.S. Environmental History

Selected topics in U.S. environmental history. Examples of topics: nature and culture, the cult of the wilderness, conservation and preservation, resources and regions, gender and nature, the environmental movement. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 105 or HST 106) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 533
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 215 - Interdisciplinary Approaches to the Politics of Globalization

Exploration of interdisciplinary and political dimensions of globalization, including the concept of "globalization", what it means in various contexts, and the way in which it developed through the Cold War and beyond. Introduction to an international political economy perspective, which is foundational to understanding globalization and the way we study the world in International Studies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

INT 230 - Sustainability: From Global Goals to Local Action

Historical overview of how sustainability has been understood, and an introduction to the 17 Sustainable Development Goals (SDGs): what they are, how progress can be measured, and how the SDGs are relevant for the management of the global systems supporting humanity.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 314 - International NGOs, Globalization, and Development

Interdisciplinary overview of theories on the role international Nongovernmental Organizations play in the development of a country including development of

political and economic institutions. Focus on the mounting internal and external challenges that threaten the promise of international Nongovernmental organizations, particularly in the Global South.

Credit Hours: 3

Prerequisite Courses: INT 105 or permission of instructor.
Course Repeatability: Course may not be repeated.

INT 316 - Global Protest Movements

An examination of global protests and activism for social, political or economic change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in A Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 322 - Environmental Extractivism and the Anthropocene

Interdisciplinary exploration of environmental and development challenges brought about by climate change and resource extraction. Students engage with key social science approaches and different cultural perspectives on nature, ecology, and anthropogenic environmental change through diverse case studies.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 331 - The New Scramble for Africa

Interdisciplinary overview of environmental history and development in Africa from the colonial era to the present.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 360 - Global Development: African Perspectives

Examination of recent trends in global development based upon broad agendas designed and implemented under the following United Nations frameworks: the Millennium Development Goals (MDGs) and the Sustainable Development Goals (SDGs).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 362 - International Human Rights

Examination of basic human rights principles, instruments and institutions, and an overview of current issues and debates in practical and political dynamics of human rights. Takes a multi-disciplinary approach, drawing together contributions from political and social scientists, philosophers, lawyers, and policy experts and makes extensive use of case studies to illustrate key points.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 363 - Global Political Economy

Explores the dynamic ways in which markets, states, and societies interact with one another, within a context of increasing global economic, political, and cultural interdependence. The course combines a focus on Global Political Economy's main theoretical approaches with the analysis of stringent issues triggered by the expansion and intensification of economic, political, and cultural life at a global level.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 365 - Globalization and Social Change

An examination of the relationship between globalization and the contemporary cultural and social changes, focusing on various global and local cultural arenas transformed by late capitalism's societal shift from a structural reliance on language and prohibition of enjoyment, to a mode of existence where images and consumerist enjoyment have become the driving force.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 366 - Comparative Political Regimes through Film

A comparison of post-cold war films produced in Russia, the USA, and China as representatives of three civilizations: Eastern-Orthodox, Confucian, and Western; as well as of three political regimes; democracy, transitional democracy, and authoritarian.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 400 - The Cinema of Globalization

Study of globalization through the lens of cinema. Film as a popular means of socialization reflects and reinforces cultural characteristics, as well as offers a complex image of political life. This course, in line with the so-called "aesthetic turn" in International Studies helps students get a richer understanding of globalization through the medium of film.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 405 - INT 405 - War in the Global System - Masters

Exploration of warfare in the post-Cold War era. Most wars today are Intrastate in nature, centered on identity, issues, and largely a consequence of decolonization processes. Explores these issues through interdisciplinary research drawn from the fields of peace studies and conflict management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 480 - Global Issues

Intensive study of a selected international topic or theme. May be repeated for credit under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, program director and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 495 - Seminar in International Studies

Research of a selected international topic or theme. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: INT 105 and INT 300
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 499 - Honors Work in International Studies

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 475 - Marine Biogeochemistry

A geochemical perspective on the chemistry of the world's oceans with an emphasis on carbon cycling through the marine geosphere and biosphere. Topics include introductions to chemical oceanography, stable isotope geochemistry, paleoceanography, and investigations into the role of the oceans in the global carbon cycle through time.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101; and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: GLY 575.
Course Repeatability: Course may not be repeated.

PBH 401 - Foundations of Environmental Health

Overview of assessment, control, prevention, and safety of human health from environmental and occupational risk factors. Topics include pollution wastes, toxic metals, pesticides, radiation, vector borne diseases, and occupational injuries and stressors. Emphasizing deleterious effects of industrialization on

developing countries, effects of globalization, and the rise of the environmental justice movement.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; or consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 463 - International Development

Examines the field of international development including economic development and governance assistance activities with attention to classic theories as well as current debates and innovative approaches.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 370 - Environmental Psychology

Interactions between the physical environment and the behavior of the individual. Emphasis on perception of the environment, the behavioral effects of noxious factors in the environment, the psychology of environmental design, and the formation and change of attitudes about the environment.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (PSY 246 or PSY 264 or EVS 195)
Crosslisting: EVS 370
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 451 - Travel and Tourism

A description of the key components that make a global tourism designation a success: traveler's motivation, theories of behavior, planning, development, and forecasting supply and demand. Students also learn about the delicate and sensitive relationship tourism has with its surrounding social, natural, and coastal environment.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 305 - Demography

A study of the changes in size, composition, distribution of population and the dynamics underlying them.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 385 - Environmental Sociology

Examination of human-environment interactions from a sociological perspective. Focus on culture, patterns of inequalities, consumption, and beliefs about the environment and their impacts on the natural world.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SOC 415 - Globalization and Development

An examination of development and globalization theories and globalization processes in the 21st century through comparative development analysis.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in sociology at the 300 level.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 39

Additional Information

Must complete all requirements for the major with an overall "C" (2.0) or better. In order to study abroad, students must have an overall GPA of 2.5 or better.

New Core

Marine Biology, B.S.

https://uncw.edu/bio/ J. Jarvis (coordinator)

The Marine Biology program is a unique baccalaureate degree in the university system. It includes a strong foundation of biology with an emphasis in marine biology at all levels. Full use is made of the natural laboratory provided by the adjacent Atlantic Ocean through extensive field work in many marine biology and biology courses. The curriculum is flexible enough to meet the individual needs of the student enabling preparation for graduate studies or for teaching, research and consulting careers available to one with the baccalaureate degree.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine Biology a student must successfully complete BIO 495.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Biology or the B.S. degree in Marine

Biology a student must successfully complete one of the following:

- Honors in any science department (BIO 499, CHM 499, EVS 499, GLY 499, MAT 499, PSY 499, PHY 499);
- Directed individual study involving hands-on experience in any science department (BIO 291, BAN 491, BIO 495, CHM 491, EVS 491, GLY 491, MAT 491, PSY 491, PHY 491);
- BIO 498, BIO 493, BIO 490;
- Formal student teaching experience taken for UNCW credit (e.g. EDNL 406, EDN 409, EDN 411).

Requirements for a Major in Marine Biology for the B.S. Degree:

27 hours total

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 205 - Biology of the Sea

Introduction to the organisms that live in marine environments and the role of humans in the use of marine resources. Explores the biological, physical, chemical, and geological characteristics of various marine habitats.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 206 - Marine Megafauna

Exploration of the biology of large marine animals, including giant squid, sharks, sea turtles, seabirds, and marine mammals. Considers the role that marine megafauna play in ocean ecosystems and the impacts of human activities on these organisms. Includes exploration of the social, economic, and policy considerations that are critical in the protection of threatened species.

Course Repeatability: Course may not be repeated.

or

BIO 207 - Biology of Coastal Habitats

Introduction to coastal habitats and the biology of the organisms residing in areas such as marshes, estuaries, hardbottom habitats, temperate seagrasses, kelp beds, and tidal flats. Considers ecological and economic importance of coastal habitats and investigates major stressors and mechanisms of resilience.

Course Repeatability: Course may not be repeated.

or

BIO 208 - Marine Life in Danger

Introduction to the biology of the Earth's ocean ecosystems and exploration of how human activities are threatening their health and function. Investigation of the causes, effects, and potential solutions to the current issues facing the world's largest habitat.

Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 325 - Molecular Biology of the Cell

Chemical and physical properties of cells, with emphasis on molecular biology and experimental biological systems used to elucidate cellular function. The lab for this course is BIOL 325.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Course Repeatability: Course may not be repeated.

BIOL 325 - Molecular Biology of Cell Laboratory

Experiments demonstrating basic phenomena underlying cellular function. This course is the lab for BIO 325.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 325.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 340 - Plant Physiology

Study of plant function at the molecular, cellular, and organismic levels, with emphasis placed on unique aspects of vascular plants. Topics include water relations, solute transport, photosynthesis, nitrogen metabolism, plant hormones, photo control of development, and stress physiology.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

or

BIO 345 - Animal Physiology

Comparative study of physiological processes in different organisms approached through study of tissues, organs, and systems. The lab for this course is BIOL 345.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

BIOL 345 - Animal Physiology Laboratory

Introduction to the equipment and techniques for computer-based acquisition of physiological data. Experience in data analysis and presentation, and in computer simulations of physiological experiments is also included. This course is the lab for BIO 345.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 345.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

BIO 362 - Marine Ecology

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. The lab for this course is BIOL 362.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIOL 362 - Marine Ecology Laboratory

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. Laboratory activities are designed to give students experiential knowledge and acquaint them with the regional marine fauna and flora. This course is the lab for BIO 362.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 362
Prerequisite Courses: BIO 201 and BIO 202

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

or

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

and

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

Note:

The department strongly recommends that two out of BIO 366; BIO 335; BIO 340 or BIO 345 be completed before taking other BIO courses at the 300 or 400 level.

Marine Biology Requirements

Organismal Biology, must chose two of the following bullets 6 credits total (NOTE: only 3 credit lecture counts toward this requirement; lab credit will count toward elective total):

BIO 313 - Marine Phycology

Introduction to the morphology, life histories, and ecology of benthic marine algae with emphasis on special topics such as morphogenesis, ecotypic variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. The lab for this course is BIOL 313.

Credit Hours: 3

Corequisite Courses: BIOL 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

BIOL 313 - Marine Phycology Laboratory

Introduction to phycological sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate morphology, life histories, and ecology of benthic marine algae with emphasis on special topics such as morphogenesis, ecotypic variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. This course is the lab for BIO 313.

Corequisite Courses: BIO 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 358 - Marine Mammals

Study of pinnipeds, cetaceans, and sirenians, emphasizing their evolution and taxonomic relationships, anatomical and physiological adaptations, ecologic and economic importance, and natural history.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 412 - Marine Botany

Introduction to coastal marine plant communities, including how the marine environment affects plant community dynamics. Topic areas include: classification and identification, morphology, physiological ecology, importance to humans, and current hot topics. The lab for this course is BIOL 412.

Credit Hours: 3

Corequisite Courses: BIOL 412
Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIOL 412 - Marine Botany Laboratory

Introduction to marine botany sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate how to identify marine plant communities and quantify their responses to environmental factors. This course is the lab for BIO 412.

Credit Hours: 1

Corequisite Courses: BIO 412
Course Repeatability: Course may not be repeated.

BIO 456 - Ornithology

An introduction to avian biology with an emphasis on the evolution, classification, physiology, ecology, natural history, and conservation of birds. The lab for this course is BIOL 456.

Credit Hours: 3

Corequisite Courses: BIOL 456
Prerequisite Courses: BIO 201, BIO 202, and BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIOL 456 - Ornithology Laboratory

Introduction to avian anatomy and field identification of North Carolina birds with field trips to local areas. The class may include weekend camping trips or visits to field stations in North Carolina. This course is the lab for

BIO 456.

Credit Hours: 1

Corequisite Courses: BIO 456
Prerequisite Courses: BIO 201, BIO 202, and (BIO 366 or BIO 362)
Course Repeatability: Course may not be repeated.

BIO 457 - Ichthyology

Survey of systematics, evolution, ecology, and natural history of living fishes, with emphasis on southeastern United States. The lab for this course is BIOL 457.

Credit Hours: 3

Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.

BIOL 457 - Ichthyology Laboratory

Demonstration of basic anatomy, taxonomy, and natural history of local species in laboratory and field environments. This course is the lab for BIO 457. This course is the lab for BIO 457.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 457
Course Repeatability: Course may not be repeated.

Marine Biology Applied Learning Experience

3 credits total

BIO 490 - Practicum In Marine Biology

Exploration of advanced topics in marine biology with an emphasis on hands-on research experiences in the classroom, laboratory, or field. The lab for this course is BIOL 490.

Credit Hours: 1

Corequisite Courses: BIOL 490
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.
Major Restriction Marine Biology**Minor Restriction** Marine Biology

BIO 498 - Internship in Biological Sciences

Practical field experience and training through a program of work and study within a business or agency. Students are supervised and evaluated jointly by a biology faculty member and an on-site supervisor. (Only three semester hours may count toward biology degree requirement.)

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Junior or senior standing and major, minimum overall average of 2.00 and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 499 - Honors Work in Biology

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Collateral Requirements

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

and

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Additional Information:

A "C" (2.00) or better average is required for BIO courses above 299.

Marine Biology Option:

Must complete general requirements for B.S. Degree in Marine Biology. Additionally, a minimum of 25 hours chosen from courses numbered above BIO 299 and not

used to satisfy other requirements. CHM 211, CHML 211, PHY 101/201, PHY102/202 and/or MAT 151 will also count towards biology electives. >500 level courses may be chosen with permission of the instructor. No more than 10 hours may be counted from BIO 480, 491 (6 hr. max), 493 (3 hr. max), 498 (3 hr. max), and 499 (6 hr. max).The UNCW marine biology curriculum is a unique baccalaureate program in the university system. It includes a strong foundation of biology with an emphasis in marine biology at all levels. Full use is made of the natural laboratory provided by the adjacent Atlantic Ocean through extensive field work in many marine biology and biology courses. The curriculum is flexible enough to meet the individual needs of the student enabling preparation for graduate studies or for teaching and research careers available to one with the baccalaureate degree.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is

CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162

Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental

functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Marine Conservation Option:

Must complete general requirements for B.S. Degree in Marine Biology and BIO 466. The Marine Conservation option provides a B.S. Marine Biology degree plan that is designed for students primarily interested in the biological aspects of conservation science in marine environments (e.g., community ecology, population biology, biogeography, conservation genetics and assessment of threatened or endangered species and habitats).

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

Elective Courses:

Additionally, a minimum of 22 hours chosen from courses listed below and not used to satisfy other requirements. >500 level courses may be chosen with permission of the instructor. No more than 10 hours may be counted from BIO 480, 491 (6 hr. max), 493 (3 hr. max), 498 (3 hr. max), and 499 (6 hr. max).

BIO 313 - Marine Phycology

Introduction to the morphology, life histories, and ecology of benthic marine algae with emphasis on special topics such as morphogenesis, ecotypic

variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. The lab for this course is BIOL 313.

Credit Hours: 3

Corequisite Courses: BIOL 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

BIOL 313 - Marine Phycology Laboratory

Introduction to phycological sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate morphology, life histories, and ecology of benthic marine algae with emphasis on special topics such as morphogenesis, ecotypic variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. This course is the lab for BIO 313.

Corequisite Courses: BIO 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 322 - Biological Invasions

The scientific study of the invasion process, persistence, and spread of introduced species; ecological and economic impacts and management of introduced species; and how global change influences the impact of introduced species on human resources.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 354 - Herpetology

Study of reptiles and amphibians with emphasis on their evolution, physiology, ecology, behavior, and conservation. Laboratory focuses on species identification and field techniques for studying herpetofauna. Several field trips to local areas.

Credit Hours: 0 Or 4

Prerequisite Courses: BIO 201 and BIO 202.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

BIO 358 - Marine Mammals

Study of pinnipeds, cetaceans, and sirenians, emphasizing their evolution and taxonomic relationships, anatomical and physiological adaptations, ecologic and economic importance, and natural history.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 363 - Coral Reef Ecology

Ecology and physiology of coral reef organisms, emphasizing processes that contribute to the function and complexity of coral reef ecosystems. Reef information and geology, coral biology and physiology, ecological interactions, human effects, global effects,

and conversation will be considered. The lab for this course is BIOL 363.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 363 - Coral Reef Ecology Laboratory

Methods for studying coral reef taxa, community structure, coral physiology, and ecological processes will be explored. Independent project required.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 363
Prerequisite Courses: BIO 201, BIO 202
Course Repeatability: Course may not be repeated.

BIO 367 - Antarctic Ecology, Geology, History, and Policy

An in-depth examination of the frozen continent including its geologic origins, ice sheet formation, and fossil record. Its unique ecology, endemic wildlife,

discovery and human history, anthropogenic impacts, and current international agreements to protect resources will also be examined. Open to juniors and seniors from all major departments. Also offered as BIO 585 with additional requirements.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 368 - Behavioral Ecology

Evolutionary approach focusing on both proximate and ultimate causes of behavior. Feeding and antipredatory behavior, habitat selection, territoriality, reproductive behavior, mating systems, parental care, animal communication, and the evolution of social behavior. Emphasis on birds, mammals, and fish.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and BIO 366
Course Repeatability: Course may not be repeated.

BIO 369 - Behavioral Neurobiology

Introduction to the natural behavior of animals and how that relates to the structure and function of neurons and neural tissues. Neural systems and their relationship to the biophysical environment, how they underlie animal perception and behavior, and how they result from evolutionary processes, such as coevolution are explored.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202.
Course Repeatability: Course may not be repeated.

BIO 378 - Global Environmental Problems

Review and discussion of causes and effects of major environmental problems, with emphasis on ecosystem-level effects and interactions. Topics include extinction, deforestation, climate change, and pollution impacts.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO

202 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

BIO 387 - Biological Impacts of Coastal Management

Overview of the impacts of coastal management efforts on species of concern and broader ecosystem dynamics. Exploration of how coastal activities and coastal management related to fisheries, aquaculture, shoreline processes, and water quality may directly and indirectly impact coastal ecosystem composition and resiliency, populations of endangered species, and broader connections with the ocean foods webs.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202.
Additional Restrictions/Requirements: Junior or senior standing or consent of instructors
Course Repeatability: Course may not be repeated.

BIO 412 - Marine Botany

Introduction to coastal marine plant communities, including how the marine environment affects plant

community dynamics. Topic areas include: classification and identification, morphology, physiological ecology, importance to humans, and current hot topics. The lab for this course is BIOL 412.

Credit Hours: 3

Corequisite Courses: BIOL 412
Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIOL 412 - Marine Botany Laboratory

Introduction to marine botany sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate how to identify marine plant communities and quantify their responses to environmental factors. This course is the lab for BIO 412.

Credit Hours: 1

Corequisite Courses: BIO 412
Course Repeatability: Course may not be repeated.

BIO 430 - Evolutionary Biology

Study of biological change over time through pathways of descent and through adaptation, including how biological diversity, from molecular through organismal levels, originates and is maintained. Focus on modern evolutionary analysis and applications in medicine, agriculture, and conservation.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: ANT 430
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 452 - Mammalogy

Study of mammals, emphasizing their evolution, taxonomic relationships, structural and physiological adaption, and life histories.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 456 - Ornithology

An introduction to avian biology with an emphasis on the evolution, classification, physiology, ecology, natural history, and conservation of birds. The lab for this course is BIOL 456.

Credit Hours: 3

Corequisite Courses: BIOL 456
Prerequisite Courses: BIO 201, BIO 202, and BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIOL 456 - Ornithology Laboratory

Introduction to avian anatomy and field identification of North Carolina birds with field trips to local areas. The class may include weekend camping trips or visits to field stations in North Carolina. This course is the lab for BIO 456.

Credit Hours: 1

Corequisite Courses: BIO 456
Prerequisite Courses: BIO 201, BIO 202, and (BIO 366 or BIO 362)
Course Repeatability: Course may not be repeated.

BIO 457 - Ichthyology

Survey of systematics, evolution, ecology, and natural history of living fishes, with emphasis on southeastern United States. The lab for this course is BIOL 457.

Credit Hours: 3

Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.

BIOL 457 - Ichthyology Laboratory

Demonstration of basic anatomy, taxonomy, and natural history of local species in laboratory and field environments. This course is the lab for BIO 457. This course is the lab for BIO 457.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 457
Course Repeatability: Course may not be repeated.

BIO 458 - Fisheries Biology

An examination of the factors that control the population dynamics of fishes. Introduction to the principles of fisheries science including estimation of population metrics such as age, growth, mortality, and abundance, fish stock assessment, and fishery management strategies. The lab for this course is BIOL 458.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

BIO 462 - Deep Sea Biology

Study of deep-sea biosphere, with emphasis on the biology of abyssal zones off the North Carolina coast and hydrothermal vent ecosystems. Topics include unique benthic and pelagic animals in deep-sea environments and their physiological adaptations to hydrostatic pressure and low temperature, nutritional dynamics, reproductive strategies, energy flow, and speciation in abyssal and ultra abyssal zones.

Credit Hours: 3

Prerequisite Courses: BIO 362
Course Repeatability: Course may not be repeated.

BIO 470 - Mariculture

Overview of basic principles of fish and shellfish production. Focus on the basic features of culture systems, biology of major culture species and legal and economic aspects of mariculture. Specific culture techniques for a variety of marine species, with special

emphasis on the southeast US coast.

Credit Hours: 3

Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.

BIO 486 - Advanced Topics in Mariculture

Advanced mariculture topics not considered in detail in other courses. More than one topic may be taken for credit.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to

coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

BIO 489 - Benthic Ecology

The scientific study of the organisms and processes that structure coastal benthic communities. Benthic communities encompass the vast seafloor areas of estuaries and oceans and support aquatic communities, fisheries, larger species of interest, and critical ecosystem processes.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, BIO 366.
Course Repeatability: Course may not be repeated.

BIO 490 - Practicum In Marine Biology

Exploration of advanced topics in marine biology with an emphasis on hands-on research experiences in the classroom, laboratory, or field. The lab for this course is BIOL 490.

Credit Hours: 1

Corequisite Courses: BIOL 490
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.
Major Restriction Marine Biology**Minor Restriction** Marine Biology

BIO 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. No more than 6 credits total may be applied to the major. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and

consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

BIO 498 - Internship in Biological Sciences

Practical field experience and training through a program of work and study within a business or agency. Students are supervised and evaluated jointly by a biology faculty member and an on-site supervisor. (Only three semester hours may count toward biology degree requirement.)

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Junior or senior standing and major, minimum overall average of 2.00 and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 499 - Honors Work in Biology

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics,

gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Total: 75 hours

Mathematics, B.A.

The B.A. degree options are designed with the goals of a broad liberal education in mind. Licensed secondary school teachers with a B.A. in mathematics are in high demand, as are qualified applicants for graduate schools in mathematics. Additionally, a B.A. degree in mathematics is regarded as excellent preparation for entrance to professional schools of law, medicine or business.

Requirements for the Major in Mathematics:

The requirements for both the B.A. and B.S. degrees in Mathematics consist of some common core courses and fulfillment of the requirements of one of several options.

It is strongly recommended that each student majoring in mathematics either complete a minor in a discipline that applies mathematics or elect advanced coursework involving mathematical applications in other disciplines such as biology, chemistry, computer science, geography and geology, economics, information systems and operations management, physics, psychology, sociology and statistics.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Mathematics, a student must successfully complete MAT 161 - MAT 162, MAT 261, and MAT 335.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Mathematics a student must successfully complete MAT 346, MAT 471, MAT 495, or any other approved oral intensive course (see list here).

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Mathematics a student must successfully complete one or more of the following: MAT 495, MAT 498, MAT 499 or SEC 404.

Requirements for a Major in Mathematics for the B.A. Degree:

Core Requirements:

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and

Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

MAT 311 - Intermediate Analysis

Thorough treatment of the topology of the real line, functions and limits, convergence, continuity, differentiation and integration of functions of a real

variable. Infinite series, uniform convergence.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 275
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 336 - Abstract Algebra I

Basic study of algebraic structures, focusing on groups and rings. Examples may include permutation, matrix, and symmetry groups, polynomial rings, and integral domains.

Credit Hours: 3

Prerequisite Courses: MAT 275 and MAT 335
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and

variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

Total: 30 hours

Options:

In addition, each student must fulfill the requirements of one of the following options:

Option 1. Mathematics:

This option is designed to provide the greatest flexibility to allow a student to achieve personal educational goals or to combine a mathematics major with a minor. In addition to the core requirements, the student must complete either MAT 495 or three hours of MAT 499 and 12 additional hours in the Department of Mathematics and Statistics at the 300-400 level, at least 6 of which must be in mathematics. Recommended areas related to mathematics: biology, chemistry, computer science, economics, geography

and geology, information systems and operations management, physics, psychology, sociology, statistics. PHY 201 is highly recommended as the university studies physical science requirement.

Total: 45 hours

Additional Information:

An overall average of "C" (2.00) or better, with no grade lower than a "C-" is required for all 300-400-level mathematics or statistics courses counted toward the major.

Mathematics, B.S.

The B.S. degree options are designed to provide flexibility and adequate preparation for graduate school, while emphasizing mathematical reasoning, modeling, and problem solving, all within the context of preparing the student for a career in mathematics, business, industry, government, or academia. Recommended courses in areas related to mathematics provide the requisite experience and practice in mathematical applications. PHY 201 is highly recommended as the university studies physical science requirement.

Requirements for the Major in Mathematics

The requirements for both the B.A. and B.S. degrees in Mathematics consist of some common core courses and fulfillment of the requirements of one of several options.

It is strongly recommended that each student majoring in mathematics either complete a minor in a discipline that applies mathematics or elect advanced coursework involving mathematical applications in other disciplines such as biology, chemistry, computer science, geography and geology, economics, information systems and operations management, physics, psychology, sociology and statistics.

Computer Requirement

To satisfy the computer requirement for the B.S. degree in Mathematics, a student must successfully complete MAT 161-MAT 162, MAT 261, MAT 335, and MAT 361.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Mathematics a student must successfully complete MAT 495 or MAT 499.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Mathematics a student must successfully complete one or more of the following: MAT 495 or MAT 499.

Requirements for a Major in Mathematics for the B.S. Degree

Core Courses (27 Credit Hours)

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial

derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 495 - Seminar in Mathematics

Reading, discussion, investigation, and preparation and presentation of reports on selected mathematical topics, under faculty supervision beyond the students' courses of study.

Credit Hours: 3

Additional Restrictions/Requirements: 9 semester hours of mathematics courses at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

or three hours of:

MAT 499 - Honors Work in Mathematics

Individual study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

Option 1. General Mathematics (27 Credit Hours)

This option provides a broad, traditional perspective of mathematics and its scientific application in addition to depth of study in several areas of mathematics. Students also see the application and modeling of mathematics to a variety of fields. Career opportunities in business, industry, government and academia involve applications in the natural sciences and

engineering, economics, and actuarial science. In addition to the core requirements, the student must complete

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.
Course Repeatability: Course may not be repeated.

MAT 311 - Intermediate Analysis

Thorough treatment of the topology of the real line, functions and limits, convergence, continuity, differentiation and integration of functions of a real variable. Infinite series, uniform convergence.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 275
Course Repeatability: Course may not be repeated.

MAT 336 - Abstract Algebra I

Basic study of algebraic structures, focusing on groups and rings. Examples may include permutation, matrix, and symmetry groups, polynomial rings, and integral domains.

Credit Hours: 3

Prerequisite Courses: MAT 275 and MAT 335
Course Repeatability: Course may not be repeated.

Elective Course Requirements (18 Credit Hours)

18 additional hours in the Department of Mathematics and Statistics at the 300-400 level in which

- at least 9 of are at the 400 level, and
- at least 12 hours are in mathematics.

Option 2. Data Science (30 Credit Hours)

Mathematics is the foundation for Data Science, Machine Learning, Artificial Intelligence and related areas leading to a demand for students, especially those in Mathematics, Statistics, Computer Science or Engineering related majors, to learn in-depth mathematical theories behind many machine learning algorithms. This option provides the tools needed to prepare students for opportunities in business, industry, government and academia which employ data science. [Students selecting this option are not eligible to declare a Data Science minor.]

DSC 301 - Introduction to Machine Learning

Introduction to machine learning, including necessary linear algebra topics, such as vectors, matrices, eigenvalues, eigenvectors, symmetric matrices and singular value decompositions. Considers gradient descent methods to optimize predictive and classification models, dimension reduction, clustering, cross validation, grid search, data visualization and dashboards.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

DSC 302 - Foundations of Data Science

Foundational topics in the field of Data Science Topics to include data cleaning, Structured Query Language (SQL), data manipulation, visualizations, elementary classification, and machine learning.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

STT 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN

280
Course Repeatability: Course may not be repeated.

OR

STT 305 - Statistical Programming

Introduction to statistical programming in SAS with emphasis on data step programming; applications to data management and report generation, simulation, graphical and numerical analysis of univariate and multivariate data. Comparison of current statistical software.

Credit Hours: 3

Prerequisite Courses: STT 215
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 412 - Applied Regression and Correlation

Review of elementary statistics; linear and multiple regression; correlation. Statistical software packages used as appropriate in problem solving.

Credit Hours: 3

Prerequisite Courses: MAT 335
Additional Restrictions/Requirements: Any elementary statistics course.
Course Repeatability: Course may not be repeated.

MAT 430 - Mathematical Theory of Data Science

Mathematical formulation and derivation of established machine learning and data analysis methods, as well as applications. Topics include singular value decomposition, dimension reduction such as low-rank approximation, k-means, support vector machine, clustering and kernel methods, nonnegative matrix factorization and topic models, neural network and image classification.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 335
Course Repeatability: Course may not be repeated.

MAT 476 - Optimization

Examination of the mathematics underlying optimization problems, emphasizing the

underlying geometric, algebraic and analytical ideas. Topics covered may include: convex analysis, least-squares, linear programming, semidefinite programming, optimality conditions, duality theory, numerical methods including gradient descent and Lagrange multipliers.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 335
Course Repeatability: Course may not be repeated.

Elective Course Requirements (12 Credit Hours)

12 additional hours in the Department of Mathematics and Statistics at the 300-400 level.

Total Credit Hours: 54-57

Additional Information

An overall average of "C" (2.00) or better with no grade lower than a "C-" is required for all 300-400-level mathematics or statistics courses counted toward the major.

Middle Grades Education, B.A.

The goal of the Middle Grades Education program at UNCW is to assist in providing an appropriate education for early adolescents in grades 6-9 through the preparation of teachers who are well educated and professional competent. Students in our program may select two areas of specialization (Language Arts, Mathematics, Science and Social Studies). In addition, they complete as many as 80+ hours of field experience in at least three middle schools before the practicum/internship semester.

Target audience: undergraduate students who would like to earn a North Carolina teaching license in the middle grades (6-9).
Program goals:

1. Teacher Candidates will demonstrate leadership by applying the major constructs (concepts, principles, theories, and standards) related to young adolescent development and developmentally responsive middle schools.
2. Teacher Candidates will establish a respectful educational environment for diverse learners by adapting instruction based on analysis of the individual needs (e.g., learning, social, emotional)

of young adolescents and their community contexts.

3. Teacher candidates will demonstrate content knowledge by applying major content-specific constructs (concepts, principles, theories, language, and standards) during field experiences and internship.
4. Teacher Candidates will facilitate student learning through the learning cycle (planning, instruction, and assessment) by applying a variety of developmentally appropriate strategies and technologies to meet the learning needs of young adolescents.
5. Teacher Candidates will reflect on their practice by analyzing student learning to inform their instruction and professional development.

Degree Requirements for Middle Grades Education:

University Studies:

Students should follow university studies requirements of the University of North Carolina Wilmington as outlined in the Academic Programs and University

Studies section of the catalogue. The major in middle grades education requires 88 hours (46 hours of education courses, 18 hours in an additional teaching field and 24 hours in an academic concentration) as follows:

Professional Core:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL

200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or

corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PSY 221 - Adolescent Psychology

Human psychological development from late childhood through adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Professional Education:

EDN 318 - Middle School Programs and Practices

Overview of the conceptual and historic development of programs for students in grades six through nine. Comparison of varied curricular, instructional, and organizational aspects of the middle school movement. Major emphasis on exploring the educational implications of the developmental characteristics of early adolescent learners. Varied approaches to teaming, classroom management and mainstreaming will be investigated. Work will include observations in a variety of settings.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 320 - Diverse Learners

This course addresses meeting the needs of diverse learners in middle level classrooms (6-9). It is divided into three modules examining different aspects of diversity: differentiating instructionto address students'

learning styles and intelligences; understanding characteristics of and adapting instruction to meet the needs of special learners; and working with English language learners and their cultural contexts. Each module includes sections on assessing learner needs and adapting instruction to meet these needs. Field experiences required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 352 - Developing Reading and Writing Competence in the Middle Grades

Develops understanding of reading and writing processes in the broad context of communication. Presents strategies for fostering and evaluating interest, fluency, and skill in reading and writing, both in developmental literary classes and in middle level, content subjects. Topics include organizational and instructional strategies for the development of reading and writing ability, techniques for motivating and

guiding readers and writers, and strategies for study and comprehension, which support learning in all areas of the middle school curriculum. Field experiences required.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Watson School of Education.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 439 - Field Studies in the Middle Grades (6-9)

Students will learn about and apply ideas about thematic instruction, teamwork, assessment, classroom management, legal and ethical issues, and parent/family/community involvement in middle level education. This course provides opportunities to extend understandings of the middle grades teacher as a professional in those areas. The course includes

extensive field experiences.

Credit Hours: 3

Corequisite Courses: Corequisite with at least one of the following: EDN 323, EDN 335, EDN 338, EDN 355.
Additional Restrictions/Requirements: Open only to Middle Grades Education majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Two content methods courses from:

EDN 323 - Teaching Mathematics in the Middle Grades (6-9)

This course examines the curriculum, materials, and methods appropriate for the teaching of mathematics at middle grade levels. There is an emphasis on problem-based instruction including the selection and implementation of high-level mathematics tasks and the teacher's facilitation of problem-solving, collaboration and discussion. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and 6 hours of mathematics.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 335 - Social Studies Education in the Middle Grades

This course examines the curriculum, materials, and methods appropriate for teaching social studies at middle grade levels. There is an emphasis inquiry-based instruction including social inquiry in the real world, analysis of sources to build arguments, and teaching methods related to historical events and social studies phenomena. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and 6 hours of social studies content.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 338 - The Teaching of Science (6-9)

This course includes a survey of curriculum and methods for teaching science in grades 6-9. There is an emphasis on scientific inquiry, topics that integrate learning across science disciplines, and the social implications of science and technology. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and basic studies science courses.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 355 - Language Arts Methods for the Middle Grades

Informed by current theory and research, this course examines developmentally appropriate curriculum, materials, assessments, and methods for the teaching of language arts at middle grades levels. The application of contemporary media and computer technology for the middle grades is incorporated. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.

Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352 .
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Academic Concentration:

An academic concentration of at least 24 semester hours is required. Academic concentrations may be chosen from one of the following four disciplines: Language Arts, Math, Science or Social Studies.

Language Arts

Students are encouraged to select courses from University Studies to fulfill requirements in both the Academic Concentration and the Additional Teaching Field.

Reading and Literature

Select 6 credit hours from the following:

ENG 211 - British Literature to 1800

A survey of representative British text from the Anglo-Saxon period through the eighteenth century. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 212 - British Literature Since 1800

A survey of representative British texts of the nineteenth and twentieth centuries. This course examines selections from an analytical and historical perspective.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ENG 223 - American Literature to 1870

A survey of representative texts from colonial and early America and of the Romantic era.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 224 - American Literature Since 1870

A survey of representative texts from the eras of American Realism and the twentieth century.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 225 - World Literature to 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. Work from ancient times to approximately 1600.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 226 - World Literature Since 1600

A survey of representative works of world literature (excluding British and American writers), including both Western and non-Western works. 1600 to the present.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a

Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 232 - African American Literature

Introduction to the African American literary tradition through a focus on genre, historical era, or major themes, such as nationalism, religion, or urban culture. Topics/historical periods may vary according to instructor.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 233 - The Bible as Literature

Study of types of Biblical literature, including narratives from the Old and New Testaments, sermons, parables, and poetry. Attention to the Bible as literature in itself

and as a source of symbols and allusions in Western culture.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ENG 290 - Themes in Literature

An interdisciplinary study of a significant theme, such as war and peace, justice, love, youth and age, focusing primarily on literary works but also drawing on sources from other fields, including art, music, and history. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:ENG 103 or ENG 201, or consent of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Select 6 credit hours from the following:

ENG 303 - Reading and Writing Arguments

Instruction in rhetorical principles and their use in both analyzing and constructing persuasive texts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 337 - Victorian Literature

Study of representative texts from the Victorian era, 1830-1900, against the historical and cultural backdrop of urbanization, industrialism, and the rise of the British Empire. May include writers such as Tennyson, the Brownings, Arnold, the pre-Raphaelites, Dickens, Eliot, and Gaskell.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ENG 350 - American Romanticism

Study of the major writers, 1820-1865, whose works fashioned a national literary identity known as the American Renaissance. May include such writers as Emerson, Thoreau, Hawthorne, Poe, Whitman, and Melville.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 356 - Indigenous American Literature

Study of past and present literatures of various Indigenous peoples of the Americas. May include oral

traditions, tales, poetry, fiction, drama, and song, as well as more recent engagements with digital and electronic media.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 362 - Studies in the Novel

An in-depth exploration of the novel as a genre. Works may be from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 381 - Literature for Young Adults

Advanced examination of literature for adolescents. Intended for anyone interested in adolescent literature and adolescent culture as well as for future teachers.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 382 - Ways of Teaching Literature

A survey of written, oral, visual, and dramatic responses to literary texts. Response-based approaches to the study of literature appropriate for middle and secondary teaching.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

Language and Vocabulary

Select 6 hours from the following:

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 321 - Structure of the English Language

Study of the grammatical structure of the English language and the process by which we create and comprehend English sentences. Emphasis on recent syntactic models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 322 - Language and Meaning

Study of factors that shape meaning in verbal and nonverbal communication. Topics may include the language of persuasion, propaganda, and prejudice; language and culture; conversation and logic; and vernacular languages.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 323 - History of the English Language

The development of the English language from Old English to the present; changes in sounds, vocabulary, syntax, meaning, and spelling; formation of American dialects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 324 - Topics in Linguistics

The study of a selected topic in human language. Content varies from semester to semester. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 325 - Studies in Sociolinguistics

ENG 204 or ENG 205 recommended but not required. An examination of the way language varies according to social characteristics such as age, gender, ethnicity, class, individual style, social networks, and language attitudes.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 332 - Shakespeare's Early Plays and Poems

Study of selected plays written before 1600 and selected poems. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 333 - Shakespeare's Later Plays

A study of selected plays written after 1600. Includes tragedies, comedies, and histories.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

Writing, Speaking and Listening

Select 6 credit hours from the following:

ENG 202 - Introduction to Journalism

Introduction to news values, style, and writing. Focus is on writing news leads and news stories under deadline pressure. Also included: note taking, interviewing, and an introduction to feature writing.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 205 - Introduction to Literary and Cultural Studies

An immersive introduction to literary and cultural studies, focusing on a single text. Students will learn how to write literary and cultural criticism, with an emphasis on interpretative methods, practical research skills, and discipline-specific conventions of citation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 302 - Journalism Workshop

Continuation of ENG 202. Focus is on gathering news from various community and campus sources and

writing in news style under deadline pressure. Also included: some attention to feature and editorial writing.

Credit Hours: 3

Prerequisite Courses: ENG 202
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 304 - Writing for Teachers

Introduction to theories of composing, rhetoric, assessment, and literacy pedagogy for prospective teachers. Emphasis on analyzing student texts and engaging in various writing projects appropriate for professional development.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 201 - Introduction to Creative Writing

Introduction to the principles and techniques of creative writing, aimed at developing the creative process. Includes lectures, reading, and writing exercises in poetry, fiction, and creative nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

CRW 207 - Fiction Writing I: Invention and Story Craft

Instruction in writing fiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the fiction of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite:CRW 201, or prerequisite/corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 208 - Poetry Writing I: Image and Pattern

Instruction in writing poetry, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the poetry of relevant professional poets.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 209 - Creative Nonfiction I: Discovery and Story Craft

Instruction in writing creative nonfiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work, the work of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

The English Department will allow ENG 200 as a prerequisite for courses listed with a prerequisite of ENG 201. Candidates may substitute 3 credit hours from a study abroad or an International Studies course.

Math

Required Courses

MAT 112 - Trigonometry

Topics from trigonometry and algebra review. Includes trigonometric functions, identities and equations. (No credit granted after the completion, with a grade of "C-" or better, of a mathematics course numbered 152 or higher.)

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 141 - Concepts of Mathematics: Number, Operations, and Problem Solving

A conceptual examination of mathematics content that is aligned with elementary and middle grades curricula. Topics include the real number system and related operations.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

MAT 142 - Concepts of Mathematics: Geometry, Measurement, and Problem Solving

A conceptual examination of mathematics content that is aligned with elementary and middle grades curricula. Topics include geometry, measurement, probability, and data analysis.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental

functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 243 - Concepts and Applications of Discrete Mathematics

An in-depth investigation of discrete mathematics topics identified as essential to teaching the elementary and middle grades curriculum. Topics include systematic listing and counting, vertex-edge graphs, and iteration and recursion. Students present written and oral arguments to justify conjectures and generalizations.

Credit Hours: 3

Prerequisite Courses: MAT 142 or MAT 161

Additional Restrictions/Requirements: Open only to majors or pre-majors in elementary, middle grades, special, or health and physical education, or consent of instructor.
Course Repeatability: Course may not be repeated.

MAT 346 - Historical Development of Mathematics

Development of mathematics from earliest systems to present century. Personalities involved with the contributions of each. A problem-study approach to give the student some training in research.

Credit Hours: 3

Corequisite Courses: MAT 275
Additional Restrictions/Requirements: Corequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 245 - Euclidean Geometry

A study of properties and relationships of shape, size, and symmetry in two and three dimensions. Topics include parallelism, transformations, congruence, similarity, measurement, and constructions. Students present written and oral arguments to justify conjectures and generalizations.

Credit Hours: 3

Prerequisite Courses: MAT 142 or MAT 161 or consent of instructor.
Additional Restrictions/Requirements: Open only to majors or pre-majors in elementary, middle school, special or health and physical education
Course Repeatability: Course may not be repeated.

MAT 345 - Modern College Geometry

Use of elementary methods in advanced study of the triangle and circle, special emphasis on solving original examples, comparison of Euclidean and non-Euclidean and projective geometries.

Credit Hours: 3

Prerequisite Courses: MAT 275
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

MAT 396 - Mathematical Explorations in Technology

Utilizing technology as an integrated tool to explore and visualize mathematical concepts and solve mathematics problems related to the school curriculum. Topics include functions, equations, geometry, data analysis, and mathematical modeling.

Credit Hours: 3

Corequisite Courses: MAT 275 or permission of instructor.
Additional Restrictions/Requirements: Open only to students with the major B.A. in Mathematics, Option 2 - Teacher Licensure in Mathematics, or B.A. in Middle Grades Education.
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics

Course Repeatability: Course may not be repeated.

* Candidates may substitute 3 credit hours from a study abroad or an International Studies course that has a demonstrated mathematics component.

Science

Required Courses (12 hours)

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105

University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental

results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

Elective Courses* (6-13 hours)

BIO 150 - Humans and Ecology

Introduction to the principles of ecology including concepts of succession, biotic communities, biodiversity, limits on population growth and conservation of natural resources.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 190 - Microbes and Human Society

Introduction to the world of the microorganism, focusing on the diversity, structure and function of microbial life, the spread and control of disease-producing organisms, and the impact of these life forms on human culture, history, and civilization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL

240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EDN 426 - Island Ecology for Educators

Through interaction with resources and experts students will develop readily accessible, web-based materials through engagement in field based exploration of plants and animals of coastal ecosystems and environmental issues. This course focuses on both science content and pedagogical resource development.

Credit Hours: 3

Crosslisting: EVS 426
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls

upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 135 - Prehistoric Life

Introduction to the field of paleontology and the fossil record; the succession of life from its earliest beginnings through the Age of Dinosaurs to modern Man; evolutionary, environmental and ecological analyses of fossil plants and animals based on biologic and geologic principles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and

dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PHY 103 - Great Ideas in Physics

Introduces the nature of science to the nonscientist by emphasizing the concepts underlying four great ideas in physics: the conservation of energy, the second law of thermodynamics, the relativity of time, and the wave-particle duality of nature. Explores the mutual influence of science and the humanities (literature, philosophy, history, and the arts).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PHY 111 - Naked-eye Astronomy and Archaeoastronomy

Detailed knowledge of the motions of the sun, moon, planets, and stars is used to understand ancient skywatching techniques, calendars, celestial lore, sky mythology, cosmological concepts and traditions; the impact of astronomy on the architecture, city planning and cultures of prehistoric societies: ancient European (Stonehenge), Babylonian, Egyptian, Mesoamerican, and Native North American. Occasional night viewings.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PHY 260 - Introduction to Astronomy

Descriptive course in principles, theories, and techniques of astronomy. Occasional night viewings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

* Candidates may substitute 3 credit hours from a study abroad or an International Studies course that has a demonstrated science component.

Social Studies

Required US History Courses (6 hours)

HST 105 - United States to 1865

American history from the pre-colonial period to the beginning of Reconstruction. Examines the impact of the country's cultural diversity through the study of the arts, law, politics, war, religion, technology, immigration, and the emergence of regional economic systems.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 106 - United States from 1865 to Present

The history of the United States since the Civil War. Examines the development of American political, social, and cultural systems, foreign policy, and the emergence of the United States as a world power.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

Global Content (Academic Concentration - select 9 hours, Additional Teaching Field - select 6 hours)

At least 3 hours must be GGY.

ANT 312 - Collapse. The Fall of Complex Civilizations

A sampler of political and systemic collapses over the course of world history, applying theories of collapse to case studies including Easter Island, Mesopotamia, the Maya, and Rome. Evaluation of various theories explaining collapses and their relation to contemporary political trends and imperatives.

Credit Hours: 3 To 6

University Studies: Building Competencies/Writing

Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 101 - Modern World Geography

The theory, techniques, and professional applications of modern geographic science. Examines geography as a broad interdisciplinary science focused on places, spatial patterns, and the intersection between human activities and the natural world. Includes discussion of the historical origins and modern relevance of geographic thought.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 180 - World Regional Geography

Regional survey of historical, physical, economic, and cultural geography of world regions. Fundamental locational geography as the foundation for a clear world

view and an understanding of global interdependence.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 220 - Cartography and Data Visualization

Introduction to fundamental cartographic and geospatial data visualization principles that provide students the ability to describe, generate, and evaluate relevant products (maps, graphs, charts). The course uses examples from physical geography and human landscapes to practice the principles defined in the Essential Body of Knowledge used in geospatial professions.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 435 - Environmental Geography

A systems approach to understanding past, present and future human impacts on the natural environment, including changes and impacts on the hydrosphere, atmosphere, biosphere, geosphere and cryosphere. A team-based learning experience emphasizing socio-environmental synthesis and concept application through a series of case studies discussion.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 535
Course Repeatability: Course may not be repeated.

HST 102 - Europe in the World II

Introduction to modern European history. Examination of Europe's transformations and global interactions through the discussion of significant events, groups, and individuals that contributed to developments such as the French Revolution and the rise of democracy, the Industrial Revolution and the modern economy, world wars and dictatorships.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global

trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 305 - The Ancient Near East

An intensive political and cultural study of ancient Babylonian, Egyptian, and other Near Eastern

civilizations.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 306 - Ancient Greece and Rome

A study of the civilization of ancient Greece and Rome with special emphasis on the Greek classical period and the Pax Romana.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal

systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Civics, Culture, and Economics Electives (Academic Concentration - select 9 hours, Additional Teaching field - select 6 hours)

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 250 - Capitalism and the Global Market

An introduction to the history of capitalism, the current global market society, and the ethics of capitalism.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 358 - The United States Since 1945

Developments in American politics, cultural life, civil rights, and foreign policy from the time of the Truman Administration to the present.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

PAR 205 - American Philosophy

A survey of American philosophical thought from colonial times to the present. Readings from such American thinkers as Jonathan Edwards, the Federalist authors, Thoreau, James, Dewey and Quine.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 111 - Politics and Government in Global Perspective

Survey for non-majors of politics and governmental institutions within and among nation states. Attention will also be given to the role of political theory and ideology in the governance of states.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 202 - Contemporary American Political Issues

Important political issues and their relationship to the overall American political process. Topics are selected from, but not limited to: education policy; health care policy; federal deficit and debt policy; and minorities and politics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals, role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 230 - Introduction to Comparative Government and Politics

Comparative analysis of political systems in developed, second- and third-world nations, including an examination of the foundations and structures of selected national governments, such as parliamentary and presidential systems, democratic and non-democratic systems.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

*Candidates may substitute 3 credit hours from a study abroad or an International Studies course that has a demonstrated Social Studies component.

Additional Teaching Field

An additional teaching field of at least 18 credit hours is required. Additional teaching fields may be chosen from one of the following four disciplines: Language Arts, Math, Science or Social Studies. Students are encouraged to select courses from University Studies

to fulfill requirements in both the Academic Concentration and the Additional Teaching Field.

Language Arts - 18 hours

Select 18 hours from the academic concentration. At least 3 credit hours must come from each category: Reading and Literature (1 course from each section), Language and Vocabulary, and Writing, Speaking and Listening.

Mathematics - 18 hours

Select from courses listed in the academic concentration. 9 hours should be at the 200-300 level.

Science - 18 hours

Complete required courses (BIO 105, CHM 101, CHML 101 and CHM 102, CHML 102) and select 6 hours from the elective courses listed in the academic concentration.

Social Studies - 18 hours

Select from: 6 hours of U.S. History, 6 hours of Global content, and 6 hours of Civics, Culture, and Economics electives.

Professional Semester:

EDN 411 - Student Teaching (K-6; 6-9)

A full-time practicum experience within the area of specialization. Students will engage in a variety of supervised instructional activities, assuming an increasing amount of responsibility for all phases of classroom instruction. Practicum are offered in the areas of elementary education (K-6), middle grades education (6-9), and special education.

Credit Hours: 12

Corequisite Courses: For elementary education majors, EDN 413 and EDN 419 .
Additional Restrictions/Requirements: All courses in the professional core and specialty areas appropriate for the concentration for K-6, 6-9 majors and a 2.70 GPA on all work attempted at UNCW.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester (Non-Licensure option)

Requires program approval

EDN 467 - Non-Licensure Practicum

Must receive program approval to enroll. A supervised practicum experience working with children and/or their families in a school or community setting. Designed for students who are completing a degree in education without earning licensure, this practicum promotes integration of the knowledge, skills, and dispositions required to be an effective educator. The practicum placement is selected to be consistent with the student's career goals. Placement and field hours must be approved by the instructor. This course does not fulfill the requirements for North Carolina teacher licensure.

Credit Hours: 6 to 12

Additional Restrictions/Requirements: Admission to

Watson College of Education and consent of instructor. Must receive full program approval to enroll. Not guaranteed. Does not result in licensure (licensure test requirement waived for elementary majors).

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point

average of 2.70 is required for the practicum semester.

Music Education, B.M.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. in Music and the B.M. in Music Education a student must successfully complete MUS 285 or MUS 496.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Music and the B.M. in Music Education a student must successfully complete MUS 110.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Music and the B.M. degree in Music Education a student must successfully complete either EDN 409 or MUS 493 or MUS 496.

Core Requirements Common to all Music Curricula (22 credit hours):

MUS 110 - Introduction to Music Technology

Overview of music technology for the music major. Introduction to Digital Audio Workstation environments, basic MIDI sequencing, and traditional notation software.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

MUS 112 - Theory II

A study of tonality, triads in inversion, phrase structure and cadences, harmonic progression, the technique of harmonization, and non-harmonic tones. The lab for this course is MUSL 112.

Credit Hours: 2

Corequisite Courses: ["MUSL 112"]
Prerequisite Courses: MUS 111 with a minimum

grade of C-
Course Repeatability: Course may not be repeated.

MUSL 112 - Aural Skills and Sight-Singing II

Includes melodic, harmonic, and rhythmic dictation, and sight-singing using the materials introduced in MUS 112. This course is the lab for MUS 112.

Credit Hours: 1

Corequisite Courses: ["MUS 112"]
Prerequisite Courses: MUSL 111
Course Repeatability: Course may not be repeated.

MUS 150 - Introduction to Music Listening

Guided listening to representative works from Western classical, jazz, popular, and global music traditions. Development of ability to describe elements of compositions and style using basic musical vocabulary. Concert attendance required in addition to the regular class meeting time.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 211 - Theory III

A study of the musical process as observed in the literature of the common practice period. Based upon both structural and functional analyses as well as problem solving and controlled composition exercises. Includes secondary dominants, chromatic approach to chords and the concept of modulation. The lab for this course is MUSL 211.

Credit Hours: 2

Corequisite Courses: ["MUSL 211"]
Prerequisite Courses: MUS 112
Course Repeatability: Course may not be repeated.

MUSL 211 - Aural Skills and Sight-Singing III

Includes melodic, harmonic, and rhythm dictation, and sight-singing using the materials introduced in MUS 211. This course is the lab for MUS 211.

Credit Hours: 1

Corequisite Courses: ["MUS 211"]
Prerequisite Courses: MUSL 112
Course Repeatability: Course may not be repeated.

MUS 285 - Conducting I

Conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Additional Restrictions/Requirements: Prerequisite courses and passing the appropriate piano proficiency examination.
Course Repeatability: Course may not be repeated.

MUS 300 - Theory IV

A survey of post-tonal music and techniques of the 20th and 21st centuries.

The lab for this course is MUSL 300.

Credit Hours: 2

Corequisite Courses: ["MUSL 300"]
Prerequisite Courses: MUS 211
Course Repeatability: Course may not be repeated.

MUSL 300 - Aural Skills and Sight-Singing IV

Dictation and transcription problems, sight-singing of choral and instrumental works. This course is the lab for MUS 300.

Credit Hours: 1

Corequisite Courses: ["MUS 300"]
Prerequisite Courses: MUSL 211
Course Repeatability: Course may not be repeated.

MUS 351 - Introduction to Music History I: Middle ages - Classical Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Middle Ages, Renaissance,

Baroque and Classical periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MUS 352 - Introduction to Music History II: Romantic-Contemporary Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Romantic and Contemporary periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Core Music Ensemble:

Music Education majors are required to be in at least one large music ensemble appropriate to the student's concentration (MUS 180, MUS 183, MUS 184, MUS 185, MUS 186, MUS 187) during each semester they are in residence, excepting the student teaching semester (7 hours). Keyboard and guitar students may substitute up to 4 hours from MUS 130, MUS 182. Only one large ensemble per semester may be credited toward the degree.

In addition, no credit toward music major requirements will be granted for MUS 105, MUS 106 and/or MUS 115.

Bachelor of Music in Music Education: 82-85 hours

1. Music Core Requirements: 28 hours (see above).
2. Performance Core: 8 hours.

3. Concentration: 18-21 hours in music.
4. Watson College of Education: 19 hours.
5. FNA 101 and PSY 105 as University Studies electives.
6. MUS 284 Foundations of Music Education

Performance Core: 7 hours

- 7 hours (7 semesters) of applied music in the major applied instrument (MUS 196, MUS 396) with not less than 3 hours (3 semesters) at the 300 level.

Additional Information:

All music majors must pass the piano proficiency examination and the listening repertory examinations, as described in the latest edition of the *Department of Music Student Handbook.* All students are expected to make regular progress toward completion of those requirements. Students are required to enroll in, and successfully complete MUS 242 (1 credit hour) in order to pass the piano proficiency (piano majors may substitute a secondary applied in lieu of MUS 242.)

Concentrations:

Wind and percussion majors: 19 hours

MUS 244 - Instrumental Techniques I

Basic playing technique on woodwind, brass, and percussion instruments.

Credit Hours: 1

Additional Restrictions/Requirements: Two semesters of applied music study.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 245 - Instrumental Techniques II

Basic playing technique on woodwind, brass, and percussion instruments.

Credit Hours: 1

Additional Restrictions/Requirements: Two semesters of applied music study.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 320 - Pedagogy for Beginning Band Instruments

Principles for teaching woodwind, brass, and percussion instruments to beginners. Field experience required.

Credit Hours: 2

Prerequisite Courses: MUS 244 and MUS 245
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 325 - Jazz Ensemble Techniques

Basic rehearsal techniques and methods for developing and directing a high school jazz ensemble. Lecture format and practical conducting experience with one of the university's jazz ensembles.

Credit Hours: 1

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 326 - General Music Methods

Methodology for teaching music in the classroom; lesson planning; computer applications; music textbooks and materials for K-12. The lab for this course is MUSL 326.

Credit Hours: 3

Corequisite Courses: MUSL 326.
Prerequisite Courses: MUS 284
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 326 - Field Experience in General Music

Lab course designed to provide supervised field experiences in general music with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 326.

Credit Hours: 1

Corequisite Courses: ["MUS 326"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 331 - Measurement and Evaluation in Music Education

Development of learning outcomes. Measurements of musical behaviors, test construction, interpretation of data and results.

Credit Hours: 1

Prerequisite Courses: MUS 326 and (MUS 373 or MUS 377)
Course Repeatability: Course may not be repeated.

MUS 373 - Instrumental Methods

Methodology for teaching instrumentalists in an ensemble setting from upper elementary through high school level. Rehearsal planning and procedure, materials, computer applications, and basic marching band techniques. The lab for this course is MUSL 373.

Credit Hours: 3

Corequisite Courses: MUSL 373.
Prerequisite Courses: MUS 284.
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.

Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 373 - Field Experience in Instrumental Music

Supervised instrumental music field experiences with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 373.

Credit Hours: 1

Corequisite Courses: ["MUS 373"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 185 - Symphonic Band

The Symphonic Band is an outstanding ensemble consisting of highly talented woodwind, brass and percussion players, including both music majors and non-music majors. Enrollment is open to all UNCW students with previous instrumental experience and the necessary skills to perform on a wind or percussion instrument. Three rehearsal hours per week and typically two concerts each semester. May be repeated for credit.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

String majors: 19 hours

MUS 243 - String Class

Basic technique on violin, viola, cello, and string bass.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 244 - Instrumental Techniques I

Basic playing technique on woodwind, brass, and percussion instruments.

Credit Hours: 1

Additional Restrictions/Requirements: Two semesters of applied music study.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 245 - Instrumental Techniques II

Basic playing technique on woodwind, brass, and percussion instruments.

Credit Hours: 1

Additional Restrictions/Requirements: Two semesters of applied music study.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 320 - Pedagogy for Beginning Band Instruments

Principles for teaching woodwind, brass, and percussion instruments to beginners. Field experience required.

Credit Hours: 2

Prerequisite Courses: MUS 244 and MUS 245
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 326 - General Music Methods

Methodology for teaching music in the classroom; lesson planning; computer applications; music textbooks and materials for K-12. The lab for this course is MUSL 326.

Credit Hours: 3

Corequisite Courses: MUSL 326.

Prerequisite Courses: MUS 284
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 326 - Field Experience in General Music

Lab course designed to provide supervised field experiences in general music with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 326.

Credit Hours: 1

Corequisite Courses: ["MUS 326"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 331 - Measurement and Evaluation in Music Education

Development of learning outcomes. Measurements of musical behaviors, test construction, interpretation of data and results.

Credit Hours: 1

Prerequisite Courses: MUS 326 and (MUS 373 or MUS 377)
Course Repeatability: Course may not be repeated.

MUS 373 - Instrumental Methods

Methodology for teaching instrumentalists in an ensemble setting from upper elementary through high school level. Rehearsal planning and procedure, materials, computer applications, and basic marching band techniques. The lab for this course is MUSL 373.

Credit Hours: 3

Corequisite Courses: MUSL 373.
Prerequisite Courses: MUS 284.
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 373 - Field Experience in Instrumental Music

Supervised instrumental music field experiences with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 373.

Credit Hours: 1

Corequisite Courses: ["MUS 373"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 187 - Orchestra

Study and performance of the orchestral literature; meets a minimum of two hours per week and gives two or three performances per semester. Section 001 is the Wilmington Symphony Orchestra, membership by audition only; Section 002 is the UNCW String Ensemble, open to UNCW students without audition. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Vocal majors: 21 hours

MUS 272 - Italian and German Diction for Singers

Italian and German phonetics, principles of lyric diction and sound production, and the international phonetic alphabet as it applies to Italian and German. General principles applicable to diverse periods, styles, and genres of "classical" vocal music set with Italian or German texts.

Credit Hours: 2

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

MUS 273 - French and English Diction for Singers

French and English phonetics, principles of lyric diction and sound production, and the international phonetic alphabet as it applies to French and English. General principles applicable to diverse periods, styles, and genres of "classical" vocal music set with French or English texts.

Credit Hours: 2

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 326 - General Music Methods

Methodology for teaching music in the classroom; lesson planning; computer applications; music textbooks and materials for K-12. The lab for this course is MUSL 326.

Credit Hours: 3

Corequisite Courses: MUSL 326.
Prerequisite Courses: MUS 284
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 326 - Field Experience in General Music

Lab course designed to provide supervised field experiences in general music with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 326.

Credit Hours: 1

Corequisite Courses: ["MUS 326"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 331 - Measurement and Evaluation in Music Education

Development of learning outcomes. Measurements of musical behaviors, test construction, interpretation of data and results.

Credit Hours: 1

Prerequisite Courses: MUS 326 and (MUS 373 or MUS 377)
Course Repeatability: Course may not be repeated.

MUS 370 - Pedagogy and Literature I

Materials, methods, literature, and skills for teaching the beginning through early intermediate-level private student, particularly in the individual studio setting. Business aspects of setting up a teaching studio. Faculty supervision of required practical field experience.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 377 - Choral Methods

Goals, objectives, methodology, and assessment procedures for teaching choral music. Topics may include repertoire and programming, learning theory applied to choral rehearsal, group vocal training techniques, rehearsal procedures, and program management strategies. The lab for this course is MUSL 377.

Credit Hours: 3

Corequisite Courses: MUSL 377.
Prerequisite Courses: MUS 284.
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 377 - Field Experience in Choral Music

Supervised choral music field experiences with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 377.

Credit Hours: 1

Corequisite Courses: ["MUS 377"]
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fee Schedule

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 186 - University Chorale

Singers study and perform repertoire of various historical periods and styles appropriate for large chorus. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Auditions and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

Piano and Guitar majors: 18-19 hours

MUS 272 - Italian and German Diction for Singers

Italian and German phonetics, principles of lyric diction and sound production, and the international phonetic alphabet as it applies to Italian and German. General principles applicable to diverse periods, styles, and genres of "classical" vocal music set with Italian or German texts.

Credit Hours: 2

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

MUS 273 - French and English Diction for Singers

French and English phonetics, principles of lyric diction and sound production, and the international phonetic alphabet as it applies to French and English. General principles applicable to diverse periods, styles, and genres of "classical" vocal music set with French or English texts.

Credit Hours: 2

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 326 - General Music Methods

Methodology for teaching music in the classroom; lesson planning; computer applications; music textbooks and materials for K-12. The lab for this course is MUSL 326.

Credit Hours: 3

Corequisite Courses: MUSL 326.
Prerequisite Courses: MUS 284
Additional Restrictions/Requirements: Admission to the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 326 - Field Experience in General Music

Lab course designed to provide supervised field experiences in general music with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 326.

Credit Hours: 1

Corequisite Courses: ["MUS 326"]
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

MUS 331 - Measurement and Evaluation in Music Education

Development of learning outcomes. Measurements of musical behaviors, test construction, interpretation of data and results.

Credit Hours: 1

Prerequisite Courses: MUS 326 and (MUS 373 or MUS 377)
Course Repeatability: Course may not be repeated.

MUS 377 - Choral Methods

Goals, objectives, methodology, and assessment procedures for teaching choral music. Topics may include repertoire and programming, learning theory applied to choral rehearsal, group vocal training techniques, rehearsal procedures, and program management strategies. The lab for this course is MUSL 377.

Credit Hours: 3

Corequisite Courses: MUSL 377.
Prerequisite Courses: MUS 284.
Additional Restrictions/Requirements: Admission to

the Watson College of Education or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Bachelor of Music Education

MUSL 377 - Field Experience in Choral Music

Supervised choral music field experiences with public school students. Observation and reflection; application of pedagogy. This course is the lab for MUS 377.

Credit Hours: 1

Corequisite Courses: ["MUS 377"]
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fee Schedule

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of

faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 146 - Class Voice I

Intended for beginning singers and non-majors. Singing techniques learned through vocal exercises and study of song literature.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Repeat Limit: 2

MUS 186 - University Chorale

Singers study and perform repertoire of various historical periods and styles appropriate for large chorus. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Auditions and consent of director.
University Studies: Approaches and

Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

Watson College of Education requirements: 19 hours

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule and

EDN 409 - Student Teaching

Physical education and music education majors do not need to take corequisite course. Students will be assigned full-time to practicum sites within their areas of specializations. During the course, students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practical are offered in the following areas of specialization: biology, chemistry, English, French, geology, history, mathematics, music, physical education (and health), physics, social studies, and Spanish.

Credit Hours: 12

Corequisite Courses: EDN 408

Additional Restrictions/Requirements: Corequisite course, and as specified for EDN 408.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Music, B.A.

Designed for the 21st-century musician, the Bachelor of Arts offers innovative areas of study in classical performance, jazz, music technology and entrepreneurship, and general music. The Bachelor of Arts degree is a foundation for a wide range of career options, including performance, private studio teacher, composition, music technology and recording, concert management and promotion, or graduate study in music and/or other academic areas.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Music and the B.M. in Music Education a student must successfully complete MUS 110.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. in Music and the B.M. in Music Education a student must successfully complete MUS 285 or MUS 496.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Music, a student must successfully complete one of the following: MUS 493 or MUS 496 or MUS 498 or MUS 499.

Choose one of the following: **Credits / Units:** 1–3

MUS 493 - Senior Recital

A performance of at least 40 minutes of repertoire selected from the appropriate levels of difficultly.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of the music faculty.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 496 - Senior Seminar in Music

Synthesis and application to a specific topic in the student's principal area of interest, chosen, in consultation with the instructor, from previous musical study or from areas beyond what is offered in regular course offerings. Students meet together one hour per week to discuss their work; in addition, each student meets individually with a specialist who supervises project. May be repeated under a different subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 6

MUS 498 - MUS 498 - Internship in Music - Hoke

Academic training and practical field experience through a program of work and study within an agency and/or setting related to the student's principal area of interest. Faculty supervision and evaluation of all study

and on-site activity. A maximum of six credit hours may be applied toward the degree.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of Music department chair and instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

MUS 499 - Honors Work in Music

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing, eligibility for honors program, and consent of Music department chair and instructor.
University Studies: Explorations Beyond the

Classroom, Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Core Requirements Common to all Music Curricula (30 credit hours):

FNA 101 - Cultures of the World Through Music and Dance

Examination of a variety of musical styles and dance forms from around the world, with attention to cultural issues and practices. Includes participation in dance and musical experiences.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

MUS 110 - Introduction to Music Technology

Overview of music technology for the music major. Introduction to Digital Audio Workstation environments, basic MIDI sequencing, and traditional notation software.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

MUS 112 - Theory II

A study of tonality, triads in inversion, phrase structure and cadences, harmonic progression, the technique of harmonization, and non-harmonic tones. The lab for this course is MUSL 112.

Credit Hours: 2

Corequisite Courses: ["MUSL 112"]
Prerequisite Courses: MUS 111 with a minimum grade of C-
Course Repeatability: Course may not be repeated.

MUSL 112 - Aural Skills and Sight-Singing II

Includes melodic, harmonic, and rhythmic dictation, and sight-singing using the materials introduced in MUS 112. This course is the lab for MUS 112.

Credit Hours: 1

Corequisite Courses: ["MUS 112"]
Prerequisite Courses: MUSL 111
Course Repeatability: Course may not be repeated.

MUS 150 - Introduction to Music Listening

Guided listening to representative works from Western classical, jazz, popular, and global music traditions. Development of ability to describe elements of compositions and style using basic musical vocabulary. Concert attendance required in addition to the regular class meeting time.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 196 - Lower Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hours each week. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of music department chair and instructor. This course is intended for music majors only.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 211 - Theory III

A study of the musical process as observed in the literature of the common practice period. Based upon both structural and functional analyses as well as problem solving and controlled composition exercises. Includes secondary dominants, chromatic approach to chords and the concept of modulation. The lab for this course is MUSL 211.

Credit Hours: 2

Corequisite Courses: ["MUSL 211"]
Prerequisite Courses: MUS 112
Course Repeatability: Course may not be repeated.

MUSL 211 - Aural Skills and Sight-Singing III

Includes melodic, harmonic, and rhythm dictation, and sight-singing using the materials introduced in MUS 211. This course is the lab for MUS 211.

Credit Hours: 1

Corequisite Courses: ["MUS 211"]
Prerequisite Courses: MUSL 112
Course Repeatability: Course may not be repeated.

MUS 242 - Class Piano IV

Continued piano skills development of MUS 241, with an emphasis on speed, fluency, and accuracy. Piano proficiency exam is the final exam in this course and must be passed in order to pass the course.

Credit Hours: 1

Prerequisite Courses: MUS 241 with a minimum grade of C-
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

MUS 285 - Conducting I

Conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Additional Restrictions/Requirements: Prerequisite courses and passing the appropriate piano proficiency examination.
Course Repeatability: Course may not be repeated.

MUS 300 - Theory IV

A survey of post-tonal music and techniques of the 20th and 21st centuries.
The lab for this course is MUSL 300.

Credit Hours: 2

Corequisite Courses: ["MUSL 300"]
Prerequisite Courses: MUS 211
Course Repeatability: Course may not be repeated.

MUSL 300 - Aural Skills and Sight-Singing IV

Dictation and transcription problems, sight-singing of choral and instrumental works. This course is the lab for MUS 300.

Credit Hours: 1

Corequisite Courses: ["MUS 300"]
Prerequisite Courses: MUSL 211
Course Repeatability: Course may not be repeated.

MUS 351 - Introduction to Music History I: Middle ages - Classical Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Middle Ages, Renaissance, Baroque and Classical periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MUS 352 - Introduction to Music History II: Romantic-Contemporary Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Romantic and Contemporary periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Ensemble Requirement (8 credit hours):

BA students are required to be in at least one large music ensemble appropriate to the student's option (MUS 180, MUS 183, MUS 184, MUS 185, MUS 186, MUS 187) during each semester they are in residence (8 credit hours). Keyboard, guitar, harp, and music technology students may substitute up to 4 hours from MUS 130, MUS 182. Only one large ensemble per semester may be credited toward the degree.

Additional Information:

BA students are required to complete at least 4 semesters of applied music (MUS 196) in the principal area and demonstrate upper-level proficiency in the applied area by passing an upper-level jury in the fourth semester of MUS 196.

All music majors must pass the piano proficiency examination and the listening repertory examinations, as described in the latest edition of the Department of

Music Student Handbook. All students are expected to make regular progress toward completion of those requirements. Piano majors may substitute a 1 credit of applied lessons in a secondary area in lieu of MUS 242.

* Students are required to enroll in no fewer than 22 hours of electives outside of music.

In addition, no credit toward music major requirements will be granted for MUS 105, MUS 106, and/or MUS 115.

BA Degree Options (19-23 credit hours)

Students may select from the following areas

Performance Option:

Instrumental

MUS 130 - Chamber Music Workshop

Small instrumental and vocal ensembles. Type of group depends on the availability of personnel. Meets one to two hours weekly with instructor for coaching plus individual practice and weekly rehearsal with partner(s). Previous training required. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 396 - Upper Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hour each week. This course is restricted to music majors who have passed the upper level qualifying jury. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of Music Department Chair and instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12

MUS 370 - Pedagogy and Literature I

Materials, methods, literature, and skills for teaching the beginning through early intermediate-level private student, particularly in the individual studio setting. Business aspects of setting up a teaching studio.

Faculty supervision of required practical field experience.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 493 - Senior Recital

A performance of at least 40 minutes of repertoire selected from the appropriate levels of difficultly.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of the music faculty.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

Piano

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 130 - Chamber Music Workshop

Small instrumental and vocal ensembles. Type of group depends on the availability of personnel. Meets one to two hours weekly with instructor for coaching plus individual practice and weekly rehearsal with partner(s). Previous training required. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 396 - Upper Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hour each week. This course is restricted to music majors who have passed the upper level qualifying jury. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of Music Department Chair and instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12

MUS 370 - Pedagogy and Literature I

Materials, methods, literature, and skills for teaching the beginning through early intermediate-level private student, particularly in the individual studio setting. Business aspects of setting up a teaching studio. Faculty supervision of required practical field experience.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 374 - Pedagogy and Literature II

Materials, methods, and skills for teaching the advanced-level private student, particularly in the individual studio setting. A survey of intermediate and advanced literature from the 17th century to the present.

Credit Hours: 3

Prerequisite Courses: MUS 370
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices,

emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 493 - Senior Recital

A performance of at least 40 minutes of repertoire selected from the appropriate levels of difficultly.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of the music faculty.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

Vocal

MUS 286 - Conducting II

More advanced conducting techniques, score-reading skills, issues of interpretation, rehearsal techniques, and associated terminology.

Credit Hours: 2

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 333 - Opera Workshop

The musical preparation and staging of operatic scenes through dramatic interpretation and body movement.

Three rehearsal hours per week. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Four semesters of applied voice or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4

MUS 396 - Upper Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hour each week. This course is restricted to music majors who have passed the upper level qualifying jury. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of Music Department Chair and instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12

MUS 370 - Pedagogy and Literature I

Materials, methods, literature, and skills for teaching the beginning through early intermediate-level private student, particularly in the individual studio setting. Business aspects of setting up a teaching studio. Faculty supervision of required practical field experience.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 374 - Pedagogy and Literature II

Materials, methods, and skills for teaching the advanced-level private student, particularly in the individual studio setting. A survey of intermediate and advanced literature from the 17th century to the present.

Credit Hours: 3

Prerequisite Courses: MUS 370
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and

distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 493 - Senior Recital

A performance of at least 40 minutes of repertoire selected from the appropriate levels of difficultly.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of the music faculty.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

Jazz Studies Option:

MUS 136 - Jazz Theory and Keyboard

Theoretical concepts, aural skill, and basic keyboard skills associated with jazz styles.

Credit Hours: 2

Prerequisite Courses: MUS 111 and MUSL 111
Course Repeatability: Course may not be repeated.

MUS 189 - Jazz Combo

By audition only. Small group rehearsal and performance of jazz standards, original jazz compositions and arrangements.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 308 - Jazz Arranging

Arranging and scoring the jazz combo, with emphasis on contemporary styles. Presentation in both lecture and performance format.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUS 315
Course Repeatability: Course may not be repeated.

MUS 315 - Jazz Improvisation I

Development of materials and practice for basic improvisational skills in the jazz idiom. Performance-oriented course exploring a variety of methods to gain a better understanding of the art of improvisation.

Credit Hours: 2

Prerequisite Courses: MUS 111 and MUS 112
Course Repeatability: Course may not be repeated.
Major Restriction Music, B.A.**Minor Restriction** Jazz Studies Minor

MUS 316 - Jazz Improvisation II

Development of materials and practice for advanced improvisational skills in the jazz idiom. A performance-oriented course that explores a variety of methods to gain a better understanding of the art of improvisation.

Credit Hours: 2

Prerequisite Courses: MUS 315
Course Repeatability: Course may not be repeated.
Major Restriction Music, B.A.**Minor Restriction** Jazz Studies Minor

MUS 325 - Jazz Ensemble Techniques

Basic rehearsal techniques and methods for developing and directing a high school jazz ensemble. Lecture

format and practical conducting experience with one of the university's jazz ensembles.

Credit Hours: 1

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

MUS 393 - Junior Recital

A performance of at least 20 minutes of repertoire selected from the appropriate levels of difficulty.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of faculty.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

MUS 396 - Upper Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hour each week. This course is restricted to music majors who have passed the upper level qualifying jury. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of Music Department Chair and instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12

MUS 493 - Senior Recital

A performance of at least 40 minutes of repertoire selected from the appropriate levels of difficultly.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of the music faculty.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

Music Technology Option:

MUS 210 - Digital Music Production

Applications of music technology software for digital music production in Digital Audio Workstation environments, including non-traditional notation systems, intermediate-level work with MIDI sequencing, DAW signal flow, stereo mixing techniques, software-based virtual instruments, and intermediate sampling techniques.

Credit Hours: 2

Prerequisite Courses: MUS 110.
Course Repeatability: Course may not be repeated.

MUS 214 - Recording Technology I

Introduction to the fundamentals of audio engineering. Technical basics in the "language of audio." Emphasis is on Pro Tools recording software, audio interfaces,

project workflow, the principles behind the five main stages of a recording project, and mastering music. Theoretical and practical application of microphones, mic pre-amps, equalizers, compressors, noise gates, effects, room acoustics, gain structure, and signal path.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MUS 215 - Recording Technology II

An in-depth look at Pro Tools recording software including a review of music recording basics, editing, and automation principles while mixing multi-track projects. Students will learn the art of the "creative ear," and final project will utilize the UNCW recording studio to create and complete a multi-track recording project.

Credit Hours: 3

Prerequisite Courses: MUS 214
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Choose one of the following:

MUS 203 - Composition

A beginning study of compositional techniques though direct application in original compositions. One hour seminar each week plus a half or full hour private lesson. May be repeated.

Credit Hours: 1 To 2

Prerequisite Courses: MUS 112 and MUSL 112
Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

(2 semesters @ 1 credit hours or 1 semester @ 2 credit hours)

MUS 305 - Beat Making

Comprehensive overview of Hip Hop beat making. Fosters each student development as a beat maker, in in EDM, house, dance/club, top 40, drum and bass,

boom bap or any other subgenre of interest. No prerequisite. 2 credits hours.

Credit Hours: 2

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

MUS 306 - Orchestration and Arranging

Techniques of transcribing, arranging, and scoring music for various vocal and instrumental combinations.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUSL 300
Course Repeatability: Course may not be repeated.

MUS 307 - Songwriting

Study of basic songwriting styles and techniques, including methods for developing the skills and knowledge to construct well-crafted lyrics, melodies, and chords. Students develop their musical identity and critical listening skills through analysis, discussion, synthesis, and songwriting activities.

Credit Hours: 2

Prerequisite or Corequisite Courses: MUS 110.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 1

MUS 311 - Live Sound Production

Introduction to the essentials of live sound production. Overview of sound system designs, operation, mixing live events, equipment, software, acoustics, stage management, and safety protocols. Study and application of common techniques used for amplifying and mixing sound sources in various event environments.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career

planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 496 - Senior Seminar in Music

Synthesis and application to a specific topic in the student's principal area of interest, chosen, in consultation with the instructor, from previous musical study or from areas beyond what is offered in regular course offerings. Students meet together one hour per week to discuss their work; in addition, each student meets individually with a specialist who supervises project. May be repeated under a different subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 6

MUS 498 - MUS 498 - Internship in Music - Hoke

Academic training and practical field experience through a program of work and study within an agency and/or setting related to the student's principal area of interest. Faculty supervision and evaluation of all study

and on-site activity. A maximum of six credit hours may be applied toward the degree.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of Music department chair and instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

General Music Option

14 elective MUS credits, at least 3 of which must be 300- or 400-level (may include MUS 396 upper-level applied lessons, MUS 393 Junior Recital and/or MUS 493 Senior Recital).

Choose one of the following:

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

Choose one of the following:

MUS 496 - Senior Seminar in Music

Synthesis and application to a specific topic in the student's principal area of interest, chosen, in consultation with the instructor, from previous musical study or from areas beyond what is offered in regular course offerings. Students meet together one hour per week to discuss their work; in addition, each student meets individually with a specialist who supervises project. May be repeated under a different subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 6

MUS 498 - MUS 498 - Internship in Music - Hoke

Academic training and practical field experience through a program of work and study within an agency and/or setting related to the student's principal area of interest. Faculty supervision and evaluation of all study and on-site activity. A maximum of six credit hours may be applied toward the degree.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of Music department chair and instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

MUS 499 - Honors Work in Music

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing, eligibility for honors program, and consent of Music department chair and instructor.
University Studies: Explorations Beyond the Classroom, Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Bachelor of Arts in Music: 57-61 credit hours

1. Music Core Requirements: 30 credit hours

2. Ensemble Requirement: minimum 8 credit hours

3. Option: 19-23 credit hours

A minimum final grade of "C-" is required in each music course, and a cumulative grade point average of 2.00 or better is required for graduation.

Oceanography, B.S.

The B.S. Oceanography program is designed specifically for students interested in pursuing professional, research or academic careers and/or advanced degrees in the ocean sciences. Because oceanography is a truly integrative and synthetic field

which continues to become more technological and global in its approach, the oceanography degree program requires students to develop basic proficiencies in mathematics, chemistry, physics, and biology, and effective oral and written communication skills. In addition, the program allows students to focus on their specific interests through selection of appropriate elective course work. The program includes an applied learning component which can be fulfilled through appropriate field- or ship-based course work, internships, and/or faculty directed research.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Oceanography a student must complete OCN 395.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Oceanography a student must complete OCN 390.

Requirements for a Major in Oceanography for the B.S. Degree

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for

OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 365 - Written Communication in Oceanography

Development of written scientific communication skills for topics related to the oceanography discipline.

Credit Hours: 2

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

OCN 390 - Field Methods in Oceanography

Applied study of ocean materials and processes in field settings. Introduction to methods and techniques used in geosciences, with emphasis on coastal and marine environments, including field measurement, sample retrieval, and data analysis. Colloquium and required field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: OCN 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Critical Reasoning, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

OCN 395 - Oral Communication in Oceanography

Development of oral presentation skills for topics related to the oceanography discipline.

Credit Hours: 1

Prerequisite or Corequisite Courses: GGY 365 or GLY 365 or OCN 365
Course Repeatability: Course may not be repeated.

OCN 471 - Oceanographic Cruise Techniques

Data collection and sampling techniques on a research vessel. Introduction to equipment methods and techniques used in oceanography including CTD casts, sidescan sonar operation and data analysis, and sediment coring via participation in two half-day cruises led by UNCW oceanography faculty members.

Credit Hours: 1

Prerequisite Courses: OCN 350 or OCN 390
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

GLY 450 - Geological Oceanography

Physiography, petrology, structure, sediments and geologic history of the ocean floor, including estuarine and coastal environments.

Credit Hours: 4

Prerequisite Courses: GLY 201 or GLY 205 or OCN

350
Course Repeatability: Course may not be repeated.

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 152 - Basic Calculus with Applications II

Intended for majors that emphasize techniques and applications. The second course in a two-course sequence. Topics to include further techniques and applications of integration and multivariable calculus including trigonometric functions, differential equations,

probability, and sequences & series.

Credit Hours: 3

Prerequisite Courses: MAT 151 and (MAT 112 or MAT 160).
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

or

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.

University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

In addition, students must take two of the following

BIO 205 - Biology of the Sea

Introduction to the organisms that live in marine environments and the role of humans in the use of marine resources. Explores the biological, physical, chemical, and geological characteristics of various

marine habitats.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

BIO 362 - Marine Ecology

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. The lab for this course is BIOL 362.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CHM 475 - Chemical Oceanography

Introduction to chemical oceanography, including discussion of sources, distribution, forms of occurrence

of chemical species in seawater; chemistry of salty solutions; air-sea interactions; marine carbonate system; organic compounds and trace elements in seawater; estuarine chemistry.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CHM 102 and CHML 102. Recommended prerequisite or corequisite: CHM 235 and OCN 150.
Course Repeatability: Course may not be repeated.

or

OCN 475 - Marine Biogeochemistry

A geochemical perspective on the chemistry of the world's oceans with an emphasis on carbon cycling through the marine geosphere and biosphere. Topics include introductions to chemical oceanography, stable isotope geochemistry, paleoceanography, and investigations into the role of the oceans in the global carbon cycle through time.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101; and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: GLY 575.
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

Electives

Students must also complete a minimum of 31 hours of electives. Courses must be selected from at least three

different disciplines; 21 of which must be above the 299 level; at least 9 must be from the OCN, GLY, or GGY prefixes. Students may select any additional OCN course, or any course from the following list:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of

biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 363 - Coral Reef Ecology

Ecology and physiology of coral reef organisms, emphasizing processes that contribute to the function and complexity of coral reef ecosystems. Reef information and geology, coral biology and physiology, ecological interactions, human effects, global effects, and conversation will be considered. The lab for this course is BIOL 363.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 363 - Coral Reef Ecology Laboratory

Methods for studying coral reef taxa, community structure, coral physiology, and ecological processes will be explored. Independent project required.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 363
Prerequisite Courses: BIO 201, BIO 202
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 367 - Antarctic Ecology, Geology, History, and Policy

An in-depth examination of the frozen continent including its geologic origins, ice sheet formation, and fossil record. Its unique ecology, endemic wildlife, discovery and human history, anthropogenic impacts, and current international agreements to protect

resources will also be examined. Open to juniors and seniors from all major departments. Also offered as BIO 585 with additional requirements.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 458 - Fisheries Biology

An examination of the factors that control the population dynamics of fishes. Introduction to the

principles of fisheries science including estimation of population metrics such as age, growth, mortality, and abundance, fish stock assessment, and fishery management strategies. The lab for this course is BIOL 458.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

BIO 460 - Limnology

An examination of the physical, chemical, and biological characteristics of freshwater systems, particularly lakes and ponds. The lab for this course is BIOL 460.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Junior or

senior standing.
Course Repeatability: Course may not be repeated.

BIO 462 - Deep Sea Biology

Study of deep-sea biosphere, with emphasis on the biology of abyssal zones off the North Carolina coast and hydrothermal vent ecosystems. Topics include unique benthic and pelagic animals in deep-sea environments and their physiological adaptations to hydrostatic pressure and low temperature, nutritional dynamics, reproductive strategies, energy flow, and speciation in abyssal and ultra abyssal zones.

Credit Hours: 3

Prerequisite Courses: BIO 362
Course Repeatability: Course may not be repeated.

BIO 489 - Benthic Ecology

The scientific study of the organisms and processes that structure coastal benthic communities. Benthic communities encompass the vast seafloor areas of estuaries and oceans and support aquatic communities, fisheries, larger species of interest, and

critical ecosystem processes.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, BIO 366.
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry; activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and

CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHML 235 - Quantitative Analysis Laboratory

Laboratory techniques in classical and modern chemical analysis, including volumetric analysis, chromatography, and spectrophotometry. Application of statistical methods to laboratory data. Chemical equilibrium. This course is the lab for CHM 235.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 235.
Course Repeatability: Course may not be repeated.

CHM 312 - Advanced Techniques Organic Chemistry

Theory and practice of chromatographic methods of separation and spectroscopic methods of identification.

Credit Hours: 2

Prerequisite Courses: CHM 212 with a minimum

grade of C.
Course Repeatability: Course may not be repeated.

CHM 321 - Physical Chemistry II: Thermodynamics and Kinetics

An overview of topics in physical chemistry stressing fundamental concepts in thermodynamics and kinetics. The lab for this course is CHML 321.

Credit Hours: 3

Prerequisite Courses: CHM 320.
Course Repeatability: Course may not be repeated.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHML 377 - Environmental Chemistry Laboratory

Laboratory analysis of environmental samples, including applications of standard EPA methods. This course is the lab for CHM 377.

Credit Hours: 1

Corequisite Courses: CHM 377
Course Repeatability: Course may not be repeated.

CHM 435 - Instrumental Analysis

Study of modern analytical instrumentation and techniques. Emphasis on spectroscopic, separation, electrochemical, and materials analysis techniques.

Credit Hours: 3

Corequisite Courses: CHML 435.
Prerequisite Courses: CHM 235 and CHML 235 and CHM 312 with grades of "C-" or better, and PHY 102 or PHY 202.
Course Repeatability: Course may not be repeated.

CHML 435 - Instrumental Analysis Lab

Theory and application of modern analytical instrumentation and techniques. Emphasis on atomic spectroscopy, molecular spectroscopy, chromatography, electrochemistry, mass spectrometry, statistical analysis, report writing, and laboratory safety.

Credit Hours: 2

Corequisite Courses: CHM 435.
Prerequisite Courses: CHML 235
Course Repeatability: Course may not be repeated.

CHM 445 - Inorganic Chemistry

Study of periodic relationships; crystal lattice theory; transition metals and ions; crystal field theory; organometallic structures and reactions; and reaction mechanisms. The lab for this course is CHML 445.

Credit Hours: 3

Prerequisite Courses: CHM 320 with a minimum grade of C and CHM 350 with a minimum grade of C
Course Repeatability: Course may not be repeated.

DSC 301 - Introduction to Machine Learning

Introduction to machine learning, including necessary linear algebra topics, such as vectors, matrices, eigenvalues, eigenvectors, symmetric matrices and singular value decompositions. Considers gradient descent methods to optimize predictive and

classification models, dimension reduction, clustering, cross validation, grid search, data visualization and dashboards.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

DSC 302 - Foundations of Data Science

Foundational topics in the field of Data Science Topics to include data cleaning, Structured Query Language (SQL), data manipulation, visualizations, elementary classification, and machine learning.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control

theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

EGN 310 - Fluid Mechanics for Engineers

Fluid mechanics uses knowledge from mathematics, physics, statics, and dynamics to analyze problems involving the fluid medium. Topics include fluid properties, hydrostatic pressure, pressure on surfaces, conservative equations of mass, momentum and energy, pumps and turbines, open channel flows, and pipe flows in relation to real world engineering problems.

Credit Hours: 3

Prerequisite Courses: MAT 361 and EGN 201 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 311 - Coastal Engineering and Fluids Lab

Applied methods in laboratory investigations into coastal engineering and fluid mechanics principles in a sequence of seven experiments: hydrostatic pressure on submerged surface, stability of a floating body, flow from a hole, hydraulic jump, flow measurement, wave measurements in a wave flume, and beach sediment analysis.

Credit Hours: 1

Prerequisite Courses: EGN 330 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 320 - Water Resources Engineering

Introduction to quantitative methods in water resource systems. Topics include hydrology, precipitation, hydrograph analysis, reservoir and steam routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law;dams;

reserviors; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.

Credit Hours: 3

Prerequisite Courses: EGN 310 (C- or better)
Course Repeatability: Course may not be repeated.

EGN 330 - Coastal Wave Mechanics

Examination of the mechanics of water wave motion using linear and non-linear wave theories. Exploration of wave generation, forecasting and measurement. Covers wave propagation and transformation from offshore to the nearshore where waves interact with the bottom causing shoaling, breaking and initiating sediment movement.

Credit Hours: 3

Prerequisite Courses: MAT 361
Course Repeatability: Course may not be repeated.

EGN 340 - Matlab for Engineering Analysis

An introduction to the MATrix LABoratory (MATLAB) software. Topics to be covered include: basic programming; data management and manipulation; curve fitting and interpolation; image processing; advanced 3D plotting and movie generation; and basic applied numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 261.
Course Repeatability: Course may not be repeated.

EGN 401 - Sediment Transport Processes

This course will examine the physical processes of sandy beaches, coastal sediments, surf zone dynamics, beach profile evolution and cross-shore and longshore sediment transport. The class will also cover beach profile response and sediment transport as a result of waves, currents and storms.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 410 - Field Methods in Coastal Engineering

Introduction to the concepts, instrumentation, and field methods used to observe physical processes specific to the highly-dynamic coastal environment, such as wind, waves, currents, tides, and sediment transport. Hands-on experience in operating, deploying, and analyzing data from sensors that measure waves and currents, as well as with advanced surveying techniques for monitoring beach morphology (e.g., LIDAR, RTK GPS, and SONAR).

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 402 - Dredging and Beach Nourishment

This course will examine types of dredges and their operation and the process of dredging for beach nourishment. Students will learn about the elements of beach nourishment design including cross-shore and planform design considerations, borrow areas (upland, offshore and inlets), environmental effects of beach

nourishment and current dredging/beach nourishment costs. Numerical modeling of beach and dune erosion, shoreline change and storm induced impacts will be introduced. Local examples and ongoing beach nourishment projects will be examined.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EGN 420 - Applied Coastal Modeling

Provides the knowledge and tools necessary to apply state of the art numerical models in coastal settings. Specific models vary depending on the instructor's expertise. Examples include ADCIRC, FUNWAVE, DELFT3D, or XBeach.

Credit Hours: 3

Prerequisite Courses: EGN 340 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 430 - Coastal Structures

Examine the functional design of coastal structures distinguishing between groins, jetties, seawalls, breakwaters, revetments and bulkhealds. Hydraulic design and structural stability as a result of breaking and non-breaking wave loading are also covered. In addtion, students examine the materials used and cost implications of coastal structures.

Credit Hours: 3

Prerequisite Courses: EGN 301 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 445 - Environmental Conservation

A scientific exploration of conservation theories and practices to understand the challenges of protecting, maintaining, and restoring biological diversity to Earth's many environs.

Credit Hours: 3

Prerequisite Courses: EVS 195, EVSL 195, BIO 366, BIOL 366.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 452 - Offshore Energy & Resource Management

Introduction to the fundamental concepts behind offshore energy and resource management. Examination of a range of marine resources, including offshore oil and gas; wave, wind and tidal energy; and marine minerals. Discussion of the historical evolution, technological developments, challenges and potential impacts of each offshore resource. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 455 - Geospatial Analysis for Coastal Management

Examination of coastal issues and management using a problem-based GIS approach. Topics include developing a GIS, managing data acquired from different sources, creating new data, describing data, and generating desired outputs. Student projects utilize various GIS programs, extensions and equipment. Additional Course Fees: Student Blanket

Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: GGY 321, or instructor approval.
Course Repeatability: Course may not be repeated.

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

EVS 483 - Fisheries Policy and Management

Overview of fisheries policy and management. Considers important international, national, and regional fisheries, with extended consideration of North Carolina fisheries. Reviews fisheries management agencies, policies, data sources, trends and issues. Examines common biological fishery models, fishing methods and gear, and fishery regulations. Explores methods for assessing the economic impacts of fishing and the recreational value of fishing.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools,

functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GGY 383 - Geography of Islands and Coasts

The study of islands and coasts as unique geographic features. Explores the physical processes of islands and coasts, the environmental history of islands and coasts, and current environmental issues unique to islands and coasts.

Credit Hours: 3

Prerequisite Courses: GGY 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 421 - Spatial Programming

Introduction to GIS programming. The course will focus on how to customize applications and streamline spatial analysis, and is designed to improve students' skills in conducting sophisticated spatial analysis and adapting to new technologies and programming languages. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based environment. Lectures, demonstrations, and lab exercises. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

GGY 428 - Advanced Remote Sensing

Advanced theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, and forestry. Includes satellite data collection, advanced classification methods,

hyperspectral and microwave image analysis, and satellite elevation data construction. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 322
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 528
Course Repeatability: Course may not be repeated.

GGY 429 - Aerial Drone Applications in Geoscience

Introduction to the applications of unmanned aerial systems (UAS, or drones) in the geosciences. The course will cover an introduction to remote sensing and photogrammetry, the basics of UAS regulatory frameworks, and data collection and processing, with at least 40% of the class devoted to data collection in the field.

Credit Hours: 3

Prerequisite Courses: GGY 321 or GGY 322 or consent of instructor
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

GGY 433 - Weather Analysis and Forecasting

Introduction to tools of weather analysis and use of these tools to construct weather forecasts.

Credit Hours: 3

Prerequisite Courses: GGY 230 and GGY 333
Course Repeatability: Course may not be repeated.

GGY 436 - Ice Age Earth

A review of the Quaternary Period, roughly the last two million years of earth history. Topics included the discovery of the ice age, climate change theory, glacial dynamics, geological and biological records of environmental change, and human evolution and migration during the Quaternary.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101 or OCN 150.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GLY 335 - Geomorphology

A systematic treatment of the surface processes that shape fluvial, glacial, aeolian, and coastal landforms. Themes include process mechanics, description and classification of landforms, and evolution of landform systems. Students work individually or in a small groups to analyze geomorphological data in field and laboratory settings.

Credit Hours: 4

Prerequisite Courses: (GGY 130 or GLY 101 or GLY 120) and GLYL 120
Crosslisting: GGY 335
Course Repeatability: Course may not be repeated.

GLY 337 - Invertebrate Paleontology

History of fossil protistans and invertebrates with emphasis on the principles of paleontology, systematics and evolution, and on the use of fossils in stratigraphic correlation. Required field trips. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

GLY 426 - Geohydrology

Geology of groundwater and related aspects of surface waters. Methods of ground water resource evaluation, protection, exploitation, and contaminant remediation.

Credit Hours: 3

Prerequisite Courses: (GLY 101 or GLY 120 or OCN 150 or GGY 130), and (MAT 112 or MAT 160 or MAT 152 or MAT 161)
Additional Restrictions/Requirements: Junior or senior standing in geology, geoscience, geography, oceanography and/or environmental sciences, prerequisite courses, and consent of instructor.
Crosslisting: GLY 526
Course Repeatability: Course may not be repeated.

GLY 431 - Sedimentology and Stratigraphy

Introduction to the observation, description, and interpretation of sediment and sedimentary rock; the physical and chemical processes controlling weathering, sediment transport, deposition, and diagenesis; and the interpretation of depositional environments and layered rock successions. Field trips; fees may be required. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GLY 310 or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GLY 439 - Paleoclimatology

Climatic change throughout geologic time, with an emphasis on Quatenary climate change. Topics include an overview of Earth's climate system, tectonic-scale, orbital-scale, millennial-scale, and future climate change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 539
Course Repeatability: Course may not be repeated.

GLY 443 - Tectonics

Explores ideas on plate tectonic theory including assessment of data that lead to its acceptance. Examines a broad range of tectonic principles and dynamics using modern and ancient examples, and considers controls on geological and geophysical processes from Earth's core to crust. Includes geometry of present and past plate boundaries and motions, development of plates including sea-floor spreading, subduction, and orogeny, evolution of continents and ocean basins, and tectonic driving mechanisms.

Credit Hours: 3

Prerequisite Courses: GLY 201 or GLY 310 or GLY 441
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GLY 543
Course Repeatability: Course may not be repeated.

GLY 454 - Coastal Geomorphology

Provides an in-depth analysis of the coastal landforms that line the world's coasts. Understanding how these land forms are created, evolve and erode is necessary to understanding the spatiotemporal evolution of the coastal zone.

Credit Hours: 3

Prerequisite Courses: OCN 150 or OCN 250 or GLY 101 or GLY 120 or GLY 125 or GGY 130 or EVS 195
Course Repeatability: Course may not be repeated.

GLY 465 - Introduction to Geophysics

Integrated application of geophysical methods to solve environmental and geologic problems. Includes discussion of reflection/refraction seismology, ground penetrating radar and gravity. Two lectures and three laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GLY 101 and (MAT 112 or MAT 160 or MAT 152 or MAT 161)
Crosslisting: GLY 565.
Course Repeatability: Course may not be repeated.

GLY 472 - Introduction to Geochemistry

Investigation of the abundance and distribution of chemical elements in the Earth's crust, mantle, atmosphere, hydrosphere, and biosphere. Introduction to thermodynamics, phase and mineral equilibrium, stable and radiogenic isotopes, and geochronology. Emphasizes the application of geochemical processes to solving geologic and environment problems, with selected examples from field and laboratory studies.

Credit Hours: 3

Prerequisite Courses: GLY 101 and CHM 101 and CHML 101.
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor.
Crosslisting: GLY 572
Course Repeatability: Course may not be repeated.

GLY 473 - Isotope Geochemistry

Introduction to the use of radio and stable isotopes for studying environmental processes; radioactive decay and the applications of radioisotopes at daily to earth history time scales; isotopic fractionation, and applications of stable isotopes in modern and paleoenvironments.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor.
Crosslisting: GLY 573
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.
Course Repeatability: Course may not be repeated.

MAT 365 - Vector Calculus

A thorough study of differential and integral calculus of vector-valued functions of a vector variable. Jacobians, inverse and implicit function theorems, change of variables in multiple integrals; theorems of Green, Gauss, and Stokes; applications.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 335
Course Repeatability: Course may not be repeated.

MAT 418 - Partial Differential Equations I

A thorough treatment of the solution of initial and boundary value problems of partial differential equations in one, two, and three dimensions. Topics include classification of partial differential equations, the method of characteristics, separation of variables, Fourier analysis, special functions, Sturm-Liouville theory, and some numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 361

Crosslisting: MAT 518
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits,

electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PHY 106 - Physics of Sailing

Application of physics principles to sailing. Topics include kinetics, vectors, Newtonian mechanics, and fluid mechanics. Basic keelboat sailing is taught in the laboratory component, leading to American Sailing Association ASA 101, certification. Three lecture and two laboratory hours each week. Fee required.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162

Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms of the conservation laws for mass, momentum and energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 477 - Observational Methods in Physical Oceanography

Description of instrumentation used to measure temperature, salinity, pressure, and current in the ocean. Hands-on use of techniques and instrumentation to collect and analyze real oceanographic data. Credit is not allowed for both PHY 477 and PHY 577.

Credit Hours: 3

Prerequisite Courses: PHY 315 and PHY 475
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Crosslisting: PHY 577
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PHY 478 - Geophysical Fluid Dynamics

The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and atmosphere. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, and geostrophic adjustment. Credit is not allowed for both PHY 478 and PHY 578.

Credit Hours: 3

Corequisite Courses: PHY 475

Prerequisite Courses: PHY 350
Crosslisting: PHY 578
Course Repeatability: Course may not be repeated.

PHY 479 - Ocean Circulation Systems

Focus on results of World Ocean Circulation Experiment (WOCE), a multi-national, multi-decadal program designed to observe the global ocean. Explores large-scale circulation and properties of the ocean as foundation for understanding the future of the world oceans and their role in climate change. Credit is not allowed for both PHY 479 and PHY 579.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 579
Course Repeatability: Course may not be repeated.

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone hydrodynamics, storm surge, tides, estuarine

hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems

regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and

Statistics

Course Repeatability: Course may not be repeated.

Appropriate 280, 480, 491 and other relevant courses in BIO, CHM, EGN, EVS, GGY, GLY, or PHY can be applied as electives with the approval of the program director and the Earth and Ocean Sciences department chair.

Total Credit Hours: 60-63

Philosophy and Religion, B.A.

The Bachelor of Arts (BA) in Philosophy and Religion offers students an interdisciplinary pathway for studying philosophical and religious traditions around the world. Students who complete this BA develop critical skills in analytical thinking, reasoning and logic, cultural and historical awareness, information literacy, and thoughtful expression, all of which are essential for navigating global politics, economic contexts, and professional life, as well as for engaging with peoples of different philosophical and religious backgrounds. Courses in philosophy explore questions in metaphysics, epistemology, logic, philosophy of science, ethics, bioethics, social and political philosophy, and aesthetics. They teach students how to

analyze complex questions such as: how to live ethically, how to form beliefs properly, how to reason well, how to understand the connection between the mind and body, how to understand justice, and how to live a fulfilling life. Courses in religion examine the history, peoples, practices, beliefs, and objects of Africana Religions, Indigenous lifeways, Judaism, Catholicism, Protestantism, Islam, Hinduism, Buddhism, new religious movements, esoteric traditions, and other religious practices, cultures, and sensibilities. These courses train students how to interrogate the complex relationships between religion, race, racism, gender, politics, material culture, and technology.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Philosophy and Religion a student must successfully complete PAR 400.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Philosophy and Religion a student must turn in to the department chair, before graduation, an

independent research project completed in PAR 400, PAR 491, PAR 495 or PAR 499.

Requirements for a Major in Philosophy and Religion for the B.A. Degree:

B.A. degree with an emphasis in philosophy:

Philosophy Core

PAR 101 - The Big Questions: Introduction to Philosophy

Introduction to various philosophers and philosophical problems from historical, critical, and other perspectives. Addresses the big questions of human existence, such as: What is right and wrong? Does God exist? How do we know anything about the world around us? Students learn what a philosophical question is and discover just how pervasive philosophical assumptions are in life.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 105 - Critical Reasoning With Artificial Intelligence

Introduction to the principles of proper reasoning through the use of generative AI. Exploration of how to assess the reasoning of AI and how to use AI to improve one's own argumentation. Study of the contrast between good and bad forms of reasoning as manifested by both humans and AI.

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 103 - Exploring Religions

Introduction to the academic study of religion. Explores the many diverse religions practiced around the world and the ways practitioners construct religious experiences through scriptures, art, gender, race, and community.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 125 - Scriptures of the World's Religions

Introduction to the history and composition of scriptures of the world's religions from oral stories to words, images, objects, books, performances, sounds, and texts. Examines how scriptures in major Eastern and Western religions have constructed historical, political, social, and cultural realities through various forms of art from antiquity to today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 115 - Introduction to Ethics

An introduction to fundamental principles, theories, and problems in ethics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 201 - History of Western Philosophy I

A survey of Western philosophical thought in ancient and medieval times. Emphasis on the Greek origins of the philosophical tradition. Readings from the Pre-Socratics, Plato, Aristotle, Roman philosophy and such Christian thinkers as Augustine and Thomas Aquinas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 202 - Modern Philosophy: Descartes to Kant

Introduction to the major topics of Western philosophy during the modern period, including skepticism, the

existence of God, and the source of our ideas. Analysis of the thought of philosophers such as Descartes, Elizabeth of Bohemia, Locke, Berkeley, Leibniz, Hume, and Kant.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 400 - Colloquium for Majors

An interdisciplinary investigation of various philosophical and religious questions. Themes for study: the problem of evil, the relations of faith and reason, symbolism and language, meaning of freedom, and concepts of determinism. Required of majors in junior or senior year; open to qualified non-majors.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.

University Studies: Building Competencies/Writing Intensive and Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 18

Electives

15 additional hours at the 300-400 level, 9 of which must be in philosophy.

B.A. degree with an emphasis in religion:

Religion Core

PAR 103 - Exploring Religions

Introduction to the academic study of religion. Explores the many diverse religions practiced around the world and the ways practitioners construct religious experiences through scriptures, art, gender, race, and community.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 125 - Scriptures of the World's Religions

Introduction to the history and composition of scriptures of the world's religions from oral stories to words, images, objects, books, performances, sounds, and texts. Examines how scriptures in major Eastern and Western religions have constructed historical, political, social, and cultural realities through various forms of art from antiquity to today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 101 - The Big Questions: Introduction to Philosophy

Introduction to various philosophers and philosophical problems from historical, critical, and other perspectives. Addresses the big questions of human existence, such as: What is right and wrong? Does God exist? How do we know anything about the world around us? Students learn what a philosophical question is and discover just how pervasive philosophical assumptions are in life.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

PAR 400 - Colloquium for Majors

An interdisciplinary investigation of various philosophical and religious questions. Themes for study: the problem of evil, the relations of faith and reason, symbolism and language, meaning of freedom, and concepts of determinism. Required of majors in junior or senior year; open to qualified non-majors.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Building Competencies/Writing Intensive and Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 18

Electives

21 additional hours at the 200-400 level: 15 hours must be at the 300-400 level, 12 of which must be in religion; 15 hours must be in religion.

Total: 36 hours

Additional Information:

An overall grade point average of "C" (2.00) or better is required in courses counted toward the major. In accordance with UNCW residency requirement, at least 15 hours at the 300-400 level must be taken at UNCW.

Physics, B.A.

The Bachelor of Arts degree in Physics is appropriate for students seeking an in-depth understanding of physics within the context of a broader education. With multiple options, this curriculum allows freedom to choose a specific area of interest while offering freedom to choose electives offered by other departments. It is ideal for students wishing to pursue double majors, matching physics with another discipline.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. or B.S. degree in Physics a student must successfully complete PHY 495 or any other approved oral intensive course (see list here).

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Physics a student must successfully complete one of the following: directed individual study in any scientific discipline; departmental honors in any science department; PHY 493, PHY 495.

Requirements for a Major in Physics for the B.A. Degree:

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 335 - Modern Physics I

Introduction to special relativity and wave mechanics. First of a two-course sequence in Modern Physics.

Credit Hours: 3

Prerequisite Courses: PHY 202.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and

Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

PHY 495 - Physics Seminar

Provides instruction in communication skills related to presenting scientific information such as writing papers, presenting talks, and creating posters in LaTeX for physics and physical oceanography. Students may work with individual faculty in the department leading to a presentation on their research topic.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Option 1 - General Physics

Core requirements plus:

PHY 225 - Electronics

Practical introduction to making consumer electronic circuits in three formats: breadboard prototypes; hard-wired through-hole component circuits; and surface mount-circuits, laid out using photo-lithography. Study of software tools to document and test circuit designs, and to create photo-lithographic masks to use in creating printed circuit boards.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 260 - Introduction to Astronomy

Descriptive course in principles, theories, and techniques of astronomy. Occasional night viewings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PHY 321 - Classical Dynamics I

Newtonian and Lagrangian formulations of mechanics applied to single particles and systems of particles, central forces, oscillations, and normal mode analysis. Rotating frames of reference.

Credit Hours: 4

Prerequisite or Corequisite Courses: PHY 311 or MAT 361.
Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

Plus six hours of physics course electives at the 300-400 level.

Total: 50 hours

Option 2 - Environmental Physics

Core requirements plus:

PHY 107 - Introduction to Climate Physics

Topics in algebra-based physics as applied to the global climate system and global energy balance. Introduction to the physics of the atmosphere and ocean, including vertical and meridional structure, atmospheric circulation and convection, wind-driven and thermohaline ocean circulation, climate variability and global warming, climate modeling and the modern international climate science process.

Credit Hours: 0 To 4

Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY

101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVSL 195 - Environmental Sciences Lab

Laboratory analysis of environmental principles, resources, and problems. Application of scientific and social principles to solving current environmental problems. This course is the lab for EVS 195.

Credit Hours: 1

Prerequisite or Corequisite Courses: EVS 195
Additional Restrictions/Requirements: EVSL 195 may be taken in the same semester as EVS 195 or in a semester subsequent to EVS 195.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Plus six hours of electives at the 300-400 level in either physics, environmental sciences, engineering, or mathematics.

Total: 48-51 hours

Option 3 - Physical Oceanography

Core requirements plus:

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.
Course Repeatability: Course may not be repeated.

PHY 321 - Classical Dynamics I

Newtonian and Lagrangian formulations of mechanics applied to single particles and systems of particles, central forces, oscillations, and normal mode analysis. Rotating frames of reference.

Credit Hours: 4

Prerequisite or Corequisite Courses: PHY 311 or MAT 361.
Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms of the conservation laws for mass, momentum and energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 470 - Data Analysis

Data analysis techniques used in experimental and applied physical science. Topics include propagation of errors, probability distributions, data reduction techniques, covariance and convolution, autocorrelation, linear regression, time series analysis, and spectral analysis.

Credit Hours: 3

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)

Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

Plus nine hours of electives in physics, math, engineering, oceanography, geology, biology, or chemistry at the 300-400 level.

Total: 62 hours

Option 4 - Engineering Physics

Core requirements plus:

PHY 225 - Electronics

Practical introduction to making consumer electronic circuits in three formats: breadboard prototypes; hard-wired through-hole component circuits; and surface mount-circuits, laid out using photo-lithography. Study of software tools to document and test circuit designs, and to create photo-lithographic masks to use in creating printed circuit boards.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 414 - Engineering Physics I

Introduction to the practical fabrication of devices. Students will learn to use CAD (Computer-Aided Design) software to design projects and will also learn how to use hand tools, standard and CNC (Computer Numerical Controlled) machine tools, and 3D printers to fabricate objects. This class is intrinsically project oriented.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PHY 417 - Engineering Physics II

Integration of fabricated objects with hand-built electronic circuits and microprocessors in order to make sophisticated devices for practical use. This class is intrinsically project oriented.

Credit Hours: 3

Prerequisite Courses: PHY 225 and PHY 414.
Course Repeatability: Course may not be repeated.

Plus six hours of electives at the 300-400 level in either Physics, Engineering or Mathematics.

Total: 49 hours

Option 5 - Computational Physics

Core requirements plus:

PHY 215 - Introduction to Computing in the Physical Sciences

The computational methods commonly used to display and analyze data in the physical sciences by introducing students to the basics of MATLAB (tm) or a similar programming language. Topics include: control structures, handle graphics functions and matrix algebra. Laboratory setting, emphasiziing work with real environmental data and project-based.

Credit Hours: 1

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

PHY 315 - Computational Physics and Complexity

Corequisites: PHY 321 or MAT 361. Introduction to numerial modeling techniques for solving problems in physics and complex systems. Numerial techniques will be applied to classical mechanics, bifurcation and dynamical systems, chaotic systems, thermodynamics, optimization, cellular automata, and self-organization.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 470 - Data Analysis

Data analysis techniques used in experimental and applied physical science. Topics include propagation of errors, probability distributions, data reduction techniques, covariance and convolution, autocorrelation, linear regression, time series analysis, and spectral analysis.

Credit Hours: 3

Prerequisite Courses: PHY 202.

Course Repeatability: Course may not be repeated.

Plus nine hours of electives at the 300-400 level in either physics, computer science, engineering, chemistry, statistics, or mathematics.

Total: 50 hours

Additional Information:

Students must attain a grade point average of "C" (2.00) or better computed over all the courses used to fulfill the requirements of the major and a grade of "C-" or better for each PHY course used to fulfill the requirements of the major.

Physics, B.S.

The Bachelor of Science degree in Physics is appropriate for students planning to pursue physics as a professional career, either immediately after graduation in a physics-related insutry or after graduate study in physics or a related field.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. or B.S. degree in Physics a student must successfully complete PHY 495 or any other approved oral intensive course (see list here).

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. or B.S. degree in Physics a student must successfully complete one of the following: directed individual study in any scientific discipline; departmental honors in any science department; PHY 493, PHY 495.

Requirements for a Major in Physics for the B.S. Degree:

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 311 - Mathematical Physics

Introduction to mathematical techniques in physics: vector analysis, operator and matrix analysis; functions of a complex variable and calculus of residues; functions of mathematical physics;

eigenfunctions and the Sturm-Liouville equation; and Fourier series and transforms.

Credit Hours: 3

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 314 - Introduction to Computational Physics

An introduction to the solution of common physics problems using computers. Assuming no previous computer programming experience, the course will introduce basic scientific programming skills as applied to solve problems in mechanics, chaos, nonlinear dynamics, electromagnetism, fluid dynamics, and other areas.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: PHY 321 or MAT 361.
Course Repeatability: Course may not be repeated.

PHY 321 - Classical Dynamics I

Newtonian and Lagrangian formulations of mechanics applied to single particles and systems of particles, central forces, oscillations, and normal mode analysis. Rotating frames of reference.

Credit Hours: 4

Prerequisite or Corequisite Courses: PHY 311 or MAT 361.
Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 335 - Modern Physics I

Introduction to special relativity and wave mechanics. First of a two-course sequence in Modern Physics.

Credit Hours: 3

Prerequisite Courses: PHY 202.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 336 - Modern Physics II

Second semester of the Modern Physics sequence. Aims to familiarize students with the fundamental concepts, methods, and open questions in a wide range of subfields through the application of relativity and simple quantum mechanics. Possible topics include atomic physics, nuclear physics, particle physics, solid-state physics, astrophysics, and cosmology.

Credit Hours: 3

Prerequisite Courses: PHY 335
Course Repeatability: Course may not be repeated.

PHY 400 - Experimental Physics

Seminal experiments illuminating a particular branch of modern physics, using topics drawn from atomic, nuclear, solid-state, plasma, and optical physics. Students participate in the design and implementation of experiments and acquire skills such as data organization, error analysis, and interpretation of results.

Credit Hours: 3

Prerequisite Courses: PHY 202 and PHY 314.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PHY 411 - Electricity and Magnetism

Electric and magnetic field theory; Poisson's and Laplace's equation; harmonic methods, special methods for solution of electrostatics problems, material media and boundary value problems; electromagnetic waves.

Credit Hours: 3

Prerequisite or Corequisite Courses: MAT 261.
Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 444 - Quantum Theory

Introduction to basic principles of quantum mechanics. Topics include operators, symmetry, orbital and spin angular momentum, perturbation theory, and

applications to simple systems.

Credit Hours: 4

Corequisite Courses: MAT 361
Prerequisite Courses: PHY 335
Course Repeatability: Course may not be repeated.

PHY 455 - Thermal Physics

Principles of thermodynamics and heat transfer; response of molecules to temperature effects illustrated by introduction to kinetic theory and statistical mechanics.

Credit Hours: 3

Prerequisite Courses: PHY 335
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 495 - Physics Seminar

Provides instruction in communication skills related to presenting scientific information such as writing papers,

presenting talks, and creating posters in LaTeX for physics and physical oceanography. Students may work with individual faculty in the department leading to a presentation on their research topic.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 361 - Differential Equations

Theory, methods of solution, and applications of ordinary differential equations with emphasis on first and second order (linear and nonlinear) equations, and systems of first order equations. Methods used include Laplace transforms, matrices, eigenvalues and eigenvectors. Additional topics from power series solutions and numerical methods.

Credit Hours: 3

Prerequisite Courses: MAT 162.

Course Repeatability: Course may not be repeated.

9 additional hours of PHY courses numbered 300 or above.

Total: 73 hours

Additional Information:

Students must attain a grade point average of "C" (2.00) or better computed over all the courses used to fulfill the requirements of the major and a grade of "C-" or better for each PHY course used to fulfill the requirements of the major.

Note:

Students interested in the B.S. degree in physics are advised to take the PHY 201 - PHY 202 sequence in the freshman year.

Political Science, B.A.

The major in political science is for students seeking careers in government, the private sector, the non-profit sector or for students who intend to enroll in graduate school or law school. The curriculum stresses analytical

and critical thinking, quantitative analysis, and a theoretical understanding of the U.S. and other comparative political systems. Students may take an internship or other directed studies to gain a better understanding of the operations of government and non-profit agencies.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Political Science a student must successfully complete PLS 401.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Political Science a student must successfully complete one of the following courses: PLS 221, PLS 294, PLS 401, PLS 491, PLS 494, PLS 498 or PLS 499.

Requirements for a Major in Political Science for the B.A. Degree:

39 hours of political science: this must include:

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 201 - Introduction to Political Science Methods

Introduction to the rationale and application of the scientific method to political analysis. Major topics include: statement of problem, survey of literature, theory construction, data collection and analysis, and presentation of findings and conclusions.

Credit Hours: 3

University Studies: Building

Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 230 - Introduction to Comparative Government and Politics

Comparative analysis of political systems in developed, second- and third-world nations, including an examination of the foundations and structures of selected national governments, such as parliamentary and presidential systems, democratic and non-democratic systems.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 401 - Senior Seminar

Capstone course that integrates knowledge from the major subfields in political science through examination of the discipline's relationship to careers and citizenship.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing and 30 hours in political science including PLS 101, PLS 201, PLS 220, and PLS 230, and one of the following: PLS 212, PLS 310, PLS 312, PLS 313, PLS 314, PLS 315, PLS 317, or PLS 415.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Political Theory

Students must also complete at least one course in Political Theory. Choose one of the following:

PLS 212 - Introduction to Political Theory

Fundamental questions about the nature and purpose of politics as treated by such writers as Plato, Augustine, Locke, Hobbes, and Marx.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 310 - Legal Philosophy and Jurisprudence

Introduction to the nature, concept and sources of law and the various schools of jurisprudence. Topics treated include natural law; historical, analytical and sociological jurisprudence; idealism; utilitarianism; legal realism; equity, justice, precedent, custom and law; and the relation of law and morality.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Crosslisting: PAR 310
Course Repeatability: Course may not be repeated.

PLS 313 - Early Political Thought

Introduction to the origin and development of political theory from the 5th Century B.C. through the medieval era. Emphasis will be placed on the political ideas of Plato, Aristotle, the Epicureans, the Stoics, Cicero, Augustine, medieval philosophers, and Aquinas in order to discover the recurring themes of political inquiry.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 314 - Modern Political Thought

Critical examination of political ideas from 1500 to 1900 with special attention to those of Machiavelli, Hobbes, Locke, Rousseau, Montesquieu, Hume, Burke, Hegel, Bentham, Marx, the Mills, Spencer, T.H. Green and Nietzsche.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 315 - Contemporary Political Ideologies

Ideology and its significance in the modern world. Systematic analysis of the major political ideologies of the 19th and 20th centuries with emphasis on democracy, communism, fascism, nationalism, anarchism, and the New Left.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 317 - Political Thought of Asia

Recommended: PLS 212. Critical assessment of philosophical responses to the political, economic, and social challenges faced by the Asian Region. Considers

Asian political thought comparatively, addressing recurring issues of politics and community life.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 415 - American Political Thought

American political thought from the colonial period to the present.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Public Administration & Public Policy Requirement:

Students must also complete at least one course in Public Administration & Public Policy. Choose one of the following:

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals, role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 304 - Introduction to Public Policy Analysis

Study of the theories and methods of analyzing and explaining public policy and the substance of recent domestic policies in the areas of public finance and human and physical resources, including welfare, education, protection of the environment, housing, health, urban renewal and transportation.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

PLS 308 - Public Administration

Introduction to public administration in the United States. Nature and scope of public administration, public interest in the administrative process, role of administrators, formal and informal organization, public personnel and financial management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 327 - Science, Technology, and Innovation Policy

Contemporary issues in the study and critique of science, technology and innovation policy including an overview of dynamics at the interface of science, politics and policy. Topic examples include: public and private spending on research and development (R&D), responsible innovation, governing artificial intelligence, science advice, integrity in science, evidence-based decision making, ethics in intellectual property.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or Senior standing.
Course Repeatability: Course may not be repeated.

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 354 - Urban Planning and Policy

Overview of the policies, plans, and regulations that local governments used to shape the physical growth of cities, towns, and suburbs. A range of topics are covered, such as transportation planning, historic

preservation, and affordable housing development.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 359 - American Policy Development: Politics, Institutions and Theories

Examination of the political events and ideas needed to understand the growth of American government. Study of how the change of institutional power contributed to the growth of government within our federal system. Students produce an empirical/data analysis of an important institutional aspect of American politics.

Credit Hours: 3

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may not be repeated.

PLS 362 - Leading and Managing Volunteers

Addresses major issues in the leadership and management of volunteers in the nonprofit and public sectors. Focuses on the two main types of volunteers: service volunteers, and policy volunteers (board members). Topics covered include volunteer recruitment, screening, job design, supervision, recognition, and evaluation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 434 - Nonprofit Leadership Experience

An engaged learning experience where students learn about nonprofit organizations, acquire useful employment skills and apply them in projects designed by nonprofit organizations in conjunction with the instructor. Students will complete projects developed and needed by nonprofit organizations in the community; and students will meet and interact with members of the UNCW and nonprofit community.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: PLS 534
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Directed Upper Level Electives:

In addition to PLS 401, students must complete 15 hours of course work at the 300-400 level. In doing so, students must complete one course from each of the following three subfields: American Political Behavior & Institutions, International Relations, and Comparative Politics. Any other PLS courses (100-400) will contribute to the 39 total hours required for the major. If a course appears in more than one category (e.g., PLS 421), students can only use the course to fulfill one category of the directed upper level electives.

Select one of the following courses from American Political Behavior & Institutions:

PLS 300 - American Constitutional Law I

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights. The powers of the judicial, executive, and legislative branches of national government; the relationships among these branches; and the federal system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 301 - American Constitutional Law II

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights. Individual rights and liberties other than procedural rights of persons involved with the criminal justice system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 302 - The Politics of the Supreme Court

Explores the role of Supreme Court in the American political system. Reviews the Court's history, membership, operations, and interactions with the other branches of government and the public. Focuses on the social scientific theories that explain the behavior of the justices and other individuals associated with the

Court.

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.

PLS 303 - Political Behavior

The impact of citizen beliefs and preferences on election outcomes, and the factors that influence political participation. Structured around a critical examination of the assumptions, findings, and interpretations of the major studies of political behavior.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 307 - The American Legislature

Functional study of legislative bodies and lawmaking. Among the topics studied will be the role of legislatures; the impact of constituencies, parties, interest groups, interpersonal relationships and other pressures on legislators; legislative structure; and the decision-making process.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 309 - The American Chief Executive

Examination of the concept of a political chief executive as a coordinate member, with legislature and courts, of a government team. Emphasis will be placed on the powers, roles, decision-making processes, and institutional development of the offices of president, governor, and mayor.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 316 - Women in Politics

Introduction to political perspectives on sex role differentiation. Among the topics to be discussed will be political socialization of women in ancient and modern society; women's roles in politics and government; political consequences of women's entry into the work force; and contemporary issues in the women's movement. Emphasis will be placed throughout on comparative political analysis.

Credit Hours: 3

Prerequisite Courses: PLS 101 or PLS 111
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 340 - The Black Experience in American Politics

American political institutions and processes through the eyes of Black America. This study will analyze the power structure in the black community, dissent and protest, black participation in the political system, black leaders and politicians and their politics, and the uniqueness of black politics as compared with the wider spectrum of the political system.

Credit Hours: 3

Prerequisite Courses: PLS 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 341 - Latino Politics

Role of Latino communities in shaping state and national politics in the United States. Latino political empowerment strategies, political representation, the electoral impact of Latino votes, and contemporary public policy issues.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore,

junior or senior standing or consent of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 350 - State Government and Politics

Survey and analysis of the organization, functions, and political processes of the American states with an emphasis on North Carolina politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 351 - Urban Government and Politics

Structure, functions, political processes, problems, and trends in American city and metropolitan government and politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore,

junior or senior standing or consent of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 352 - American Political Culture

Investigation of the elements that contribute to current national political culture, origins, characteristics,and influences on public dialogue and policy.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 353 - American Parties and Interest Groups

Historical and analytical treatment of the appearance and realignment of political parties during the five successive 'national party systems' since the beginning of the republic. Special emphasis is given to the question of contemporary party disarray and potential realignment.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 402 - U.S. Immigration Politics

Evolution of immigration policy in the U.S. Experience with various immigration time periods and source countries. Identifies the primary costs and benefits of immigration, with special attention to the policy changes making immigration more difficult over time. Conditions under which immigration increases or decreases, including the contemporary increase in the rate of illegal immigration.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 403 - Public Opinion

Origin, content, and policy impact of public opinion in democratic nations. Emphasis on the contemporary American experience and the genesis of mass movements.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 404 - Campaign Management and Strategies

Internal mechanics of political campaigns, major areas of campaign management and strategy, campaign organization, voter contact, campaign research, finance and fund-raising, and communications. Special attention is given to recent and current presidential, congressional, and gubernatorial election campaigns.

Credit Hours: 3

Prerequisite Courses: PLS 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 406 - Contemporary Southern Politics

Recent developments throughout the American South and their impact on national politics. Topics include southern political culture, the decline of the one-party system, and the changing roles of blacks and organized labor. Emphasis is placed upon independent research projects involving student analysis of census, election return, and public opinion survey data.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or the consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 407 - Political Psychology

Examination of the leading scholarship in political psychology to investigate critical issues in American politics. After introducing political psychology's history, methods and major themes, course addresses the psychological aspects of campaign politics, public opinion, intergroup relations and leadership.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

One of the following courses in International Relations:

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear weapons technology, why countries seek nuclear

weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 422 - Contemporary American Foreign Policy

Roles and interrelationships of Congress, the media, public opinion, the president, the secretaries and departments of state and defense, and the intelligence community are examined. Emphasis is placed on the content and the dynamic aspects of the process of policy formulation and implementation.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 423 - National Security Policy

Formulation of security policy, including the roles of the executive and legislative branches and of non-governmental factors; evolution of changing assumptions, strategies, and goals; the nature of U.S. security requirements, U.S. military commitments abroad, and the cost of strategies based on weapons superiority, arms control, and disarmament.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing

Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 425 - International Politics

Students are provided with an overview of the current International system and introduced to the theories actors, their interactions, and the norms of the international system. The impact of the law and norms of international relations or international conflict are analyzed and debated.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: CMR 525
Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources

and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 463 - International Development

Examines the field of international development including economic development and governance assistance activities with attention to classic theories as well as current debates and innovative approaches.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

And one of the following courses in Comparative Politics:

PLS 330 - Political Systems of Africa

Governments and politics of selected sub-Saharan African states. A survey from colonial days to the present with emphasis on contemporary economic, social and political problems.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 332 - Politics of Central America

Introduction to core political issues facing the Central American, political history as well as contemporary

processes. Students will critically evaluate development and the problems associated with moving from underdeveloped to ""developed"" status.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 333 - Politics of South America

Politics of South America and the impact of socio-economic forces on the region and its political structures.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 334 - Revolutionary Movements

Introduction to the social, political, and economic conditions which give rise to radical response. Examines small rebel bands, or militias (commonly

referred to as 'guerrilla' movements), and 'terrorist' organizations, as well as large-scale revolutionary movements.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 335 - European Political Systems

Political institutions and processes of selected European countries, including Great Britain, France and Germany.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 342 - Race and Politics in the Americas

Social, political, and economic inequality of racial/ethnic groups in the Americas.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 343 - Democratic Transition in the United States

Examination of the process of democratic transition and consolidation in the United States from 1898 to the present. Focus on the comparative analysis of scholarly literature concerning democratic transition and consolidation.

Credit Hours: 3

Prerequisite Courses: PLS 230, or permission of instructor,
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 430 - Caribbean Politics

Examines the importance of size, the influence of global forces, and the difficulties of unification and coordination in the Caribbean political context.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 464 - Democracy and Authoritarianism

Integrative course focusing on scholarly literature on democracy, authoritarianism, and democratization, with an emphasis on real world examples of regime types and transitions.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Note:

A total of 18 hours must be at the 300-400 level. (PLS 401, which is required, contributes toward this sum).

Additional Information:

A minimum GPA of "C" (2.00) is required among all elective political science courses, and a grade of "C-" or above is required for the core courses (PLS 101, PLS 201, PLS 220, PLS 230, and PLS 401).

Students planning to do graduate work are encouraged to study a modern foreign language and to acquire a basic knowledge of computer science, statistics, calculus, and macroeconomics.

Psychology, B.A.

Psychology is a basic and applied science, health profession, and undergraduate liberal arts major. The UNCW Psychology Department supports an outstanding undergraduate program with a shared set program goals and student learning outcomes and a strongly commitment to involving students in the research process. Students work closely with our outstanding faculty as junior colleagues to investigate a wide variety of topics including basic brain processes, drug effects, memory-improvement techniques, social cognitive factors underlying prejudice, ways to reduce school violence, and the evaluation of psychological treatments-to name but a few.

The department also actively involves students in service learning in a variety of ways. Undergraduate students have opportunities to apply the knowledge they have gained in the classroom in practicum experiences or community research projects. Psychology faculty and students are found in community settings which range from preschools to prisons. The graduates of our Bachelor of Arts program are prepared for further education in psychology and other professions and to take their place in the world of work. The study of psychology gives students the chance to use technology, learn to communicate, and be able to analyze ideas critically.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Psychology a student must successfully complete PSY 355.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Psychology a student must successfully complete PSY 355.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Psychology a student must successfully complete PSY 355.

Requirements for a Major in Psychology for the B.A. Degree:

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 106 - Psychology as a Science and Career

Introduction to the scientific method of inquiry and to the application of psychological knowledge and methods using human behavior as a focus.

Credit Hours: 2

Prerequisite Courses: Prerequisite or corequisite: PSY 105.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

PSY 225 - Introductory Statistics for the Behavioral Sciences

Introduction to the statistical techniques most often used by behavioral scientists for either descriptive purposes or hypothesis testing. Parametric techniques are emphasized, but nonparametric tests are included.

Credit Hours: 6

Prerequisite Courses: PSY 105 and (MAT 101 or higher [excluding MAT 105, MAT 141, and MAT 142], STT 210, or STT 215) and (BIO 105 or BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Class is restricted to students with Junior standing (or above).

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Psychology

PSY 355 - Introduction to Experimental Psychology

Basic principles of psychological research design and evaluation, including techniques of data collection and analysis, and conduct, interpretation, and reporting of various types of psychological research. Experimental research is emphasized.

Credit Hours: 6

Prerequisite Courses: PSY 225
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may not be repeated.

One course from each of the six content domains:

Developmental Psychology:

PSY 220 - Child Psychology

Human psychological development through childhood and early adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or

PSY 221 - Adolescent Psychology

Human psychological development from late childhood through adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Personality and Social Psychology:

PSY 246 - Psychology of Personality

Overview of the theoretical models underlying the structure and organization of individual differences. Emphasis on empirical research evaluation the different theoretical models. Topics include the self-concept, awareness of motivation, perceived control, and the biological mechanisms influencing traits such as extraversion.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or

PSY 264 - Social Psychology

Individual human behavior as a function of the influence of other persons. Emphasis on the psychology of person perception, interpersonal communication and relationships, attitude formation and change, and small group behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Abnormal Psychology:

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Biological Psychology:

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

Cognitive Psychology:

PSY 211 - Perception and Cognition

Survey of major phenomena, methods, and theories associated with the study of perception and cognition. Topics include sensory systems, perceptual processes, attention, memory, knowledge, decision-making, and problem solving.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Learning and Behavior Analysis:

PSY 217 - Learning and Behavior Change

Basic principles of conditioning, learning, and behavior change. Topics will include and introduction to classical and operant conditioning and the applications experimentally discovered principles to psychological

interventions, as well as other fields such as education, business, and health.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

One course from the following options:

PSY 210 - Science and Pseudoscience

Examination of bases for scientific and pseudoscientific claims to knowledge. Considers criteria for description and explanation in science; uses these criteria to differentiate between areas that are scientific and those whose claims to be scientific are questionable. Evaluates areas such as parapsychology and astrology. Emphasizes use of critical thinking skills.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 245 - Drugs and Behavior

Psychological aspects of drug use and abuse. Emphasis on the effects of major psychoactive drugs (including alcohol) on behavior, the psychological determinants of drug use, and treatment of drug abuse.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 257 - Evolutionary Psychology

Consideration of the evolution and adaptive significance of behavior in humans, including such topics as mate selection, parental care, cognition, language, altruism, aggression, warfare, and creativity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PSY 265 - Human Sexual Behavior

Psychological aspects of human sexuality with emphasis on psychosexual development and behavior. Includes discussion of causative factors and treatment of sexual disorders and deviations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 275 - Forensic Psychology

Investigation of psychological factors relevant to the legal system including: eyewitness identification and false memories, confessions, jury decision making, the insanity defense and mental health law, expert psychological testimony in court, criminal profiling, risk management, treatment of the mentally ill in corrections.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

18 hours of 300 or 400 level elective Psychology courses

Total Credit Hours: 56

Additional Information:

A grade of "C" or better is required in PSY 105. No more than one course with a grade of "D" can count toward the requirements for a major in psychology (including the biology and mathematics course requirements). There also must be a "C" (2.00) or better average on all courses counted towards the major. Additional requirements include completion of a biology course with lab selected from BIO 105, BIO 140, BIO 201, BIO 202, or BIO 240 and a mathematics course selected from MAT 101 or higher (excluding MAT 105, MAT 141, and 142), STT 210, or STT 215.

Public Health, B.S.

https://www.uncw.edu/hahs

The Public Health program at the University of North Carolina Wilmington is one of the first four standalone baccalaureate programs in the United States to be accredited by the Council for Education in Public

Health. Students graduating from the program work with communities and individuals to protect, maintain and enhance, health and quality of life. Students complete the public-health core courses that provide a strong foundation in the Public Health Domains, the U.S. Public Health System, global health issues, factors impacting human health and disease, epidemiology, population-based and individual approaches to health enhancement, public health data sources, health policy, health law, health communication, and much more. Then, students must select one of four concentrations:

1. Community Health Education – prepares students to assess, plan, implement and evaluate programs that are designed to enhance individual and community health and wellbeing;
2. Pre-Clinical Health – prepares students with a strong science background for continuing study in medicine, dentistry, physician assistant, physical therapy, nutrition, nursing, etc.;
3. Global Health – prepares students for careers working in developing low- and middle-income countries to improve health and quality of life; or
4. Gerontology - prepares students for public health careers working with an older adult population.

Public Health professionals work in a variety of settings, including hospitals, non-profit organizations, government agencies, doctors' offices, business & industry, and colleges/universities.

Upon graduation, those with concentrations in Community Health Education and Global Health are eligible to take a national exam to become Certified Health Education Specialists (CHES®). Those in the Global Health concentration may also opt to obtain a Pre-Peace Corps Prep Certificate. Those in the Gerontology concentration and meeting the minimum admissions requirements can apply to complete one additional year of study and receive a MS degree in Gerontology.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Public Health, a student must successfully complete PBH 496.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Public Health, a student must successfully complete PBH 497.

Requirements for a Major in Public Health for the B.S. Degree

To declare the major and concentrate in Community Health Education, Global Health, or Gerontology, a student must have a 2.5 overall grade point average. To declare the major and concentrate in Pre-Clinical, a student must have a 3.0 overall grade point average. All students in the program must complete all core courses and at least one concentration. A grade of C- or above must be achieved in each of the Public Health core and concentration courses. A 2.5 overall GPA is required to register for PBH 496 and PBH 497, and graduate from the program.

Public Health Core Courses (41 Credit Hours)

All students in Public Health must complete all core courses and then select at least one concentration.

PBH 290 - Foundations of Public Health

An overview of the public health profession with emphasis on the foundations of public health such as definitions, history, philosophy, ethics, evidence-based principles, and determinants of health.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 295 - Public Health Practice

This course will examine public health practice and the role of B.S.- prepared public health professionals within the public health workforce. Students will examine the use of needs and community asset assessments in planning, implementing and evaluating public health programs. Grant writing skills will be introduced and case studies will be utilized to connect classroom instruction to real world examples of public health.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH

majors only.
Course Repeatability: Course may not be repeated.

PBH 299 - Introduction to Biostatistics

This course will introduce students to fundamental concepts in biostatistics and will guide students through real-world applications of biostatistics to public health problems. Topics covered will include descriptive statistics (i.e., measures of central tendency and variability), measures of extent of disease (i.e., prevalence, incidence, relative risk, risk difference, and odds ratio), probability, (e.g., measures of sensitivity and specificity), confidence intervals, hypothesis testing, sample size determination, and multivariable methods.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
University Studies: Foundations/Mathematics and Statistics

Course Repeatability: Course may not be repeated.
Major Restriction PBH

PBH 310 - Social and Behavioral Determinants of Health

An overview of social and behavioral concepts related to public health with specific emphasis on behavioral theory and evidence-based practice. Examines the integration of health behavior, health theories and health promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 320 - Foundations of Global Health

Overview of health around the world. The class will explore contemporary issues, problems, and controversies in global health and identify key global health challenges, their distributions, and prevention

strategies.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
University Studies: Building Competencies/Information Literacy
Crosslisting: HEA 320.
Course Repeatability: Course may not be repeated.

PBH 359 - Research Methods in Public Health

Designed to familiarize students with the fundamental principles, underlying research, and evaluative methods in public health. Focus will be on types of research design, sampling methodologies, statistical analysis, interpretation of results, scholarly writing, and critical evaluation of research conclusions.

Credit Hours: 3

Prerequisite Courses: PBH 299 with a minimum

grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
University Studies: Building Competencies/Writing Intensive; Information Literacy
Crosslisting: HEA 359.
Course Repeatability: Course may not be repeated.

PBH 400 - Health Ethics Policy and Law

Overview of the ethical, political, and legal implications that influence public health. Emphasis on current public healthcare issues and policies.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.

University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

PBH 401 - Foundations of Environmental Health

Overview of assessment, control, prevention, and safety of human health from environmental and occupational risk factors. Topics include pollution wastes, toxic metals, pesticides, radiation, vector borne diseases, and occupational injuries and stressors. Emphasizing deleterious effects of industrialization on developing countries, effects of globalization, and the rise of the environmental justice movement.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; or consent of instructor.
Course Repeatability: Course may not be repeated.

PBH 452 - Epidemiology

Epidemiology overview and history; distributions of disease by time, place and person; association and

causality; epidemiological study designs; population and attributable risk; sensitivity, specificity and screening; public health practice and prevention; special issues in infectious and noninfectious disease epidemiology.

Credit Hours: 3

Prerequisite Courses: PBH 359 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Crosslisting: HEA 452.
Course Repeatability: Course may not be repeated.
Major Restriction PBH

PBH 495 - Pre-Internship Professional Seminar

The Pre-Internship Professional Seminar is designed as the last step of the Public Health program before students complete Internship and Capstone and prepare to enter the workforce. Designed to be taken the semester prior to PBH 496 Capstone and PBH 497 Internship, this class focuses on developing professionalism and skills necessary to secure an internship and a job post graduation.

Credit Hours: 3

Additional Restrictions/Requirements: Instructor approval required. Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.
Major Restriction PBH

PBH 496 - Capstone in Public Health

This course is designed to integrate and synthesize what has been covered in the other PBH courses as well as develop soft skills related to motivational interviewing and cultural humility. The course provides a culmination of learning experiences through a final

project.

Credit Hours: 3

Corequisite Courses: PBH 497 with a minimum grade of "C-".
Prerequisite Courses: PBH 495 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; senior standing; and instructor approval.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health; Public Health Studies

Complete one of the following sequences:

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXSL 216 - Human Anatomy and Physiology I Laboratory

EXSL 216 is the study of the anatomical and functional characteristics of the human body including the skeletal, muscular, circulatory, and respiratory systems with emphasis on health and physical activity.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 216.
Course Repeatability: Course may not be repeated.

EXS 217 - Human Anatomy and Physiology II

Examines six major organ systems that include the human nervous, endocrine, immune, digestive, urinary and reproductive systems as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 217
Prerequisite Courses: EXS 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXSL 217 - Human Anatomy and Physiology II Laboratory

EXSL 217 provides the laboratory experience for EXS 217 via examining the anatomy and physiology of the nervous, endocrine, immune, digestive, urinary and reproductive systems including the special senses and metabolism.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 217.
Course Repeatability: Course may not be repeated.

Or

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

Community Health Education Concentration: (24 Credit Hours)

This concentration prepares students to become health education specialists. Students completing this concentration are eligible to sit for the Certified Health Education Specialist exam offered by the National Commission for Health Education Credentialing. To complete a concentration in Community Health Education, students must complete the core courses for the public health major and the concentration courses listed below, inclusive of PBH 497 (9 credit hours) in an approved community health education setting.

Concentration Courses

PBH 234 - Introduction to Health Promotion and Education

Introduction to the field of Health Education/Promotion. History and philosophy of health education and the theoretical foundations are covered. The roles and responsibilities and typical settings in which Certified Health Education Specialists are employed are covered as well as the ethical principles that guide the profession.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Crosslisting: HEA 234.
Course Repeatability: Course may not be repeated.

PBH 300 - Program Planning & Evaluation Methods for Health Promotion

Comprehensive health promotion program planning and evaluation that emphasizes assessment, community engagement, and intervention selection.

Specifically, the course will examine health promotion program planning and evaluation models, needs and assets assessments, measurement, instrument development, reliability/validity assessments, measurement error, and process, impact, and outcome evaluation.

Credit Hours: 3

Prerequisite Courses: PBH 234 with a minimum grade of C-.
Additional Restrictions/Requirements: Open to Public Health majors with a Community Health Education or Global Health concentration. Minimum passing grade of "C-" or above required in each PBH course to progress in the program.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 315 - Health Program Implementation

Focus on implementation methods used in community and public health education. An overview of health education methods. Specific strategies for implementing health education for individuals and

groups, coalition building, advocacy and policy change.

Credit Hours: 3

Prerequisite Courses: PBH 234 and PBH 300 with a minimum grade of "C-" in each course.
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only in Community Health Education or Global Health concentrations.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 351 - Health Communication

Contemporary health communication issues will be studied including communication strategies, models, and theories that enhance the delivery of public health programs in various settings. Micro-level and macro-level applications emphasized.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum

passing grade of "C-" or above required in each PBH course to progress in the program.

Crosslisting: HEA 351.
Course Repeatability: Course may not be repeated.

COM 226 - Health Communication

Application of communication theory and principles to context of health communication, including intrapersonal and interpersonal health across the lifespan, and how politics, institutions, and culture inform and constrain health communication choices.

Credit Hours: 3

Prerequisite Courses: COM 105 with a minimum grade of B
Additional Restrictions/Requirements: Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.

PBH 395 - Health Promotion Practice

This course will examine various settings where health education and promotion efforts may be delivered,

including: community based organizations, governmental public health agencies, schools, worksites, and higher education campuses. Students will be exposed to a variety of topics that are commonly addressed in these settings, including (but not limited to): drug and alcohol education, nutrition, injury and violence prevention, chronic disease prevention and management, relationship and sexual health, and emotional health and wellbeing. The course will emphasize ethical practices and inclusivity in the practical application and delivery of professional health education and promotion efforts.

Credit Hours: 3

Prerequisite or Corequisite Courses: PBH 300 with a minimum grade of "C-".
Prerequisite Courses: PBH 234 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to Public Health majors with a Community Health concentration.

Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 497 - Internship in Public Health

Supervised internship placement in the community. Applies theory to practical application in public health. Requires 120-360 hours of supervised fieldwork, depending on concentration.

Credit Hours: 3 to 9

Corequisite Courses: PBH 496 with a minimum grade of "C-".
Prerequisite Courses: PBH 495 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; senior standing; 2.5 GPA; and instructor approval.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 9
Major Restriction Public Health; Public Health Studies

Total Credit Hours: 65

Global Health Concentration Courses (30 Credit Hours)

This concentration prepares students for international work in developing countries. Students completing the requirements for this concentration will also meet the requirements of the Peace Corp Preparation Certificate Program. To complete a concentration in global health, students must complete the core courses for the public health major, the Foreign Language requirement, the Area Studies/International Studies courses, and Sector Specific courses, inclusive of PBH 497 (9 credit hours) in an approved global health education setting.

Foreign Language

Two semester courses are required for the concentration, or the University language requirement, will fulfill the concentration. Sign language is not accepted to complete this concentration requirement. The Peace Corps recommends 4 semesters of foreign

language, thus students have the option of completing an additional 6 credits. Spanish and French are the recommended languages.

Area Studies/International Studies (6 Credit Hours)

A minimum of two, 3-credit courses that support an international development education. Courses may be selected from the following:

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 484 - Agriculture and the Environment

Interdisciplinary exploration of the impacts of crop and animal agriculture on terrestrial, aquatic, and marine environments. Topics include natural habitat impacts, sediment transport, nutrient runoff, land conversion, and concentrated feeding operations. Emphasis on building student communication skills and competency

in critical analysis of current environmental issues.

Credit Hours: 3

Prerequisite Courses: EVS 195.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

INT 105 - Introduction to International Studies

An introductory, interdisciplinary survey of the main concepts and terminology associated with the broad, interdisciplinary field of international studies, including economic, geo-political, and socio-cultural globalization and the effects of these processes on individuals and communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 315 - Topics in Globalization

Intensive study of a selected topic or theme in globalization. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 331 - The New Scramble for Africa

Interdisciplinary overview of environmental history and development in Africa from the colonial era to the present.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 480 - Global Issues

Intensive study of a selected international topic or theme. May be repeated for credit under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PLS 111 - Politics and Government in Global Perspective

Survey for non-majors of politics and governmental institutions within and among nation states. Attention will also be given to the role of political theory and

ideology in the governance of states.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 218 - Ethics in International Affairs

Role of morality in international affairs to explore how states and citizens act responsibly in international public life. Drawing on the traditions of realism, liberalism, and utilitarianism along with the just war tradition, the course examines the ethical implications of issues such as war, terrorism, globalization, and genocide.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

Sector (major) Specific Classes (24 Credit Hours)

ANT 346 - Medical Anthropology

Investigation of systems of medical knowledge and healthcare; representations of health and illness; interactions between environmental, biological, and social factors that shape risk in vulnerable communities; and encounters between Western biomedicine and non-Western healing traditions. Emphasis on applied anthropology in global health settings.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PBH 234 - Introduction to Health Promotion and Education

Introduction to the field of Health Education/Promotion. History and philosophy of health education and the theoretical foundations are covered. The roles and responsibilities and typical settings in which Certified Health Education Specialists are employed are covered as well as the ethical principles that guide the profession.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Crosslisting: HEA 234.
Course Repeatability: Course may not be repeated.

PBH 300 - Program Planning & Evaluation Methods for Health Promotion

Comprehensive health promotion program planning and evaluation that emphasizes assessment, community engagement, and intervention selection.

Specifically, the course will examine health promotion program planning and evaluation models, needs and assets assessments, measurement, instrument development, reliability/validity assessments, measurement error, and process, impact, and outcome evaluation.

Credit Hours: 3

Prerequisite Courses: PBH 234 with a minimum grade of C-.
Additional Restrictions/Requirements: Open to Public Health majors with a Community Health Education or Global Health concentration. Minimum passing grade of "C-" or above required in each PBH course to progress in the program.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 315 - Health Program Implementation

Focus on implementation methods used in community and public health education. An overview of health education methods. Specific strategies for implementing health education for individuals and

groups, coalition building, advocacy and policy change.

Credit Hours: 3

Prerequisite Courses: PBH 234 and PBH 300 with a minimum grade of "C-" in each course.
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only in Community Health Education or Global Health concentrations.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 352 - Intercultural Communication in Global Health

This course will examine basic concepts and principles of effective intercultural communication. This course addresses the concept that culture plays a large role in shaping each individual's health-related values, beliefs, and behaviors, and impacts decision making regarding seeking care and/or treatment. This course will develop students' intercultural communication skills needed to address global health disparities, both in international

and domestic settings.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to Public Health majors with a Global Health concentration.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health; Public Health Studies

PBH 497 - Internship in Public Health

Supervised internship placement in the community. Applies theory to practical application in public health. Requires 120-360 hours of supervised fieldwork, depending on concentration.

Credit Hours: 3 to 9

Corequisite Courses: PBH 496 with a minimum grade of "C-".
Prerequisite Courses: PBH 495 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum

passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; senior standing; 2.5 GPA; and instructor approval.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 9
Major Restriction Public Health; Public Health Studies

Total Credit Hours: 71

Pre-Clinical Concentration Courses (33 Credit Hours)

This concentration prepares students for graduate study in a clinical health area such as medicine, physician assistant, dentistry, physical therapy, etc., while also providing a strong background in public health. To complete a pre-clinical concentration, students must complete the core courses for the public health major, the courses listed below [inclusive of PBH 497 (3 credit hours) in an approved pre-clinical setting], and 8 credits from the Science Electives listed below.

ATR 470 - Medical Terminology for Health Professions

The course is designed for students to build a foundational understanding of medical terminology with appropriate application to pathological conditions of the various body systems. Focus on preparing students to use appropriate medical documentation skills consistent with today's allied health care professions.

Credit Hours: 3

Prerequisite Courses: EXS 216 or BIO 240.
Course Repeatability: Course may not be repeated

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry.

Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

PBH 353 - Patient Communication in Healthcare

This course will examine the complexities of health communication with an applied health professional

focus. Within the course, students will develop communication skills needed to initiate and maintain interpersonal and interprofessional relationships with patients, families, and other providers.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to Public Health majors with a Pre-Clinical concentration.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 497 - Internship in Public Health

Supervised internship placement in the community. Applies theory to practical application in public health. Requires 120-360 hours of supervised fieldwork, depending on concentration.

Credit Hours: 3 to 9

Corequisite Courses: PBH 496 with a minimum grade of "C-".

Prerequisite Courses: PBH 495 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; senior standing; 2.5 GPA; and instructor approval.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 9
Major Restriction Public Health; Public Health Studies

2.5 overall GPA, All PBH core courses, including BIO/L 240 & BIO/L 241 OR EXS/L 216 & EXS/L 217 and PBH prefix courses must be completed at the time of application, Senior standing and permission of instructor.

Science Electives based on career goals: select 8 Credit Hours from the following:

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly

recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for

this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

BIO 246 - Microbiology of Human Diseases

An introduction to and survey of the biology of pathogenic microorganisms responsible for human

infectious diseases including: bacteria, viruses, fungi, single-celled protozoans, and parasitic worms, with an emphasis on transmission, diagnosis, prevention, and clinical management. The lab for this course is BIOL 246.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

and

BIOL 246 - Microbiology of Human Diseases Laboratory

Must be taken after or concurrent with BIO 246 lecture. An introduction to basic microbiological laboratory techniques necessary to isolate, identify, stain, culture, and control microorganisms of interest. Special emphasis is placed upon clinical applications through research and completion of historical and clinical case studies. This course is the lab for BIO 246.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 246.
Course Repeatability: Course may not be repeated.

or

BIO 330 - Microbiology

Study of pathogenic and nonpathogenic microorganisms with emphasis on the biology of bacteria and viruses. The lab for this course is BIOL 330.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

and

BIOL 330 - Microbiology Laboratory

Introduction to basic microbiological laboratory techniques. Experience in laboratory approaches to introduce basic laboratory skills in microbial cultures, staining, biochemical assays, and microorganism identification. This course is the lab for BIO 330. This

course is the lab for BIO 330.

Credit Hours: 2

Prerequisite or Corequisite Courses: BIO 330
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

PHY 101 - Elementary College Physics I

First semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 111 or MAT 112 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

PHY 102 - Elementary College Physics II

Second semester of a two semester algebra-based introduction to the fundamental principles of physics. Topics include electric and magnetic fields, circuits, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite Courses: PHY 101
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 320 - Immunology

Introduction to the molecular, cellular, and anatomical components of the human immune system and their roles in the normal immune response. Explores the mechanisms and consequences of immunodeficiencies, hypersensitivities. autoimmunity, vaccines, immunotherapies, and transplants.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202.
Course Repeatability: Course may not be repeated.

Total Credit Hours: 74

Gerontology Concentration (27 Credit Hours)

This concentration prepares students to work with older adults in a variety of public health settings. To complete a concentration in gerontology, students must complete all core courses for the public health major AND the gerontology concentration courses listed below,

inclusive of PBH 497 in an approved public health setting working with older adults.

HEA 325 - Health and Aging

An introduction to health characteristics of the aging population. Topics include biomedical changes of various body systems and lifestyle factors such as nutrition, stress, drugs, exercise and sexuality. Field experience required.

Credit Hours: 3

Prerequisite Courses: GRN 101
Course Repeatability: Course may not be repeated.

PBH 354 - Aging and Communication

This course explores how communication practices shape the lifelong aging process, focusing on life's middle and later years. The course will focus on the messages, social interactions, relationships, media, and communication technologies that influence the experience of aging. The course examines the intersections of aging and communication processes in intergenerational relationships, families, long-term

marriages, media depictions of aging, communities, healthcare systems, and the workplace. The course will examine normal age-related changes to communication systems. Specifically, it will focus on age-related language, cognition, and social communication changes. Neurological cognitive-communicative disorders (e.g., aphasia, and dementia), which are often associated with aging, will also be discussed. Students will learn theories of aging and communication, read current research, and apply class concepts to improve their understanding of and relationships with older adults. Students will work with a local community agency for the final project. Field hours will be required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3 **Repeat Limit:** 0
Major Restriction Public Health or Gerontology

PBH 300 - Program Planning & Evaluation Methods for Health Promotion

Comprehensive health promotion program planning and evaluation that emphasizes assessment, community engagement, and intervention selection. Specifically, the course will examine health promotion program planning and evaluation models, needs and assets assessments, measurement, instrument development, reliability/validity assessments, measurement error, and process, impact, and outcome evaluation.

Credit Hours: 3

Prerequisite Courses: PBH 234 with a minimum grade of C-.
Additional Restrictions/Requirements: Open to Public Health majors with a Community Health Education or Global Health concentration. Minimum passing grade of "C-" or above required in each PBH course to progress in the program.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PBH 315 - Health Program Implementation

Focus on implementation methods used in community and public health education. An overview of health education methods. Specific strategies for implementing health education for individuals and groups, coalition building, advocacy and policy change.

Credit Hours: 3

Prerequisite Courses: PBH 234 and PBH 300 with a minimum grade of "C-" in each course.
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only in Community Health Education or Global Health concentrations.
Course Repeatability: Course may not be repeated.
Major Restriction Public Health

PSY 324 - Psychology of Aging

A study of the psychological aspects of human aging. Topics include the effects of normal and diseased aging on perceptual and cognitive functioning, personality and social relationships, and physical and emotional health.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 336 - Sociology of Aging

Sociological theories and methods used to explain the aging process. Topics include demography, age stratification, aging and the life course, minority elderly, housing patterns, health, and social policy.

Credit Hours: 3

Prerequisite Courses: SOC 105 or GRN 101
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GRN 440 - Current Issues in Gerontology

Study of current issues and topics in the field of aging from an interdisciplinary and global perspective with participation in a service-learning project.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PBH 497 - Internship in Public Health

Supervised internship placement in the community. Applies theory to practical application in public health. Requires 120-360 hours of supervised fieldwork, depending on concentration.

Credit Hours: 3 to 9

Corequisite Courses: PBH 496 with a minimum grade of "C-".

Prerequisite Courses: PBH 495 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; senior standing; 2.5 GPA; and instructor approval.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 9
Major Restriction Public Health; Public Health Studies

Approved Gerontology Elective Courses:

(Select one course from the list below; other courses may be considered for approval upon request.)

COM 347 - Aging and Communication

Communicative behavior of the elderly within the contexts of friendship networks, health care systems, the work place, and the family. Social forces that influence society's perceptions of the aging communicator.

Credit Hours: 3

Prerequisite Courses: COM 200 with a minimum grade of B
Additional Restrictions/Requirements: Prerequisite course or consent of instructor. Restricted to COM majors.
Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive,

social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 416 - Adult Development and Life Transitions

A course in human development. An exploration of the major normative and nonnormative changes that take place during adulthood. Operating from a lifespan perspective, includes examination of how adults initiate, understand, cope with and resolve life transitions (e.g. parenting, loss, illness, career change, relationships, change.)

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223 or PSY 320 or PSY 324
University Studies: Explorations Beyond the

Classroom
Crosslisting: PSY 516
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 469 - Recreation Therapy in Geriatrics

Emphasis on theories and evidence-based recreation therapy and other nonpharmaceutical treatments for individuals with dementia related illnesses in a variety of settings. Field work required.

Credit Hours: 3

Prerequisite Courses: RTH 375 with a C- or better and GRN 101.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: RTH 569
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 220 - Sociology of Death and Dying

Examination of the sociological dimensions of death in modern society. The social organizational and cultural

dimensions of death will be considered in terms of rites of passage, bureaucratization, social movements, cultural differences, and historical and contemporary contexts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 310 - Social Work with Older Adults

Examines the status of the elderly and specific problems they confront in modern society. Focuses on social agencies and other service resources. Analyzes policies. Major emphases on practice, service settings and special populations.

Credit Hours: 3

Prerequisite Courses: SWK 235 or GRN 101.
Additional Restrictions/Requirements: Students

must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

GRN 422 - Family Health and Aging

Study of family systems theory, paradigms for caregiving, illness and life-stage challenges for caregiving, and the interface between formal caregivers and caregiving families.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 424 - Cultural Representations of Aging

This course includes the study of various representations of aging, including fine art, films, novels, poetry, and more. We will compare and contrast such creative representations of aging with scientific (e.g., scholarly literature) ways of knowing about aging. Through engaging bio-psycho-social-humanities frameworks to explore aging-related phenomena, students will develop a well-rounded understanding of a variety of topics.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 446 - Health Care Access for Older Adults

An introduction to the U.S. health care system with an emphasis on issues related to older adults, including problems of access to health care for the aging population, their families, and communities.

Credit Hours: 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: GRN 546, RTH 546
Course Repeatability: Course may not be repeated.

GRN 486 - Interprofessional Collaboration: Careers in Aging

A theoretical and applied examination of existing professional careers in gerontology and those that might exist in the future.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 491 - Directed Individual Study

Gerontological investigation, under faculty supervision, beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Prerequisite course, overall GPA of at least 2.00, and consent of instructor, gerontology coordinator, and the appropriate dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GRN 495 - Topical Seminar in Gerontology

Discussion of selected topics in Gerontology.

Credit Hours: 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

> Students in the GRN concentration in PBH may be eligible for the B.S. in Public Health / M.S. in Applied Gerontology, Combined Program. For more information visit the Public Health B.S./Applied Gerontology M.S. - Combined Program.

Total Credit Hours: 68

Recreation Therapy, B.A.

Program Coordinator: Brent Hawkins, Ph.D. I Program Coordinator & Associate Professor

(Recreation Therapy, B.A. Details I UNCW)

Graduates in recreation therapy (RT) are trained to utilize recreation activities and other active treatment modalities to increase the functional abilities and quality of life of people of all ages with disabilities and

illnesses, such as cognitive impairments, intellectual and developmental disabilities; behavioral health issues including substance abuse, physical disabilities and diseases; and dementia and other illnesses related to aging. RT complements other allied health professions and therapies to address clients' adjustment to illness and disability and educate them for healthy living. In addition, graduates in RT can pursue graduate degrees in RT or other allied health and human services professions if desired.

The purpose of the baccalaureate program in RT is to prepare graduates who possess the knowledge, skills and competencies to practice RT in healthcare and human service settings and be leaders in the field of RT and healthcare. This preparation places a priority on the development of skills through in- and out-of-class applied learning experiences, practicum, internships, and community engagement. Furthermore, student outcomes emphasize critical thinking and evidence-based practice as means of assisting clients and organizations in reaching their goals and maximizing the quality of life of individuals served. To be eligible to practice RT, graduates must be credentialed as Licensed Recreational Therapists

(LRT) by the North Carolina Board of Recreational Therapy Licensure and Certified Therapeutic Recreation Specialists (CTRS) by the National Council for Therapeutic Recreation Certification (NCTRC). Licensure and certification are obtained by completing a bachelor's degree in RT and receiving a passing score on the NCTRC national certification exam.

Program Admission

All students wishing to major in Recreation Therapy must meet the minimum criteria for admission and follow the Recreation Therapy application procedure which includes timely submission of the Recreation Therapy application packet.

Minimum criteria for acceptance into the program includes:

a.) 2.5 cumulative GPA at UNCW or transfer institution; and

b.)a minimum of 50 hours experience working or volunteering with individuals with disabilities, disabling conditions or illnesses.

Admission Procedure

Completed application packet must be submitted following the instructions on the main webpage of the Recreation Therapy program: https://uncw.edu/chhs/shahs/academic/undergraduate/rectherapy/index.html.

An application packet must include:

- Completed application form
- Two-page essay
- Signed Recreation Therapy Technical Standards, and
- Current degree audit or transcript if student is a transfer student
- Documentation of volunteer/work experience with individuals with disabilities, disabling conditions, or illnesses.
- The admission procedure also requires an interview with a Recreation Therapy faculty member.
- Priority Application Deadlines For Fall admission, Feb. 15th For Spring admission, Sept. 15th

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Recreation Therapy a student must successfully complete RTH 480.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Recreation Therapy a student must successfully complete RTH 348 and RTH 497.

Requirements for the B.A. Degree with a Major in Recreation Therapy:

Complete one of the following sequences:

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXSL 216 - Human Anatomy and Physiology I Laboratory

EXSL 216 is the study of the anatomical and functional characteristics of the human body including the skeletal, muscular, circulatory, and respiratory systems with emphasis on health and physical activity.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 216.
Course Repeatability: Course may not be repeated.

EXS 217 - Human Anatomy and Physiology II

Examines six major organ systems that include the human nervous, endocrine, immune, digestive, urinary and reproductive systems as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 217
Prerequisite Courses: EXS 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

EXSL 217 - Human Anatomy and Physiology II Laboratory

EXSL 217 provides the laboratory experience for EXS 217 via examining the anatomy and physiology of the nervous, endocrine, immune, digestive, urinary and reproductive systems including the special senses and metabolism.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: EXS 217.
Course Repeatability: Course may not be repeated.

OR

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.

All students are required to complete:

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

HFE 350 - Motor Behavior

Motor skill acquisition, control, and performance. Physiological and psychological principles of human growth and development. Includes analysis of the sequential progression of fundamental motor skills from infancy through adulthood with primary focus on school-age children.

Credit Hours: 3

Prerequisite Courses: (BIO 240 with a C- or better and BIOL 240 with a C- or better) or (EXS 216 with a C- or better and EXSL 216 with a C- or better).
Course Repeatability: Course may not be repeated.

or

ATR 220 - Functional and Structural Kinesiology

Prerequisite: BIO 201; Corequisites: BIO 240, BIOL 240 and BIO 241, BIOL 241 or EXS 216, EXSL 216 and EXS 217. This course is designed to provide students with a foundation of structural anatomy and basic kinesiology concepts, with a focus on anatomy of the skelton, muscles, and ligaments in relation to functional human movement.

Credit Hours: 3

Corequisite Courses: BIO 240 and BIOL 240 and BIO 241 and BIOL 241 and EXS 216 and EXSL 216 and EXS 217
Prerequisite Courses: BIO 201
Course Repeatability: Course may not be repeated.

ATR 470 - Medical Terminology for Health Professions

The course is designed for students to build a foundational understanding of medical terminology with

appropriate application to pathological conditions of the various body systems. Focus on preparing students to use appropriate medical documentation skills consistent with today's allied health care professions.

Credit Hours: 3

Prerequisite Courses: EXS 216 or BIO 240.
Course Repeatability: Course may not be repeated

RTH 265 - Introduction to Recreation Therapy

This course is designed to introduce students to the field of recreation therapy. Definitions of recreation therapy, historical and professional development of recreation therapy services, allied disciplines, settings for service delivery, the recreation therapy process, disability etiquette, and populations are covered.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3 **Repeat Limit:** 1
Major Restriction RTH

RTH 348 - Practicum in Recreation Therapy

Supervised practicum in a health care or human service setting providing services to people with disabilities or illnesses. Relates theory to practical application in the field. Requires a minimum of 100 hours field work.

Credit Hours: 3

Prerequisite Courses: RTH 265 with a C- or better.
Additional Restrictions/Requirements: Permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

RTH 368 - Foundations of Recreation Therapy

This course will provide students with an understanding of the foundational elements key to the provision of quality recreation therapy services and overall recreation therapy service delivery. The following concepts will be explored in-depth: scope of service; service delivery models; social psychology theories; theories of play; recreation and leisure; therapeutic

alliance; cultural competency; strengths-approach, and ethics.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 265 with a C - or better.
Additional Restrictions/Requirements: Prerequisite or corequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 370 - Recreation Therapy in Physical Rehabilitation

Etiology, functional and health implications of physically disabling conditions; selection of interventions; safety considerations pertinent to planning and delivery of recreation therapy services.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 368 with a C- or better.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 372 - Recreation Therapy in Behavioral Health

Etiology, functional, and health implications of developmental disabilities; sensory impairments; and conditions related to emotional and behavioral health; selection of recreation therapy interventions; safety considerations pertinent to planning and delivery of recreation therapy services.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 368 with a C- or better.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 375 - Recreation Therapy Processes and Techniques

This course will provide students a comprehensive overview and knowledge of processes and techniques used by recreation therapists to establish and maintain effective therapeutic helping relationships. Theories specific to the helping process, facilitation skills, leadership styles, group dynamics, activity and task analysis, modifications and assistive devices will be covered.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 368 with a C- or better.
Additional Restrictions/Requirements: Corequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 380 - Assessment and Outcome Planning in Recreation Therapy

Role of reliable assessment in the treatment planning process in recreation therapy. Skills in assessment, goal writing and attainment, documentation, and outcome measurement.

Credit Hours: 3

Prerequisite Courses: RTH 265 with a C - or better.
Additional Restrictions/Requirements: Prerequisite or instructor approval
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

RTH 381 - Recreation Therapy TX Modalities I

Emphasis on leadership, group processing, activity adaptation, behavior management, therapeutic communication, social skills, leisure education, and challenge activities. Field work required.

Credit Hours: 3

Prerequisite Courses: RTH 375 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 390 - Pre-Internship Seminar in Recreation Therapy

Preparation for the internship experience with emphasis on development of professional behaviors that facilitate internship and career success in recreation therapy and other allied health professions.

Credit Hours: 1

Prerequisite Courses: RTH 368 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

RTH 391 - Recreation Therapy Internship Finalization

Students (a) become proficient in clinical/professional writing; (b) apply to five or more internship sites; (c) complete internship contracts and affiliation agreements; (d) set professional goals for their clinical experience; and (e) complete required certification trainings and mandatory requirements of the agency (students may incur extra costs for certification trainings).

Credit Hours: 1

Prerequisite Courses: RTH 390 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course and senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

RTH 459 - Research & Evaluation Methods in Recreation Therapy

This course will provide students a basic introduction to research and evaluation methods, including qualitative, quantitative, and mixed methods research designs. Philosophical worldviews, and fundamental principles associated with conducting a literature review, formulating a research proposal, collecting, analyzing, and interpreting data will be covered. Applying research-specific knowledge and skills when implementing the APIE process will also be addressed.

Credit Hours: 3

Prerequisite Courses: RTH 380 with a C- or better.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Crosslisting: RTH 559
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 475 - Leadership and Management in Recreation Therapy

Principles and practices of recreation therapy management, particularly the effective and efficient management of human, fiscal, informational, and physical resources in health care and human services.

Credit Hours: 3

Prerequisite Courses: RTH 380 with a C- or better, RTH 370 with a C- or better, and RTH 372 with a C- or better.
Additional Restrictions/Requirements: Restricted to RTH majors only.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy

Crosslisting: RTH 575
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction RTH

RTH 480 - Senior Seminar in Recreation Therapy

Capstone course in which students utilize theories and methods from previous courses to explore selected topics, issues, and trends related to the recreation therapy profession.

Credit Hours: 3

Prerequisite Courses: RTH 368 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 497 - Field Placement in Recreation Therapy

This is a capstone, applied learning course; students apply APIE process supervised by a certified therapeutic recreation specialist in a healthcare/human service agency utilizing clinical recreation therapy procedures/practices. Minimum 560 hours/14 consecutive weeks of fieldwork and liability insurance required.

Credit Hours: 12

Prerequisite Courses: RTH 391 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course, minimum 2.5 cumulative GPA, 2.5 RTH major GPA, senior standing with a cumulative 3.0 GPA in all RTH courses, agency approval, current certification in CPR/First Aid and Bloodborne Pathogens, and instructor approval.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12

In addition, all students are required to complete at least three of the following treatment modality or intervention courses:

RTH 385 - Recreation Therapy TX Modalities II: Exercise & Movement

Advanced lecture/applied learning providing an in-depth understanding and application of exercise movement treatment modalities used with individuals and groups who have physical, cognitive, and/or behavioral health conditions. Content, process, and evidence-based resources will be addressed. Students will be provided hands-on experiences with planning, implementing, and evaluating each modality.

Credit Hours: 2

Prerequisite Courses: RTH 375 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

RTH 386 - Recreation Therapy TX Modalities III: Expressive Arts

Advanced lecture and applied learning providing an in-depth understanding and application of expressive art treatment modalities used with individuals and groups who have physical, cognitive, and/or behavioral conditions. Content, process, and evidence-based resources will be addressed. Students will be provided hands-on experiences with planning, implementing, and evaluating each modality.

Credit Hours: 2

Prerequisite Courses: RTH 375 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

RTH 387 - Recreation Therapy TX Modalities IV: Stress and Pain Management

Advanced lecture and applied learning providing an in-depth understanding and application of a variety of stress and pain management treatment modalities used with individuals and groups who have physical, cognitive, and/or behavioral health conditions. Content, process, and evidence-based resources will be addressed. Students will be provided hands-on

experiences with planning, implementing, and evaluating a variety of specific techniques.

Credit Hours: 2

Prerequisite Courses: RTH 375 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

RTH 388 - Adaptive Sports

Introduction to community-based and elite-level adaptive sports. Students may be required to volunteer at a local, regional, national, or international adaptive sports event. In addition to experiencing adaptive sports via interactions with athletes and coaches, students will be exposed to programming and event management.

Credit Hours: 2

Prerequisite Courses: RTH 368 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 389 - Recreation Therapy TX Modalities V: Cognitive Retraining

Advanced lecture and applied learning providing an in-depth understanding and application of a variety of cognitive retraining techniques used with individuals and groups who have physical, cognitive, and/or behavioral health conditions. Content, process, and evidence-based resources will be addressed. Students will be provided hands-on experiences with planning, implementing, and evaluating a variety of techniques.

Credit Hours: 2

Prerequisite Courses: RTH 375 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

RTH 393 - Functional Fitness in Recreation Therapy

This course introduces students to community-based recreation therapy programming for individuals with

disabilities residing in group homes or attendng day treatment programs. Students will have an opportunity to plan and facillitate evidence-based interventions for the purpose of increasing participants' physical fitness and quality of life. Students will be exposed to program evaluation utilizing a systematic research process.

Credit Hours: 2

Prerequisite Courses: RTH 375 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2
Additional Course Fees: Medical Liability InsuranceAdditional Course Fee Schedule

RTH 394 - Aquatics in Recreation Therapy

Introduction to the use of aquatic activities as treatment interventions in recreation therapy for a variety of populations and individuals with disabilities and illnesses. Topics may include aquatic therapy, aquatic exercise and/or adapted aquatics. Students are required to have basic swimming skills. Class will be held in a swimming pool and students are required to be in the water.

Credit Hours: 3

Prerequisite Courses: RTH 375 with a C- or better.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 469 - Recreation Therapy in Geriatrics

Emphasis on theories and evidence-based recreation therapy and other nonpharmaceutical treatments for individuals with dementia related illnesses in a variety of settings. Field work required.

Credit Hours: 3

Prerequisite Courses: RTH 375 with a C- or better and GRN 101.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: RTH 569
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 379 - Advanced Assistance Dog Training II

Knowledge of advanced theories of disability and behaviors that influence placement and use of assistance dogs. Students will engage in practical and hands-on experience in the advanced training of assistance dogs; and the training of a assistance dog to work specifically with a potential assistance dog recipient. Students will be responsible for the 24/7 care. Requires participation outside of scheduled class time and UNCW liability insurance.

Credit Hours: 3

Prerequisite Courses: RTH 378 with C- or better
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3 **Repeat Limit:** 2
Additional Course Fees: Additional Fee - Liability Insurance

WPA 220 - Introduction to Yoga Methodology and Techniques

This course provides a foundational study and application pertaining to the study of yoga and its history, literature, philosophy and practice. This course draws from multiple yoga traditions with the emphasis placed on Patanjali's, Yoga Sutras. Students will be taught yoga techniques, teaching methodology, and the practice of asana, pranayama, meditation, and other traditional yoga techniques.

Credit Hours: 3

Prerequisite Courses: WPAL 101.
Additional Restrictions/Requirements: Students must have some yoga experience (>10 hours of practicing yoga).
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 73 hours

Student progression in the program is contingent upon the following:

1. Students must maintain at least a 2.50 RT major GPA, and a 3.0 cumulative GPA in all RTH required student courses.

2. Students found to have been in violation of the university's Academic Honor Code will be subject to disciplinary action as set forth in the current Code of Student Life.
3. Students found to be in violation of the Recreation Therapy Technical Standards will be subject to disciplinary action up to and including dismissal from the program.
4. Students found to be in violation of the American Therapeutic Recreation Association's Code of Ethics will be subject to disciplinary action up to and including dismissal from the program.

Respiratory Therapy B.S.

https://uncw.edu/academics/majors-programs/chhs/respiratory-therapy-bs/details/

Graduates in respiratory therapy (RSP) will be prepared to become highly competent healthcare practitioners who display professional excellence, integrity and skills for life-long learning. Respiratory care requires not only technical expertise, but also humane, empathetic and professional behavior directed towards patient-centered care in an inter-professional healthcare setting. The program prepares graduates

with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) domains of respiratory care practice as performed by registered respiratory therapists (RRT's).

Respiratory therapists are part of an interprofessional health care team that promote the health outcome for patients served in acute care hospitals, diagnostics labs, physician offices and additional health care settings. Respiratory therapists work under the direct supervision of a physician and compliment other allied health professions and therapies to address cardiopulmonary wellness & rehabilitation through education, equipment and expertise. In addition, graduates in respiratory therapy can pursue graduate degrees in respiratory care leadership, education, and clinical residency.

The purpose of the baccalaureate program in respiratory therapy is to prepare students for the scope

of practice in the respiratory therapy profession. In addition, the program is designed to provide a foundation for graduate respiratory therapy education. Through interactions with clients–individual persons, families and communities–and other health care professionals, respiratory therapy graduates will contribute toward meeting the wide-ranging needs of the region, state, and the larger community. The program of study for the Respiratory Therapy as described in this catalogue, is consistent with national accreditation standards outline by CoARC in pursuit of full accreditation.

Student Learning Outcomes

- Demonstrate competencies within the respiratory care scope of practice.
- Safely apply respiratory therapy to a diverse patient population.
- Demonstrate professional behaviors when pursuing a career in respiratory care.
- Appraise information that contributes to evidence-based medicine.

- Value the role of inclusive leadership in addressing disparities in healthcare delivery.
- Collaborate within an interdisciplinary team to provide care for diverse patient populations within a healthcare setting.

In order to be eligible to practice respiratory therapy, graduates must be credentialed by the National Board for Respiratory Care (NBRC) as a Certified Respiratory Therapist (CRT), at a minimum, but be ready to obtain the standard professional credential as a Registered Respiratory Therapist (RRT). Licensure is obtained by applying the earned national credential, CRT or RRT, to a state licensing board. Specialty credentials are offered by the NBRC as a pulmonary function technologist, adult critical care specialist, neonatal/pediatric specialist and sleep disorder specialty.

Program Admission

All students wishing to major in Respiratory Therapy must meet the minimum criteria for admission and follow the Respiratory Therapy application procedure which includes timely submission of the Respiratory

Therapy application packet.

Minimum criteria for acceptance into the program includes:

a) 2.5 cumulative GPA at UNCW or transfer institution; and

b) Completed

- BIO/BIOL 201 and (or equivalent courses with a "C" or higher)
- MAT 111 or STT 215 or STT 210 and (or equivalent courses with a "C" or higher)
- EXS/EXSL 216 or BIO/BIOL 240 (or equivalent courses with a "C" or higher)

Admission Procedure:

Completed application packet must be submitted to chhs@uncw.edu .

Application packet must include:

- Completed application form
- Two-page essay

- Current degree audit or transcript if student is a transfer student

The admission procedure also requires an interview with a Respiratory Therapy faculty member.

Requirements for the B.S. Degree with a Major in Respiratory Therapy

Complete core courses in the following sequence:

Year I - Term 1

RSP 300 - Fundamentals of Respiratory Care

This course introduces the role of the respiratory care practitioner within inter-professional teams and interacting with diverse populations. This course offers a comprehensive introduction to the respiratory care profession and keeps students up to date with the latest advances and trends in professional practice. Topics include medical gas administration, therapeutic devices, basic patient assessment, infection control, and medical terminology using proper written and oral communication methods to prepare students for clinical practice. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 330 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 330 - Respiratory Care Lab 1

This course reinforces understanding of the role of the respiratory care practitioner within interprofessional teams and interactions with diverse patient populations. Activities include medical gas administration, aerosol delivery, respiratory therapeutics, airway management & trach care, introduction to non-invasive ventilation and medical terminology. Learners will practice skills that support a complete patient examination through the assessment of medical records, physical findings, laboratory data, the chest radiograph, and diagnostic and therapeutic interventions. Upon completion,

students should be able to demonstrate competencies necessary to care for patients with cardiopulmonary disease and disorders that affect life functions.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 300 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Nursing Simulation Lab Fee Additional Course Fee Schedule

Major Restriction RSP

RSP 301 - Cardiopulmonary Anatomy and Physiology

This course provides a concentrated study of cardiopulmonary anatomy and physiology essential to the practice of respiratory care. Emphasis is placed on

cardiovascular and pulmonary physiology, acid/base balance, regulation of breathing, oxygen & carbon dioxide transport and blood gas interpretation. Upon completion, students should be able to demonstrate competence in these concepts through written evaluation.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 300 with a C or better, RSP 330 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 302 - Cardiopulmonary Pharmacology

This course covers medications used in the treatment of cardiopulmonary diseases. Emphasis is placed on the uses, actions, indications, administration, and hazards of pharmacological agents. Students will be familiar with up-to-date evidence-based practices and

clinical practice guidelines involving medication use in critical care. Upon completion, students should be able to demonstrate competence through written evaluations.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 300 with a C or better, RSP 330 with a C or better, RSP 301 with a C or better, RSP 303 with a C or better, and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 303 - Patient Assessment

This course introduces the role of the respiratory care practitioner during the patient encounter. Topics will include the stages and spaces utilized to promote a positive encounter and the patient interview that promotes patient safety, integrity, and autonomy. Learners will be introduced to skills that support a complete patient examination through the assessment

of medical records, physical findings, laboratory data, the chest radiograph, diagnostic and therapeutic interventions. Upon completion, students should be able to demonstrate competence in concepts in patient assessment through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 300 with a C or better, RSP 330 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 351 - Clinical Practice I

This course provides supervised entry-level clinical experience via assigned medical facilities. Emphasis is placed on assessment, therapeutic techniques, non-invasive procedures, diagnostics and communication strategies within the scope of practice for respiratory care. Upon completion students should be able to

demonstrate, through required performance evaluations, clinical competence and novice proficiency of patient care in an inter-professional setting.

Credit Hours: 1

Prerequisite or Corequisite Courses: RSP 300 with a C or better, RSP 330 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance Additional Course Fee Schedule

Major Restriction RSP

Year I - Term 2

RSP 304 - Cardiopulmonary Diseases and Diagnostics

This course provides emphasis on diagnostic and therapeutic procedures associated with cardiopulmonary disease. Students will investigate the

cause of cardiopulmonary diseases and the changes to structure & function of the human anatomy. Student will differentiate the etiology, clinical manifestations, pathogenesis, lab data and treatment for acute & chronic cardiopulmonary diseases. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 306 with a C or better and RSP 352 with a C or better.
Prerequisite Courses: RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, RSP 306 with a C or better, and RSP 352 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 306 - Introduction to Mechanical Ventilation

This course provides students an introduction of acute patient care and managing a critically ill patients on ventilators. Students will explore the indications, contraindications and hazards of invasive and non-invasive ventilation. Emphasis on the review of current approaches to ventilator management, monitoring techniques, graphics and weaning strategies. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures in the intensive care unit through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 304 with a C or better and RSP 352 with a C or better.
Prerequisite Courses: RSP 300 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, RSP 304 with a C or better, and RSP 352 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 309 - Respiratory Care Lab II

This course reinforces patient care skills using mechanical ventilation in a critical care setting. Topics include introductions in the application and management of mechanical ventilation, assessment of underlying pathophysiology, and use of critical care monitoring, cardiovascular & hemodynamic monitoring, diagnostic imaging, laboratory values, diseases in the intensive care unit, pharmacology, and nutrition. This course includes advanced information gathering and decision-making for respiratory care professionals. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and critical care procedures through laboratory and simulated evaluations.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, and RSP 352 with a C or better.
Prerequisite Courses: RSP 300 with a C or better, RSP 301 with a C or better, RSP 302 with a C or better, RSP 303 with a C or better, RSP 330 with a C or better,

and RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Nursing Simulation Lab FeeAdditional Course Fee Schedule

Major Restriction RSP

RSP 410 - Ethical Dilemmas in Healthcare

This course provides and introduction to ethical dilemmas for health care professionals from a legal framework. Topics will include strategies on how to recognize the legal and ethical issues that health care professionals face. Topics are based upon real-world scenarios and dilemmas from a variety of health care practitioners. Upon completion, students should be able to demonstrate competence in ethical and legal concepts through written evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 351 with a C or better.
Additional Restrictions/Requirements: Restricted to

RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

CHHS 411 - Research & Evaluation Methods in Human Services

This course introduces research design and analysis necessary to examine, apply, and utilize science in interdisciplinary human service settings. Course content includes an overview of current issues in knowledge development including the process of research utilization and evidence based practice. The student will conduct analytic critiques of the research literature for scientific merit, synthesize these critiques for application to practice, and develop strategies for providing leadership to make evidence based practice a reality in current and future work settings.

Credit Hours: 3

Prerequisite or Corequisite Courses: SWK 496 with a C or better
Prerequisite Courses: (SWK 321 with a C or better and SWK 496 with a C or better), or EXS 210

with a C or better, or RTH 380 with a C or better, or RSP 300 with a C or better.
Additional Restrictions/Requirements: All prerequisite courses must have a minimum grade of "C" or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may not be repeated.

RSP 352 - Clinical Practice II

This course provides continued supervised clinical experience via assigned rotations at medical facilities. Emphasis is placed on assessment, therapeutic techniques, invasive procedures, diagnostics and communication strategies within the scope of practice for respiratory care. Upon completion, students should be able to demonstrate clinical competence in bedside patient care in an interprofessional setting. Students will be evaluated through required performance evaluations that demonstrate appropriate levels of clinical knowledge in the respiratory therapy program.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 304 with a C or better and RSP 306 with a C or better.
Prerequisite Courses: RSP 351 with a C or better, RSP 304 with a C or better, and RSP 306 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability InsuranceAdditional Course Fee Schedule

Major Restriction RSP

Year II - Term 3

RSP 402 - Advanced Techniques in Mechanical Ventilation

This course reinforces techniques to manage the critically ill patient through an understanding of underlying pathophysiology. Topics include a continuation in the application and management of mechanical ventilation, specialty modes of mechanical ventilation, and techniques related to difficult adult, pediatric and neonatal patients. Techniques related to

adjunct therapies and treatments will include the use of ECMO, medical gases, esophageal balloons, prone positioning and recruitment maneuvers. Upon completion, students should be able to demonstrate competence in advanced respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, and RSP 353 with a C or better.
Prerequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, RSP 352 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 307 - Advanced Critical Care Management

This course introduces advanced methods of information gathering and decision making for the respiratory care professional. Topics include, cardiovascular & hemodynamic monitoring, special procedures, diagnostic & procedural imaging, laboratory values, disease management in the intensive care unit, pharmacology and nutrition. Upon completion, students should be able to evaluate, design, and recommend appropriate care plans through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 402 with a C or better, RSP 308 with a C or better, RSP 309 with a C or better, and RSP 353 with a C or better.
Prerequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, RSP 352 with a C or better, RSP 402 with a C or better, RSP 308 with a C or better, RSP 309 with a C or better, and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.

Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 313 - Critical Care Pharmacology

This course covers medications used in the treatment of conditions or disorders used in a critical care setting. Emphasis is placed on the uses, actions, indications, administration, and hazards of pharmacological agents. Students will familiarize themselves with updated clinical practice guidelines and evidence-based practice recommendations. Upon completion, students should be able to demonstrate competence through written evaluations.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, RSP 309 with a C or better, RSP 352 with a C or better, RSP 402 with a C or better, RSP 307 with a C or better, RSP 308 with a C or better, RSP 353 with a C or better.
Additional Restrictions/Requirements: RSP majors only

Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 308 - Neonatal-Pediatric Respiratory Care

This course provides in-depth coverage of the concepts of neonatal and pediatric respiratory care. Emphasis is placed on neonatal & pediatric pathophysiology and on the special therapeutic needs of these populations. Upon completion, students will be able to demonstrate competence in these concepts through exams, written and laboratory evaluations.

Credit Hours: 1 to 3

Prerequisite or Corequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, and RSP 353 with a C or better.
Prerequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, RSP 352 with a C or better, RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.

Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 401 - Evidence-Based Practice in Respiratory Care

This course introduces concepts of evidence-based practice in respiratory care. Learners will be able to recognize the hierarchy of evidence and recognize different types of designs used in medical research. Learners will review medical research to identify evidence for current or new standards. Learners will develop a plan to collect and present data for the respiratory therapy capstone course. Upon completion, students should be able to demonstrate how to utilize clinical expertise, unique patient characteristics and best evidence to recognize evidence-based practice.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, and RSP 353 with a C or better.
Prerequisite Courses: CHHS 411 with a C or better,

RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 353 - Clinical Practice III

This course provides a supervised clinical experience on the critical care unit of acute care hospitals and an introduction to critical care medicine and mechanical ventilation. Emphasis is placed on assessment, therapeutic techniques, invasive procedures, diagnostics and communication strategies for patients on mechanical ventilation within the scope of practice for respiratory care. Upon completion, students should be able to demonstrate how to provide ventilatory support for critically ill patients in an interprofessional setting while showing compassion and teamwork.

Credit Hours: 2

Prerequisite or Corequisite Courses: RSP 402 with a

C or better, RSP 307 with a C or better, RSP 309 with a C or better, and RSP 308 with a C or better.
Prerequisite Courses: RSP 304 with a C or better, RSP 306 with a C or better, RSP 352 with a C or better, RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, and RSP 308 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance Additional Course Fee Schedule

Major Restriction RSP

Year II - Term 4

RSP 412 - Cardiopulmonary Rehabilitation and Long-Term Care

This course focusses on the role of the respiratory care practitioners within interprofessional teams promoting cardiopulmonary wellness. This course provides an in-depth study of cardiopulmonary rehabilitation and alternatives to hospital care. Emphasis is placed on the procedures and technologies applied to

cardiopulmonary rehabilitation, patient education, and alternatives within respiratory care practice. Upon completion, students should be able to design appropriate respiratory care plans for the home and extended care environments.

Credit Hours: 2 or 3

Prerequisite or Corequisite Courses: RSP 403 with a C or better, RSP 470 with a C or better, RSP 320 with a C or better, and RSP 454 with a C or better.
Prerequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 403 - Healthcare Management and Leadership

This course will provide an overview of leadership qualities, and the impact leadership can have on the

profession of respiratory care. The student will develop an understanding of the administrative and financial aspects of healthcare management. The student will be introduced to concepts related to strategic planning and healthcare marketing. The student will be introduced to concepts related to managing costs and revenues associated with department management. The student will also learn about human resources, legal, and policy concepts related to outpatient, inpatient, public, and private sectors. Upon completion, the student will demonstrate competence on the internal and external concepts that healthcare leaders and administrators face through written evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 410 with a C or better and RSP 353 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 470 - Capstone Project

This is the capstone course for the Respiratory Therapy Program and each student will develop and present a final project, which includes a research paper, poster, and community presentation. Students will identify and complete the projects by applying knowledge and skills learned in the program. Students will demonstrate how to utilize clinical expertise, unique patient characteristics and best evidence to recognize evidence-based practice.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 412 with a C or better, RSP 403 with a C or better, RSP 320 with a C or better, and RSP 454 with a C or better.
Prerequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, RSP 353 with a C or better, RSP 412 with a C or better, RSP 403 with a C or better, RSP 320 with a C or better, and RSP 454 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 320 - Exam and Career Preparation

This course provides preparation and reflection on the scope of practice for respiratory therapy students entering the profession. Emphasis will be placed on competencies listed in the content matrix for both the Therapist Multiple Choice examination (TMC) and Clinical Simulation Examination (CSE). Upon completion, students will develop a portfolio of goals to include professional and academic credentials along with a short- and long-term career plan.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 412 with a C or better, RSP 403 with a C or better, RSP 470 with a C or better, and RSP 454 with a C or better.
Prerequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 309 with a C or better, RSP 308 with a C or better, RSP 353 with a C or better, RSP 412 with a C or better, RSP 403 with a C or better,

RSP 470 with a C or better, and RSP 454 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 454 - Clinical Practice IV

This course provides a supervised clinical experience on the critical care unit of acute care hospitals for adult, pediatric and neonatal patients. Emphasis is placed on assessment, therapeutic techniques, invasive procedures, diagnostics, and communication strategies for patients on mechanical ventilation within the scope of practice for respiratory care. Students will explore the use of adjunct devices and therapies in critical care with a focus on hemodynamic monitoring and instruments. Student rotations may extend to primary care facilities and pulmonary rehabilitation clinics. Upon completion, students should be able to demonstrate how to provide ventilatory support for critically ill patients in an interprofessional setting while showing compassion and teamwork.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 412 with a C or better, RSP 403 with a C or better, RSP 470 with a C or better, and RSP 320 with a C or better.
Prerequisite Courses: RSP 402 with a C or better, RSP 307 with a C or better, RSP 308 with a C or better, RSP 309 with a C or better, RSP 353 with a C or better, RSP 412 with a C or better, RSP 403 with a C or better, RSP 470 with a C or better, and RSP 320 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance Additional Course Fee Schedule

Major Restriction RSP

Total Credit Hours: 60

Student progression in the program is contingent upon the following:

1. Students must maintain at least a 2.50 overall GPA and a minimum grade of "C" (2.00) in all core courses.

2. Students found to have been in violation of the university's Academic Honor Code will be subject to disciplinary action as set forth in the current Code of Student Life.

3. Students found to be in violation of the Respiratory Therapy Program Policies outlined in the Student Handbook will be subject to disciplinary action up to and including dismissal from the program.

4. Students found to be in violation of the American Association for Respiratory Care's Statement of Ethics and Professional Conduct will be subject to disciplinary action up to and including dismissal from the program.

Because many of the required courses are sequential and have prerequisites, it is vital for students to complete them successfully in the proper sequence. In addition to University Studies requirements and Respiratory Therapy requirements, students must take elective courses to satisfy the university requirement of a minimum of 120 hours.

Respiratory Therapy, B.S. Degree Advancement

Student Learning Outcomes

- Appraise information that contributes to evidence-based medicine.
- Value the role of inclusive leadership in addressing disparities in healthcare delivery.
- Collaborate within an interdisciplinary team to provide care for diverse patient populations within a healthcare setting.

Program Admission

All students wishing to major in Respiratory Therapy must meet the minimum criteria for admission and follow the Respiratory Therapy application procedure which includes timely submission of the Respiratory Therapy application packet.

Minimum criteria for acceptance into the program includes:

- Meet UNCW's transfer eligibility requirements
- Produce official transcripts from all post-secondary work

- Earned an associate degree from a CoARC-accredited respiratory therapy program
- Proof of current NBRC RRT credential and be in good standing
- Proof of current and valid respiratory care practitioner state license
- Proof of current BLS/CPR for health care providers certification

Requirements for the B.S. Degree with a Major in Respiratory Therapy

Complete Core Courses:

RSP 324 - Disease Management for Respiratory Therapists

This course provides practicing clinicians a foundation that augments their skills to enable them to competently perform the duties of a pulmonary disease manager. The emerging role of disease managers, among the respiratory therapy profession, is to enhance the quality of life of the patient with chronic disease. Emphasis is place on essential knowledge of pulmonary diseases, case management, care transition coordination, and elements of behavior for health

promotion. Upon completion, students should be able to demonstrate competence though written evaluations.

Additional Restrictions/Requirements: Restricted to RSP majors only.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 422 - Advanced Critical Care Respiratory Therapy

This course provides further refinement of acute patient care and underlying pathophysiology. Topics include a continuation in the application and management of mechanical ventilation, specialty modes of mechanical ventilation, and techniques related to complex diseases. Techniques related to adjunct therapies and treatments will include the use of ECMO, nitric oxide, prone positioning and recruitment maneuvers. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 425 - Advanced Cardiovascular Pathophysiology

This course identifies the structure and function of the cardiac pump and cardiovascular system's role in hemodynamics. Emphasis is placed on clinical signs and symptoms of pulmonary disease and respective treatments, protocols and evidence-based practice used in a local context by learners. Upon completion, students should be able to demonstrate competency in these concepts through written evaluation.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.

Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 420 - Health Law and Ethics

This course provides and introduction to health law and ethical dilemmas through a series of case studies. Topics will include strategies on how to recognize the legal and ethical issues that health care professionals face. Topics are based upon real-world scenarios from a variety of health care practitioners. Upon completion, students should be able to demonstrate competence in concepts on health law and ethics through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 426 - Advanced Pulmonary Pathophysiology

This course identifies the and physiology of the pulmonary system and microcirculation of the lungs. We will review the pulmonary system and pathophysiology associated with lung disease. Emphasis is placed on clinical signs and symptoms of pulmonary disease and respective treatments, protocols and evidence-based practice used in a local context by learners. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 424 - Advanced Cardiopulmonary Pharmacology

This course covers the drugs used in the treatment of cardiopulmonary diseases. Emphasis is placed on the efficacious practice of cardiopulmonary medications, that include, indications, administration, and hazards of pharmacological agents. Upon completion, students should be able to demonstrate competence though written evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 427 - Advanced Renal and Endocrine Pathophysiology

This course identifies the and physiology of the renal and endocrine systems. We will review the pathophysiology associated with these systems and their impact on the cardiopulmonary system. Emphasis is placed on clinical signs and symptoms of renal and endocrine diseases and respective treatments,

protocols and evidence-based practice used in a local context by learners. Upon completion, students should be able to demonstrate competence in respiratory therapy concepts and procedures through written evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

EXS 310 - Research Methods in Exercise Science

Methods of research in the field of exercise science. Identification of research problems, sampling methods, data analysis and interpretation, and planning of evaluation studies.

Credit Hours: 3

Prerequisite Courses: EXS 210 with a "C" or better or

RSP 324
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

RSP 423 - Healthcare Policy and Administration

This course introduces healthcare concepts, using a case study approach, of Healthcare Policy and Administration in the healthcare industry. Topics include the role of healthcare management in a delivery system, contrasting management & leadership, organizational behaviors, strategic planning, quality improvement, information technology and finance. Upon completion, the student will demonstrate competence on the internal and external factors that healthcare managers and administrators face through written evaluations.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to

RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 428 - Neonatal-Pediatric Critical Care Pathophysiology

This course provides in-depth coverage of the concepts of neonatal and pediatric respiratory care. Emphasis is placed on neonatal and pediatric pathophysiology and on the special therapeutic needs of neonates and children in the intensive care unit. Upon completion, students will be able to demonstrate competence in these concepts through exams, written and laboratory evaluations.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 432 - Subacute Care and Telemedicine in Respiratory Therapy

This course focusses on the role of the respiratory care practitioners within interprofessional teams promoting cardiopulmonary wellness. This course provides an in-depth study of cardiopulmonary rehabilitation and alternatives to hospital care. Emphasis is placed on the procedures and technologies applied to cardiopulmonary rehabilitation, patient education, and alternatives within respiratory care practice. Upon completion, students should be able to design appropriate respiratory care plans for the home and extended care environments.

Credit Hours: 3

Prerequisite Courses: RSP 324 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Major Restriction RSP

RSP 421 - Information Literacy in Respiratory Care

This course introduces concepts of evidence-based practice in respiratory care. Learners will be able to recognize the hierarchy of evidence and recognize different types of designs used in medical research. Learners will review medical research to identify evidence for current or new standards. Learners will develop a plan to collect and present data for the respiratory therapy capstone course. Upon completion, students should be able to demonstrate how to utilize clinical expertise, unique patient characteristics and best evidence to recognize evidence-based practice.

Credit Hours: 3

Prerequisite or Corequisite Courses: RSP 324 with a C or better, RSP 422 with a C or better, RSP 420 with a C or better, RSP 425 with a C or better, RSP 423 with a C or better, RSP 426 with a C or better, RSP 427 with a C or better, EXS 310 with a C or better, RSP 428 with a C or better, RSP 424 with a C or better.
Additional Restrictions/Requirements: Restricted to RSP majors only.
University Studies: Building Competencies/Information Literacy, Building

Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction RSP

Total Credit Hours: 36

Complete courses:

- Transfer up to 64 credits from associate degree
- Credit by examination for Registered Respiratory Therapist (RRT) credential at 34 elective credits
- Satisfy University Studies/Electives requirements

Student progression in the program is contingent upon the following:

1. Students must maintain at least a 2.00 overall GPA.

2. Students found to have been in violation of the university's Academic Honor Code will be subject to disciplinary action as set forth in the current Code of Student Life.

3. Students found to be in violation of the Respiratory Therapy Program Policies outlined in the Student Handbook will be subject to disciplinary action up to and including dismissal from the program.

4. Students found to be in violation of the American Association for Respiratory Care's Statement of Ethics and Professional Conduct will be subject to disciplinary action up to and including dismissal from the program.

Because many of the required courses are sequential and have prerequisites, it is vital for students to complete them successfully in the proper sequence. In addition to university studies requirements and Respiratory Therapy requirements, students must take elective courses to satisfy the university requirement of a minimum of 120 hours.

Social Work, B.S.W.

Program Coordinator: Kathryn Thiel | Interim Program Coordinator & Lecturer

(Bachelor of Social Work | UNCW)

The Bachelor of Social Work (BSW) degree:

- provides an undergraduate educational program well-grounded in the profession of social work as represented by the Council on Social Work Education;

- responds to the need for professionally-trained social workers in human and social services in the state and region, and;
- creates an academically sound professional educational process consistent with the larger purposes and mission of UNCW.

BSW degree graduates are employed by departments of social services, school systems, medical facilities, nursing homes, and many other human services agencies. They work with children, families, and community groups to enhance personal and interpersonal functioning.

The UNCW BSW Program follows a 'generalist' model of social work education, with an emphasis on the 'strengths-perspective' of social work practice. This means that UNCW BSW students obtain a well-rounded social work education in all areas of BSW-level practice, with a specialized knowledge of strengths-perspective, which honors client resiliency.

Computer Requirement:

To satisfy the computer requirement for the B.S.W. degree a student must successfully complete SWK 496 or SWK 497.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.S.W. degree a student must successfully complete SWK 321.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.S.W. degree in social work a student must successfully complete each of the following: SWK 235, SWK 320, SWK 321, SWK 396, SWK 496 and SWK 497.

Requirements for a Major in Social Work for the B.S.W. Degree:

SWK 235 - Introduction to Social Work and the Social Welfare System

Social welfare institution and the social work profession in the United States; the values, methods and roles of social workers and the history of the system.

Credit Hours: 3

Additional Restrictions/Requirements: Students

must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SWK 240 - Basic Working Relationship Skills

Multi-cultural working relationship skills for generalist practice, building client-directed partnerships, interviewing, and transitioning from services using a strengths-based and solution-focused perspective. Process recordings, case assessments, social work ethics, values and diversity are covered. The lab for this course is SWKL 240.

Credit Hours: 3

Corequisite Courses: SWKL 240 and SWK 320 and SWK 355.
Prerequisite Courses: Prerequisite or corequisite: SWK 235.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site.

Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWKL 240 - Working Relationship Lab

Students will practice the basic working relationship interviewing skills, and engage in a service-learning project. This course is the lab for SWK 240.

Credit Hours: 1

Corequisite Courses: SWK 240 and SWK 320 and SWK 355, each with a grade of 'C' or better.
Prerequisite or Corequisite Courses: SWK 235 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site.
Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 320 - Human Behavior and the Social Environment I

Perspectives on human development and behavior in diverse contexts, including: culture, oppression, poverty, gender, ethnicity, physical and social settings. Implications for social work practice and policies. Prenatal Through Adolescence.

Credit Hours: 3

Corequisite Courses: SWK 240 and SWK 355, and SWKL 240, each with a grade of 'C' or better.
Prerequisite or Corequisite Courses: SWK 235 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

SWK 321 - Human Behavior and the Social Environment II

Perspectives on human development and behavior in diverse contexts, including: culture, oppression,

poverty, gender, ethnicity, physical and social settings. Implications for social work practice and policies. Young Adulthood Through Death.

Credit Hours: 3

Corequisite Courses: SWK 396 and SWK 443, each with a grade of 'C' or better.
Prerequisite Courses: SWK 320 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

SWK 335 - Social Welfare Policies

Social, cultural, economic, and political influences on the social welfare system. Policymaking, program development and planning.

Credit Hours: 3

Corequisite Courses: SWK 396.
Prerequisite Courses: SWK 235 and PLS 101.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Building Competencies/Information Literacy, Writing Intensive
Course Repeatability: Course may not be repeated.

SWK 341 - Generalist Social Work Practice with Individuals and Families

Client-directed strengths-based and solution-focused generalist practice with individuals and families. Assessments, progress notes, case management, working with mandated clients, crisis and trauma work covered.

Credit Hours: 3

Corequisite Courses: SWK 407 and SWK 497.

Prerequisite Courses: SWK 240 and SWKL 240 and SWK 442 and SWK 443.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 355 - Issues in Diversity for Generalist Practice

Values, biases, and prejudices which produce personal and social vulnerability. Consequences in the lives of people of color, women, the poor, gays and lesbians, and others.

Credit Hours: 3

Corequisite Courses: SWK 240 and SWKL 240 and SWK 320, each with a grade of 'C' or better.
Prerequisite or Corequisite Courses: SWK 235 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course

in order to progress in the program.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

SWK 396 - Pre-Field Seminar

Explore professional expectations of field education, including ethical standards of the NASW Code of Ethics. Preparation of a resume, identification of the student's learning style, and exploration of diverse agencies and fields of practice.

Credit Hours: 1

Corequisite Courses: SWK 321 and SWK 355 and SWK 443.
Prerequisite Courses: SWK 235 and SWK 240 and SWK 320.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 406 - Research Methods for Social Work Practice I

Research methodologies in social work practice; client-centered research questions, theoretical frameworks, research design sampling, data collection, analysis and report writing.

Credit Hours: 3

Corequisite Courses: SWK 496.
Prerequisite Courses: SWK 321.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Or

CHHS 411 - Research & Evaluation Methods in Human Services

This course introduces research design and analysis necessary to examine, apply, and utilize science in interdisciplinary human service settings. Course content includes an overview of current issues in knowledge development including the process of research utilization and evidence based practice. The student will conduct analytic critiques of the research literature for scientific merit, synthesize these critiques for application to practice, and develop strategies for providing leadership to make evidence based practice a reality in current and future work settings.

Credit Hours: 3

Prerequisite or Corequisite Courses: SWK 496 with a C or better
Prerequisite Courses: (SWK 321 with a C or better and SWK 496 with a C or better), or EXS 210 with a C or better, or RTH 380 with a C or better, or RSP 300 with a C or better.
Additional Restrictions/Requirements: All prerequisite courses must have a minimum grade of "C" or better.
University Studies: Building Competencies/Writing

Intensive, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may not be repeated.

SWK 407 - Statistics and Research Methods for Social Work Practice

Program/Practice Evaluation: group and single-subject designs, applications, data analysis, and ethical considerations.

Credit Hours: 3

Corequisite Courses: SWK 497.
Prerequisite Courses: SWK 406 or CHHS 411.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.

SWK 442 - Generalist Social Work Practice with Groups

Basic group typology and dynamics applied to task and treatment groups in generalist social work practice. Client-directed strengths-based skills for a range of

treatment and task groups.

Credit Hours: 3

Corequisite Courses: SWK 496.
Prerequisite Courses: SWK 443.
Additional Restrictions/Requirements: Restricted to BSW majors, main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 443 - Social Work Practice with Communities and Organizations

Knowledge, values, and skills common to social work practice at the community and organizational levels. Principles of social planning, community development, and social action. Topics include needs assessment, program planning and development, organizational change and program evaluation.

Credit Hours: 3

Corequisite Courses: SWK 321 and SWK 396.

Prerequisite Courses: SWK 240 and SWK 320.
Additional Restrictions/Requirements: Restricted to BSW majors, main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 496 - Field Practicum I

Development and application of skills used in social work practice. Supervision of student field experience in a community social service setting. Analysis and discussion of field experiences in a series of field seminars to be arranged by the field liaison.

Credit Hours: 6

Corequisite Courses: SWK 406 or CHHS 411 and SWK 442.
Prerequisite Courses: SWK 396 and SWK 321 and SWK 443 and SWK 355.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Consent of instructor, and 2.5 overall GPA.Students must earn a "C" or better in each SWK course in order

to progress in the program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

SWK 497 - Field Practicum II

Development and application of skills used in social work practice. Supervision of student field experience in a community social service setting. Analysis and discussion of field experiences in a series of field seminars to be arranged by the field liaison.

Credit Hours: 6

Corequisite Courses: SWK 407 and SWK 321.
Prerequisite Courses: SWK 496 and SWK 396 and SWK 321 and SWK 443 and SWK 355.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Consent of instructor and 2.5 overall GPA. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may not be repeated.

And one of the following SWK electives:

SWK 310 - Social Work with Older Adults

Examines the status of the elderly and specific problems they confront in modern society. Focuses on social agencies and other service resources. Analyzes policies. Major emphases on practice, service settings and special populations.

Credit Hours: 3

Prerequisite Courses: SWK 235 or GRN 101.
Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 311 - Child Abuse and Neglect

Study of the knowledge base, laws, and professional roles associated with contemporary child welfare practice. Identification of child maltreatment, reporting procedures and community-based interdisciplinary

practice issues are emphasized. Upon acceptance to the NC Child Welfare Education Collaborative, students must complete both SWK 311 and SWK 312 before admission to a DSS field placement.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 318 - Social Work and Health Care Delivery

An examination of the rationale, issues, problems and practices related to the implementation of client-centered health care. New programs and proposals for the delivery of health services will be reviewed systematically with reference to the implications for social work practice.

Credit Hours: 3

Prerequisite Courses: SWK 235.

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 366 - Introduction to Substance Use Disorders and Addictions

Introduction to the dilemma of substance use disorders and addictions, an overview of habit-forming substances, as well as strengthening student awareness of signs and symptoms present when initiating work with individuals dealing with substance abuse and addictions.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
Crosslisting: SWK 566
Course Repeatability: Course may not be repeated.

SWK 418 - Social Work Practice in the School Environment

Examines legislation shaping contemporary public education and school social work services in North Carolina. Emphasis on strengths-based, solution-focused social work intervention across the spectrum of social, emotional, and behavioral needs of students to enhance school performance. This course and a field placement in a school setting are required for NC School Social Work Certification.

Credit Hours: 3

Corequisite Courses: SWK 496.
Additional Restrictions/Requirements: Corequisite course, or consent of instructor. Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 425 - Mindfulness: Implications for Personal Wellbeing and Professional Practice

Elective course open to all majors and designed to acquaint students with the concept of mindfulness, its connection to personal wellbeing,and its relevance to future professional practice.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Crosslisting: SWK 525
Course Repeatability: Course may not be repeated.

SWK 450 - The Culture of Military Life and Entering the War Zone

Understanding the fundamental culture of military life and training and the experience of troops entering the war zone: norms, language, rank, military justice, and family life. Using the concept of 'battle mind' the course will cover the requirements of troop preparation for combat and their entering the war zone. Preparation for social work students to be able to work with veterans, active military and their families.

Credit Hours: 3

Prerequisite Courses: SWK 235.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor. Students must earn a "C" or better in each SWK course in order to progress in the program.
Crosslisting: SWK 550
Course Repeatability: Course may not be repeated.

SWK 451 - Returning from the War Zone: Consequences, PTSD, Traumatic Injury, Interventions and Preventative Me

Students will learn the potential consequences for troops returning home to state side military life and family life: Confronting stress, trauma, depression, anxiety, addiction, anger, panic reactions, PTSD resulting from war zone service. Methods of prevention and intervention will be covered.

Credit Hours: 3

Prerequisite Courses: SWK 450.
Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Crosslisting: SWK 551
Course Repeatability: Course may not be repeated.

SWK 460 - Grant Writing for Human Services

Study and development of grant writing skills for human service workers. Course discusses development of needs assessment, goal setting, program design, evaluation, budgeting and securing funding sources.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

SWK 495 - Topical Seminar

Discussion of selected topics in social work. May be repeated under a different subtitle.

Credit Hours: 1 To 3

Prerequisite Courses: SOC 105 and SWK 235.
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. Students must earn a "C" or better in each SWK course in order to progress

in the program.
Course Repeatability: Course may be repeated.

Additional courses required:

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

Or

BIO 160 - Genetics in Human Affairs

Discussion of basic principles of genetics (for non-majors or majors) with the ultimate goal of developing an understanding of the relationship of genetics to the society of today and its possible influence on the future of humans. Survey of current knowledge of the inheritance of human traits is included.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

Total: 63 hours

Additional Information:

Students enrolled in the North Carolina Child Welfare Education Collaborative must complete SWK 311 and SWK 312 prior to entering a field placement in the Department of Social Service. Students wishing to obtain North Carolina School Social Worker certification must complete SWK 418 prior to the second semester field placement.

Students are required to earn a grade of "C" or better in all required social work courses designated by SWK. Students must maintain an overall grade point average of 2.50 to be admitted into the field placement (SWK 496 and SWK 497) required in their senior year for the B.S.W. degree.

Sociology, B.A.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Sociology a student must successfully complete SOC 301 (CRM 301).

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Sociology a student must successfully complete SOC 495, SOC 496 or SOC 499.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Sociology a student must successfully complete one of the following: SOC 256 (CRM 256), SOC 300 (CRM 300), SOC 301 (CRM 301), SOC 360, SOC 391, SOC 495, or SOC 496.

Requirements for a Major in Sociology for the B.A. Degree:

Core requirements:

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 300 - Methods of Social Research

Introduction to logic and methods of sociological research. Topics include connections between theory and research, problem formulation and research design, conceptualization and measurement, sampling modes of observation and analysis, ethical issues, and the political context of research.

Credit Hours: 3

Prerequisite or Corequisite Courses: STT 215 or MAT 101 or higher (excluding MAT 141 or MAT 142).
Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Prerequisite courses or higher (excluding MAT 141 and MAT 142), or a score of 4 or higher on the UNCW math placement

test.
University Studies: Building Competencies/Information Literacy
Crosslisting: CRM 300
Course Repeatability: Course may not be repeated.
Major Restriction Sociology or Criminology**Minor Restriction** Sociology or Criminology

SOC 301 - Sociological Data Analysis and Interpretation

Instruction in computer-assisted univariate and bivariate analysis and interpretation of social science data.

Credit Hours: 3

Prerequisite Courses: CRM 105 or SOC 105, and CRM 300 or SOC 300, STT 215 or MAT 101 or higher (excluding MAT 141, MAT 142)
University Studies: Common Requirements/Critical Reasoning
Crosslisting: CRM 301
Course Repeatability: Course may not be repeated.

SOC 360 - Social Theory

An introduction to major theoretical perspectives in sociology including functional theory; conflict theory; exchange theory; interactionist theory; and structural theory.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and six additional hours in sociology.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

- In addition, all sociology majors must take a senior capstone course. (See options below).
  An overall average of "C" (2.00) or better must be maintained in all sociology courses used to satisfy the major. Students must receive a "C" or higher in all of their core sociology courses. Students may only receive one "D" in their sociology electives.

Option 1. General Sociology:

This option enables students to further their understanding and appreciation of sociology. It allows students to take courses in a broad range of sociology

topics. This option is recommended for students who plan to attend graduate or professional school. In addition to the required core courses, students must complete:

SOC 495 - Sociology Senior Seminar

A topical seminar in which students apply the sociological theory and methods they have learned as a major to a collaborative research project and paper. Required oral presentations fulfill the oral competency requirement. The seminar is the capstone course for sociology majors.

Credit Hours: 3

Prerequisite Courses: SOC 301 and SOC 360
Additional Restrictions/Requirements: Senior standing.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 499 - Honors Work in Sociology

Independent work for honors students in which students apply sociological theory and methods to a major research project and paper that is then presented orally before an examining committee. Honors work is typically completed in two 3 credit hour semesters. **This course serves as an alternative to the SOC 490 capstone requirement for sociology general track majors. Satisfies College of Arts and Sciences oral communication requirement.**

Credit Hours: 2 To 3

Prerequisite Courses: SOC 301 and SOC 360
Additional Restrictions/Requirements: Junior or senior standing, prerequisite courses, and eligibility for honors program.
University Studies: Writing Intensive, Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

- 24 additional hours of sociology course electives;
- A maximum of 9 hours below the 300 level (including SOC 105) may be used to satisfy the above requirements.

Total: 39 hours

Option 2. Public Sociology:

This option provides intensive training in using sociology to inform real life social issues and opportunities to conduct quality, meaningful research that has an impact on the community. In addition to the required core courses, students must complete:

SOC 391 - Public and Applied Sociology and Criminology Seminar

Application of sociological tools to real-life issues in a variety of social settings. Methods may include surveys, interviews, focus groups, secondary data analysis, and evaluation applications. Development of proposals for research projects conducted in a second, sequenced course in the following semester.

Credit Hours: 3

Prerequisite or Corequisite Courses: SOC 301 or

CRM 301.
Prerequisite Courses: SOC 300 or CRM 300, and SOC 360.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Crosslisting: CRM 391
Course Repeatability: Course may not be repeated.

SOC 496 - Practicum in Public and Applied Sociology and Criminology

Completion of student research proposed and approved in CRM/SOC 391, as well as completion of a practicum or internship. The second course in a two-semester capstone sequence.

Credit Hours: 6

Prerequisite Courses: SOC 300 or CRM 300, and SOC 301 or CRM 301, and SOC 360, and SOC 391 or CRM 391.
Additional Restrictions/Requirements: Junior or senior class standing.
University Studies: Building Competencies/Writing

Intensive, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Crosslisting: CRM 496
Course Repeatability: Course may not be repeated.

- And an additional 18 hours of sociology electives.
- A maximum of 9 hours below the 300 level (including SOC 105) may be used to satisfy the above requirements.

Total: 39 hours

Software Engineering, B.S.

The Bachelor of Science in Software Engineering program prepares students to engineer complex software systems to professional quality standards through the application of appropriate theories and principles. Students learn problem identification, software analysis, software design, implementation, verification, operation, and team coordination using professional tools and practices. Graduates of the program are prepared for careers in the software development industry.

Program Coordinator: Lucas Layman, PhD

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in Software Engineering, a student must successfully complete SENG 458.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Software Engineering, a student must successfully complete SENG 458.

Requirements for the B.S. in Software Engineering

A grade point average of "C" (2.00) or better computed over all the courses used to fulfill the requirements of the major is required; in addition, a grade point average of "C" (2.00) or better computed over all the CSC and SENG courses used to fulfill the requirements of the major is required.

Core Requirements (49 hours)

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing

of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading.

Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

CSC 355 - Database Design and Implementation

Introduction to database concepts and database management systems. Topics include data models (hierarchical, network, relational, parallel, distributed and NoSQL), data modeling, data description languages, data manipulation languages, database administration, data warehouses, and front-end development. A group project designing and implementing a relational database is required.

Prerequisite Courses: CSC 231 (with a minimum grade of C)
Additional Restrictions/Requirements: Junior or

senior standing, or permission of instructor**.**
Course Repeatability: Course may not be repeated.

CSC 380 - Design and Analysis of Algorithms

Algorithm design paradigms such as divide and conquer, greedy, and dynamic programming; techniques for algorithm analysis, such as asymptotic notations and estimates, as well as time/space trade-offs. Topics may include sorting, searching, scheduling, string matching, graph algorithms, amortized analysis, and computational geometry.

Credit Hours: 3

Prerequisite Courses: CSC 133 and CSC 231 with a minimum grade of C and MAT 161
Course Repeatability: Course may not be repeated.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual

property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include

the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or

satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

SENG 201 - Software Engineering Fundamentals

Introduction to the basic skills of software engineering. Students learn version control, program verification techniques, flow analyses, formal code documentation, software diagramming, and the software lifecycle. Students learn information literacy practices relevant to software implementation. Coursework focuses on the relation between software tools and operating system concepts in Linux. Group work is required.

Prerequisite Courses: CSC 131 with a C or better
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

SENG 301 - Software Systems Analysis

Introduction to analysis techniques used to specify software systems. Students learn requirements engineering techniques, architecture patterns, and formal specification. Students analyze software security, performance, reliability, and usability tradeoffs.

Prerequisite Courses: SENG 201 with a C or better and CSC 231 with a C or better
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

SENG 401 - Software Construction

Study and practice of contemporary software engineering tools and techniques for the design, implementation and testing of software systems. Consideration of object-oriented design patterns, continuous integration, cloud-based systems, and best practices in system verification and validation. Group software project required.

Prerequisite Courses: SENG 301 with a grade of C or higher and CSC 331 with a grade of C or higher
Course Repeatability: Course may not be repeated.

SENG 458 - Software Practicum I

First semester of a two-semester capstone experience in software development. Definition, implementation, and testing of a software system created for an external customer by student teams. Consideration of software lifecycle methodologies, software project management, stakeholder communication, and team organization. Engineering content emphasizes system architecture, cloud integration, and test automation.

Prerequisite Courses: SENG 401 with a C or higher
Additional Restrictions/Requirements: Senior standing required
University Studies: Explorations Beyond the Classroom, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Software Engineering

SENG 459 - Software Practicum II

Second semester of a two-semester capstone experience in software development. Student teams define, implement, and test a software system created for an external customer. Students learn applied techniques for cloud integration, system validation,

DevOps, and maintenance.

Prerequisite Courses: SENG 458
Additional Restrictions/Requirements: Senior standing required
University Studies: Critical Reasoning, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction Software Engineering

SENG 495 - Seminar in Software Engineering

Research and discussion of contemporary topics in software engineering. Oral presentation required.

Additional Restrictions/Requirements: Junior or senior standing required.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3 **Repeat Limit:** 2
Major Restriction Software Engineering

Choose one of the following

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of

probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and

Statistics
Course Repeatability: Course may not be repeated.

Engineering Electives (9 hours)

9 hours of any 300-400 level CSC, DSC, or SENG courses not included in the Core Requirements.

Math, Statistics, and Natural Science Electives (20 hours)

20 hours from the following list. At least two courses must be a natural science with a laboratory component.

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVSL 195 - Environmental Sciences Lab

Laboratory analysis of environmental principles, resources, and problems. Application of scientific and social principles to solving current environmental problems. This course is the lab for EVS 195.

Credit Hours: 1

Prerequisite or Corequisite Courses: EVS 195
Additional Restrictions/Requirements: EVSL 195 may be taken in the same semester as EVS 195 or in a semester subsequent to EVS 195.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth

materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 101 - Earth Revealed Laboratory

Introduction to applied use of rock and mineral samples, maps, and models in geology. Topics include plate tectonics, mineral and rock identification and resources, geologic time, mountain building, earthquakes, volcanoes, river processes and flooding, groundwater, coastal processes and storms, energy, and climate change.

Credit Hours: 1

Prerequisite or Corequisite Courses: GLY 101.
University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162

Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student

presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

MAT 321 - Number Theory and its Applications

Introduction to the theory of numbers motivated by applications. Primes and divisibility; the Euclidean algorithm; linear congruences and the Chinese Remainder Theorem; Fermat's Little Theorem; continued fractions and Farey sequences. Applications to cryptology, computer arithmetic, random number generators and primality testing. Possible additional applications to computer science, physics, communication, music.

Credit Hours: 3

Prerequisite Courses: MAT 275 or CSC 133
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

Total: 78 hours

Additional Information

Students interested in the B.S. in Software Engineering are strongly advised to take CSC 131 during freshman year.

Spanish, B.A.

Applied Learning Requirement:

To satisfy the applied-learning requirement for foreign language, a student must complete 3 credit hours of study abroad (at the intermediate level or above) or 3 credit hours of internship, directed individual study, practicum, honors, or service learning.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Spanish a student must successfully complete SPN 303.

Requirements for a Major in Spanish for the B.A. Degree:

36 hours (Twelve (12) must be SPN 303, SPN 305, SPN 306 and SPN 307; at least six (6) must be at the 400 level, and up to six (6) may be at the 200 level.)

Only 3 hours at the 400 level may be obtained by means of SPN 490, SPN 491, SPN 498, or SPN 499.

Additional Information:

A grade of "C-" or better is required in each course counted toward the major and a "C" (2.00) average or better for all courses counted toward the major.

Special Education, B.A.

The Watson College of Education offers a Bachelor of Arts Degree in Special Education (K-12) for students interested in teaching students with exceptionalities. Special Education majors select from two instructionally-oriented tracks: Adapted Curriculum or General Curriculum. Many of the courses in the university studies and professional studies are similar; however, the specialty area courses for adapted and general curriculum are different. Students in the program also will have the opportunity to gain skills and knowledge in assistive technology, teaching academic skills to diverse learners, instructional design, classroom management, collaboration, and applied research.

The Special Education General Curriculum track prepares teachers to provide instruction and behavior supports to assist students with learning and behavioral disabilities(high-incidence disabilities) who are enrolled in the general education curriculum. Among the most common learning problems these students experience are learning disabilities, mild intellectual disabilities, and behavior problems. Training includes individual and small group instruction for students with disabilities who are achieving below grade level in basic skills, implementation of positive behavior supports for students with disabilities and collaboration with general education teachers. Successful completion of this program and licensure requirements will lead to a B.A. degree and licensure in General Special Education (K-12). In addition, Special Education majors who complete the four-year General Curriculum Program are also eligible for licensure in Elementary Education by passing the required licensure test for both Special Education and Elementary Education.

The Special Education Adapted Curriculum track prepares teachers to provide instruction to assist students with moderate to severe disabilities who are not enrolled in the general education curriculum.

Students supported have moderate to severe physical and/or intellectual disabilities, including such diagnoses as: Down syndrome, moderate to severe autism, Fragile X syndrome, multiple disabilities, and medically fragile students. Training includes instructional practices to teach functional skills, as well as functional academics, in a small controlled setting (self-contained classroom). These classrooms provide highly individualized instruction for students whose needs cannot be met in the general education classroom and are typically comprised of students in the same categorical grouping. Assistive technologies and sign language are also taught in the program. Successful completion of this program and licensure requirements will lead to a B.A. degree and licensure in Adapted Special Education (K-12).

Degree Requirements for Special Education:

University Studies:

Students should follow university studies requirements of the University of North Carolina Wilmington as outlined in the Academic Programs and University

Studies section of the catalogue. The major in special education requires 84 credit hours in education for the general curriculum track and 82 credit hours in the adapted curriculum track.

General Curriculum Track:

Professional Core – General Curriculum Track:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field

experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid

assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Professional Studies – General Curriculum Track:

Curricular Foundations:

Students choose a minimum of 9 EDN credit hours from the following curricular areas and are limited to one course from each of the 4 areas: Literacy, Mathematics, Social Studies, and Science.

Literacy:

EDN 340 - Applied Literacy Methods

This course emphasizes the instructional application of foundational and advanced literacy skills with a focus on the role of comprehension and research-based tools to support vocabulary acquisition, fluency, and reading for meaning. The lab for this course is EDNL 340.

Credit Hours: 3

Corequisite Courses: EDNL 340
Prerequisite Courses: EDN 240
Course Repeatability: Course may not be repeated.

EDN 352 - Developing Reading and Writing Competence in the Middle Grades

Develops understanding of reading and writing processes in the broad context of communication.

Presents strategies for fostering and evaluating interest, fluency, and skill in reading and writing, both in developmental literary classes and in middle level, content subjects. Topics include organizational and instructional strategies for the development of reading and writing ability, techniques for motivating and guiding readers and writers, and strategies for study and comprehension, which support learning in all areas of the middle school curriculum. Field experiences required.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Watson School of Education.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 355 - Language Arts Methods for the Middle Grades

Informed by current theory and research, this course examines developmentally appropriate curriculum, materials, assessments, and methods for the teaching of language arts at middle grades levels. The application of contemporary media and computer technology for the middle grades is incorporated. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352 .
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Mathematics:

EDN 322 - Foundations of Number and Algebraic Reasoning (K-6)

Focus on the curriculum, materials, and methods appropriate for the teaching of number and algebraic reasoning for the kindergarten through sixth grade level. Field experience required. The lab for this course is EDNL 322.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of 6 semester hours of appropriate mathematics or statistics at the 101 level or higher, with minimum grade of C-.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EDN 323 - Teaching Mathematics in the Middle Grades (6-9)

This course examines the curriculum, materials, and methods appropriate for the teaching of mathematics at middle grade levels. There is an emphasis on problem-based instruction including the selection and implementation of high-level mathematics tasks and the

teacher's facilitation of problem-solving, collaboration and discussion. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and 6 hours of mathematics.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Social Studies:

EDN 334 - Social Studies Curriculum and Instruction (K-6)

An overview of the goals of social studies education and how this affects various patterns of organizing curricular content. The implications of learner

developmental characteristics for selecting approaches to instruction from history as well as the social and behavioral sciences will be explored. Emphasis on selection and preparation of appropriate materials including the strategies of inquiry, critical thinking, mapping and graphing, simulation, and problem solution. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and 6 hours of social studies content.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 335 - Social Studies Education in the Middle Grades

This course examines the curriculum, materials, and methods appropriate for teaching social studies at middle grade levels. There is an emphasis inquiry-

based instruction including social inquiry in the real world, analysis of sources to build arguments, and teaching methods related to historical events and social studies phenomena. Coursework includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and 6 hours of social studies content.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Science:

EDN 336 - The Teaching of Science (K-6)

Methods of teaching the biological, earth and physical sciences. Applications of the sciences to classroom experimentation and investigation. Examination of contemporary curricula used at the elementary school level. Field experiences required.

Credit Hours: 3

Prerequisite Courses: EDN 301
Additional Restrictions/Requirements: Prerequisite course and completion of two science courses, one of which must have a laboratory component, with minimum grade of C-.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 338 - The Teaching of Science (6-9)

This course includes a survey of curriculum and methods for teaching science in grades 6-9. There is an emphasis on scientific inquiry, topics that integrate learning across science disciplines, and the social implications of science and technology. Coursework

includes field experience.

Credit Hours: 3

Corequisite Courses: EDN 439.
Prerequisite Courses: EDN 301 and EDN 318 and EDN 320 and EDN 352.
Additional Restrictions/Requirements: Prerequisite courses and basic studies science courses.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Special Education Foundations:

SED 250 - Introduction to Special Education

Survey of major categories of exceptionality including intellectual disabilities, learning disabilities, behavioral and emotional disorders, attention deficits and hyperactivity, communication disorders, sensory impairments, multiple and severe disabilities, physical

and health impairments, and giftedness. Includes study of definitions, characteristics, etiology, psycho-social implications, educational interventions, and current issues. At least 6 field experience hours required.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 352 - Behavioral Development

Designed to develop an understanding of social/emotional development and effective principles and strategies to promote positive behavioral development. Focus will be on positive behavioral support, functional behavioral assessment, teaching pro-social behaviors and social skills, establishing affective environments, parent training and effective behavior change strategies. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 368 - Teaching Reading to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching reading skills to students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and identifying accommodations and modifications appropriate to the needs of students. Focus includes the application of instructional sequences that adhere to the guidelines for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. The lab for this course is SEDL 368.

Credit Hours: 3

Corequisite Courses: SEDL 368
Prerequisite Courses: EDN 301, SED 372
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEDL 368 - Teaching Reading to Learners with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit reading instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. This course is the lab for SED 368.

Credit Hours: 1

Corequisite Courses: SED 368
Prerequisite Courses: EDN 301
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 369 - Teaching Mathematics to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching mathematics skills to students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and identifying accommodations and modifications appropriate to the needs of students. Focus includes the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. The lab for this course is SEDL 369.

Credit Hours: 3

Corequisite Courses: SEDL 369
Prerequisite Courses: EDN 301, SED 374
Course Repeatability: Course may not be repeated.

SEDL 369 - Teaching Mathematics to Students with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit mathematics instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. This course is the lab for SED 369.

Credit Hours: 1

Corequisite Courses: SED 369
Prerequisite Courses: EDN 301
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 370 - Assessment Procedures for Special Education

Examination of concepts and fundamentals of educational assessment. Includes study of formal, informal, and alternative assessment techniques

appropriate for students with exceptionalities. Includes assessment of intellectual functioning, academic skills, spoken language, learning skills, social-emotional-behavioral development, adaptive behavior, early childhood skills, and occupational/transitional skills. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: EDN 301, SED 374
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

SED 372 - Program Development in Special Education

Development of skills in planning educational programs for students with exceptionalities. Includes writing lesson plans, unit plans, individualized educational programs, family service plans, and transition plans; task analysis; legal requirements and roles of the special education teacher. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: EDN 301, SED 374
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

SED 375 - Reflective Practices in Teaching Students with Disabilities

Designed to provide students with the skills to identify the appropriate evidence based practices to be used to teach content and/or behavioral skills. Students will use the content they learned in their previous coursework to plan for instruction and assessment, instruct and engage students in learning, and assess student learning.

Credit Hours: 2

Corequisite Courses: SEDL 375.
Prerequisite Courses: SED 372, SED 369, SEDL 369, and SED 370.
University Studies: Building Competencies/Information Literacy, Explorations

Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2
Additional Course Fee Schedule

Specialty Area – General Curriculum Track:

SED 351 - Learning and Behavioral Disorders in a Diverse Society

Designed to examine the complex variety of learners with behavioral or emotional disorders and learning disabilities. Emphasis on etiology, assessment, diagnosis, characteristics, theories, historical influences, teaching strategies, and current trends. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SED 354 - Curriculum and Methods of Instruction for Secondary Transition

Practical application of legal requirements for preparing students with disabilities for transition into employment, post-secondary education, and independent living, including pre-vocational and vocational methodologies, student-centered planning, and interagency linkages. At least 15 hours of field experience required.

Credit Hours: 3

Prerequisite Courses: SED 372, SED 369, SEDL 369, and SED 370.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 360 - Teaching Students with Learning Problems

Study of educational interventions for students with learning problems. Emphasis will be on developmental, cognitive, medical, behavioral, and constructivist approaches. Includes study of curriculum and instructional strategies in oral language, reading,

literature, written language, math, content areas, learning strategies, and study skills for grades K-12. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: Prerequisite: SED 250, SED 351, and SED 352.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 362 - Teaching Students with Social, Emotional, and Behavior Problems

Examination of problems, issues, and practices in developing effective programs for students with social/behavioral needs. Emphasis on social, emotional and behavioral needs including major interventions, family involvement, social skills, applied behavior analysis, cognitive/behavioral approaches, medication issues, legal considerations, and curricular strategies. At least 25 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 351, SED 352, SED 372, SED 369, SEDL 369, and SED 370.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 374 - Applied Behavior Analysis for Teachers

Designed to provide a strong foundation and knowledge of basic principles of learning through the introduction of Behavior Analysis: the science and technology of behavior. The focus will be on empirically validated instructional strategies by which students learn academic, social and physical skills. At least 20 field experience hours required.

Credit Hours: 3

Additional Restrictions/Requirements: 9 hours of Curricular Foundations.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEDL 200 - Special Education Apprentice Field Experience I

Designed to provide guided teaching practice under the direction of a university instructor. During the lab experience, students will design and deliver instruction for learners with high incidence disabilities based on evidence based practices and support non-instructional classroom duties with the guidance of their partnership teacher.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - General Curriculum

SEDL 300 - Special Education Apprentice Field Experience II

Designed to provide guided teaching practice under the direction of a university instructor. During the lab experience, students will design instruction for learners with high incidence disabilities, deliver instruction to individual students and/or small groups, support non-instructional classroom duties and collaborate with the partnership teacher regarding instructional decisions.

Credit Hours: 1

Prerequisite Courses: SEDL 200.
Additional Restrictions/Requirements: Restricted to Special Education - General Curriculum majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - General Curriculum

SEDL 400 - General Curriculum Field Experience III

Designed to provide guided teaching practice under the direction of a university instructor. During the lab experience, students will design instruction for learners with high incidence disabilities, deliver instruction to individual students, small groups, and/or whole groups, support classroom management plans, support non-instructional classroom duties and collaborate with the partnership teacher regarding instructional decisions.

Credit Hours: 1

Prerequisite Courses: SEDL 300.
Additional Restrictions/Requirements: Restricted to Special Education General Curriculum majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - General Curriculum

Professional Semester – General Curriculum Track:

SED 410 - Seminar in Special Education

Designed as a culmination of professional study into the teaching profession by providing opportunities to extend and apply understandings of the roles of the special education teacher as decision maker and reflective practitioner, particularly in the areas of assessment, planning, instruction, management, collaboration, assistive technology and evaluation. In addition, this course is designed to use the internship placement as a setting to develop the collaboration, teaming, communication, and conflict resolution skills relevant for educators of students with special needs and from diverse cultures.

Credit Hours: 3

Corequisite Courses: SED 411.
Additional Restrictions/Requirements: All courses in

the professional core and specialty area and a 2.70 GPA on all work attempted at UNCW.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SED 411 - Student Teaching in Special Education (K-12)

All full-time practicum experience within the area of specialization. Students will engage in a variety of supervised instructional activities, assuming an increasing amount of responsibility for all phases of instruction. Practica are offered in the areas of general curriculum and adapted curriculum.

Credit Hours: 9

Corequisite Courses: SED 410
Additional Restrictions/Requirements: As specified for SED 410.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 9

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester - General Curriculum Track (non-licensure option):

Needs program approval

EDN 467 - Non-Licensure Practicum

Must receive program approval to enroll. A supervised practicum experience working with children and/or their families in a school or community setting. Designed for students who are completing a degree in education without earning licensure, this practicum promotes integration of the knowledge, skills, and dispositions required to be an effective educator. The practicum placement is selected to be consistent with the student's career goals. Placement and field hours must be approved by the instructor. This course does not fulfill the requirements for North Carolina teacher licensure.

Credit Hours: 6 to 12

Additional Restrictions/Requirements: Admission to Watson College of Education and consent of instructor. Must receive full program approval to enroll. Not guaranteed. Does not result in licensure (licensure test requirement waived for elementary majors).

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson

College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Adapted Curriculum Track:

Professional Core – Adapted Curriculum Track:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL

200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or

corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Professional Studies – Adapted Curriculum Track:

Curricular Foundations:

SED 365 - The Teaching of Functional Academics

Designed to comprehensively review methods for teaching basic, functional, academic skills to persons with severe intellectual disabilities. Emphasis will be on the teaching of reading, math, and writing skills for daily use. The lab for this course is SEDL 365.

Credit Hours: 2

Corequisite Courses: SEDL 365.
Prerequisite Courses: SED 364, SED 356.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

SEDL 365 - Functional Academics Laboratory

Designed to provide students with supervised opportunities to teach functional academic skills to students with severe intellectual disabilities. Emphasis will be on the teaching of reading, math, and writing skills for daily use. Minimum of 20 hours per semester. This course is the lab for SED 365.

Credit Hours: 1

Corequisite Courses: SED 365
Prerequisite Courses: SED 364
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 366 - The Teaching of Functional Skills

Examination of procedures for identifying and teaching functional skills to persons with severe intellectual disabilities. Students will assess and design programs to address skills in the domains of: personal management/self-care, daily living, vocation, career development, residential and independent living, recreation/leisure/play skills, and social skills. Course emphasis is analysis of skill requirements using an ecological inventory approach to instruction. The lab for this course is SEDL 366.

Credit Hours: 2

Corequisite Courses: SEDL 366.
Prerequisite Courses: SED 364, SED 367, SED 365, and SEDL 365.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

SEDL 366 - Functional Skills Laboratory

Designed to provide students with supervised opportunities to teach and observe instruction of functional skills to students with severe intellectual disabilities. Emphasis will be on the teaching of personal management/self-care, daily living, vocation/employment, and social skills. Minimum of 20 hours per semester. This course is the lab for SED 366.

Credit Hours: 1

Corequisite Courses: SED 366
Prerequisite Courses: SED 364
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 367 - Communication and Language: Development and Interventions

Investigation of the principles of communication and language development. Study of the relationship of severe disabilities to delays in communication and language development. Course covers the use of a range of intervention and assistive technology strategies to facilitate acquisition of skills, both verbal and non-verbal, in this area. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 364, SED 356.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 368 - Teaching Reading to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching reading skills to

students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and identifying accommodations and modifications appropriate to the needs of students. Focus includes the application of instructional sequences that adhere to the guidelines for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. The lab for this course is SEDL 368.

Credit Hours: 3

Corequisite Courses: SEDL 368
Prerequisite Courses: EDN 301, SED 372
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEDL 368 - Teaching Reading to Learners with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit reading instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines

for teaching phonemic awareness, vocabulary, fluency, comprehension, and the alphabetic principle. This course is the lab for SED 368.

Credit Hours: 1

Corequisite Courses: SED 368
Prerequisite Courses: EDN 301
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 369 - Teaching Mathematics to Students with Special Needs

Designed to review, discuss, implement, and modify instructional techniques for teaching mathematics skills to students with exceptionalities. Emphasis on conducting assessments, developing materials, applying explicit instructional techniques, and identifying accommodations and modifications appropriate to the needs of students. Focus includes

the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. The lab for this course is SEDL 369.

Credit Hours: 3

Corequisite Courses: SEDL 369
Prerequisite Courses: EDN 301, SED 374
Course Repeatability: Course may not be repeated.

SEDL 369 - Teaching Mathematics to Students with Special Needs Laboratory

Designed to provide students with supervised opportunities to implement and modify explicit mathematics instruction to meet the needs of students with exceptionalities. Emphasis will be on the application of instructional sequences that adhere to the guidelines for teaching concepts, rules, and strategies in math. This course is the lab for SED 369.

Credit Hours: 1

Corequisite Courses: SED 369
Prerequisite Courses: EDN 301

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SWK 311 - Child Abuse and Neglect

Study of the knowledge base, laws, and professional roles associated with contemporary child welfare practice. Identification of child maltreatment, reporting procedures and community-based interdisciplinary practice issues are emphasized. Upon acceptance to the NC Child Welfare Education Collaborative, students must complete both SWK 311 and SWK 312 before admission to a DSS field placement.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

Special Education Foundations:

SED 250 - Introduction to Special Education

Survey of major categories of exceptionality including intellectual disabilities, learning disabilities, behavioral and emotional disorders, attention deficits and hyperactivity, communication disorders, sensory impairments, multiple and severe disabilities, physical and health impairments, and giftedness. Includes study of definitions, characteristics, etiology, psycho-social implications, educational interventions, and current issues. At least 6 field experience hours required.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 352 - Behavioral Development

Designed to develop an understanding of social/emotional development and effective principles and strategies to promote positive behavioral development. Focus will be on positive behavioral support, functional behavioral assessment, teaching pro-social behaviors and social skills, establishing affective environments, parent training and effective behavior change strategies. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 370 - Assessment Procedures for Special Education

Examination of concepts and fundamentals of educational assessment. Includes study of formal, informal, and alternative assessment techniques appropriate for students with exceptionalities. Includes assessment of intellectual functioning, academic skills,

spoken language, learning skills, social-emotional-behavioral development, adaptive behavior, early childhood skills, and occupational/transitional skills. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: EDN 301, SED 374
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

SED 372 - Program Development in Special Education

Development of skills in planning educational programs for students with exceptionalities. Includes writing lesson plans, unit plans, individualized educational programs, family service plans, and transition plans; task analysis; legal requirements and roles of the special education teacher. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: EDN 301, SED 374

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

SED 375 - Reflective Practices in Teaching Students with Disabilities

Designed to provide students with the skills to identify the appropriate evidence based practices to be used to teach content and/or behavioral skills. Students will use the content they learned in their previous coursework to plan for instruction and assessment, instruct and engage students in learning, and assess student learning.

Credit Hours: 2

Corequisite Courses: SEDL 375.
Prerequisite Courses: SED 372, SED 369, SEDL 369, and SED 370.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Maximum Repeatable Hours: 2
Additional Course Fee Schedule

SEDL 375 - Reflective Practices in Teaching Students with Disabilities Lab

Designed to provide supervised opportunities to develop a comprehensive individualized lesson plan(s) for a student(s) with a disability that reflects a deep understanding of differentiation and also addresses the unique behavioral needs of students that are in need of functional behavioral support. The course content will also reflect students' acquisition of skills from their special education methods courses and provide opportunities to practice the culmination of these skills while receiving constructive feedback from the instructor.

Credit Hours: 1

Corequisite Courses: SED 375.
Prerequisite Courses: SED 372, SED 369, SEDL 369, SED 370.
Additional Restrictions/Requirements: Restricted to majors in Special Education (General and

Adapted Curriculum).
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - General and Adapted Curriculum

Specialty Area – Adapted Curriculum Track:

SED 354 - Curriculum and Methods of Instruction for Secondary Transition

Practical application of legal requirements for preparing students with disabilities for transition into employment, post-secondary education, and independent living, including pre-vocational and vocational methodologies, student-centered planning, and interagency linkages. At least 15 hours of field experience required.

Credit Hours: 3

Prerequisite Courses: SED 372, SED 369, SEDL 369,

and SED 370.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 356 - Severe Disabilities

Study of etiology, definitions, characteristics and programming needs of persons with moderate, severe, and profound intellectual disabilities, low functioning autism, and multiple disabilities. Current approaches to treatment and education of persons with severe disabilities in a variety of settings and across the life span will be included. Students will be expected to develop a basic knowledge of the various aspects of severe disabilities and use that knowledge to make informed decisions about appropriate practices in the education of this population. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 352.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 364 - Teaching Students with Severe Disabilities

Examination of intervention strategies and issues for persons with severe disabilities. Major focus is on a set of research based strategies referred to as response prompting procedures. Students will examine means for delivering instruction in one-on-one and small group settings using discrete trail, mass trial, and activity based approaches. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 352.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SED 374 - Applied Behavior Analysis for Teachers

Designed to provide a strong foundation and knowledge of basic principles of learning through the introduction of Behavior Analysis: the science and technology of behavior. The focus will be on empirically validated instructional strategies by which students learn academic, social and physical skills. At least 20 field experience hours required.

Credit Hours: 3

Additional Restrictions/Requirements: 9 hours of Curricular Foundations.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEDL 201 - Special Education Apprentice Field Experience I

Designed to provide guided teaching practice under the direction of a university instructor. During the lab

experience, students will design and deliver instruction for learners with significant intellectual and multiple disabilities based on evidence based practices and support non-instructional classroom duties with the guidance of their partnership teacher.

Credit Hours: 1

Additional Restrictions/Requirements: Restricted to Special Education - Adapted Curriculum majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - Adapted Curriculum

SEDL 301 - Adapted Curriculum Field Experience II

Designed to provide guided teaching practice under the direction of a university instructor. During the lab experience, students will design instruction for learners with significant intellectual and multiple disabilities, deliver instruction to individual students and/or small

groups, support non-instructional classroom duties and collaborate with the partnership teacher regarding instructional decisions.

Credit Hours: 1

Prerequisite Courses: SEDL 201.
Additional Restrictions/Requirements: Restricted to Special Education Adapted Curriculum majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - Adapted Curriculum

SEDL 401 - Adapted Curriculum Field Experience III

Designed to provide guided teaching practice under the direction of a university instructor. During the lab experience, students will design instruction for learners with significant intellectual and multiple disabilities, deliver instruction to individual students, small groups, and/or whole groups, support classroom management

plans, support non-instructional classroom duties and collaborate with the partnership teacher regarding instructional decisions.

Credit Hours: 1

Prerequisite Courses: SEDL 301.
Additional Restrictions/Requirements: Restricted to Special Education Adapted Curriculum majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Major Restriction Special Education - Adapted Curriculum

HFE 415 - Adapted Physical Activity

Provide students theoretical and practical knowledge to plan and implement appropriate physical activity programs for individuals with disabilities in integrated and inclusive settings.

Credit Hours: 0

Prerequisite Courses: (EXS 216 with a C- or better and EXSL 216 with a C- or better) or (BIO 240 with a C- or better and BIOL 240 with a C- or better).
Additional Restrictions/Requirements: Senior standing, prerequisite courses, or consent of instructor.
University Studies: Writing Intensive, Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability Insurance Additional Course Fee Schedule

Professional Semester – Adapted Curriculum Track:

SED 410 - Seminar in Special Education

Designed as a culmination of professional study into the teaching profession by providing opportunities to extend and apply understandings of the roles of the special education teacher as decision maker and reflective practitioner, particularly in the areas of assessment, planning, instruction, management, collaboration, assistive technology and evaluation. In addition, this course is designed to use the internship

placement as a setting to develop the collaboration, teaming, communication, and conflict resolution skills relevant for educators of students with special needs and from diverse cultures.

Credit Hours: 3

Corequisite Courses: SED 411.
Additional Restrictions/Requirements: All courses in the professional core and specialty area and a 2.70 GPA on all work attempted at UNCW.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SED 411 - Student Teaching in Special Education (K-12)

All full-time practicum experience within the area of specialization. Students will engage in a variety of supervised instructional activities, assuming an increasing amount of responsibility for all phases of instruction. Practica are offered in the areas of general curriculum and adapted curriculum.

Credit Hours: 9

Corequisite Courses: SED 410
Additional Restrictions/Requirements: As specified for SED 410.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 9
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester - Adapted Curriculum Track (non-licensure option):

Needs program approval.

EDN 467 - Non-Licensure Practicum

Must receive program approval to enroll. A supervised practicum experience working with children and/or their families in a school or community setting. Designed for students who are completing a degree in education without earning licensure, this practicum promotes integration of the knowledge, skills, and dispositions required to be an effective educator. The practicum placement is selected to be consistent with the

student's career goals. Placement and field hours must be approved by the instructor. This course does not fulfill the requirements for North Carolina teacher licensure.

Credit Hours: 6 to 12

Additional Restrictions/Requirements: Admission to Watson College of Education and consent of instructor. Must receive full program approval to enroll. Not guaranteed. Does not result in licensure (licensure test requirement waived for elementary majors).

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their

advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Statistics, B.S.

The Bachelor of Science degree in statistics provides a variety of options for students wishing to study statistics. The program prepares graduates for careers as applied statisticians in government, business, and industry. Those students interested in further study beyond the bachelor's level may take coursework giving them the theoretical depth required to pursue graduate degrees. In recognition of the interdisciplinary nature of statistics, coursework in other disciplines such as biology, computing, data science, economics, environmental studies, or social sciences can be undertaken, depending on the student's interests.

Since statistical practice routinely involves computers, most courses incorporate standard statistical software.

Oral Requirement

To satisfy the oral requirement for the B.S. degree in Statistics a student must successfully complete STT 490, STT 498, or MAT 495.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.S. degree in Statistics a student must successfully complete one or more of the following: STT 490, STT 498, or MAT 495.

Requirements for a Major in Statistics for the B.S. Degree

Mathematical Course Requirements (15 Credit Hours)

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory

of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and

Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

Statistical Course Requirements (18 Credit Hours)

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 305 - Statistical Programming

Introduction to statistical programming in SAS with emphasis on data step programming; applications to data management and report generation, simulation,

graphical and numerical analysis of univariate and multivariate data. Comparison of current statistical software.

Credit Hours: 3

Prerequisite Courses: STT 215
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

OR

STT 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN 280
Course Repeatability: Course may not be repeated.

OR

DSC 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN 280
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

STT 411 - Design of Experiments and Analysis of Variance

Review of elementary statistics; design of experiments including completely randomized, randomized block, factorial, split-plot, and repeated measures designs; analysis of variance; non-parametric alternative methods of analysis. Statistical software packages will be used as appropriate in problem solving.

Credit Hours: 3

Additional Restrictions/Requirements: Any elementary statistics course.
Crosslisting: STT 511
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 412 - Applied Regression and Correlation

Review of elementary statistics; linear and multiple regression; correlation. Statistical software packages used as appropriate in problem solving.

Credit Hours: 3

Prerequisite Courses: MAT 335
Additional Restrictions/Requirements: Any elementary statistics course.
Course Repeatability: Course may not be repeated.

STT 490 - Case Studies in Statistical Consulting

Review of case studies involving consulting with clients on statistical design of experiments and analysis of experimental and observational data; analysis of available data sets utilizing statistical software; presentation of oral and written reports on a consulting experience.

Credit Hours: 3

Additional Restrictions/Requirements: At least 9 hours of STT courses numbered 300 or higher and consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or

STT 498 - Internship in Statistics

Academic training and practical experience through work in a private company or public agency; presentation of oral report on internship experience. Faculty supervision and evaluation of all study and on-site activity.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50, GPA in STT courses at least 2.80, and at least 9 hours of STT courses numbered 300 or higher, and approval by faculty supervisor, department chair, and dean.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

or

MAT 495 - Seminar in Mathematics

Reading, discussion, investigation, and preparation and presentation of reports on selected mathematical topics, under faculty supervision beyond the students' courses of study.

Credit Hours: 3

Additional Restrictions/Requirements: 9 semester hours of mathematics courses at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Elective Course Requirements (15 Credit Hours)

Three Courses Of

STT 350 - Survey Sampling

Elementary survey sampling on the design and analysis of sample surveys. Topics include design of questionnaires; methods of data collection; sample-

survey designs including simple random sampling, stratified sampling, cluster sampling, and systematic sampling; ratio and regression estimation; two-stage cluster sampling; sampling from wildlife populations; sources of errors.

Credit Hours: 3

Additional Restrictions/Requirements: An introductory statistics course from any department.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 420 - Biostatistical Analysis

Review of statistical methods used in epidemiologic studies and clinical trials. Topics include measures of association, logistic regression, covariates, life tables and Cox regression. Statistical analysis using a statistical software.

Credit Hours: 3

Prerequisite Courses: STT 315
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 425 - Categorical Data Analysis

Introduction to the analysis of qualitative data. Basic methods of summary and inference for two- and three-way contingency tables; introduction to the generalized linear model for binary and Poisson data; focus on multinomial responses (nominal and ordinal) and matched pairs data; statistical analysis using SAS.

Credit Hours: 3

Prerequisite Courses: STT 305
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: STT 525
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 430 - Introduction to Non-Parametric Statistics

Theory and methods of non-parametric statistics in the one- and two-sample problems and their comparisons with standard parametric procedures. Non-parametric tests for comparing more than two samples; tests of randomness and independence.

Credit Hours: 3

Prerequisite Courses: STT 215
Additional Restrictions/Requirements: Prerequisite course and 3 hours of statistics at the 300 level.
Crosslisting: STT 530
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 435 - Applied Multivariate Analysis

Matrix manipulations; multivariate normal distribution; inference for mean vector and covariance matrix; multivariate analysis of variance; principal components; canonical correlations; discriminant analysis; factor analysis; cluster analysis; statistical analysis using SAS.

Credit Hours: 3

Prerequisite Courses: STT 315 and STT 411 and STT 412
Crosslisting: STT 535
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 450 - STT 450 - Statistical Machine Learning - Herman

Introduction to fundamental principles and applications of machine learning techniques. Topics include linear regression, classification, re-sampling methods, model selection, tree-based classification methods, and Support Vector Machines (SVM). Students learn how to analyze large/high-dimensional real-world application data to build effective machine learning systems using standard programming tools.

Credit Hours: 3

Prerequisite Courses: STT 215.
Additional Restrictions/Requirements: Prerequisite course and 3 hours of statistics or data science at the

300 level, or consent of instructor.
Course Repeatability: Course may not be repeated.

STT 460 - Statistical Deep Learning

Exploration of the synergy between deep learning and statistical learning principles emphasizing the integration of statistical foundations in the context of computer vision and pattern recognition applications, ensuring robust and interpretable outcomes. Provides practical experience in modeling high-dimensional real-world data, developing solutions that are predictive and grounded in statistical rigor.

Prerequisite Courses: STT 450
Course Repeatability: Course may not be repeated.

STT 465 - Applied Probability

The formulation, analysis and interpretation of probabilistic models. Selected topics in probability theory. Conditioning, Markov chains, and Poisson processes. Additional topics chosen from renewal theory, queuing theory, Gaussian processes, Brownian motion, and elementary stochastic differential equations.

Credit Hours: 3

Prerequisite Courses: MAT 261 and STT 315
Crosslisting: MAT 465, MAT 565, STT 565
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 470 - Applied High Performance Computing (HPC) for Statistical Learning

Introduction to the foundational principles and techniques of high-performance computing (HPC) and its applications with statistical learning using large-scale real-world data. Includes parallel architectures, distributed computing, big data frameworks, and practical techniques essential for analyzing massive real-world applications.

Prerequisite Courses: STT 450
Course Repeatability: Course may not be repeated.

STT 475 - Topics in Statistics

Topics of current interest in statistics not covered in existing courses. May be repeated under a different

subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

And

- At least 6 hours of collateral coursework in a substantive area of statistical or mathematical theory or application, approved by the Department of Mathematics and Statistics. These courses may come from different disciplines and some must contain mathematical or statistical content. Any 300-400 level departmental classes (DSC, MAT, and STT prefixes) satisfy this requirement. Potential extra-departmental courses include BAN 300, BAN 301, BAN 302, BIO 335, CRM 301, CSC 380, ECN 377, ECN 477, FIN 335, FIN 336, PSY 417, PSY 425, and SOC 301.

Recommended Elective Courses Based on Interest

- Actuarial Science:

  MAT 381, MAT 468, and two additional STT electives.

  Consider additional coursework in mathematics and statistics.

- Biostatistics:

  STT 420, STT 425, STT 430, STT 450.

  Consider additional course work in biology, community health, computer science, data science, and/or public health.

- Data Science:

  DSC 301, DSC 302, STT 425, STT 450.

  Consider additional coursework in business analytics, computer science, economics,

mathematics, and/or statistics.

- Econometrics:

  ECN 377, ECN 477, STT 425, STT 450.

  Consider additional coursework in data science, economics, mathematics, and/or statistics.

- Mathematical Statistics:

  STT 566, STT 567, and two additional MAT or STT electives (requires graduate course eligibility).

  Consider additional coursework in mathematics and statistics.

Total Credit Hours: 48

Additional Information

An overall average of "C" 2.00 or better is required for all 300-400-level statistics courses counted toward the major.

Accompanying majors, minors, and certifications to consider: actuarial science, biology, coastal engineering, chemistry, computer science, data science, economics, environmental science, geology, mathematics, marine biology, public health, physics, and psychology.

Studio Art, B.A.

The Studio Art major offers a multidisciplinary view of current art practice. The Department emphasizes exposure to a range of media in small classes with individual attention. Through technical skill and creative thinking, students are encouraged to develop a personal, disciplined direction with an understanding of their place in art history and contemporary art. The curriculum provides studio experiences in drawing, painting, sculpture, ceramics, photography, printmaking and graphic design. Exhibiting artists in the Cultural Arts Gallery and visiting artists are a regular presence in the department and enhance student learning through lectures, collaborative projects and studio visits.

Requirements for a Major in Studio Art for the B.A. Degree:

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Studio Art, a student must successfully complete an oral defense of their senior exhibit for studio art in ART 476.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Studio Art, a student must successfully complete ART 476.

Core Courses

ART 101 - Two-Dimensional Design

Study of the principles of two-dimensional design and introduction to color theory.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 102 - Three Dimensional Design

Introduction to concepts of three-dimensional design. Focus on the elements, principles, and basic

construction of three dimensional form.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 111 - Drawing Fundamentals

Fundamentals of drawing; investigation of processes and visual concepts with emphasis on charcoal.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 211 - Beginning Life Drawing

Drawing from the model: structure, geometric form, and composition using various media: pencil, charcoal, India ink, etc.

Credit Hours: 3

Prerequisite Courses: ART 111
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 476 - Senior Exhibit

Topics include generating a coherent body of work; presentation solutions (matting, framing, pedestals, labels); writing an artist's statement and resume; curatorial decisions; promotion and installation of exhibition; discipline appropriate writing.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing, and course must be completed in the semester of graduation.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life

to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 204 - Art of the Modern World

Examination of major monuments, artists, and artistic developments from the 19th to the late 20th century, primarily in Europe and the Americas. Study of the relationship between works of art and the historical, political, religious, and philosophical context of the societies that produced and made use of them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

Total: 24 hours

Studio Electives

21 hours chosen from ART 200-400. At least 12 hours from ART 300-400.

Total: 21 hours

Art History Electives

Choose 3 hours from ARH 300-400.

Total: 3 hours

Total Credit Hours: 48

Additional Information:

No more than 3 hours of ART 491 or 3 hours of ART 498 may be counted toward the major.

A grade of C or better is required for each course counted toward the major.

To complete a double major in studio art and art history, the student must complete ARH 476 and 21 additional hours in Art History at the 300-400 level as specified in the Art History major.

Theatre, B.A.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Theatre with an option in performance a student must successfully complete THR 486. To satisfy the oral communication requirement for the B.A. degree in Theatre with an option in design and technology a student must successfully complete THR 487. To satisfy the oral communication requirement for the B.A. degree in Theatre with an option in theatre studies a student must successfully complete THR 355 or THR 486 or THR 487 or meet this requirement from another course.

Applied Learning Requirement:

To satisfy the applied learning requirement for the B.A. degree in Theatre a student must successfully complete THR 110.

Requirements for a Major in Theatre for the B.A. Degree:

Students must complete a core curriculum consisting of courses listed below. In addition, a student must complete one of the following options to fulfill degree requirements. In each option, a student must complete at least 18 hours of THR at the 300-400 level. Must

have 24 THR hours at UNCW or through an approved study abroad program.

Theatre Core (19 hours):

THR 110 - Introduction to Theatre Technology

Examination of current materials and techniques employed in technical production with an emphasis on scenery and lighting technology.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 125 - Introduction to Design

Examines basic techniques, language, methods and practice employed in theatrical design. Three lecture and three lab hours per week concurrent with University Theatre production needs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 165 - Playscript Analysis for Production

The study of a diverse cross-cultural section of plays, analyzed through elements of the dramatic text including character, structure, style, language, genre, and theme as they are applied in production.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

THR 230 - Acting For Non-Majors

An introduction to basic acting techniques for non-majors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or

THR 231 - Craft of Acting I - Self-discovery and Truth - Fundamental Techniques of Acting

Introductory level acting studio focused on the process of approaching a role. Script reading and analysis from the actor's perspective with specific attention given to circumstances and the world of the play. Concludes with the performance of a scene from a play. No prior acting experience required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction Theatre Majors Only
(preferred for Performance majors)

THR 242 - Production Studio I

Provides an introduction to the elements of technical theatre as practiced in production. Accomplished through securing and executing a position on the running crew of one of the two main stage productions or through active involvement in the mounting of our Mainstage productions.

Credit Hours: 1

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

THR 321 - A Social History of Western Theatre I

Development of theatre and drama from classical Greece through the Renaissance. Emphasis on theatrical performance including acting, staging, architecture, dramatic literature and audiences.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Or

THR 322 - A Social History of Western Theatre II

Development of theatre and drama from the late Renaissance to World War II. Emphasis on theatrical performance including staging, architecture, dramatic

literature and audiences.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

1 of the following Theatre History/Literature classes: 3 hours

THR 309 - History of Fashion

Exploration of the changes in silhouette and fabrication of clothing from ancient Greece to today. Special emphasis on the social and cultural consequences of fashion in different societies.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 321 - A Social History of Western Theatre I

Development of theatre and drama from classical Greece through the Renaissance. Emphasis on

theatrical performance including acting, staging, architecture, dramatic literature and audiences.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 322 - A Social History of Western Theatre II

Development of theatre and drama from the late Renaissance to World War II. Emphasis on theatrical performance including staging, architecture, dramatic literature and audiences.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 366 - Black American Theatre

Critical study of Black American theatre traditions and innovations from 1800 to present. May include various

writers, dramatists, and performers from across the African Diaspora.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

THR 367 - Women in Theatre

Critical study of women and labor in the history of theatre and performance. Various texts studied may include primary source archival material, historical periodicals and newspapers, academic journals, and published biographies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

THR 368 - Contemporary British and Irish Dramatic Literature

Major playwrights and plays of representative British and Irish Drama after WW II.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 369 - The American Canon: Seminar in Dramatic Literature

This course provides a solid foundation in the major playwrights and playwriting trends of the American canon from the Golden Age (O'Neill, Williams, Miller and Albee) throught the most significant current plays and playwrights.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Building Competencies/Writing Intensive

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 370 - Theories of Theatre and Performance

Study of various theatrical, philosophical and aesthetic bases of performance forms and styles from a variety of periods.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Theatre Studies Option: 30 hours

This option allows students to develop individualized plans of study tailored to their specific academic and professional interests as well as career goals. This is the best approach for students who wish to combine multiple subject areas.

1 of the following: 3 hours

THR 316 - Playwriting I

Intensive and imaginative exploration of playwriting through various exercises designed to foster and challenge personal creativity, ensure aesthetic understanding and application, while advancing fundamentals of craft. Concludes with the creation of a ten-minute play, or short form play.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Crosslisting: CRW 316
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 318 - Devising Theatre

Collaborative creation and presentation of an original performance based on a topic of cultural significance and student interest. Rather than write a dramatic script, students build a performance text. Sources of inspiration may include improvisation, music, dance, visual imagery, and electronic media.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 355 - Directing I

Fundamental principles of directing with emphasis on one-act productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 371 - Applied Dramaturgy

An intensive exploration of dramaturgy through various activities designed to build practical dramaturgy skills such as dramaturgical research, new play development, and audience outreach.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 380 - Stage Management

The techniques used by professionals for the managment of theatrical and performance events. Students will learn organizational and leadership skills necessary for being sucessful stage managers.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 381 - Theatre Management

An introduction to the theory and art of managment in the American theatre. Basic principles of business practices and relate them to theatre management. Examines the various types of theatre organizations and production methods.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

1 of the following Design: 3 hours

THR 305 - Scene Design I

An intermediate study of set design development and presentation building upon coursework begun in THR 125, and focusing specifically upon the art, history, methodology, and practice of theatrical design. 20 lab hours of applied experiential learning required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 306 - Light Design I

Basic techniques of lighting design. Includes fundamentals of lighting production techniques and equipment, and the use of color. Requires lab participation in University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 308 - Costume Design I

Principles of theatrical design applied to stage costume. Period play interpretation, figure drawing, color theory, and rendering techniques pursuant to developing an individual aesthetic and design style.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 310 - Sound Design I

A study and application of the elements required for creating an acoustical landscape for theatrical productions. Topics include design, script analysis and research techniques to create sound designs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

1 of the following Technology: 3 hours

THR 201 - Drafting for the Theatre

Graphic solutions used in set design including drawing of plans, sections, elevations, orthographic projection, and the perspective techniques.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 202 - Rendering for Stage Design

Introduces students to the variety of techniques used to render designs for the stage. Students will learn to communicate their ideas visually through exercises in advanced perspective drawing, painting, costume plates, and model making.

Credit Hours: 3

Prerequisite Courses: THR 201
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 205 - Stage Make-Up I

Theory and practice in the application of make-up for theatrical performances. Emphasizes make-up design theory used by the actor in his/her exploration of character. Requires crew participation in UNCW University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 207 - Costume Construction I

Introduction to sewing techniques, methods of construction, and equipment used with various costume components for the stage. Three lecture and three lab hours per week concurrent with University Theatre productions needs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 208 - Costume Crafts I

Introduction to a variety of craft and garment accessory construction techniques. Individual and departmental production projects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 211 - Introduction to CAD

A study of theatre drafting conventions and software-related techniques. Topics include line-use, dimensions, text, notation, and symbols for use in creating floor plans, elevations, shop drawings, pictorials, and lighting plots.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 312 - Scene Painting

Beginning exercises with materials and tools used to paint stage settings and backdrops. Demonstrations

and projects in brush and non-brush techniques; layout; color mixing; and stencils. Practical projects include color blends; textures; brick and stone; interior and exterior woodwork, and marble. Requires involvement with University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 313 - Properties Design

Examine, explore and practice the theatre craft of properties design through analysis to fabrication, identification, acquisition or repurposing of existing props and materials. 20 hours of applied/experiential learning in a lab situation required.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 314 - Set Decorating

Students will develop, practice and demonstrate a strong working knowledge of the art and craft of theatrical and film set decoration through a series of practical and theoretical projects throughout the semester. 20 hours of applied/experiential learning in a lab situation required.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 325 - Stage Make-up II

Advanced stage make-up focusing on the principles of ventilating, prothestics,wig styling, character analysis and design. Detailed discussion of collaboration between the make-up artist, actor, costume designer, and director will also be included.

Credit Hours: 3

Prerequisite Courses: THR 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 327 - Costume Construction II

Advanced costume construction to further the student's understanding, sewing, and patternmaking skills. Emphasis will be place on draping, couture sewing techniques, and detailed finishing of costumes. A two-hour lab per week is also required for completion of course.

Credit Hours: 3

Prerequisite Courses: THR 207
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 328 - Puppetry – Design and Fabrication

Analysis of puppetry through the study of basic mechanical systems, sculpting, sewing and finishing techniques from conception to presentation. Introduction to puppet design, control and performance

through applied projects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 329 - Materials and Techniques

Advanced study of materials and techniques employed by professional technical designers.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 330 - Audio Engineering I

Examination of current techniques employed by system engineers for creating, editing and recording sound effects for theatrical production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 412 - Production Design for Film

Examination of selected commercial films and art directors from various decades and genres that represent milestones in the history of Production Design. Development of practical design projects such as storyboards, color perspective rendering, 3D models and matte painting.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 430 - Audio Engineering II

Examination of current techniques employed by system engineers regarding reinforcement techniques for live theatrical events. Emphasis will be on: microphone use for vocal and instrumental reinforcement in musical and non-musical situations, and the integration of system components (both digital and analog) into system designs for live production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

1 of the following Theatre History/Literature: 3 hours (must be different from Core choices)

THR 309 - History of Fashion

Exploration of the changes in silhouette and fabrication of clothing from ancient Greece to today. Special emphasis on the social and cultural consequences of fashion in different societies.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 366 - Black American Theatre

Critical study of Black American theatre traditions and innovations from 1800 to present. May include various writers, dramatists, and performers from across the African Diaspora.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

THR 367 - Women in Theatre

Critical study of women and labor in the history of theatre and performance. Various texts studied may include primary source archival material, historical periodicals and newspapers, academic journals, and published biographies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

THR 368 - Contemporary British and Irish Dramatic Literature

Major playwrights and plays of representative British and Irish Drama after WW II.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 369 - The American Canon: Seminar in Dramatic Literature

This course provides a solid foundation in the major playwrights and playwriting trends of the American canon from the Golden Age (O'Neill, Williams, Miller and Albee) throught the most significant current plays and playwrights.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 370 - Theories of Theatre and Performance

Study of various theatrical, philosophical and aesthetic bases of performance forms and styles from a variety of periods.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Theatre Electives: 18 hours

18 additional hours of THR courses at the 200-400 level.
9 hours in related courses from other departments may be considered for Theatre electives 200-400 level in consultation with your advisor and approval of Chair.

Performance Option: 30 hours

This option offers students pre-professional training in stage and film performance which prepares them for a pluralistic range of outcomes including professional employment in theatre, film or television, future

advanced or graduate study, or skills leading to work in allied performance fields of interest.

1. To choose this option students must meet with Chair to discuss career goals and determine if performance option is best choice to meet those goals.
2. Audition for Faculty
3. Students in the performance option must apply to continue to stay in this option, in the Spring of their first year after completing THR 231, THR 301 and while enrolled in THR 302 and THR 332. The application form will be available online and sent to the Chair by March 1. Decisions will be made by March 20.
4. Fall semester (THR 231 & THR 301) & Spring semester (THR 302 & THR 332) concurrent in first year of study in this option. Must have B or better in each of these classes to continue in the performance option.

In addition to the core requirements, the student must complete the following.

THR 232 - Improvisation for Theatre Majors

An in-depth exploraton of spontaneous dramatic playing through intensive exercises and theatre games meant to generate greater individual freedom and self-discipline, as well as to employ improvisation techniques in acting to develop characterization, stage movement, and ensemble performance through the use of short form and long form improvisation.

Credit Hours: 3

Prerequisite Courses: THR 231
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 301 - Physical and Vocal Expression for the Performer I

Prerequisite: Theatre major in the 'Performance' concentration or consent of instructor. Exploration of the body and voice as the primary tools of the actor's instrument. Identification of habitual practices such as physical tensions and manifestation of blocks will be addressed. Codified methodologies of vocal training for the actor will be introduced. Intended to initiate a lifelong process of opening the body as an instrument

for free expression of the voice and imagination.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 302 - Physical and Vocal Expression for the Performer II

Continuation of the process of opening the body as an instrument for free expression of the voice and imagination. Exposure to working with heightened language, verse, Greek plays, and poetry.

Credit Hours: 3

Prerequisite Courses: THR 301 with a grade of B or better.
Course Repeatability: Course may not be repeated.

THR 318 - Devising Theatre

Collaborative creation and presentation of an original performance based on a topic of cultural significance and student interest. Rather than write a dramatic

script, students build a performance text. Sources of inspiration may include improvisation, music, dance, visual imagery, and electronic media.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 332 - Craft of Acting II - Listening and Responding in the Moment

Study of acting techniques based on methodologies including those of Stanislavsky, Meisner, Donellan, and Hagen. In-depth exploration of contemporary realism and comedy scene study.

Credit Hours: 3

Prerequisite Courses: THR 230 (grade of B or better) or THR 231 (grade of B or better), or consent of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Theatre Major

THR 333 - Craft of Acting III - Advanced Scenework

Exploration of the foundations of performing including late 19th century realism, absurdism, existenialism, theatre of cruelty, and expressionism.

Credit Hours: 3

Prerequisite Courses: THR 301 with a grade of B or better and THR 332 with a grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Theatre Major only

THR 433 - Craft of Acting IV - Verse and Shakespeare

Focus on the performance of Shakespeare by understanding how Shakespearean writing flows from world-perception to response. Emphasis on poetic meter, language, and heightened language. Exploration of three-dimensional character development within the confines of Shakespearean verse.

Credit Hours: 3

Prerequisite Courses: THR 332 and THR 333, each with a grade of C or better.
Course Repeatability: Course may not be repeated.
Major Restriction Theatre Major

THR 486 - Senior Seminar: Performance

A comprehensive assessment of the performance student's experience and study as a theatre major in preparation for continued study or employment. Preparation of portfolio and scenes.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing in theatre.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

2 of the following courses: 6 hours

THR 334 - Audition Techniques for Stage and Film

Designed to apply the skill set acquired during acting study to typical industry casting opportunities. Four auditioning contexts: theatrical, commercial, film, and television. Students are presented with actual scripts and scenes used in entertainment industry situations. Auditions are taped for instructor, student, and peer critique. Upon successful completion, students gain understanding of the audition process, including presentation of self in an appropriate, professional manner.

Credit Hours: 3

Prerequisite Courses: THR 332
Additional Restrictions/Requirements: Prerequisite course or consent of instructor. Junior or senior theatre majors only.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 335 - Acting for the Camera

Exploration of acting techniques particular to the mediums of film and video.

Credit Hours: 3

Prerequisite Courses: THR 230 or THR 231 or THR 332 or consent of instructor.
Crosslisting: FST 335
Course Repeatability: Course may not be repeated.
Additional Course Fees: NoneAdditional Course Fee Schedule

THR 336 - Shakespeare and Autism

An ensemble based intra-disciplinary and cross-disciplinary theatre performance course. The course provides students enrolled in the course with the training needed to offer interactive Shakespeare-based drama workshops to children from the community who have been diagnosed with autism spectrum disorder (ASD).

Credit Hours: 3

Additional Restrictions/Requirements: Consent of

instructor.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 355 - Directing I

Fundamental principles of directing with emphasis on one-act productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 380 - Stage Management

The techniques used by professionals for the managment of theatrical and performance events. Students will learn organizational and leadership skills necessary for being sucessful stage managers.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 395 - Applied Studies in Theatre

A broad study of topics within the theatre discipline, such as advanced design and technology, history of theatrical design, dramatic criticism, advanced directing, advanced playwriting, and stage management. May be repeated under a different subtitles.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

THR 401 - Advanced Movement

Advanced movement techniques and skills for actors including armed and unarmed combat, basic stuntwork, circus skills and viewpoints. Period style courtesies such as Commedia dell'arte appropriate for the stage or camera.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 402 - Advanced Voice

Advanced technical vocal skills for actors including dialects for the stage expressed in the world canon of literature and performance. Advanced application of the International Phonetic Alphabet and vocal production will be explored.

Credit Hours: 3

Prerequisite Courses: THR 301 and THR 302
Additional Restrictions/Requirements: Theatre major. Consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 432 - Acting Technique: Jacobean Theatre

Extends the training from Acting III into Jacobean playwrights. Creating a process for a deeper understanding of working with classical text is a central focus.

Credit Hours: 3

Prerequisite Courses: THR 333
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 435 - Acting for the Camera II

Expands upon the foundations learned in Acting for the Camera I with greater emphasis on character development, advanced acting technique for camera, and being able to provide honest performances in an on-demand setting. In-depth work with emotion and physicality will be explored.

Credit Hours: 3

Prerequisite Courses: THR 335

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 455 - Directing II

Advanced techniques in the direction of plays for the stage.

Credit Hours: 3

Prerequisite Courses: THR 355
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 495 - Theatre Seminars

Consideration of special subjects not covered in regular course offerings. More than one topic may be taken for credit.

Credit Hours: 1 To 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Design and Technology Option (30 hours):

Students in the production design and technology option will develop the knowledge of all aspects of design including scenic, costume, lighting and sound as well as gain the skill sets to create and realize their work. They will be given the opportunity to collaborate on productions with the assistance of the faculty.

To choose this option students must meet with Chair to discuss career goals and determine if design and technology option is best choice to meet those goals.

In addition to the core requirements, the student must complete:

Design and Technology Core: 6 hours

THR 242 - Production Studio I

Provides an introduction to the elements of technical theatre as practiced in production. Accomplished through securing and executing a position on the running crew of one of the two main stage productions or through active involvement in the mounting of our Mainstage productions.

Credit Hours: 1

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

THR 242 (1hour) must be taken again in addition to the THR 242 core requirement.

THR 251 - Production Studio II

An advanced study in mounting theatrical productions. Focuses on elements of the technical process and how it is integrated with the other collaborative elements into production. Students enrolled in this course will take a managerial role through the supervision of beginning lab level students.

Credit Hours: 2

Prerequisite Courses: THR 242
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 2

THR 487 - Senior Seminar: Design and Technology

A comprehensive assessment and synthesis of the design/tech student's four-year experience as a theatre major in preparation for employment or continued study. Development of resumand career goals strategy, organization and formatting of portfolio materials, presentation exercises, and a study of interview and workplace issues.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing in theatre.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

1 of the following Design courses: 3 hours

THR 305 - Scene Design I

An intermediate study of set design development and presentation building upon coursework begun in THR 125, and focusing specifically upon the art, history, methodology, and practice of theatrical design. 20 lab hours of applied experiential learning required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 306 - Light Design I

Basic techniques of lighting design. Includes fundamentals of lighting production techniques and equipment, and the use of color. Requires lab participation in University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 308 - Costume Design I

Principles of theatrical design applied to stage costume. Period play interpretation, figure drawing, color theory, and rendering techniques pursuant to developing an individual aesthetic and design style.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 310 - Sound Design I

A study and application of the elements required for creating an acoustical landscape for theatrical productions. Topics include design, script analysis and research techniques to create sound designs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

6 of the following courses: 18 hours in consultation with Theatre advisor

THR 201 - Drafting for the Theatre

Graphic solutions used in set design including drawing of plans, sections, elevations, orthographic projection, and the perspective techniques.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 202 - Rendering for Stage Design

Introduces students to the variety of techniques used to render designs for the stage. Students will learn to communicate their ideas visually through exercises in advanced perspective drawing, painting, costume plates, and model making.

Credit Hours: 3

Prerequisite Courses: THR 201
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 205 - Stage Make-Up I

Theory and practice in the application of make-up for theatrical performances. Emphasizes make-up design theory used by the actor in his/her exploration of character. Requires crew participation in UNCW University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 207 - Costume Construction I

Introduction to sewing techniques, methods of construction, and equipment used with various costume components for the stage. Three lecture and three lab hours per week concurrent with University Theatre productions needs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 208 - Costume Crafts I

Introduction to a variety of craft and garment accessory construction techniques. Individual and departmental production projects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 211 - Introduction to CAD

A study of theatre drafting conventions and software-related techniques. Topics include line-use, dimensions, text, notation, and symbols for use in creating floor plans, elevations, shop drawings, pictorials, and lighting plots.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 295 - Topics in Theatre

A broad study of a topic within the theatre discipline, such as history of theatrical design, dramatic theory. Commedia dell Arte. Content will be geared to the student with a general understanding of theatre. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: THR 165
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 305 - Scene Design I

An intermediate study of set design development and presentation building upon coursework begun in THR 125, and focusing specifically upon the art, history, methodology, and practice of theatrical design. 20 lab hours of applied experiential learning required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 306 - Light Design I

Basic techniques of lighting design. Includes fundamentals of lighting production techniques and equipment, and the use of color. Requires lab participation in University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 308 - Costume Design I

Principles of theatrical design applied to stage costume. Period play interpretation, figure drawing, color theory, and rendering techniques pursuant to developing an individual aesthetic and design style.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 309 - History of Fashion

Exploration of the changes in silhouette and fabrication of clothing from ancient Greece to today. Special emphasis on the social and cultural consequences of fashion in different societies.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 310 - Sound Design I

A study and application of the elements required for creating an acoustical landscape for theatrical productions. Topics include design, script analysis and research techniques to create sound designs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 312 - Scene Painting

Beginning exercises with materials and tools used to paint stage settings and backdrops. Demonstrations and projects in brush and non-brush techniques; layout; color mixing; and stencils. Practical projects include color blends; textures; brick and stone; interior and exterior woodwork, and marble. Requires involvement with University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 313 - Properties Design

Examine, explore and practice the theatre craft of properties design through analysis to fabrication, identification, acquisition or repurposing of existing props and materials. 20 hours of applied/experiential learning in a lab situation required.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 314 - Set Decorating

Students will develop, practice and demonstrate a strong working knowledge of the art and craft of theatrical and film set decoration through a series of practical and theoretical projects throughout the semester. 20 hours of applied/experiential learning in a lab situation required.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 325 - Stage Make-up II

Advanced stage make-up focusing on the principles of ventilating, prothestics,wig styling, character analysis and design. Detailed discussion of collaboration between the make-up artist, actor, costume designer, and director will also be included.

Credit Hours: 3

Prerequisite Courses: THR 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 327 - Costume Construction II

Advanced costume construction to further the student's understanding, sewing, and patternmaking skills. Emphasis will be place on draping, couture sewing

techniques, and detailed finishing of costumes. A two-hour lab per week is also required for completion of course.

Credit Hours: 3

Prerequisite Courses: THR 207
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 328 - Puppetry – Design and Fabrication

Analysis of puppetry through the study of basic mechanical systems, sculpting, sewing and finishing techniques from conception to presentation. Introduction to puppet design, control and performance through applied projects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 329 - Materials and Techniques

Advanced study of materials and techniques employed by professional technical designers.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 330 - Audio Engineering I

Examination of current techniques employed by system engineers for creating, editing and recording sound effects for theatrical production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 380 - Stage Management

The techniques used by professionals for the managment of theatrical and performance events. Students will learn organizational and leadership skills necessary for being sucessful stage managers.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 381 - Theatre Management

An introduction to the theory and art of managment in the American theatre. Basic principles of business practices and relate them to theatre management. Examines the various types of theatre organizations and production methods.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 395 - Applied Studies in Theatre

A broad study of topics within the theatre discipline, such as advanced design and technology, history of theatrical design, dramatic criticism, advanced directing, advanced playwriting, and stage management. May be repeated under a different subtitles.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

THR 405 - Scene Design II

Expand upon the study and practice of scene design, challenging the studients to explore and create for the demands of larger scale productions, including multi-set dramas, musical theatre and opera.

Credit Hours: 3

Prerequisite Courses: THR 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 406 - Lighting Design II

Provides hands-on lighting and design experience in the light lab. Includes a variety of projects that will expand the student's abilitiy to ""look at light"" and to develop an eye as a designer. This course includes lab

work on university productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 408 - Costume Design II

Designed to further the student's understanding of historical period details, figure drawing, and color theory. Emphasis will be placed on rendering techniques, script analysis, and character interpretation. The students will also improve on their sewing and patterning techniques to create actualized costumes.

Credit Hours: 3

Prerequisite Courses: THR 207 and THR 308
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 410 - Sound Design II

Advanced study of sound design within a project-based course. Students will submit production concept statments and recordings for the production in a quality format. Special focus will be on original composition for theatrical production. All work will be formally submitted for evaluation.

Credit Hours: 3

Prerequisite Courses: THR 310
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 411 - Three-Dimensional Computer Modeling

A study of software to develop models of scene designs for the stage. Topics include shape and texture generation; light handling; rendering; scanning; and output.

Credit Hours: 3

Prerequisite Courses: THR 211

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 412 Production Design **Credits / Units:** 3

THR 430 - Audio Engineering II

Examination of current techniques employed by system engineers regarding reinforcement techniques for live theatrical events. Emphasis will be on: microphone use for vocal and instrumental reinforcement in musical and non-musical situations, and the integration of system components (both digital and analog) into system designs for live production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 495 - Theatre Seminars

Consideration of special subjects not covered in regular course offerings. More than one topic may be taken for credit.

Credit Hours: 1 To 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Theatre Elective: 3 hours

- Additional 3 hours of Theatre courses at the 200 - 400 level.

Total 49 hours:

Additional Information:

A "C" (2.00) is required in each course counted toward the major unless noted otherwise.

Double Majors: Students who have selected a primary major in another discipline should request from the Department of Theatre chair an advisor from the option area they have selected.

Tourism, Recreation, and Sport, B.A.

http://www.uncw.edu/shahs/academic/recreationsporttourism.html

The Mission of the Tourism, Recreation and Sport baccalaureate program is to provide students with a comprehensive educational and practical

experience thereby producing exemplary, competent and ethical professionals qualified to work and lead in the leisure industry and make positive contributions in their community. Graduates from this program serve as qualified professionals providing leisure opportunities and experiences for individuals from all walks of life to enhance their overall health, well-being and quality of life. The program faculty are highly qualified, experienced and committed to student success. The program curriculum meets the highest standards of academic rigor, professionalism and ethical conduct. Students enrolled in the program participate in faculty research, international and domestic travel opportunities and experiential, applied and service learning experiences. The program's core values are honesty, ethical behavior, innovation, creativity, responsibility and engagement. The program's tourism, hospitality and events concentration prepares students to work for travel agencies, cruise ships, convention and visitor centers, theme parks, event planning agencies, resorts and other tourism, hospitality and event planning organizations. The program's sport and recreation concentration prepares students to work in university campus recreation and intramurals, YMCA

athletic programming, sport athletic associations and other public and non-profit organizations.

Computer Requirement:

To satisfy the computer requirement for the B.A. degree in Tourism, Recreation, and Sport a student must successfully complete REC 359.

Oral Communication Requirement:

To satisfy the oral communication requirement for the B.A. degree in Tourism, Recreation, and Sport a student must successfully complete REC 380.

Requirements for a Major in Tourism, Recreation and Sport for the B.A. Degree:

Core Courses (46 hours):

REC 265 - Leisure and Society

An introduction to leisure as a significant force in contemporary life. The importance of leisure for individuals, groups and cultures is explored through social, technological, psychological, historical, philosophical, anthropological, and economic foundations.

Credit Hours: 3

Additional Restrictions/Requirements: Open to REC majors and minors or consent of instructor.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 270 - Program Planning and Leadership

An introduction to recreation program planning, including: needs assessments, organization, implementation, and evaluation of leisure services.

Credit Hours: 3

Additional Restrictions/Requirements: Appropriate major or minor, or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 303 - Recreation for Everyone

This course explores the various social and cultural factors that shape the management and operation of recreation, sport, and tourism organizations. Students will examine topics such as social identities, bias, common terminology, and the dynamics of power and influence within organizations and communities. Through discussions and case studies, the course will encourage students to develop a broader perspective on workplace and community interactions while enhancing their ability to work effectively with all individuals.

Credit Hours: 3

Prerequisite Courses: REC 265 and REC 270.
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

REC 330 - Excellence in Service Quality

Principles of managing and delivering excellent service quality tourism, hospitality, and recreational

organizations or agencies. Emphasis on how to design a service plan, formulate service design, develop a service culture, and organize service delivery and recovery.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or by permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 348 - Practicum in Recreation Services

Supervised practicum in a recreation setting. Relates theory to practical application in the field. Placements chosen from community, commercial, outdoors or therapeutic settings. Requires a minimum of 100 hours of field work.

Credit Hours: 3

Prerequisite Courses: REC 265 and (REC 270 or RTH 368)

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

REC 359 - Research and Evaluation in Tourism, Recreation, and Sport

Designed to familiarize students with fundamental principles underlying research methods. Included are basic procedures for conducting experimental, descriptive, historical, qualitative research, computer applications, basic measurement, statistical methods, critical thinking, and scholarly writing.

Credit Hours: 3

Prerequisite Courses: REC 265.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 372 - Foundations of Public, Nonprofit, & Community Recreation

Compare and contrast philosophical perspectives of public, non-profit and community recreational management, investigate resource allocations, discuss the historical relevance of each sector, investigate social, environmental, and economic trends within each sector, and introduce professional organizations at all levels.

Credit Hours: 3

Prerequisite Courses: REC 265, REC 270.
Course Repeatability: Course may not be repeated.
Major Restriction REC

REC 375 - Leadership and Management in Tourism, Recreation, and Sport

Principles and practices of contemporary leisure service management, particularly the effective and efficient management of human, fiscal, informational, and physical resources through planning, organizing, directing, leading, and controlling decisions. Tutorials, case studies, and computer applications.

Credit Hours: 3

Prerequisite Courses: REC 265 and REC 270.
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 380 - Marketing for Tourism, Recreation, and Sport

Development of marketing plans and strategies for recreation, sport and tourism industries. Emphasis on analyzing the marketing process and planning the marketing mix.

Credit Hours: 3

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Information Literacy

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 390 - Pre-Internship Seminar

Preparation for the internship experience with emphasis on development of professional behaviors that facilitate internship and career success. Instruction methods include readings, discussions, individual and group activities, and use of electronic media.

Credit Hours: 1

Additional Restrictions/Requirements: Junior and senior standing, REC majors only, or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 1

REC 440 - Risk Management and Liability in Recreation Services

Examination of legal and legislative issues affecting the leisure delivery system in governmental, quasi-public, private, commercial, and institutional settings. Topics include terminology, risk management procedures,

ordinances, regulatory law, licensing, legal redress, and constitutional law at the national and state levels.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 476 - Budgeting and Finance in Tourism, Recreation, and Sport

This course investigates basic economic principles behind managing finances and budgets in recreation, sport and tourism settings. Particular attention will be applied to revenue generation, specifically via grant writing, and creating and managing budgets.

Credit Hours: 3

Prerequisite Courses: REC 375.
Additional Restrictions/Requirements: REC majors and minors only or consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 498 - Internship in Tourism, Recreation, and Sport

Program planning and administration in a tourism, recreation, and sport setting. A minimum of 480 hours and 12 consecutive weeks of fieldwork are required.

Credit Hours: 12

Additional Restrictions/Requirements: REC major, senior standing and an overall 2.00 grade point average, completion of all other courses required for the major, and consent of instructor, school director and college dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Additional Fee - Liability InsuranceAdditional Course Fee Schedule

Students must select one of the following options (18 hours):

Tourism, Hospitality and Events Option:

All students are required to complete:

REC 381 - Meetings, Expositions, Special Events and Conventions

An overview of the convention, exposition, meeting, and convention and visitors bureau industries and the career options within; provision of an essential understanding of the components involved in the operation of successful meetings, conventions, and special events.

Credit Hours: 3

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction REC**Minor Restriction** REC

REC 451 - Travel and Tourism

A description of the key components that make a global tourism designation a success: traveler's motivation, theories of behavior, planning, development, and

forecasting supply and demand. Students also learn about the delicate and sensitive relationship tourism has with its surrounding social, natural, and coastal environment.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 452 - Hospitality Management Operations

Analysis and evaluation of the operations behind management within the tourism and hospitality industries, specifically within food and beverage, transportation providers, attractions, tour operators and specialized tour segments such as the cruise industry and gaming.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the REC major and minor or with permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 453 - Hotel and Lodging Management

Decision making, analysis and process improvement in managing the major divisions of a lodging establishment.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

- 6 additional hours of support courses that must be approved by major advisor.

Sport and Recreation Option:

All students are required to complete:

REC 391 - Sport, Culture and Society

An examination of the role of sport in contemporary American society, and how sport is linked to the structure and dynamics of social organizations. The impact of sports on culture, specifically: values, ethics, race, gender, discrimination, economics and the media will be studied.

Credit Hours: 3

Prerequisite Courses: REC 265
Additional Restrictions/Requirements: Open only to students within the REC major and minor or by permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 393 - Campus Recreation and Sports Administration

Introduction to the multi-faceted recreational offerings provided by campus recreation departments, including planning, programming, administration, and the function of campus recreation. Field work required.

Credit Hours: 3

Prerequisite Courses: REC 265
Additional Restrictions/Requirements: REC majors and minors only or by permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 394 - Recreational Sports and Fitness Facility Operations

Examination of key issues in recreational facility organization and management including facility operation, administration, and program promotion within a facility. Emphasis on supervision, maintenance, and operation of leisure areas and facilities. Field work required.

Credit Hours: 3

Prerequisite Courses: REC 265
Additional Restrictions/Requirements: REC majors and minors only or by permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 396 - Leisure, Health, and Wellbeing

Examination of how recreation, parks and leisure contribute to the health and wellbeing of individuals, families, communities, and societies.

Credit Hours: 3

Prerequisite Courses: REC 265, REC 270.
Additional Restrictions/Requirements: Restricted to REC majors.
Course Repeatability: Course may not be repeated.
Major Restriction REC

REC 397 - Collegiate and Professional Sport Management

This course serves as an overview to the field of sport management and provides an opportunity for the exploration of effective management strategies and the body of knowledge associated with pursuing a career in sport management, specifically within professional and collegiate sport settings. Content will focus on the history, leadership, marketing, facility and event management, and financial principles within professional and collegiate sport. Additionally, topics

specific to professional sport will cover communications, analytics, sales, sponsorships and licensing, while collegiate sport concepts will focus on governing bodies, compliance and Title IX, academics and eligibility, media relations, alumni relations and support services.

Credit Hours: 3

Prerequisite Courses: REC 265, REC 270.
Additional Restrictions/Requirements: Restricted to REC majors.
Course Repeatability: Course may not be repeated.
Major Restriction REC

3 hours of support courses that must be approved by major advisor.

Total Credit Hours: 64

Additional Information:

A "C" (2.00) grade point average or better is required among all courses used to satisfy the recreation, sport leadership, and tourism management major and a "C" grade or better is required in each required recreation,

sport leadership, and tourism management (REC) course counted toward the major.

Workforce Learning and Development, B.S.

The Bachelor of Science in Workforce Learning & Development is a flexible, accelerated online program designed for working individuals. If you are passionate about training and developing adult learners in the corporate sector, community college education, government agencies, or military, this major is perfect for you. Throughout this program, you will develop the knowledge and skills needed to design, develop, manage, deliver, and evaluate training programs to help your organization build a more skilled workforce. Graduates will be able to:

- Examine current and future trends and practices in workforce learning and development.
- Develop creative thinking, problem-solving, project management, communication, and leadership skills.
- Build and facilitate effective training programs and professional development initiatives.

Requirements for a Major in Workforce Learning and Development

Oral Communication Requirement

To satisfy the oral communication requirement for the B.S. degree in WorkforceLearning & Development a student must successfully complete WLD 480.

Core Requirements (39 Credit Hours)

All candidates for the B.S. degree must complete the following core requirements:

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

WLD 300 - Effective Communication in Workforce Learning Development

This course is designed to provide a foundation in effective written and oral communication techniques for workforce training and development professionals that introduces associated theories and practical applications of those theories such as formation of job aides, resumes, e-mail, social media, memoranda, letters, applying for grants, proposals, and reports. Nonverbal and intercultural communications are emphasized.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 310 - Global Organizational Learning & Development

Designed to develop an appreciation for the abilities, insights, and ideas of all individuals. Emphasis will be

on working effectively with diverse populations, recognizing the need to address format, availability, styles, abilities, motivations, and/or backgrounds when providing learning and development solutions across and within borders and cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

WLD 315 - Foundations of Adult and Workforce Education

Designed to investigate historical, economic, psychological, and education foundations of post-secondary, vocational, adult training and re-training, and workforce learning programs. Will address who participates in workforce education, why they participate, and how andragogy influences the delivery of workforce education.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

WLD 330 - Instructional Strategies for Workforce Learning & Development

Designed to develop knowledge of adult learning theories and concepts and their application to the instructional process/strategies with adults**.** Understand andragogy, strategies, materials, implementation, and delivery of learning activities with adults**.**

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 335 - Diverse Learners in the Workforce

Designed to effectively explore, recognize, and understand diversity in work settings and how that understanding is used to meet the unique learning needs and identify the opportunities for collaborative efforts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

WLD 340 - Introduction to Organizational Development

Designed to develop an understanding of the practices used to diagnose organizational needs and subsequent organization interventions and improvements within the workforce.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 375 - Principles of Adult and Workforce Learning and Development

Designed to explore basic theories of adult learning and instruction as they relate to the learner, the workplace and the social context. Develop an understanding of basic adult learning and instruction principles including design and delivery of education.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 380 - L&D Program Development

Designed to develop a systematic approach to assessing employment and training needs, developing curriculum, assessing organizational and community-based resource needs and measuring impact.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

WLD 400 - Principles of Instructional Design

Designed to provide an analysis of theoretical foundations of instructional design and application in design practice. The course will examine multidisciplinary and multicultural influences upon instructional theory and development. A broad range of current design research and theory and future

directions in design theory and practice will be explored.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 401 - Motivation in Workforce Learning & Development

Reviews and analyzes theories of motivation in relation to instructional design strategies. The primary emphasis is on the motivation to learn and techniques for stimulating and sustaining learner motivation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 405 - Fundamentals of Learning in Workforce Learning & Development

Exploration of the workplace as a learning environment, with a focus on the social and political dynamics of diverse learners and workplace learning communities.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 480 - WLD Capstone

Designed to provide students opportunities to investigate problems in workforce learning and development through an on-site experience. Special approval needed from the instructor. Restricted to Workforce Learning and Development majors.

Credit Hours: 3

Additional Restrictions/Requirements: instructor approval.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction Workforce Learning and Development

Electives (30 Credit Hours)

At least 30 hours from the following courses:

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

LED 311 - Communication and Leadership

Theory and practice of leadership. Focuses on issues of cohesiveness, trust, motivation, vision, and goals. Development of conflict management and decision-making goals.

Credit Hours: 3

Prerequisite Courses: LED 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

LED 411 - Contemporary Leadership Applications

Concepts related to leadership. Ability to envision and implement change for the common good using diverse perspectives and contexts. Applies leadership and organizational theories through real world experience and contemporary issues.

Credit Hours: 3

Prerequisite Courses: LED 311
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or STT 215
University Studies: Building Competencies/Information Literacy

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 372 - Service Operations Management

Study of the tools necessary to effectively manage a service organization. Particular attention will be paid to subtle relationships among the systems, strategy, and technology that define service delivery systems and their implications for customer satisfaction and profitability. Topics include service strategy and market position, role of the information resource, the service delivery system, service facility location, service quality, and managing supply and demand.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 472 - Project Management

This course introduces the fundamentals of project management, beginning with project definition and culminating in the post-project review. Students will learn techniques, terms and guidelines that are used to manage costs, schedules, risk, group dynamics and technical aspects throughout the life cycle of the project.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 486 - Sociology of Work and Occupations

Analysis of the place of work in society. Examines occupational structures as the primary link between persons and the larger society. Topics include the growth and development of occupational structure, occupations and technological change, and

organizational complexity.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and three additional hours in sociology or economics.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WLD 305 - Emotional Intelligence in Training and Development

Designed to investigate the role of emotional intelligence for understanding, assessing, and regulating your emotions, interpreting the verbal and nonverbal behavior of learners, and adjusting behavior and instruction in relation to learners.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 325 - Facilitation and Presentation in Learning & Development

Designed to research and discover effective facilitation skills in adult education and workplace environs, including the nature of groups, group dynamics, effective planning, role clarification, identifying intervention points, & effective tools and techniques useful in building consensus around a topic, using effective questioning skills to guide participants toward action, and developing effective methods for addressing conflicts among participants.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 359 - Work Experience in Workforce Learning & Development

Credit granted for past work experience in the area of workforce learning and development while employed in business & industry, non-profit, government service, or military organizations. Students will be required to develop a portfolio of their experiences. Instructor approval needed.

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Instructor approval.
Course Repeatability: Course may not be repeated.

WLD 391 - Occupational Learning & Development

Credit granted for past professional development in the area of workforce learning and development while employed in business & industry, non-profit, government service, or military organizations. Students will be required to develop a portfolio of experiences. Instructor approval required.

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Instructor approval.
Course Repeatability: Course may not be repeated.
Major Restriction Workforce Learning and Development

WLD 401 - Motivation in Workforce Learning & Development

Reviews and analyzes theories of motivation in relation to instructional design strategies. The primary emphasis is on the motivation to learn and techniques for stimulating and sustaining learner motivation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 420 - Organizing and Directing Instructional Development

Examination of principles of planning, scheduling, allocating resources, budgeting, proposal preparation, cost control and personnel management for instructional projects. Students negotiate an effective design project plan, how to implement that plan, and how to control and monitor project activities. Case studies will be used as a basis for exercises and discussions. Each student will develop a plan that meets specific criteria.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 430 - Appraising Organizational Change in Workforce Learning and Development

Designed to provide an introduction to evaluation techniques associated with educational evaluation media and materials, courses, curricula, students or other elements in educational programs. Various units of the course will focus upon particular evaluation techniques.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 431 - Assessing Learning Outcomes

Examination of the nature and purpose of measurement and assessment of learning outcomes. Particular attention is paid to the concepts of reliability, validity, norms, interpretation of scores, response sets, fairness in testing and performance assessment, and norm referenced vs. criterion referenced tests. A variety of instruments that are used to measure or assess human attributes and behaviors are studied.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLD 498 - WLD Internship

Provides the student with an opportunity to gain knowledge and skills from a planned work experience in workforce learning and development. Students will meet learning outcomes developed jointly with the site supervisor. Internship placements provide learning experiences not available in the classroom setting. internships provide entry-level, career-related experience and workplace competencies that employers value when hiring new employees.

Credit Hours: 3

Additional Restrictions/Requirements: Must be approved by the instructor.
Course Repeatability: Course may not be repeated.

LED 424 - Evaluation in Support of Organizational Learning

In this course, students develop an understanding of evaluation and its role in learning organizations, with

emphasis on evaluating learning, performance, and change initiatives. Major components of the course include program and training evaluation, strategic learning, systems thinking, evaluation principles and guidelines, and organizational learning and change.

Credit Hours: 3

Crosslisting: EDL 524.
Course Repeatability: Course may not be repeated.
Additional Course Fees: None

Total Credit Hours: 69

Major with Licensure

Anthropology, B.A. with Social Studies Teacher Licensure

Program Coordinator: Dr. William Alexander

Admission Requirements

- See University Admission Requirements

- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for a B.A. in Anthropology with Social Studies Teacher Licensure

Students seeking an Anthropology, B.A. with Social Studies Teacher Licensure must complete the major requirements found in Anthropology, B.A. and the following:

Professional Studies - Secondary Education (39 Credit Hours)

Professional Core

SEC 200 - Teaching, Schools and a Global Society

Introductory course for licensure in secondary education. Emphasis on interpretation and evaluation of the development of public education in the United States using historical, sociological, cultural, and philosophical perspectives. Course examines the goals

and purposes of education in a global context with particular attention to the education of students in grades 9-12.

Credit Hours: 3

Corequisite Courses: SEC 210 and SEC 220
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 210 - Diverse Learners in Secondary Schools

Focus on teaching diverse learners in the high school classroom including students with disabilities, linguistically diverse individuals, students identified as academically gifted and talented, and students at risk for school failure. Instructional practices and classroom managment strategies that support all students in general education classes will be explored.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 220 - Practicum Block I

Candidates will observe, participate, assist, tutor and teach in secondary classrooms. Emphasis is placed on the study of adolescent development with practical experiences in high school classrooms. Candidates will observe instruction including lesson planning, lesson implementation and assessment.

Credit Hours: 3

Corequisite Courses: SEC 200 and SEC 210.
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Studies

SEC 310 - Curriculum Design and Learning Assessment

Course designed to provide conceptual tools and analytic skills essential for designing effective instructional activities that incorporate technology as well as providing tools for planning, implementing, and evaluating lessons.

Credit Hours: 3

Corequisite Courses: SEC 320.
Additional Restrictions/Requirements: Only open to those pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 320 - Practicum Block II

Development of tutoring and instructional strategies to improve high school student literacy. Candidates will tutor and teach in a secondary classroom/tutoring center with an emphasis on multiple literacy skills.

Credit Hours: 3

Corequisite Courses: SEC 210
Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 405 - Theory and Practice in Teaching Secondary Social Studies (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary social studies. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 410 - ESL Topics for Secondary Teachers

Corequisites: SEC 403, SEC 404, SEC 405, or SEC 406; SEC 421 and SEC 422. This course will introduce Secondary educators to the field of English as a second language and meeting the needs of students with limited formal schooling, long term English language learners and older language learners. Topics include cross-cultural communications, ESL methodology, assessment and curriculum adaptation.

Credit Hours: 3

Prerequisite Courses: SEC 205
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 421 - Student Teaching I (9-12)

Candidates will observe and teach in specific content area in secondary public school classrooms.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester

SEC 430 - Seminar-Leadership, Reflection and Management Practices

Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline. Emphasis is given to 1) acquisition of leadership qualities and characteristics, 2) professional documentation of reflective growth, and 3) integration of effective behavior management strategies.

Credit Hours: 3

Corequisite Courses: SEC 431
Additional Restrictions/Requirements: All professional core and specialty area courses, acceptance into the Watson School of Education, and a 2.70 GPA on all work attempted at UNCW.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 431 - Student Teaching - Secondary Education

Students will be assigned full-time, or equivalent, to practicum sites within their areas of specializations. Students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practica are offered in the following areas of specialization: biology, chemistry, English, geology, history, mathematics, music, physics, and social studies.

Credit Hours: 12

Corequisite Courses: SEC 430
Additional Restrictions/Requirements: As specified for SEC 430.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Social Studies Electives/Collaterals (18 Credit Hours)

HST 101 - Europe in the World I

Introduction to pre-modern European history, from the development of the first city-states in the Near East, through the rise of Athens and Rome, and concluding with the Middle Ages and Early Modern Period. Specific attention is given to the globally interconnected nature of European history.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

or

HST 102 - Europe in the World II

Introduction to modern European history. Examination of Europe's transformations and global interactions through the discussion of significant events, groups, and individuals that contributed to developments such as the French Revolution and the rise of democracy, the Industrial Revolution and the modern economy, world wars and dictatorships.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

and

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 105 - United States to 1865

American history from the pre-colonial period to the beginning of Reconstruction. Examines the impact of the country's cultural diversity through the study of the

arts, law, politics, war, religion, technology, immigration, and the emergence of regional economic systems.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 106 - United States from 1865 to Present

The history of the United States since the Civil War. Examines the development of American political, social, and cultural systems, foreign policy, and the emergence of the United States as a world power.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse

Nation
Course Repeatability: Course may not be repeated.

and
One Economics course (ECN 125 is strongly recommended)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Total Credit Hours: 57

Additional Information

For information on the Teacher Education Program admissions criteria and the courses required for

licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Chemistry, B.A. with Teacher Licensure

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for B.A. in Chemistry with Teacher Licensure

Students seeking a Chemistry, B.A. with Teacher Licensure must complete the major requirements found in Chemistry, B.A. and the following:

- Teacher Education Requirements (See Watson College of Education section of this catalogue)
- For Secondary Teacher Licensure in general science as well as chemistry an additional BIO

course, PHY 260, and one course from GLY 101, GLY 120, are required

Additional Information

For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

French, B.A. with Teacher Licensure

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for a B.A. in French with Teacher Licensure

Students seeking a French, B.A. with Teacher Licensure must complete the requirements found in French, B.A. including FRH 201-FRH 202 or the equivalent and 30 hours at the 300-400 level and the following requirements:

Students seeking licensure in French (K-12) must complete

FRH 301 - Conversation

Practice in the use of everyday French for enrichment of functional vocabulary and improved fluency. Extensive use of authentic materials; situational communicative exercises.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

FRH 302 - Grammar and Composition I

Thorough study of French grammatical structures and nuances, with attention to the contrasts between French and English. Intensive practice in writing, editing and revising papers written in genres such as landscape descriptions, literary portraits, narration of events, and critical essays.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

FRH 303 - Grammar and Composition II

Thorough study of French grammatical structures and nuances, with attention to the contrasts between French and English. Intensive practice in writing, editing, and revising papers written in genres such as analytical essays, reviews of films, books, music, and other artistic performances, literary analyses, and personal and business correspondence.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

FRH 306 - Reading Strategies

Strategies for improving reading skills and the interpretation of a wide range of texts from current advertisements, newspapers, and periodicals to traditional literary genres.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
Course Repeatability: Course may not be repeated.

FRH 308 - French Linguistics

Introduction to the phonetics, phonology, morphology, and syntax of French; emphasis on the French sound system, pronunciation, and intonation.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
Course Repeatability: Course may not be repeated.

FRH 311 - French Civilization

Examines the cultural history of France from Lascaux to the present with a special emphasis on France's religious and political transformations. May include readings of political speeches and comic books, as well as viewings of films and audio-visual documents.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of

instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FRH 321 - Survey of French Literature I

Extensive readings covering the main currents of French literature; emphasis in classroom on textual analysis and criticism; oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FRH 322 - Survey of French Literature II

Extensive readings covering the main currents of French literature; emphasis in classroom on textual

analysis and criticism; oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

- at least 6 credit hours at the 400 level, only 3 of which may be obtained by means of FRH 491 or FRH 498.

Total: 36 hours

Additional Information

- A grade of "C-" or better is required in each course counted toward the major and a "C" (2.00) average or better for all courses counted toward the major.
- Recommended: HST 102 and HST 101.
- Students must also satisfy the professional education requirements listed under the Watson

College of Education section of this catalogue.Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Geology, B.S. or Geosciences, B.A. with Teacher Licensure

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for Geology, B.S. or Geosciences, B.A. with Teacher Licensure

Students seeking a Geology, B.S. or Geosciences, B.A. complete the major requirements found in Geology, B.S. OR Geosciences, B.A. and Teacher Education Requirement (See Watson College of Education).

The following courses are also required for licensure:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building

Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 260 - Introduction to Astronomy

Descriptive course in principles, theories, and techniques of astronomy. Occasional night viewings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

Additional Information

- Additionally, to earn Secondary Science Licensure students must select at least 21 hours from three physical science areas. A minimum of two courses from each discipline is required.
- For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

History, B.A. with Social Studies Teacher Licensure

Program Coordinator: Dr. Nathan Crowe

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for B.A. in History with Teacher Licensure

Students seeking a History, B.A. with Social Studies Teacher Licensure must complete major requirements found in History, B.A. and the following:

Professional Studies - Secondary Education (39 Credit Hours)

Professional Core

SEC 200 - Teaching, Schools and a Global Society

Introductory course for licensure in secondary education. Emphasis on interpretation and evaluation

of the development of public education in the United States using historical, sociological, cultural, and philosophical perspectives. Course examines the goals and purposes of education in a global context with particular attention to the education of students in grades 9-12.

Maximum Repeatable Hours: 3

SEC 320 - Practicum Block II

Development of tutoring and instructional strategies to improve high school student literacy. Candidates will tutor and teach in a secondary classroom/tutoring center with an emphasis on multiple literacy skills.

Credit Hours: 3

Corequisite Courses: SEC 210
Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 405 - Theory and Practice in Teaching Secondary Social Studies (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary social studies. Successful planning and

teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 410 - ESL Topics for Secondary Teachers

Corequisites: SEC 403, SEC 404, SEC 405, or SEC 406; SEC 421 and SEC 422. This course will introduce Secondary educators to the field of English as a second language and meeting the needs of students with limited formal schooling, long term English language learners and older language learners. Topics include cross-cultural communications, ESL methodology, assessment and curriculum adaptation.

Credit Hours: 3

Prerequisite Courses: SEC 205

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 421 - Student Teaching I (9-12)

Candidates will observe and teach in specific content area in secondary public school classrooms.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester

SEC 430 - Seminar-Leadership, Reflection and Management Practices

Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline. Emphasis is given to 1) acquisition of leadership qualities and characteristics, 2) professional documentation of reflective growth, and 3) integration of effective behavior management strategies.

Credit Hours: 3

Corequisite Courses: SEC 431
Additional Restrictions/Requirements: All professional core and specialty area courses, acceptance into the Watson School of Education, and a 2.70 GPA on all work attempted at UNCW.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 431 - Student Teaching - Secondary Education

Students will be assigned full-time, or equivalent, to practicum sites within their areas of specializations.

Students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practica are offered in the following areas of specialization: biology, chemistry, English, geology, history, mathematics, music, physics, and social studies.

Credit Hours: 12

Corequisite Courses: SEC 430
Additional Restrictions/Requirements: As specified for SEC 430.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Social Studies Electives/Collaterals (6 Credit Hours)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

and

One Economics course (ECN 125 is strongly recommended)

Total Credit Hours: 45

Additional Information

For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Mathematics, B.A. with Teacher Licensure

The Mathematics, B.A. degree is designed with the goals of a broad liberal education in mind. Licensed secondary school teachers with a B.A. in Mathematics are in high demand, as are qualified applicants for graduate schools in Mathematics. Additionally, a B.A. degree in Mathematics is regarded as excellent preparation for entrance to professional schools of Law, Medicine or Business.

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the junior year) and plan their programs in regular consultation with their advisors.

Requirements for a B.A. in Mathematics with Teacher Licensure

It is strongly recommended that each student majoring in mathematics either complete a minor in a discipline that applies mathematics or elect advanced coursework

involving mathematical applications in other disciplines such as Biology Minor, Chemistry Minor, Computer Science Minor, Geology Minor, Economics Minor, Information Technology Minor, Physics Minor, Psychology Minor, Sociology Minor and Statistics Minor.

Students seeking an Mathematics, B.A. with Teacher Licensure must complete the Teacher Licensure requirements found in the Watson College of Education section of this catalogue and the following:

Computer Requirement

To satisfy the computer requirement for the B.A. degree in Mathematics, a student must successfully complete the following in the core requirements:

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental

functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

Oral Communication Requirement

To satisfy the oral communication requirement for the B.A. degree in Mathematics a student must successfully complete one of the courses below or any other approved oral intensive course (Oral Communication Intensive Courses).

MAT 346 - Historical Development of Mathematics

Development of mathematics from earliest systems to present century. Personalities involved with the contributions of each. A problem-study approach to give the student some training in research.

Credit Hours: 3

Corequisite Courses: MAT 275
Additional Restrictions/Requirements: Corequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 471 - Projects in Mathematical Modeling

Techniques of problem recognition and formulation, and mathematical solution and interpretation of results. Each student will construct a mathematical model and report on the investigation in written and oral form.

Credit Hours: 3

Prerequisite Courses: MAT 361 and MAT 335.
Course Repeatability: Course may not be repeated.

MAT 495 - Seminar in Mathematics

Reading, discussion, investigation, and preparation and presentation of reports on selected mathematical topics, under faculty supervision beyond the students' courses of study.

Credit Hours: 3

Additional Restrictions/Requirements: 9 semester hours of mathematics courses at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Applied Learning Requirement

To satisfy the applied learning requirement for the B.A. degree in Mathematics a student must successfully complete one or more of the following:

MAT 495 - Seminar in Mathematics

Reading, discussion, investigation, and preparation and presentation of reports on selected mathematical topics, under faculty supervision beyond the students' courses of study.

Credit Hours: 3

Additional Restrictions/Requirements: 9 semester hours of mathematics courses at the 300-400 level.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

MAT 498 - Internship in Mathematics

Academic training and practical experience through work in a private company or public agency. Supervision and evaluation of all study and on-site

activity by a faculty member and an on-site mentor.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing. Overall GPA of at least 2.50, a GPA in MAT courses of at least 2.80, and at least 9 hours of MAT courses numbered 300 or higher. Students must have been approved by the faculty supervisor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

MAT 499 - Honors Work in Mathematics

Individual study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Eligibility for honors program.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

SEC 404 - Theory and Practice in Teaching Secondary Mathematics (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary mathematics. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

Core Courses (30 Credit Hours)

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality,

algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

MAT 311 - Intermediate Analysis

Thorough treatment of the topology of the real line, functions and limits, convergence, continuity, differentiation and integration of functions of a real variable. Infinite series, uniform convergence.

Credit Hours: 3

Prerequisite Courses: MAT 261 and MAT 275
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants,

eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

MAT 336 - Abstract Algebra I

Basic study of algebraic structures, focusing on groups and rings. Examples may include permutation, matrix, and symmetry groups, polynomial rings, and integral domains.

Credit Hours: 3

Prerequisite Courses: MAT 275 and MAT 335
Course Repeatability: Course may not be repeated.

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple

linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

Teacher Licensure in Mathematics Required Courses (12 Credit Hours)

In addition to completing the core requirements for the B.A. major in mathematics, students seeking licensure in mathematics must complete:

MAT 345 - Modern College Geometry

Use of elementary methods in advanced study of the triangle and circle, special emphasis on solving original examples, comparison of Euclidean and non-Euclidean and projective geometries.

Credit Hours: 3

Prerequisite Courses: MAT 275
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

MAT 346 - Historical Development of Mathematics

Development of mathematics from earliest systems to present century. Personalities involved with the contributions of each. A problem-study approach to give the student some training in research.

Credit Hours: 3

Corequisite Courses: MAT 275
Additional Restrictions/Requirements: Corequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 396 - Mathematical Explorations in Technology

Utilizing technology as an integrated tool to explore and visualize mathematical concepts and solve mathematics problems related to the school curriculum. Topics include functions, equations, geometry, data analysis, and mathematical modeling.

Credit Hours: 3

Corequisite Courses: MAT 275 or permission of instructor.
Additional Restrictions/Requirements: Open only to students with the major B.A. in Mathematics, Option 2 - Teacher Licensure in Mathematics, or B.A. in Middle

Grades Education.
Course Repeatability: Course may not be repeated.

MAT 496 - Advanced Perspectives in Secondary Mathematics

Students examine key ideas in high school mathematics from an advanced perspective. Under faculty supervision, students read, discuss, investigate, and present reports on mathematical topics beyond the students' courses of study.

Credit Hours: 3

Corequisite Courses: Corequisite: 6 semester hours of mathematics courses at the 300-400 level.
Additional Restrictions/Requirements: Open only to majors in mathematics with teaching licensure.
Course Repeatability: Course may not be repeated.

Total Major Credit Hours: 42

Additional Information

- An overall average of "C" (2.00) or better, with no grade lower than a "C-" is required for all 300-400-

level mathematics or statistics courses counted toward the major.
- For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Political Science, B.A. with Social Studies Teacher Licensure

Program Coordinator: Dr. Jennifer Horan

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for B.A. in Political Science with Teacher Licensure

Students seeking a Politcal Science, B.A. with Social Studies Teacher Licensure the major requirements found in Political Science, B.A. and the following:

Professional Studies - Secondary Education (39 Credit Hours)

Professional Core

SEC 200 - Teaching, Schools and a Global Society

Introductory course for licensure in secondary education. Emphasis on interpretation and evaluation of the development of public education in the United States using historical, sociological, cultural, and philosophical perspectives. Course examines the goals and purposes of education in a global context with particular attention to the education of students in grades 9-12.

Credit Hours: 3

Corequisite Courses: SEC 210 and SEC 220
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 210 - Diverse Learners in Secondary Schools

Focus on teaching diverse learners in the high school classroom including students with disabilities, linguistically diverse individuals, students identified as academically gifted and talented, and students at risk for school failure. Instructional practices and classroom managment strategies that support all students in general education classes will be explored.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 220 - Practicum Block I

Candidates will observe, participate, assist, tutor and teach in secondary classrooms. Emphasis is placed on the study of adolescent development with practical

experiences in high school classrooms. Candidates will observe instruction including lesson planning, lesson implementation and assessment.

Credit Hours: 3

Corequisite Courses: SEC 200 and SEC 210.
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Studies

SEC 310 - Curriculum Design and Learning Assessment

Course designed to provide conceptual tools and analytic skills essential for designing effective instructional activities that incorporate technology as well as providing tools for planning, implementing, and evaluating lessons.

Credit Hours: 3

Corequisite Courses: SEC 320.
Additional Restrictions/Requirements: Only open to those pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 320 - Practicum Block II

Development of tutoring and instructional strategies to improve high school student literacy. Candidates will tutor and teach in a secondary classroom/tutoring center with an emphasis on multiple literacy skills.

Credit Hours: 3

Corequisite Courses: SEC 210
Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 405 - Theory and Practice in Teaching Secondary Social Studies (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary social studies. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 410 - ESL Topics for Secondary Teachers

Corequisites: SEC 403, SEC 404, SEC 405, or SEC 406; SEC 421 and SEC 422. This course will introduce

Secondary educators to the field of English as a second language and meeting the needs of students with limited formal schooling, long term English language learners and older language learners. Topics include cross-cultural communications, ESL methodology, assessment and curriculum adaptation.

Credit Hours: 3

Prerequisite Courses: SEC 205
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 421 - Student Teaching I (9-12)

Candidates will observe and teach in specific content area in secondary public school classrooms.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester

SEC 430 - Seminar-Leadership, Reflection and Management Practices

Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline. Emphasis is given to 1) acquisition of leadership qualities and characteristics, 2) professional documentation of reflective growth, and 3) integration of effective behavior management strategies.

Credit Hours: 3

Corequisite Courses: SEC 431
Additional Restrictions/Requirements: All professional core and specialty area courses, acceptance into the Watson School of Education, and a 2.70 GPA on all work attempted at UNCW.

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 431 - Student Teaching - Secondary Education

Students will be assigned full-time, or equivalent, to practicum sites within their areas of specializations. Students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practica are offered in the following areas of specialization: biology, chemistry, English, geology, history, mathematics, music, physics, and social studies.

Credit Hours: 12

Corequisite Courses: SEC 430
Additional Restrictions/Requirements: As specified for SEC 430.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Social Studies Electives/Collaterals (15 Credit Hours)

HST 101 - Europe in the World I

Introduction to pre-modern European history, from the development of the first city-states in the Near East, through the rise of Athens and Rome, and concluding with the Middle Ages and Early Modern Period. Specific attention is given to the globally interconnected nature of European history.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

or

HST 102 - Europe in the World II

Introduction to modern European history. Examination of Europe's transformations and global interactions through the discussion of significant events, groups, and individuals that contributed to developments such as the French Revolution and the rise of democracy, the Industrial Revolution and the modern economy, world wars and dictatorships.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

and

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects

of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 105 - United States to 1865

American history from the pre-colonial period to the beginning of Reconstruction. Examines the impact of the country's cultural diversity through the study of the arts, law, politics, war, religion, technology, immigration, and the emergence of regional economic systems.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 106 - United States from 1865 to Present

The history of the United States since the Civil War. Examines the development of American political, social, and cultural systems, foreign policy, and the emergence of the United States as a world power.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

Total Credit Hours: 54

Additional Information

For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure

requirements are established at the state level and may be changed by the state at any time.

Science Teacher Licensure

Requirements for Teacher Licensure in Science:

In addition to completing the requirements for a degree in physics (see Physics, B.A.; Physics, B.S.) and the other requirements of the Teacher Education Program, the following courses are also required for licensure: BIO 201; GLY 120.

For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the –Watson College of Education section of this catalogue. Students planning to pursue licensure should apply to the Watson School of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Note:

Students interested in the B.S. degree in physics are advised to take the PHY 201 - PHY 202 sequence in the freshman year.

Secondary Education Teacher Licensure

Target audience: undergraduate students seeking teacher licensure in the secondary (9-12) fields of biology, chemistry, geology, English, and mathematics. Students who concentrate in anthropology, history, political science or sociology may fulfill subject matter requirements for social studies licensure by completing a minimum of 21 semester hours in three social studies areas other than the discipline of major concentration. HST 102 or HST 101, HST 104, HST 105, HST 106 and PLS 101 must be completed, as well as at least one course in each of the following areas: sociology/anthropology, economics, and geography.

Students who concentrate in biology, chemistry, physics or earth science may fulfill requirements for science licensure by completing 21 semester hours in three science areas other than the discipline of major concentration. A minimum of two courses from each discipline is required. PHY 260 also is required. Students wishing to prepare themselves as secondary

teachers must fulfill degree requirements in an appropriate academic discipline, be admitted to the Watson College of Education, and complete the following sequence of professional courses.

Professional Studies - Secondary Education

To earn teacher licensure in secondary education, 39 hours of education courses in addition to the specialty area are required. Secondary education students pursuing licensure in secondary education (9-12) must complete the following requirements in addition to those of the specialty area.

Professional Core:

SEC 200 - Teaching, Schools and a Global Society

Introductory course for licensure in secondary education. Emphasis on interpretation and evaluation of the development of public education in the United States using historical, sociological, cultural, and philosophical perspectives. Course examines the goals and purposes of education in a global context with

particular attention to the education of students in grades 9-12.

Credit Hours: 3

Corequisite Courses: SEC 210 and SEC 220
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 210 - Diverse Learners in Secondary Schools

Focus on teaching diverse learners in the high school classroom including students with disabilities, linguistically diverse individuals, students identified as academically gifted and talented, and students at risk for school failure. Instructional practices and classroom managment strategies that support all students in general education classes will be explored.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to

students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 220 - Practicum Block I

Candidates will observe, participate, assist, tutor and teach in secondary classrooms. Emphasis is placed on the study of adolescent development with practical experiences in high school classrooms. Candidates will observe instruction including lesson planning, lesson implementation and assessment.

Credit Hours: 3

Corequisite Courses: SEC 200 and SEC 210.
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Studies:

SEC 310 - Curriculum Design and Learning Assessment

Course designed to provide conceptual tools and analytic skills essential for designing effective instructional activities that incorporate technology as well as providing tools for planning, implementing, and evaluating lessons.

Credit Hours: 3

Corequisite Courses: SEC 320.
Additional Restrictions/Requirements: Only open to those pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 320 - Practicum Block II

Development of tutoring and instructional strategies to improve high school student literacy. Candidates will tutor and teach in a secondary classroom/tutoring center with an emphasis on multiple literacy skills.

Credit Hours: 3

Corequisite Courses: SEC 210
Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 410 - ESL Topics for Secondary Teachers

Corequisites: SEC 403, SEC 404, SEC 405, or SEC 406; SEC 421 and SEC 422. This course will introduce Secondary educators to the field of English as a second language and meeting the needs of students with limited formal schooling, long term English language learners and older language learners. Topics include cross-cultural communications, ESL methodology, assessment and curriculum adaptation.

Credit Hours: 3

Prerequisite Courses: SEC 205
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 421 - Student Teaching I (9-12)

Candidates will observe and teach in specific content area in secondary public school classrooms.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

And one of the following methods courses depending upon licensure area:

SEC 403 - Theory and Practice in Teaching Secondary English (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary English. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 404 - Theory and Practice in Teaching Secondary Mathematics (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary mathematics. Successful planning and

teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

SEC 405 - Theory and Practice in Teaching Secondary Social Studies (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary social studies. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 406 - Theory and Practice in Teaching Secondary Science (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary science. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Professional Semester:

SEC 430 - Seminar-Leadership, Reflection and Management Practices

Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline. Emphasis is given to 1) acquisition of leadership qualities and characteristics, 2) professional documentation of reflective growth, and 3) integration of effective behavior management strategies.

Credit Hours: 3

Corequisite Courses: SEC 431
Additional Restrictions/Requirements: All professional core and specialty area courses, acceptance into the Watson School of Education, and a 2.70 GPA on all work attempted at UNCW.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 431 - Student Teaching - Secondary Education

Students will be assigned full-time, or equivalent, to practicum sites within their areas of specializations. Students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practica are offered in the following areas of specialization: biology, chemistry, English, geology, history, mathematics, music, physics, and social studies.

Credit Hours: 12

Corequisite Courses: SEC 430
Additional Restrictions/Requirements: As specified for SEC 430.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester (non-licensure option):

Requires program approval.

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Sociology B.A. with Social Studies Teacher Licensure

Program Coordinator: Dr. Julia Waity

Admission Requirements

- See University Admission Requirements

- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for B.A. in Sociology with Teacher Licensure

Students seeking Sociology, B.A. with Social Studies Teacher Licensure must complete the major requirements found in Sociology, B.A. and the following:

Professional Studies - Secondary Education (39 Credit Hours)

Professional Core

SEC 200 - Teaching, Schools and a Global Society

Introductory course for licensure in secondary education. Emphasis on interpretation and evaluation of the development of public education in the United States using historical, sociological, cultural, and philosophical perspectives. Course examines the goals

and purposes of education in a global context with particular attention to the education of students in grades 9-12.

Credit Hours: 3

Corequisite Courses: SEC 210 and SEC 220
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 210 - Diverse Learners in Secondary Schools

Focus on teaching diverse learners in the high school classroom including students with disabilities, linguistically diverse individuals, students identified as academically gifted and talented, and students at risk for school failure. Instructional practices and classroom managment strategies that support all students in general education classes will be explored.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 220 - Practicum Block I

Candidates will observe, participate, assist, tutor and teach in secondary classrooms. Emphasis is placed on the study of adolescent development with practical experiences in high school classrooms. Candidates will observe instruction including lesson planning, lesson implementation and assessment.

Credit Hours: 3

Corequisite Courses: SEC 200 and SEC 210.
Additional Restrictions/Requirements: Only open to students pursuing secondary licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Studies

SEC 310 - Curriculum Design and Learning Assessment

Course designed to provide conceptual tools and analytic skills essential for designing effective instructional activities that incorporate technology as well as providing tools for planning, implementing, and evaluating lessons.

Credit Hours: 3

Corequisite Courses: SEC 320.
Additional Restrictions/Requirements: Only open to those pursuing secondary licensure.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 320 - Practicum Block II

Development of tutoring and instructional strategies to improve high school student literacy. Candidates will tutor and teach in a secondary classroom/tutoring center with an emphasis on multiple literacy skills.

Credit Hours: 3

Corequisite Courses: SEC 210
Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 405 - Theory and Practice in Teaching Secondary Social Studies (9-12)

This course provides emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials for teaching secondary social studies. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed and incorporated into coursework.

Credit Hours: 3

Corequisite Courses: SEC 410 and SEC 421
Prerequisite Courses: SEC 305
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SEC 410 - ESL Topics for Secondary Teachers

Corequisites: SEC 403, SEC 404, SEC 405, or SEC 406; SEC 421 and SEC 422. This course will introduce Secondary educators to the field of English as a second language and meeting the needs of students with limited formal schooling, long term English language learners and older language learners. Topics include cross-cultural communications, ESL methodology, assessment and curriculum adaptation.

Credit Hours: 3

Prerequisite Courses: SEC 205
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SEC 421 - Student Teaching I (9-12)

Candidates will observe and teach in specific content area in secondary public school classrooms.

Credit Hours: 3

Additional Restrictions/Requirements: Only open to students pursuing secondary teaching licensure.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester

SEC 430 - Seminar-Leadership, Reflection and Management Practices

Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline. Emphasis is given to 1) acquisition of leadership qualities and characteristics, 2) professional documentation of reflective growth, and 3) integration of effective behavior management strategies.

Social Studies Electives/Collaterals (18 Credit Hours)

HST 101 - Europe in the World I

Introduction to pre-modern European history, from the development of the first city-states in the Near East, through the rise of Athens and Rome, and concluding with the Middle Ages and Early Modern Period. Specific attention is given to the globally interconnected nature of European history.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

or

HST 102 - Europe in the World II

Introduction to modern European history. Examination of Europe's transformations and global interactions through the discussion of significant events, groups, and individuals that contributed to developments such as the French Revolution and the rise of democracy, the Industrial Revolution and the modern economy, world wars and dictatorships.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global

Society
Course Repeatability: Course may not be repeated.

and

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 105 - United States to 1865

American history from the pre-colonial period to the beginning of Reconstruction. Examines the impact of the country's cultural diversity through the study of the

arts, law, politics, war, religion, technology, immigration, and the emergence of regional economic systems.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 106 - United States from 1865 to Present

The history of the United States since the Civil War. Examines the development of American political, social, and cultural systems, foreign policy, and the emergence of the United States as a world power.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in Our Diverse

Nation
Course Repeatability: Course may not be repeated.

and
One Economics course (ECN 125 is strongly recommended)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Total Credit Hours: 57

Additional Information

For information on the Teacher Education Program admissions criteria and the courses required for

licensure in North Carolina, see the Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Sociology, Social Studies Teacher Licensure

Requirements for Teacher Licensure in Social Studies:

In addition to completing requirements for the major, sociology majors seeking licensure in social studies must complete the Teacher Education Program requirements and a minimum of 21 collateral hours including HST 102, HST 101, HST 104, HST 105, HST 106 and PLS 101, and at least one course in each of the following areas: economics and geography.

For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the –Watson College of Education section of this catalogue. Students planning to pursue licensure should apply to the Watson School of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Spanish, B.A. with Teacher Licensure

Admission Requirements

- See University Admission Requirements
- Students planning to pursue licensure should apply to the Watson College of Education as soon as admissions requirements are met (typically in the sophomore year) and plan their programs in regular consultation with their advisors.

Requirements for a B.A. in Spanish with Teacher Licensure

- Students seeking an Spanish, B.A. with Teacher Licensure must complete the major requirements found in Spanish, B.A. and Teacher Licensure Requirements (see Watson College of Education section of this catalogue).
- 36 credit hours (12 must be SPN 303, SPN 305, SPN 306, and SPN 307; 6 must be at the 400 level, and up to 6 may be at the 200 level)

- Only 3 hours at the 400-level may be obtained by means of SPN 491 or SPN 498.

Additional Information

- A grade of "C-" or better is required in each course counted toward the major and a "C" (2.00) average or better for all courses counted toward the major.
- For information on the Teacher Education Program admissions criteria and the courses required for licensure in North Carolina, see the –Watson College of Education section of this catalogue. Teacher licensure requirements are established at the state level and may be changed by the state at any time.

Special Subjects Teacher Licensure

Programs leading to teacher licensure are offered in the special subject (K-12) fields of health and physical education, music, French, and Spanish. Students wishing to prepare themselves as special subject teachers must fulfill degree requirements in an appropriate academic discipline, be admitted to the Watson College of Education, and complete the following sequence of professional courses.

Professional Studies –Foreign Languages

To earn teacher licensure in foreign language education, 40 hours of education courses in addition to the specialty area are required.

Foreign languages students pursuing licensure in foreign language education (K-12) must complete the following requirements in addition to those of the specialty area.

Program Objectives

- Demonstrate breadth of general knowledge, as well as depth of knowledge in the selected discipline area necessary for effective instructional decision making.
- Communicate effectively in standard English both verbally and in written formats.
- Adapt instruction to the developmental and learning needs of individuals, including children and adolescents with special needs and students from culturally diverse backgrounds.
- Establish a classroom climate conducive to the learning, social, and emotional needs of children and adolescents.

- Choose appropriate objectives consistent with state and local curriculum guidelines, the learning needs of students, and the standards established by learned societies.
- Use technology to enhance teaching and learning experiences.
- Demonstrate effective teaching including positive results for student learning, self-reflection, and appropriate professional dispositions.
- Employ and analyze appropriate assessments and evaluative procedures.

Professional Core:

The following courses should be completed before admission to the Teacher Education Program, usually in the sophomore year:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and

educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical

characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Professional Studies:

Students seeking special subject licensure must complete the following courses: (See sections below for description of requirements for health and physical education and music education requirements.)

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction. The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EDN 321 - Meeting Needs of Special Students in High Schools

This course will focus on strategies for meeting needs of individuals in high school classrooms. Students will study alternative methods for dealing with pupil differences that have an impact on academic and social behaviors. Characteristics of students with academic, intellectual, social-emotional, physical, cultural and language differences will be examined. Field experiences required.

Credit Hours: 2

Course Repeatability: Course may not be repeated.

EDN 356 - Reading for K-12 Teachers

Required course in the teaching of reading. Basic instructional reading strategies are developed with emphasis on introducing assignments, improving study skills, and fostering critical thinking. Students identify and learn to teach reading skills specific to varying content areas. Adjusting instruction to students' reading capabilities is stressed.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 407 - Theory and Practice in Teaching Foreign Languages (K-12)

Emphasis on theory, curriculum development, inquiry, critical thinking, classroom management, instructional strategies and selection of appropriate instructional materials. Successful planning and teaching practices with adaptations to diverse needs of students will be discussed. Field experiences required (10-20 contact hours). The lab for this course is EDNL 407.

Credit Hours: 3

Corequisite Courses: EDNL 407
Prerequisite Courses: EDN 301
Course Repeatability: Course may not be repeated.

EDNL 407 - Field Experience in Foreign Language

Designed to provide supervised extended experiences in public school classrooms. Focus on observations, reflections concerning observations, and use of

pedagogy with foreign language students K-12. Emphasis on integration of theory and practice. This course is the lab for EDN 407.

Credit Hours: 1

Corequisite Courses: EDN 407
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester:

EDN 420 - Instructional Seminar - Foreign Languages

Corequisite course only applies to students pursuing teacher licensure in Spanish or French. Development of instructional skills required for successful teaching with regard for the particular needs of the student's academic discipline and the effective management of the classroom. Designed as a culmination of professional study and an initiation into the internship and the teaching profession. Emphasis given to

professional documentation of reflective growth.

Credit Hours: 3

Corequisite Courses: EDN 409
Additional Restrictions/Requirements: Corerequisite course, all professional core and specialty area courses, acceptance into the Watson School of Education, and a 2.70 GPA on all work attempted at UNCW.
Course Repeatability: Course may not be repeated.

EDN 409 - Student Teaching

Physical education and music education majors do not need to take corequisite course. Students will be assigned full-time to practicum sites within their areas of specializations. During the course, students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practical are offered in the following areas of specialization: biology, chemistry, English, French, geology, history, mathematics, music, physical education (and health), physics, social studies, and Spanish.

Credit Hours: 12

Corequisite Courses: EDN 408
Additional Restrictions/Requirements: Corequisite course, and as specified for EDN 408.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson

College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Professional Studies – Health and Physical Education

To earn teacher licensure in health and physical education, 28 hours of education courses and 18 hours in an academic concentration in addition to the specialty area are required.

Students pursuing teacher licensure in health and physical education must complete the following requirements in addition to those of the specialty area.

Program Objectives

- Demonstrate breadth of general knowledge, as well as depth of knowledge in the selected discipline area necessary for effective instructional decision making.
- Communicate effectively in standard English both verbally and in written formats.
- Adapt instruction to the developmental and learning needs of individuals, including children and adolescents with special needs and students from culturally diverse backgrounds.

- Establish a classroom climate conducive to the learning, social, and emotional needs of children and adolescents.
- Choose appropriate objectives consistent with state and local curriculum guidelines, the learning needs of students, and the standards established by learned societies.
- Use technology to enhance teaching and learning experiences.
- Demonstrate effective teaching including positive results for student learning, self-reflection, and appropriate professional dispositions.
- Employ and analyze appropriate assessments and evaluative procedures.

Professional Core:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice

professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Professional Studies:

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

EDN 356 - Reading for K-12 Teachers

Required course in the teaching of reading. Basic instructional reading strategies are developed with emphasis on introducing assignments, improving study skills, and fostering critical thinking. Students identify and learn to teach reading skills specific to varying content areas. Adjusting instruction to students' reading capabilities is stressed.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 352 - Developing Reading and Writing Competence in the Middle Grades

Develops understanding of reading and writing processes in the broad context of communication. Presents strategies for fostering and evaluating interest, fluency, and skill in reading and writing, both in developmental literary classes and in middle level, content subjects. Topics include organizational and instructional strategies for the development of reading and writing ability, techniques for motivating and guiding readers and writers, and strategies for study and comprehension, which support learning in all areas

of the middle school curriculum. Field experiences required.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to the Watson School of Education.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Professional Semester:

EDN 409 - Student Teaching

Physical education and music education majors do not need to take corequisite course. Students will be assigned full-time to practicum sites within their areas of specializations. During the course, students will engage in a variety of supervised instructional activities, assuming increasingly wider responsibility for class instruction. Practical are offered in the following areas of specialization: biology, chemistry, English, French, geology, history, mathematics, music, physical

education (and health), physics, social studies, and Spanish.

Note:

Students wishing to pursue teacher preparation programs must be formally admitted to the Watson College of Education and to the Teacher Education Program. Students in all programs should consult their advisors for admission procedures and for a list of courses requiring Watson College admissions. A grade of "C-" or better is required in education courses, as well as all courses in the interdisciplinary specialty and the professional semester. Students may repeat

courses in which they earn a grade lower than a "C-" only with the permission of the dean of the Watson College of Education. A cumulative grade point average of 2.70 is required for the practicum semester.

Academic Concentration:

An academic concentration of 18 semester hours is required. Specific course requirements for the various concentrations may be obtained from the academic advisors within the Watson College of Education. Academic concentrations may be selected from the following disciplines: anthropology, art, behavioral studies, biology, chemistry, community health, English, environmental studies, fine arts, French, geography, geology, health, history, literature studies, marine biology, mathematics, music, philosophy and religion, political science, psychology, science and humanities, social studies, sociology, Spanish, and theatre.

Professional Studies - Music Education

To earn teacher licensure in music education, 25 hours of education courses in addition to the specialty area are required.

Students pursuing teacher licensure in music education must complete the following requirements in addition to those of the specialty area.

Program Objectives

- Competency in fundamental musical knowledge and skills through analytical listening, sight-singing and functional piano playing.
- Competency in the application of knowledge of music theory through analysis, arranging and orchestrating.
- The ability to effectively communicate in writing on topics in the field of music history through the purposeful use of evidence, insightful reasoning, and supporting details.
- Skills in preparation for and performance of musical works that exhibit effective artistic expression.
- The ability to assess the need for, locate, evaluate and effectively use information to accomplish the goal of preparing written music for a performer.
- The ability to integrate skills and knowledge acquired over the course of an undergraduate education for the purpose of effectively teaching

music to K-12 students in the public schools in compliance with the competencies established by the NC Department of Public Instruction.

Professional Core:

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

A cumulative grade point average of 2.70 is required for the practicum semester.

Bachelor's/Master's Combined Programs

Accounting Bachelor's/Master's Combined Program

Requirements: Completion of all degree requirements for both the B.S.B.A. in Accounting and the M.S. Accountancy with three credits of graduate-level courses (MSA 560 or MSA 522) that will count towards the B.S.B.A. Accounting concentration core and three credits of graduate-level courses (MSA 522 or MSA

560) that will count as free elective hours towards the B.S.B.A. degree.

Program Coordinator: Dr. William Kerler

Program Objective

This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in five years. A student will earn a B.S. in Business Administration with a concentration in Accounting and an M.S. in Accountancy.

B.S.B.A. Accounting students must apply for admission to the 4+1 B.S. Accounting/M.S. Accountancy program. Six hours of courses taken at the 500-level will be dual counted towards both degrees. Upon completion of the B.S. degree, students have the option to apply to the graduate school and continue progress towards the M.S. Accountancy degree.

Admission

- Admission to the Cameron School of Business as an accounting concentration student
- "B" or better grade in ACG 301 and ACG 306

- Minimum overall GPA: 3.2
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Resume

Timeline

- Once students are admitted to the CSB and have completed ACG 301 and ACG 306, they can apply for admission into the 4+1 program. **Admission to the 4+1 program does not guarantee admission to the MSA program upon completion of the B.S. in Business Administration**.
- Students who successfully complete both 500-level accounting courses and all remaining B.S.B.A. degree requirements are awarded the B.S. in Business Administration with an Accounting Concentration.
- In the final semester of their B.S. program, students apply to the MSA program. If admitted to the MSA, the six credits earned at the 500-level will count towards the degree requirements of the M.S. Accountancy degree as long as the student earned a "B" or better in the course.

Curriculum

- MSA - 560 - Forensic Accounting and Fraud Examination
- MSA - 522 - Accounting Analytics and Business Database Systems
    - Either course can be used to replace ACG 445 or ACG 450, taken by non-combined program undergraduate accounting students

Frequently Asked Questions

Q: How many classes will students need to complete to earn the MSA?

A: Students in the 4+1 program must complete 32 credits of MSA courses, but six of those credits can be earned before they begin the program.

Q: Is there a grade requirement for the 500-level MSA courses taken by 4+1 students to also receive credit towards the MSA degree?

A: Yes, students must earn a "B" or better in the 500-level MSA course for it to double count as credit towards the MSA degree.

Art and Art Education, Bachelor's/Master's Combined Program

Program Coordinator: Dr. Christine Liao

The combined Art and Art Education Bachelor's/Master's program is a rigorously designed academic pathway that enables students to acquire both their B.A. in Studio Art, Art History, or Digital Art and M.A.T. in Art Education within a five-year framework* and prepares students to meet the licensure requirements and be eligible to obtain North Carolina K-12 Art teaching licensure. This program offers the opportunity for students to initiate their graduate coursework during their undergraduate years, seamlessly integrating undergraduate and graduate learning experiences. (*It might take longer if students do not obtain their B.A. on time or do not follow the suggested graduate course sequence. Students should consult the graduate program coordinator to plan for their graduate study.)

Program Feature:

- Provide students with a pathway to an art-teaching career and be qualified to teach art in NC K-12 public schools and other avenues of art education.
- Students can enroll in graduate-level courses while completing their undergraduate studies.

- Students can double-count 500-level courses for up to 6 credit hours toward both degrees as approved by the program coordinator.
- Art Education MAT is an online master's program with in-person field experience and a semester-long full-time internship in NC public schools during their final semester.

Eligibility Criteria

- Students currently enrolled in the B.A. in Studio Art, Art History, or Digital Art in junior or senior year
- Completed a minimum of 9 hours of undergraduate courses at the 300-400 level in the degree major before start taking graduate courses.
- Demonstrate a cumulative GPA of 3.0 or higher at the time of submission of application to the Graduate School.

Admission Requirements

- Students who meet the eligibility criteria may initiate the application process for the program in their junior year or senior year to begin taking graduate-level courses the following semester. The earliest semester to begin taking graduate-level

courses is the second semester of junior year and students must have completed a minimum of 9 hours of 300-400 level course in degree major.

- Students should fill out the appropriate forms to obtain permission from the department chair and the graduate program coordinator to apply for up to 6 credit hours of graduate-level courses toward their master's degree before taking graduate courses.
- Departmental permission to apply to the bachelor's/master's combined program does not guarantee admission to the Graduate School. Admission to the Graduate School is contingent upon meeting eligibility requirements at the time of entering the graduate program. Acceptance will be provisional and contingent on meeting specified degree requirements, including completion of the bachelor's degree.
- Students must submit a standard application to the Graduate School by the posted deadline for the semester in which they intend to enroll. Students must enroll in the Graduate School in Summer I the year prior to graduation.
- The Graduate School application requirements:

- An application for graduate admission
- Official transcripts of all college work (undergraduate and graduate)
- Three professional recommendations
- Two to three-page typed letter of interest which includes a description of the applicant's professional goals, educational interests in pursuing graduate study, and philosophy of teaching.
- Art portfolio: include 8-10 visual artworks with 100-word artist statement. Portfolio should be in PDF format in one document or website format. If the work is a digital work, the length should not exceed 10 minutes each. Please provide a link for viewing the work online.

Program Course and Exit Requirements

- The Art Education MAT program is an intensive online program designed to include Summer courses. Students must be able to take full-term Summer courses during the summer of the year before their intended completion of the master's program.

- The program includes field experience requirements in the AED 503 course. Students will be placed in three different levels of public schools (elementary, middle, and high school) in their chosen county. Students must fulfill the field experience hours and requirements in the three schools required by the course.
- The AED 504, Art Education Student Teaching, course (full-time internship) is a full-time commitment during the last semester in the master's program. Students will be placed in an NC public school of their chosen grade level and county. Students will be at the school from Monday to Friday during school hours during the last semester of their program.
- The AED 503 course is typically offered in the Fall semester, and the AED 504 course is typically offered in the Spring semester. Students must complete all other required courses before they can start their internship.
- Students must consult the program coordinator before taking any graduate courses.
- Students might be able to double-count for up to 6 credit hours of graduate-level courses toward their

undergraduate major requirements upon approval by the department chair.

- The master's program's exit requirement is to complete an action research or arts-based research project and successfully pass the oral defense.

Art Education M.A.T. Program Courses

- AED - 500 - Art Education Foundation and Curriculum
- AED - 501 - Art Education Pedagogy and Assessment
- AED - 502 - Media Arts, Media Literacy, and Technology in Art Education
- AED - 503 - Art Education Issues, Research, and Practice
- AED - 504 - Art Education Student Teaching
- or EDN - 530 - Non-Licensure Student Internship (Program Approval Required)
- AED - 505 - Seminar on Teaching, Learning, and Leadership
- EDN - 500 - Human Development and Learning
- EDN - 509 - Education in a Multicultural Context
- EDN - 520 - Instructional Development

EDN 500, 509, and 520 can be substitued with other 500 level education or art courses approved by the program.

Business Administration, Business Analytics Concentration and Business Analytics, Bachelor's/Master's Combined Program

Overview

Objective:	This combined B.S/M.S. degree program is designed to provide qualified students the opportunity to complete two degree programs in under five years. Upon successful completion of the program, a student will earn a B.S. in Business Administration with a concentration in Business Analytics and an M.S. in Business Analytics.
Requirements:	Completion of all degree requirements for both the B.S.B.A. in Business Analytics and the M.S. Business Analytics with six credits of graduate-

level courses that will count towards undergraduate Business Analytics concentration electives.

Program Prerequisites and Admission Requirements

- Admission to the Cameron School of Business as a Business Analytics concentration student
- Minimum GPA: 3.0
- Completion of the B.S./M.S. Combined Program in Business Analytics Application Form
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Two letters of recommendation
- Cover letter and resume

Rational For Proposed Plan

This program is an opportunity for students who excel in business analytics to pursue a specialized master's program. The combined program will benefit students in several ways:

- Waiver of the graduate application fee and admission to the MSBA program (pending

completion of MSBA program admission requirements)
- Allows six credit hours of graduate course work to satisfy six credit hours of undergraduate concentration requirements
- Avoids some duplication of content between undergraduate and graduate courses

Curriculum

Students must complete all requirements for the B.S. Business Administration with a Business Analytics Concentration as well as the requirements for the M.S. in Business Analytics.

B.S. Business Administration, Business Analytics Concentration Requirements:

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include

entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

- Three elective courses (from approved list, with one elective replaced by MIS 503 Programming for Analytics).

M.S. Business Analytics Requirements

- BAN 500 – Descriptive Analytics
- BAN 501 – Prescriptive Analytics
- BAN 502 – Predictive Analytics
- MIS 503 – Programming for Analytics (Replaces one undergraduate BAN elective)
- MIS 504 – Database for Analytics (Replaces MIS 315)
- MIS 505 – Data Visualization
- BAN 525 – Case Studies in Business Analytics
- BAN 530 – Applications of Business Analytics
- Two elective courses (from approved list)

Timeline

- Students who successfully complete the two 500-level MSBA courses and all remaining B.S. Business Administration degree requirements are awarded the B.S. in Business Administration with a Business Analytics Concentration.
- In the final semester of their B.S. program, students will apply for admission to the MSBA program. If admitted to the MSBA, the six credits earned at the 500-level will count towards the degree requirements of the M.S. Business Analytics degree.
- **Note: Students that receive acceptance into the combined degree program are still subject to the admission requirements for the MSBA program. Admission to the combined degree program does not guarantee admission to the MSBA program.**

Frequently Asked Questions

Q: How many classes will students need to complete to earn the MSBA?
A: Students must complete the full 30 credits of MSBA courses, but six of those credits can be earned before they begin the program.

Q: Can students be admitted to the MSBA program upon graduation from the BSBA if they earn Cs in their 500-level electives?

A: Graduate applications will be evaluated based on our existing admissions criteria. A student who meets the criteria can be admitted to the MSBA program. Courses at the 500-level in which the student earned a grade of C will not count towards the MSBA degree requirements and must be replaced or retaken after advising by the MSBA Director.

Q: What if I have additional questions about this program?

A: Please direct questions to Dr. Manoj Vanajakumari, Director of the MSBA Program.

Business Administration, Economics Concentration, and Finance & Investment Management, Bachelor's/Master's Combined Program

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in

under 5 years. A student will earn a Bachelor of Science (BS) in Business Administration with a concentration (BSBA) in Economics and a Master of Science (MS) in Finance & Investment Management (MSF).

BS of Business Administration Economics students must apply for admission to the 4+1
BS Economics/MS Finance program. Six (6) hours of courses taken at the 500-level will apply towards both degrees. Upon completion of the
BS degree, students have the option to apply to the graduate school and continue progress towards the MSF degree. The MSF program's curriculum is geared towards the Chartered Financial Analyst (CFA) designation.

The combined program will benefit students by:

- Allowing 6 graduate credits to satisfy undergraduate concentration electives
- Giving accepted students preference for departmental CFA Exam scholarships

Requirements: Completion of all degree requirements for both the BSBA. in Economics and the MSF with six credits of graduate-level courses that will count towards the finance concentration electives.

Program Prerequisites and Admission Requirements

- Admission to the Cameron School of Business as an economics concentration student
- Minimum GPA: 3.2
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Cover letter and resume

Curriculum

Students may count up to six (6) credits of 500-level finance courses towards the 400-level economics concentration electives. The courses available are:

- FIN 532 - Economics for Financial Professionals *(3 CH)*
- FIN 533 - Derivatives & Risk Management *(3 CH)* **replaces FIN 433**
- FIN 540 - Portfolio Management and Wealth Planning *(3 CH)* **replaces FIN 440**

Timeline

- Once students are admitted to the CSB and eligible to take their 400-level finance electives, they can apply for admission into the 4+1 program. **Admission to the 4+1 program does not guarantee admission to the MSF program upon completion of the BS in Business Administration**.

- With the help of the MSF Director, students can select up to six (6) credits of the available 500-level finance classes to substitute for their 400-level finance electives.

- Students who successfully complete the two 500-level electives and all remaining BSBA degree requirements are awarded the BS in Business Administration with an Economics Concentration.

- In the final semester of their BS program, students apply to the MSF program. If admitted to the MSF, the six (6) credits earned at the 500-level will count towards the degree requirements of the MS Finance & Investment Management degree.

Frequently Asked Questions

Q: How many classes will students need to complete to earn the MSF?
A: Students must complete the full thirty (30) credits of MSF courses, but six of those credits can be earned before they begin the program.

Q: Can students be admitted to the MSF program upon graduation from the BSBA if they earn Cs in their 500-level electives?
A: Graduate applications will be evaluated based on our existing admissions criteria. A student who meets the criteria can be admitted to the MSF program. Courses at the 500-level that earned a grade of C will

not count towards the MSF degree requirements and must be replaced or retaken after advising by the MSF Director.

Q: For double concentration students in economics and finance, what double dipping is allowed?

A: Students with double concentrations will have to choose the finance version of the 4+1 or the economics version of the 4+1, but cannot do both simultaneously.

Business Administration, Finance Concentration, and Finance & Investment Management, Bachelor's/Master's Combined Program

Overview

Objective:	This combined bachelor's /master's degree program is designed to provide qualified students the opportunity to complete both degree programs in under 5 years. A student will earn a Bachelor of Science (BS) in Business Administration with a concentration (BSBA) in Finance and an Master of

Science (MS).in Finance & Investment Management (MSF).

BS of Business Administration Finance students must apply for admission to the 4+1 BS Finance /M.S. Finance program. Six (6) hours of courses taken at the 500-level will towards both degrees. Upon completion of the BS degree, students have the option to apply to the graduate school and continue progress towards the MSF degree. The MSF program's curriculum is geared towards the Chartered Financial Analyst (CFA) designation.

The combined program will benefit students by:

- Allowing 6 graduate credits to satisfy undergraduate concentration electives

- Giving accepted students preference for departmental CFA Exam scholarships

Requirements: Completion of all degree requirements for both the BSBA in Finance and the MSF with six credits of graduate-level courses that will count towards the finance concentration electives

Program Prerequisites and Admission Requirements

- Admission to the Cameron School of Business as a finance concentration student
- Minimum GPA: 3.2
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Cover letter and resume

Curriculum

- FIN 501 - Ethics in the Financial Marketplace *Credit Hours:2*
- FIN 502 - Ethics in Decision Making *Credit Hours: 1*

- FIN 580 - Quantitative Investment Analysis *Credit Hours: 3*
- FIN 532 - Economics for Financial Professionals *Credit Hours: 3*
- FIN 536 - Corporate Finance *Credit Hours:* 3
- FIN 538 - Financial Reporting and Analysis *Credit Hours: 3* **replaces FIN 438**
- FIN 530 - Equity Investments *Credit Hours: 3*
- FIN 534 - Fixed Income Analysis *Credit Hours: 3*
- FIN 533 - Derivatives & Risk Management *Credit Hours: 3* **replaces FIN 433**
- FIN 540 - Portfolio Management and Wealth Planning *Credit Hours: 3*
- FIN 531 - Alternative Investments *Credit Hours: 3*

Timeline

- Once students are admitted to the CSB and eligible to take their 400-level finance electives, they can apply for admission into the 4+1 program. **Admission to the 4+1 program does not guarantee admission to the MSF program upon completion of the BS in Business Administration**.

- With the help of the MSF Director, students can select up to six credits of 500-level finance classes to substitute for their 400-level finance electives

- Students who successfully complete the two (2) 500-level electives and all remaining BSBA degree requirements are awarded the BS in Business Administration with a Finance Concentration

- In the final semester of their BS program, students apply to the MSF program. If admitted to the MSF, the six (6) credits earned at the 500-level will count towards the degree requirements of the MS Finance degree.

Frequently Asked Questions

Q: How many classes will students need to complete to earn the MSF?
A: Students must complete the full thirty (30) credits of MSF courses, but six (6) of those credits can be earned before they begin the program.

Q: Can students be admitted to the MSF program upon graduation from the BSBA if they earn Cs in their 500-level electives?

A: Graduate applications will be evaluated based on our existing admissions criteria. A student who meets the criteria can be admitted to the MSF program. Courses at the 500-level that earned a grade of C will not count towards the MSF degree requirements and must be replaced or retaken after advising by the MSF Director.

Q: For double concentration students in economics and finance, what double dipping is allowed?

A: Students with double concentrations will have to choose the finance version of the 4+1 or the economics version of the 4+1, but cannot do both simultaneously.

Business Administration, Information Systems Concentration, and Computer Science and Information Systems, Bachelor's/Master's Combined Program

Overview

Objective: This combined B.S/M.S. degree program is designed to provide qualified students the opportunity to complete two degree-programs in five years in an

accelerated manner. Upon successful completion of the program, a student will earn a B.S. in Business Administration (BSBA) with a concentration in Information Systems and an M.S. in Computer Science and Information Systems (MSCSIS).

Requirements: Completion of all degree requirements for both the BSBA with Information Systems concentration and the MSCSIS. A maximum of twelve credit hours can be counted for both the BSBA and the MSCSIS degrees.

Program Pre-requisites & Admission Requirements

- Admission to the Cameron School of Business with an Information Systems concentration
- Minimum GPA: 3.0
- Completion of the B.S./M.S. Combined Program in Information Systems Application Form
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Students must still apply for the MS CSIS program.

Rationale for Proposed Program

This program is an opportunity for students who excel in information systems to pursue a

specialized master's program. The combined program will benefit students in several ways:

- Waiver of the graduate application fee for the MSCSIS program
- Application of twelve credit hours of graduate course work to satisfy twelve credit hours of undergraduate degree requirements.
- Shorten the time required to complete the requirements of the MSCSIS program.

Curriculum

Students must complete the course requirements of both the BSBA. Information Systems Concentration program (21 hours) and the MSCSIS program (36 hours). A maximum of twelve credit hours may be "double-counted" toward both the BSBA and the MSCSIS degrees. For example, as part of the BSBA, students may replace up to six hours of 300 or 400 level MIS elective courses with MSCSIS core or allowable MSCSIS elective courses. Furthermore, as part of the BSBA, students may replace up to six hours of general undergraduate electives with MSCSIS core or allowable MSCSIS elective courses.

Note: Course credit will count for the BSBA regardless of whether the student applies to the MSCSIS program.

Timeline

• Students who successfully complete the four 500-level MSCSIS courses and all remaining BSBA degree requirements are awarded the B.S. in Business Administration with an Information Systems Concentration.
• In their junior year students will apply for the 4+1 program, and complete the Undergraduate Request to Enroll in Graduate Courses Form.
• In their senior year students will apply for admission to the MSCSIS program. If admitted to the MSCSIS program, the twelve credits earned at the 500-level will count towards the requirements of the MSCSIS program.
• Note: Students that receive acceptance into the combined degree program are still subject to the admission requirements for the MSCSIS program. Admission to the combined degree program does not guarantee admission to the MSCSIS program.

Computer Science and Information Systems, Bachelor's/Master's Combined Program

How to Apply

The combined bachelor's/master's degree program is designed to provide qualified students the means to complete the requirements for both degrees in a period of five years. A student will earn a B.S. in Computer Science and an M.S. in Computer Science and Information Systems. A key feature of the program is that a student can count up to 12 hours of graduate-level courses to fulfill requirements for the B.S. and use those same 12 credits toward the M.S. in Computer Science and Information Systems.

The program is designed for students in the B.S. program in Computer Science who have:

- Completed a minimum of **seventy-five** (75) and a maximum of **ninety-eight** (98) credit hours in their undergraduate programs. (Note: more hours may be permitted if the student is a double major.) Transfer students must have completed a minimum of two semesters as full-time students at UNCW, a minimum of 24 hours.
- Completed CSC 331 and completed a minimum of nine (9) hours of 300-400 level Computer Science.

- A minimum accumulated grade point average (GPA) of 3.0 and a minimum grade point average (GPA) of 3.2 on all 100-400 level Computer Science courses at UNCW.

Second Semester of Junior Year:

1. Students who meet the above criteria should meet with the Graduate Coordinator to fill out and submit the CSC 4+1 Application Information Form (opens as PDF) requesting permission from the department chair to apply up to 12 hours of graduate-level credit earned during their senior year towards their future master's work in Computer Science and Information Systems.
2. The department chair, in consultation with the M.S. CSIS graduate committee, may grant permission to apply up to 12 hours of graduate-level credit earned during the senior year towards the future master's degree in Computer Science and Information Systems. (Departmental permission to apply to the bachelor's/master's degree program **does not** guarantee admission to the Graduate School. Admission to the Graduate School is

contingent upon meeting eligibility requirements at the time of entering the graduate program.)

3. If permission is granted, the student meets with the Graduate Coordinator for advising and degree planning. During pre-registration, the students must fill out the Undergraduate Request to Enroll in Graduate Course (opens as PDF) form for graduate courses to be taken in the fall (typically 2 courses). This form requires signatures of approval from instructors of requested graduate courses, the Graduate Coordinator, the College of Arts & Sciences, and the Graduate School.

First Semester of Senior Year

1. Non-Business Option students should complete the online BUS 500 course (3 credits) during the summer before their senior year. This course is not necessary for students completing the Business Concentration.
2. The student typically will be enrolled in 3 graduate classes and 1-2 undergraduate classes. He or she should prepare to submit the standard application for admission to the Graduate School during the second semester of the senior year.

3. During pre-registration for the following spring, the student must fill out the Undergraduate Request to Enroll in Graduate Course (opens as PDF) for the graduate courses to be taken in the spring (typically 3 courses). This form requires signatures of approval from instructors of requested graduate courses, the Graduate Coordinator, the College of Arts & Sciences, and the Graduate School.
4. The student must submit a Graduate Degree Plan during the first semester of his or her senior year, signed by the prospective student, the department chair, and the graduate coordinator.

The Graduate Degree Plan for the master's degree must clearly indicate:

- The specific 500-level CSC courses (maximum of 12 graduate credit hours) that will be double-counted for both bachelor's and master's degrees.
- The intended graduation date for the master's degree (typically one year after the B.S.., in the spring)

Second Semester of Senior Year

Student will typically be enrolled in 2-3 graduate courses and 1-2 undergraduate courses.

Student should submit the standard application for admission to the Graduate School early in the semester. The application is here.

Upon the graduate committee's review of the submitted materials, a letter of acceptance (or denial) to the master's program will be sent to the student. Acceptance will be provisional and contingent on meeting specified degree requirements, including completion of the bachelor's degree and maintaining a 3.0 or better on all 500-level courses. A student who is ineligible to participate or continue in, or withdraws from, the bachelor's/master's program, can only count earned credits towards an undergraduate degree. For more details, see the graduate coordinator.

Summer after B.S. Graduation

Because this is an accelerated program, students will need to complete 3 hours during the summer. They may choose from among internships, DIS, or a single graduate CSC or MIS course for the 3 hours.

Final Year in Program

Students will need to be registered full-time (9 hours) each semester. Students with TA or GA positions need to be aware of other obligations.

Total hours: 36

The program is 36 hours total (12 of which are counted for both B.S. and M.S.).

English, Bachelor's/Master's Combined Program

The bachelor's/master's degree program is designed to provide exceptional students in English a means to complete the requirements for both degrees in a period of five years. The key feature of the program is that a student can count up to 12 hours of graduate level courses satisfying requirements for the B.A. toward a non-thesis Master's degree in English.

The program is designed for students in the B.A. program in English who have:

1. Completed a minimum of seventy-five (75) and a maximum of ninety-eight (98) credit hours in their undergraduate programs in English. Transfer students must have completed a minimum of two

semesters as a full-time student at UNCW, a minimum of 24 hours.
2. Completed ENG 204 or ENG 205, and a minimum of nine (9) hours of 300-400 level English courses.
3. A minimum accumulated grade point average (GPA) of 3.5/4.0 and a minimum grade point average (GPA) of 3.7/4.0 on all 200-400 level English courses at UNCW.

Students who meet the above criteria may request permission from the department chair to apply up to 12 hours of graduate-level credit earned during their senior year toward their futre master's degree in English. Departmental permission to apply to the bachelor's/master's degree does not guarantee admission to the Graduate School. Admission to the Graduate School is contingent upon meeting eligibility requirements at the time of entering the graduate program. Acceptance will be provisional and contingent on meeting specified degree requirements including completion of the bachelor's degree.

Students accepted into the combined program:

- Must submit the standard English application for admission to the Graduate School by the posted

deadline for the semester in which the student intends to enroll.

- Must submit to the Graduate Coordinator a Graduate Degree Plan during the first semester of their senior year, signed by the prospective student, the department chair, and the graduate coordinator. This Graduate Degree Plan for the master's degree must clearly indicate:
    - The specific 500-level ENG courses (maximum of 12 graduate credit hours) that will be double-counted for both bachelor's and master's degrees (contingent upon acceptance in the MA program).
    - The student's intention to fulfill course requirements for the master's degree no later than a year after receiving the bachelor's degree; and
    - The intended graduation date for the master's degree.

A student who is ineligible to participate or continue in, or withdraws from the bachelor's/master's program, cannot double count any courses for both bachelor's and master's degrees. For more details, see the graduate coordinator.

Exercise Science and Applied Gerontology, Bachelor's/Master's Combined Program

Program Coordinator: Tina Newsham, Ph.D. I Program Coordinator & Professor

(4 +1 Combined Programs I UNCW)

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in as little as five years. The successful student will earn a Bachelor of Science (B.S.) degree in Exercise Science and a Master of Science (M.S.) in Applied Gerontology (MGRN).

Undergraduate students in Exercise Science must apply for admission to the 4+1 B.S. in Exercise Science / M.S. in Applied Gerontology Combined Program. Students should apply to the 4+1 combined program in the semester in which they are completing their 75th credit hour so that they can begin graduate

coursework the semester thereafter; undergraduate students can begin the 4+1 combined program in the fall or spring semester. Twelve hours of courses taken at the 500-level will be dual counted towards both degrees. Students then have the option to apply to the graduate school and continue progress towards the MGRN degree upon completion of the bachelor's degree.

Requirements: Completion of all degree requirements for both the B.S. in Exercise Science and the M.S. in Applied Gerontology, with twelve credits of graduate-level courses that will count toward undergraduate requirements.

Program Prerequisites and Admission Requirements

- Admission to the School of Health and Applied Human Sciences as a B.S. in Exercise Science student
- Minimum GPA: 3.0
- At least 75 completed undergraduate credit hours prior to starting graduate courses
- Completion of the application found at https://uncw.edu/chhs/shahs/academic/graduate/gerontology/index.html

- One letter of recommendation from a faculty member with whom the student has taken a 300 or 400-level course
- Cover letter describing interest in the program and career goals related to gerontology
- Unofficial UNCW transcript

Rationale for Program

This program is an opportunity for students interested in working with older adults to develop knowledge, skills, and experience with and about the most rapidly growing segment of the population. Drawing on the Academy for Gerontology in Higher Education's competencies as a framework, our goal is to educate gerontologists who will improve quality of life and promote well-being of persons as they age within their families, communities and societies through research, education and application of interdisciplinary knowledge of the aging process and aging populations.

The purpose of the combination Bachelor of Science degree in Exercise Science and Master of Science degree in Applied Gerontology program is to offer an accelerated path toward a Master of Science degree that will prepare graduates to practice in health-care

and community-based settings that serve older adults, and be leaders in the intersection of exercise science, gerontology, and wellness. The combined program prepares students to pursue further degrees in physical therapy, occupational therapy, and other health-care related fields. It also prepares those students to work in wellness programs in retirement communities, recreation programs, and senior centers, or as an exercise physiologist or fitness trainer focusing on working with older adults. This preparation places a priority on the development of skills through in- and out-of class applied learning experiences, internships, and community engagement. Furthermore, student learning outcomes emphasize critical thinking and evidence-based practice as means of assisting older adult clients in reaching their goals, and maximizing their quality of life.

The combined program will benefit students by:

- Providing invaluable knowledge and experience working with older adults.
- Allowing 12 graduate credits to satisfy undergraduate and graduate requirements.

- Reducing costs of graduate education due to the ability to enroll in graduate courses during an undergraduate degree program at the undergraduate tuition rate.

Curriculum

Students must meet all requirements for the Exercise Science, B.S. Students may count 12 credits of 500-level courses in the MGRN curriculum toward requirements for their undergraduate program of study. Undergraduate students in a combined program taking GRN 503 will receive credit for three University Studies categories: Information Literacy, Writing Intensive and Critical Reasoning. The courses available are:

- GRN 501 Aging and Society
- GRN 503 Investigative Inquiry in Gerontology
- GRN 525 Health and Aging
- PSY 524 Psychology of Aging (Instead of PSY 324 Psychology of Aging)

For students who are admitted into the MGRN program:

Remaining requirements to complete the Applied Gerontology, M.S. degree can be found in the UNCW Graduate Catalogue.

Timeline

- Once students are enrolled in the Exercise Science major and are completing their 75th credit hour, they can apply for admission into the 4+1 combined program.
- After completing at least 75 undergraduate credit hours, those admitted to the 4+1 program can enroll in the 12 designated graduate courses.
- Students who successfully complete the 12, 500-level credits and all remaining Exercise Science degree requirements are awarded a B.S. in Exercise Science.
- In the final semester of their bachelor's program, students may apply to the MGRN program for summer or fall admission. Applicants must meet all Graduate School admissions requirements and submit their application by the stated deadline. Admission to the 4+1 combined program does not guarantee admission to the MGRN program upon completion of the bachelor's degree.

- If admitted to the MGRN, the 12 credits earned at the 500-level will count toward the degree requirements of the M.S. in Applied Gerontology degree.
- The following schedule details the progression to completion of the master's degree in one year (note that only one of the two summer terms is required):

Summer	Fall	Spring	Summer
• GRN 590 Practicum in Gerontology	• GRN 590 Practicum in Gerontology (repeated for credit)	• GRN 540 Current Issues in Gerontology	• GRN 59 Practicu in Geronto
• Elective	• GRN 597 Project Proposal	• GRN 598 Final Project	• Elective
	• Elective	• Elective	

- Students who do not go on to the M.S. in Applied Gerontology may apply for admission to the Post-Baccalaureate Certificate in Gerontology and have

the 12 credits earned at the 500-level count toward the degree requirements of the certificate.

Information Technology and Computer Science and Information Systems, Bachelor's/Master's Combined Program

The combined bachelor's/master's degree program is designed to provide qualified students the means to complete the requirements for both degrees in a period of five years. Upon completion, a student will earn a B.S. in Information Technology and an M.S. in Computer Science and Information Systems. A key feature of the program is that a student can count up to 12 hours of graduate-level courses to fulfill requirements for the B.S. and use those same 12 credits toward the M.S. in Computer Science and Information Systems.
The program is designed for students in the B.S. program in Information Technology who have:

- Completed a minimum of sixty-seven (67) credit hours in their undergraduate programs. (Note: more hours may be permitted if the student is a double major.) Transfer students must have

completed a minimum of two semesters as full-time students at UNCW, a minimum of 24 hours.

- Completed BUS 500 and CSC 500
- A minimum accumulated grade point average (GPA) of 3.0 and a minimum grade point average (GPA) of 3.2 on all 100-400 level courses that are core or required within Information Technology at UNCW.

Second Semester of Junior Year

1. Students who meet the above criteria should meet with the Graduate Coordinator to fill out and submit the IT 4+1 Application Information Form (opens as PDF) requesting permission from the department chair to apply up to 12 hours of graduate-level credit earned during their senior year towards their future master's work in Computer Science and Information Systems.
2. The program coordinator, in consultation with the M.S. CSIS graduate committee, may grant permission to apply up to 12 hours of graduate-level credit earned during the senior year towards the future master's degree in Computer Science and Information Systems. (Program permission to

apply to the bachelor's/master's degree program does not guarantee admission to the Graduate School. Admission to the Graduate School is contingent upon meeting eligibility requirements at the time of entering the graduate program.)

3. If permission is granted, the student meets with the Graduate Coordinator for advising and degree planning. During pre-registration, the students must fill out the Undergraduate Request to Enroll in Graduate Course(s) form (opens as PDF) for graduate courses to be taken in the fall (typically 2 courses). This form requires signatures of approval from instructors of requested graduate courses, the Graduate Coordinator, the Cameron School of Business and the College of Arts & Sciences, and the Graduate School.

Summer before Senior Year

Students should complete both the online BUS 500 course (3 credits) and the CSC 500 course (3 credits) during the summer before their senior year.

First Semester of Senior Year

1. The student typically will be enrolled in 3 graduate classes and 1-2 undergraduate classes. He or she should prepare to submit the standard application for admission to the Graduate School during the second semester of the senior year.
2. During pre-registration for the following spring, the student must fill out the Undergraduate Request to Enroll in Graduate Course(s) form (opens as PDF) for the graduate courses to be taken in the spring (typically 3 courses). This form requires signatures of approval from instructors of requested graduate courses, the Graduate Coordinator, the Cameron School of Business and the College of Arts & Sciences, and the Graduate School.
3. The student must submit a CSIS Graduate Degree Plan during the first semester of his or her senior year, signed by the prospective student, the department chair, and the graduate coordinator.

The Graduate Degree Plan for the master's degree must clearly indicate:

- The specific 500-level CSC or MIS courses (maximum of 12 graduate credit hours between CSC and MIS courses) that will be double-counted for both bachelor's and master's degrees; and

- The intended graduation date for the master's degree (typically one year after the B.S. in the spring).

Second Semester of Senior Year

Student will typically be enrolled in 2-3 graduate courses and 1-2 undergraduate courses.

Student should submit the standard application for admission to the Graduate School early in the semester. The application is here.

Upon the graduate committee's review of the submitted materials, a letter of acceptance (or denial) to the master's program will be sent to the student. Acceptance will be provisional and contingent on meeting specified degree requirements, including completion of the bachelor's degree and maintaining a 3.0 or better on all 500-level courses. A student who is ineligible to participate or continue in, or withdraws from, the bachelor's/master's program, can only count earned credits towards an undergraduate degree. For more details, see the graduate coordinator.

Second Semester of Senior Year

Student will typically be enrolled in 2-3 graduate courses and 1-2 undergraduate courses.

Student should submit the standard application for admission to the Graduate School early in the semester. The application is here.

Upon the graduate committee's review of the submitted materials, a letter of acceptance (or denial) to the master's program will be sent to the student. Acceptance will be provisional and contingent on meeting specified degree requirements, including completion of the bachelor's degree and maintaining a 3.0 or better on all 500-level courses. A student who is ineligible to participate or continue in, or withdraws from, the bachelor's/master's program, can only count earned credits towards an undergraduate degree. For more details, see the graduate coordinator.

Summer after B.S. Graduation

Because this is an accelerated program, students will need to complete 3 hours during the summer. They may choose from among internships, Directed Individual Study (DIS), or a single graduate Computer

Science (CSC) or Management Information Systems (MIS) course for the 3 hours.

Final Year in Program

Students will need to be registered full-time (9 hours) each semester. Students with teaching assistant or graduate assistant positions need to be aware of other obligations.

The program is 36 hours total (12 of which are counted for both B.S. and M.S.).

Mathematics, Bachelor's/Master's Combined Program

The bachelor's/master's degree program is designed to provide a student in mathematics a means to complete the requirements for both degrees in a period of five years. The key feature of the program is that a student can count up to 12 hours of graduate level courses satisfying requirements for the B.A. or B.S. towards the M.S. in mathematics.

A. Students in the B.A. or B.S. program in mathematics who have:

1. Completed a minimum of 75 and a maximum of 98 credit hours in their undergraduate programs in mathematics, including credits earned from advanced placement if they started at UNCW or are transfer students and have completed a minimum of 2 semesters as a full-time student at UNCW, a minimum of 24 hours.
2. Completed a minimum of 9 hours of 300-400 level mathematics or statistics courses.
3. A minimum accumulated grade point average of 3.00/4.00 and a minimum grade point average of 3.00/4.00 on all 300-400 level mathematics or statistics courses at UNCW.

Students may apply to the department chair for permission to apply up to 12 credit hours of graduate level course work during their senior year toward their future master's degree.

B. In his/her senior year, the student must submit the standard application for admission to the Graduate School including: an application form, application fee, transcripts, and GRE scores to the Graduate School. In addition, a graduate degree plan, signed by the prospective student, the department chair,

and the graduate coordinator must be submitted before the beginning of the student's senior year. Departmental permission to apply to the bachelor's/master's degree program does not guarantee admission to the Graduate School. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

C. The graduate degree plan for the master's degree must clearly indicate:

- Courses (maximum of 12 graduate credit hours) that will be double-counted for both bachelor's and master's degree;
- Additional graduate courses that will be taken but not counted toward the bachelor's degree;
- The student intends to fulfill his/her course requirements for the master's degree no later than a year after receiving the bachelor's;
- Intended graduation date for the master's degree.

For additional information about the bachelor's/master's degree program and its requirements, students should contact the graduate coordinator in the Department of Mathematics and Statistics.

Psychology and Applied Gerontology, Bachelor's/Master's Combined Program

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in as little as five years. The successful student will earn a B.A. in Psychology and an M.S. in Applied Gerontology (MGRN).

Undergraduate students in Psychology must apply for admission to the 4+1 B.A. Psychology / M.S. in Applied Gerontology Combined Program. Students should apply to the 4+1 combined program in the semester in which they are completing their 75th credit hour so that they can begin graduate coursework the semester thereafter; undergraduate students can begin the 4+1 combined program in the fall or spring semester. Twelve hours of courses taken at the 500-level will be dual counted towards both degrees. Students then have the option to apply to the graduate school and continue progress towards the MGRN degree upon completion of the bachelor's degree.

Requirements: Completion of all degree requirements for both the bachelor's degree in Psychology and the master's degree in Applied Gerontology with twelve credits of graduate-level courses that will count toward undergraduate requirements.

Program Prerequisites and Admissions Requirements

- Admission to the College of Arts and Sciences as a B.A. in Psychology student
- Minimum GPA: 3.0
- At least 75 completed undergraduate credit hours prior to starting graduate courses
- Completion of the application found at https://uncw.edu/chhs/shahs/academic/graduate/gerontology/index.html
- One letter of recommendation from a faculty member with whom the student has taken a 300 or 400-level course
- Cover letter describing interest in the program and career goals related to gerontology
- Unofficial UNCW transcript

The combined program will benefit students by:

- Providing invaluable knowledge and experience working with older adults
- Allowing 12 graduate credits to satisfy undergraduate and graduate requirements
- Reducing costs of earning a master's degree as graduate courses completed by undergraduate students are billed at undergraduate tuition rates

Curriculum

Students must meet all requirements for the Psychology, B.A. Students may count 12 credits of 500-level courses in the MGRN curriculum toward requirements for their undergraduate program of study. Undergraduate students in a combined program taking GRN 503 will receive credit for three University Studies categories: Information Literacy, Writing Intensive and Critical Reasoning. The courses available are:

- GRN 501 Aging and Society
- GRN 503 Investigative Inquiry in Gerontology
- GRN 525 Health and Aging
- PSY 524 Psychology of Aging

For students who are admitted to the MGRN program:

Remaining requirements to complete that degree can be found in the UNCW Graduate Catalogue.

Timeline

- Once students are enrolled in the Psychology major and are completing their 75th credit hour, they can apply for admission into the 4+1 combined program.
- After completing at least 75 undergraduate credit hours, those admitted to the 4+1 program can enroll in the 12 designated graduate courses.
- Students who successfully complete the 12 500-level credits and all remaining Psychology degree requirements are awarded a B.A. in Psychology.
- In the final semester of their bachelor's program, students may apply to the MGRN program for summer or fall admission. Applicants must meet all Graduate School admissions requirements and submit their application by the stated deadline. Admission to the 4+1 combined program does not guarantee admission to the MGRN program upon completion of the bachelor's degree.
- If admitted to the MGRN, the 12 credits earned at the 500-level will count toward the degree

requirements of the M.S. in Applied Gerontology degree.

- The following schedule details the progression to completion of the master's degree in one year (note that **only one of the two summer terms is required**):

Summer	Fall	Spring	Summer
• GRN 590 Practicum in Gerontology	• GRN 590 Practicum in Gerontology (repeated for credit))	• GRN 540 Current Issues in Gerontology	• GRN 59 Practicu in Geronto
• Elective	• GRN 597 Project Proposal	• GRN 598 Final Project	• Elective
	• Elective	• Elective	

- Students who do not go on to the M.S. in Applied Gerontology program may apply for admission to the Post-Baccalaureate Certificate in Gerontology and have the 12 credits earned at the 500-level

count toward the degree requirements of the Certificate.

Public Health and Applied Gerontology, Bachelor's/Master's Combined Program

Program Coordinator: Tina Newsham, Ph.D. I Program Coordinator & Professor

(4 +1 Combined Programs I UNCW)

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in as little as five years. The successful student will earn a bachelor's degree in Public Health and an M.S. in Applied Gerontology (MGRN).

Undergraduate students in Public Health must apply for admission to the 4+1 B.S. in Public Health / M.S. in Applied Gerontology Combined Program. Students should apply to the 4+1 combined program in the semester in which they are completing their 75th credit hour so that they can begin graduate coursework the semester thereafter; undergraduate students can begin

the 4+1 combined program in the fall or spring semester. Twelve hours of courses taken at the 500-level will be dual counted towards both degrees. Students then have the option to apply to the graduate school and continue progress towards the MGRN degree upon completion of the bachelor's degree.

Requirements: Completion of all degree requirements for both the bachelor's degree in Public Health and the master's degree in Applied Gerontology with twelve credits of graduate-level courses that will count toward undergraduate requirements.

Program Prerequisites and Admission Requirements

- Admission to the School of Health and Applied Human Sciences as a B.S. in Public Health student
- Minimum GPA: 3.0
- At least 75 completed undergraduate credit hours prior to starting graduate courses
- Completion of the application found at https://uncw.edu/chhs/shahs/academic/graduate/gerontology/index.html

- One letter of recommendation from a faculty member with whom the student has taken a 300 or 400-level course
- Cover letter describing interest in the program and career goals related to gerontology
- Unofficial UNCW transcript

Rationale for Program

This program is an opportunity for students interested in working with older adults to develop knowledge, skills, and experience with and about the most rapidly growing segment of the population. Drawing on the Academy for Gerontology in Higher Education's competencies as a framework, our goal is to educate gerontologists who will improve quality of life and promote well-being of persons as they age within their families, communities and societies through research, education and application of interdisciplinary knowledge of the aging process and aging populations.

The purpose of the combined Bachelor of Science degree in Public Health and Master of Science degree in Applied Gerontology is to offer an accelerated path toward a Master of Science degree that prepares graduates with knowledge, skills, and competencies

within public health and gerontology. These educational experiences prepare graduates to work in health-related and community-based settings serving older adults, and to be leaders in the fields of public health, gerontology, and healthcare. Furthermore, student outcomes emphasize critical thinking and evidence-based practices as means of assisting older adult clients and aging services provider organizations in reaching their goals and maximizing quality of life for older adults.

The combined program will benefit students by:

- Providing invaluable knowledge and experience working with older adults
- Allowing 12 graduate credits to satisfy undergraduate and graduate requirements
- Reducing costs of earning a master's degree as graduate courses completed by undergraduate students are billed at undergraduate tuition rates

Curriculum:

Students must meet all requirements for the B.S. in Public Health. Students may count 12 credits of 500-level courses in the MGRN curriculum toward

requirements for their undergraduate program of study. Undergraduate students in a combined program taking GRN 503 will receive credit for three University Studies categories: Information Literacy, Writing Intensive and Critical Reasoning. The courses available are:

GRN 501 Aging and Society (instead of SOC 336 Sociology of Aging)
GRN 503 Investigative Inquiry in Gerontology (instead of GRN 440 Current Issues in Gerontology)
GRN 525 Health and Aging (instead of HEA 325 Health and Aging)
PSY 524 Psychology of Aging (instead of PSY 324 Psychology of Aging)

For students who are admitted to the MGRN program:

Remaining requirements to complete the MGRN program can be found in the UNCW Graduate Catalogue.

Timeline

- Once students are enrolled in the Public Health major and are completing their 75th credit hour,

they can apply for admission into the 4+1 combined program.

- After completing at least 75 undergraduate credit hours, those admitted to the 4+1 program can enroll in the 12 designated graduate courses.
- Students who successfully complete the 12 500-level credits and all remaining Public Health degree requirements are awarded a B.S. in Public Health.
- In the final semester of their bachelor's program, students may apply to the MGRN program for summer or fall admission. Applicants must meet all Graduate School admissions requirements and submit their application by the stated deadline. Admission to the 4+1 combined program does not guarantee admission to the MGRN program upon completion of the bachelor's degree.
- If admitted to the MGRN, the 12 credits earned at the 500-level will count toward the degree requirements of the M.S. in Applied Gerontology degree.
- The following schedule details the progression to completion of the master's degree in one year (note that **only one of the two summer terms is**

required):

Summer	Fall	Spring	Summer
• GRN 590 Practicum in Gerontology	• GRN 590 Practicum in Gerontolgy (repeated for credit)	• GRN 540 Current Issues in Gerontology	• GRN 590 Practicum in Gerontolo
• Elective	• GRN 597 Project Proposal	• GRN 598 Final Project	• Elective
	• Elective	• Elective	

- Students who do not go on to the M.S. in Applied Gerontology program may apply for admission to the Post-Baccalaureate Certificate in Gerontology and have the 12 credits earned at the 500-level count toward the degree requirements of the certificate.

Recreation Therapy and Applied Gerontology, Bachelor's/Master's Combined Program

Program Coordinator: Tina Newsham, Ph.D. l Program Coordinator & Professor

(4 +1 Combined Programs l UNCW)

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in as little as five years. The successful student will earn a Bachelor's of Arts (B.A.) degree in Recreation Therapy and a Master's of Science (M.S.) degree in Applied Gerontology (MGRN).

Undergraduate students in Recreation Therapy must apply for admission to the 4+1 B.A. in Recreation Therapy / M.S. in Applied Gerontology Combined Program. Students should apply to the 4+1 combined program in the semester in which they are completing their 75th credit hour so that they can begin graduate coursework the semester thereafter. While undergraduate students can begin the 4+1 combined program in the fall or spring semester, students in this combined program should begin three semesters prior to their anticipated graduation as it is not recommended

that students take additional courses during their Recreation Therapy internship in their final semester. Up to twelve hours of courses taken at the 500-level will be dual counted towards both degrees. Students then have the option to apply to the graduate school and continue progress towards the MGRN degree upon completion of the bachelor's degree.

Requirements: Completion of all degree requirements for both the B.A. in Recreation Therapy and the M.S. in Applied Gerontology with twelve credits of graduate-level courses that will count toward undergraduate requirements.

Program Prerequisites and Admission Requirements

- Admission to the School of Health and Applied Human Sciences as a B.A. in Recreation Therapy student
- Minimum GPA: 3.0
- At least 75 completed undergraduate credit hours prior to starting graduate courses
- Completion of the application found at https://uncw.edu/chhs/shahs/academic/graduate/gerontology/index.html

- One letter of recommendation from a faculty member with whom the student has taken a 300 or 400-level course
- Cover letter describing interest in the program and career goals related to gerontology
- Unofficial UNCW transcript

Rationale for Program

This program is an opportunity for students interested in working with older adults to develop knowledge, skills, and experience with and about the most rapidly growing segment of the population. Drawing on the Academy for Gerontology in Higher Education's competencies as a framework, our goal is to educate gerontologists who will improve quality of life and promote well-being of persons as they age within their families, communities and societies through research, education and application of interdisciplinary knowledge of the aging process and aging populations.

The purpose of the combined Bachelor of Arts degree in Recreation Therapy and Master of Science degree in Applied Gerontology is to offer an accelerated path toward a Master of Science degree that prepares graduates with knowledge, skills, and competencies to

practice recreation therapy in healthcare and community-based settings serving older adults. This preparation prioritizes the development of skills via applied learning experiences, practica, internship, and community engagement. Furthermore, student outcomes emphasize critical thinking and evidence-based practices as means of assisting older adult clients and aging services provider organizations in reaching their goals and maximizing quality of life for older adults.

The combined program will benefit students by:

- Providing invaluable knowledge and experience working with older adults
- Allowing 12 graduate credits to satisfy undergraduate and graduate requirements
- Reducing costs of graduate education due to the ability to enroll in graduate courses during an undergraduate degree program at the undergraduate tuition rate

Curriculum

Students must meet all requirements for the Recreation Therapy, B.A. Students may count up to 12 credits of

500-level courses in the MGRN curriculum toward requirements for their undergraduate program of study. Undergraduate students in a combined program taking GRN 503 will receive credit for three University Studies categories: Information Literacy, Writing Intensive and Critical Reasoning. The courses available are:

- GRN 501 Aging and Society
- GRN 503 Investigative Inquiry in Gerontology *Or* RTH 559 Research Methods
- GRN 525 Health and Aging (replaces one Modality requirement)
- PSY 524 Psychology of Aging (replaces one Modality requirement)

For students who are admitted to the MGRN program:

Remaining requirements to complete that degree can be found in the UNCW Graduate Catalogue.

Timeline

- Once students are enrolled in the Recreation Therapy major and are completing their 75th credit

hour, they can apply for admission into the 4+1 combined program.

- After completing at least 75 undergraduate credit hours, those admitted to the 4+1 program can enroll in the 12 designated graduate courses.
- Students who successfully complete the 12, 500-level credits and all remaining Recreation Therapy degree requirements are awarded a B.A. in Recreation Therapy.
- In the final semester of their bachelor's program, students may apply to the MGRN program for summer or fall admission. Applicants must meet all Graduate School admissions requirements and submit their application by the stated deadline. Admission to the 4+1 combined program does not guarantee admission to the MGRN program upon completion of the bachelor's degree.
- If admitted to the MGRN, the graduate credits earned at the 500-level will count toward the degree requirements of the M.S. in Applied Gerontology degree.
- The following schedule details the progression to completion of the master's degree in one year

(note that **only one of the two summer terms is required**):

Summer	Fall	Spring	Fall
• GRN 590 Practicum in Gerontolgy	• GRN 590 Practicum in Gerontology (repeated for credit)	• GRN 540 Current Issues in Gerontology	• GRN 590 Practicum in Gerontolo
• Elective	• GRN 597 Project Proposal	• GRN 598 Final Project	• Elective
	• Elective	• Elective	

- Students who do not progress to the M.S. in Applied Gerontology program may apply for admission to the Post-Baccalaureate Certificate in Gerontology and have the graduate credits earned at the 500-level count toward the degree requirements of the certificate.

Secondary Education, Bachelor's/Master's Combined Program

The combined program in secondary education is designed to provide qualified students the means to complete the requirements for a bachelor's degree in mathematics, science, history, English, or a related field, and a master's degree in secondary education in a period of five years (including one summer). The key feature of the program is that students take 3-6 credits of graduate coursework that will count for the student's undergraduate and graduate program. Students will apply to take the 3-6 hours of graduate credit in fall of their senior year to begin graduate coursework in the spring semester. Students will apply to the Graduate School in the spring of their senior year to continue the program. The MAT cohort begins summer 1, so students must be fully admitted before then.

This program is designed for students currently in the B.A. or B.S. programs in mathematics, science, history, English, or a related field at UNCW who have:

1. Completed a minimum of sixty (60) credit hours in their undergraduate program leading toward a major in mathematics, science, history, English, or a related field, including credits earned from advanced placement if they start at UNCW or are transfer students and have completed a minimum

of two semesters as a full-time student at UNCW, a minimum of 24 hours.

2. Completed a minimum of 9 hours of 300-400 level courses in the degree content area at the time of application.

3. A minimum accumulated grade point average (GPA) of 3.0 at time of submission of application to the Graduate School.

Students who meet the above criteria may request permission from the department chair in Instructional Technology, Foundations and Secondary Education to apply up to 6 hours of graduate-level credit earned during their senior year towards their future master's degree in Secondary Education. Departmental permission to apply to the bachelor's/master's degree program does not guarantee admission to the Graduate School and is contingent upon meeting eligibility requirements at the time of application. Acceptance will be provisional and contingent on meeting specified degree requirements; including completion of the bachelor's degree.

Spanish, Bachelor's/Master's Combined Program

The bachelor's/master's degree program in Spanish is designed to provide a student means to complete the requirements for both degrees in a period of five years. The key feature of the program is that a student can count up to 12 hours of graduate-level courses in order to fulfill requirements for the B.A. and use those same 12 credits toward the M.A. in Spanish.

This program is designed for students currently in the B.A. in Spanish program at UNCW who have:

1. Completed a minimum of seventy-five (75) and a maximum of ninety-eight (98) credit hours, including credits earned from advanced placement if they start at UNCW or are transfer students. (Note: More hours may be permitted under certain circumstances.) Transfer students must have completed a minimum of two semesters as full-time students at UNCW, a minimum of 24 hours.

2. Completed a minimum of twelve (12) hours of 300- or 400-level Spanish courses.

3. Completed at least one of these courses: SPN 308, SPN 311 , SPN 312, SPN 321, SPN

322, SPN 323, SPN 385.

4. A minimum accumulated grade point average (GPA) of 3.3 and minimum grade point average (GPA) of 3.3 in the Spanish major.

Students who meet the above criteria may request permission from the department chair to apply up to 12 hours of graduate-level credit earned during their senior year towards their future master's degree in Spanish. Departmental permission to apply to the bachelor's/master's degree program does not guarantee admission to the Graduate School. Admission to the Graduate School is contingent upon meeting eligibility requirements at the time of entering the graduate program.

Students accepted into the combined program:

- Must submit the standard application for admission to the Graduate School during the first semester of their senior year including: an application form for Graduate School, application fee, transcripts, letters of recommendation and writing samples. Two voice samples, one in English and one in Spanish, must be submitted separately to the

graduate coordinator who will organize the review of the application.

- Must submit a Graduate Degree Plan during the second semester of their senior year, signed by the prospective student, the department chair, and the graduate coordinator.

The Graduate Degree Plan for the master's degree must clearly indicate:

- The specific 500-level SPN courses (maximum of 12 graduate credit hours) that will be double-counted for both bachelor's and master's degrees;

- Additional graduate courses that will be taken during the senior year but not counted toward the bachelor's degree;

- The student's intention to fulfill course requirements for the master's degree no later than a year after receiving the bachelor's degree; and

- The intended graduation date for the master's degree.

Upon the Graduate School's review of the submitted materials, a letter of acceptance (or denial) to the master's program will be sent to the student and copied to the department chair and the graduate coordinator. Acceptance will be provisional and contingent on meeting specified degree requirements; including completion of the bachelor's degree.

A student who is ineligible to participate or continue in, or withdraws from the bachelor's/master's program cannot double count any courses for both bachelor's and master's degrees. For more details see the department chair or the graduate coordinator.

Supply Chain Management, Bachelor's/Master's Combined Program

Program Coordinator: Dr. Drew Rosen

This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in under 5 years. A student will earn a Bachelor of Science (BS) in Business Administration with a concentration in Supply Chain Management and a Master of Science (MS) in Supply Chain Management

BS of Business Administration Economics students must apply for admission to the 4+1 BSBA Supply Chain Management/MS Supply Chain Management. Six (6) hours of courses taken at the 500-level will apply towards both degrees. Upon completion of the BS degree, students have the option to apply to the graduate school and continue progress towards the MS SCM degree.

Overview

Objective:	This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in under 5 years. A student will earn a Bachelor of Science in

	Business Administration (BSBA) with a concentration in Supply Chain Management and a Master of Science (MS) in Supply Chain Management. Students must apply for admission to the 4+1 program. Six (6) hours of courses taken at the 500-level will apply towards both degrees. Upon completion of the BS degree, students have the option to apply to the graduate school and continue progress towards the MS degree.
Requirements:	Completion of all degree requirements for both the BSBA. in Supply Chain Management and the M **Objective:** This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in under 5 years. A student will earn a Bachelor of

		Science (BS) in Business Administration with a concentration (BSBA) in Economics and a Master of Science (MS) in Finance & Investment Management (MSF). BS of Business Administration Economics students must apply for admission to the 4+1 BS Economics/MS Finance program. Six (6) hours of courses taken at the 500-level will apply towards both degrees. Upon completion of the BS degree, students have the option to apply to the graduate school and continue progress towards the MSF degree.

	Requirements:	Completion of all degree requirements for both the BSBA. in Economics and the MS SCM with six credits of graduate-level courses that will count towards the supply chain concentration electives.
	with six credits of graduate-level courses that will count towards the finance concentration electives.	

Program Prerequisites and Admissions Requirements

- Admission to the Cameron School of Business as a supply chain management concentration student
- Minimum GPA: 3.0
- Completion of the B.S./M.S. Combined Program in Supply Chain Management form.
- Completion of the Undergraduate Request to Enroll in Graduate Courses Form
- Cover letter and resume

- Two letters of recommendation

Rationale for Proposed Plan

This program is an opportunity for students who excel in supply chain management to pursue a specialized master's program. The combined program will benefit students in several ways:

- Waiver of the graduate application fee and admission to the MS SCM program (pending completion of MS SCM program admission requirements)
- Allows six credit hours of graduate course work to satisfy six credit hours of undergraduate concentration requirements

Curriculum

Students must complete all requirements for the B.S. Business Administration with a Supply Chain Management Concentration as well as the requirements for the M.S. in Supply Chain Management.

B.S. Business Administration, Supply Chain Management Concentration Requirements

SCM 371 - Logistics and Distribution Management

This course provides an in-depth study of a wide range of logistics and distribution issues facing managers. Topics include an analysis of the following components of a typical logistics system: customer service, logisitics system analysis, network analysis, facility planning, warehouse operations, traffic and transportation management, and distribution planning. Attention is directed toward the establishment of sustainable competitive advantage based on transportation, logistics and distribution activities.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 375 - Quality Management

This course introduces quantitative and qualitative concepts and applications of quality management in

manufacturing and service organizations. Topics include quality design, continuous improvement, cost of quality, employee involvement in quality, team building for quality, quality circles, service quality, statistical process control, and the relationship among quality, productivity, and competitiveness.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 472 - Project Management

This course introduces the fundamentals of project management, beginning with project definition and culminating in the post-project review. Students will learn techniques, terms and guidelines that are used to manage costs, schedules, risk, group dynamics and technical aspects throughout the life cycle of the project.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 475 - Advanced Supply Chain Management

This course provides a detailed analysis of the materials planning and execution systems used to manage the flow of material in service and manufacturing organizations to facilitate all stages of the supply chain. Topics include systems for demand management and forecasting techniques, inventory control systems for distribution channels, materials and capacity requirements planning systems, scheduling and order dispatching systems.

Credit Hours: 3

Prerequisite Courses: SCM 370
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration

M.S. Supply Chain Management Requirements

Timeline

- Students who successfully complete the two 500-level MS SCM courses and all remaining B.S. Business Administration degree requirements are awarded the B.S. in Business Administration with a Supply Chain Management concentration.
- In the final semester of their B.S. program, students will apply for admission to the MS SCM program. If admitted to the MS SCM, the six credits earned at the 500-level will count towards the degree requirements of the MS SCM degree.
- **Note: Students that receive acceptance into the combined degree program are still subject to the admission requirements for the MS SCM program. Admission to the combined degree**

program does not guarantee admission to the MS SCM program.

Frequently Asked Questions

Q: How many classes will students need to complete to earn the MS SCM?
A: Students must complete the full 30 credits of MS SCM courses, but six of those credits can be earned before they begin the program.

Q: Can students be admitted to the MS SCM program upon graduation from the BSBA if they earn Cs in their 500-level electives?
A: Graduate applications will be evaluated based on our existing admissions criteria. A student who meets the criteria can be admitted to the MS SCM program. Courses at the 500-level in which the student earned a grade of C will not count towards the MS SCM degree requirements and must be replaced or retaken after advising by the MS SCM Director.

Q: What if I have additional questions about this program?
A: Please direct questions to Dr. Drew Rosen, Director (rosenl@uncw.edu)

Tourism, Recreation and Sport and Applied Gerontology, Bachelor's/Master's Combined Program

Program Coordinator: Tina Newsham, Ph.D. l Program Coordinator & Professor

(4 +1 Combined Programs l UNCW)

Program Prerequisites and Admission Requirements

- Admission to the School of Health and Applied Human Sciences as a B. A. in Tourism, Recreation and Sport student
- Minimum GPA: 3. 0
- At least 75 completed undergraduate credit hours prior to starting graduate courses
- Completion of the application found at https://uncw.edu/chhs/shahs/academic/graduate/gerontology/index.html
- One letter of recommendation from a faculty member with whom the student has taken a 300 or 400-level course
- Cover letter describing interest in the program and career goals related to gerontology
- Unofficial UNCW transcript

Overview

Objective: This combined bachelor's/master's degree program is designed to provide qualified students the opportunity to complete both degree programs in as little as five years. The successful student will earn a Bachelor of Arts (B.A.) degree in Tourism, Recreation and Sport and a Master of Science (M.S.) in Applied Gerontology (MGRN).

Undergraduate students in Tourism, Recreation and Sport must apply for admission to the 4+1 B.A. in Tourism, Recreation and Sport / M.S. in Applied Gerontology Combined Program. Students should apply to the 4+1 combined program in the semester in which they are completing their 75th credit hour so that they can begin graduate coursework the semester thereafter; undergraduate students can begin the 4+1 combined program in the fall or spring semester. Twelve hours of courses taken at the 500-level will be dual counted towards both degrees. Students then have the option to apply to the graduate school and continue progress towards the MGRN degree upon completion of the bachelor's degree.

Requirements: Completion of all degree requirements for both the B.A. in Tourism, Recreation and Sport and the M.S. in Applied Gerontology, with twelve credits of graduate-level courses that will count toward undergraduate requirements.

Rationale for Program

This program is an opportunity for students interested in working with older adults to develop knowledge, skills, and experience with and about the most rapidly growing segment of the population. Drawing on the Academy for Gerontology in Higher Education's competencies as a framework, our goal is to educate gerontologists who will improve quality of life and promote well-being of persons as they age within their families, communities and societies through research, education and application of interdisciplinary knowledge of the aging process and aging populations.

The purpose of the combined Bachelor of Arts degree in Tourism, Recreation and Sport and Master of Science degree in Applied Gerontology is to offer an accelerated path toward a Master of Science degree that prepares graduates with knowledge, skills, and competencies related to the leisure industry and

gerontology. These educational experiences prepare graduates to serve as qualified professionals providing leisure opportunities and experiences for individuals of all ages and from all walks of life to enhance their overall health, well-being and quality of life. Furthermore, student outcomes emphasize critical thinking and evidence-based practices as means of assisting older adult and organizations that serve them in reaching their goals and maximizing quality of life for older adults.

The combined program will benefit students by:

- Providing invaluable knowledge and experience working with older adults
- Allowing 12 graduate credits to satisfy undergraduate and graduate requirements
- Reducing costs of graduate education due to the ability to enroll in graduate courses during an undergraduate degree program at the undergraduate tuition rate

Curriculum

Students must meet all requirements for the Tourism, Recreation, and Sport, B.A. Students may count 12

credits of 500-level courses in the MGRN curriculum toward requirements for their undergraduate program of study. The courses available are:

- GRN 501 Aging and Society
- GRN 503 Investigative Inquiry in Gerontology (Instead of REC 359 Research and Evaluation in Recreation, Sport Leadership and Tourism)
- GRN 525 Health and Aging
- PSY 525 Psychology of Aging

For students who are admitted to the MGRN program:

Remaining requirements for that degree can be found in the UNCW Graduate Catalogue.

Timeline

- Once students are enrolled in the Tourism, Recreation and Sport major and are completing their 75 th credit hour, they can apply for admission into the 4+1 combined program.
- After completing at least 75 undergraduate credit hours, those admitted to the 4+1 program can enroll in the 12 designated graduate courses.

- Students who successfully complete the 12, 500-level credits and all remaining Tourism, Recreation and Sport degree requirements are awarded a B. A. in Tourism, Recreation and Sport.
- In the final semester of their bachelor's program, students may apply to the MGRN program for summer or fall admission. Applicants must meet all Graduate School admissions requirements and submit their application by the stated deadline. Admission to the 4+1 combined program does not guarantee admission to the MGRN program upon completion of the bachelor's degree.
- If admitted to the MGRN, the 12 credits earned at the 500-level will count toward the degree requirements of the M. S. in Applied Gerontology degree.
- The following schedule details the progression to completion of the master's degree in one year (note that only one of the two summer terms is required):

Summer	Fall	Spring	Summer
• GRN Practicum	• GRN 590 Practicum	• GRN 540 Current	• GRN 59 Practicu

in Gerontology	in Gerontology (repeated for credit)	Issues in Gerontology	in Geronto
• Elective	• GRN 597 Project Proposal	• GRN 598 Final Project	• Elective
	• Elective	• Elective	

- Students who do not go on to the M. S. in Applied Gerontology program may apply for admission to the Post-Baccalaureate Certificate in Gerontology and have the 12 credits earned at the 500-level count toward the degree requirements of the certificate.

Joint Programs

Three-Plus-Two Computer Science and Electrical or Computer Engineering Program

The Three-Plus-Two Computer Science and Electrical or Computer Engineering Program is a cooperative agreement between the University of North Carolina

Wilmington (UNCW) Computer Science Program and the North Carolina State University (NCSU) Electrical and Computer Engineering Department. The program gives students the opportunity to earn a Bachelor of Science degree in computer science from the University of North Carolina Wilmington and a Bachelor of Science degree in electrical or computer engineering from North Carolina State University. Students must complete all course work listed below to satisfy the Three-Plus-Two Program requirements. The UNCW phase of study can be completed in three years. Students meeting NCSU's transfer admission requirements (see below) are accepted to either the Electrical or Computer Engineering degree programs. The engineering portion of the program can be completed in two years with possible summer sessions. UNCW will accept credits from NCSU to complete degree requirements at UNCW and NCSU will accept credits from UNCW to complete degree requirements at NCSU. Thus, the student receives a degree from UNCW and a degree from NCSU. The Three-Plus-Two program must be started in the fall of the freshman year if it is to be completed in 5 years.

To complete the Three-Plus-Two Program, a student must complete the following courses at UNCW:

- All UNCW university studies and graduation requirements.
- Computer Science General Core Course Requirements: CSC 131, CSC 133, CSC 231, CSC 242, CSC 331, CSC 340, CSC 342, CSC 355, CSC 360, CSC 380, CSC 385, CSC 434, CSC 450.
- B.S.Computer Science Systems Options Requirements: CHM 101, CHML 101, MAT 161, MAT 162; PHY 201, PHY 202
- Computer Science Oral Requirement: CSC 385, CSC 495 or any other approved oral communication intensive course (see list here).
- Computer Science Computer Requirement: CSC 131.
- Computer Science Elective Credits: 9 hours (may be Engineering courses taken at NCSU and transferred back to UNCW).
- Additional courses prescribed by the Electrical and Computer Engineering Department at NCSU. Of these, the following are taught on-site at UNCW as distance education classes: ECE 200 and E 115.

A student must finish the UNCW phase of study with an overall GPA of at least 3.00, earn at least a 2.00 overall GPA in any NCSU courses taken via distance education, and have at least a 2.50 GPA in the last two calculus courses attempted to meet NCSU's transfer admission requirements. Students in this program will be advised jointly by an advisor in the Department of Computer Science and the director of the Engineering Program at UNCW to assure completion of the correct requirements for both programs.

Three-Plus-Two Physics and Electrical Engineering Program

The Three-Plus-Two Physics and Electrical Engineering Program is a cooperative agreement between the University of North Carolina Wilmington (UNCW) Physics Program and the North Carolina State University (NCSU) Electrical Engineering Program. The program gives students the opportunity to earn a Bachelor of Science degree in physics from the University of North Carolina Wilmington and a Bachelor of Science degree in electrical engineering from North Carolina State University. Students must complete all coursework listed below to satisfy the Three-Plus-Two

Program requirements. The UNCW phase of study can be completed in three years. If the student meets the transfer admission requirements for NCSU listed below, the student is accepted into the Electrical Engineering Program. This program can be completed in two years. UNCW will accept credits from NCSU to complete degree requirements at UNCW and NCSU will accept credits from UNCW to complete degree requirements at NCSU. Thus, the student receives a degree from UNCW and a degree from NCSU. The Three-Plus-Two program must be started in the fall of the freshman year if it is to be completed in 5 years.

To complete the Three-Plus-Two Program, a student must complete the following courses at UNCW:

- All UNCW university studies and graduation requirements.
- Physics Computer Requirement: PHY 400.
- Physics Oral Requirement: PHY 495.
- Physics Applied Learning Requirement: PHY 495.
- Physics B.S. Degree Course Requirements: CHM 101, CHML 101, CHM 102 ; CHML 102 ; MAT 161, MAT 162, MAT 261; MAT 361, PHY 201, PHY 202, PHY 311, PHY 314, PHY 321, PHY 335, PHY 336,

PHY 400, PHY 411, PHY 444, PHY 455, and PHY 495.

- Additional courses prescribed by the Electrical Engineering Program at NCSU. Of these, the following are taught on-site at UNCW as distance education classes: ECE 109, ECE 200, E 115.

A student must finish the UNCW phase of study with an overall GPA of at least 3.00, earn at least a 2.00 GPA in any NCSU distance education courses taken, and have at least a 2.50 GPA in the last two calculus courses attempted to meet NCSU's transfer admission requirements. Students in this program will be advised jointly by an advisor in the Department of Physics and Physical Oceanography and the director of the Engineering Program at UNCW to assure completion of the correct requirements for both programs.

Two-Plus-Two Engineering Program

(http://www.uncw.edu/preeng/)

The Two-Plus-Two Engineering Program is offered jointly by the University of North Carolina Wilmington College of Science and Engineering and the North Carolina State University College of Engineering. It leads to a bachelor's degree from North Carolina State

University in one of the engineering disciplines listed below. The purpose of the Two-Plus-Two Program is to offer students the opportunity to complete the first two years of an engineering degree program at UNCW and then transfer to NC State University in Raleigh, NC to complete their undergraduate engineering degree. Courses offered at UNCW in the first two years include courses in mathematics, physics, and chemistry, as well as several basic engineering courses, which are delivered via distance education from NC State. At this time, registration for the distance education courses is completed through the Two-Plus-Two Program offices. An introductory engineering course, EGN 101, is offered at UNCW. See "Engineering" in the Course Descriptions section of this catalogue for a description of this course. Contact the director for the most recent information on courses offered, curricula, and the Two-Plus-Two program.

Engineering degree programs offered by NC State University include:

Aerospace	Electrical
Biological	Environmental
Biomedical	Industrial

Chemical	Materials Science
Civil	Mechanical
Construction	Nuclear
Computer	Paper Science
Computer Science	Textile

Minor

A student may elect a minor in any academic discipline listed below. The student must meet with the department chairperson or coordinator to define the requirements to complete the minor. Declaration of a minor program is done in the Registrar's Office. (Minors in jazz studies and music should be declared in the music department.) Minors will be awarded at the same time as the baccalaureate degree. Upon completion of requirements and attainment of a degree, the minor will be posted on the student's academic transcript.

Accountancy and Business Law Minor

The accountancy and business law minor will provide non-CSB majors a foundation of financial and legal knowledge that can be applied in a business in their chosen field of study. A strong understanding of financial and legal aspects of businesses will position students for growth and managment positions in their profession. The minor is open to all students outside the Cameron School of Business. Business majors, with the exception of students pursuing a Bachelor's of Arts degree in Economics, are not eligible for the minor.

The minor core curriculum will provide students a strong foundation for maintaining financial records, utilizing financial information for managerial decision making, and understanding the legal environment of business. The minor elective course will provide students with an understanding of either the income tax implications of personal and business decisions or the commercial legal environment covering topics such as contracts, sales and warranties, and debtor and creditor rights.

Requirements for the Accountancy and Business Law Minor

Core Courses

The following six core courses (16 credit hours) are required.

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

ACGL 201 - Financial Accounting Lab

This course is the lab for ACG 201.

Credit Hours: 1

Corequisite Courses: ACG 201
Course Repeatability: Course may not be repeated.

ACG 203 - Managerial Accounting

An introduction to the concepts and techniques used by management to analyze and interpret accounting data in the organization.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACGL 201
Course Repeatability: Course may not be repeated.

ACG 301 - External Financial Reporting I

Analysis of traditional financial accounting topics and theory. Examines recent developments in accounting measurement and promulgations of the leading professional accounting organizations. ACG 301 emphasizes the development of accounting standards and theory, financial statements, and current assets.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum

grade of 'C' and ACG 203 with a minimum grade of 'C'.
Course Repeatability: Course may not be repeated.

ACG 306 - Accounting Information Systems

An introduction to the aggregation of data in an accounting information system with an emphasis on documentation, internal controls, and transaction cycles. Laboratory projects include advanced spreadsheet functions, an accounting software package and a database package.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'. Prerequisite or corequisite: ACG 301.
Course Repeatability: Course may not be repeated.

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in government. Examines how the legal environment is influenced by changing social and ethical values. Topics include agency, antitrust, forms of business

organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

Electives

One of the following two elective courses (3 credit hours) is required.

ACG 404 - Federal Income Taxes

The study of federal income taxation of individuals with emphasis on business income and expense items and property transactions.

Credit Hours: 3

Prerequisite Courses: ACG 301 with a grade of C or

better.
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business, or prerequisite course for students in the Accountancy and Business Law minor, or consent of department chair. Grade of C in ACG 301 .
Course Repeatability: Course may not be repeated.

BLA 461 - Commercial Law

Study of the commercial legal environment in which business enterprises operate. Examines the law of contracts, sales and warranties, security interests, commercial paper, and debtor and creditor rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

Total: 19 Hours

Additional Information:

A "C" or better in ACG 201, ACGL 201 Lab, and ACG 203, and a "C-" or better in the remaining minor courses is required. A cumulative Accountancy and Business Law minor GPA of 2.0 is necessary to earn the minor.

Africana Studies Minor

The UNCW Africana Studies minor is an interdisciplinary field of study designed to foster and encourage critical and systematic inquiry into the historical, cultural, social, and political factors and forces that shape African, African American, Caribbean, and other peoples of African descent around the world. By centering knowledge of Africana Studies, the curriculum seeks to provide students with a nexus to today's world; bringing knowledge and awareness to the diversity of its African peoples and to cultivate a sense of global community.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Africana Studies

To earn a minor in Africana Studies requires 21 hours, including six (6) hours in core courses; one course from each of the three groups, A, B, and C for a total of nine (9) hours; and six 6) hours from any of the groups including the electives. At least (6) of the 21 hours must be at the 300-level or higher.

Core Courses (6 Credit Hours)

AFN 130 - Introduction to Africana Studies

Interdisciplinary exploration of the collective experiences of the African Diaspora, which includes Africans and people of African descent in various continents and countries in addition to the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

AFN 290 - Readings in Literatures of the African Diaspora

This course explores the literary expressions of Africans and peoples of African descent as they are found in the Caribbean, Latin America, and in the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

or

ENG 232 - African American Literature

Introduction to the African American literary tradition through a focus on genre, historical era, or major themes, such as nationalism, religion, or urban culture. Topics/historical periods may vary according to instructor.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Course Group A: Arts and Aesthetics (3 Credit Hours)

ARH 300 - Egyptian Art

A study of the art and culture of ancient Egypt, from 3000 BC to the third century BC. Emphasis on architecture, sculpture, and painting as related to Egyptian history, culture, and religion.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 320 - African Art

Study of sub-Saharan African art and architecture from prehistoric times to the present. Special emphasis placed on form, content, function, and meaning, as well as the impact of African art on modern and African American art.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ENG 231 - Theory and Practice of Hip-Hop

A study of the theory and practice of hip-hop culture, with an emphasis on the four elements: turntablism, rap, graffiti, and dance. Students will be introduced to representative figures, periods, themes, and texts.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 357 - African American Literary Tradition to 1945

In-depth exploration of the African American literary tradition from its beginning to 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 358 - African American Literary Tradition Since 1945

In-depth exploration of the African American literary tradition since 1945.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

FRH 421 - French Immigrant Narratives

Study of major immigrant groups in France and the relationship between French immigration and French national and cultural identity. Analysis of depictions of immigrants from all continents in novels, short stories, graphic novels, music, and cinema in their socio-cultural, historical and artistic contexts.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or by placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Approaches and Perspectives/Living in a Global Society, Building

Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

MUS 116 - History of Jazz

A survey of the evolution of this American art form from its African roots and European influences to the present. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 220 - African American Music

A survey of the eveolution of African American music from its African roots to current trends in jazz, gospel, R & B, and hip-hop. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthestic, Interpretive and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MUS 344 - Class, Gender, and Sexuality in African American Music

Application of musical analysis and cultural studies to examine the intersections of race, class, gender and sexuality in African American musical traditions and among African American musicians. Technical knowledge of music not required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MUS 345 - Latin American Popular Music

Survey of popular music genres in Latin America, focusing on musical characteristics and components, instruments and performance techniques, and historical developments in their evolving musical forms. Music

will be presented with contextual information on the social, religious, and economic history of each region.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

THR 366 - Black American Theatre

Critical study of Black American theatre traditions and innovations from 1800 to present. May include various writers, dramatists, and performers from across the African Diaspora.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

Course Group B: Health and Historical Contexts (3 Credit Hours)

AFN 222 - Introduction to Gullah-Geechee Culture

Exploration of several theoretical, historical and contemporary issues and themes of Gullah-Geechee Culture, history, language and politics, as a specific African American ethnic enclave within America.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 260 - African-American History

Survey of the major themes and events in the history of African-Americans from the colonial period to the present.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Historical and Philosophical

Approaches
Course Repeatability: Course may not be repeated.

HST 371 - History of Premodern Africa

History of Africa from the earliest times to 1800 with emphasis on the social structures, cultures, economy, and political organizations of African peoples and their relationships with forces outside of Africa. This course can have a geographical or a thematic approach. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 372 - History of Modern Africa

Historical survey of African history from 1800 to the present with emphasis on the abolition of slavery and the slave trade; the scramble for Africa; establishment and operation of colonial rule; independence movements; and the post-colonial period.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 481 - Topics in African History

Intensive study of a selected theme in African history. Examples of topics: slavery, the slave trade and its abolition, pre-colonial Africa, colonial and post-colonial Africa, oral history in Africa. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 103 or HST 104) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 581

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

INT 330 - Topics in Africa

Intensive study of a selected topic or theme about Africa. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

INT 331 - The New Scramble for Africa

Interdisciplinary overview of environmental history and development in Africa from the colonial era to the present.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 332 - Global Politics of Food: An African Perspective

An examination of the global political economy of food through interdisciplinary examples from Africa with an exploration of the evolution of the human diet and traditional food production systems; the importance of culture in assigning meaning to food and how it is consumed; relationships between population, nutrition, and health; standards in the international trade of foods; the history and politics of food aid; food sovreignity and sustainable development; and the relationship between the environment and food security.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 333 - China in Africa

Examination of the historical and contemporary linkages between Africa and China. This course aims to provide students an opportunity to critically discuss and analyze China-Africa, or Africa-China, socioeconomic relations and their implications for future political relations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 322 - Ritual Therapy and Health in Caribbean Religions

Explores the Caribbean religious understandings of health and healing, ethnomedical and ritual therapeutics, and other metaphysical healing techniques and spaces, including *Ebo* healing of *Ifa* divination, *Palo and Santeria (Lukumi)* Botanicas. Familiarizes students with the different health and healing approaches, techniques, and spaces in the Caribbean communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PSY 365 - Psychology of Race and Racism

Examination of the construction and development of race and racial bias in the United States from a psychological lens. Topics include the processes that

underlie and motivate racial bias and how race and racism are maintained through social institutions and cultural ideologies. Scientifically-based means of addressing and reducing racism are considered.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

Course Group C: Social Justice and Religion (3 Credit Hours)

AFN 235 - Battle for Justice: From the Boat to the Vote

Examination of the right to vote through a focus on the Constitution, legislation, and case law. Including, exploration of methods of voting restriction and dilution such as literacy tests, poll taxes, redistricting, violence, and intimidation. Centering the impacts on race and democracy in the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

AFN 322 - Wilmington 1898

Examination of Wilmington's 1898 massacre and coup d'état through the lens of Africana Studies. Includes studying the impact and strategies for repairing the harms that continue today and how this event shapes Black and African American communities in the region, in the state, and across the country. Student research required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

AFN 353 - Black Feminisms: Survey of Black Feminist Thought

Exploration of the rich tradition of Black feminisms, womanisms, and queer theories, and the communities and institutions they speak of, for, and to. Includes the investigation of identities and identification, sexualities,

motherhood and family, womanisms, representation and citizenship, community building, and anger and activism.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

AFN 395 - Africana Studies and Community Engagement

Engagement in a service-learning project in Wilmington, NC region, and abroad related to communities of African descent. Emphasis on the African American communities' (and people of African descent) strengths, values, beliefs, attitudes, and ideals by the examination and application of community engagement and development concepts.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

PAR 233 - African Religions

Religions of Africa, including traditional and non-traditional religious systems, and their impact on African societies and Africanism in the Americas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 307 - Memoirs of Black Religion: Life-Narratives as Religious Sources

Study of memoirs and autobiographical texts by Black people from slavery through the twenty-first century, focusing on the intersection of religion and race. Complex exploration into the ways of religion and

spirituality in the history of Black communities in America, and their otherwise imaginaries of spiritual transformation, self-making, becoming, maturing, belonging, resisting, liberating, and dreaming.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PAR 377 - African American Religions

Study of the religious life and thought of Black American communities with concentration on independent traditions, sects, and a sampling of major thinkers and issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

PAR 378 - Caribbean Religions

Religious diversity within the Caribbean, including established, non-traditional, and Afrocentric religious traditions, and their interaction with popular culture.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 330 - Political Systems of Africa

Governments and politics of selected sub-Saharan African states. A survey from colonial days to the present with emphasis on contemporary economic, social and political problems.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 340 - The Black Experience in American Politics

American political institutions and processes through the eyes of Black America. This study will analyze the power structure in the black community, dissent and protest, black participation in the political system, black leaders and politicians and their politics, and the uniqueness of black politics as compared with the wider spectrum of the political system.

Credit Hours: 3

Prerequisite Courses: PLS 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Elective Courses (6 Credit Hours)

AFN 495 - Senior Seminar: Topics in Africana Studies

Intensive study of a selected theme in Africana Studies designed to foster and encourage critical and systematic inquiry into the historical, cultural, social, and or political factors that influence African, African American, Caribbean, and other peoples of African descent around the world.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

COM 344 - Intercultural Communication

Theoretical and practical perspectives on communication effectiveness in dealing with people, groups, or organizations that are culturally different within and across national boundaries.

Credit Hours: 3

Prerequisite Courses: COM 105 with a grade of 'B' or better, or permission of instructor.
Additional Restrictions/Requirements: Restricted to Junior standing or higher.
University Studies: Approaches and Perspectives/Living in a Global Society, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 346 - Interracial Communication

Explores communicative behaviors between individuals from various racial and ethnic groups and contextual dynamics unique to such interactions. Approaches to enhancing the content and quality of interracial relationships are also examined.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM Majors, or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM and COM Majors

CRM 370 - Racialization and the Criminal Justice System

Study of the relationships between racialization and criminalization. Exploration of the social, political and legal conceptions of "crime" and "justice" using critical perspectives and theories of crime.

Credit Hours: 3

Prerequisite Courses: CRM 105.
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

ENG 355 - American Multicultural Literature

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 201
Additional Restrictions/Requirements: ENG 204 or ENG 205 recommended but not required.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated

FRH 412 - The Francophone World

Study of representative literary and non-literary texts, films and sound recordings from French-speaking cultures in North America, the Caribbean, Africa, Asia, and elsewhere. Oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

Students must earn at least a "C" (2.00) average in courses counted for a minor in Africana studies. Courses taken to fulfill major requirements cannot be used to fulfill requirements for the Africana studies minor.

Anthropology Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Anthropology

Core Courses (9 Credit Hours)

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 207 - Archaeology

An exploration of the objectives, theories, methodologies and interpretive tools utilized in the study of humankind's past. Both prehistoric and historic cultures will be examined. The lab for this course is ANTL 207.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

ANT 210 - Biological Anthropology

Introduction to the study of human evolution. A dynamic exploration of nonhuman primates, fossilized human ancestors, and human biology. Examines the intersection of biology and culture.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

- 12 additional hours, at least 6 of which are at the 300-400 level.

Total Credit Hours: 21

Additional Information

ANTL 207 - Archaeology Lab may be taken as an elective but is not required.

In selecting the courses to fulfill the minor requirements, students are strongly encouraged to consult with the anthropology faculty.

A "C" (2.00) grade point average is required among anthropology courses used to satisfy the above requirements.

Applied Behavior Analysis and Developmental/Intellectual Disabilities Minor

The College of Science and Engineering and the Watson College of Education offer an interdisciplinary minor in Applied Behavior Analysis and Developmental/Intellectual Disabilities. This minor provides students with the opportunity to develop an understanding of the fundamentals of behavior analysis with an emphasis on how these principles are applied, for example, to individuals with intellectual disabilities such as autism, in schools, etc. The curriculum, reflecting the interdisciplinary nature of the field, will include coursework from the department of psychology and the special education program. Students should contact one of the Minor coordinators for more information.

Requirements for a Minor: All students must complete four required core courses (12 hrs), one required field experience course (3 hrs), a required advanced topic (3-4 hrs), and 3 hours of approved electives for a total

of 21-22 hours. At least 9 hours must come from courses outside the student's major.

Required Core Courses (12 hours):

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 217 - Learning and Behavior Change

Basic principles of conditioning, learning, and behavior change. Topics will include and introduction to classical and operant conditioning and the applications experimentally discovered principles to psychological interventions, as well as other fields such as education, business, and health.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 317 - Applied Behavior Analysis: Challenging Behavior

Extension of the principles of learning and behavior analysis to socially significant human issues, focusing on the assessment and treatment of behavior in need of reduction and related ethical considerations. Topics include preference and reinforcer assessment, functional assessments, and function-based interventions. Areas of application include education, developmental and intellectual disabilities, health, and caregiver training.

Credit Hours: 3

Prerequisite Courses: PSY 217
Course Repeatability: Course may not be repeated.

SED 250 - Introduction to Special Education

Survey of major categories of exceptionality including intellectual disabilities, learning disabilities, behavioral and emotional disorders, attention deficits and hyperactivity, communication disorders, sensory impairments, multiple and severe disabilities, physical and health impairments, and giftedness. Includes study of definitions, characteristics, etiology, psycho-social implications, educational interventions, and current issues. At least 6 field experience hours required.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Required Field Experience Course (3 hours):

PSY 419 - Applied Behavior Analysis Practicum

Supervision of student practice in applied behavior analysis in a variety of clinical programs. Students participate in supervised experiences related to

behavioral assessment and interventions for children diagnosed with learning and/or intellectual disabilities who display problematic behavior and/or experience deficits in feeding, social, or communication skills. Emphasis on practice of skills and regular consultation with the supervisor.

Credit Hours: 3

Prerequisite Courses: PSY 217, and PSY 317 or PSY 316
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

SED 351 - Learning and Behavioral Disorders in a Diverse Society

Designed to examine the complex variety of learners with behavioral or emotional disorders and learning disabilities. Emphasis on etiology, assessment, diagnosis, characteristics, theories, historical

influences, teaching strategies, and current trends. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SED 352 - Behavioral Development

Designed to develop an understanding of social/emotional development and effective principles and strategies to promote positive behavioral development. Focus will be on positive behavioral support, functional behavioral assessment, teaching pro-social behaviors and social skills, establishing affective environments, parent training and effective behavior change strategies. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 356 - Severe Disabilities

Study of etiology, definitions, characteristics and programming needs of persons with moderate, severe, and profound intellectual disabilities, low functioning autism, and multiple disabilities. Current approaches to treatment and education of persons with severe disabilities in a variety of settings and across the life span will be included. Students will be expected to develop a basic knowledge of the various aspects of severe disabilities and use that knowledge to make informed decisions about appropriate practices in the education of this population. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 352.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

Note: **One** of these courses must be taken to meet the required field experience. Subsequent courses in this category may be used to meet elective requirements.

Required Advanced Topic (3-4 hours):

PSY 417 - Advanced Learning and Behavior Analysis

Advanced study of the empirical and conceptual principles of learning and behavior analysis and of the applications of these principles. Students help design and implement laboratory experiments, collect and analyze data, and communicate findings via oral presentations and laboratory reports. Students typically have hands-on laboratory experiences, including supervised, direct interactions with nonhumans.

Credit Hours: 6

Prerequisite Courses: PSY 217 and PSY 355
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

SED 374 - Applied Behavior Analysis for Teachers

Designed to provide a strong foundation and knowledge of basic principles of learning through the introduction of Behavior Analysis: the science and technology of behavior. The focus will be on empirically validated instructional strategies by which students learn academic, social and physical skills. At least 20 field experience hours required.

Credit Hours: 3

Additional Restrictions/Requirements: 9 hours of Curricular Foundations.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Note: Either course may be used to meet elective requirements if both courses are taken.

Elective Courses (3 hours):

At least three credit hours from any of the following:

ASL 101 - Introductory American Sign Language I

Emphasis on achievement of an active command of the language and a strong foundation of ASL vocabulary and language structure. Students will be expected to demonstrate a basic/minimal level of competency in expressive and receptive skills of ASL. The basic cultural characteristics of the Deaf and Hard of Hearing communities will be introduced.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

PSY 220 - Child Psychology

Human psychological development through childhood and early adolescence. Normal development is emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 316 - Applied Behavior Analysis for Behavior Technicians

Introduction to the methods and practice of applied behavior analysis as performed by registered behavior technicians (RBTs), typically with individuals diagnosed with learning and/or intellectual disabilities receiving services from certified behavior analysts. Topics include measurement, assessment, skill acquisition, behavior reduction, documentation and reporting, professional conduct and ethics, and score of practice.

Credit Hours: 3

Prerequisite Courses: PSY 217
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 318 - Applied Behavior Analysis: Skill Acquisition

Extension of the principles of learning and behavior analysis to socially significant human issues, focusing

on the assessment and treatment of behavioral deficits. Topics include differential reinforcement, shaping, stimulus control, chaining, verbal behavior, habit reversal, and token economies. Areas of application include education, developmental and intellectual disabilities, and other diverse populations.

Credit Hours: 3

Prerequisite Courses: PSY 217
Course Repeatability: Course may not be repeated.

PSY 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

PSY 495 - Topical Seminar

Discussion of selected topics in psychology. May be repeated for additional credit.

Credit Hours: 1 To 3

Prerequisite Courses: PSY 105
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PSY 499 - Honors Work in Psychology

Independent work for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

HFE 415 - Adapted Physical Activity

Provide students theoretical and practical knowledge to plan and implement appropriate physical activity programs for individuals with disabilities in integrated and inclusive settings.

Credit Hours: 0

Prerequisite Courses: (EXS 216 with a C- or better and EXSL 216 with a C- or better) or (BIO 240 with a C- or better and BIOL 240 with a C- or better).
Additional Restrictions/Requirements: Senior standing, prerequisite courses, or consent of instructor.
University Studies: Writing Intensive, Information Literacy
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - General Professional Internship Liability Insurance Additional Course Fee Schedule

Total: 21-22 hours

Art History Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Art History

Core Courses (9 Credit Hours)

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 204 - Art of the Modern World

Examination of major monuments, artists, and artistic developments from the 19th to the late 20th century, primarily in Europe and the Americas. Study of the relationship between works of art and the historical, political, religious, and philosophical context of the societies that produced and made use of them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

- Choose 9 hours from the 300-400 level ARH courses.

Total Credit Hours: 18

Additional Information

No more than 3 hours of ARH 491 or 3 hours of ARH 498 may be counted toward the major. A grade of "C" (2.00) or better is required for each course counted toward the minor.

Asian Studies Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in Asian studies. The minor provides students with a multifaceted understanding of Asian societies, histories, languages, political systems, and geographies. For additional

information, students should contact the coordinator in the Department of World Languages and Cultures.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Asian Studies

A minor in Asian studies requires a total of 21 credit hours, distributed as 12 hours of core courses and 9 hours of designated electives.

Core Courses (12 Credit Hours)

HST 103 - Introduction to Global History 1500-1848

The political, economic, cultural, religious, and environmental processes that transformed the world between 1500 and 1848. Examines the Columbian (biological) Exchange, formation of colonial empires, expansion of global religions, and emergence of global trade and slave trade.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 317 - Political Thought of Asia

Recommended: PLS 212. Critical assessment of philosophical responses to the political, economic, and social challenges faced by the Asian Region. Considers

Asian political thought comparatively, addressing recurring issues of politics and community life.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

or

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
and
3 hours of a foreign language (either JPN 101, CHN 101, or transfer credit of study of another Asian language).

Elective Courses (9 Credit Hours)

CHN 101 - Introductory Chinese I

Emphasis on achievement of an active command of the language. Aural-oral practice; intensive study of the basic pattern of spoken Mandarin; reading, writing, and basic conversation. For students with one unit or less of high school Chinese.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

CHN 102 - Introductory Chinese II

Emphasis on achievement of an active command of the language. Aural-oral practice; intensive study of the

basic pattern of spoken Mandarin; reading, writing, and basic conversation.

Credit Hours: 3

Prerequisite Courses: CHN 101
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

FST 380 - Introduction to Bollywood Cinema

Survey of India's Bollywood cinema from the silent period to the present. Emphasizes historical and critical approaches to Bollywood cinema, as well as studies of censorship, cinephilia, and popular visual culture.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 385 - Japanese Cinema

Japanese cinema from the classical period to the present day. Emphasizes critical and historical

approaches to Japanese cinema, as well as studies of key filmmakers, including Kurosawa, Mizoguchi, Ozu, Suzuki, and Kitano.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

HST 362 - History of Premodern East Asia

Survey of East Asian history from ancient times to the mid-nineteenth century, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 363 - History of Modern East Asia

Survey of East Asian history from the mid-nineteenth century to the present, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 364 - History of Premodern South Asia

An examination of history of South Asian history from ancient times to the mid-nineteenth century. Course may be repeated for credit under different subtitles including Mughal India, history of Pakistan, and colonialism in India.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 365 - History of Modern South Asia

An examination of history of South Asian history from the nineteenth century till the present. Course may be repeated for credit under different subtitles including India and Pakistan since 1947, and Ghandi and Ghandism.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 497 - Topics in Asian History

Intensive study of selected themes and events in Asian history not regularly covered in other courses. Examples of topics include: The Chinese Revolution, Meiji Japan, Gandhian thought, nationalist movements. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 103 or HST 104) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 597
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

INT 335 - Topics in Asia

Intensive study of a selected topic or theme about Asia. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 336 - Modern China through Film

Examination of the social, cultural, economic, and political issues confronting modern China as constructed in feature films produced inside the country

and the West including before and after the Communists came to power.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 337 - China Encounters the World

Examination of how China has encountered the world since the 17th century, with emphasis on the late 19th and 20th centuries and how China has emerged as a major power in the 21st century.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

JPN 101 - Introductory Japanese I

Emphasis on achievement of an active command of the language. Aural-oral practice; intensive study of the basic pattern of spoken Japanese; reading, writing, and basic conversation. For students with one unit or less of high school Japanese.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

JPN 102 - Introductory Japanese II

Acquire basics of Japanese conversation, pronunciation, reading, and written composition with approximately 60 new kanji. Skills include self-introductions, make simple requests to do and not to do things, describe situations and people, and report what others think and say.

Credit Hours: 3

Prerequisite Courses: JPN 101 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

JPN 201 - Intermediate Japanese I

Able to sustain short conversations as well as create and understand short written compositions on familiar topics such as personal interests, preferences, future plans, and past experiences with about 140 kanji, while continuing to explore elements of Japanese material and nonmaterial culture.

Credit Hours: 3

Prerequisite Courses: JPN 102 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
Additional Restrictions/Requirements: Sufficient score on placement exam or approved credit hour equivalents.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

JPN 202 - Intermediate Japanese II

Study of spoken and written Japanese, including expressing abilities and desires, making and responding to requests, offering suggestions, making apologies, conveying second-hand information, and expressing doubt, all the while broadening knowledge

of Japanese culture. Introduces new constructions, including volitional, conditional, and benefactive verbs, as well as about 70 new kanji.

Credit Hours: 3

Prerequisite Courses: JPN 201 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

JPN 294 - Japanese Study Abroad I

Please enter a description.

Credit Hours: 1 To 9

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

JPN 311 - Perspectives on Contemporary Japanese Culture

Social, economic, and political issues in contemporary Japanese culture explored through a variety of sources with particular emphasis on comparing and contrasting Japanese and international perspectives on trends and issues of global significance including national identity, the family unit, rights and responsibilities of individuals, and sustainability. Course taught in English.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 370 - Tibetan Buddhism

Examination of the Buddhism of Tibet as seen in ethical and social thought, ritual and meditation practice, philosophy, and art.

Credit Hours: 3

Prerequisite Courses: PAR 232
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PAR 371 - Buddhism

Survey of the essentials of Buddhism as seen in ethical and social thought, mediation practices, philosophies, rituals and art.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 372 - Religions of India

Examination of the religions of India as seen in ethical and social thought, ritual and mediation practice, philosophy, and art. Includes Hinduism, Buddhism, Sikhism, and Jainism

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 373 - Chinese Religions

Examination of the history, philosophies, practices, and institutions of Chinese religions through both primary texts and secondary scholarship. Focus mainly on the indigenous religions of China - Confucianism, Daoism, and 'popular' or 'folk' traditions. Course will make use of texts, films, online resources, and images.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 374 - Japanese Religions

Examination of Japanese religions and their roles in Japanese culture and society. Course will make use of texts, literature, film, anime, manga, and other media.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 375 - Islam

Introduction to religious beliefs, rituals and traditions of Islam. Examination of its historical background and contemporary significance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 317 - Political Thought of Asia

Recommended: PLS 212. Critical assessment of philosophical responses to the political, economic, and social challenges faced by the Asian Region. Considers Asian political thought comparatively, addressing recurring issues of politics and community life.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

At least six credits of the total 21 must be taken at the 300-level or above. No more than 9 hours in a single discipline may be counted towards the minor. Substitutions may be approved for topic courses, seminars, directed individual study, field work, and/or study abroad that focus primarily on Asia. Students must have a grade of "C-" or better for each course

counted towards the minor and an overall "C" (2.00) average or better for all courses counted for the minor.

Assistance Dog Training Minor

Program Coordinator: Brent Hawkins, Ph.D. | Program Coordinator & Associate Professor

(Assistance Dog Training Minor | UNCW)

The School of Health and Applied Human Sciences offers an interdisciplinary minor in assistance dog training. The minor is designed to prepare students to be assistance dog trainers and to use animal assisted interventions in a variety of settings, such as schools, hospitals, and long-term facilities. Course work requires field experience working with assistance dogs in-training and individuals with disabilities. Students are accepted into the minor after successfully completing RTH 378 Advanced Assistance Dog Training I. Students should contact the coordinator for more information.

Total hours for the minor: 18 credit hours.

Students completing the Assistance Dog Training Minor are expected to:

1. Demonstrate an understanding of the various roles, responsibilities, and laws related to assistance dogs and animal assisted-interventions, including animal-assisted activities, animal-assisted education, and animal-assisted therapy;
2. Demonstrate the ability to apply animal behavior theories to training assistance dogs;
3. Demonstrate the ability to train an assistance dog to perform public access skills;
4. Demonstrate the ability to apply the concepts used in the classroom to train an assistance dog, appropriately place an assistance dog with a client, and train an assistance dog recipient to handle his or her assistance dog.
5. Demonstrate knowledge of and ability to use a facility dog (or other animal) to work with individuals or groups in a healthcare facility or school to accomplish client/student-centered goals.

Requirements for a Minor in Assistance Dog Training

Core (15 credit hours):

RTH 286 - Assistance Dog Training I

Introduction of all aspects, roles and functions of assistance dogs in society and specifically to individuals with physical, neurological, psychiatric or emotional disabilities. Assistance dogs will be attending class on a regular basis. Service learning hours are required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

RTH 287 - Assistance Dog Training II

Students learn stage one training for assistance dogs, which includes assistance and therapy dogs, through hands-on demonstration and practice. Assistance and other dogs will be attending class on a regular basis. Service learning hours required.

Credit Hours: 3

Prerequisite Courses: RTH 286 with C- or better
Additional Restrictions/Requirements: Prerequisite

course and consent of instructor.
Course Repeatability: Course may not be repeated.

RTH 378 - Advanced Assistance Dog Training I

Advanced knowledge of animal behavior and training theories and how to apply these theories to training assistance dogs. Students will engage in practical and hands-on experience in the training of assistance dogs; and will be responsible for the 24/7 care and training of an assistance dog in-training. Requires participation outside of scheduled class time and UNCW liability insurance.

Credit Hours: 3

Prerequisite Courses: RTH 287 with C- or better
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Additional Fee - Liability Insurance

RTH 379 - Advanced Assistance Dog Training II

Knowledge of advanced theories of disability and behaviors that influence placement and use of assistance dogs. Students will engage in practical and hands-on experience in the advanced training of assistance dogs; and the training of a assistance dog to work specifically with a potential assistance dog recipient. Students will be responsible for the 24/7 care. Requires participation outside of scheduled class time and UNCW liability insurance.

Credit Hours: 3

Prerequisite Courses: RTH 378 with C- or better
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3 **Repeat Limit:** 2
Additional Course Fees: Additional Fee - Liability Insurance

RTH 290 - Facility Dog Training

Introduction to the implementation of animal assisted interventions (AAI) utilizing highly-trained facility dogs. Emphasis will be on the selection and preparation of a

facility dog to include topics of the: human animal bond, appropriate placement/screening of dog and facility, and the utilization of these dogs with multiple populations. Facility dogs and their handlers will be attending class on a regular basis.

Credit Hours: 3

Prerequisite Courses: RTH 286 with a C- or better and RTH 287 with a C- or better
Additional Restrictions/Requirements: Prerequisite courses or permission of Instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Electives (3 credit hours):

Students must choose one of the following courses to complete the minor.

COM 220 - Interpersonal Communication

Introduction to the theory and practice of relational communication in face-to-face and social media situations and contexts. Focus is on improving

interpersonal communication skills through understanding verbal, nonverbal, and relational processes.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

COM 246 - Communication with Deaf and Hearing-Impaired Persons

Exploration of communication challenges faced by deaf and hearing-impaired populations and those who seek to communicate with them. Introduction to (ASL) sign language.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior, or senior standing.
Course Repeatability: Course may not be repeated.

EDN 204 - Introduction to Early Childhood Education

This introductory course is designed for students who are interested in early childhood education and early intervention as professional careers. It examines the theoretical bases for teaching and early intervention with young children birth through five and their families. Content includes an overview of the historical roots, current issues, program models, and goals of early childhood education as well as an introduction to professional standards and organizations. Particular emphasis is placed on environments and interactions that are responsive to children's developmental, individual, and cultural needs. Field experiences required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PSY 217 - Learning and Behavior Change

Basic principles of conditioning, learning, and behavior change. Topics will include and introduction to classical and operant conditioning and the applications experimentally discovered principles to psychological interventions, as well as other fields such as education, business, and health.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 317 - Applied Behavior Analysis: Challenging Behavior

Extension of the principles of learning and behavior analysis to socially significant human issues, focusing on the assessment and treatment of behavior in need of reduction and related ethical considerations. Topics include preference and reinforcer assessment, functional assessments, and function-based interventions. Areas of application include education, developmental and intellectual disabilities, health, and caregiver training.

Credit Hours: 3

Prerequisite Courses: PSY 217
Course Repeatability: Course may not be repeated.

PSY 318 - Applied Behavior Analysis: Skill Acquisition

Extension of the principles of learning and behavior analysis to socially significant human issues, focusing on the assessment and treatment of behavioral deficits. Topics include differential reinforcement, shaping, stimulus control, chaining, verbal behavior, habit reversal, and token economies. Areas of application include education, developmental and intellectual disabilities, and other diverse populations.

Credit Hours: 3

Prerequisite Courses: PSY 217
Course Repeatability: Course may not be repeated.

PSY 324 - Psychology of Aging

A study of the psychological aspects of human aging. Topics include the effects of normal and diseased aging on perceptual and cognitive functioning,

personality and social relationships, and physical and emotional health.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 416 - Adult Development and Life Transitions

A course in human development. An exploration of the major normative and nonnormative changes that take place during adulthood. Operating from a lifespan perspective, includes examination of how adults initiate, understand, cope with and resolve life transitions (e.g. parenting, loss, illness, career change, relationships, change.)

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223 or PSY 320 or PSY 324
University Studies: Explorations Beyond the Classroom
Crosslisting: PSY 516
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 303 - Inclusive Recreation Services

Designed to increase the awareness of and sensitivity to the recreation and leisure needs of persons with disabilities. Specific attention is given to programmatic and administrative strategies for inclusive services in a variety of recreation settings.

Credit Hours: 3

Additional Restrictions/Requirements: RTH, REC and RST majors and minors only or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 370 - Recreation Therapy in Physical Rehabilitation

Etiology, functional and health implications of physically disabling conditions; selection of interventions; safety considerations pertinent to planning and delivery of recreation therapy services.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 368 with a C- or better.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 372 - Recreation Therapy in Behavioral Health

Etiology, functional, and health implications of developmental disabilities; sensory impairments; and conditions related to emotional and behavioral health; selection of recreation therapy interventions; safety considerations pertinent to planning and delivery of recreation therapy services.

Credit Hours: 3

Prerequisite or Corequisite Courses: RTH 368 with a

C- or better.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 384 - Recreation Therapy and Child Life with Hospitalized Children

An overview of practitioners' roles with children and families in hospitals - includes developmental milestones/issues; healthcare experiences; therapeutic interventions; family-centered care; diagnostic and treatment interventions; pain management; death and dying; interdisciplinary communication.

Credit Hours: 3

Prerequisite Courses: RTH 368
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SED 250 - Introduction to Special Education

Survey of major categories of exceptionality including intellectual disabilities, learning disabilities, behavioral and emotional disorders, attention deficits and hyperactivity, communication disorders, sensory impairments, multiple and severe disabilities, physical and health impairments, and giftedness. Includes study of definitions, characteristics, etiology, psycho-social implications, educational interventions, and current issues. At least 6 field experience hours required.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SED 351 - Learning and Behavioral Disorders in a Diverse Society

Designed to examine the complex variety of learners with behavioral or emotional disorders and learning disabilities. Emphasis on etiology, assessment,

diagnosis, characteristics, theories, historical influences, teaching strategies, and current trends. At least 15 field experience hours required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

SED 356 - Severe Disabilities

Study of etiology, definitions, characteristics and programming needs of persons with moderate, severe, and profound intellectual disabilities, low functioning autism, and multiple disabilities. Current approaches to treatment and education of persons with severe disabilities in a variety of settings and across the life span will be included. Students will be expected to develop a basic knowledge of the various aspects of severe disabilities and use that knowledge to make informed decisions about appropriate practices in the education of this population. At least 15 field experience hours required.

Credit Hours: 3

Prerequisite Courses: SED 352.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Additional Course Fee Schedule

SOC 336 - Sociology of Aging

Sociological theories and methods used to explain the aging process. Topics include demography, age stratification, aging and the life course, minority elderly, housing patterns, health, and social policy.

Credit Hours: 3

Prerequisite Courses: SOC 105 or GRN 101
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 365 - Social Psychology

A sociological analysis of human social interaction. Topics include symbolic interaction, socialization,

interpersonal relations. Focus is on social and cultural influences on individual and group behavior.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 433 - Sociology of Mental Disorder

Examination of the influences of race, social class, gender, and age on the incidence and prevalence of mental disorder. Consideration of the institutions that help those with mental disorders. Review of mental health law, including definitions of dangerousness, insanity as defense, mental health courts, and the right to treatment.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 18 credit hours

Biology Minor

The College of Science and Engineering offers a minor in biology that provides students with a broad foundation for understanding biological concepts from both basic and applied perspectives. The biology minor allows students from any major to pursue a focused exploration of biology across a range of analytical levels, from the molecule and cell to the organism and ecosystem. Students should contact the undergraduate coordinator in the Department of Biology and Marine Biology for additional information.

Requirements for a Minor in Biology:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
credit hours **Credits / Units:** 3
and

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

credit hours **Credits / Units:** 1

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
credit hours **Credits / Units:** 3
and

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic

principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

credit hours **Credits / Units:** 1

- 13 hours of Biology courses numbered 300 and above.

Total: 21 hours

Additional Information:

A "C" (2.00) or better average is required on courses counted towards the Biology minor.

Business Minor

none

Requirements for a Minor in Business

The minor in business requires completion of 22 hours, including 19 hours of core courses and 3 hours of electives. The minor is open to all students outside the Cameron School of Business. Business majors, with the exception of students pursuing a Bachelor's of Arts degree in Economics, are not eligible for the minor.

Required (19 hours):

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

ACGL 201 - Financial Accounting Lab

This course is the lab for ACG 201.

Credit Hours: 1

Corequisite Courses: ACG 201
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

FIN - 235 - Personal Finance

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or

STT 215
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Plus 3 hours from:

ACG 203 - Managerial Accounting

An introduction to the concepts and techniques used by management to analyze and interpret accounting data in the organization.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACGL 201
Course Repeatability: Course may not be repeated.

BAN - 305 - Introduction to Business Analytics

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in government. Examines how the legal environment is influenced by changing social and ethical values.

Topics include agency, antitrust, forms of business organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

CYBR - 201 - Fundamentals of Cybersecurity

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

FIN 335 - Principles of Financial Management

An introduction to the finance function of business enterprise and to the analytical techniques used in

making investment and financing decisions.

Credit Hours: 3

Prerequisite Courses: Prerequisite ACG 201, ECN 222 and (BAN 280 or STT 215); or prerequisite STT 315 and corequisite MAT 381.
Course Repeatability: Course may not be repeated.

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to

the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MIS - 213 - Introduction to Management Information Systems

MKT 248 - Sales Essentials

Examination of the theory and practice of sales skills designed to provide a professional foundation to students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer orientation, and other selling behaviors. Familiarize students with the role of selling in the promotional mix, practice presentation skills to be successful in professional selling, overcome objections, and close the sale.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total: 22 hours

Additional Information:

Students must earn a C- or above in all classes in the minor. Students may not double-count more than 2 courses from the Business Minor and another minor offered by the Cameron School of Business.

Campaign Management Minor

Admission Requirements

Current UNCW Undergraduate Students

See University Admission Requirements

Requirements for a Minor in Campaign Management

Core Courses (9 Hours)

COM 250 - Introduction to Political Communication

Examination of political communication theory and research. Content includes approaches to and history of political communication, roles of the media and public opinion, and the analysis of political messages. Application of course content to past and current

political events.

Credit Hours: 3

Prerequisite Courses: COM 105 or PLS 205
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 205 - Campaign and Elections

Focuses on the electoral arena (history, financing, political environments), nominations (delegate selections and conventions), campaigns (organization, strategy, tactics, media), and the election (votes, policy, reforms). Special attention is given to recent and current presidential and congressional election campaigns.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 404 - Campaign Management and Strategies

Internal mechanics of political campaigns, major areas of campaign management and strategy, campaign organization, voter contact, campaign research, finance and fund-raising, and communications. Special attention is given to recent and current presidential, congressional, and gubernatorial election campaigns.

Credit Hours: 3

Prerequisite Courses: PLS 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

Elective Courses (9 Hours)

Choose 3 courses

COM 256 - Persuasive Communication and Social Influence

Explores the power of social and symbolic influence as it relates to perceptions, values, and actions of others in both negative and positive ways.

Credit Hours: 3

Prerequisite Courses: COM 101 or COM 105 or PLS 205
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

COM 351 - Media and Politics

History and theory of the relationships among the mass media, government, and the American public, and their implications for American democracy. Portrayal and effects of various media. Addresses the media's independence from government, the structure of media organizations, media bias, news practices, political campaigns, and effects on public opinion.

Credit Hours: 3

Prerequisite Courses: COM 105 or PLS 205

Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

COM 352 - Political Communication II

Application-based examination of management, strategy, and tactics within political campaigns and the media coverage of modern politics. Students will survey historical and contemporary politics at both the local and national levels.

Credit Hours: 3

Prerequisite Courses: COM 250
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 356 - Speech Writing

Theory and practice of speech writing with special emphasis on writing speeches for others.

Credit Hours: 3

Prerequisite Courses: ENG 201 and (COM 105 or PLS 205), or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 303 - Political Behavior

The impact of citizen beliefs and preferences on election outcomes, and the factors that influence political participation. Structured around a critical examination of the assumptions, findings, and interpretations of the major studies of political behavior.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 316 - Women in Politics

Introduction to political perspectives on sex role differentiation. Among the topics to be discussed will be

political socialization of women in ancient and modern society; women's roles in politics and government; political consequences of women's entry into the work force; and contemporary issues in the women's movement. Emphasis will be placed throughout on comparative political analysis.

Credit Hours: 3

Prerequisite Courses: PLS 101 or PLS 111
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 353 - American Parties and Interest Groups

Historical and analytical treatment of the appearance and realignment of political parties during the five successive 'national party systems' since the beginning of the republic. Special emphasis is given to the question of contemporary party disarray and potential realignment.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 403 - Public Opinion

Origin, content, and policy impact of public opinion in democratic nations. Emphasis on the contemporary American experience and the genesis of mass movements.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 498 - Internship in Political Science

Experiential learning with selected public or private agencies or with an individual which allows the student

to utilize academic training while learning from a practical field experience. (Formal research project is a major part of the internship.)

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201 and (PLS 300 or PLS 304 or PLS 308)
Additional Restrictions/Requirements: Prerequisite courses, junior or senior standing, overall 3.00 GPA or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Major Restriction Political Science**Minor Restriction** Pre-Law

Total Credit Hours: 18

Additional Information

Students must complete a minimum of 9 hours from outside their major. Students must earn a minimum of 'C' (2.0) average for all courses counted toward the minor.

Chemistry Minor

The minor in chemistry is designed for students who are majoring in other disciplines but would like additional coursework in chemistry. It can be used to round out majors in other sciences or to add skills that will be assets in other careers.

Requirements for a Minor in Chemistry:

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHML 212 - Organic Chemistry Laboratory II

Reactions of organic compounds and the use of spectroscopic methods in the laboratory. This course is the lab for CHM 212.

Credit Hours: 1

Prerequisite Courses: Prerequisite:CHML 211. Prerequisite or corequisite: CHM 212.
Course Repeatability: Course may not be repeated.

or

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry; activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this

course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CHML 235 - Quantitative Analysis Laboratory

Laboratory techniques in classical and modern chemical analysis, including volumetric analysis, chromatography, and spectrophotometry. Application of statistical methods to laboratory data. Chemical equilibrium. This course is the lab for CHM 235.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 235.
Course Repeatability: Course may not be repeated.

- 6 additional hours in chemistry at the 300-400 level

Total: 22 hours

Additional Information:

An overall grade point average of "C" (2.00) is required in all chemistry courses counted toward the minor. A student may only count a total of 3 credit hours of CHM 491, CHM 498, and CHM 499 toward the minor.

Classical Studies Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in Classical Studies. The minor provides students with a multifaceted understanding of the civilizations of ancient Greece and Rome, as well as of the Western foundations of modern intellectual traditions. Students complement core requirements with studies in the fine arts, literature, political science, history and civilization, philosophy and religion, and ancient languages. Students should contact the coordinator in the Department of World Languages and Cultures for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Classical Studies

18 hours, of which at least 6 must be selected from the core courses.

Core Courses (6 Credit Hours)

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

CLA 210 - Mythology

The major mythological systems of Western society Greek, Roman and Norse. Mythology of other parts of the world and related material are also considered.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical and Philosophical Approaches
Crosslisting: ENG 210
Course Repeatability: Course may not be repeated.

PAR 201 - History of Western Philosophy I

A survey of Western philosophical thought in ancient and medieval times. Emphasis on the Greek origins of the philosophical tradition. Readings from the Pre-Socratics, Plato, Aristotle, Roman philosophy and such Christian thinkers as Augustine and Thomas Aquinas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

ARH 301 - Ancient Greek Art

A study of the art of the Aegean and ancient Greece, from 3000 B.C. to the first century B.C. Emphasis on architecture, painting, and sculpture as related to ancient history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 302 - Ancient Roman Art

A study of the art of Etruria and Rome from the sixth century B.C. to 350 A.D. Emphasis on architecture, painting, and sculpture as related to ancient history and culture.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 381 - Classical Myth in Western Art

Exploration of how Greek mythological stories have been used in the Western artistic tradition, following key mythological figures who regularly appear in art from the tenth century BCE to today, addressing changes in tradition, narrative, and intent.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

CLA 209 - Classical Literature in Translation: Topics

Major authors of ancient Greece and Rome. Emphasis on ancient literature in its social context and on classical themes in later literatures. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: ENG 201
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Crosslisting: ENG 209
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CLA 330 - Women in Ancient Greece and Rome

Women in ancient Greece and Rome through documentary, artistic and literary sources. Women's economy and community, medical issues, slavery, religion, construction of gender roles, and images of heroines in literature and the arts.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior, or senior standing.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLA 345 - Topics in Mythology

The study of a selected theme in world mythologies. Content varies from semester to semester. May be repeated once under a different subtitle.

Credit Hours: 3

Additional Restrictions/Requirements: Six hours of literature at the 200 level or above, or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

CLA 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair, and dean.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 306 - Ancient Greece and Rome

A study of the civilization of ancient Greece and Rome with special emphasis on the Greek classical period and the Pax Romana.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

LAT 102 - Introductory Latin II

The second course in a two-course sequence. Please see LAT 101 for description.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

LAT 201 - Intermediate Latin I

A review of the grammatical structure of the language. Emphasis on developing reading skills through readings from various Latin authors.

Credit Hours: 3

Prerequisite Courses: LAT 102
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

LAT 202 - Intermediate Latin II

The second course in a two-course sequence. Please see LAT 201 for description.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

LAT 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PAR 141 - Research Tools for Historical and Textual Criticism--Greek

Basic study of the Greek language with special attention to that of the New Testament.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 142 - Intermediate Greek

Continued study of the Greek language with attention to texts from the Hellenistic world.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 302 - Plato

Study of the Dialogues of Plato. Analysis of texts; contemporary interpretations.

Credit Hours: 3

Prerequisite Courses: PAR 101 or PAR 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

PAR 303 - Aristotle

An examination of Aristotle's philosophy through selected texts, supplemented with contemporary criticisms. Aristotle's criticisms of Plato; problems of interpretation.

Credit Hours: 3

Prerequisite Courses: PAR 101 or PAR 201
Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Additional Information

A "C" (2.00) or better average is required on courses counted toward the minor in Classical Studies.

Climate Change Sciences Minor

The Department of Earth and Ocean Sciences offers a minor in Climate Change Sciences. Because climate change science is a truly integrative and dynamic field which continues to become more technological and global in its approach, the climate change science minor requires students to develop basic proficiencies in several fields, while allowing students to focus on their specific interests through selection of appropriate elective courses.

Requirements for a Minor in Climate Change Sciences

Core Courses (6 Credit Hours)

Choose two of the following courses (only one of the Global Climate Change courses will count). The remaining courses can be used as an elective.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Choose from one of the following Global Climate Change courses:

GGY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Crosslisting: GLY 420, PHY 420
Course Repeatability: Course may not be repeated.

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

PHY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change. Historical and geological records of climate including sediment, tree ring, and ice core analysis. Physics and chemistry of climate, including Earth's energy balance, global carbon cycle, climate modeling, atmospheric composition and dynamics.

Credit Hours: 3

Prerequisite Courses: PHY 102 or (PHY 202 and CHM 102 and CHML 102 and MAT 162)
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, GLY 420
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

Choose 12 credit hours from the classes listed below. Courses not used in the core can be counted here as electives. Only one of the Global Climate Change courses will count toward the major. At least nine credit hours must be at the 300 level or above.

GGY 101 - Modern World Geography

The theory, techniques, and professional applications of modern geographic science. Examines geography as a broad interdisciplinary science focused on places, spatial patterns, and the intersection between human activities and the natural world. Includes discussion of the historical origins and modern relevance of geographic thought.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 160 - Our Changing Climate

Basic introduction to global climate change science and the potential impacts of global climate change. Explores global climate change skepticism and related political behaviors.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and

by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition and dynamics. Review of geographical

variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 420, PHY 420
Course Repeatability: Course may not be repeated.

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of

instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

GGY 436 - Ice Age Earth

A review of the Quaternary Period, roughly the last two million years of earth history. Topics included the discovery of the ice age, climate change theory, glacial dynamics, geological and biological records of environmental change, and human evolution and migration during the Quaternary.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101 or OCN 150.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GGY 475 - Water Resources: Science and Policy

This multi-disciplinary approach to planetary water management includes the history of water resource issues; natural hydrospheric water processes; water quality constituents in ecosystems and human health; water project construction and management; environmental impact issues of water quality, quantity, and management; and applications of water laws, allocation, economics, and conflict resolution.

Credit Hours: 3

Prerequisite Courses: GGY 130 or EVS 195 or OCN 150
Crosslisting: GGY 575
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite

impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 132 - The Earth Through Time

Geologic history of the earth and the fossil record. Methods of dating rocks and fossils, interpreting ancient environments and the age of the earth. Field trips.

Credit Hours: 4

Prerequisite Courses: GLY 101 or GLY 120 or GGY 130.
Course Repeatability: Course may not be repeated.

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

GLY 439 - Paleoclimatology

Climatic change throughout geologic time, with an emphasis on Quatenary climate change. Topics include an overview of Earth's climate system, tectonic-scale, orbital-scale, millennial-scale, and future climate change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 539
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 474 - Ocean Acidification

Exploration of the dynamic nature of our oceans, including the causes and impacts of ocean acidification on marine life and biogeochemical cycles today, and throughout Earth's history. Lectures, interactive group tasks, and student-driven dialogues on this critical environmental issue.

Credit Hours: 3

Prerequisite Courses: OCN 150 or CHM 101 or GLY 101 or GLY 120 or permission from instructor.
Course Repeatability: Course may not be repeated.

OCN 475 - Marine Biogeochemistry

A geochemical perspective on the chemistry of the world's oceans with an emphasis on carbon cycling through the marine geosphere and biosphere. Topics

include introductions to chemical oceanography, stable isotope geochemistry, paleoceanography, and investigations into the role of the oceans in the global carbon cycle through time.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101; and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: GLY 575.
Course Repeatability: Course may not be repeated.

OCN 485 - Relative Sea Level

Understanding relative sea level, sea-level fingerprints, and sea-level change to identify records of past coastal change, coastal dynamics, and coastal vulnerability at different timescales.

Credit Hours: 3

Prerequisite Courses: OCN 150, OCN 250, or GLYL

101
Course Repeatability: Course may not be repeated.

BIO 378 - Global Environmental Problems

Review and discussion of causes and effects of major environmental problems, with emphasis on ecosystem-level effects and interactions. Topics include extinction, deforestation, climate change, and pollution impacts.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 305 - Environmental Impacts of Climate Change

Team-taught by Department of Environmental Sciences faculty, this course focuses on the current and predicted effects of climate change on Earth's abiotic and biotic environment. This course is intended to enhance students' abilities to address challenges in the 21st century by providing a multidisciplinary approach to problem solving using biological, physical, social, and economic perspectives.

Credit Hours: 3

Prerequisite Courses: EVS 205.
Additional Restrictions/Requirements: Junior/Senior

standing or permission of instructor.
Course Repeatability: Course may not be repeated.

PHY 107 - Introduction to Climate Physics

Topics in algebra-based physics as applied to the global climate system and global energy balance. Introduction to the physics of the atmosphere and ocean, including vertical and meridional structure, atmospheric circulation and convection, wind-driven and thermohaline ocean circulation, climate variability and global warming, climate modeling and the modern international climate science process.

Credit Hours: 0 To 4

Course Repeatability: Course may not be repeated.

PHY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change. Historical and geological records of climate including sediment, tree ring, and ice core analysis. Physics and chemistry of climate, including Earth's energy balance, global carbon cycle, climate modeling, atmospheric composition and dynamics.

Credit Hours: 3

Prerequisite Courses: PHY 102 or (PHY 202 and CHM 102 and CHML 102 and MAT 162)
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, GLY 420
Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Clinical Research Minor

Program Coordinator: Annemarie Petroff, MS I Program Coordinator & Lecturer

(Clinical Research Minor I UNCW)

The Clinical Research Program offers a Minor in Clinical Research which focuses on fundamentals of clinical research methods, regulatory considerations, operational steps and clinical background involved in phases one through four of biopharmaceutical product development. The program content is relevant to employment in pharmaceutical companies, contract research organizations, clinical research service

providers, and clinical settings enrolling clinical trial subjects. The minor will allow students gaining expertise in other areas (e.g., statistics, chemistry, biology, etc.) to master the fundamental aspects of clinical research for careers in the clinical research industry or conducting clinical research as a clinician.

The Clinical Research Minor is not a nursing or laboratory based program.

Program Objectives for the Minor in Clinical Research

Upon completion of the Minor students should be able to: Discuss the foundational elements of clinical research methodologies described in study protocols with emphasis on study design, ethical aspects, operational aspects, and regulatory compliance. Explain scientific and regulatory concepts related to the development, design, and analysis of clinical studies for biopharmaceutical and medical device product development. Discuss clinical study operations in the context of Good Clinical Practice and other relevant guidelines and regulations Describe the collection, flow, and management of data through a clinical study and the role of statistics and informatics.

The Clinical Research minor is not a nursing or laboratory-based program.

Requirements for a minor in Clinical Research

Completion of a minor in Clinical Research requires 12-18 credit hours from the following core courses and up to 6 credit hours from the electives specified below. An application to the minor is not required.

Core Courses (12-18 credit hours):

CLR 301 - Introduction to Clinical Research

Provides overview of people, terminology, execution, and regulations involved in clinical research process. Focuses on phases of biopharmaceutical product development and protection of human subjects. Emphasis on FDA evaluation of new products for the pharmaceutical and biotechnology industries. Open to non-majors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

At least three of the following Core Courses:

CLR 325 - Pharmacotherapeutics

Focuses on therapeutic uses and effects of drugs. Discusses drug classes that may be encountered in clincal protocols during new drug development. Reviews various medical conditions and summarizes basic pathophysiology, clinical presentation, diagnosis, desired outcome, disease prevention, pharmacologic and non-pharmocologic therapy.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Restricted to Clincal Research majors and minors.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 330 - Fundamentals of Biopharmaceutical Product Development

This completely on-line course provides an overview of the development of pharmaceutical and biotechnology products for the marketplace. This course reviews the theoretical and practical aspects of the discovery of new entities, the preclinical process, chemistry

manufacturing and controls (CMC), manufacturing and scale-up of candidate products, over-the-counter and generic drugs, production and stability of marketed products as well as the overall costs of drug development.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minors.
Course Repeatability: Course may not be repeated.
Major Restriction Restricted to Clinical Research majors**Minor Restriction** Restricted to Clinical Research minors

CLR 340 - Study and Site Management for Clinical Trials

Operational aspects of clinical trials at the site level, including financial, personnel, and legal considerations. Introduces relevant regulations and guidelines including ICH GCP. Includes discussion of roles, responsibilities, and perspectives of the subject, clinical study

coordinator, prinicipal investigator, sponsor, and contract research organization.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Only open to students within the Clinical Research major.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 350 - Understanding Medical Terminology and Clinical Endpoints

Audio-visual approach to study of medical terminology, body systems, diagnostic procedures, and pharmacology. Emphasizes word construction, spelling, usage, comprehension, pronunciation, abbreviations. Applies terminology to clinical study endpoints commonly used to measure safety and efficacy of a biopharmaceutical product.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

CLR 430 - Managing and Monitoring Clinical Trials

Reviews theoretical principles and practices guiding trial monitoring, project management, and trial phases including planning, initiation, monitoring and closing. Discusses roles and responsibilities of people and groups focusing on protocol development, site monitoring, quality assurance, data management and overall trial management.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better and CLR 330 with a C or better and CLR 340 with a C or better.
Additional Restrictions/Requirements: Restricted to Clinical Research majors.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 440 - Bioanalytics

Examines study designs and statistical analyses commonly used in biopharmaceutical clinical trials and post-marketing studies with focus on interpreting descriptive and inferential statistics. Explores techniques such as randomization, blinding, and placebo-control. Reviews industry processes for data analysis. Discusses basic concepts in epidemiology, pharmacoeconomics, psychometrics/patient-reported outcomes.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better and CLR 330 with a C or better and CLR 350 with a C or better.
Additional Restrictions/Requirements: Restricted to CLR majors and CLR minors.
University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CLR 450 - Data Management

Examines role and responsibilities of data management in clinical research. Topics include organization, collection, review, and tracking of data; technology platforms; case report form design, and regulations. Includes an applied component to learn data structure and manipulation.

Credit Hours: 4

Prerequisite Courses: CLR 301 with a C or better.
Additional Restrictions/Requirements: Open only to students in the CLR major and CLR minor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

Electives (up to 6 credit hours):

Up to 6 credit hours from any of the following courses can be applied, but are not required if additional CLR courses are taken:

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIO 308 - Biology of Cancer

A comprehensive and multifaceted approach to studying cancer. Focus on research methods in three areas of investigation: basic cancer biology, cancer epidemiology, and clinical cancer research.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 370 - Evolutionary Medicine

The scientific study of evolutionary principles as they apply to human health and disease. Topics include antibiotic resistance, pathogen virulence, aging, cancer, autoimmune disease, obesity, and mental illness.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHM 235 - Quantitative Analysis

Data analysis and statistical methods; chemical equilibrium and analytical applications; volumetric analysis and spectrophotometry; acid-base chemistry; activities and other topics as time permits. Normally taken concurrently with CHML 235. The lab for this course is CHML 235.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102 with a minimum grade of C.
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C' (2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EXS 216 - Human Anatomy and Physiology I

Examines seven of the major organ systems that includes the human integumentary, skeletal, muscular, circulatory, and respiratory structures and functions as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural Word
Course Repeatability: Course may not be repeated.

EXS 217 - Human Anatomy and Physiology II

Examines six major organ systems that include the human nervous, endocrine, immune, digestive, urinary and reproductive systems as related to health and movement.

Credit Hours: 3

Corequisite Courses: EXSL 217
Prerequisite Courses: EXS 216
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and

technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EXS 310 - Research Methods in Exercise Science

Methods of research in the field of exercise science. Identification of research problems, sampling methods, data analysis and interpretation, and planning of evaluation studies.

Credit Hours: 3

Prerequisite Courses: EXS 210 with a "C" or better or RSP 324
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

EXS 320 - Exercise Physiology

This course is designed to enhance knowledge with respect to the physiological considerations and associated mechanisms related to physical activity, exercise, and performance.

Credit Hours: 3

Corequisite Courses: EXSL 320.
Prerequisite Courses: BIO 201 with a "C" or better, CHM 101 with a "C" or better, CHML 101 with a "C" or better, MAT requirement with a "C" or better (MAT 111 or MAT 112 or MAT 115 or MAT 151 or MAT 161 or MAT 160 with a "C" or better), (EXS 216 with a "C" or better and EXSL 216 with a "C" or better) or (BIO 240 with a "C" or better and BIOL 240 with a "C" or better) and (EXS 310 with a "C" or better or CHHS 411 with a "C" or better).
Additional Restrictions/Requirements: Restricted to Preexercise Science (PEXS) or Exercise Science (EXS) majors only or permission of instructor at the time the course begins.
University Studies: Critical Reasoning

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and

international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

PBH 310 - Social and Behavioral Determinants of Health

An overview of social and behavioral concepts related to public health with specific emphasis on behavioral theory and evidence-based practice. Examines the integration of health behavior, health theories and health promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH

course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 320 - Foundations of Global Health

Overview of health around the world. The class will explore contemporary issues, problems, and controversies in global health and identify key global health challenges, their distributions, and prevention strategies.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
University Studies: Building Competencies/Information Literacy
Crosslisting: HEA 320.
Course Repeatability: Course may not be repeated.

PBH 452 - Epidemiology

Epidemiology overview and history; distributions of disease by time, place and person; association and causality; epidemiological study designs; population and attributable risk; sensitivity, specificity and screening; public health practice and prevention; special issues in infectious and noninfectious disease epidemiology.

Credit Hours: 3

Prerequisite Courses: PBH 359 with a minimum grade of "C-".
Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Crosslisting: HEA 452.
Course Repeatability: Course may not be repeated.
Major Restriction PBH

PSY 245 - Drugs and Behavior

Psychological aspects of drug use and abuse. Emphasis on the effects of major psychoactive drugs (including alcohol) on behavior, the psychological determinants of drug use, and treatment of drug abuse.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PSY 355 - Introduction to Experimental Psychology

Basic principles of psychological research design and evaluation, including techniques of data collection and analysis, and conduct, interpretation, and reporting of various types of psychological research. Experimental research is emphasized.

Credit Hours: 6

Prerequisite Courses: PSY 225
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may not be repeated.

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in

service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or STT 215
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple

linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

STT 315 - Introduction to Probability

Introduction to calculus-based probability. Topics include: discrete and continuous random variables and probability distributions; mathematical expectation and variance; sampling distributions and the central limit theorem.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 162.
Course Repeatability: Course may not be repeated.

Some non-CLR courses require pre-requisites. Students are expected to complete the prerequisites outside the CLR minor.

Total: 18-19 total credit hours

Additional Information

A 'C' (2.00) or better average is required in all courses counted toward the minor.

Coastal and Environmental Writing Minor

The interdisciplinary minor in Coastal and Environmental Writing provides students the opportunity to develop skills in environmental writing that is informed by the study of relevant science and literature. The curriculum is designed to reflect the interdisciplinary nature of this writing specialty through coursework from several departments, allowing students to master the fundamentals by using traditional classroom courses and applied learning. 21 credit hours: 15 hours in core courses, including 3 hours of internship, and 6 hours in electives from two broad areas of study. At least 3 of the 6 elective hours must be taken in courses at the 300-400 level.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for the Minor in Coastal and Environmental Writing

21 hours - 15 hours in core courses, 6 hours in electives

Core Courses (15 Credit Hours)

The Minor in Coastal and Environmental Writing offers students the opportunity to develop writing skills that explore, explain, and advocate for the environment.

CRW 300 - Research for Creative Writers

Instruction for writers of creative nonfiction, fiction, and poetry in searching electronic, print, and physical archives; historical artifacts; the geographical and built environment; and living sources, with special emphasis on interviewing techniques and ethics, and on integrating research into artistic writing.

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: A grade of C- or higher is required for the course to count toward the Major in Creative Writing or the Minor in Coastal and

Environmental Writing. A grade point average of C (2.00) or higher is required for all courses counted toward the major or minor.
Course Repeatability: Course may not be repeated.
Major Restriction Pre-Creative Writing, Creative Writing**Minor Restriction** Coastal and Environmental Writing

ENG 202 - Introduction to Journalism

Introduction to news values, style, and writing. Focus is on writing news leads and news stories under deadline pressure. Also included: note taking, interviewing, and an introduction to feature writing.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Choose either EVS 195 or EVS 205. The other course may be taken as a Natural Sciences elective.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

OCN 250 - Coasts and Society

Variability of coastal landforms, the processes that shape them, problems brought about by natural and anthropogenic changes, and the role of culturally-based perceptions on valuation and management of coastal systems. Focus on coastal environments of populated continents and island nations including barrier islands, rocky coasts, dunes, estuaries, marshes and deltas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CRW 498 - CRW 498 - Internship in Writing - Bass

Academic training and practical writing experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.

Credit Hours: 1

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: Prerequisite course and nine additional hours of CRW writing courses, of which at least three are at the 300-400

level. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

Elective Courses (6 Hours)

Arts and Humanities/Social Sciences

Choose one.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists, students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

COM 268 - Principles of Multimedia Journalism

Concepts, principles and basic skills in writing and producing news content for multiple media platforms; including radio, television, and internet-based outlets. Emphasis on news gathering, story construction and effective storytelling, proper formatting and scriptwriting techniques, and responding effectively to news problems and potentials.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 201 or permission of instructor.
Additional Restrictions/Requirements: Restricted to PCOM and COM majors, or journalism minors.
Course Repeatability: Course may not be repeated.

COM 280 - Introduction to Digital Media Production

Introduction to the process, technologies, and aesthetics of digital video and audio production. Topics include field and studio TV production, editing, lighting, sound acquisition, project planning and writing, emerging technologies, and career preparation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: COM 105, or consent of instructor.
Additional Restrictions/Requirements: Sophomore standing or higher.
Course Repeatability: Course may not be repeated.

COM 295 - Introductory Seminar in Communication Studies

Special topics in communication that are not explored in other courses. Additional restrictions based on topic.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: PCOM and COM Majors or permission of instructor.
Course Repeatability: Course may be repeated.

Maximum Repeatable Hours: 9 **Repeat Limit:** 2
Major Restriction PCOM and COM Majors

COM 361 - Media Law and Ethics

Survey of laws and ethical principles that inform and regulate mediated communication including: freedom of speech and expression, defamation, invasion of privacy, intellectual property, the rights and responsibilities of journalists/reporters, and the regulation of journalism, advertising, public relations and multimedia industries.

Credit Hours: 3

Prerequisite Courses: COM 265 or COM 268, or permission of instructor.
Additional Restrictions/Requirements: COM Major or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors**Minor Restriction** Journalism Minors

COM 368 - Applications in Multimedia Journalism

Emphasis on long-form/feature reporting. Technical training in the operation of news gathering equipment; refinement of news gathering techniques; presentation and delivery skills; and producing news content for multiple broadcast and digital platforms.

Credit Hours: 3

Prerequisite Courses: COM 268 or COM 280.
Additional Restrictions/Requirements: Or Permission of instructor
Course Repeatability: Course may not be repeated.
Major Restriction COM Studies Majors, or journalism minors.

COM 380 - Field Video Production I

Hands-on field video production including project planning, script writing, filming, recording, and editing. Emphasis on mastery of digital camera operation, audio acquisition, lighting, and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Prerequisite Courses: (COM 280 or FST 201) and COM 105 with a minimum grade of B
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

COM 383 - Audio Storytelling & Podcasting

Creation of audio-based projects in a variety of genres including IMC, news, sports, entertainment, and social media content. Topics include: voice development, project planning, scriptwriting, recording, editing, and promotion. Emphasis on proper audio acquisition, digital editing skills, and quality programming. Students complete a variety of productions working individually and in small groups.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 200 or permission of instructor.
Additional Restrictions/Requirements: PCOM or COM major or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM Majors

CRW 209 - Creative Nonfiction I: Discovery and Story Craft

Instruction in writing creative nonfiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work, the work of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 309 - Creative Nonfiction Writing II: Voice and Vision

Techniques of writing creative nonfiction and development of the creative process, including writing

exercises, editing, and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 209
Course Repeatability: Course may not be repeated.

CRW 420 - Advanced Manuscript Workshop: (Topic)

Advanced manuscript writing workshop in a single genre or mixed genres of creative writing.

Credit Hours: 3

Corequisite Courses: CRW 302, CRW 303, CRW 304, or CRW 306.
Prerequisite Courses: CRW 307 or CRW 308 or CRW 309.
Additional Restrictions/Requirements: CRW majors only.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 302 - Journalism Workshop

Continuation of ENG 202. Focus is on gathering news from various community and campus sources and writing in news style under deadline pressure. Also included: some attention to feature and editorial writing.

Credit Hours: 3

Prerequisite Courses: ENG 202
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may not be repeated.

ENG 303 - Reading and Writing Arguments

Instruction in rhetorical principles and their use in both analyzing and constructing persuasive texts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing

Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 318 - Writing and Activism

Study of visual and textual elements of documents generated in the service of activist causes. Themes may include propaganda, grassroots and electronic activism, and the negotiation of power.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 363 - Studies in Nonfiction

Types of nonfiction prose, including biography, autobiography, memoirs, journals, and various essay forms. Works from a variety of periods, writers, and traditions. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 376 - Environmental Literature

Study of a broad range of literature from multiple periods and genres, examining how humans define and engage the environment in terms of aesthetics and imagination, politics and policy, culture and identity, religion and science, and conservation and sustainability.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 384 - Studies in Popular Culture

Critical study of popular culture as an aesthetic and economic phenomenon that plays an integral role in everyday life. Includes a variety of primary texts in multiple media forms (which may include fiction, film, music, and television) as well as readings in cultural and critical theory.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated

ENG 392 - Protest Literature

An in-depth exploration of protest literature as a form of cultural resistance and agent of sociopolitical change. Works may be selected from a variety of writers, periods, nations, and traditions.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
University Studies: Building Competencies: Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 393 - Writing in the Scientific Disciplines

Rigorous introduction to writing for academic science contexts. Critically examines the current state of academic science writing and explores the multiple practical strategies scientists use to communicate in professional settings.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FST 398 - Practicum in Film Production

Selected topics in film production. May be repeated under different subtitles.

Credit Hours: 1 To 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST major or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 416 - Advanced Practicum in Film Production

Selected topics in advanced film production. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Crosslisting: FST 516
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 332 - American Environmental History

The significance of the environment in American history from the colonial period to the present. Emphasis on the relationship between the natural environment of

North America and the development of American culture and society, as well as changing attitudes toward the natural environment.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 456 - Seminar: U.S. Environmental History

Selected topics in U.S. environmental history. Examples of topics: nature and culture, the cult of the wilderness, conservation and preservation, resources and regions, gender and nature, the environmental movement. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 105 or HST 106) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing

Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 533
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around

resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Natural Sciences

Choose one. EVS 195 or EVS 205 may be taken in this category if not taken as part of the core requirements.

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIO 150 - Humans and Ecology

Introduction to the principles of ecology including concepts of succession, biotic communities, biodiversity, limits on population growth and conservation of natural resources.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 180 - Plants and the Environment

Introduction to the plant kingdom through study of plant diversity, structure, and function as they relate to environmental issues such as global carbon balance, deforestation, agricultural runoff, and the effects of the introduction of genetically engineered plants. Impact of plants on human culture, history, civilization, and economics will be discussed.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

BIO 205 - Biology of the Sea

Introduction to the organisms that live in marine environments and the role of humans in the use of marine resources. Explores the biological, physical, chemical, and geological characteristics of various marine habitats.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

EGN 330 - Coastal Wave Mechanics

Examination of the mechanics of water wave motion using linear and non-linear wave theories. Exploration of wave generation, forecasting and measurement.

Covers wave propagation and transformation from offshore to the nearshore where waves interact with the bottom causing shoaling, breaking and initiating sediment movement.

Credit Hours: 3

Prerequisite Courses: MAT 361
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 305 - Environmental Impacts of Climate Change

Team-taught by Department of Environmental Sciences faculty, this course focuses on the current and predicted effects of climate change on Earth's abiotic and biotic environment. This course is intended to enhance students' abilities to address challenges in the 21st century by providing a multidisciplinary approach to problem solving using biological, physical, social, and economic perspectives.

Credit Hours: 3

Prerequisite Courses: EVS 205.
Additional Restrictions/Requirements: Junior/Senior standing or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 321 - Analyzing and Communicating Environmental Issues

Studies how current environmental issues are discussed, communicated, and presented to a broad range of audiences. Students research current environmental topics and make presentations, which are peer-reviewed and critiqued.

Credit Hours: 3

Prerequisite Courses: EVS 195 or EVS 205.
Course Repeatability: Course may not be repeated.

EVS 426 - Island Ecology for Educators

A field-based exploration of plants and animals of coastal island ecosystems and related environmental issues. Students will develop readily-accessible, web-based materials appropriate for outreach and education. This course focuses on both science content and pedagogical resource development.

Credit Hours: 3

Crosslisting: EDN 426
Course Repeatability: Course may not be repeated.

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection

options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive

Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 365 - Written Communication in Oceanography

Development of written scientific communication skills for topics related to the oceanography discipline.

Credit Hours: 2

University Studies: Building

Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Geography and Geospatial Science, Geosciences, Geology, Oceanography

OCN 458 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Topics include the physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms

of the conservation laws for mass, momentum and energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

A grade of "C-" or better is required in each course counted toward the minor, and a grade point average of "C" (2.00) or better is required for all courses counted toward the minor.

Computer Science Minor

Requirements for a Minor in Computer Science:

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics

Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

CSC 133 - Discrete Mathematical Structures

Introduction to discrete mathematics applicable to computer science. Propositional and predicate logic, basic proof techniques, set algebra and Boolean algebra, recursion and induction, and introductory graphs and combinatorics.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 231 - Introduction to Data Structures

Study of basic data structures and their applications. Lists and trees; searching and sorting algorithms; hashing; analysis and design of efficient algorithms. Recommended for CSC majors only. A grade of 'C'

(2.00) or better is required for taking courses for which CSC 231 is a prerequisite.

Credit Hours: 4

Corequisite Courses: CSC 133
Prerequisite Courses: CSC 131 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CSC 331 - Object-Oriented Programming and Design

Object-oriented programming with a focus on software modeling of objects, classes, methods, inheritance, interfaces, polymorphism, and multi-threading. Completion of a team software project is required.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C.
Additional Restrictions/Requirements: A grade of 'C' (2.00) or better is required for taking courses for which

CSC 331 is a prerequisite.
Course Repeatability: Course may not be repeated.

- 6 additional CSC hours at the 200 level or above, including at least 3 at the 300-400 level

Total: 20 hours

Additional Information:

An overall quality point average of "C" (2.00) or better is required for all courses counted toward the minor.

Creative Writing Minor

The Department of Creative Writing offers a minor, which emphasizes development in the craft of writing. The 21-hour Minor in Creative Writing provides students with a foundation in creative writing classes, including an introductory course and a course in the historical development of the discipline. Minors in creative writing also take first-level workshops in the department's three writing genres: fiction, poetry, and creative nonfiction. The minor helps students develop basic proficiencies in creative writing, while allowing them to focus their interests through appropriate electives in related study. 21 hours: 15 core, 6 related study electives. The minor requires at least 6 credit

hours of course work at the 300–400 level.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Creative Writing

21 hours: 15 in core courses, 6 in Related Study electives.

Core Courses (15 Credit Hours)

CRW 201 is the appropriate first course to take in the creative writing minor. After completion of that course, students should take CRW 203, which may be taken before or at the same time as CRW 207, CRW 208, and CRW 209. (CRW 203 is a pre- or co-requisite.)

CRW 201 - Introduction to Creative Writing

Introduction to the principles and techniques of creative writing, aimed at developing the creative process. Includes lectures, reading, and writing exercises in poetry, fiction, and creative nonfiction.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

CRW 203 - The Evolution of Creative Writing: Fiction, Poetry, and Creative Nonfiction

Introduction to the historical development of poetic, narrative, and other forms of creative writing. Analytical and creative assignments develop student understanding of techniques such as metrics, point of view, and narrative structure. This course is a core requirement for the CRW major and CRW minor.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CRW 207 - Fiction Writing I: Invention and Story Craft

Instruction in writing fiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the fiction of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite:CRW 201, or prerequisite/corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 208 - Poetry Writing I: Image and Pattern

Instruction in writing poetry, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work the poetry of relevant professional poets.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

CRW 209 - Creative Nonfiction I: Discovery and Story Craft

Instruction in writing creative nonfiction, including critical evaluation by instructor and class of students' original works. Students also critique and relate to their own work, the work of relevant professional authors.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CRW 201; prerequisite or corequisite: CRW 203.
Course Repeatability: Course may not be repeated.

Elective Courses (6 Credit Hours)

6 hours chosen from:

CRW 302 - Creative Nonfiction: Reading for Craft

Study of the aesthetics and techniques of creative nonfiction and of the history of nonfictional forms such as the memoir and the literary essay, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 209

Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 303 - Poetry: Reading for Craft

Study of the aesthetics of poetry, poetic technique, and the history of poetic forms such as the ballad, the sonnet, the ode, and free verse, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 208
Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 304 - Forms of Dramatic Writing

Study of the aesthetics of dramatic writing, dramatic technique, and the history of dramatic forms such as tragedy, comedy, the screenplay, and the musical, as developed by classic and contemporary writers.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Restricted to CRW majors, pre-CRW majors, CRW minors.
Course Repeatability: Course may not be repeated.

CRW 305 - The Creative Process

Investigation through reading, lectures, discussions, writing, and exercises of the creative process in general and its particular application to literary art. Readings include studies of the creative process in a variety of other disciplines.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: CRW 207 or CRW 208 or CRW 209, or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 308 - Poetry Writing II: Voice and Vision

Techniques of writing poetry and development of the creative process, including writing exercises, editing,

and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 208
Course Repeatability: Course may not be repeated.

CRW 309 - Creative Nonfiction Writing II: Voice and Vision

Techniques of writing creative nonfiction and development of the creative process, including writing exercises, editing, and workshop discussion.

Credit Hours: 3

Prerequisite Courses: CRW 209
Course Repeatability: Course may not be repeated.

CRW 314 - Theory and Practice of Literary Translation

Introduction to the theory and practice of literary translation. Includes translation exercises, workshop discussion, reading on the history and theory of translation.

Credit Hours: 3

Prerequisite Courses: CRW 307 or CRW 308 or CRW 309
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

CRW 315 - Special Topics in Creative Writing

An intensive study of a particular subject in creative writing. The course varies from semester to semester and to include such topics as the short story; contemporary poets and movements or writing and the visual arts.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

CRW 316 - Playwriting I

Intensive and imaginative exploration of playwriting through various exercises designed to foster and challenge personal creativity, ensure aesthetic understanding and application, while advancing fundamentals of craft. Concludes with the creation of a ten-minute play, or short form play.

Credit Hours: 3

Crosslisting: THR 316
Course Repeatability: Course may not be repeated.

CRW 318 - Screenwriting I: Introduction to Screenwriting

Theory and practice of screenwriting an emphasis on the fundamentals of narrative structure. Students write original scripts, including a short screenplay for possible use in FST 495.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201; or prerequisite:CRW 207 or CRW 208 or CRW 209; or consent of instructor.

Additional Restrictions/Requirements: Restricted to PCRW or CRW majors.
Crosslisting: FST 318
Course Repeatability: Course may not be repeated.

CRW 320 - Special Workshop in Writing

Workshop in one or more genres of creative writing.

Credit Hours: 1 To 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

CRW 321 - Introduction to Book Publishing

Introduction to the culture and commerce of books. Examines the life cycle of a book; the people and processes involved in book publishing including editorial practice and the issues involved in editorial decision-making; and the business, economics, and ethics of the publishing industry. Engagement in a variety of publishing activities, such as a book proposal and mock book auction.

Credit Hours: 3

Prerequisite Courses: CRW 201
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CRW 322 - Editing for Publication

Intensive course in applied self-editing. Course content focuses on grammar, spelling, writing mechanics, usage, precision, and best practices to prepare manuscripts for critique and consideration for publication. This core is a requirement for both the CRW major and the Certificate in Publishing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: CRW 207 or CRW 208 or CRW 209.
Additional Restrictions/Requirements: Restricted to CRW and Pre-CRW majors and CRW minors.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

CRW 323 - Bookbuilding

Introduction to principles of effective graphic design and typography for book publishing, using desktop publishing applications in a computer lab setting and including hands-on production of several publications. Includes survey history and future trends in printing and publishing.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 324 - Special Topics in Publishing

Intensive examination of a special area of publishing, such as electronic publishing, editing poetry, or history of the book.

Credit Hours: 3

Prerequisite Courses: CRW 207 or CRW 208 or CRW 209
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

CRW 325 - Literary Magazine Practicum

Applied course in the publication of a literary journal. The practical business of running a literary magazine, including editorial, marketing, and sales decisions. Assignments include reading submissions, proofreading and fact-checking, assisting in the creation and production of promotional materials, commenting on design decisions, selecting artwork/illustrations, and meeting production deadlines.

Credit Hours: 3

Prerequisite Courses: CRW 201
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CRW 418 - Screenwriting II: Writing the Feature Film

The craft of screenwriting applied to the feature form.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Prerequisite course, restricted to CRW or FST majors, or consent of instructor.
Crosslisting: FST 418, FST 518
Course Repeatability: Course may not be repeated.

CRW 419 - Screenwriting III: Film Adaptation

Writing, revision, and completion of screen adaptation of literary work.

Credit Hours: 3

Prerequisite Courses: FST 318
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: FST 419, FST 519
Course Repeatability: Course may not be repeated.

CRW 425 - Advanced Topics in Publishing

Intensive examination of an advanced area of publishing, such as an area of specialization within book editing, book arts or design, the history of independent book or magazine publishng, or for a course taught by a guest instructor.

Credit Hours: 3

Prerequisite Courses: CRW 321 and CRW 323
Crosslisting: CRW 525
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

CRW 498 - CRW 498 - Internship in Writing - Bass

Academic training and practical writing experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.

Credit Hours: 1

Prerequisite Courses: CRW 209
Additional Restrictions/Requirements: Prerequisite course and nine additional hours of CRW writing courses, of which at least three are at the 300-400 level. Open to students of junior or senior standing in all majors who have been approved by the faculty internship advisor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

Total Credit Hours: 21

Additional Information

A grade of "C-" or better is required in each course counted toward the minor, and a grade point average of "C" (2.00) or better for all courses counted toward the minor.

Criminology Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Criminology

including CRM 105 and 18 additional hours of criminology courses. A maximum of 6 hours below the 300 level (including CRM 105) may be used to satisfy the above requirements.

Core Courses (18 Credit Hours)

including CRM 105 and 18 additional hours of criminology courses. A maximum of 6 hours below the 300 level (including CRM 105) may be used to satisfy the above requirement.

Elective Courses (3 Credit Hours)

Students may also fulfill criminology elective hours with any of the following courses:

SOC 256 - Criminology: Writing Intensive

May not be taken for credit if student has already completed SOC 255 or CRM 255. The scientific study of the nature, extent, correlates, and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property,

public order crimes, and both informal and formal reactions to crime. This course will require students to submit formal written work as well as informal writing assignments.

Credit Hours: 3

Prerequisite Courses: CRM 105 or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Building Competencies/Writing Intensive
Crosslisting: CRM 256
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 335 - The Sociology of Deviant Behavior

Analysis of certain behavior in terms of deviations from norms. Application of sociological and psychological concepts and theory to deviant behavior, and critical evaluation of non-sociological research and theories.

Credit Hours: 3

Prerequisite Courses: SOC 105

Crosslisting: CRM 335
Course Repeatability: Course may not be repeated.

SOC 376 - Juvenile Delinquency

The analysis and description of the problem of juvenile delinquency as it exists in a changing contemporary society.

Credit Hours: 3

Prerequisite Courses: SOC 105
Crosslisting: CRM 376
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: CRM 449
Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

A grade of "C" or better is required in CRM 105, and no more than one course with a grade of "D" may count toward the requirements for the major (or minor) in criminology. An overall grade point average of 2.0 or better is required among courses used to satisfy the major (and minor).

Cybersecurity Minor

Program Coordinator: Ulku Clark

The minor in Cybersecurity is open to all UNCW students, except B.S. Cybersecurity majors and B.S. Business Administration majors. No more than 6 hours can be counted towards the minor and a student's

major. To earn a minor in Cybersecurity, the completion of 18 hours is required, including 6 hours of core courses and 12 hours of electives, with a minimum 6 hours at the 300 level or higher. Students must earn a "C" or above average in all classes in the minor, and grade of at least "C-" in each course.

Requirements for the Cyber Security Minor:

Program Coordinator: Ulku Clark

The minor in Cybersecurity is open to all UNCW students, except Cybersecurity majors. No more than 6 hours can be counted towards the minor and a student's major. To earn a minor in Cybersecurity, the completion of 18 hours is required, including 6 hours of core courses and 12 hours of electives, with a minimum 6 hours at the 300 level or higher. Students must earn a "C" or above average in all classes in the minor, and grade of at least "C-" in each course.

Core Courses:

CYBR 201 - Fundamentals of Cybersecurity

Introduction to fundamental cybersecurity concepts. Exploration of the basic security design principles

needed to create systems worthy of trust. Introduction to IT system components and their roles in system operation. Consideration of the processes and regulations associated with operational analysis and evaluation, including approval authorities and processes.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CYBR 202 - Cyber Policy, Legal, Ethics, Compliance

Exploration of the intersection between cybersecurity and policy, law, ethics, privacy, compliance, and law enforcement. Examination of applicable laws and policies related to cyber defense. Topics include privacy and the internet, the effectiveness of cybersecurity applications in preventing crime and abuse, and the application of ethical concepts in cybersecurity.

Credit Hours: 3

Prerequisite or Corequisite Courses: CYBR 201.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Electives:

Select four electives. Talk to Cybersecurity Minor Coordinator Dr. Ulku Clark if you need help selecting electives. All CYBR courses could be used in this category.

CIT 225 - Linux Administration

Install, configure, securely administer Linux operating system platforms. Topics include Linux operating systems concepts, system installation and configuration, introduction to networking (protocols, IP addressing, ports, subnetting), security, firewalls, packet filtering, networked file systems, lightweight directory access protocol, virtualization, Linux-Windows integration, and Linux shell programming.

Credit Hours: 3

Prerequisite Courses: CSC 121 or CSC 131 with a grade of "C-" or better in either course, or instructor approval.
Course Repeatability: Course may not be repeated.

CIT 301 - Cloud Computing & Virtualization

Survey, configuration, and deployment of cloud computing technologies and services, including but not limited to: virtualization environments, SaaS, PaaS, DaaS, IaaS, mass storage, virtualization compute resources, SQL and non-SQL databases, cloud development tools, deployment models, load balancing, automatic provisioning, Internet of Things, VPNs, firewalls, security, two-factor authentication, legal/privacy issues.

Credit Hours: 3

Corequisite Courses: Co-requisite: CSC 344 or MIS 320.

Prerequisite Courses: Prerequisite: CIT 225.
Course Repeatability: Course may not be repeated.

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

SOC 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: CRM 255

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 390 - Media, Crime, and Justice

Examination of the relationship between mass media, crime, and criminal justice with special emphasis on how media images affect crime and justice attitudes, ideology, and policy. Includes examination of entertainment and news media in both electronic and print forms.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships

from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 421 - Spatial Programming

Introduction to GIS programming. The course will focus on how to customize applications and streamline spatial analysis, and is designed to improve students' skills in conducting sophisticated spatial analysis and adapting to new technologies and programming languages. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based environment. Lectures, demonstrations, and lab exercises. Two lecture and two laboratory hours each

week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MIS 320 - Network Fundamentals

Introduction to the OSI model, network topologies, IP addressing and subnet masks, simple routing techniques, and basic switching terminology. Topics include the basic functions of the seven layers of the OSI model, different classes of IP addressing and subnetting, router login scripts.

Credit Hours: 3

Prerequisite or Corequisite Courses: CIT 110 or CYBR 201 or MIS 213

Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Cybersecurity major or declared BS Information Technology major or declared Cybersecurity minor
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Cybersecurity or BS Information Technology**Minor Restriction** Cybersecurity Minor

MIS 352 - Windows Systems Administration

Provides students with skill to perform basic operations involved in system administration of Microsoft Windows based systems. Provides students with the ability to apply methods such as managing applications, services, and network ports to improve the robustness of operating systems.

Credit Hours: 3

Prerequisite Courses: MIS 320 or MIS 323 or CSC 344 with a minimum grade of C-
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS

Information Technology major or declared BS Cybersecurity major or declared BS Intelligent Systems Engineering major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Intelligent Systems Engineering**Minor Restriction** Cybersecurity Minor

MIS 363 - Advanced Telecommunications

The architecture, components, operations, and security of routers and switches in small networks, introduction to wireless local area networks (WLAN) and to scale for large, complex networks, including wide area network (WAN) technologies are described. The course emphasizes network security concepts and introduces network virtualization and automation. Students learn how to configure, troubleshoot, and secure enterprise network devices and understand how application programming interfaces (API) and configuration management tools enable network automation.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity**Minor Restriction** Cybersecurity Minor

MIS 367 - Emerging Network Technologies

This course investigates cloud computing models, techniques, and architectures. Cloud computing has evolved as a very important computing model, which enables information, software, and other shared resources to be provisioned over the network as services in an on-demand manner. Students will be exposed to the current practices in cloud computing. Topics may include distributed computing models and technologies, Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), Software-as-a-Service (SaaS), virtualization, security and privacy issues,

performance and system issues, capacity planning, disaster recovery, Cloud OS, federated clouds, challenges in implementing clouds, data centers, hypervisor CPU and memory equipment, cloud-hosted applications, and other advanced and research topics in cloud computing. Course work will include homework assisgnments, presentations, and a term project that will provide exposure to scientific research in cloud computing.

Credit Hours: 3

Prerequisite Courses: MIS 320
Additional Restrictions/Requirements: Admission to Cameron School of Business or declared BS Information Technology major or declared Cybersecurity minor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology**Minor Restriction** Cybersecurity Minor

PSY 275 - Forensic Psychology

Investigation of psychological factors relevant to the legal system including: eyewitness identification and false memories, confessions, jury decision making, the insanity defense and mental health law, expert psychological testimony in court, criminal profiling, risk management, treatment of the mentally ill in corrections.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 336 - Industrial-Organizational Psychology

Psychological techniques in job analysis, personnel selection and placement, training, performance appraisal, employee motivation, employee health and satisfaction, organizational productivity and communication, group decision making, and leadership.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264

Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

> All CYBR courses other than the ones used to complete the minor core requirements. At least 6 credits must be at 300 level or higher. The following courses are approved by the program coordinator on a case by case basis (Cybersecurity focus):

CYBR 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 to 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50, GPA in CYBR courses of at least 2.80, and consent of instructor, program coordinator, and dean.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

CYBR 495 - Seminar in Cybersecurity

Individual reports and group discussions of field, laboratory and/or library research on selected topics in cybersecurity. May only be taken once for credit in the major.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction For cybersecurity majors only.

CYBR 498 - Internship in Cybersecurity

Academic training and practical experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity. Written experience report and oral presentation

required.

Credit Hours: 3

Additional Restrictions/Requirements: Open to students of junior or senior standing who have been approved by the faculty supervisor, department chair, and dean.
Admission to the Cameron School of Business or declared BS Cybersecurity or declared BS Information Technology or declared BS Computer Science or declared BS Intelligent Systems Engineering or declared Cybersecurity minor
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3
Major Restriction BS Cybersecurity or BS Information Technology or BS Computer Science or BS Intelligent Systems Engineering or BS Business Administration**Minor Restriction** Cybersecurity

CYBR 499 - Honors in Cybersecurity

Individual study for honors students.

Credit Hours: 3

Additional Restrictions/Requirements: Instructor approval for honors students only.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2

Total: 18 Hours

Additional Information:

Students must earn a 'C' or above in all classes in the minor and a grade of at least 'C-' in each course.

Dance Minor

The dance minor at UNCW was created to provide a strong technical dance base along with an opportunity to explore dance in the community, giving students an appreciation of dance as an art form with a strong cultural and social perspective. The Wilmington dance community is vibrant and strong, allowing students to experience dance in many forms in both the studio and

in performance, including ballet, modern, musical theatre, opera, hip hop, and global dance forms including African, Latin, Indian, or other international dance styles.

A total of 19 credit hours are required for the completion of the minor.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Dance Minor

Core Courses (4 Credit Hours)

THR 112 - Dance Appreciation

Appreciation of dance as an art form. The study of dance as a reflection and expression of various cultures from pre-history to present. Includes exposure to contemporary concert dance through films and televised or live performance. Introductory experience in selected dance techniques.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 349 - Dance in the Community

Opportunity for students to connect with the community, through performance, teaching, or creating choreographic works in a variety of settings. Developing skills to network with other dance organizations or studios.

Credit Hours: 1

Additional Restrictions/Requirements: Approval of Dance Coordinator required.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Additional Fee - Liability Insurance

Minor Restriction Dance Minor Only

Dance Technique Courses (9 Credit Hours)

Choose 3 from the following classes:

THR 134 - Ballet I

Basic and comprehensive Ballet Technique at a beginning level. Accumulative credit limited to six semester hours.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 135 - Modern Dance I

A beginning level modern dance class focusing on dance as an art form. Provides students with the opportunity to explore modern dance technique through floor work, center floor work, combinations moving through space, and strength and flexibility training.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 136 - Movement Exploration

Study through creative dance techniques of the body's potential as a tool for creative expression. Exploration of the relationship of dance to other art forms. Solo and group work using basic art concepts and the individual's own experience as materials for movement improvisation and composition. No dance training necessary.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Crosslisting: PED 136
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 234 - Ballet II

Basic Ballet Technique at an intermediate level. Accumulative credit limited to six semester hours.

Credit Hours: 3

Prerequisite Courses: THR 134 or PED 134

Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 235 - Modern Dance II

An intermediate level modern dance class. Provides students with the opportunity to explore the modern dance technique through floor work, center floor work, combinations moving through space, and strength and flexibility training. Combinations will be more complex, requiring more fully articulated techniques, as introduced in THR 135.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 236 - Tap Dance

The foundations of tap, including traditional vocabulary and improvisation, with an emphasis on musical theatre forms.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 237 - THR 237 - Musical Theatre Dance - Sorensen

Development of body awareness in dance practice and performance utilizing traditional and contemporary musical theatre styles.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Elective Courses (6 Credit Hours)

Choose 2 of the following classes:

THR 341 - Dance for the Camera

Introduction to creating choreography for the screen, using technology to create creative dance works through both lecture and lab-based instruction.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 342 - Dance Improvisation and Composition

Foundations of guided improvisation and the necessary tools for creating dance choreography.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 343 - Dance and Popular Culture

Exploration into the historical and social perspective of dance in popular culture, including screen, social media, club dancing, etc., and its effect on contemporary society.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 344 - Dance and Social Issues

Exploration of dance as it relates to cultural and social issues from an artistic and historical perspective.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 345 - Hip Hop

Fundamentals of the varying styles of Hip Hop with a focus on street dance styles, freestyle, and dancing in the commercial industry.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 346 - Global Dance Forms

Exploration of traditional dance forms from around the world, including African, Latin, Indian, or other international dance styles. Each semester focuses on the choreography and traditions of one global dance

form from both technical and historical perspectives in a studio class format.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

THR 347 - Partnering for Dance

Contemporary partnering practice, utilizing weight sharing and resistance, balance, lifting, etc.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 348 - Music for Dance

An exploration of musical styles, global music forms, and rhythm fundamentals for dance artists, including choreographer and teacher.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total Credit Hours: 19

Additional Information

Data Science Minor

The data science minor is an interdisciplinary program that emphasizes computational-based applications of traditional data analysis methods and current trends in data mining and machine learning. The program is a collaborative effort between departments, the larger academic community and the business community that emphasizes computational-based applications.

Requirements for a Minor in Data Science

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence;

distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

PSY 225 - Introductory Statistics for the Behavioral Sciences

Introduction to the statistical techniques most often used by behavioral scientists for either descriptive purposes or hypothesis testing. Parametric techniques are emphasized, but nonparametric tests are included.

Credit Hours: 6

Prerequisite Courses: PSY 105 and (MAT 101 or higher [excluding MAT 105, MAT 141, and MAT 142], STT 210, or STT 215) and (BIO 105 or BIO 140+BIOL

140, BIO 201, BIO 202, or BIO 240+BIOL 240)
Additional Restrictions/Requirements: Class is restricted to students with Junior standing (or above).

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction Psychology

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.
or other approved statistics course

MAT 151 - Basic Calculus with Applications I

Intended for majors that emphasize techniques and applications. Study of linear and nonlinear functions, differentiation with applications, Riemann sums, integration, and the Fundamental Theorem of Calculus.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

STT 305 - Statistical Programming

Introduction to statistical programming in SAS with emphasis on data step programming; applications to data management and report generation, simulation, graphical and numerical analysis of univariate and multivariate data. Comparison of current statistical software.

Credit Hours: 3

Prerequisite Courses: STT 215
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

or

DSC 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN 280
Course Repeatability: Course may not be repeated.

or

STT 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN 280
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated. You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

DSC 301 - Introduction to Machine Learning

Introduction to machine learning, including necessary linear algebra topics, such as vectors, matrices, eigenvalues, eigenvectors, symmetric matrices and singular value decompositions. Considers gradient descent methods to optimize predictive and

classification models, dimension reduction, clustering, cross validation, grid search, data visualization and dashboards.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

CSC 340 - Scientific Computing

Introduction to the design, application, and performance of numerical algorithms fundamental to scientific computation. Topics may include error and error propagation; matrix applications such as finding solutions to linear systems, finding eigenvalues and eigenvectors, or finding linear principal components; optimization; basic Markov modeling; Fourier processing; and curve fitting. Emphasizes relative merits and implementations of algorithms.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum

grade of C and MAT 162
Course Repeatability: Course may not be repeated.

DSC 302 - Foundations of Data Science

Foundational topics in the field of Data Science Topics to include data cleaning, Structured Query Language (SQL), data manipulation, visualizations, elementary classification, and machine learning.

Credit Hours: 3

Prerequisite Courses: MAT 151 or MAT 161.
Course Repeatability: Course may not be repeated.

Total 19-21 hours

Additional Information

An overall quality point average of "C" (2.00) or better is required for all courses counted toward the minor.

Digital Arts Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirement for a Minor in Digital Arts

A minor in digital arts requires completion of 24 hours, including 18 hours of core courses and 6 hours of electives. At least 3 elective hours must be at the 300 level or above, and at least 3 elective hours must be chosen from outside a student's major department.

Core Courses (18 Credit Hours)

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject, style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ART 101 - Two-Dimensional Design

Study of the principles of two-dimensional design and introduction to color theory.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 260 - Introduction To Graphic Design

Basic principles of graphic design and communication. Projects focus on the graphic expression of form through two-dimensional composition to communicate information, concepts, and emotions, and combine development of computer software skills with off-line creative processes and production methods.

Credit Hours: 3

Prerequisite Courses: ART 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

MIS 310 - Web Development Languages

Study of the design and creation of web pages that support traditional screens, tablets, and smart devices. Topics include page structure, human-computer interface design, style sheets, reusability, and design concepts. Best industry practices in web development, such as client-side scripting languages and Search Engine Optimization (SEO) techniques, will also be considered.

Credit Hours: 3

Prerequisite or Corequisite Courses: or (CSC 112 or CSC 131 or MIS 216)
Prerequisite Courses: CIT 110 or MIS 213
Additional Restrictions/Requirements:

One prerequisite or corequisite course is required: Choose CIT 110 or MIS 213 as a prerequisite course or one of CSC 112, CSC 131, or MIS 216 as a pre- or corequisite course.

Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Computer Science or declared BA Digital Arts or declared Cybersecurity minor or declared Digital

Arts minor.
Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Computer Science or BA Digital Arts**Minor Restriction** Cybersecurity Minor or Digital Arts Minor

CSC 112 - Introduction to Computer Programming

Introduction to programming in a high-level language. Algorithms, computer systems, data representation, survey of computer applications, elementary programming techniques, debugging and verification of programs. The language to be used will be specified in the schedule of classes. Recommended primarily for non computer science majors.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and

Statistics
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.
You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

ART 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3D computer graphics using high-level software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and shading, alternative rendering techniques, and providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses:
Prerequisite: CSC 112 or CSC 131. Prerequisite or corequisite: ART 260 or ART 282. **Additional Restrictions/Requirements:** Prerequisite courses or consent of instructor. **Crosslisting:** CSC 220, FST 220 **Course Repeatability:** Course may not be repeated.

CSC 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3-D computer graphics using high-level software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and

shading, alternative rendering techniques, and providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CSC 112 or CSC 131. Prerequisite or corequisite: ART 260 or ART 282.
Crosslisting: ART 220, FST 220
Course Repeatability: Course may not be repeated.

FST 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3-D computer graphics using high-level software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and shading, alternative rendering techniques, and providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CSC 112 or CSC

131. Prerequisite or corequisite: ART 260 or ART 282.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 220, CSC 220
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

Elective Courses (6 Credit Hours)

ARH 201 - Ancient Art and Archaeology

Introduction to the art and cultures of ancient Egypt, the Near East, and the Mediterranean. Emphasis on architecture, painting, sculpture, and objects of daily life to inform the myths and histories of ancient civilizations connected to the broader Mediterranean basin.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 204 - Art of the Modern World

Examination of major monuments, artists, and artistic developments from the 19th to the late 20th century, primarily in Europe and the Americas. Study of the relationship between works of art and the historical, political, religious, and philosophical context of the societies that produced and made use of them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 386 - History of Photography

Introduction to the history of photography from its invention in 1839 until the present day. Emphasis on the development of techniques, imagery, and aesthetics of photography as art and documentation.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204

Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ART 273 - Digital Illustration

Introduction to the practice and theory of digital art & illustration. Exploration of the core concepts and techniques in digital image making, photo manipulation, and content production using industry-standard software applications.

Credit Hours: 3

Prerequisite Courses: ART 101 and ART 111.
Course Repeatability: Course may not be repeated.

ART 280 - Introduction to Darkroom Photography

Basic darkroom processes for developing and printing black and white photographic film. Introduction to aesthetics of fine art photography, including visual problem solving, critical thinking, and development of a personal imagery.

Credit Hours: 3

Prerequisite Courses: ART 101 or ART 105.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated

ART 282 - Introduction to Digital Photography

Introduction to digital photography concepts and methods. Considers the design, processing, critiquing, and display of images created with digital cameras and printed with digital media.

Credit Hours: 3

Prerequisite Courses: ART 101 or ART 105 or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 311 - Intermediate Life Drawing

Drawing from the model: structure, composition, and development of personal expression.

Credit Hours: 3

Prerequisite Courses: ART 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color and lighting.

Credit Hours: 3

Prerequisite Courses: ART 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CSC 320, FST 320
Course Repeatability: Course may not be repeated.

ART 341 - Intermediate Painting

Further investigation of materials and visual concepts, with attention to expanding the fundamentals of painting.

Credit Hours: 3

Prerequisite Courses: ART 242
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 343 - Figure Painting

Oil and acrylic painting from the model. Investigates representational and abstract interpretations of the figure. Emphasizes spatial strategies, color, and paint application techniques.

Credit Hours: 3

Prerequisite Courses: ART 211 or ART 242
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 360 - Intermediate Graphic Design

Further investigation into graphic design creative processes and study of graphic communication through lectures, projects, and readings. Continuing development of software proficiency, critical and analytical skills. Emphasis on both practical and speculative approaches to design problems and their synthesis into formal solutions.

Credit Hours: 3

Prerequisite Courses: ART 260
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 365 - Typography

Overview of the conceptual, formal, and technical issues of typography. The history of typography, the anatomy of letter forms, classifications of type, visual syntax, legibility, and technology. Exercises and projects emphasize production of visual communication for print using typography as the dominant element.

Credit Hours: 3

Prerequisite Courses: ART 260
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 370 - 3D Printing and Laser Cutting

Exploration of 3D printing and laser cutting for art and design. Study of digital art culture including contemporary artistic, political, and ethical issues in the field.

Credit Hours: 3

Prerequisite Courses: ART 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 371 - Video Art & Projection Mapping

An exploration of time-based media, video art and projected light, with instruction on the history and use of analog and digital methods, including a variety of video projection mapping software to create immersive environments or to add moving textures and images to

sculpture, installation, performance, and architecture.

Credit Hours: 3

Prerequisite Courses: ART 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 372 - Digital Printmaking

This course will focus on the creation of digitally processed and handprinted images. Projects will explore the development of visual and narrative ideas using digital tools, and hand-printing the digital images using traditional printmaking methods.

Credit Hours: 3

Prerequisite Courses: ART 101.
Course Repeatability: Course may not be repeated.

ART 380 - Intermediate Darkroom Photography

Further exploration of darkroom processes for developing and printing black and white photographic films. Larger images, addictional formats, independent

creative projects, and further development of personal imagery.

Credit Hours: 3

Prerequisite Courses: ART 280
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 382 - Intermediate Digital Photography

Further exploration of digital fine art photography concepts and methods. Further development of personal imagery through independent creative projects, discussions, and critiques of images created with digital cameras and printed with digital media.

Credit Hours: 3

Prerequisite Courses: ART 282
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ART 411 - Advanced Life Drawing

Drawing from the model: drawing as a finished product, exploration of drawing techniques.

Credit Hours: 3

Prerequisite Courses: ART 311 or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ART 475 - Professional Practices

Preparation for graduate school, business practices, portfolio presentation, grant applications, publicity, and professional studio practice.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

ART 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further

information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

ART 495 - Seminar In Art

Consideration of special subjects not covered in detail in regular course offerings. More than one topic may be taken for credit.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

CIT 410 - Web Application Development

Structured approach to building and maintaining dynamic and interactive Web sites. Emphasis on application, design and development. Students gain a thorough understanding of server-side scripting, form validation, and Web-site security while advancing their understanding of database design principles and SQL. Students create a database-driven Website.

Credit Hours: 3

Prerequisite Courses: MIS 310 or CSC 365.
Course Repeatability: Course may not be repeated.

COM 160 - Engaging Contemporary Media

Exploration of the structures, systems, effects, conventions, and genres of contemporary media. Emphasis on improving media literacy to foster informed, critical, and discerning interaction with media.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behavior
Course Repeatability: Course may not be repeated.

COM 211 - Storytelling and Culture

Exploration of stories as the production and communication of culture. Emphasis on storytelling as performance with attention to personal stories, stories of others, shared cultural stories including fairy tales, myths, and folktales.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 280 - Introduction to Digital Media Production

Introduction to the process, technologies, and aesthetics of digital video and audio production. Topics include field and studio TV production, editing, lighting, sound acquisition, project planning and writing, emerging technologies, and career preparation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: COM 105, or consent of instructor.
Additional Restrictions/Requirements: Sophomore standing or higher.
Course Repeatability: Course may not be repeated.

COM 380 - Field Video Production I

Hands-on field video production including project planning, script writing, filming, recording, and editing. Emphasis on mastery of digital camera operation, audio acquisition, lighting, and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Prerequisite Courses: (COM 280 or FST 201) and COM 105 with a minimum grade of B
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. Restricted to PCOM and COM majors.

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

COM 480 - Field Video Production II

Application of advanced field video and editing techniques in the completion of substantial video projects in two or more of these areas: artistic/experimental, documentary, informational, promotional, news, or sports. Emphasis on development of creativity, and video storytelling, planning and technical skills. All projects are intended for festival submission, regional telecast, or produced for campus and regional clients.

Credit Hours: 3

Prerequisite Courses: COM 380 and permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM

COM 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing upper-division courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Restricted to junior and senior COM majors, with overall GPA of at least 2.50 and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2-8
Major Restriction COM

CRW 210 - Writing for Digital Media

Instruction in writing narrative as a foundation for digital-arts projects. Focus will be on the writing process, from story ideas to revised drafts, with the aim of applying the written works to digital-arts projects.

Credit Hours: 3

Prerequisite Courses: CRW 201 or CRW 203
Course Repeatability: Course may not be repeated.

CSC 315 - Mobile Application Development

Concepts and technologies for developing applications on mobile devices, including mobile-platform programming, memory-management, object-oriented paradigms, model-view-controller design, mobile-centric frameworks for networking, multimedia, location-based services, and interface design. Application design, programming, and implementation for a current mobile platform.

Prerequisite Courses: CSC 331 with a minimum grade of "C".
Course Repeatability: Course may not be repeated.

CSC 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced

motion studies. Projects focus on developing higher-level skills in model building, animation and color, and lighting.

Credit Hours: 3

Prerequisite Courses: CSC 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 320, FST 320
Course Repeatability: Course may not be repeated.

CSC 368 - Visual Design for Multi-Media

Combined studio/lecture course that examines technologies and basic principles of the Internet specific to visual interface design and interactivity. Topics covered include technical, functional, and aesthetic issues related to basic graphic design and page design principles; site planning and implementation; graphic production using software and designing for user experience.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of "C" and ART/CSC/FST 220
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 370 - Computer Graphics

Introduction to geometric modeling for graphic programming. Topics include transformations for modeling, viewing, and projection; geometric modeling of curves and surfaces; hidden-surface removal; clipping; graphical buffers; material simulation; texture mapping; and lighting.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and MAT 162
Course Repeatability: Course may not be repeated.

CSC 421 - Game Development

Design and implementation of computer games, including design, modeling, and animation of meshes for game characters and environments using 3D

software, scene and object representation, graphics pipeline, collision detection, picking, graphics optimization, basic physics and Artificial Intelligence for games, and code modifications and additions for a game engine.

Credit Hours: 3

Prerequisite or Corequisite Courses: CSC 320 or CSC 370.
Prerequisite Courses: CSC 220 and (CSC 331 with a minimum grade of C).
Course Repeatability: Course may not be repeated.

CSC 430 - Digital Visual Effects

Exploration of digital image and video representation and manipulation for motion-picture visual effects. Topics include image storage and compression, film and video formats, compositing, filtering, scripting for graphics and visual effects, photorealistic lighting and rendering, virtual cinematography, camera tracking, and particle effects.

Credit Hours: 3

Prerequisite Courses: (CSC 370 or ART 320 or FST 320), or CSC 370.
Crosslisting: FST 430
Course Repeatability: Course may not be repeated.

CSC 475 - Topics in Computer Science

Topics of current interest in computer science not covered in existing courses. May be repeated under a different subtitle.

Credit Hours: 1 to 4

Additional Restrictions/Requirements: Senior standing and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 8 **Repeat Limit:** 2

CSC 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. Written experience report and oral presentation required. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50 and a GPA in CSC courses of at least 2.80, and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 5

FST 301 - Film Tools and Techniques

Instruction in the techniques and technologies of digital filmmaking, including camera, lenses, lighting, grip, sound, and set protocol.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors, or consent of instructor.
Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 302 - Intermediate Film Production

A comprehensive practicum in motion picture preproduction, production, and post-production, concentrating on documentary, narrative or experimental cinema. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 318 - Screenwriting I: Introduction to Screenwriting

Theory and practice of screenwriting with an emphasis on the fundamentals of narrative structure. Students

write original scripts, including a short screenplay for possible use in FST 495.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201; or CRW 207 or CRW 208 or CRW 209.
Additional Restrictions/Requirements: Restricted to FST majors, PCRW or CRW majors, or consent of instructor.
Crosslisting: CRW 318
Course Repeatability: Course may not be repeated.

FST 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color, and lighting.

Credit Hours: 3

Prerequisite Courses: FST 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 320, CSC 320
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

FST 330 - Producing

Focuses on duties of a producer through a project "life cycle": development, financing, pre-production, production, post-production, marketing, and distribution. Emphasizes production management, budgeting, and scheduling. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 331 - Introduction to Editing

An introduction to the techniques and aesthetics of non-linear motion picture editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201, or permission of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 368 - Studies in Film Styles and Genres

Study of a film style or genre, such as film noir, the western, or the musical. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 393 - Sound Recording

Instruction in the techniques, aesthetics, and equipment for recording sound for motion pictures.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 394 - Sound Design

Instruction in creating motion picture soundtracks and in techniques and aesthetics of sound editing and mixing.

Credit Hours: 3

Prerequisite Courses: FST 201

Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Course Repeatability: Course may not be repeated.

FST 398 - Practicum in Film Production

Selected topics in film production. May be repeated under different subtitles.

Credit Hours: 1 To 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST major or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 430 - Digital Visual Effects

Exploration of digital image and video representation and manipulation for motion-picture visual effects. Includes image storage and compression, film and video formats, compositing, filtering, scripting for graphics and visual effects, photorealistic lighting and

rendering, virtual cinematography, camera tracking, and particle effects.

Credit Hours: 3

Prerequisite Courses: CSC 320, or ART 320, or FST 320.
Crosslisting: CSC 430, FST 522.
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

FST 432 - Expanded Cinema

Modes of media production in expanded cinema. Topics may include video installation, video mapping, building interactive media environments, creating experimental animations, and live cinema. May be repeated under different subheadings.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Junior or Senior standing, permission of instructor

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 433 - Modes of Animation Production

Applied instruction in selected animation forms and techniques. Topics might include motion graphics, gif animation and character animation. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201.
Additional Restrictions/Requirements: Junior or Senior standing, permission of instructor
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Study section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing; nine hours of film studies courses, at least six of which are at the 300-400 level; overall GPA of at least 2.50; and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

FST 495 - Senior Seminar in Film Production

Collaborative production of a short experimental, documentary, narrative, or animated motion picture. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 301 or FST 302
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 497 - Applied Post Production

Hands-on application of editing theory and post-production techniques, practices, and technology. Students create a finished film using raw footage from previousFST 495 projects; exceptions upon approval.

Credit Hours: 3

Prerequisite Courses: FST 331
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

MUS 110 - Introduction to Music Technology

Overview of music technology for the music major. Introduction to Digital Audio Workstation environments, basic MIDI sequencing, and traditional notation software.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

MUS 210 - Digital Music Production

Applications of music technology software for digital music production in Digital Audio Workstation environments, including non-traditional notation systems, intermediate-level work with MIDI sequencing, DAW signal flow, stereo mixing techniques, software-based virtual instruments, and intermediate sampling techniques.

Credit Hours: 2

Prerequisite Courses: MUS 110.
Course Repeatability: Course may not be repeated.

MUS 310 - Film Scoring and Video Game Music

Intermediate study of digital sound synthesis, sampling, and MIDI sequencing, with an emphasis on scoring for film and video games.

Credit Hours: 3

Prerequisite Courses: MUS 214.
Course Repeatability: Course may not be repeated.

MUS 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

THR 211 - Introduction to CAD

A study of theatre drafting conventions and software-related techniques. Topics include line-use, dimensions, text, notation, and symbols for use in creating floor plans, elevations, shop drawings, pictorials, and lighting plots.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 305 - Scene Design I

An intermediate study of set design development and presentation building upon coursework begun in THR 125, and focusing specifically upon the art, history, methodology, and practice of theatrical design. 20 lab hours of applied experiential learning required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 306 - Light Design I

Basic techniques of lighting design. Includes fundamentals of lighting production techniques and equipment, and the use of color. Requires lab participation in University Theatre productions.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 411 - Three-Dimensional Computer Modeling

A study of software to develop models of scene designs for the stage. Topics include shape and texture generation; light handling; rendering; scanning; and output.

Credit Hours: 3

Prerequisite Courses: THR 211
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Total Credit Hours: 24

Additional Information

Students must earn at least a "C" (2.00) average in courses counted for a digital arts minor.

Digital Humanities Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in Digital Humanities. The minor provides students with an understanding of the study of digital technologies with a focus on their impact on diverse human experiences, cultures, and cultural expression. Students complement core requirements with classes on the development, application, and implications of digital technologies from the perspective of different sciences (CSC, GGY, CIT), humanities (PAR, ENG, HST, WLC, COM) and

arts disciplines (ART). Students should contact the coordinator in the English department, Jennifer Lozano (lozanoj@uncw.edu), for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Digital Humanities

Core Courses (6 Credit Hours)

Students must take these core courses (6 credits) in order to complete the Digital Humanities minor. Introduction to Digital Humanities (ENG 104) must be taken before enrolling in Applications in Digital Humanities (ENG 367).

ENG 104 - Introduction to Digital Humanities

Introduction to the application of digital tools for humanities research. Students explore interdisciplinary definitions of Digital Humanities (DH) and DH research methods; investigate and critique DH projects; and plan and execute their own collaborative DH projects.

Course Repeatability: Course may not be repeated.

ENG 367 - Digital Humanities Applications

Project-based exploration of a real world problem (social, cultural, interpretive/aesthetic). Students conduct primary and/or secondary research using digital and non-digital methods and present findings using a relevant digital medium that aligns with the project's values, goals, and audience.

Prerequisite Courses: ENG 104
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

Students must take 12 credit hours from the Electives list of classes. Elective credits must come from at least 2 different prefixes and 6 credits must be taken at the 300-level or higher.

ART 220 - 3-D Computer Graphics Tools and Literacy

Project-based approach to learning fundamental principles of 3D computer graphics using high-level

software tools. Modeling of objects, geometrical transformations, surface algorithms, lighting and shading, alternative rendering techniques, and providing background skills necessary to create animated movies.

Credit Hours: 3

Prerequisite Courses:
Prerequisite: CSC 112 or CSC 131. Prerequisite or corequisite: ART 260 or ART 282.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: CSC 220, FST 220
Course Repeatability: Course may not be repeated.

CIT 110 - Fluency in Information Technology

Information representation, the Internet and HTML, algorithmic thinking and programming, language translation, modeling and abstraction, algorithmic complexity and non-computability, machine architecture and parallel computation, networks and communication, database principles, multimedia, social impacts of computing.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 280 - Introduction to Digital Media Production

Introduction to the process, technologies, and aesthetics of digital video and audio production. Topics include field and studio TV production, editing, lighting, sound acquisition, project planning and writing, emerging technologies, and career preparation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: COM 105, or consent of instructor.
Additional Restrictions/Requirements: Sophomore standing or higher.
Course Repeatability: Course may not be repeated.

COM 283 - Digital Audio I

Audio production experience including project analysis, planning, script writing, recording, and editing. Emphasis on audio acquisition and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.

COM 383 - Audio Storytelling & Podcasting

Creation of audio-based projects in a variety of genres including IMC, news, sports, entertainment, and social media content. Topics include: voice development, project planning, scriptwriting, recording, editing, and promotion. Emphasis on proper audio acquisition, digital editing skills, and quality programming. Students complete a variety of productions working individually and in small groups.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 200 or permission of instructor.
Additional Restrictions/Requirements: PCOM or COM major or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM Majors

COM 387 - Visual Communication: Digital and Print Design and Production

Learn the fundamental rhetorical principles and theories of graphic and layout design for effective communication. Students create artifacts using current technologies and available materials to meet diverse creative and rhetorical goals. Projects include technical documents, posters, magazines, and newsletters and other digital and print deliverables.

Credit Hours: 3

Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction COM Studies Majors

CSC 112 - Introduction to Computer Programming

Introduction to programming in a high-level language. Algorithms, computer systems, data representation, survey of computer applications, elementary programming techniques, debugging and verification of programs. The language to be used will be specified in the schedule of classes. Recommended primarily for non computer science majors.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 302 - Introduction to Artificial Intelligence

Introduction to foundational topics on Artificial Intelligence and mathematical foundation suitable for the studies of AI. Topics include modern historical perspectives of AI, intelligent agents, search algorithms, machine learning, knowledge

representation, ethical and societal implications of AI.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of "C" and MAT 161, or instructor approval.
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation,

documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric. Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 384 - Studies in Popular Culture

Critical study of popular culture as an aesthetic and economic phenomenon that plays an integral role in everyday life. Includes a variety of primary texts in multiple media forms (which may include fiction, film, music, and television) as well as readings in cultural and critical theory.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 112 - History of Science II: Modern Science

Growth and development of modern science. Topics include Darwin's theory of evolution, Einstein's special and general relativity, quantum mechanics, wartime science, the discovery of DNA, and the impact of science and technology on modern society.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 329 - History of Science and Technology in the Modern World

Examination of themes in the history of science and technology since the Scientific Revolution, such as controversies in science and technology, history of technology/biotechnology, history of American Science, and science and technology since 1900. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST

course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

HST 334 - Public History

A study of the ways in which historians practice outside of the academy. Topics include historic preservation, museum interpretation, cultural resource management, media, and archives. Class may include guest speakers and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

INT 315 - Topics in Globalization

Intensive study of a selected topic or theme in globalization. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 390 - Religion and Technology

Explores how religions in the past and present are necessarily and inherently technological. Evaluates modern assumptions about the secular (i.e., non-religious) nature, digital nature, and passive work of technology. Topics vary by instructor.

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Critical Reasoning, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

SPN 215 - Intermediate Spanish for Bilingual Speakers

An introduction to the grammatical structure of the language designed for students whose home language is Spanish (in lieu of SPN 202). Application of the language in composition, conversation, and reading (fiction and non-fiction) with the goals of applying effective reading techniques and strategies, increasing vocabulary, and improving general and oral communication skills. Analysis of linguistic variation as it pertains to Spanish in its U.S. context and abroad.

Credit Hours: 3

Additional Restrictions/Requirements: Placement testing. This course cannot be taken if a student is receiving credit for SPN 202.
University Studies: Foundations/Foreign Language,

Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

SPN 490 - Service Learning and Research

Study of the Spanish-speaking population in a specific region. Each student completes 30 volunteer hours with a local agency that works with the Spanish-speaking community. A research project related to the Spanish-speaking population of a specific region or community is also required.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a 'C' or better.
Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Economics Minor

Requirements for a Minor in Economics:

The minor in economics requires completion of 18 hours, including 9 hours of core courses and 9 hours of electives, with a minimum overall grade point average of 2.00 in courses counted for the minor. The minor is open to all students outside of the Cameron School of Business. Business majors, including students pursuing a Bachelor's of Arts degree in Economics, are not eligible for the minor.

Core Courses:

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 324 - Financial Markets and Institutions

An introduction to the financial and economic environment within which a firm must operate. Analysis of the sources and the cost and availability of funds in a domestic and international setting; analysis of

international monetary flows; financial decision making in an integrated world economy.

Credit Hours: 3

Prerequisite Courses: ECN 222
Crosslisting: FIN 324
Course Repeatability: Course may not be repeated.

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
University Studies: Approaches and

Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

Electives:

Nine hours of any economics courses numbered above 299 for which one has the necessary prerequisite. Elective courses used to fulfill the requirements for the economics minor may not additionally be used to satisfy the requirements for other majors.

Total: 18 hours

Educational Studies Minor

Watson College of Education offers an interdisciplinary minor in Educational Studies for students in all majors who are interested in issues of education but do not wish to pursue teacher licensure. The minor draws on a wide range of disciplines such as history, philosophy, sociology, anthropology, political science, gender and cultural studies, and comparative and international studies. Students will develop a knowledge base that encourages their development into informed and socially engaged stakeholders who have essential skills to critically engage in research, education, and diverse communities. Students will complete 21 hours for the

minor - 12 hours in Education and 9 hours of elective credit.

Requirements for a Minor in Educational Studies

Required Courses (12 hours)

EDN 200 - Teacher, School and Society

This course examines historical, sociological, and philosophical foundations of education as well as issues of diversity. The course engages students' knowledge, research, and analytical skills in relation to the goals and purposes of education. Students are challenged to critically reflect on personal and educational experiences as preservice professionals. The course is designed to provide opportunities to observe and engage in reflective discussion of curriculum and instructional practices, school governance and organization, and school-community relationships, inclusive of field experience. **Additional liability insurance expense may be necessary.** The lab for this course is EDNL 200.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EDN 425 - Educational Policy and Advocacy

In this course students will study local, state, national, and international policies related to education. Students will examine the causes and effects of specific policies for teachers, students, and communities. Students will complete an in-depth study of a group or agency that advocates for children, youth, families, and/or schools. A capstone project is included in this course.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Additional Required Courses

Choose 2 from the following list:

EDN 203 - Psychological Foundations of Teaching

A study of the major psychological variables that influence learning in schools and their applications to teaching. Addresses theories and systems of learning (behavioral, cognitive, constructivist, and humanistic); major developmental processes and typical characteristics; and principles of motivation. Variables explaining and accounting for individual differences will be examined, including cultural aspects of learning and special needs learners. Students will learn about practices associated with effective teaching, including classroom management, and standards for valid assessment of student learning.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EDN 304 - Creativity, Imagination, and Innovation in Education

This course will examine the creative process in teaching, curriculum design, and educational spaces. Students will explore the ways that individuals develop, implement and evaluate new ideas, processes, and programs related to education. Students will also study the cultivation of imagination and the nurturing of innovation using real-world examples.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 370 - Gender and Education

This course will investigate the historical and contemporary issues related to gender, sexuality, and sex education. Specific topics will include: the construction of gender identity in educational settings, educational practices that reinforce or challenge gendered identities, single-sex education, and sexuality education. Students in the course will also explore laws and policies related to gender and sexuality in education.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EDN 400 - Immigration, Demographics, and Justice in Education

This course will consider immigration, changing demographics in the United States, the effects of these changes on schools and communities, and power structures that support and/or hinder school and community responses to changing demographics. Specific attention will be given also to differences in rural and urban demographic shifts and the effects of those shifts on education.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Electives (9 hours)

Choose 3 courses from the following list:

ANT 206 - Cultural Anthropology

A presentation of the content and historical development of cultural anthropology. Deals with the cultural relativism, ethnocentrism, institutional analysis and cultural integration and shifts in theoretical perspectives by comparing ethnographies of selected cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 330 - The Immigrant Experience

Through ethnographic accounts and personal narratives from a variety of global settings, the course examines the economic, social and political factors that prompt migration and explores the cultural adaptations, ethical questions, human rights issues, and public policy debates of immigration and resettlement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

COM 344 - Intercultural Communication

Theoretical and practical perspectives on communication effectiveness in dealing with people, groups, or organizations that are culturally different

within and across national boundaries.

Credit Hours: 3

Prerequisite Courses: COM 105 with a grade of 'B' or better, or permission of instructor.
Additional Restrictions/Requirements: Restricted to Junior standing or higher.
University Studies: Approaches and Perspectives/Living in a Global Society, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 300 - Interdisciplinarity and International Studies

An introduction to the rationale and application of interdisciplinarity to International Studies.

Credit Hours: 3

Prerequisite Courses: INT 105
Additional Restrictions/Requirements: Restricted to International Studies majors or minors.
University Studies: Building Competencies/Writing Intensive, Information Literacy, Common

Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PBH 290 - Foundations of Public Health

An overview of the public health profession with emphasis on the foundations of public health such as definitions, history, philosophy, ethics, evidence-based principles, and determinants of health.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 320 - Foundations of Global Health

Overview of health around the world. The class will explore contemporary issues, problems, and controversies in global health and identify key global health challenges, their distributions, and prevention strategies.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
University Studies: Building Competencies/Information Literacy
Crosslisting: HEA 320.
Course Repeatability: Course may not be repeated.

PLS 202 - Contemporary American Political Issues

Important political issues and their relationship to the overall American political process. Topics are selected from, but not limited to: education policy; health care policy; federal deficit and debt policy; and minorities and politics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 313 - Early Political Thought

Introduction to the origin and development of political theory from the 5th Century B.C. through the medieval era. Emphasis will be placed on the political ideas of Plato, Aristotle, the Epicureans, the Stoics, Cicero, Augustine, medieval philosophers, and Aquinas in order to discover the recurring themes of political

inquiry.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 316 - Women in Politics

Introduction to political perspectives on sex role differentiation. Among the topics to be discussed will be political socialization of women in ancient and modern society; women's roles in politics and government; political consequences of women's entry into the work force; and contemporary issues in the women's movement. Emphasis will be placed throughout on comparative political analysis.

Credit Hours: 3

Prerequisite Courses: PLS 101 or PLS 111
Additional Restrictions/Requirements: Prerequisite

courses or consent of instructor.
Course Repeatability: Course may not be repeated.

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 347 - Sociology of Education

Historical-comparative sociological analysis of formal education systems in modern societies. Examination of sociological theories of education as they apply to political economy, stratification, social selection, cultural reproduction, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation, Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 350 - Gender and Society

Focus on gender in social life. Theoretical explanations of gender differentiation, with an emphasis on socialization, stratification, family, work, education, politics, and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 380 - Social Classes

Examination of social stratification as the system of distribution of privilege, power and prestige in modern and traditional societies. Discussion of major theories and theorists of stratification; the structure and process of systems of social inequality; the causes, correlates and consequences of socially structured inequality.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 21 hours

English Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in English

Core Courses (3 Credit Hours)

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Or

ENG 205 - Introduction to Literary and Cultural Studies

An immersive introduction to literary and cultural studies, focusing on a single text. Students will learn how to write literary and cultural criticism, with an emphasis on interpretative methods, practical research skills, and discipline-specific conventions of citation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Elective Courses (15 Credit Hours)

- plus 15 hours of English classes at the 200 level or above (excluding 200 and 201), with at least 9 hours at the 300-400 level

Courses in Other Departments

- Up to 6 hours of appropriate courses from outside the department may be counted toward the major or minor.

Total Credit Hours: 18

Additional Information:

An overall average of "C" (2.00) or better is required among courses taken to satisfy the requirements of the minor.

Environmental Sciences Minor

Requirements for a Minor in Environmental Sciences:

A minor in environmental sciences requires a total of 24 credit hours with a minimum overall quality point average of “C” (2.00) in courses counted toward the minor.

A maximum of 12 credit hours counted toward a student’s major will be counted toward completion of core and/or elective minor requirements in environmental sciences.

Students selecting the environmental sciences minor are strongly encouraged to meet with an environmental sciences coordinator to determine a specific course of study.

Requirements for a Minor in Environmental Sciences:

A minor in environmental sciences requires a total of 24 credit hours with a minimum overall quality point average of "C" (2.00) in courses counted toward the minor.

A maximum of 12 credit hours counted toward a student's major will be counted toward completion of core and/or elective minor requirements in environmental sciences.

Students selecting the environmental sciences minor are strongly encouraged to meet with an environmental sciences coordinator to determine a specific course of study.

Core Requirements:

Seven hours:

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVSL 195 - Environmental Sciences Lab

Laboratory analysis of environmental principles, resources, and problems. Application of scientific and social principles to solving current environmental problems. This course is the lab for EVS 195.

Credit Hours: 1

Prerequisite or Corequisite Courses: EVS 195
Additional Restrictions/Requirements: EVSL 195 may be taken in the same semester as EVS 195 or in a semester subsequent to EVS 195.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

And 8 additional hours selected from:

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHML 377 - Environmental Chemistry Laboratory

Laboratory analysis of environmental samples, including applications of standard EPA methods. This course is the lab for CHM 377.

Credit Hours: 1

Corequisite Courses: CHM 377
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on

methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 360 - Human Dimensions of Natural Resource Management

Examines the interrelationships between the biological sciences, physical sciences, and social sciences within the human dimensions of natural resource management framework in the context of current environmental issues. Uses contemporary management processes to solve real-world environmental problems.

Credit Hours: 3

Prerequisite Courses: EVS 195
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

EVS 361 - History and Philosophy of Natural Resources Management

Development of natural resources management in the United States. Specific attention to historical development of natural resources management policy, and the philosophical stance of individuals who are instrumental in creation of those policies.

Credit Hours: 3

Prerequisite Courses: EVS 195
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

Total: 15 hours

Elective Requirements:

Students may select 9 hours of EVS numbered courses at the 300-400 level not used in the core requirements.

Total: 9 hours

European Studies Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in European studies which focuses on Europe since 1650. The minor provides students with a broad foundation for understanding modern Europe through the study of geography, history, language, and literature. Students complement core requirements with studies in the fine arts, literature, history and civilization, and political science. Students should contact the program coordinator, Dr. Mark Spaulding, for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in European Studies

Core Courses (12 Credit Hours)

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette, Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:

ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 101 - Europe in the World I

Introduction to pre-modern European history, from the development of the first city-states in the Near East, through the rise of Athens and Rome, and concluding with the Middle Ages and Early Modern Period. Specific attention is given to the globally interconnected nature of European history.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 394 - Europe in the Age of Absolutism and Enlightenment

Europe from the Thirty Years War to the French Revolution. Topics include mercantilism; social transformation; colonialism; English constitutional government; Scientific Revolution; enlightened despotism, and changing balance of power.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 396 - Europe from French Revolution to World War I

The French and Industrial Revolutions and their social and political impact; the rise of nationalism and empires; capitalism and its critics; the changing balance of powers and the First World War.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 398 - Europe in the Age of War and Dictatorship

Europe from the First World War to 1945. Topics include both world wars, Great Depression, nationalisms, communisms and fascisms.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

And a course in FRH, GER, PRT, or SPN (chosen from offerings numbered 201 or higher, excluding those taught in English and those designated Spanish American or Latin American).

Elective Courses (9 Credit Hours)

Nine additional credits from

ARH 202 - Medieval and Early Modern Art

Study of the major developments in global art, including painting, sculpture, and architecture from the late Medieval through the Early Modern period. Subject,

style, formal qualities, patronage, significance, and the place of works of art in their respective religious, social, and political context.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

ARH 304 - Northern Renaissance Art

Study of the art in Northern Europe, exclusive of Italy, from 1200 to 1600 A.D. Emphasis on architecture, painting, sculpture, and graphics as related to the history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 305 - Italian Renaissance Art

Study of art in Italy from 1200 to 1600 A.D. Emphasis on architecture, painting, sculpture, and graphics as related to history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ARH 306 - Baroque & Rococo Art

Study of the aesthetic, social, and political dimensions of Baroque and Rococo art from its origins in Europe through its diffusion into the Americas, Africa, and Asia. Focus on visual and material culture characterized by the expanding trade networks, colonization, technological innovations, and religious reform of the global Baroque period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ARH 307 - Nineteenth Century European Art

Study of nineteenth century European art with an emphasis on architecture, painting, sculpture, and graphics as related to European history and culture of the period.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ENG 370 - European Literature to 1900

A study of representative writers of Europe prior to 1900, such as Boccaccio, Cervantes, LaFayette, Goethe, and Flaubert.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 371 - European Literature Since 1900

A study of representative writers of Europe after 1900. May include such writers as Hesse, Brecht, Camus, Sartre, and Lorca.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FRH 209 - French Literature in Translation: Topics

Representative works from the literature of France and the French-speaking world. Readings and class discussions in English. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

FRH 311 - French Civilization

Examines the cultural history of France from Lascaux to the present with a special emphasis on France's religious and political transformations. May include readings of political speeches and comic books, as well as viewings of films and audio-visual documents.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH

303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FRH 321 - Survey of French Literature I

Extensive readings covering the main currents of French literature; emphasis in classroom on textual analysis and criticism; oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FRH 322 - Survey of French Literature II

Extensive readings covering the main currents of French literature; emphasis in classroom on textual analysis and criticism; oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FRH 385 - Introduction to French Cinema

Analysis of selected films from the silent era to the present, including the 'Golden Age' and the Occupation, the New Wave, Francophone cinema, and recent French cinema. Directors studied include the Lumiere brothers, Melies, Renoir, Truffaut, Malle, and current filmmakers.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
Course Repeatability: Course may not be repeated.

FST 386 - Introduction to German Cinema

Analysis of films from the "Golden Age" of the Weimar Republic, the Third Reich, the New Wave, East German films, and current German and Austrian cinema. Works by Lang, Riefenstahl, Wenders, Reitz, Fassbinder, von Trotta, and recent films.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Crosslisting: GER 385
Course Repeatability: Course may not be repeated.

FST 387 - Introduction to French Cinema

Analysis of selected films from the silent era to the present, including the classical period, the New Wave,

Francophone cinema, and recent French cinema, situated in their historical contexts.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

FST 388 - Introduction to Spanish Cinema

Analysis of representative films by Spanish directors including Luis Buel, Carlos Saura, Pedro Almodar and Bigas Luna, as well as a discussion of recent cinematic works by filmmakers of the younger generation. Films represent a diversity of styles, periods, and genres.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to FST majors or consent of instructor.
Crosslisting: SPN 385
Course Repeatability: Course may not be repeated.

GER 209 - German Literature in Translation: Topics

Study of representative works of literature from the German-speaking world. Readings and class discussions in English. May be repeated under different subtitles. A maximum of 3 hours can be applied toward the major.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 307 - Text and Context

Not open to native speakers. Introduction to humanistic inquiry and critical thinking through close examination of German literary texts in their broader cultural context. Extensive reading, writing, and discussion. Can be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: GER 301

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 311 - German Civilization

Geographical, historical, political and cultural aspects of Germany from the beginnings to the twentieth century.

Credit Hours: 3

Prerequisite Courses: GER 301
Course Repeatability: Course may not be repeated.

GER 495 - Seminar in German Studies

Intensive study of a selected topic in German Studies. May be repeated under a different subtitle. Possible topics include "Fairy Tales / Marchen", "Legacies of the Enlightenment", and "The German Novella".

Credit Hours: 3

Prerequisite Courses: GER 307

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 496 - Topics in German Studies

Intensive study of a selected topic in German Studies. Taught by faculty at other UNC-system schools though the NC German Studies Consortium (live video conferencing). May be repeated under a different subtitle. Possible topics include "Goethe's Faust" and "Current Issues in the German Media".

Credit Hours: 3

Prerequisite Courses: GER 307
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 319 - History of Spanish Empire

Survey of Spanish history with particular attention to Early Modern and Modern Periods. The course will cover the Alfonsine era and Reconquista through the Golden Age, decline, Fascism and democracy.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 321 - History of Modern France

History of France from the French Revolution and Napoleon through the political, economic and social developments of the nineteenth century to the World Wars of the twentieth century.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 322 - History of Germany 1648-1890

The emergence of modern Germany from the end of the Thirty Years' War through the Bismarckian empire. Topics include the rise of Prussian absolutism, the Enlightenment in Germany, the impact of the French Revolution, Romanticism, the revolutions of 1848, unification, and constitutional problems of the empire.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 323 - History of Germany 1890-Present

Germany from the end of Bismarck's chancellorship to the present. Topics include World War I, German Expressionism, the failure of Weimar democracy, the rise of the Nazis, defeat and division, rebuilding in East and West, the collapse of communism, and reunification.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 325 - Russia to 1881

History of Russia from its origins to 1881. Topics include the Mongol Conquest, state building, foreign

policy, popular and intellectual opposition to serfdom.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 326 - Russia Since 1881

History of Russia from 1881 to the present. Topics include the impact of emancipation, growth of revolutionary movement, revolutions of 1917, the Stalin years, post-Stalin reforms, end of Soviet Union.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 391 - Europe in the Age of the Renaissance

Political, economic, and social changes during the Renaissance, with particular attention to the artistic and intellectual achievements of the age.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 392 - Europe in the Age of Reformation

Causes and development of the Protestant and the Catholic Reformations with examination of the impact of these movements on the political, economic, and social institutions of early modern Europe.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 394 - Europe in the Age of Absolutism and Enlightenment

Europe from the Thirty Years War to the French Revolution. Topics include mercantilism; social transformation; colonialism; English constitutional

government; Scientific Revolution; enlightened despotism, and changing balance of power.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 396 - Europe from French Revolution to World War I

The French and Industrial Revolutions and their social and political impact; the rise of nationalism and empires; capitalism and its critics; the changing balance of powers and the First World War.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 399 - Europe Since 1945

Europe from the end of the Second World War to the present. Topics include the welfare state, decolonization, the 1960s, consumer society, the origins and end of the Cold War, and European integration.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 398 - Europe in the Age of War and Dictatorship

Europe from the First World War to 1945. Topics include both world wars, Great Depression, nationalisms, communisms and fascisms.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 412 - Seminar: Renaissance and Reformation Europe

Research-oriented exploration of major themes and issues in the history of Renaissance and Reformation Europe (1350-1618). May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 102 or HST 101) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 552
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 414 - Seminar: Early Modern Europe

Research-oriented exploration of major themes and issues in the history of Early Modern Europe (1618-1789). May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 102 or HST 101) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 554
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 416 - Seminar: Nineteenth-Century Europe

Research-oriented exploration of major themes and issues in the history of Europe from the French Revolution to the First World War. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 102 or HST 101) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.

University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 556
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 418 - Seminar: Twentieth-Century Europe

Research-oriented exploration of major themes and issues in the history of Europe since 1914. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 102 or HST 101) and HST 290
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 558
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 311 - Film and the Feminine Ideal in Post Communist Eastern and Central European Cinema

An introduction to gender in transitional societies, politics, and economics through the medium of film with a focus on Post Communist Eastern and Central European women.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 340 - Topics in Europe

Intensive study of a selected topic or theme about Europe. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 351 - Introduction to Music History I: Middle ages - Classical Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Middle Ages, Renaissance, Baroque and Classical periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MUS 352 - Introduction to Music History II: Romantic-Contemporary Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Romantic and Contemporary periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PAR 202 - Modern Philosophy: Descartes to Kant

Introduction to the major topics of Western philosophy during the modern period, including skepticism, the existence of God, and the source of our ideas. Analysis of the thought of philosophers such as Descartes, Elizabeth of Bohemia, Locke, Berkeley, Leibniz, Hume, and Kant.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 213 - Existentialism

An introduction to major themes in existential thought such as freedom, authenticity, death of God, the meaning of life. Primary source readings from existential authors, e.g., Kierkegaard, Nietzsche, Heidegger, Sartre, Marcel.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 240 - Religion, Race, and Social Justice

Exploration of race and racism in the United States through theoretical, historical, political and religious constructions during slavery, colonialism, and Jim-Crowism. Examination of white supremacy, anti-Black oppression, the resistance to racism, and impacts on contemporary social life.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 314 - Modern Political Thought

Critical examination of political ideas from 1500 to 1900 with special attention to those of Machiavelli, Hobbes, Locke, Rousseau, Montesquieu, Hume, Burke, Hegel, Bentham, Marx, the Mills, Spencer, T.H. Green and Nietzsche.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 335 - European Political Systems

Political institutions and processes of selected European countries, including Great Britain, France

and Germany.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

SPN 311 - Spanish Civilization

Geographical, historical and cultural aspects of Spain.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 321 - Introduction to Spanish Literature

Selected readings covering the main currents of Spanish literature; emphasis on textual analysis and criticism in classroom discussions; oral and written reports.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 385 - Introduction to Spanish Cinema

Analysis of representative films by Spanish directors including Luis Buel, Carlos Saura, Pedro Almodar and Bigas Luna, as well as a discussion of recent cinematic works by filmmakers of the younger generation. Films represent a diversity of styles, periods and genres. Course conducted in English.

Credit Hours: 3

Crosslisting: FST 388
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 411 - Topics in Spanish Civilization

Advanced study in geographical, historical, and cultural aspects of Spain. Topics focus on specific time periods, geographic areas, or cultural phenomena. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: SPN 311 with a grade of 'C' or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

SPN 421 - Topics in Spanish Literature

Study of representative Spanish authors, literary movements, and genres.

Credit Hours: 3

Prerequisite Courses: SPN 321 with a grade of 'C' or better.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

THR 322 - A Social History of Western Theatre II

Development of theatre and drama from the late Renaissance to World War II. Emphasis on theatrical performance including staging, architecture, dramatic literature and audiences.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

- approved Study Abroad courses taken in Europe

Total Credit Hours: 21

Additional Information

A "C" (2.00) or better average is required for all courses counted toward the minor in European studies. Courses being counted toward a major cannot be counted toward completion of minor requirements.

Evolutionary Studies Minor

The interdisciplinary minor in Evolutionary Studies provides students with an understanding of the integrated study of evolution across disciplines. This minor will allow students to study the evolution of life from the perspective of different scientific disciplines, as well as to think about its significance in relation to human life and culture, including our philosophical, religious, historical, artistic and literary modes of reflection. This approach will stimulate students' abilities to recognize multiple viewpoints concerning evolution and to consider how and to what extent these perspectives complement or compete with one another. A minimum of 18 hours is required to complete the minor.

This minor will be especially relevant for students who want to integrate natural sciences, behavioral sciences

and humanities approaches in the study of evolution; for those aspiring to teach science courses in high school; and for those desiring to learn more about contemporary evolutionary theory cross disciplines. Students from a diversity of majors will demonstrate a foundational knowledge of the basic principles of evolutionary theory and apply them to more than one discipline.

Evolutionary Studies Core

Three of the following classes are required for the core. Three disciplines must be represented.

ANT 210 - Biological Anthropology

Introduction to the study of human evolution. A dynamic exploration of nonhuman primates, fossilized human ancestors, and human biology. Examines the intersection of biology and culture.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 135 - Prehistoric Life

Introduction to the field of paleontology and the fossil record; the succession of life from its earliest beginnings through the Age of Dinosaurs to modern Man; evolutionary, environmental and ecological analyses of fossil plants and animals based on biologic and geologic principles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PSY 257 - Evolutionary Psychology

Consideration of the evolution and adaptive significance of behavior in humans, including such topics as mate selection, parental care, cognition, language, altruism, aggression, warfare, and creativity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Electives

In addition to the core courses taken above, nine additional hours of electives are required. At least six hours must be at the 300-400 level. At least two different disciplines must be represented. A course taken in the core cannot be taken in the electives.

ANT 210 - Biological Anthropology

Introduction to the study of human evolution. A dynamic exploration of nonhuman primates, fossilized human ancestors, and human biology. Examines the intersection of biology and culture.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

ANT 320 - Human Origins

Classification and history of human evolution deduced from the fossil record and molecular data. Discussion of Tertiary hominoids and emergence of humans with emphasis on Australopithecines and later Pleistocene hominins.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ANT 322 - Primate Biology & Behavior

Ecology, social behavior, and functional morphology and classification of living primates (prosimians, monkeys, and apes); their evolutionary history and

development.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course, or consent of instructor.
Course Repeatability: Course may not be repeated.

ANT 324 - Human Biological Variation

Nature and extent of heritable differences among human populations in evolutionary perspective. Consideration of effects of environmental factors on genic expression.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common

Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ANT 325 - Human Growth and Development

Human growth and development from an evolutionary perspective. Topics to be addressed include differences and similarities in primate life histories, uniqueness of particular human life history traits, and the evolution of human development as traced through the fossil record. Relationships among growth, development, and health will be explored.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ANT 430 - Evolutionary Biology

Advanced survey of organizational principles of the genetic apparatus of prokaryotes and eukaryotes. Emphasis of the course directed to critical evaluation of current concepts and models of evolutionary dynamics

using relevant illustrative examples from the literature.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: BIO 430
Course Repeatability: Course may not be repeated.

BIO 105 - Concepts of Modern Biology

Introduction to the diversity of life and the principles governing living systems, focusing on the role of humans in the natural world. Designed for the non-biology major. Employs multi-media instructional materials. The lab for this course is BIOL 105.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 105
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 368 - Behavioral Ecology

Evolutionary approach focusing on both proximate and ultimate causes of behavior. Feeding and antipredatory behavior, habitat selection, territoriality, reproductive behavior, mating systems, parental care, animal communication, and the evolution of social behavior. Emphasis on birds, mammals, and fish.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and BIO 366
Course Repeatability: Course may not be repeated.

BIO 370 - Evolutionary Medicine

The scientific study of evolutionary principles as they apply to human health and disease. Topics include antibiotic resistance, pathogen virulence, aging, cancer, autoimmune disease, obesity, and mental illness.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 430 - Evolutionary Biology

Study of biological change over time through pathways of descent and through adaptation, including how biological diversity, from molecular through organismal levels, originates and is maintained. Focus on modern evolutionary analysis and applications in medicine, agriculture, and conservation.

Credit Hours: 3

Prerequisite Courses: BIO 335
Crosslisting: ANT 430
Course Repeatability: Course may not be repeated.

BIO 475 - Plant Systematics

An introduction to identification, classification, and nomenclature of vascular plants with emphasis on the flora of southeastern North Carolina.

Credit Hours: 4

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 393 - Writing in the Scientific Disciplines

Rigorous introduction to writing for academic science contexts. Critically examines the current state of academic science writing and explores the multiple practical strategies scientists use to communicate in professional settings.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GLY 132 - The Earth Through Time

Geologic history of the earth and the fossil record. Methods of dating rocks and fossils, interpreting ancient environments and the age of the earth. Field trips.

Credit Hours: 4

Prerequisite Courses: GLY 101 or GLY 120 or GGY 130.
Course Repeatability: Course may not be repeated.

GLY 135 - Prehistoric Life

Introduction to the field of paleontology and the fossil record; the succession of life from its earliest beginnings through the Age of Dinosaurs to modern Man; evolutionary, environmental and ecological analyses of fossil plants and animals based on biologic and geologic principles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

GLY 337 - Invertebrate Paleontology

History of fossil protistans and invertebrates with emphasis on the principles of paleontology, systematics and evolution, and on the use of fossils in stratigraphic correlation. Required field trips. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

HST 112 - History of Science II: Modern Science

Growth and development of modern science. Topics include Darwin's theory of evolution, Einstein's special and general relativity, quantum mechanics, wartime science, the discovery of DNA, and the impact of

science and technology on modern society.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 211 - Philosophy of Human Nature

A survey and evaluation of past and present theories of human nature; to include such topics as nature and culture, freedom and rationality, issues in gender identity, and theories of education and human development.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 360 - Philosophy of Evolution

Examination of philosophical issues found in the study of evolution: origins of the theory; impact on science; methodology of Darwinian and contemporary evolutionary studies; concepts of species, natural selection and adaptation and its mechanisms; application of evolutionary theory of human culture; and debates over creationism and sociobiology.

Credit Hours: 3

Prerequisite Courses: PAR 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PSY 257 - Evolutionary Psychology

Consideration of the evolution and adaptive significance of behavior in humans, including such topics as mate selection, parental care, cognition, language, altruism, aggression, warfare, and creativity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PSY 457 - Animal Behavior

Animal behavior including the traditional areas of ethology and comparative psychology. Primary emphasis is upon the similarities and differences in the behaviors of animals occupying various phylogenetic positions.

Credit Hours: 3

Prerequisite Courses: PSY 256 or PSY 257 or BIO 105 or BIO 202
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

Total: 18 hours

Forensic Science Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in forensic science. The minor affords students the opportunity to gain foundation-level exposure to the various sciences from which forensic applications are derived. Students will acquire broad-based knowledge and skills in a

combination of areas such as biology, chemistry, anthropology, criminology and sociology. The minor is designed to prepare students for future graduate education and/or on the job training in specialized fields within forensic science; examples include but are not limited to search and recovery of human remains, human identification, crime scene investigation, evidence collection and/or laboratory analyses.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Forensic Science

A minor in forensic science requires 21 hours, distributed as one 3-hour core course, and 18 hours of electives including at least one course in each of two groups (Group 1: Hard Sciences, and Group 2: Social and Behavioral Sciences.

Core Course (3 Credit Hours)

FSC 211 - Fundamentals of Forensic Science

Survey of theories, methods, techniques and applications of various forensic science disciplines. Topics include but are not limited to: crime scene and death investigation; body identification; forensic biology and chemistry; pattern, trace, and imprint evidence analysis; and forensic behavioral science.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Elective Courses (18 Credit Hours)

Group 1: Natural Sciences

FSC 212 - Forensic Science Methods

Introduction to laboratory methods and analysis in the forensic sciences. Topics include: processing evidence and crime scenes, fingerprinting, DNA, blood spatter, fiber and hair analysis, impression evidence, fractography and glass, autopsy, time since death estimation, body identification, questioned documents,

arson, toxicology, and firearm analysis.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural

World
Course Repeatability: Course may not be repeated.

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 335 - Genetics Laboratory

This course examines major genetic concepts and relationships between those concepts. Students will design, execute, and interpret experiments relating DNA to phenotype and investigate genetic interactions in metabolic pathways. Students will analyze and present experimental results, incorporating relevant literature and information from large-scale public genome repositories. This course is the lab for BIO 335.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 335.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIOL 465 - Biochemistry Laboratory

Experiments demonstrating basic phenomena and techniques of biochemistry. This course is the lab for BIO 465.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 465.
Course Repeatability: Course may not be repeated.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

CHML 365 - Biochemistry Laboratory

Theory and practice of biochemical techniques. Topics may include protein assays, protein purification, electrophoresis, enzyme kinetics, HPLC or proteins, buffers and pH, DNA isolation, and molecular visualization and modeling.

Credit Hours: 2

Prerequisite or Corequisite Courses: CHM 365.
Prerequisite Courses: CHML 212.
Course Repeatability: Course may not be repeated.

CHM 380 - Forensic Chemistry

Theory and applications of trace organics and metals analyses, fiber and polymer analyses, toxicology, serology, drug and DNA chemistry, fingerprinting techniques, and chain of custody procedures. The optional 3-hour laboratory (CHML 380) may be registered for separately.

Credit Hours: 3

Prerequisite Courses: CHM 211 and CHML 211
Course Repeatability: Course may not be repeated.

CHML 380 - Forensic Chemistry Laboratory

Laboratory techniques in forensic chemistry, including analyses of trace organics, metals and analyses, fibers and polymers; toxicology; serology; drug and DNA chemistry; fingerprinting; and chain of custody procedures.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 380.
Prerequisite Courses: CHM 211 and CHML 211.
Course Repeatability: Course may not be repeated.

CHM 417 - Medicinal Chemistry

Study of the principles involved in, and the multidisciplinary nature of, modern drug design. Focus on chemical and biological principles that are fundamental to medicinal chemistry and on understanding how and why certain chemicals interact at biological targets.

Credit Hours: 3

Prerequisite or Corequisite Courses: CHM 365 or BIO 465
Prerequisite Courses: CHM 212
Crosslisting: CHM 517
Course Repeatability: Course may not be repeated.

CHM 466 - Biochemistry II

Examination of bioenergetics, structure and function of biomembranes, biosynthesis, degradation of fatty acids, amino acids, and nucleotides, integration of metabolism, signal transduction, and the action of hormones. Consideration of the structure and enzymology of DNA and RNA, genetic information, protein biosynthesis, and gene regulation.

Credit Hours: 3

Prerequisite Courses: CHM 365 or BIO 465.
Course Repeatability: Course may not be repeated.

Group 2: Social and Behavioral Sciences

ANT 214 - Forensic Anthropology

Study of the role of human identification in the forensic sciences. Topics include: the history of forensic anthropology in the US; procedures for the search and recovery of human remains; methods of identification from the skeleton; trauma analyses, manners of death; time since death estimations; and the integration of other forensic science disciplines and techniques with human identification.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ANT 326 - Human Osteology

The human skeleton focusing on bone biology and skeletal anatomy. Topics include: techniques to examine and measure bones, methods for the estimation of age, sex, ancestry and stature, analyses of pathology (disease and trauma). Topics presented within the context of specialized areas of physical anthropology, such as skeletal biology, paleodemography, and forensic anthropology. The lab for this course is ANTL 326.

Credit Hours: 0 Or 3

Corequisite Courses: ANTL 326
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ANTL 326 - Human Osteology Lab

The application of concepts, techniques, and methodologies to actual skeletal materials. This course is the lab for ANT 326.

Credit Hours: 1

Corequisite Courses: ANT 326
Course Repeatability: Course may not be repeated.

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

CRM 320 - Criminal Courts

Analysis of structure and function of U.S. criminal courts. Examines relationships among the courthouse work-group (police, prosecutor, defense attorney, judge) and the role of witnesses, victims, defendants and jurors.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 380 - Criminal Law

Basic concepts of statutory and common law. Topics include: definition of crime; elements of major crimes; criminal responsibility; defenses to criminal charges; inchoate and group criminality; and limitations of the criminal law. Special focus on North Carolina law.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 381 - Criminal Procedure

Basic concepts of procedural law. Topics include the nationalization of the Bill of Rights, searchers, seizures, probable cause, warrants, arrest, self-incrimination, right to counsel, and double jeopardy.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

FSC 213 - Forensic Skeletal Identification

Skeletal elements are a common form of evidentiary material having medicolegal significance within the forensic sciences. This course provides detailed instruction on the major bones and features of the

human skeleton, including dentition. It covers methods and techniques of analysis to identify bones and bone fragments. Applied learning exercises foster discernment skills in recognizing human skeletal material apart from intact and fragmentary nonhuman bones and teeth.

Credit Hours: 3

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

INT 318 - Transitional Justice

An overview of the major theories of transitional justice that considers the range of processes and mechanisms available. Examines the legacies of human rights abuses through the exploration of the field's most emblematic case studies from a number of countries, such as South Africa, Rwanda, Argentina, Chile, and Bosnia Herzegovina.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 362 - International Human Rights

Examination of basic human rights principles, instruments and institutions, and an overview of current issues and debates in practical and political dynamics of human rights. Takes a multi-disciplinary approach, drawing together contributions from political and social scientists, philosophers, lawyers, and policy experts and makes extensive use of case studies to illustrate key points.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PSY 247 - Abnormal Psychology

An introduction to the symptoms and sequelae of behavioral disorders and major theories of the science of psychopathology or abnormal psychology.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 275 - Forensic Psychology

Investigation of psychological factors relevant to the legal system including: eyewitness identification and false memories, confessions, jury decision making, the insanity defense and mental health law, expert psychological testimony in court, criminal profiling, risk management, treatment of the mentally ill in corrections.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 21

Additional Information:

Some 400-level courses focusing on forensic science, such as Directed Independent Study, seminars, or honors work, may substitute for elective courses if approved by the coordinator. Students must have at least a "C" (2.00) average in all courses counted for the minor. Many courses listed above have prerequisites and or co-requisites, which do not count for the minor but may satisfy University Studies requirements or other major requirements.

French Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in French

Completion of a minimum of 18 semester hours at the 200 level and above, excluding FRH 209. Of these, at least 9 hours must be at the 300 level or higher.

Courses (9 Credit Hours)

9 Credit Hours at 200 level or above.

Courses (9 Credit Hours)

at least 9 credit hours must be at the 300 level or higher.

Total Credit Hours: 18

Additional Information

A grade of 'C-' or better is required in each course counted toward the minor.

Game Engineering Minor

The Game Engineering minor prepares students to design and program within game engines through the study of game theory, graphics, physics, and real time programming. Skills developed within this minor can be applied to gaming, visual effects, and simulation industries. This minor builds on computing and math

coursework completed through other majors and minors.

An overall quality point average of "C" (2.00) or better is required for all courses counted toward the minor.

Geology Minor

The geology minor focuses on scientific study of Earth. This includes common rocks and minerals, geologic processes that form and alter the Earth, and key events in Earth history.

Requirements for a Minor in Geology:

GLY 101 - Earth Revealed

An introduction to Geology covering fundamental topics including plate tectonics, geologic time, and Earth materials with emphasis on how geology affects the natural environment, controls distribution of natural resources, and poses risks to humans. Contemporary issues covered include natural resource use (water, energy), geohazards, coastal processes, and climate change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 101 - Earth Revealed Laboratory

Introduction to applied use of rock and mineral samples, maps, and models in geology. Topics include plate tectonics, mineral and rock identification and resources, geologic time, mountain building, earthquakes, volcanoes, river processes and flooding, groundwater, coastal processes and storms, energy, and climate change.

Credit Hours: 1

Prerequisite or Corequisite Courses: GLY 101.
University Studies: Approaches and Perspectives: Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

or

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

GLY 132 - The Earth Through Time

Geologic history of the earth and the fossil record. Methods of dating rocks and fossils, interpreting ancient environments and the age of the earth. Field trips.

Credit Hours: 4

Prerequisite Courses: GLY 101 or GLY 120 or GGY 130.
Course Repeatability: Course may not be repeated.

GLY 201 - Mineralogy

Introduction to the formation, chemistry, symmetry, structure and natural occurrence of minerals. Principles of physical properties, crystal chemistry,

crystallography, and mineral genesis. Study of the geologically important rock-forming mineral groups and associations. Introduction to optical mineralogy and the use of the petrographic microscope. Computer applications in geology. Required field trip(s).

Credit Hours: 4

Prerequisite Courses: Prerequisite:GLY 101 or GLY 120 and GLYL 120 or GGY 130. Prerequisite or corequisite: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

- 9 additional hours of GLY above 299.

Total: 23 hours

Additional Information:

A "C" (2.00) or better average is required on all courses taken within the department and "C" (2.00) or better average on all required courses above the 199 level in the department.

Geospatial Technologies Minor

The Geospatial Technologies minor is designed to provide students with training in the applied skills and theory of geospatial science including, but not limited to: geographic information systems, remote sensing, autonomous and semi-autonomous vehicles and their associated sensors. The minor is an excellent accompaniment to a wide range of science, humanities,

health, and business majors where spatiotemporal variations in one or more variables are of interest.

Requirements for a Minor in Geospatial Technologies:

Requires a minimum of 21 credit hours including 9 hours of core courses and 12 hours of electives. At least 6 hours of electives must be in courses at the 300 level or above.

Required Core Courses:

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building

Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 220 - Cartography and Data Visualization

Introduction to fundamental cartographic and geospatial data visualization principles that provide students the ability to describe, generate, and evaluate relevant products (maps, graphs, charts). The course uses examples from physical geography and human landscapes to practice the principles defined in the Essential Body of Knowledge used in geospatial professions.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools, functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two

laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Total: 9 credits

Additional Information:

If a student completes both GGY 215 and GGY 220, GGY 215 will count toward the core requirements and GGY 220 will count as an elective.

Electives:

At least 6 hours at 300-level or above selected from the following:

ANT 311 - Field Methods in Archaeology

Exploration of archaeological field methods through scientific excavation, recording, and sampling of sites of past human occupation. Focus on training in field and some laboratory methods at archaeological sites in the US or abroad.

Credit Hours: 3 To 6

Prerequisite Courses: ANT 207
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

CSC 302 - Introduction to Artificial Intelligence

Introduction to foundational topics on Artificial Intelligence and mathematical foundation suitable for the studies of AI. Topics include modern historical perspectives of AI, intelligent agents, search algorithms, machine learning, knowledge representation, ethical and societal implications of AI.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of "C" and MAT 161, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 370 - Computer Graphics

Introduction to geometric modeling for graphic programming. Topics include transformations for modeling, viewing, and projection; geometric modeling

of curves and surfaces; hidden-surface removal; clipping; graphical buffers; material simulation; texture mapping; and lighting.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and MAT 162
Course Repeatability: Course may not be repeated.

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GGY 421 - Spatial Programming

Introduction to GIS programming. The course will focus on how to customize applications and streamline spatial analysis, and is designed to improve students' skills in conducting sophisticated spatial analysis and adapting to new technologies and programming languages. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Course Repeatability: Course may not be repeated.

GGY 423 - GIS Modeling

Introduction to geographical and temporal modeling concepts using GIS based modeling languages and techniques.

Credit Hours: 3

Prerequisite Courses: GGY 321.
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based

environment. Lectures, demonstrations, and lab exercises. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

GGY 428 - Advanced Remote Sensing

Advanced theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, and forestry. Includes satellite data collection, advanced classification methods, hyperspectral and microwave image analysis, and satellite elevation data construction. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 322
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Crosslisting: GGY 528
Course Repeatability: Course may not be repeated.

GGY 433 - Weather Analysis and Forecasting

Introduction to tools of weather analysis and use of these tools to construct weather forecasts.

Credit Hours: 3

Prerequisite Courses: GGY 230 and GGY 333
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 470 - Field Course in Geology

Intensive geological field mapping in various geological settings. Capstone emphasis on prior geological knowledge, critical thinking, and problem-solving skills. Interpretation of field data and solving field-based problems in small groups under direct faculty supervision. Includes preparation of geological maps and cross sections using digital topographic map, detailed lithologic descriptions outcrop questions and local geologic history. Course fees apply. Students must register for lecture and laboratory.

Credit Hours: 4

Prerequisite Courses: (GLY 310 or GLY 311 and GLY 416) and GLY 431, GLY 390, GLY 441 and GLY 471.
Additional Restrictions/Requirements: Prerequisite

courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 471 - Techniques in Applied Geology

A companion course to GLY 470 providing experience in advanced techniques of geologic map reading and interpretation, data and location acquisition, mineral and rock description, sketching and sampling, structural mapping, and map and cross section design and format. Field trip required. Individual and group activities required. Course fees required.

Credit Hours: 1

Prerequisite Courses: Prerequisites: (GLY 310 or GLY 311 and GLY 416) and GLY 441. Prerequisites or corequisites: GLY 390 and GLY 431.
Additional Restrictions/Requirements: Prerequisite and corequisite courses, or consent of instructor.
Course Repeatability: Course may not be repeated.

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

OCN 390 - Field Methods in Oceanography

Applied study of ocean materials and processes in field settings. Introduction to methods and techniques used in geosciences, with emphasis on coastal and marine environments, including field measurement, sample retrieval, and data analysis. Colloquium and required field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: OCN 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Critical Reasoning, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

OCN 471 - Oceanographic Cruise Techniques

Data collection and sampling techniques on a research vessel. Introduction to equipment methods and techniques used in oceanography including CTD casts, sidescan sonar operation and data analysis, and sediment coring via participation in two half-day cruises led by UNCW oceanography faculty members.

Credit Hours: 1

Prerequisite Courses: OCN 350 or OCN 390
Additional Restrictions/Requirements: Prerequisite

courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

Total: 12 credits

Additional Information:

Other courses may be applied toward the minor at the discretion of the Geospatial Technologies minor coordinator or the Chair of the Department of Earth and Ocean Sciences. Students must earn at least a "C" (2.00) average in courses counted toward the Geospatial Technologies minor. This minor is available for students majoring in any discipline including geography and geology. A maximum of 12 credit hours counted toward a student's major may be applied toward completion of core or elective requirements in Geospatial Technologies.

German Minor

The College of Humanities, Social Sciences, and the Arts offers a minor in German. Students minoring in

German acquire advanced-level language proficiency, become knowledgeable about the cultures of the German-speaking areas, their history and literature, and acquire a range of analytic and interpretive skills. The combination of language proficiency, cross-cultural aptitude, and the ability to think critically ensures that our graduates can navigate the world and are well-prepared for a variety of professions, including business, government, engineering, law, education, and academia. Students should contact the German Studies coordinator in the Department of World Languages and Literatures for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in German:

18 hours at the 200 level and above. No more than 3 hours may be obtained by means of a German Studies course taught in English. At least 9 hours must be at the 300 level or higher.

Language Core (6 Credit Hours)

GER 201 and GER 202, or their equivalent, are required. A grade of "C-" or better is required in each course counted toward the minor and a "C" (2.00) average or better for all courses counted towards the minor.

GER 201 - Intermediate German I

Not open to native or heritage speakers. Emphasis on achievement of an active command of the language. Aural-oral practice, intensive study of complex patterns of spoken German, reading, writing, and basic conversation.

Credit Hours: 3

Prerequisite Courses: GER 102
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

GER 202 - Intermediate German II

Not open to native speakers. A review of the grammatical structure of the language. Application of the language in composition, conversation, and readings. Intensive work on increasing vocabulary,

idiomatic usage, and overall accuracy.

Credit Hours: 3

Prerequisite Courses: GER 201
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

At least 9 hours must be at the 300 level or higher. No more than 3 hours may be obtained by means of a German Studies course taught in English.

GER 322 - History of the German Language

Introduction to the history of the German language, from its Indo-European roots through the present. Study of the historical, social, and cultural context that shaped the German language and its dialects, major linguistic changes that separate German from other Germanic and Indo-European languages and that characterize Modern Standard German as opposed to various German dialects. Taught in German.

Credit Hours: 3

Prerequisite Courses: GER 307
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GER 294 - German Study Abroad I

Lower division level of special topics relating to the German-speaking world taken abroad from UNCW faculty or as a transfer credit. Course may be repeated under different subtitles.

Credit Hours: 1 To 6

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 301 - Advanced German

Not open to native speakers. Continued review of the grammatical structure of the language. Application of

the language in composition, convention, and reading. Intensive work on increasing vocabulary, idiomatic usage, and overall accuracy. Development of advanced language proficiency. Culmination of the lower-level language sequence.

Credit Hours: 3

Prerequisite Courses: GER 202
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GER 302 - Advanced German II

Continued review of the grammatical structure of the language. Application of the language in composition, conversation, and reading. Intensive work on increasing vocabulary, idiomatic usage, and overall accuracy. Development of advanced language proficiency.

Credit Hours: 3

Prerequisite Courses: GER 301
Additional Restrictions/Requirements: Instructor permission required.
Course Repeatability: Course may not be repeated.

GER 306 - Advanced Grammar

Grammatical forms and usage.

Credit Hours: 3

Prerequisite Courses: GER 301
Course Repeatability: Course may not be repeated.

GER 307 - Text and Context

Not open to native speakers. Introduction to humanistic inquiry and critical thinking through close examination of German literary texts in their broader cultural context. Extensive reading, writing, and discussion. Can be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: GER 301
University Studies: Building Competencies/Writing

Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 311 - German Civilization

Geographical, historical, political and cultural aspects of Germany from the beginnings to the twentieth century.

Credit Hours: 3

Prerequisite Courses: GER 301
Course Repeatability: Course may not be repeated.

GER 321 - Introduction to German Literature

Selected readings covering the main currents of German, Austrian, and Swiss literature. Emphasis on textual analysis and criticism in classroom discussions; oral and written reports.

Credit Hours: 3

Prerequisite Courses: GER 301
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives
Course Repeatability: Course may not be repeated.

GER 331 - Fairy Tales: From Grimms to Disney

German fairy tales of the Romantic era, including both literary fairy tales and folk fairy tales. Comparisons to other fairy tale traditions and adaptations. Attention to the literary, feminist, and historical elements of the fairy tale genre. Taught in English.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GER 332 - Germans and the New World

Examination of German fantasies of and experiences in the Americas from the 1700s through today. Includes diaries, travel narratives, drama, fiction, poetry, film, political tracts, advertising, and propaganda. Taught in English.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GER 333 - The Romance of King Arthur in Literature and Film

Exploration of the legend of King Arthur from its medieval roots to modern literature and film. Contribution of the German-speaking tradition to the pan-European myth. Arthurian romance as the vehicle of ideas and ideals about utopia, charismatic leadership, love, and betrayal. Traces the ways a myth is created, employed, and transmitted over centuries by means of textual and historical analysis. Taught in English.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GER 394 - German Study Abroad II

Junior-level designation for non-catalogue courses offered by a department abroad. Course may be repeated under different subtitles.

Credit Hours: 1 To 6

University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 494 - German Study Abroad III

Upper division level of specialized topics relating to the German-speaking world taken abroad from UNCW faculty or as transfer credit. Course may be repeated

under different subtitles.

Credit Hours: 1 To 6

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 495 - Seminar in German Studies

Intensive study of a selected topic in German Studies. May be repeated under a different subtitle. Possible topics include "Fairy Tales / Marchen", "Legacies of the Enlightenment", and "The German Novella".

Credit Hours: 3

Prerequisite Courses: GER 307
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 496 - Topics in German Studies

Intensive study of a selected topic in German Studies. Taught by faculty at other UNC-system schools though

the NC German Studies Consortium (live video conferencing). May be repeated under a different subtitle. Possible topics include "Goethe's Faust" and "Current Issues in the German Media".

Credit Hours: 3

Prerequisite Courses: GER 307
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GER 498 - Internship in German

A program of work and study conducted within an agency and/or setting that provides practical experience with observation and application of foreign language skills.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.

Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GER 499 - Honors Work in German Studies

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing, eligibility for honors program and at least 6 hours of German studies courses at the 300-400 level.
University Studies: Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

HST 322 - History of Germany 1648-1890

The emergence of modern Germany from the end of the Thirty Years' War through the Bismarckian empire. Topics include the rise of Prussian absolutism, the Enlightenment in Germany, the impact of the French Revolution, Romanticism, the revolutions of 1848,

unification, and constitutional problems of the empire.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 323 - History of Germany 1890-Present

Germany from the end of Bismarck's chancellorship to the present. Topics include World War I, German Expressionism, the failure of Weimar democracy, the rise of the Nazis, defeat and division, rebuilding in East and West, the collapse of communism, and reunification.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 324 - Jewish Humor and History: From the Shtetl to Seinfeld

Explores Jewish humor, tracing its evolution from the Yiddish culture of the 19th century to that of modern America. We examine schlemiels, schlimazels, and schnorrers, and investigate why they still have resonance today.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 392 - Europe in the Age of Reformation

Causes and development of the Protestant and the Catholic Reformations with examination of the impact of these movements on the political, economic, and social institutions of early modern Europe.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 394 - Europe in the Age of Absolutism and Enlightenment

Europe from the Thirty Years War to the French Revolution. Topics include mercantilism; social transformation; colonialism; English constitutional government; Scientific Revolution; enlightened despotism, and changing balance of power.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 412 - Seminar: Renaissance and Reformation Europe

Research-oriented exploration of major themes and issues in the history of Renaissance and Reformation Europe (1350-1618). May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: (HST 102 or HST 101) and HST 290
Additional Restrictions/Requirements: Prerequisite

courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: HST 552
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PAR 202 - Modern Philosophy: Descartes to Kant

Introduction to the major topics of Western philosophy during the modern period, including skepticism, the existence of God, and the source of our ideas. Analysis of the thought of philosophers such as Descartes, Elizabeth of Bohemia, Locke, Berkeley, Leibniz, Hume, and Kant.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 363 - Religion, Holocausts, and Genocides

A critical analysis of the role of religion in holocausts and genocides from antiquity to the present. Emphasis on the destruction of aboriginal and ethnic peoples, the Jewish holocaust, African genocide, and ethnic cleansing.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Additional Requirements

A grade of "C-" or better is required in each course counted toward the minor and a "C" (2.00) average or better for all courses counted towards the minor.

Gerontology Minor

Program Coordinator: Tina Newsham, Ph.D. I Program Coordinator & Professor

(Gerontology Minor I UNCW)

The School of Health and Applied Human Sciences offers an interdisciplinary minor in gerontology that focuses on the study of older adults and the aging

process. The minor draws on courses from a variety of disciplines, such as sociology, psychology, public health, recreation therapy, gerontology, and social work. The minor is designed for students with a general interest in aging, and will help prepare students for careers that involve working with older adults. Students are encouraged to obtain field experience in local agencies serving older adults. Students should contact the coordinator for additional information.

Applied Learning Requirement:

To satisfy the applied learning requirement for a minor in gerontology a student must successfully complete GRN 101 and GRN 440.

Requirements for a Minor in Gerontology:

Core:

GRN 101 - Introduction to Gerontology

Introduction to the social, psychological, physiological, and philosophical aspects of aging through reading, writing, and fieldwork.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GRN 440 - Current Issues in Gerontology

Study of current issues and topics in the field of aging from an interdisciplinary and global perspective with participation in a service-learning project.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SOC 336 - Sociology of Aging

Sociological theories and methods used to explain the aging process. Topics include demography, age stratification, aging and the life course, minority elderly, housing patterns, health, and social policy.

Credit Hours: 3

Prerequisite Courses: SOC 105 or GRN 101
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 324 - Psychology of Aging

A study of the psychological aspects of human aging. Topics include the effects of normal and diseased aging on perceptual and cognitive functioning, personality and social relationships, and physical and emotional health.

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

HEA 325 - Health and Aging

An introduction to health characteristics of the aging population. Topics include biomedical changes of various body systems and lifestyle factors such as nutrition, stress, drugs, exercise and sexuality. Field experience required.

Credit Hours: 3

Prerequisite Courses: GRN 101
Course Repeatability: Course may not be repeated.

Electives:

Three additional credits of designated gerontology courses are required to complete the minor.

COM 347 - Aging and Communication

Communicative behavior of the elderly within the contexts of friendship networks, health care systems, the work place, and the family. Social forces that influence society's perceptions of the aging

communicator.

Credit Hours: 3

Prerequisite Courses: COM 200 with a minimum grade of B
Additional Restrictions/Requirements: Prerequisite course or consent of instructor. Restricted to COM majors.
Course Repeatability: Course may not be repeated.

GRN 422 - Family Health and Aging

Study of family systems theory, paradigms for caregiving, illness and life-stage challenges for caregiving, and the interface between formal caregivers and caregiving families.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GRN 446 - Health Care Access for Older Adults

An introduction to the U.S. health care system with an emphasis on issues related to older adults, including

problems of access to health care for the aging population, their families, and communities.

Credit Hours: 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: GRN 546, RTH 546
Course Repeatability: Course may not be repeated.

GRN 491 - Directed Individual Study

Gerontological investigation, under faculty supervision, beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Prerequisite course, overall GPA of at least 2.00, and consent of instructor, gerontology coordinator, and the appropriate dean.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

GRN 495 - Topical Seminar in Gerontology

Discussion of selected topics in Gerontology.

Credit Hours: 3

Prerequisite Courses: GRN 101
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PSY 223 - Life Span Human Development

Variables and factors underlying human growth and development across the life span. Physical, cognitive, social, emotional, and sexual developments are emphasized.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 416 - Adult Development and Life Transitions

A course in human development. An exploration of the major normative and nonnormative changes that take place during adulthood. Operating from a lifespan perspective, includes examination of how adults initiate, understand, cope with and resolve life transitions (e.g. parenting, loss, illness, career change, relationships, change.)

Credit Hours: 3

Prerequisite Courses: PSY 220 or PSY 221 or PSY 223 or PSY 320 or PSY 324
University Studies: Explorations Beyond the Classroom
Crosslisting: PSY 516
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

RTH 469 - Recreation Therapy in Geriatrics

Emphasis on theories and evidence-based recreation therapy and other nonpharmaceutical treatments for individuals with dementia related illnesses in a variety of settings. Field work required.

Credit Hours: 3

Prerequisite Courses: RTH 375 with a C- or better and GRN 101.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: RTH 569

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 220 - Sociology of Death and Dying

Examination of the sociological dimensions of death in modern society. The social organizational and cultural dimensions of death will be considered in terms of rites of passage, bureaucratization, social movements, cultural differences, and historical and contemporary contexts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 310 - Social Work with Older Adults

Examines the status of the elderly and specific problems they confront in modern society. Focuses on social agencies and other service resources. Analyzes policies. Major emphases on practice, service settings

and special populations.

Credit Hours: 3

Prerequisite Courses: SWK 235 or GRN 101.
Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

Total: 18 hours

Additional Information:

A "C" (2.00) or better average is required in all courses counted toward the minor. Students should contact the director for a list of current designated courses.

GIS, Remote Sensing and UAS Minor

The GIS, Remote Sensing and UAS Minor is designed to provide students with training in the applied skills and theory of geospatial science including, but not limited to: geographic information systems, remote sensing, autonomous and semi-autonomous vehicles and their associated sensors. The minor is an excellent accompaniment to a wide range of science, humanities,

health, and business majors where spatiotemporal variations in one or more variables are of interest.

Requirements for a Minor in Geospatial Technologies

Requires a minimum of 21 credit hours including 9 hours of core courses and 12 hours of electives. At least 6 hours of electives must be in courses at the 300 level or above.

Core Courses (9 Credit Hours)

GGY 215 - The Digital Globe

Introduction to the maps, data, and methods commonly used by geographers to investigate spatial relationships from local to global scales. Includes the examination of geography as a discipline whereby human and physical environments are spatially explored.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Common

Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 220 - Cartography and Data Visualization

Introduction to fundamental cartographic and geospatial data visualization principles that provide students the ability to describe, generate, and evaluate relevant products (maps, graphs, charts). The course uses examples from physical geography and human landscapes to practice the principles defined in the Essential Body of Knowledge used in geospatial professions.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 321 - Introduction to Geographic Information Systems

Introduces fundamental concepts and principles of Geographic Information Systems (GIS). Tools,

functions, and capabilities of GIS desktop software (e.g. ArcGIS or QGIS) are explained and used to visualize and manipulate geospatial data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or EGN 102.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Additional Information

If a student completes both GGY 215 and GGY 220, GGY 215 will count toward the core requirements and GGY 220 will count as an elective.

Elective Courses (12 Credit Hours)

12 hours of electives with at least 6 hours at 300-level or above selected from the following:

ANT 311 - Field Methods in Archaeology

Exploration of archaeological field methods through scientific excavation, recording, and sampling of sites of past human occupation. Focus on training in field and some laboratory methods at archaeological sites in the US or abroad.

Credit Hours: 3 To 6

Prerequisite Courses: ANT 207
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or

senior standing.
Course Repeatability: Course may not be repeated.

CSC 302 - Introduction to Artificial Intelligence

Introduction to foundational topics on Artificial Intelligence and mathematical foundation suitable for the studies of AI. Topics include modern historical perspectives of AI, intelligent agents, search algorithms, machine learning, knowledge representation, ethical and societal implications of AI.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of "C" and MAT 161, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 355 - Database Design and Implementation

Introduction to database concepts and database management systems. Topics include data models (hierarchical, network, relational, parallel, distributed and NoSQL), data modeling, data description languages, data manipulation languages, database administration, data warehouses, and front-end

development. A group project designing and implementing a relational database is required.

Prerequisite Courses: CSC 231 (with a minimum grade of C)
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor**.**
Course Repeatability: Course may not be repeated.

CSC 370 - Computer Graphics

Introduction to geometric modeling for graphic programming. Topics include transformations for modeling, viewing, and projection; geometric modeling of curves and surfaces; hidden-surface removal; clipping; graphical buffers; material simulation; texture mapping; and lighting.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a minimum grade of C and MAT 162
Course Repeatability: Course may not be repeated.

GGY 222 - Quantitative Methods in Earth Sciences

Use and interpretation of statistical techniques in geographic and geologic research. The course emphasizes problem identification, data collection and interpretation through assignments covering specific kinds of statistical methods.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

GGY 421 - Spatial Programming

Introduction to GIS programming. The course will focus on how to customize applications and streamline spatial analysis, and is designed to improve students' skills in conducting sophisticated spatial analysis and adapting to new technologies and programming languages. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Course Repeatability: Course may not be repeated.

GGY 423 - GIS Modeling

Introduction to geographical and temporal modeling concepts using GIS based modeling languages and techniques.

Credit Hours: 3

Prerequisite Courses: GGY 321.
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based environment. Lectures, demonstrations, and lab exercises. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GGY 425 - GIS for Equity and Social Justice

Use of GIS to investigate and measure spatial patterns of equity, social and environmental justice. Topics for discussion may include population migration, redlining, segregation, gentrification and environmental bias. Two lecture and three lab hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321.
Course Repeatability: Course may not be repeated.

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

GGY 428 - Advanced Remote Sensing

Advanced theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, and forestry. Includes satellite data collection, advanced classification methods, hyperspectral and microwave image analysis, and satellite elevation data construction. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 322
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Crosslisting: GGY 528
Course Repeatability: Course may not be repeated.

GGY 429 - Aerial Drone Applications in Geoscience

Introduction to the applications of unmanned aerial systems (UAS, or drones) in the geosciences. The course will cover an introduction to remote sensing and photogrammetry, the basics of UAS regulatory frameworks, and data collection and processing, with at least 40% of the class devoted to data collection in the field.

Credit Hours: 3

Prerequisite Courses: GGY 321 or GGY 322 or consent of instructor
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

GGY 433 - Weather Analysis and Forecasting

Introduction to tools of weather analysis and use of these tools to construct weather forecasts.

Credit Hours: 3

Prerequisite Courses: GGY 230 and GGY 333
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 470 - Field Course in Geology

Intensive geological field mapping in various geological settings. Capstone emphasis on prior geological knowledge, critical thinking, and problem-solving skills. Interpretation of field data and solving field-based problems in small groups under direct faculty supervision. Includes preparation of geological maps and cross sections using digital topographic map, detailed lithologic descriptions outcrop questions and local geologic history. Course fees apply. Students must register for lecture and laboratory.

Credit Hours: 4

Prerequisite Courses: (GLY 310 or GLY 311 and GLY 416) and GLY 431, GLY 390, GLY 441 and GLY 471.
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 471 - Techniques in Applied Geology

A companion course to GLY 470 providing experience in advanced techniques of geologic map reading and interpretation, data and location acquisition, mineral and rock description, sketching and sampling, structural mapping, and map and cross section design and format. Field trip required. Individual and group activities required. Course fees required.

Credit Hours: 1

Prerequisite Courses: Prerequisites: (GLY 310 or GLY 311 and GLY 416) and GLY 441. Prerequisites or corequisites: GLY 390 and GLY 431.
Additional Restrictions/Requirements: Prerequisite and corequisite courses, or consent of instructor.
Course Repeatability: Course may not be repeated.

MIS 315 - Management of Database Systems

Study of the design and administration of database systems in a business environment. The relational model is used along with database management software to facilitate the communication and distribution of data and its conversion into information, with an

emphasis on sound design principles. Topics include entity-relationship modeling, normalization, and the structured query language (SQL).

Credit Hours: 3

Prerequisite Courses: MIS 213 or CIT 213
Course Repeatability: Course may not be repeated.

OCN 390 - Field Methods in Oceanography

Applied study of ocean materials and processes in field settings. Introduction to methods and techniques used in geosciences, with emphasis on coastal and marine environments, including field measurement, sample retrieval, and data analysis. Colloquium and required field trips (with associated costs).

Credit Hours: 2

Prerequisite Courses: OCN 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Critical Reasoning,

Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

OCN 471 - Oceanographic Cruise Techniques

Data collection and sampling techniques on a research vessel. Introduction to equipment methods and techniques used in oceanography including CTD casts, sidescan sonar operation and data analysis, and sediment coring via participation in two half-day cruises led by UNCW oceanography faculty members.

Credit Hours: 1

Prerequisite Courses: OCN 350 or OCN 390
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PAR 105 - Critical Reasoning With Artificial Intelligence

Introduction to the principles of proper reasoning through the use of generative AI. Exploration of how to assess the reasoning of AI and how to use AI to improve one's own argumentation. Study of the contrast between good and bad forms of reasoning as manifested by both humans and AI.

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 312 - Ethics of Artificial Intelligence

Introduction to major topics in the ethics of artificial intelligence, including the proper role of AI in moral decision-making, the potential for AI to have moral status, the relevance of AI to issues of academic integrity, and the potential for AI to engage in racial discrimination.

Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

Other courses may be applied toward the minor at the discretion of the Geospatial Technologies minor

coordinator or the Chair of the Department of Earth and Ocean Sciences. Students must earn at least a "C" (2.00) average in courses counted toward the Geospatial Technologies minor. This minor is available for students majoring in any discipline including geography and geology. A maximum of 12 credit hours counted toward a student's major may be applied toward completion of core or elective requirements in Geospatial Technologies.

Health Minor

http://www.uncw.edu/hahs

Requirements for a Minor in Health:

21 hours from the following courses, including at least 6 hours from the 300-400 level:

HEA 105 - Individual Well-Being

Topical areas and issues in health explored within the physical, emotional, social, environmental, intellectual, and spiritual dimensions of personal wellness.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 205 - Human Sexuality

Taught from a health educator perspective, focusing on empirically based information covering: human sexual response, development of sex roles and orientation, reproduction, birth control, and STI's. Provides opportunities for students to review their beliefs in the context of the historic, cultural and social factors that impact how we perceive sexuality.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 207 - Nutrition and Behavior

Application of the principles of nutrition as related to health; various levels of wellness; and practices of health care. Emphasis on basics of sound nutrition, requirements of various food elements, diet planning, diet patterns for specific age groups, nutritional fads and weight control.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 210 - Substance Abuse Prevention

Prevention education methods and strategies for substance abuse prevention for all age groups and diverse populations. Special emphasis on evidence-based prevention strategies including both curriculum-based and community-programming tactics. Students will work with outside agencies to review current use of substance abuse prevention programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 245 - Consumer Health

Survey of consumer health topics such as the purchase of health-care products and services, choosing quality health care, and how to identify and use reliable sources of information.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 300 - Mental and Emotional Health

An integrated approach to mental and emotional health examining the cognitive, emotional, and social dimensions of mental health. An introduction to common mental disorders, their causes, and treatment. Special focus on the emotional and mental health issues of adolescence.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HEA 304 - Comprehensive School Health Education, Grades K-12

An overview of the school health education program. Emphasis on methods and materials for health instruction in grades K-12.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PBH 105 - Explorations in Public Health

Please enter a description. General introduction to public health and how it interfaces with science and politics. Addresses the connectivity of public health and healthcare. The 3 P's of public health: prevent, protect and promote, and the roles of personal and social determinants of health are covered utilizing current public health events and initiatives. Partially satisfies University Studies II: Approaches and Perspectives/Understanding Human Institutions and Behaviors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HFE 221 - First Aid and Injury Care

This course is designed to introduce students to the mechanisms, underlying prevention, and care of various injuries and illnesses associated with an active lifestyle. Topics include: emergency procedures, legal

concerns and injury prevention and care. It also includes instruction to potentially obtain certification in the following: CPR/AED for the Healthcare Provider.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total: 21 hours

History Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in History

Core Courses (9 Credit Hours)

Nine hours from HST 101-199, including at least 3 hours treating the period before 1500 (HST 101, HST 111 and HST 113).

Elective Courses (9 Credit Hours)

Nine hours from HST 200-498, with at least 6 hours at the 300-400 level.

Total Credit Hours: 18

Additional Information

An overall "C" (2.00) average in courses taken in the department is required for the minor, and a grade of "C-" or better is required in each course applied toward the minor.

Information Technology Minor

Coordinator: Shauna White

The College of Science and Engineering offers an interdisciplinary minor in information technology which provides students with the opportunity to develop an understanding of technology and its impact on society and in the workplace. Because information technology affects virtually all aspects in society: education, business, and industry; the study of information technology is best suited to an interdisciplinary approach. In this interdisciplinary minor, students will encounter various aspects of information technology that directly impact their chosen course of study.

Students should contact the coordinator for additional information.

Information Technology Minor

Coordinator: Shauna White

The College of Science and Engineering offers an interdisciplinary minor in information technology which provides students with the opportunity to develop an understanding of technology and its impact on society and in the workplace. Because information technology affects virtually all aspects in society: education, business, and industry; the study of information technology is best suited to an interdisciplinary approach. In this interdisciplinary minor, students will encounter various aspects of information technology that directly impact their chosen course of study. Students should contact the coordinator for additional information.

Core Courses:

The minor requires 12 credits of core courses.

CIT 110 - Fluency in Information Technology

Information representation, the Internet and HTML, algorithmic thinking and programming, language translation, modeling and abstraction, algorithmic complexity and non-computability, machine architecture and parallel computation, networks and communication, database principles, multimedia, social impacts of computing.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 112 - Introduction to Computer Programming

Introduction to programming in a high-level language. Algorithms, computer systems, data representation, survey of computer applications, elementary programming techniques, debugging and verification of programs. The language to be used will be specified in the schedule of classes. Recommended primarily for non computer science majors.

Credit Hours: 3

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 121 - Programming Concepts I

Problem-solving methods and algorithms in a modern high-level programming language. Introduces classes and objects; control structures; arrays; characters and strings. Emphasis on programming style and the design, coding, and testing of complete programs.

Credit Hours: 4

Prerequisite Courses: MAT 111.
Additional Restrictions/Requirements: Recommended primarily for information technology majors. Will not transfer to the computer science major or minor. A grade of "C" (2.00) or better is required to take MIS 316. Available online only.
University Studies: Building

Competencies/Quantitative and Logical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

CSC 131 - Introduction to Computer Science

Problem solving methods and algorithms in a modern high-level programming language. Introduces one or more programming environments. Emphasis on a programming style and the design, coding, and testing of complete programs. Recommended primarily for computer science majors.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 150 or MAT 160.
University Studies: Common Requirements/Critical Reasoning, Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.
You must achieve a 'C' (2.00) or better if you intend to use this course as a prerequisite for another course.

MIS 316 - Business Application Development

Intermediate programming in an event driven, rapid application development context. Emphasis is on writing high-quality code that is easy to debug, test, and maintain, culminating in database interaction.

Credit Hours: 3

Prerequisite or Corequisite Courses: and MIS 216 and MIS 315
Prerequisite Courses: CSC 112 or CSC 131
Additional Restrictions/Requirements: Students must take MIS 315 as a prerequisite or corequisite. Students must also take one of the following three courses (CSC 112 or CSC 131 as a prerequisite) or (MIS 216 as a prerequisite/corequisite).
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction BS Business Administration or BS Information Technology

- **NOTE: MIS 315 is a pre- or corequisite for MIS 316 and can be used as an elective for the minor as well

CIT 213 - Introduction to Databases: Techniques and Technologies

Fundamental concepts of database management systems, including advantages of using database management systems, data modeling, relational database design, query-building, security, privacy and ethical issues, and introductions to Web-based processing, Big Data concepts, and non-relational models.

Credit Hours: 3

Prerequisite Courses: CIT 110
Course Repeatability: Course may not be repeated.

MIS 310 - Web Development Languages

Study of the design and creation of web pages that support traditional screens, tablets, and smart devices. Topics include page structure, human-computer interface design, style sheets, reusability, and design concepts. Best industry practices in web development, such as client-side scripting languages and Search Engine Optimization (SEO) techniques, will also be considered.

Credit Hours: 3

Prerequisite or Corequisite Courses: or (CSC 112 or CSC 131 or MIS 216)
Prerequisite Courses: CIT 110 or MIS 213
Additional Restrictions/Requirements:

One prerequisite or corequisite course is required: Choose CIT 110 or MIS 213 as a prerequisite course or one of CSC 112, CSC 131, or MIS 216 as a pre- or corequisite course.

Admission to Cameron School of Business or declared BS Information Technology major or declared BS Cybersecurity major or declared BS Computer Science or declared BA Digital Arts or declared Cybersecurity minor or declared Digital Arts minor.

Course Repeatability: Course may not be repeated. **Maximum Repeatable Hours:** 3
Major Restriction BS Business Administration or BS Information Technology or BS Cybersecurity or BS Computer Science or BA Digital Arts**Minor Restriction** Cybersecurity Minor or Digital Arts Minor

Electives:

The minor requires 6 credits of elective courses.

- Any 300 or higher level CIT course (not used to fulfill the core course requirement); Any 300 or higher level CSC course (not used to fulfill the core course requirement); Any 300 or higher level MIS course (not used to fulfill the core course requirement);

ACG 306 - Accounting Information Systems

An introduction to the aggregation of data in an accounting information system with an emphasis on documentation, internal controls, and transaction cycles. Laboratory projects include advanced spreadsheet functions, an accounting software package and a database package.

Credit Hours: 3

Prerequisite Courses: ACG 201 with a minimum grade of 'C' and ACG 203 with a minimum grade of 'C'. Prerequisite or corequisite: ACG 301.
Course Repeatability: Course may not be repeated.

ART 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises. Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color and lighting.

Credit Hours: 3

Prerequisite Courses: ART 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CSC 320, FST 320
Course Repeatability: Course may not be repeated.

ART 372 - Digital Printmaking

This course will focus on the creation of digitally processed and handprinted images. Projects will explore the development of visual and narrative ideas using digital tools, and hand-printing the digital images using traditional printmaking methods.

Credit Hours: 3

Prerequisite Courses: ART 101.
Course Repeatability: Course may not be repeated.

ART 382 - Intermediate Digital Photography

Further exploration of digital fine art photography concepts and methods. Further development of personal imagery through independent creative projects, discussions, and critiques of images created with digital cameras and printed with digital media.

Credit Hours: 3

Prerequisite Courses: ART 282
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

BLA 363 - Cyber Law

A study of how the legal system impacts e-commerce. Examines how Trademark Law, Copyright Law and Patent Law impact e-commerce activities. Other topics include on-line contracting issues, taxation of e-

commerce transactions on a statewide, national, and international basis, privacy concerns, obscenity, defamation, information security, computer criminal activities, as well as global e-commerce issues.

Credit Hours: 3

Prerequisite Courses: BLA 361
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

COM 380 - Field Video Production I

Hands-on field video production including project planning, script writing, filming, recording, and editing. Emphasis on mastery of digital camera operation, audio acquisition, lighting, and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Prerequisite Courses: (COM 280 or FST 201) and COM 105 with a minimum grade of B

Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

COM 383 - Audio Storytelling & Podcasting

Creation of audio-based projects in a variety of genres including IMC, news, sports, entertainment, and social media content. Topics include: voice development, project planning, scriptwriting, recording, editing, and promotion. Emphasis on proper audio acquisition, digital editing skills, and quality programming. Students complete a variety of productions working individually and in small groups.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 200 or permission of instructor.
Additional Restrictions/Requirements: PCOM or COM major or permission of instructor.

Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM Majors

COM 387 - Visual Communication: Digital and Print Design and Production

Learn the fundamental rhetorical principles and theories of graphic and layout design for effective communication. Students create artifacts using current technologies and available materials to meet diverse creative and rhetorical goals. Projects include technical documents, posters, magazines, and newsletters and other digital and print deliverables.

Credit Hours: 3

Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction COM Studies Majors

COM 388 - 3D Computer Animation II

Continued development of essential skills in both technical and artistic dimensions of 3D animation while using a high-end computer application. Through such

skills, a short commercial or movie will be created.

Credit Hours: 3

Prerequisite Courses: COM 288
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

COM 480 - Field Video Production II

Application of advanced field video and editing techniques in the completion of substantial video projects in two or more of these areas: artistic/experimental, documentary, informational, promotional, news, or sports. Emphasis on development of creativity, and video storytelling, planning and technical skills. All projects are intended for festival submission, regional telecast, or produced for campus and regional clients.

Credit Hours: 3

Prerequisite Courses: COM 380 and permission of instructor.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FST 301 - Film Tools and Techniques

Instruction in the techniques and technologies of digital filmmaking, including camera, lenses, lighting, grip, sound, and set protocol.

Credit Hours: 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST majors, or consent of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 320 - Computer Animation

Basic principles of animation using 3-D computer-generated animation and basic processes for animating synthetic objects through structured exercises.

Principles of designing and producing 3-D computer-generated animation through the creation of advanced motion studies. Projects focus on developing higher-level skills in model building, animation and color, and lighting.

Credit Hours: 3

Prerequisite Courses: FST 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: ART 320, CSC 320
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

FST 331 - Introduction to Editing

An introduction to the techniques and aesthetics of non-linear motion picture editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201, or permission of instructor.
Course Repeatability: Course may not be repeated.

Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 334 - 6x1: Variations on the One-Minute Film

Instruction and practice in alternative/experimental forms of filmmaking (16mm hand-processing, stop motion animation, cameraless filmmaking, and collage) through the creation of six 1-minute projects.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201, or permission of instructor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 430 - Digital Visual Effects

Exploration of digital image and video representation and manipulation for motion-picture visual effects. Includes image storage and compression, film and video formats, compositing, filtering, scripting for graphics and visual effects, photorealistic lighting and

rendering, virtual cinematography, camera tracking, and particle effects.

Credit Hours: 3

Prerequisite Courses: CSC 320, or ART 320, or FST 320.
Crosslisting: CSC 430, FST 522.
Course Repeatability: Course may not be repeated.
Additional Course Fee Schedule

FST 433 - Modes of Animation Production

Applied instruction in selected animation forms and techniques. Topics might include motion graphics, gif animation and character animation. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: FST 201.
Additional Restrictions/Requirements: Junior or Senior standing, permission of instructor
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

FST 497 - Applied Post Production

Hands-on application of editing theory and post-production techniques, practices, and technology. Students create a finished film using raw footage from previousFST 495 projects; exceptions upon approval.

Credit Hours: 3

Prerequisite Courses: FST 331
Additional Restrictions/Requirements: Prerequisite course and consent of the chair of Film Studies.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts

to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based environment. Lectures, demonstrations, and lab exercises. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

MGT 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: EBD 354
Course Repeatability: Course may not be repeated.

MIT 401 - Online Teaching: Design, Development, and Management

Focus on the design, development, and management of online instruction. Students will use principles of instructional to design and develop online courses with a focus on how to organize and manage an online environment in a Learning Management System (LMS).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MIT 402 - Multimedia Instruction for Online Learning

Students will follow the instructional design process to create and evaluate multimedia instruction for online computer-based environments. Several advanced technologies will be incorporated to design and develop instructional material. These technologies will include video, computer-based authoring software, mobile and desktops, and other advanced technologies impacting online course development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MIT 414 - Foundations of Online Learning

This course overviews the concepts, technologies, and issues related to the design, development, delivery, policy-making, and evaluation of distance education courses and programs. Learn about online learning technologies and focus on techniques for teaching and learning within a distance education system.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MUS 310 - Film Scoring and Video Game Music

Intermediate study of digital sound synthesis, sampling, and MIDI sequencing, with an emphasis on scoring for film and video games.

Credit Hours: 3

Prerequisite Courses: MUS 214.
Course Repeatability: Course may not be repeated.

PHY 300 - Analog Circuits

Study of passive (resistors, capacitors, inductors) and active (diodes, transistors) components in AC and transient circuits, and integrated circuits utilizing them; skills such as soldering, splicing, and component testing. Culminates in the design and construction of a functional electronic device.

Credit Hours: 4

Prerequisite Courses: PHY 202
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

THR 330 - Audio Engineering I

Examination of current techniques employed by system engineers for creating, editing and recording sound effects for theatrical production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 411 - Three-Dimensional Computer Modeling

A study of software to develop models of scene designs for the stage. Topics include shape and texture generation; light handling; rendering; scanning; and output.

Credit Hours: 3

Prerequisite Courses: THR 211
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 430 - Audio Engineering II

Examination of current techniques employed by system engineers regarding reinforcement techniques for live theatrical events. Emphasis will be on: microphone use for vocal and instrumental reinforcement in musical and non-musical situations, and the integration of system components (both digital and analog) into system designs for live production.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Additional Information:

Students must earn at least a "C" (2.00) average in courses counted for a minor in information technology. This minor is not available for students majoring in computer science or information technology.

International Affairs Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in International Affairs

Core Courses (6 Credit Hours)

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 425 - International Politics

Students are provided with an overview of the current International system and introduced to the theories actors, their interactions, and the norms of the international system. The impact of the law and norms of international relations or international conflict are analyzed and debated.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: CMR 525
Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

Choose three (3) courses from:

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear weapons technology, why countries seek nuclear weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 422 - Contemporary American Foreign Policy

Roles and interrelationships of Congress, the media, public opinion, the president, the secretaries and departments of state and defense, and the intelligence community are examined. Emphasis is placed on the

content and the dynamic aspects of the process of policy formulation and implementation.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 423 - National Security Policy

Formulation of security policy, including the roles of the executive and legislative branches and of non-governmental factors; evolution of changing assumptions, strategies, and goals; the nature of U.S. security requirements, U.S. military commitments abroad, and the cost of strategies based on weapons superiority, arms control, and disarmament.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the

European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 495 - Departmental Seminar

Consideration of special topics in political science. May be repeated for additional credit.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Six hours of political science and consent of department chairperson.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PLS 498 - Internship in Political Science

Experiential learning with selected public or private agencies or with an individual which allows the student

to utilize academic training while learning from a practical field experience. (Formal research project is a major part of the internship.)

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201 and (PLS 300 or PLS 304 or PLS 308)
Additional Restrictions/Requirements: Prerequisite courses, junior or senior standing, overall 3.00 GPA or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Major Restriction Political Science**Minor Restriction** Pre-Law

Elective Course (3 Credit Hours)

Choose one (1) course from:

PLS 218 - Ethics in International Affairs

Role of morality in international affairs to explore how states and citizens act responsibly in international public life. Drawing on the traditions of realism, liberalism, and utilitarianism along with the just war tradition, the course examines the ethical implications of issues such as war, terrorism, globalization, and genocide.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 230 - Introduction to Comparative Government and Politics

Comparative analysis of political systems in developed, second- and third-world nations, including an examination of the foundations and structures of selected national governments, such as parliamentary and presidential systems, democratic and non-democratic systems.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 330 - Political Systems of Africa

Governments and politics of selected sub-Saharan African states. A survey from colonial days to the present with emphasis on contemporary economic, social and political problems.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 332 - Politics of Central America

Introduction to core political issues facing the Central American, political history as well as contemporary processes. Students will critically evaluate development and the problems associated with moving from underdeveloped to ""developed"" status.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 333 - Politics of South America

Politics of South America and the impact of socio-economic forces on the region and its political structures.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 335 - European Political Systems

Political institutions and processes of selected European countries, including Great Britain, France and Germany.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will

be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

Elective Course (3 Credit Hours)

Choose one (1) course from:

ECN 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Crosslisting: INB 426.
Course Repeatability: Course may not be repeated.

HST 301 - History of American Foreign Relations since the Progressive Era

Formation and implementation of American foreign policy, including the relationship between foreign policy and American political culture, and the impact of foreign perspectives on U. S. foreign policy since the Progressive Era.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

PLS 294 - Transnational Politics Study Abroad I

Lower division special topics in political science taken abroad or partially abroad. Course taught by UNCW faculty or as transfer credit from a foreign institution. Course may be repeated under different subtitles.

Credit Hours: 1 To 12

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PLS 334 - Revolutionary Movements

Introduction to the social, political, and economic conditions which give rise to radical response. Examines small rebel bands, or militias (commonly referred to as 'guerrilla' movements), and 'terrorist' organizations, as well as large-scale revolutionary movements.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 494 - Transnational Politics Study Abroad II

Upper division special topics in political science taken abroad or partially abroad. Course taught by UNCW faculty or as transfer credit from a foreign institution. Course may be repeated under different subtitles.

Credit Hours: 1 To 12

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Total Credit Hours: 21

Additional Information

Students must earn at least a "C" (2.00) average among all courses counted toward the minor.

International Studies Minor

Dr. Florentina Andreescu, Chair

International Studies is an interdisciplinary major that focuses on social transformation and innovative responses to seemingly intractable global problems. International Studies students learn to:

- Think across disciplines
- Move between the the local and the global
- Be mindful of the realities of human lives at the center of our investigations

One of UNCW's strategic goals is to "Create an educational environment that prepares our students to be global citizens." Students are prepared to face these global issues and help create a more just and equitable world.

However, preparing students to be competitive in the global workforce is equally as important. Occupations and professions in a variety of settings increasingly emphasize global knowledge, skills and experience.

The International Studies major is designed specifically to meet these goals by offering an interdisciplinary bachelor's degree that provides a distinctive international learning experience for UNCW students. The integrative program curriculum will provide students with:

- A focus on a particular international theme or geographic area of concentration
- Exposure to other cultures, people, and places
- An understanding of one's own culture from international perspectives
- A deeper appreciation of the global society.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in International Studies

Courses to be distributed as follows:

Core Courses (6 Credit Hours)

INT 105 - Introduction to International Studies

An introductory, interdisciplinary survey of the main concepts and terminology associated with the broad, interdisciplinary field of international studies, including economic, geo-political, and socio-cultural globalization and the effects of these processes on individuals and communities.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 300 - Interdisciplinarity and International Studies

An introduction to the rationale and application of interdisciplinarity to International Studies.

Credit Hours: 3

Prerequisite Courses: INT 105
Additional Restrictions/Requirements: Restricted to International Studies majors or minors.
University Studies: Building Competencies/Writing Intensive, Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Two additional core courses from the following categories. Courses must be chosen from different catagories.

Development and Environment

INT 230 - Sustainability: From Global Goals to Local Action

Historical overview of how sustainability has been understood, and an introduction to the 17 Sustainable Development Goals (SDGs): what they are, how progress can be measured, and how the SDGs are relevant for the management of the global systems

supporting humanity.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 232 - Global Development and its Critics

Exploration of the concept and practice of international 'development.' A study of the development's colonial and capitalist foundations as it evolved through phases such as modernization, globalization, neoliberalism, and extractivism.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Global Governance

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era

of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 215 - Interdisciplinary Approaches to the Politics of Globalization

Exploration of interdisciplinary and political dimensions of globalization, including the concept of "globalization", what it means in various contexts, and the way in which it developed through the Cold War and beyond. Introduction to an international political economy perspective, which is foundational to understanding globalization and the way we study the world in International Studies.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Cultural and Social Dynamics

INT 220 - Cultural and Social Globalization

Exploration of contemporary cultural and social changes in the context of globalization. The course focuses on the ways in which various global and local cultural arenas reflect and are transformed by late capitalism's societal shift towards a mode of existence where images and consumerist desires have become the driving forces.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

Electives (9 Credit Hours)

Students are to choose an additional 9 elective credits from the list below. Six (6) credit hours must be from INT courses at the 300-400 level.

ANT 309 - Environmental Anthropology

A study of cultural adaptations as responses of human populations to varied environments; this course will focus upon cultural vs. biological adaptation from the archaeological past to the ethnographic present.

Credit Hours: 3

Prerequisite Courses: ANT 105 or ANT 206 or ANT 207
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 317 - Social Issues in Latin America

Complex national cultures of Latin America. Contemporary issues such as the rights of native peoples, peasant land reform, urban slum settlements,

development of resources, and political and economic reform movements. Case studies of individual countries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ANT 318 - Religion and Public Life Across Cultures

Exploration of the relationship between religion and politics and the increasing role of religion in public life across different cultures in the contemporary world. Students will learn about the interactions between religion, politics, and public life in countries with ties to different majoritarian religions such as the U.S.A. (Protestant Christianity), France (Catholicism), Turkey (Sunni Islam), and India (Hinduism).

Course Repeatability: Course may not be repeated.

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of

culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 330 - The Immigrant Experience

Through ethnographic accounts and personal narratives from a variety of global settings, the course examines the economic, social and political factors that prompt migration and explores the cultural adaptations, ethical questions, human rights issues, and public policy debates of immigration and resettlement.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 150 - Humans and Ecology

Introduction to the principles of ecology including concepts of succession, biotic communities, biodiversity, limits on population growth and conservation of natural resources.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 482 - Wildlife Ecology

Principles of wildlife ecology and management, including population dynamics, diseases, techniques, behavior, habitat manipulations, policy and administration, and contemporary issues such as antihunting. Assigned field problems.

Credit Hours: 3

Prerequisite Courses: BIO 366
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal

management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

BIOL 366 - Ecology Laboratory

Introduction to ecological sampling techniques and data analysis. Experience in field sampling, laboratory and computer modeling of sampling approaches, and scientific writing is also included. This course is the lab for BIO 366. This course is the lab for BIO 366.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 366
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHML 377 - Environmental Chemistry Laboratory

Laboratory analysis of environmental samples, including applications of standard EPA methods. This course is the lab for CHM 377.

Credit Hours: 1

Corequisite Courses: CHM 377
Course Repeatability: Course may not be repeated.

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite

course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the

mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 250 - Capitalism and the Global Market

An introduction to the history of capitalism, the current global market society, and the ethics of capitalism.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 326 - Comparative Economic Systems

Analysis of economic systems operating under capitalism, socialism, communism, and fascism; institutions and organization of production and government; decision-making; distribution of income; problems of developing nations.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use

and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

ENG 301 - International Journalism

Study of news practices across borders and within different regional contexts. Themes include foreign correspondence, news flows, and media's relationship to globalization and development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 340 - Multiculturalism and Literature

Multicultural literatures within and outside of the United States, such as African and African American, Asian and Asian American, and Latin American and Latino literature; introduction to contemporary perspectives on multiculturalism.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
Course Repeatability: Course may not be repeated.

ENG 341 - Studies in the Global South

Study of literature, cultural practices, politics, and concepts related to the Global South, with an emphasis on Latin America, South Asia, Africa, the Caribbean, and possible reverberations/intersections in the US South.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ENG 342 - Transnational Literatures

Study of a topic in transnational literatures. Courses focus literary and cultural production across multiple geographical locations and historical periods. Courses place a particular emphasis on the circumstances that shape the interrelations between diverse cultural practices.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 359 - World Indigenous Literature and Film

Study of past and present literatures and film produced by various indigneous peoples from outside the United States.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG 205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on

methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 431 - International Field Experience

An interdisciplinary introduction to environmental field methods and investigation in foreign countries. Focused study on environmental issues and problems specific to host country on local, regional, and global scales. Course integrates field and classroom instruction. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 1

Prerequisite Courses: EVS 195
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 5

EVS 466 - Sustainable Tourism

Introduction to concepts and principles of sustainable tourism development, emphasizing implications for management and planning. Cases from the U.S. and around the world are used to examine and discuss issues and practices of sustainable tourism development within different geocultural contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

FNA 101 - Cultures of the World Through Music and Dance

Examination of a variety of musical styles and dance forms from around the world, with attention to cultural issues and practices. Includes participation in dance and musical experiences.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FRH 412 - The Francophone World

Study of representative literary and non-literary texts, films and sound recordings from French-speaking cultures in North America, the Caribbean, Africa, Asia, and elsewhere. Oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

GGY 130 - Geosystems

Spatial distribution of environmental elements and processes, including weather and climate, groundwater, soils, rocks, plate tectonics, landforms, and vegetation. Three lecture and two laboratory hours each week.

Credit Hours: 4

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

GGY 180 - World Regional Geography

Regional survey of historical, physical, economic, and cultural geography of world regions. Fundamental locational geography as the foundation for a clear world view and an understanding of global interdependence.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 230 - Introduction to Weather and Climate

Examination of general climatic characteristics through space and time, especially as influenced by controls upon temperature, wind and moisture distributions, and by planetary, regional and local atmospheric disturbances.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts

to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 335 - Geomorphology

A systematic treatment of the surface processes that shape fluvial, glacial, aeolian, and coastal landforms. Themes include process mechanics, description and classification of landforms, and evolution of landform systems. Students work individually or in small groups to analyze geomorphological data in field and laboratory settings. Three lecture and three laboratory hours each week.

Credit Hours: 4

Prerequisite Courses: GGY 130 or GLY 101 or GLY 120 or OCN 150.
Crosslisting: GLY 335
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the

global carbon cycle, climate modeling, atmospheric composition and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 420, PHY 420
Course Repeatability: Course may not be repeated.

GGY 435 - Environmental Geography

A systems approach to understanding past, present and future human impacts on the natural environment, including changes and impacts on the hydrosphere, atmosphere, biosphere, geosphere and cryosphere. A team-based learning experience emphasizing socio-environmental synthesis and concept application through a series of case studies discussion.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 535
Course Repeatability: Course may not be repeated.

GGY 436 - Ice Age Earth

A review of the Quaternary Period, roughly the last two million years of earth history. Topics included the discovery of the ice age, climate change theory, glacial dynamics, geological and biological records of environmental change, and human evolution and migration during the Quaternary.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101 or OCN 150.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

GLY 120 - Environmental Geology

Introduction to the relationships between man and his geologic environment. Concerned with the problems that people have in using the earth and the reaction of the earth to that use. Emphasis is placed on earth processes, earth resources, and properties of rocks and surficial deposits insofar as they are important to or affect human activities. The lab for this course is GLYL 120.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLY 125 - Natural Disasters

Examination of the causes, effects, and options available to mitigate actual disasters, such as

earthquakes, volcanic eruptions, landslides, subsidence, flooding, severe weather, and meteorite impacts. Case histories are used to demonstrate scientific principles and socioeconomic issues.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

GLYL 120 - Environmental Geology Lab

Laboratory analysis of earth materials and resources. Applications of geologic principles to solving current environmental problems. This course is the lab for GLY 120.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: GLY 120.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

HON 212 - Honors Topical Interdisciplinary Seminar: Living in a Global Society

An in-depth investigation of a special topic related to the theme 'Living in a Global Society' using the approaches of several disciplines; may be team-taught. Topics and approaches vary. Examples are 'Brazilian Culture' and 'Germs of the World.' May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Formal enrollment in the Honors Scholars College or consent of director.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 270 - Global Issues in Historical Perspective

Selected themes and events in international or global history, with particular attention to cultural, intellectual, and/or economic exchanges between the 'West' and the wider world. Topics include: Society and the Supernatural, International Slave Trade. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

HST 363 - History of Modern East Asia

Survey of East Asian history from the mid-nineteenth century to the present, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 372 - History of Modern Africa

Historical survey of African history from 1800 to the present with emphasis on the abolition of slavery and the slave trade; the scramble for Africa; establishment and operation of colonial rule; independence movements; and the post-colonial period.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 377 - Topics in International History

Selected themes and events in international or transnational history. Examples of course topics include: The Second World War, Age of Napoleon. May be repeated under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to the Cameron School of Business.
University Studies: Approaches and

Perspectives/Living in a Global Society, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

INB 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: SCM 377
Course Repeatability: Course may not be repeated.

INB 426 - International Trade and Finance

A consideration of international trade theory and international financial institutions, including comparative advantage, exchange rates and balance of payments problems.

Credit Hours: 3

Prerequisite Courses: ECN 222 and INB 300
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: ECN 426
Course Repeatability: Course may not be repeated.

INB 439 - Multinational Financial Management

An examination of the issues affecting the financial managers of multinational corporations. Topics include managing foreign exchange risk, international financial decisions, and factors affecting foreign direct investment.

Credit Hours: 3

Prerequisite Courses: FIN 335 and INB 300

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: FIN 439
Course Repeatability: Course may not be repeated.

INB 442 - International Marketing

Focus is on the special framework in which international marketing is conducted. Influence of international institutions, culture, stage of economic development, geography and demography are covered. Emphasis on multinational marketing problems and opportunities in an ever-changing world.

Credit Hours: 3

Prerequisite Courses: INB 300 and MKT 340
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Crosslisting: MKT 442
Course Repeatability: Course may not be repeated.

INT 200 - Global Capitalism and its Discontents

An introduction to the history of capitalism, its alternatives, and its benefits and drawbacks in the era of globalization.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 215 - Interdisciplinary Approaches to the Politics of Globalization

Exploration of interdisciplinary and political dimensions of globalization, including the concept of "globalization", what it means in various contexts, and the way in which it developed through the Cold War and beyond. Introduction to an international political economy perspective, which is foundational to understanding globalization and the way we study the world in International Studies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

INT 230 - Sustainability: From Global Goals to Local Action

Historical overview of how sustainability has been understood, and an introduction to the 17 Sustainable Development Goals (SDGs): what they are, how progress can be measured, and how the SDGs are relevant for the management of the global systems supporting humanity.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 311 - Film and the Feminine Ideal in Post Communist Eastern and Central European Cinema

An introduction to gender in transitional societies, politics, and economics through the medium of film with a focus on Post Communist Eastern and Central European women.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

INT 314 - International NGOs, Globalization, and Development

Interdisciplinary overview of theories on the role international Nongovernmental Organizations play in the development of a country including development of political and economic institutions. Focus on the mounting internal and external challenges that threaten the promise of international Nongovernmental organizations, particularly in the Global South.

Credit Hours: 3

Prerequisite Courses: INT 105 or permission of instructor.
Course Repeatability: Course may not be repeated.

INT 315 - Topics in Globalization

Intensive study of a selected topic or theme in globalization. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 316 - Global Protest Movements

An examination of global protests and activism for social, political or economic change.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in A Global Society, Building

Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 317 - Dictators, Despots, and Presidents for Life

An examination of global history and current events through the lens of despotic governments and authoritarian regimes.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 318 - Transitional Justice

An overview of the major theories of transitional justice that considers the range of processes and mechanisms available. Examines the legacies of human rights abuses through the exploration of the field's most emblematic case studies from a number of countries, such as South Africa, Rwanda, Argentina, Chile, and Bosnia Herzegovina.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 319 - Insurgency

Exploration of violent and nonviolent political movements by examining structural causes, mobilization, ideologies related to insurgencies, the global dimensions related to contagion effects, and transnational insurgent movements.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 322 - Environmental Extractivism and the Anthropocene

Interdisciplinary exploration of environmental and development challenges brought about by climate change and resource extraction. Students engage with key social science approaches and different cultural perspectives on nature, ecology, and anthropogenic environmental change through diverse case studies.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

INT 331 - The New Scramble for Africa

Interdisciplinary overview of environmental history and development in Africa from the colonial era to the present.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction None**Minor Restriction** None

INT 332 - Global Politics of Food: An African Perspective

An examination of the global political economy of food through interdisciplinary examples from Africa with an exploration of the evolution of the human diet and traditional food production systems; the importance of culture in assigning meaning to food and how it is consumed; relationships between population, nutrition, and health; standards in the international trade of

foods; the history and politics of food aid; food sovreignity and sustainable development; and the relationship between the environment and food security.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 333 - China in Africa

Examination of the historical and contemporary linkages between Africa and China. This course aims to provide students an opportunity to critically discuss and analyze China-Africa, or Africa-China, socioeconomic relations and their implications for future political relations.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 336 - Modern China through Film

Examination of the social, cultural, economic, and political issues confronting modern China as

constructed in feature films produced inside the country and the West including before and after the Communists came to power.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 337 - China Encounters the World

Examination of how China has encountered the world since the 17th century, with emphasis on the late 19th and 20th centuries and how China has emerged as a major power in the 21st century.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 338 - Modern Japan through Film

An exploration of how modern Japan, from the Togugawa period (1600-1867) through the Meiji Restoration (1868), and into the contemporary Showa (1926-1989) and Heisei (1989-) eras, has been constructed and represented in feature films.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 339 - Japan Encounters the World

Focus on the emergence of Japan as a regional economic and political power in Asia, and global actor. Emphasis is given to Japan's historical transformation from isolation in the 17th century to a global power in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 344 - Russia in the World

Exploration of Russia's internal self perception as a people and state coming to terms with a new existence in the Post-Cold War World. Russia has always perceived itself to be a major global actor, and struggles against Western interpretations of it as an aberrant state, and a regional actor only.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction none**Minor Restriction** none

INT 351 - The Contemporary Persian Gulf

Examination of the political, social, and economic history and issues of the Persian/Arabian Gulf in the 19th, 20th, and 21st centuries.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 352 - The Contemporary Middle East

Examination of the political, social, and economic history and issues of the modern Middle East.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 360 - Global Development: African Perspectives

Examination of recent trends in global development based upon broad agendas designed and implemented under the following United Nations frameworks: the Millennium Development Goals (MDGs) and the Sustainable Development Goals (SDGs).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 361 - Ethnic Conflicts and Territorial Disputes

Examination of modern territorial disputes and ethnic conflicts in Asia, Europe, Africa and the Middle East in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 362 - International Human Rights

Examination of basic human rights principles, instruments and institutions, and an overview of current issues and debates in practical and political dynamics of human rights. Takes a multi-disciplinary approach, drawing together contributions from political and social scientists, philosophers, lawyers, and policy experts and makes extensive use of case studies to illustrate key points.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 363 - Global Political Economy

Explores the dynamic ways in which markets, states, and societies interact with one another, within a context of increasing global economic, political, and cultural interdependence. The course combines a focus on Global Political Economy's main theoretical approaches with the analysis of stringent issues triggered by the expansion and intensification of economic, political, and cultural life at a global level.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 364 - Global Populism

An exploration of old and new populist movements, the causes of their resurgence in the United States and around the world, and their possible long-term consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 365 - Globalization and Social Change

An examination of the relationship between globalization and the contemporary cultural and social changes, focusing on various global and local cultural arenas transformed by late capitalism's societal shift from a structural reliance on language and prohibition of enjoyment, to a mode of existence where images and consumerist enjoyment have become the driving force.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 366 - Comparative Political Regimes through Film

A comparison of post-cold war films produced in Russia, the USA, and China as representatives of three civilizations: Eastern-Orthodox, Confucian, and Western; as well as of three political regimes; democracy, transitional democracy, and authoritarian.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 367 - America through Foreign Eyes

An examination of how non-Americans view the United States and its citizens. The course will reveal both the positive and negative images of America and Americans, as well as how these images are created and perpetuated and their consequences.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 369 - Edible Culture: Globalization, Food, and Identity

Study of Globalization and its relation to food consumption, health, nutrition, and food supply. Topics include food and cultural traditions, community building, construction of identities, and social relationships.

Course Repeatability: Course may be repeated.

INT 370 - Forced Migration and Refugees

Examines forced migration and the institutional response for resolving large-scale displacement, including the rights and responsibilities of different actors in the contemporary international refugee regime. Considers global and local responses to the challenges of forced migration, investigating the obstacles to providing effective support for displaced persons.

Course Repeatability: Course may not be repeated.

INT 400 - The Cinema of Globalization

Study of globalization through the lens of cinema. Film as a popular means of socialization reflects and reinforces cultural characteristics, as well as offers a complex image of political life. This course, in line with the so-called "aesthetic turn" in International Studies helps students get a richer understanding of globalization through the medium of film.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 405 - INT 405 - War in the Global System - Masters

Exploration of warfare in the post-Cold War era. Most wars today are Intrastate in nature, centered on identity, issues, and largely a consequence of decolonization processes. Explores these issues through interdisciplinary research drawn from the fields of peace studies and conflict management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 415 - Global Politics and Everyday Life in the Age of AI

Exploration of the transformative impact of AI and machine learning on global politics and daily life, analyzing social trauma, identity, and shifts in time, space, and authority. This interdisciplinary course engages lived experiences, unfolding events, and multilayered analyses to examine security, social fantasy, and ontological challenges.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 480 - Global Issues

Intensive study of a selected international topic or theme. May be repeated for credit under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, program director and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 494 - International Student Exchange

Senior-level designation for UNCW students participating in a semester exchange program in another country.

Credit Hours: 12

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 495 - Seminar in International Studies

Research of a selected international topic or theme. May be repeated under different subtitles.

Credit Hours: 3

Prerequisite Courses: INT 105 and INT 300
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 499 - Honors Work in International Studies

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

JPN 311 - Perspectives on Contemporary Japanese Culture

Social, economic, and political issues in contemporary Japanese culture explored through a variety of sources with particular emphasis on comparing and contrasting Japanese and international perspectives on trends and issues of global significance including national identity, the family unit, rights and responsibilities of individuals, and sustainability. Course taught in English.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

LED 385 - Global Applications of Leadership

This course is designed to accompany faculty-led study abroad in the Leadership Studies Minor. The course provides opportunities to learn about leadership in another country, observe and interact with organizational leaders in multiple settings, and apply leadership theory and knowledge in an international context through completion of a leadership project.

Credit Hours: 1 To 3

Course Repeatability: Course may be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.

Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological

cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

OCN 475 - Marine Biogeochemistry

A geochemical perspective on the chemistry of the world's oceans with an emphasis on carbon cycling through the marine geosphere and biosphere. Topics include introductions to chemical oceanography, stable isotope geochemistry, paleoceanography, and investigations into the role of the oceans in the global carbon cycle through time.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101; and CHM 102 and CHML 102.

Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Crosslisting: GLY 575.
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 233 - African Religions

Religions of Africa, including traditional and non-traditional religious systems, and their impact on African societies and Africanism in the Americas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PBH 401 - Foundations of Environmental Health

Overview of assessment, control, prevention, and safety of human health from environmental and occupational risk factors. Topics include pollution wastes, toxic metals, pesticides, radiation, vector borne diseases, and occupational injuries and stressors. Emphasizing deleterious effects of industrialization on developing countries, effects of globalization, and the rise of the environmental justice movement.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only; or consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems

regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear weapons technology, why countries seek nuclear weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 463 - International Development

Examines the field of international development including economic development and governance assistance activities with attention to classic theories as well as current debates and innovative approaches.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 464 - Democracy and Authoritarianism

Integrative course focusing on scholarly literature on democracy, authoritarianism, and democratization, with an emphasis on real world examples of regime types and transitions.

Credit Hours: 3

Prerequisite Courses: PLS 230

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 270 - Cross-Cultural Psychology

Psychological study of the impact of culture on behavior. Topics including cultural effects on perception, cognition, personality, emotions, development, and mental health will be examined. Emphasis on application of cultural frames of reference to living in a global society.

Credit Hours: 3

Prerequisite Courses: PSY 105
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 370 - Environmental Psychology

Interactions between the physical environment and the behavior of the individual. Emphasis on perception of

the environment, the behavioral effects of noxious factors in the environment, the psychology of environmental design, and the formation and change of attitudes about the environment.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (PSY 246 or PSY 264 or EVS 195)
Crosslisting: EVS 370
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 451 - Travel and Tourism

A description of the key components that make a global tourism designation a success: traveler's motivation, theories of behavior, planning, development, and forecasting supply and demand. Students also learn about the delicate and sensitive relationship tourism has with its surrounding social, natural, and coastal environment.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 454 - International Meeting Planning

The organization and production of international corporate meetings, seminars, events, and conferences using innovative and creative programs. It focuses on international planning considerations including organizing and/or hosting international events, managing finances internationally, cultural differences, international contracting, marketing, traveling overseas, and safety and security.

Credit Hours: 3

Prerequisite Courses: REC 381
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 370 - Principles of Operations Management

This course provides a study of the drivers of quality, customer satisfaction, efficiency and productivity in service and manufacturing enterprises. Topics include product and service design, forecasting, quality management, facility location and layout, materials management, scheduling, project management, and supply chain management. While topics are covered for both manufacturing and service operations, attention is directed to the study and analysis of the operations management function in service enterprises.

Credit Hours: 3

Prerequisite or Corequisite Courses: BAN 280 or STT 215
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SCM 377 - International Operations Management

A study of global operations and logistics in the manufacturing and service sectors. Topics include organization of global operations, global manufacturing, global sourcing and logistics, global technology transfer, global risk management, and cultural and national comparisons of operations management practices. Case studies are used.

Credit Hours: 3

Prerequisite Courses: INB 300 and SCM 370
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Writing Intensive
Crosslisting: INB 377
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept. Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 305 - Demography

A study of the changes in size, composition, distribution of population and the dynamics underlying them.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 355 - Social Movements

Analysis of why people protest and form collectives. Examination of the research and theories in social movements with special attention to origins, dynamics, and consequences using a sociological lens.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

SOC 385 - Environmental Sociology

Examination of human-environment interactions from a sociological perspective. Focus on culture, patterns of inequalities, consumption, and beliefs about the environment and their impacts on the natural world.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Approaches and Perspectives/Understanding Human Institutions

and Behaviors
Course Repeatability: Course may not be repeated.

SOC 415 - Globalization and Development

An examination of development and globalization theories and globalization processes in the 21st century through comparative development analysis.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in sociology at the 300 level.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

TSL 401 - Teaching English as a Foreign Language

Introduces students to the field of Teaching English as a foreign/international language abroad. This course is designed for people who wish to teach English abroad or tutor language learners in the US. Participants build an introductory foundation in EFL methods, cross-

cultural communication and the structure of the English language.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

WLC 205 - Perspectives in World Cinema

Survey of selected international cinemas with emphasis on major narratives, trends, and movements examined in the context of the language, history, politics, and culture of their respective countries. Possible topics to be explored through film include national identity, (post) colonialism, ethnicity, gender, sexuality, class, globalization and transnational exchanges.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WLC 206 - Perspectives in European Cinema

Survey of selected European cinemas with emphasis on major narrative films and the cultural and historical

context from which they derive. Explores the ways in which cinema constructs concepts of national identity and examines whether the cinema of a nation carries distinguishing traces of the nation's unique history, culture, and ethnic makeup.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WLC 354 - The Middle East Through Music, Film, and Literature

Explore the cultures of the Middle East through music, cinema, and literature.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 21

Additional Requirements

A grade of 'C' (2.0) or better is required in all courses counted toward the minor.

Japanese Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Japanese

Completion of 18 semester hours including 6 hours of core courses and 12 hours of electives, consisting of JPN 294, any JPN course at the 300 level or higher, or other upper level courses approved by the minor advisor whose primary focus is on Japanese language, history, culture, or society.

Core Courses (6 Credit Hours)

The Japanese minor is grounded in a basic command of the Japanese language, and it is encouraged that students complete the core language proficiency courses as early as possible.

JPN 201 - Intermediate Japanese I

Able to sustain short conversations as well as create and understand short written compositions on familiar topics such as personal interests, preferences, future plans, and past experiences with about 140 kanji, while continuing to explore elements of Japanese material and nonmaterial culture.

Credit Hours: 3

Prerequisite Courses: JPN 102 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
Additional Restrictions/Requirements: Sufficient score on placement exam or approved credit hour equivalents.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

JPN 202 - Intermediate Japanese II

Study of spoken and written Japanese, including expressing abilities and desires, making and responding to requests, offering suggestions, making apologies, conveying second-hand information, and expressing doubt, all the while broadening knowledge

of Japanese culture. Introduces new constructions, including volitional, conditional, and benefactive verbs, as well as about 70 new kanji.

Credit Hours: 3

Prerequisite Courses: JPN 201 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

Twelve hours of elective courses from the list below, as well as approved study abroad courses. A grade of "C-" or better is required in each course counted toward the minor, and the average of all courses counted toward the minor cannot be below a "C" (2.00) average.

JPN 294 - Japanese Study Abroad I

Please enter a description.

Credit Hours: 1 To 9

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

JPN 301 - Japanese Grammar and Composition I

Study of Japanese to include grammatically complex sentences, basic honorific and humble forms to respond to requests, to convey and understand emotion and impact, and to narrate hypothetical situations in speech and writing with approximately 300 kanji. Oral and written projects focus on intercultural exchange and Japanese material and non-material culture.

Prerequisite Courses: JPN 202 with a C or better or sufficient score on placement exam or approved credit hour equivalents.
Course Repeatability: Course may not be repeated.

JPN 302 - Japanese Writing and Cultural Studies

Continuing review of the grammatical structure of Japanese at the intermediate high level. Emphasis on development of application in composition, conversation, and readings through an oral and written presentation project and extensive use of authentic materials and translation.

Credit Hours: 3

Prerequisite Courses: JPN 202
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

JPN 307 - Japanese Phonetics, Phonology, & Pronunciation

Introduction to the sound system of Japanese language varieties from the perspective of applied linguists and language learners. Description and comparison of Japanese vowels, consonants, mora timing, pitch-accent, intonation, and other features. Pronunciation training with a focus on intelligibility, and introduction to sociolinguistic factors in speech patterns.

Credit Hours: 3

Prerequisite Courses: JPN 102 with C or higher or equivalent on Japanese placement test
Additional Restrictions/Requirements: Instructor approval for only those students taking the course online through the UNC Exchange, since this requires separate steps to ensure proficiency
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

JPN 311 - Perspectives on Contemporary Japanese Culture

Social, economic, and political issues in contemporary Japanese culture explored through a variety of sources with particular emphasis on comparing and contrasting Japanese and international perspectives on trends and issues of global significance including national identity, the family unit, rights and responsibilities of individuals, and sustainability. Course taught in English.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

JPN 394 - Departmental Study Abroad II

Junior-level designation for non-catalogue courses offered by a department abroad. Course may be repeated under different subtitles.

Credit Hours: 1 To 6

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

JPN 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or

senior standing, overall GPA of at least 2.00, and consent of instuctor, department chair, and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

FST 385 - Japanese Cinema

Japanese cinema from the classical period to the present day. Emphasizes critical and historical approaches to Japanese cinema, as well as studies of key filmmakers, including Kurosawa, Mizoguchi, Ozu, Suzuki, and Kitano.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
Course Repeatability: Course may not be repeated.

INT 338 - Modern Japan through Film

An exploration of how modern Japan, from the Togugawa period (1600-1867) through the Meiji Restoration (1868), and into the contemporary Showa (1926-1989) and Heisei (1989-) eras, has been constructed and represented in feature films.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 339 - Japan Encounters the World

Focus on the emergence of Japan as a regional economic and political power in Asia, and global actor. Emphasis is given to Japan's historical transformation from isolation in the 17th century to a global power in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 374 - Japanese Religions

Examination of Japanese religions and their roles in Japanese culture and society. Course will make use of texts, literature, film, anime, manga, and other media.

Credit Hours: 3

University Studies: Building Competencies/Writing

Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

HST 363 - History of Modern East Asia

Survey of East Asian history from the mid-nineteenth century to the present, with emphasis on China and Japan and secondary attention to Korea and Vietnam. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

Total Credit Hours: 18

Additional Information

A grade of "C-" or better is required in each course counted toward the minor, and the average of all courses counted toward the minor cannot be below a "C" (2.00) average.

Jazz Studies Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Jazz Studies

Core Courses (17 Credit Hours)

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives
Course Repeatability: Course may not be repeated.

MUS 112 - Theory II

A study of tonality, triads in inversion, phrase structure and cadences, harmonic progression, the technique of harmonization, and non-harmonic tones. The lab for this course is MUSL 112.

Credit Hours: 2

Corequisite Courses: ["MUSL 112"]
Prerequisite Courses: MUS 111 with a minimum grade of C-
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

MUSL 112 - Aural Skills and Sight-Singing II

Includes melodic, harmonic, and rhythmic dictation, and sight-singing using the materials introduced in MUS 112. This course is the lab for MUS 112.

Credit Hours: 1

Corequisite Courses: ["MUS 112"]
Prerequisite Courses: MUSL 111
Course Repeatability: Course may not be repeated.

MUS 116 - History of Jazz

A survey of the evolution of this American art form from its African roots and European influences to the present. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in

Our Diverse Nation
Course Repeatability: Course may not be repeated.
Students may substitute MUS 116 for MUS 365

MUS 136 - Jazz Theory and Keyboard

Theoretical concepts, aural skill, and basic keyboard skills associated with jazz styles.

Credit Hours: 2

Prerequisite Courses: MUS 111 and MUSL 111
Course Repeatability: Course may not be repeated.

MUS 315 - Jazz Improvisation I

Development of materials and practice for basic improvisational skills in the jazz idiom. Performance-oriented course exploring a variety of methods to gain a better understanding of the art of improvisation.

Credit Hours: 2

Prerequisite Courses: MUS 111 and MUS 112
Course Repeatability: Course may not be repeated.

Major Restriction Music, B.A.**Minor Restriction** Jazz Studies Minor

Ensemble Course (3 Credit Hours)

MUS 184 - Jazz Ensemble

The development of idiomatic performance techniques of jazz music in a variety of styles and mediums through the study of its musicians, as well as performance practices throughout its history. (Intended for students who have had instrumental experience.) May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Students may substitute 1 hour from MUS 189.

Applied Music in the Primary Performance Medium Course (4 Credit Hours)

MUS 195 - Lower Level Applied Music, Private Lessons

Includes one half-hour private lesson per week and a minimum of one MUS LAB/seminar hour each week. Requires a minimum of five practice hours per week. Intended for BA music majors or music minors. May be repeated for credit.

Credit Hours: 1

Corequisite Courses: ["MUS LAB"]
Additional Restrictions/Requirements: Corequisite course, audition, consent of Music Department chair and instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Electives Courses (4 Credit Hours)

MUS 308 - Jazz Arranging

Arranging and scoring the jazz combo, with emphasis on contemporary styles. Presentation in both lecture and performance format.

Credit Hours: 2

Prerequisite Courses: MUS 300 and MUS 315
Course Repeatability: Course may not be repeated.

MUS 309 - Jazz Arranging II

Arranging and scoring the large jazz ensemble with emphasis on contemporary styles. Lecture and performance format.

Credit Hours: 2

Prerequisite Courses: MUS 308
Course Repeatability: Course may not be repeated.

MUS 316 - Jazz Improvisation II

Development of materials and practice for advanced improvisational skills in the jazz idiom. A performance-oriented course that explores a variety of methods to gain a better understanding of the art of improvisation.

Credit Hours: 2

Prerequisite Courses: MUS 315
Course Repeatability: Course may not be repeated.
Major Restriction Music, B.A.**Minor Restriction** Jazz Studies Minor

MUS 325 - Jazz Ensemble Techniques

Basic rehearsal techniques and methods for developing and directing a high school jazz ensemble. Lecture format and practical conducting experience with one of the university's jazz ensembles.

Credit Hours: 1

Prerequisite Courses: MUS 285
Course Repeatability: Course may not be repeated.

MUS 365 - Advanced Jazz History

Examination of jazz history, from the early twentieth century to today, with emphasis on the music's origins, development, and main contributors. Analysis of harmony, form, and style features while improving

listening skills. By the end, students engage in a more profound intellectual discussion about jazz.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total Credit Hours: 24

Additional Information

Courses counted toward a major in music (i.e., MUS 111, MUS 112, MUSL 111, MUSL 112) cannot be counted toward completion of minor requirements. Six additional hours of electives may be chosen to fulfill minor requirements for music majors.

A minimum final grade of "C-" is required in each music course and an overall GPA of "C" (2.00) or better is required in courses counted toward the minor. Admission to the program requires approval by the Department of Music and an audition in the major performance medium.

Journalism Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in journalism to provide students with a variety of courses that prepare them for careers in print and broadcast journalism. Students acquire a basic knowledge of the journalism industry in courses offered by the Department of Communication Studies and develop writing and editing skills through courses offered by the Department of English.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Journalism

To earn a minor in journalism requires completion of 21 hours, including 9 hours of core courses, 6 hours of communication studies electives and 6 hours of English electives.

Core Courses (9 Credit Hours)

ENG 202 - Introduction to Journalism

Introduction to news values, style, and writing. Focus is on writing news leads and news stories under deadline pressure. Also included: note taking, interviewing, and an introduction to feature writing.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 361 - Media Law and Ethics

Survey of laws and ethical principles that inform and regulate mediated communication including: freedom of speech and expression, defamation, invasion of privacy, intellectual property, the rights and responsibilities of journalists/reporters, and the regulation of journalism, advertising, public relations and multimedia industries.

Credit Hours: 3

Prerequisite Courses: COM 265 or COM 268, or permission of instructor.
Additional Restrictions/Requirements: COM Major or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Major Restriction COM Majors**Minor Restriction** Journalism Minors

Communication Studies Elective Courses (6 Credit Hours)

COM 265 - Communication Media

Examination of the development, functions, theoretical foundations, and effects of media on individuals, society, and culture.

Credit Hours: 3

Prerequisite Courses: COM 160 or permission of instructor.
Course Repeatability: Course may not be repeated.

COM 268 - Principles of Multimedia Journalism

Concepts, principles and basic skills in writing and producing news content for multiple media platforms; including radio, television, and internet-based outlets. Emphasis on news gathering, story construction and effective storytelling, proper formatting and scriptwriting techniques, and responding effectively to news

problems and potentials.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 201 or permission of instructor.
Additional Restrictions/Requirements: Restricted to PCOM and COM majors, or journalism minors.
Course Repeatability: Course may not be repeated.

COM 280 - Introduction to Digital Media Production

Introduction to the process, technologies, and aesthetics of digital video and audio production. Topics include field and studio TV production, editing, lighting, sound acquisition, project planning and writing, emerging technologies, and career preparation.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: COM 105, or consent of instructor.
Additional Restrictions/Requirements: Sophomore

standing or higher.
Course Repeatability: Course may not be repeated.

COM 283 - Digital Audio I

Audio production experience including project analysis, planning, script writing, recording, and editing. Emphasis on audio acquisition and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.

COM 302 - Applied Qualitative Research

Focus on applying qualitative methods in communication studies to real-life contexts. Student select topics to explore through the various methods and techniques presented in class. Students present findings in a variety of formats that are easily adaptable to inclusion in portfolios or future goals.

Credit Hours: 3

Additional Restrictions/Requirements: COM Majors or permission of instructor.
University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors

COM 351 - Media and Politics

History and theory of the relationships among the mass media, government, and the American public, and their implications for American democracy. Portrayal and effects of various media. Addresses the media's independence from government, the structure of media organizations, media bias, news practices, political campaigns, and effects on public opinion.

Credit Hours: 3

Prerequisite Courses: COM 105 or PLS 205
Additional Restrictions/Requirements: Prerequisite

courses or consent of instructor.
Course Repeatability: Course may not be repeated.

COM 368 - Applications in Multimedia Journalism

Emphasis on long-form/feature reporting. Technical training in the operation of news gathering equipment; refinement of news gathering techniques; presentation and delivery skills; and producing news content for multiple broadcast and digital platforms.

Credit Hours: 3

Prerequisite Courses: COM 268 or COM 280.
Additional Restrictions/Requirements: Or Permission of instructor
Course Repeatability: Course may not be repeated.
Major Restriction COM Studies Majors, or journalism minors.

COM 380 - Field Video Production I

Hands-on field video production including project planning, script writing, filming, recording, and editing. Emphasis on mastery of digital camera operation,

audio acquisition, lighting, and digital editing. Students complete a variety of short productions working individually and in small teams.

Credit Hours: 3

Prerequisite Courses: (COM 280 or FST 201) and COM 105 with a minimum grade of B
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

COM 382 - Studio Video Production I

Introduction to multi-camera studio video production in a variety of genres. Skills developed include fundamental directing, studio camera operation, audio gathering and mixing, lighting and set design, and producing skills through the completion of group projects.

Credit Hours: 3

Prerequisite Courses: COM 280
Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM and COM Majors

COM 383 - Audio Storytelling & Podcasting

Creation of audio-based projects in a variety of genres including IMC, news, sports, entertainment, and social media content. Topics include: voice development, project planning, scriptwriting, recording, editing, and promotion. Emphasis on proper audio acquisition, digital editing skills, and quality programming. Students complete a variety of productions working individually and in small groups.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 200 or permission of instructor.
Additional Restrictions/Requirements: PCOM or COM major or permission of instructor.

Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM Majors

COM 480 - Field Video Production II

Application of advanced field video and editing techniques in the completion of substantial video projects in two or more of these areas: artistic/experimental, documentary, informational, promotional, news, or sports. Emphasis on development of creativity, and video storytelling, planning and technical skills. All projects are intended for festival submission, regional telecast, or produced for campus and regional clients.

Credit Hours: 3

Prerequisite Courses: COM 380 and permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM

COM 482 - Studio Video Production II

Follow-up course in studio production offering students the opportunity to produce original content for a variety of outlets, including online and digital platforms. Student teams develop, plan, and produce professional quality programming in a variety of genres.

Credit Hours: 3

Prerequisite Courses: COM 382
Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction COM majors

English Elective Courses (6 Credit Hours)

ENG 301 - International Journalism

Study of news practices across borders and within different regional contexts. Themes include foreign correspondence, news flows, and media's relationship to globalization and development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 302 - Journalism Workshop

Continuation of ENG 202. Focus is on gathering news from various community and campus sources and writing in news style under deadline pressure. Also included: some attention to feature and editorial writing.

Credit Hours: 3

Prerequisite Courses: ENG 202
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 305 - Professional Review Writing

Critical and analytical writing intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive,

Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 306 - Essay Writing

Instruction in the genre and craft of the essay, with emphasis on the use of close observation, research, and reflection.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 311 - Professional Magazine Writing

Writing of nonfiction prose intended for publication in newspapers, magazines, and journals.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 202, or consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 315 - Topics in Writing and Rhetoric

A focused study of a theme, issue, or genre in writing or rhetoric.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric. Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 322 - Language and Meaning

Study of factors that shape meaning in verbal and nonverbal communication. Topics may include the language of persuasion, propaganda, and prejudice;

language and culture; conversation and logic; and vernacular languages.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 498 - Internship in Writing

Minimum GPA applies. Academic training and practical writing experience through work in a private company or public agency. Faculty supervision and evaluation of all study and on-site activity.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing and consent of the internship coordinator.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Total Credit Hours: 21

Additional Information:

A minimum grade of "C" (2.00) is required in all courses counted toward the journalism minor, and the cumulative grade point average in these courses must be at least 2.50.

Some courses listed above have prerequisites or other entry requirements. Other courses may be counted toward the minor if approved by the program coordinator. Courses taken to fulfill the communication studies major cannot be used to fulfill requirements for the journalism minor requirements. Courses taken to fulfill the communication studies major cannot be used to fulfill requirements for the journalism minor requirements.

Latin American Studies Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in Latin American studies. The minor provides students with a multifaceted understanding of the Latin American society by learning languages, history, anthropology, geography, politics and current events. The minor is

designed for students who are considering careers which involve business relations with Latin America, working in Latin America, working with Latin Americans who are living in the United States, or teaching about Latin America. Students should contact the coordinator in the Department of Anthropology for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Latin American Studies

Core Courses (18 Credit Hours)

Students are required to complete at least one course from five of the six subject areas:

ANT 304 - Domestication: Dogs, Cats, and Barley

Anthropological survey of the origins and relationships between domesticated animals and plants using archaeological, cultural, and biological sources, with a focus on the essential roles domesticates have played

in the formation of societies and cultures.

Course Repeatability: Course may not be repeated.

ANT 307 - Archaeology of the Americas

Exploration of the peopling of the Americas and various New World indigenous groups, with an emphasis on chiefdom and state level societies. Archaeological, ethnohistorical, and epicgraphic evidence is used to study the Aztec and Maya of Mesoamerica, the Mississippians and Puebloan Indians of North America, and Andean civilizations of South America.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ANT 310 - The Ancient Maya

Explores the achievements of one of the most remarkable civilizations in the Americas. Artistic, architectural, economic and religious components of pre-Columbian Maya Society; the rise and decline of the civilization; Spanish impacts on Maya cultural history.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ANT 315 - Ancient Mesoamerica

Overview if the development, characteristics and decline of the pre-Columbian peoples and cultures of Central America, with particular attention to archaeological and ethnographic research in Mexico, Belize, Guatemala, Honduras and El Salvador.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 317 - Social Issues in Latin America

Complex national cultures of Latin America. Contemporary issues such as the rights of native

peoples, peasant land reform, urban slum settlements, development of resources, and political and economic reform movements. Case studies of individual countries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

GGY 383 - Geography of Islands and Coasts

The study of islands and coasts as unique geographic features. Explores the physical processes of islands and coasts, the environmental history of islands and coasts, and current environmental issues unique to islands and coasts.

Credit Hours: 3

Prerequisite Courses: GGY 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 367 - History of Colonial Latin America

Survey of the conquest and colonization of Latin America from pre-Columbian civilizations through independence in the early nineteenth century, focusing on the creation of new societies shaped by the interaction of Europeans, Indians, and Africans.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 368 - History of Modern Latin America

The development of South America, Central America, Mexico, and the Caribbean from the time of independence in the early nineteenth century to the present.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 332 - Politics of Central America

Introduction to core political issues facing the Central American, political history as well as contemporary processes. Students will critically evaluate development and the problems associated with moving from underdeveloped to ""developed"" status.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 333 - Politics of South America

Politics of South America and the impact of socio-economic forces on the region and its political structures.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

SPN 308 - Hispanic Linguistics

Introduction to Hispanic phonology, morphology, syntax, dialectology, bilingualism, and sociolinguistics.

Credit Hours: 3

Prerequisite Courses: SPN 202 or SPN 215 with a minimum grade of C, or by placement
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

SPN 312 - Spanish-American Civilization

Geographical, historical, and cultural aspects of Spanish America.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 322 - Introduction to Spanish-American Literature

Selected readings covering the main currents of Spanish-American Literature; emphasis on textual analysis and criticism in classroom discussions; oral and written reports.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
University Studies: Approaches and

Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 412 - Topics in Spanish-American Civilization

Advanced study in geographical, historical, and cultural aspects of Spanish America. Topics focus on specific time periods, geographic areas, or cultural phenomena. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: SPN 312 with a grade of C or better
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

SPN 422 - Topics in Spanish-American Literature

Study of representative Spanish-American authors, literary movements, and genres.

Credit Hours: 3

Prerequisite Courses: SPN 322 with a grade of 'C' or better.
University Studies: Critical Reasoning, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

Elective Course (3 Credit Hours)

- a Spanish or Portuguese course at the 300 level or higher.

Total Credit Hours: 21

Additional Information

Substitutions will be approved for topic courses, seminars, field work, and/or study abroad that focus primarily on Latin American issues. Students must have a "C" (2.00) in all courses counted toward the minor in Latin American Studies.

Leadership Studies Minor

The Watson College of Education offers an interdisciplinary minor in leadership studies for students in all majors. This minor provides students with an understanding of leadership theory and practice from multidimensional perspectives. Opportunities to engage in leadership experiences and challenges in a variety of contexts are also provided. Students complement core requirements with courses in a variety of academic disciplines. Students should contact the coordinator in the Watson College of Education for additional information.

Program Objectives

- Understand leadership theory and practice from multidimensional perspectives, content knowledge, ethical and professional standards, & diversity.
- Understand the consequences of leadership decisions, informed decision making and reflective practices.
- Engage in leadership experiences and challenges in a variety of contexts, diversity reflective practice, and technological competence.

- Participate in classroom and out-of-classroom, personal challenge activities that emphasize structured self-growth, reflective practice, technological competence and effective communications.

Requirements for a Minor in Leadership Studies:

Including 9 hours in core courses:

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

LED 311 - Communication and Leadership

Theory and practice of leadership. Focuses on issues of cohesiveness, trust, motivation, vision, and goals.

Development of conflict management and decision-making goals.

Credit Hours: 3

Prerequisite Courses: LED 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

LED 411 - Contemporary Leadership Applications

Concepts related to leadership. Ability to envision and implement change for the common good using diverse perspectives and contexts. Applies leadership and organizational theories through real world experience and contemporary issues.

Credit Hours: 3

Prerequisite Courses: LED 311
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Elective Courses:

Students select an additional 9 hours of elective courses in three academic areas from an approved list. For a list of approved elective courses, students should contact the coordinator of the leadership studies minor.

Total: 18 hours

Additional Information:

Students must have a "C" average (2.00) in courses counted for the minor.

Linguistics Minor

The College of Humanities, Social Sciences, and the Arts (CHSSA) offers a minor in linguistics to provide students with a variety of courses related to the scientific study of human languages. Students acquire a basic knowledge of linguistics, sociolinguistics, and applied language studies in courses offered by several departments. For more information, contact the minor coordinator, Dr. Addie Sayers, at chinaa@uncw.edu.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Linguistics

Core Course (3 Credit Hours)

Students will choose one of the following required courses:

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

SPN 308 - Hispanic Linguistics

Introduction to Hispanic phonology, morphology, syntax, dialectology, bilingualism, and sociolinguistics.

Credit Hours: 3

Prerequisite Courses: SPN 202 or SPN 215 with a minimum grade of C, or by placement
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

Electives Courses (15 Credit Hours)

Students will choose 15 additional credit hours from the following classes below. Students may take ENG 324 more than once under a different topic.

ANT 208 - Language & Culture

Human language, its characteristics and its relationship to other communication systems will be examined. The use of language to illuminate historical relationships and current sociocultural processes will be discussed, as well as ways in which one can investigate culture through cognitive structures elicited from speech.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

ENG 320 - Introduction to Linguistics

An introduction to the study of human language, including such topics as the sounds, structure, and meaning of language; language and social interaction; the ways languages change; and the ways children learn language.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 321 - Structure of the English Language

Study of the grammatical structure of the English language and the process by which we create and comprehend English sentences. Emphasis on recent syntactic models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 322 - Language and Meaning

Study of factors that shape meaning in verbal and nonverbal communication. Topics may include the language of persuasion, propaganda, and prejudice; language and culture; conversation and logic; and vernacular languages.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 323 - History of the English Language

The development of the English language from Old English to the present; changes in sounds, vocabulary, syntax, meaning, and spelling; formation of American dialects.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ENG 324 - Topics in Linguistics

The study of a selected topic in human language. Content varies from semester to semester. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ENG 325 - Studies in Sociolinguistics

ENG 204 or ENG 205 recommended but not required. An examination of the way language varies according to social characteristics such as age, gender, ethnicity, class, individual style, social networks, and language attitudes.

Credit Hours: 3

Prerequisite Courses: ENG 103 or ENG 200 or ENG 201
Course Repeatability: Course may not be repeated.

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the

context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

FRH 308 - French Linguistics

Introduction to the phonetics, phonology, morphology, and syntax of French; emphasis on the French sound system, pronunciation, and intonation.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
Course Repeatability: Course may not be repeated.

GER 322 - History of the German Language

Introduction to the history of the German language, from its Indo-European roots through the present. Study of the historical, social, and cultural context that shaped the German language and its dialects, major linguistic changes that separate German from other Germanic and Indo-European languages and that characterize Modern Standard German as opposed to various German dialects. Taught in German.

Credit Hours: 3

Prerequisite Courses: GER 307
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

JPN 307 - Japanese Phonetics, Phonology, & Pronunciation

Introduction to the sound system of Japanese language varieties from the perspective of applied linguists and language learners. Description and comparison of Japanese vowels, consonants, mora timing, pitch-accent, intonation, and other features. Pronunciation training with a focus on intelligibility, and introduction to

sociolinguistic factors in speech patterns.

Credit Hours: 3

Prerequisite Courses: JPN 102 with C or higher or equivalent on Japanese placement test
Additional Restrictions/Requirements: Instructor approval for only those students taking the course online through the UNC Exchange, since this requires separate steps to ensure proficiency
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PAR 335 - Philosophy of Language

Fundamental Issues in the nature and meaning of language: concepts of truth, meaning, reference, metaphor, interpretation, and speech acts.

Credit Hours: 3

Prerequisite Courses: PAR 101
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

SPN 307 - Spanish Phonetics

Introduction to the sound system of Spanish through theoretical and practical analysis. Students explore the articulation and structure of Spanish sounds, comparing them to English sounds and differences across dialects of Spanish. Students also review accent rules and the correspondence between sounds and letters in Spanish.

Credit Hours: 3

Prerequisite Courses: SPN 202 with a 'C' or better or SPN 215 with a 'C' or better or appropriate placement test score.
Course Repeatability: Course may not be repeated.

SPN 308 - Hispanic Linguistics

Introduction to Hispanic phonology, morphology, syntax, dialectology, bilingualism, and sociolinguistics.

Credit Hours: 3

Prerequisite Courses: SPN 202 or SPN 215 with a minimum grade of C, or by placement
University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

SPN 496 - Seminar in Hispanic Linguistics

Advanced study of Hispanic Linguistics.

Credit Hours: 3

Prerequisite Courses: SPN 305, SPN 306, and SPN 307, each with a grade of 'C' or better.
University Studies: Critical Reasoning, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

TSL 326 - Applied Linguistics for ESL

Students will analyze all aspects of the English language with emphasis on understanding the nature and structure of the language that English language learners bring into the classroom.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

TSL 423 - Second Language Acquisition

Students will be introduced to the field of Second Language Acquisition. Topics include basic concepts in first and second language acquisition and relationships between the two, key research, theories and principles in the field of English as a second language and how they relate to the academic achievement of English language learners.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 21

Additional Information

Students must earn at least a "C" (2.00) average in courses counted for a linguistics minor.

Marine Biology Minor

The College of Science and Engineering offers a minor in Marine Biology that provides students with a broad foundation for understanding the ecology and adaptations of organisms to life in the sea. The minor is targeted to students interested in courses that highlight environments and issues that are unique to a coastal university. Students complement core requirements with studies that focus on groups of organisms (e.g., marine mammals), ecosystems (e.g., coral reef environments), or relevant topics (e.g., climate change, ocean acidification). Students should contact the undergraduate coordinator in the Department of Biology and Marine Biology for additional information.

Requirements for a Minor in Marine Biology

All students must complete three required core courses (11 hours). An additional 9 credit hours of electives selected from the list below are required to complete the minor.

Required Core Courses:

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

and

BIOL 201 - Principles of Biology: Cells Laboratory

Introduction to basic cell biology sampling techniques and data analysis. Experience in laboratory approaches to introduce basic investigative skills and methods of biological inquiry. This course is the lab for BIO 201.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 201

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 202 - Principles of Biology: Biodiversity

Evolution, classification, and diversity of life, stressing morphology, physiology, principles of adaptation, and relationships between biotic and abiotic components of ecosystems. The lab for this course is BIOL 202.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 202
University Studies: Building Competencies/Information Literacy, Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

and

BIOL 202 - Principles of Biology: Biodiversity Laboratory

Introduction to basic biodiversity sampling techniques and data analysis. Experience in laboratory approaches to introduce major taxonomic groups and biotic principles. This course is the lab for BIO 202.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 202
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 362 - Marine Ecology

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. The lab for this course is BIOL 362.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

Electives:

BIO 313 - Marine Phycology

Introduction to the morphology, life histories, and ecology of benthic marine algae with emphasis on special topics such as morphogenesis, ecotypic variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. The lab for this course is BIOL 313.

Credit Hours: 3

Corequisite Courses: BIOL 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

and

BIOL 313 - Marine Phycology Laboratory

Introduction to phycological sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate morphology, life histories, and ecology of benthic marine algae with

emphasis on special topics such as morphogenesis, ecotypic variation and speciation, phytogeography, or seasonal periodicity of growth and reproduction. This course is the lab for BIO 313.

Corequisite Courses: BIO 313
Prerequisite Courses: BIO 362 or BIO 366
Course Repeatability: Course may not be repeated.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

and

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 322 - Biological Invasions

The scientific study of the invasion process, persistence, and spread of introduced species; ecological and economic impacts and management of introduced species; and how global change influences the impact of introduced species on human resources.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 358 - Marine Mammals

Study of pinnipeds, cetaceans, and sirenians, emphasizing their evolution and taxonomic relationships, anatomical and physiological adaptations, ecologic and economic importance, and natural history.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 363 - Coral Reef Ecology

Ecology and physiology of coral reef organisms, emphasizing processes that contribute to the function and complexity of coral reef ecosystems. Reef information and geology, coral biology and physiology, ecological interactions, human effects, global effects, and conversation will be considered. The lab for this course is BIOL 363.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 367 - Antarctic Ecology, Geology, History, and Policy

An in-depth examination of the frozen continent including its geologic origins, ice sheet formation, and fossil record. Its unique ecology, endemic wildlife, discovery and human history, anthropogenic impacts, and current international agreements to protect resources will also be examined. Open to juniors and seniors from all major departments. Also offered as BIO 585 with additional requirements.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 371 - Phytoplankton

Introduction to the physiology and ecology of phytoplankton. Exploration of the diversity and function of microalgae, their role in aquatic ecosystems, and their potential application in biotechnology solutions.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

BIO 378 - Global Environmental Problems

Review and discussion of causes and effects of major environmental problems, with emphasis on ecosystem-level effects and interactions. Topics include extinction, deforestation, climate change, and pollution impacts.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

BIO 412 - Marine Botany

Introduction to coastal marine plant communities, including how the marine environment affects plant community dynamics. Topic areas include: classification and identification, morphology, physiological ecology, importance to humans, and current hot topics. The lab for this course is BIOL 412.

Credit Hours: 3

Corequisite Courses: BIOL 412
Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Credits / Units: and

BIOL 412 - Marine Botany Laboratory

Introduction to marine botany sampling techniques and data analysis. Experience in field sampling and laboratory approaches to illustrate how to identify marine plant communities and quantify their responses to environmental factors. This course is the lab for BIO 412.

Credit Hours: 1

Corequisite Courses: BIO 412
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 457 - Ichthyology

Survey of systematics, evolution, ecology, and natural history of living fishes, with emphasis on southeastern United States. The lab for this course is BIOL 457.

Credit Hours: 3

Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.

BIO 458 - Fisheries Biology

An examination of the factors that control the population dynamics of fishes. Introduction to the principles of fisheries science including estimation of population metrics such as age, growth, mortality, and abundance, fish stock assessment, and fishery management strategies. The lab for this course is BIOL 458.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

BIO 470 - Mariculture

Overview of basic principles of fish and shellfish production. Focus on the basic features of culture systems, biology of major culture species and legal and economic aspects of mariculture. Specific culture techniques for a variety of marine species, with special emphasis on the southeast US coast.

Credit Hours: 3

Prerequisite Courses: BIO 362.
Course Repeatability: Course may not be repeated.

BIO 486 - Advanced Topics in Mariculture

Advanced mariculture topics not considered in detail in other courses. More than one topic may be taken for credit.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

BIO 487 - Introduction to Coastal Management

Interdisciplinary study of human impact on coastal environments and organisms. Physical and biotic settings of worldwide coastal regions, principles of coastal management, current topics in coastal management, and analysis of potential solutions to coastal problems.

Credit Hours: 0 Or 4

Additional Restrictions/Requirements: Junior or senior standing or consent of instructors.
Crosslisting: OCN 458, GLY 558
Course Repeatability: Course may not be repeated.

BIO 489 - Benthic Ecology

The scientific study of the organisms and processes that structure coastal benthic communities. Benthic communities encompass the vast seafloor areas of estuaries and oceans and support aquatic communities, fisheries, larger species of interest, and critical ecosystem processes.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, BIO 366.
Course Repeatability: Course may not be repeated.

Total: 20 hours

Additional Information:

A "C" or better average is required for all courses counted toward the minor in Marine Biology.

Mathematics Minor

Requirements for a Minor in Mathematics:

MAT 161 - Calculus with Analytical Geometry I

Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, and approximations; theory of integration with applications; and transcendental functions.

Credit Hours: 4

Prerequisite Courses: MAT 112 or MAT 160, or

satisfactory performance on the UNCW mathematics placement test.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MAT 162 - Calculus with Analytical Geometry II

The second course in a three-course sequence. Further techniques and applications of integration; infinite sequences and series; conic sections, parametrized curves and polar coordinates; and, elementary differential equations.

Credit Hours: 4

Prerequisite Courses: MAT 161.
University Studies: Foundations/Mathematics and Statistics, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

and

- at least 12 hours selected from mathematics courses numbered 261 or higher, or STT 315.

These hours must include one of the following:

MAT 261 - Multivariate Calculus

Calculus of functions of several variables. Vectors and analytic geometry of three dimensional space; partial derivatives, gradients, directional derivatives, maxima and minima; multiple integrals; line and surface integrals, Green's Theorem, Divergence Theorem, and Stokes' Theorem.

Credit Hours: 4

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

MAT 275 - Axiomatic Systems

Introduction to logic and mathematical proof with a focus on properties of the real number system. Elementary set theory, relations, functions, cardinality, algebraic and completeness properties of the reals and topics from axiomatic systems. Precision in the language of mathematics and rigor in proofs. Student presentations.

Credit Hours: 3

Prerequisite Courses: MAT 152 or MAT 161
Course Repeatability: Course may not be repeated.

MAT 335 - Linear Algebra and Matrices

Systems of linear equations, vector spaces, algebra of matrices and linear transformations, determinants, eigenvalues and eigenvectors, applications.

Credit Hours: 3

Prerequisite Courses: MAT 161
Course Repeatability: Course may not be repeated.

At least 6 hours must be from coursework at the 300 or 400 level.

Total: 20 hours in mathematics and statistics

Additional Information:

An overall quality point average of "C" (2.00) or better is required for all courses counted toward the minor, and a grade of "C-" or better is required for each mathematics or statistics course used to fulfill the requirements of the minor.

Medical Humanities Minor

Admission Requirements

Current UNCW Undergraduate Students

- SeeUniversity Admission Requirements

Requirements for the Minor in Medical Humanities

Core Courses (7 Credit Hours)

HST 120 - Medical Humanities

Introduction to the various disciplines, methods, and perspectives of medical and health humanities.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

ANT 346 - Medical Anthropology

Investigation of systems of medical knowledge and healthcare; representations of health and illness; interactions between environmental, biological, and social factors that shape risk in vulnerable communities; and encounters between Western biomedicine and non-Western healing traditions. Emphasis on applied anthropology in global health

settings.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 215 - Medical Ethics: Life and Death Decisions in Health Care

Examination of the principles and problems in the application of ethical theory to medical research and practice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

Elective Courses (12 Credit Hours)

Students are required to take at least 3 credits from each of the following three designations: 1) Historical and Literary Perspectives 2) Diversity and Bio-cultural Perspectives, and 3) Psychosocial Dimensions of Health and Caregiving. An additional 3 credits must be

chosen from any of the categories. Other courses that have relevant themes, particularly rotating or special topics courses such as HON 210 and department seminars, can be counted with approval from the director of the minor. At least 6 hours need to come from 300/400 level classes.

Historical and Literary Perspectives

Choose at least one course from the following:

ENG 234 - Literature and Medicine

Study of a broad range of literature from multiple periods, genres, and traditions, examining the representation of illness, health, disability, patients, trauma, and healing, among other topics related to the medical humanities.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor.
University Studies: Approaches and Perspectives: Aesthetic, Interpretive, and Literacy Perspectives, Building Competencies/Writing Intensive

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

HST 111 - History of Science I: Antiquity to the Scientific Revolution

History of science from antiquity (ancient Babylon and Greece) to the 17th century. Topics include the rise of natural philosophy in Greece, medieval universities, Copernicus and the 16th century revolution in astronomy, Renaissance medicine and anatomy, and Isaac Newton's mathematical study of gravitation.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 112 - History of Science II: Modern Science

Growth and development of modern science. Topics include Darwin's theory of evolution, Einstein's special and general relativity, quantum mechanics, wartime science, the discovery of DNA, and the impact of science and technology on modern society.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 119 - History of Medicine

Survey of the history of medicine that covers the major intellectual, social, and cultural contexts foundational for our modern understanding of health and health

care.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Diversity and Bio-cultural Perspectives

Choose at least one course from the following:

ANT 303 - Culture and Gender

A cross-cultural study of gender in a selection of societies from African, American Indian, Asian, and Central and South American cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 324 - Human Biological Variation

Nature and extent of heritable differences among human populations in evolutionary perspective.

Consideration of effects of environmental factors on genic expression.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy, Building Competencies/Information Literacy, Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ANT 325 - Human Growth and Development

Human growth and development from an evolutionary perspective. Topics to be addressed include differences and similarities in primate life histories, uniqueness of particular human life history traits, and the evolution of human development as traced through the fossil record. Relationships among growth, development, and health will be explored.

Credit Hours: 3

Prerequisite Courses: ANT 210
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists, students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 460 - Poverty and Health: Critical Medical Anthropology Perspectives

Seminar survey of applied medical anthropology research on the health effects of extreme poverty. Through in-depth explorations of anthropologists working in public health settings around the world, students learn methods, theory, and critical issues of this subfield. Example target populations include farmworkers, immigrants, the homeless, refugees, and the working poor.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PAR 364 - Religious Views of Death and Dying

Views of death and dying from a variety of religious traditions including Hinduism, Buddhism, Judaism, Christianity, Islam, and Sikhism. For each tradition, we will consider the following questions: How do they understand the nature of death? do they ascribe meaning and value to death? Do they ascribe meaning and value to the death? Do they recommend a particular religious practice at the moment of death?

What funeral rituals are advocated within their tradition?

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PBH 105 - Explorations in Public Health

Please enter a description. General introduction to public health and how it interfaces with science and politics. Addresses the connectivity of public health and healthcare. The 3 P's of public health: prevent, protect and promote, and the roles of personal and social determinants of health are covered utilizing current public health events and initiatives. Partially satisfies University Studies II: Approaches and Perspectives/Understanding Human Institutions and Behaviors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PBH 290 - Foundations of Public Health

An overview of the public health profession with emphasis on the foundations of public health such as definitions, history, philosophy, ethics, evidence-based principles, and determinants of health.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

WGS 212 - Sexuality and Gender

Theoretical and cultural contexts and complexities of sexuality as they relate to the dominant culture. Intersections of race, class, gender and sexual orientation will be examined in relation to the formation of sexual identity and the contradictions of institutionalized norms and standards.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Psychosocial Dimensions of Health and Caregiving

Choose at least one course from the following:

ECN 327 - Health Economics

Analysis of health-care delivery using economic reasoning. Specific topics include the demand for health, medical care, and insurance; socio-economic patterns in health-related behaviors and outcomes; physician and hospital services; private and public financing of care; regulation of the health-care marketplace; and medical innovation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Course Repeatability: Course may not be repeated.

PSY 257 - Evolutionary Psychology

Consideration of the evolution and adaptive significance of behavior in humans, including such

topics as mate selection, parental care, cognition, language, altruism, aggression, warfare, and creativity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PSY 271 - Psychology of Human Diversity

The contribution of psychology to the understanding of diversity in our society. Biopsychosocial aspects of diversity and methods of increasing understanding and inclusiveness will be emphasized. The psychological nature of stereotyping, discrimination, and prejudice will be examined.

Credit Hours: 3

Prerequisite Courses: PSY 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 352 - Health Psychology

Integrates psychological and biomedical knowledge relevant to physical health and illness. The interaction of psychological phenomena with the epidemiology, etiology, pathogenesis, treatment, and rehabilitation of physical disorders.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 220 - Sociology of Death and Dying

Examination of the sociological dimensions of death in modern society. The social organizational and cultural dimensions of death will be considered in terms of rites of passage, bureaucratization, social movements, cultural differences, and historical and contemporary contexts.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 337 - Medical Sociology

A sociocultural analysis of the general area of health and illness. Emphasis is given to understanding the distribution of health and illness in the United States and its impact on the patient status. The course includes a discussion of the organization and use of health care services from a sociological perspective.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

COM 226 - Health Communication

Application of communication theory and principles to context of health communication, including

intrapersonal and interpersonal health across the lifespan, and how politics, institutions, and culture inform and constrain health communication choices.

Credit Hours: 3

Prerequisite Courses: COM 105 with a minimum grade of B
Additional Restrictions/Requirements: Restricted to PCOM and COM majors.
Course Repeatability: Course may not be repeated.

Total Credit Hours: 19

Additional Information:

A "C" (2.00) average is required of all courses counted toward the minor. Students should contact the coordinator for a list of current designated courses.

Middle East and Islamic Studies Minor

The Middle East and Islamic Studies Minor offers courses in the civilizations, histories, languages, religions, geographies, politics, and literatures of the Middle East. Students take an interdisciplinary approach to the cultures of this region, which has had

an important impact on the development of our civilization and plays a vital role in today's world community. The minor's course offerings treat the Middle East from ancient times to the modern period and emphasize methods of historical and interdisciplinary analysis. MEIS minors are expected to reach an intermediate level of proficiency in Arabic, which is the most widely spoken language in the region and the liturgical language of Islam. The minor requires a total of 21 credit hours. All students must complete six credit hours consisting of ARB 101 and ARB 102, then select six additional credit hours from the list of additional core courses, with each course in a different discipline. The remainder of the credit hours should be selected from the designated electives. Students must have a least a "C+" (2.33) average in courses counted toward the minor, and at least two courses counted toward the minor must be at or above the 300-level.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Middle East and Islamic Studies

Core Courses (6 Credit Hours)

All core courses in the below list must be completed for the minor (6 credit hours).

ARB 101 - Introductory Arabic I

Emphasis on achievement of an active command of the language. Aural-oral practice; intensive study of the basic patterns of spoken Arabic; reading, writing, and basic conversation. For students with one unit or less of high school Arabic.

Credit Hours: 3

University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

ARB 102 - Introductory Arabic II

Emphasis on achievement of an active command of the language. Aural-oral practice; intensive study of the basic patterns of spoken Arabic; reading, writing, and basic conversation. Only for students who have

successfully completed ARB 101or the equivalent.

Credit Hours: 3

Prerequisite Courses: ARB 101
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

Second Core Courses (6 Credit Hours)

At least two additional core courses from the below list, each from a different discipline, must be completed for the minor (6 credit hours).

INT 352 - The Contemporary Middle East

Examination of the political, social, and economic history and issues of the modern Middle East.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years

ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 382 - History of Modern Middle East

An examination of the major developments in the history of the Modern Middle East. The course may be repeated for credit under different subtitles including Women and Gender in the Middle East, the Middle East since 1914, and Palestine and Israel.

Prerequisite Courses: Any history class.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

PAR 375 - Islam

Introduction to religious beliefs, rituals and traditions of Islam. Examination of its historical background and contemporary significance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

Elective credits from the list below count toward the remainder of the required 21 credit hours for the minor. Students may petition to include courses not on this list -- including Directed Independent Study and special topics courses -- as long as they incorporate significant Middle East-related content.

ARB 201 - Intermediate Arabic I

A review of the grammatical structure of the language. Application of the language in composition, conversation, and readings.

Credit Hours: 3

Prerequisite Courses: ARB 102
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

ARB 202 - Intermediate Arabic II

A continuing review of the grammatical structure of Arabic at the intermediate level. Application of the language in composition, conversation and readings.

Credit Hours: 3

Prerequisite Courses: ARB 201
University Studies: Foundations/Foreign Language
Course Repeatability: Course may not be repeated.

ARB 294 - Arabic Study Abroad I

Lower-division level of special topics relating to the Arabic-speaking world taken abroad from UNCW faculty or as a transfer credit.

Credit Hours: 1 To 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

ARH 300 - Egyptian Art

A study of the art and culture of ancient Egypt, from 3000 BC to the third century BC. Emphasis on architecture, sculpture, and painting as related to Egyptian history, culture, and religion.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204 or consent of instructor.
Course Repeatability: Course may not be repeated.

ARH 321 - Art and Archaeology of the Ancient Near East

Study of art and archaeology as well as the history of Ancient Near East (Mesopotamia, Syria, Turkey, Iran) beginning with state formation in the 4th millennium BCE and ending with the Persian Empire in the 4th century BCE.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

ARH 325 - Islamic Art

Study of the art and architecture of the Islamic world from the 7th century to the 17th century. Emphasis on

architecture, painting, and metal arts as related to the history and culture of Muslim peoples. Special attention is focused on intersection and exchange between Islam and the west.

Credit Hours: 3

Prerequisite Courses: ARH 201 or ARH 202 or ARH 204
Additional Restrictions/Requirements: Consent of Instructor can be given in place of prerequisites.
Course Repeatability: Course may not be repeated.

HST 113 - The Jews: From the Bible to the Inquisition

Survey of Jewish history from antiquity to 1492, with particular attention to the Jewish encounter with the Roman, Islamic, and European civilizations.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 114 - The Jews: From the Inquisition to Israel

Survey of Jewish history from the expulsion of the Jews from Spain to the modern era. Examination of how the different Jewish communities worldwide have met the challenges of a modernizing world. Topics include emancipation, religious reform and secularization, mass migrations, anti-Semitism, the Holocaust, and the founding of modern Israel. 3

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

HST 305 - The Ancient Near East

An intensive political and cultural study of ancient Babylonian, Egyptian, and other Near Eastern civilizations.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST

course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 381 - History of Premodern Middle East

Exploration of themes in the political, social, economic, military, diplomatic, and cultural history of the Middle East and the impact of the West from 1700 to World War I. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

HST 385 - Special Topics in Jewish History

Examination of themes in the history, religion, and culture of the Jewish people from antiquity to the present, including the Jews in the modern world, Zionism and Israel, Anti-Semitism and the Holocaust. Course may be repeated for credit under different subtitles.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 3

INT 350 - Topics in the Middle East

Intensive study of a selected topic or theme about the Middle East. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 351 - The Contemporary Persian Gulf

Examination of the political, social, and economic history and issues of the Persian/Arabian Gulf in the 19th, 20th, and 21st centuries.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

INT 353 - Modern Iraq

Examination of the political, social, and economic history and various regional issues concerning the nation-state of Iraq and how it relates to the Middle East region at-large in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 361 - Ethnic Conflicts and Territorial Disputes

Examination of modern territorial disputes and ethnic conflicts in Asia, Europe, Africa and the Middle East in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 235 - Introduction to the Old Testament

Historical study of the Hebrew Scriptures and their cultural background; focus on the values, problems, and perceptions of the human condition reflected in these texts and archaeological data related to them.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 362 - Archaeology of Ancient Israel

Study of Ancient Israel, its peoples and cultures through archaeological artifacts and analysis of ancient writings.

Credit Hours: 3

Prerequisite Courses: PAR 103 or PAR 235
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building

Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 376 - Judaism

Introduction to religious beliefs, rituals and traditions of Judaism. Examination of its historical background and contemporary significance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

Total Credit Hours: 21

Additional Information

Students must have a least a "C+" (2.33) average in courses counted toward the minor, and at least two courses counted toward the minor must be at or above the 300-level.

Music Minor

The minor in Music provides students with foundational courses in music theory, aural skills, and music history; performance experience through applied lessons and ensembles; and the opportunity to explore their interests further through their choice of music electives.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Music

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 112 - Theory II

A study of tonality, triads in inversion, phrase structure and cadences, harmonic progression, the technique of harmonization, and non-harmonic tones. The lab for this course is MUSL 112.

Credit Hours: 2

Corequisite Courses: ["MUSL 112"]
Prerequisite Courses: MUS 111 with a minimum grade of C-
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

MUSL 112 - Aural Skills and Sight-Singing II

Includes melodic, harmonic, and rhythmic dictation, and sight-singing using the materials introduced in MUS 112. This course is the lab for MUS 112.

Credit Hours: 1

Corequisite Courses: ["MUS 112"]
Prerequisite Courses: MUSL 111
Course Repeatability: Course may not be repeated.

MUS 150 - Introduction to Music Listening

Guided listening to representative works from Western classical, jazz, popular, and global music traditions. Development of ability to describe elements of compositions and style using basic musical vocabulary. Concert attendance required in addition to the regular class meeting time.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

And one course from:

MUS 351 - Introduction to Music History I: Middle ages - Classical Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Middle Ages, Renaissance, Baroque and Classical periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MUS 352 - Introduction to Music History II: Romantic-Contemporary Periods

Overview of music history and literature, stressing the stylistic developments of music and related social and historical events of the Romantic and Contemporary periods.

Credit Hours: 3

Prerequisite Courses: MUS 150
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Ensemble Courses (4 Credit Hours)

MUS 183 - Chamber Singers

Select group chosen by audition. The singers study and perform a variety of repertoire written for a smaller choir or chamber group. Three rehearsal hours per week.

May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

MUS 184 - Jazz Ensemble

The development of idiomatic performance techniques of jazz music in a variety of styles and mediums through the study of its musicians, as well as performance practices throughout its history. (Intended for students who have had instrumental experience.) May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of instructor.

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 185 - Symphonic Band

The Symphonic Band is an outstanding ensemble consisting of highly talented woodwind, brass and percussion players, including both music majors and non-music majors. Enrollment is open to all UNCW students with previous instrumental experience and the necessary skills to perform on a wind or percussion instrument. Three rehearsal hours per week and typically two concerts each semester. May be repeated for credit.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 186 - University Chorale

Singers study and perform repertoire of various historical periods and styles appropriate for large chorus. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Auditions and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

MUS 187 - Orchestra

Study and performance of the orchestral literature; meets a minimum of two hours per week and gives two or three performances per semester. Section 001 is the Wilmington Symphony Orchestra, membership by audition only; Section 002 is the UNCW String

Ensemble, open to UNCW students without audition. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Students may substitute 1 hour of MUS 130 Chamber Music Workshop for one ensemble hour.

Applied Lessons (4 Credit Hours)

MUS 195 - Lower Level Applied Music, Private Lessons

Includes one half-hour private lesson per week and a minimum of one MUS LAB/seminar hour each week. Requires a minimum of five practice hours per week. Intended for BA music majors or music minors. May be repeated for credit.

Credit Hours: 1

Corequisite Courses: ["MUS LAB"]
Additional Restrictions/Requirements: Corequisite course, audition, consent of Music Department chair and instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Music Electives (5 Credit Hours)

These may include additional ensembles or applied lessons. Of the five elective hours, 3 must be from the 300 or 400 level.

Total Credit Hours: 23

Additional Information

A minimum final grade of "C-" is required in each music course and an overall GPA of "C" (2.00) or better is required in courses counted toward the minor. Admission to the program requires approval by the Department of Music and an audition in the major performance medium.

Musical Theatre Minor

The interdisciplinary minor in Musical Theatre is offered to students in all majors seeking to enhance their degree with an added focus in the discipline of musical theatre. All students take core coursework in applied voice, dance and movement, scene study and production workshops, and musical theatre history and literature; non-theatre majors take foundational acting courses and non-music majors take foundational courses in musicianship and class voice. For additional information, students should contact the coordinator in the Department of Music.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Musical Theatre

Applied Voice Lessons (3 Credit Hours)

Required for all students:

> Three credit hour of applied voice lessons (either MUS 195 or MUS 196)

MUS 195 - Lower Level Applied Music, Private Lessons

Includes one half-hour private lesson per week and a minimum of one MUS LAB/seminar hour each week. Requires a minimum of five practice hours per week. Intended for BA music majors or music minors. May be repeated for credit.

Credit Hours: 1

Corequisite Courses: ["MUS LAB"]
Additional Restrictions/Requirements: Corequisite course, audition, consent of Music Department chair and instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 196 - Lower Level Applied Music, Private Lessons

Corequisite: MUS LAB (appropriate section). Includes one-hour private lesson per week (TBA) and a minimum of one MUS LAB/seminar hours each week. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition; consent of music department chair and instructor. This course is intended for music majors only.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Performance Techniques and Workshops (3 Credit Hours)

Required for all students:

MUS 334 - Musical Theatre Performance Techniques

Overview of the musical basic skills and performance techniques necessary to successfully perform musical theatre.

Credit Hours: 1

Course Repeatability: Course may not be repeated.
Minor Restriction Musical Theatre

Two credit hours of Musical Theatre Workshop:

MUS 335 - Musical Theatre Workshop

Musical preparation and staging of musical theatre scenes through dramatic interpretation and body movement. Three rehearsal hours per week. May be repeated for credit.

Credit Hours: 1

Prerequisite Courses: MUS 334.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 3
Minor Restriction Musical Theatre

History and Literature (3 Credit Hours)

Required for all students:

MUS 341 - American Musical Theatre

History and interpretation of American musical theatre from a variety of perspectives, including musical style, the role of dance, film realizations, cultural critique, racial and ethnic identity, and politics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

Dance (6 Credit Hours)

Required for all students:

THR 237 - THR 237 - Musical Theatre Dance - Sorensen

Development of body awareness in dance practice and performance utilizing traditional and contemporary musical theatre styles.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

And choose one of the following:

THR 134 - Ballet I

Basic and comprehensive Ballet Technique at a beginning level. Accumulative credit limited to six semester hours.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 135 - Modern Dance I

A beginning level modern dance class focusing on dance as an art form. Provides students with the opportunity to explore modern dance technique through floor work, center floor work, combinations moving through space, and strength and flexibility training.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

THR 136 - Movement Exploration

Study through creative dance techniques of the body's potential as a tool for creative expression. Exploration of the relationship of dance to other art forms. Solo and group work using basic art concepts and the individual's own experience as materials for movement

improvisation and composition. No dance training necessary.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Crosslisting: PED 136
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Non-Theatre Majors: Acting (6 Credit Hours)

Required for non-theatre majors:

THR 231 - Craft of Acting I - Self-discovery and Truth - Fundamental Techniques of Acting

Introductory level acting studio focused on the process of approaching a role. Script reading and analysis from the actor's perspective with specific attention given to circumstances and the world of the play. Concludes with the performance of a scene from a play. No prior acting experience required.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction Theatre Majors Only

THR 332 - Craft of Acting II - Listening and Responding in the Moment

Study of acting techniques based on methodologies including those of Stanislavsky, Meisner, Donellan, and Hagen. In-depth exploration of contemporary realism and comedy scene study.

Credit Hours: 3

Prerequisite Courses: THR 230 (grade of B or better) or THR 231 (grade of B or better), or consent of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction Theatre Major

Non-Music Majors: Musicianship and Class Voice (3 Credit Hours)

Required for non-music majors:

MUS 145 - Musicianship for Musical Theatre

Note-reading and basic keyboard skills for non-music majors in the Musical Theatre minor, with a focus on improving students' ability to efficiently learn and prepare musical theatre scores. Other topics include improvement of the singing voice through the study of vocal technique, repertoire, diction, and performance skills.

Credit Hours: 2

Course Repeatability: Course may not be repeated.
Minor Restriction Musical Theatre

> Non-music majors may pass out of MUS 145 by demonstrating equivalent proficiency on the Department of Music's music theory placement exam. If MUS 145 is waived, take at least 2 credit hours of electives in music or dance.

MUS 146 - Class Voice I

Intended for beginning singers and non-majors. Singing techniques learned through vocal exercises and study of song literature.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Repeat Limit: 2

MUS 146 prepares the non-music major for private lessons in applied voice. Non-music majors who successfully audition into MUS 195 or MUS 196 upon entry to the Musical Theatre minor may have MUS 146 waived. If MUS 146 is waived, take 1 additional credit hour of MUS 195 or MUS 196 beyond the required 3 credit hours, for a total of 4 credit hours of private applied voice lessons.

Total Credit Hours: 21-24

Native American Studies Minor

The College of Humanities, Social Sciences, and the Arts offers an interdisciplinary minor in Native American studies (NAS). This minor provides students with a multicultural understanding of the histories, cultures, religions, arts, and literatures of American Indians. Students should contact the coordinator in the Department of English for additional information.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Native American Studies

Core Courses (9 Credit Hours)

HST 336 - American Indian History to 1900

North American Indian cultures and history from the pre-Columbian era to the end of the nineteenth century. Topics include Indian social, political, and economic life, religion and worldview, and gender roles; European and American interaction; development of federal Indian policy and the Indian response; status of Indians in contemporary America.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 337 - American Indian History after 1900

North American Indian history from 1885 to the present. Topics include Indian life on, off, and after the reservations; various late 19th and 20th century federal Indian policies and the Indians' response; and how Indians have survived into the modern era.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of the instructor.
Course Repeatability: Course may not be repeated.

ENG 356 - Indigenous American Literature

Study of past and present literatures of various Indigenous peoples of the Americas. May include oral traditions, tales, poetry, fiction, drama, and song, as well as more recent engagements with digital and electronic media.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 103 or ENG 201, or consent of instructor. ENG

205 is strongly recommended.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ANT 304 - Domestication: Dogs, Cats, and Barley

Anthropological survey of the origins and relationships between domesticated animals and plants using archaeological, cultural, and biological sources, with a focus on the essential roles domesticates have played in the formation of societies and cultures.

Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

9 additional credits from

ANT 304 - Domestication: Dogs, Cats, and Barley

Anthropological survey of the origins and relationships between domesticated animals and plants using archaeological, cultural, and biological sources, with a focus on the essential roles domesticates have played

in the formation of societies and cultures.

Course Repeatability: Course may not be repeated.

ANT 307 - Archaeology of the Americas

Exploration of the peopling of the Americas and various New World indigenous groups, with an emphasis on chiefdom and state level societies. Archaeological, ethnohistorical, and epicgraphic evidence is used to study the Aztec and Maya of Mesoamerica, the Mississippians and Puebloan Indians of North America, and Andean civilizations of South America.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 336 - American Indian History to 1900

North American Indian cultures and history from the pre-Columbian era to the end of the nineteenth century. Topics include Indian social, political, and economic life, religion and worldview, and gender roles; European and American interaction; development of federal Indian policy and the Indian response; status of Indians

in contemporary America.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 250 - North Carolina Indians

North Carolina Indian history from pre-Columbian times to present day. Topics include identity of North Carolina Indians; social, religious, political, and economic life; gender roles; European and American interaction; development of state and federal policy and Indian response; status of Indians in contemporary North Carolina and United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

HST 337 - American Indian History after 1900

North American Indian history from 1885 to the present. Topics include Indian life on, off, and after the reservations; various late 19th and 20th century federal Indian policies and the Indians' response; and how Indians have survived into the modern era.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of the instructor.
Course Repeatability: Course may not be repeated.

PAR 350 - Native American Religions

Study of Native American Religions before and after Euro-American colonization by focusing on the importance of land, spirits, stories, rituals, and objects, as well as indigenous responses to Christianity, new religious movements, politics, and gender. Introduces students to the study of Native American Religions using a material culture research method.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

- any appropriate special topics course or seminar as offered, with the approval of the NAS minor coordinator.

Total Credit Hours: 18

Additional Information

Students must earn at least a "C" (2.00) average in courses counted for a minor in Native American studies.

Neuroscience Minor

The interdisciplinary minor in Neuroscience provides students with the opportunity to develop an understanding of the fundamentals of this emerging field which brings together the study of brain behavior and cognition. The curriculum is designed to reflect the interdisciplinary nature of the science through coursework from several different departments and to allow students to master the fundamentals of the field using both traditional classroom and applied learning venues. Students should contact one of the Neuroscience Minor coordinators for more information.

Requirements for a Minor in Neuroscience:

All students must complete five required core courses (14 hours). An additional 9 credit hours of electives selected from the list below are required to complete the minor. At least nine hours must come from courses outside the student's major (including major requirements outside the discipline - e.g., CHM 101 and CHM 102 for BIO or CHM majors and BIO 201 for PSY majors).

Required Core Courses:

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BIO 201 - Principles of Biology: Cells

Introduction to principles governing living systems, especially the cellular and molecular basis of life and the transmission and utilization of genetic information. The lab for this course is BIOL 201.

Credit Hours: 3

Prerequisite or Corequisite Courses: BIOL 201
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PSY 256 - PSY 256 - Brain and Behavior - Hungerford

An introductory survey of the functional anatomy of the nervous system and the roles which various neural systems play in normal and abnormal behavior.

Credit Hours: 3

Prerequisite Courses: PSY 105 and (BIO 105, BIO 140+BIOL 140, BIO 201, BIO 202, or BIO 240+BIOL

240)
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 443 - Neurobiology

General concepts of cellular neuronal signaling and circuit connectivity with an emphasis on how simple neuronal circuits produce behavior and behavioral variability.

Credit Hours: 3

Prerequisite Courses: BIO 240 or BIO 345 or PSY 256
Course Repeatability: Course may not be repeated.

PSY 456 - Advanced Biological Psychology

Advanced anatomy of the nervous system and the roles that various neural structures play in the control of behavior.

Credit Hours: 3

Prerequisite Courses: PSY 256 and (BIO 105 or BIO 201)
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor. Students may not take this course if they have received credit for PSY 459.
Course Repeatability: Course may not be repeated.

BIO 495 - Seminar

Individual reports and group discussions of the results of student field, laboratory and/or library research on selected topics in biology. The lab for this course is BIOL 495.

Credit Hours: 1

Additional Restrictions/Requirements: Senior Standing.
University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 2 **Repeat Limit:** 1

PSY 495 - Topical Seminar

Discussion of selected topics in psychology. May be repeated for additional credit.

Credit Hours: 1 To 3

Prerequisite Courses: PSY 105
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

specific neuroscience topical seminar approved by minor coordinator.

Electives:

At least nine credit hours from any of the following with at least 3 credits from 400 level courses:

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular

emphasis on maintenance of an internal steady state. Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 368 - Behavioral Ecology

Evolutionary approach focusing on both proximate and ultimate causes of behavior. Feeding and antipredatory behavior, habitat selection, territoriality, reproductive behavior, mating systems, parental care, animal communication, and the evolution of social behavior. Emphasis on birds, mammals, and fish.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and BIO 366
Course Repeatability: Course may not be repeated.

BIO 440 - Developmental Biology

Concepts of mechanism and control during animal embryology and organ morphogenesis. Topics include chemical signals and signal transduction, different gene expression, and the techniques used to study them. Current primary research literature is stressed. The lab for this course is BIOL 440.

Credit Hours: 3

Prerequisite Courses: BIO 335
Course Repeatability: Course may not be repeated.

BIO 443 - Neurobiology

General concepts of cellular neuronal signaling and circuit connectivity with an emphasis on how simple neuronal circuits produce behavior and behavioral variability.

Credit Hours: 3

Prerequisite Courses: BIO 240 or BIO 345 or PSY 256
Course Repeatability: Course may not be repeated.

BIO 459 - Endocrinology: Hormone Biology

Study of classic hormonal regulation with up-to-date perspective on all forms of chemical communication in animals. Concepts covered with support from research literature, including effects of mutations and endocrine disruption on health. Applicable to human medicine, veterinary medicine, and basic research. Training to find, read, and use research literature provided.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Course Repeatability: Course may not be repeated.

BIO 484 - Methods in Biological Research

Introduction to experimental design, data acquisition, statistical analysis, and preparation of manuscripts and presentations. Emphasis on multi-disciplinary approaches to hypothesis testing. Participation in a collaborative research project.

Credit Hours: 1 To 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

CHM 101 - General Chemistry I

Overview of the fundamental laws, principles and theories of chemistry. A 'C' or better in CHM 101 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHML 101 - General Chemistry Laboratory I

Introduction to general chemistry laboratory techniques. This course is the lab companion course for general chemistry lecture CHM 101.

Credit Hours: 1

Corequisite Courses: CHM 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

CHM 102 - General Chemistry II

Study of the fundamental laws, principles and theories of chemistry. Introduction to inorganic chemistry. Interpretation of experimental results. A 'C' or better in

CHM 102 is required to take certain advanced courses in chemistry.

Credit Hours: 3

Corequisite Courses: CHML 102.
Prerequisite Courses: CHM 101 and CHML 101.
Course Repeatability: Course may not be repeated.

CHML 102 - General Chemistry Laboratory II

Introduction to techniques and equipment used in the chemical laboratory. Interpretation of experimental results. This course is the lab for CHM 102 .

Credit Hours: 1

Corequisite Courses: CHM 102.
Prerequisite Courses: CHML 101, CHM 101.
Course Repeatability: Course may not be repeated.

PAR 320 - Philosophy of Mind

Selected readings drawn from classical and/or contemporary sources bearing on problems of the self, such as the issue of personal identity and the concept

of a person, the problem of the relation of mind and body and the question of the nature of consciousness.

Credit Hours: 3

Prerequisite Courses: PAR 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PSY 245 - Drugs and Behavior

Psychological aspects of drug use and abuse. Emphasis on the effects of major psychoactive drugs (including alcohol) on behavior, the psychological determinants of drug use, and treatment of drug abuse.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 356 - Motivation and Emotion

Psychological theory and research in the areas of motivation and emotion. Basic as well as more complex

motive states are examined as they arise from physiological needs and from learning and cognitive processes. Data from animal as well as human studies are considered.

Credit Hours: 3

Prerequisite Courses: PSY 256
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 456 - Advanced Biological Psychology

Advanced anatomy of the nervous system and the roles that various neural structures play in the control of behavior.

Credit Hours: 3

Prerequisite Courses: PSY 256 and (BIO 105 or BIO 201)
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor. Students may not take this course if they have received credit for PSY

459.
Course Repeatability: Course may not be repeated.

PSY 457 - Animal Behavior

Animal behavior including the traditional areas of ethology and comparative psychology. Primary emphasis is upon the similarities and differences in the behaviors of animals occupying various phylogenetic positions.

Credit Hours: 3

Prerequisite Courses: PSY 256 or PSY 257 or BIO 105 or BIO 202
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

BIO 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. No more than 6 credits total may be applied to the major. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PSY 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2

BIO 499 - Honors Work in Biology

Independent study for honor students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

PSY 499 - Honors Work in Psychology

Independent work for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior standing and eligibility for honors program.
University Studies: Explorations Beyond the Classroom

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

neuroscience related research experience approved by minor coordinator.*

*Note that only Directed Individual Study or Honors (PSY 491 or BIO 491 or PSY 499 or BIO 499) experiences that involve research experience related to neuroscience can be applied to the minor.

Total: 23 hours

Nonprofit Management and Leadership Minor

The College of Humanities, Social Sciences, and the Arts offers a Nonprofit Management and Leadership Minor designed to explain the special legal and financial circumstances under which NPOs operate and their relationship with their communities. The minor explains how NPOs must use principles and practices derived from the private sector to make optimal use of financial and human services, including volunteers. The minor demonstrates the importance of NPOs in creating and sustaining inclusive, productive, and democratic civil society.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for the Nonprofit Management and Leadership Minor

The minor requires 18 hours of course work, including 9 hours of core courses and 9 hours of Nonprofit Management and Leadership electives. For successful completion of the minor students must take 9 or more hours outside their major.

Core Courses (9 Credit Hours)

Choose three of the following courses:

PLS 308 - Public Administration

Introduction to public administration in the United States. Nature and scope of public administration, public interest in the administrative process, role of administrators, formal and informal organization, public personnel and financial management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 362 - Leading and Managing Volunteers

Addresses major issues in the leadership and management of volunteers in the nonprofit and public sectors. Focuses on the two main types of volunteers: service volunteers, and policy volunteers (board members). Topics covered include volunteer recruitment, screening, job design, supervision, recognition, and evaluation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 434 - Nonprofit Leadership Experience

An engaged learning experience where students learn about nonprofit organizations, acquire useful employment skills and apply them in projects designed

by nonprofit organizations in conjunction with the instructor. Students will complete projects developed and needed by nonprofit organizations in the community; and students will meet and interact with members of the UNCW and nonprofit community.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: PLS 534
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Elective Courses (9 Credit Hours)

COM 220 - Interpersonal Communication

Introduction to the theory and practice of relational communication in face-to-face and social media situations and contexts. Focus is on improving interpersonal communication skills through understanding verbal, nonverbal, and relational processes.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

COM 223 - Mediation and Conflict Management

Introduction to the principles of conflict management and alternative dispute resolution with an emphasis on mediation and conflict theory. Other topics include negotiation, arbitration and litigation.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 105.
Course Repeatability: Course may not be repeated.

COM 231 - Essentials of Integrated Marketing Communication

Exploration of advertising, public relations, promotions, events and experiential marketing, word-of-mouth marketing, and social media campaigns through an IMC framework. The IMC approach considers audience, research, messages, ethics, and the current

cultural environment to provide the foundations of sound practice. Students also explore careers in this area and how those careers shape our world.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction IMC Certificate

COM 272 - Introduction to Organizational Communication

Study of organizations and virtual organizations as systems created and sustained by communication processes. Topics include organizational analysis and development, diversity, leadership, culture, HR and issues relevant to the global and international marketplace.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM

COM 334 - Integrated Marketing Communication: Message Design

Focuses on design, construction, and analysis of persuasive strategic messages in integrated marketing communication (IMC) contexts using communication and rhetorical theory. Types of messages include written, verbal, and multimedia.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 232
Prerequisite Courses: COM 231
Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction COM or Integrated Marketing Communication Certificate

COM 378 - Business and Professional Communication

Develop and refine communication skills in business environments and other professional settings. Topics include written correspondence, selection and use of communication technologies, delivery of mediated

messages, and the design and delivery of professional presentations.

Credit Hours: 3

Prerequisite Courses: COM 101.
Additional Restrictions/Requirements: COM majors or Entrepreneurship minors, or permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors Only**Minor Restriction** Entrepreneurship

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental

entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EBD 281 - Creativity and Innovation

Primary focus on the processes for fostering creativity and innovation. Emphasis on the creative process, creative problem solving, and intrapreneurship. Particular attention directed to the development of new products, services, processes, and business models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EBD 301 - Entrepreneurial Finance for Non-Business Majors

Course provides students with the knowledge and skills necessary to manage cash as well as manage the

necessary records in a small business. Topics include: calculating startup costs, running a monthly, quarterly and annual budget for a business, understanding the different sources of capital and how to obtain them, projecting income and what investors, lenders and grant organizations look for in an entrepreneurial venture. SBIR/STTR funding, financial analysis and record-keeping necessary to comply with federal, state, and local tax law are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 302 - Managing & Marketing for Entrepreneurs

Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Students will also learn successful exit strategies for a business. Leadership, management, positioning, legal strategies, sales strategies, and scaling strategy are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course

is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

EBD 480 - Managing Emerging Ventures

Examination of the strategies for successful venture growth. Emphasis is placed on the challenges associated with maintaining a high rate of growth in relatively new firms. Particular attention directed to integrating strategic, operational and cultural issues. Students develop business plans for a new venture or business development. Extensive use of case analysis.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 380.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EBD 481 - Entrepreneurial Finance and Valuation

Focus on financial planning and analysis, sources of funding, and business valuation. Particular attention directed to debt financing, valuation theory and techniques, due diligence, angel investing, venture

capital funding, and public/private offerings. Extensive use of case study.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 380.
Prerequisite Courses: FIN 335.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic perspective. Specific focus will be given to methods for

non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

ECN 327 - Health Economics

Analysis of health-care delivery using economic reasoning. Specific topics include the demand for health, medical care, and insurance; socio-economic patterns in health-related behaviors and outcomes; physician and hospital services; private and public financing of care; regulation of the health-care marketplace; and medical innovation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Course Repeatability: Course may not be repeated.

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ECN 329 - Industrial Organization and Public Policy

A theoretical and empirical study of how the structure of industry affects the conduct and performance of the firm; balanced coverage of public policy as it affects structure, conduct and performance.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

ECN 428 - Applied Regional Analysis

Theoretical and applied analysis of patterns and trends in local, state, and regional economic growth. Use of current computer-based methods in regional economic analysis including economic impact models. Applied analysis of current regional issues and government policies to address these issues.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health,

nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 313 - Writing About Science, Medicine, and the Environment

Exploration of scientific discourse focusing on analyzing scientific texts and rewriting scientific and

technical information for a variety of audiences. Includes the development of relevant research skills.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 318 - Writing and Activism

Study of visual and textual elements of documents generated in the service of activist causes. Themes may include propaganda, grassroots and electronic activism, and the negotiation of power.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 412 - Writing in Intercultural and Global Contexts

Develops competency in writing within intercultural and global contexts. Focuses on developing critical perspective about cultural concepts and theories in the context of globalization through broader frameworks of discourse, commodities, space, and labor in everyday life.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Approaches and Perspectives/Living in a

Global Society
Course Repeatability: Course may not be repeated.

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 360 - Human Dimensions of Natural Resource Management

Examines the interrelationships between the biological sciences, physical sciences, and social sciences within the human dimensions of natural resource management framework in the context of current environmental issues. Uses contemporary management processes to solve real-world environmental problems.

Credit Hours: 3

Prerequisite Courses: EVS 195
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

EVS 361 - History and Philosophy of Natural Resources Management

Development of natural resources management in the United States. Specific attention to historical development of natural resources management policy, and the philosophical stance of individuals who are instrumental in creation of those policies.

Credit Hours: 3

Prerequisite Courses: EVS 195
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 471 - National Parks and Protected Areas

Course will explore national parks and protected areas in the US and beyond from historical, ecological, social, and political perspectives. We will focus on understanding the role of these natural spaces in culture, individual and societal well-being, and environmental health and well as the impact of use, recreation and tourism on the parks themselves.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 205.
Course Repeatability: Course may not be repeated.

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on

natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite

courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

HST 334 - Public History

A study of the ways in which historians practice outside of the academy. Topics include historic preservation, museum interpretation, cultural resource management, media, and archives. Class may include guest speakers and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

INT 314 - International NGOs, Globalization, and Development

Interdisciplinary overview of theories on the role international Nongovernmental Organizations play in

the development of a country including development of political and economic institutions. Focus on the mounting internal and external challenges that threaten the promise of international Nongovernmental organizations, particularly in the Global South.

Credit Hours: 3

Prerequisite Courses: INT 105 or permission of instructor.
Course Repeatability: Course may not be repeated.

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

LED 311 - Communication and Leadership

Theory and practice of leadership. Focuses on issues of cohesiveness, trust, motivation, vision, and goals. Development of conflict management and decision-making goals.

Credit Hours: 3

Prerequisite Courses: LED 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

LED 411 - Contemporary Leadership Applications

Concepts related to leadership. Ability to envision and implement change for the common good using diverse perspectives and contexts. Applies leadership and organizational theories through real world experience and contemporary issues.

Credit Hours: 3

Prerequisite Courses: LED 311

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists

and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 358 - Organizational Behavior

Application of behavioral science concepts in the management of organizations. Emphasis on increasing productivity on the individual, group, and organizational level. Particular attention directed to analyzing organizations, developing motivational programs, designing enriching jobs, leadership development, and managing organizational change.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Additional Restrictions/Requirements: Admission to

Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 359 - Talent Acquisition

This is an advanced course designed for management and human resource students. Upon completion, students will be able to develop and execute a recruitment and selection plan that ensures the organization is able to attract and retain top talent in order to meet company objectives. Students will gain expertise in designing and conducting valid employment interviews. Attention is given to the legal environment, planning, and job analyses.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Prerequisite Courses: MGT 350
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 452 - Leadership and Organizational Change

Study the processes associated with transforming organizations in a world of continuous change. Particular attention on leadership skills, ethics, organizational structure, and corporate culture with the shared purpose of fostering innovation, continuous improvement, and organizational performance.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 358.
Prerequisite Courses: MGT 356.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

MGT 456 - Employee and Labor Relations

Study of the current legislation affecting employee and labor relations, union organizing, collective bargaining, contract administration, union-management relations,

and best practices in employee relations in both unionized and non-unionized environments.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 457 - Training & Talent Development

Understanding of the processes involved in developing, administering, and evaluating effective talent development programs that will increase the productivity of employees and organizations. Particular attention on assessing training needs, identifying learning objectives, and using technology in the delivery of talent development programs.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350 and MGT 356
Additional Restrictions/Requirements: BS Business Administration and Admission to Cameron School of

Business
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 458 - Total Rewards

Examination of how compensation, benefits, motivation and evaluation systems can be used to enhance the satisfaction and performance of organizational talent. Particular attention on job analysis, job evaluation, pay levels and structures, pay for performance plans, performance appraisals, benefits, and general pay administration.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 356
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining, integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

PBH 290 - Foundations of Public Health

An overview of the public health profession with emphasis on the foundations of public health such as definitions, history, philosophy, ethics, evidence-based principles, and determinants of health.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 310 - Social and Behavioral Determinants of Health

An overview of social and behavioral concepts related to public health with specific emphasis on behavioral theory and evidence-based practice. Examines the integration of health behavior, health theories and health promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH course to progress in the program. Open to PBH majors only.
Course Repeatability: Course may not be repeated.

PBH 400 - Health Ethics Policy and Law

Overview of the ethical, political, and legal implications that influence public health. Emphasis on current public healthcare issues and policies.

Credit Hours: 3

Additional Restrictions/Requirements: Minimum passing grade of "C-" or above required in each PBH

course to progress in the program. Open to PBH majors only.

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PBH 435 - Public Health Organization and Administration

Focuses on the basic tools necessary to become effective managers and leaders in public health organizations. The main components and issues related to development and managing organizations, financing and delivery of health services will be discussed.

Credit Hours: 3

Additional Restrictions/Requirements: Open to Public Health majors only.
Crosslisting: HEA 435
Course Repeatability: Course may not be repeated.

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals, role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 362 - Leading and Managing Volunteers

Addresses major issues in the leadership and management of volunteers in the nonprofit and public sectors. Focuses on the two main types of volunteers: service volunteers, and policy volunteers (board members). Topics covered include volunteer recruitment, screening, job design, supervision, recognition, and evaluation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PSY 246 - Psychology of Personality

Overview of the theoretical models underlying the structure and organization of individual differences. Emphasis on empirical research evaluation the different theoretical models. Topics include the self-concept, awareness of motivation, perceived control, and the biological mechanisms influencing traits such as extraversion.

Credit Hours: 3

Prerequisite Courses: PSY 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PSY 336 - Industrial-Organizational Psychology

Psychological techniques in job analysis, personnel selection and placement, training, performance appraisal, employee motivation, employee health and satisfaction, organizational productivity and communication, group decision making, and leadership.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 375 - Leadership and Management in Tourism, Recreation, and Sport

Principles and practices of contemporary leisure service management, particularly the effective and efficient management of human, fiscal, informational, and physical resources through planning, organizing, directing, leading, and controlling decisions. Tutorials, case studies, and computer applications.

Credit Hours: 3

Prerequisite Courses: REC 265 and REC 270.
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Writing Intensive

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 440 - Risk Management and Liability in Recreation Services

Examination of legal and legislative issues affecting the leisure delivery system in governmental, quasi-public, private, commercial, and institutional settings. Topics include terminology, risk management procedures, ordinances, regulatory law, licensing, legal redress, and constitutional law at the national and state levels.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 450 - Conflict and Organizational Politics in Recreation, Sport and Tourism

An experiential approach to the study of conflict management and organizational politics in recreation,

sport and tourism leadership and administration. Emphasis on organizational politics, governing boards, and conflict resolution.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 475 - Advanced Human Resource Management in Recreation

Examination and investigation of contemporary human resource management principles and techniques in the management of recreation services. Human resource management motivational theories and practices. In-depth case study analysis, simulations, and hands-on practical experiences.

Credit Hours: 3

Prerequisite Courses: REC 375

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 240 - Individuals and Societies in a Global World

Introduction to globalization as an ongoing socio-economic process and as an analytical concept.

Examines various aspects of globalization of economies and societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 250 - Issues in Social Justice

Overview of the sociological study of social justice and policies that proclaim to promote social justice in the United States. Examines various forms of institutionalized inequality on the basis of social class, race/ethnicity, gender and sexuality.

Credit Hours: 3

Prerequisite Courses: SOC 105.
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 260 - Poverty Studies

Examination of the nature and extent of poverty in the United States. Discussion of poverty measurement, characteristics, poverty population, international comparisons, underlying causes of poverty and government programs and policies that address poverty.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 303 - Media and Society

The relationship between mass media, culture, and society with special emphasis on the social, political, and economic contexts of the mass media. Media examined include television, the press, films, popular music, and the electronic superhighway.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 305 - Demography

A study of the changes in size, composition, distribution of population and the dynamics underlying them.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 306 - Sociology of Culture

Overview and analysis of the interplay between social and cultural structures. Examination of research in and theories of culture and social structure's dialectical relationship; dominant ideology and hegemony; cultural capital and cultural reproduction; symbol, ritual, and moral order; knowledge production and transformation; dynamics of cultural change.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 315 - Urban Sociology

Analysis of the history and development, social organization, and problems of the city.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 320 - Rural Sociology

An examination of the issues and perspectives in rural sociology. Multiple sociological aspects of rural life will be explored focusing on gender, race, social class and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 380 - Social Classes

Examination of social stratification as the system of distribution of privilege, power and prestige in modern and traditional societies. Discussion of major theories and theorists of stratification; the structure and process of systems of social inequality; the causes, correlates and consequences of socially structured inequality.

Credit Hours: 3

Prerequisite Courses: SOC 105

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 415 - Globalization and Development

An examination of development and globalization theories and globalization processes in the 21st century through comparative development analysis.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in sociology at the 300 level.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: CRM 449
Course Repeatability: Course may not be repeated.

SOC 486 - Sociology of Work and Occupations

Analysis of the place of work in society. Examines occupational structures as the primary link between persons and the larger society. Topics include the growth and development of occupational structure, occupations and technological change, and organizational complexity.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and three additional hours in sociology or economics.

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 490 - Service Learning and Research

Study of the Spanish-speaking population in a specific region. Each student completes 30 volunteer hours with a local agency that works with the Spanish-speaking community. A research project related to the Spanish-speaking population of a specific region or community is also required.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a 'C' or better.
Additional Restrictions/Requirements: Junior or senior standing.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

SPN 498 - Internship in Spanish

Program of work and study conducted within an agency and/or setting that provides practical experience with observation and application of foreign language skills.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, completion of at least 12 hours of course work in SPN at the 300 or 400 level, and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

SWK 106 - Social Work Global Visions: Citizens, Issues and Approaches

Explores the global issues faced by disenfranchised people around the world, including issues of diversity, poverty, political issues, economic concerns and environmental issues. How social work on an international level addresses these issues through collective strength-based practice will be covered.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 235 - Introduction to Social Work and the Social Welfare System

Social welfare institution and the social work profession in the United States; the values, methods and roles of social workers and the history of the system.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

SWK 335 - Social Welfare Policies

Social, cultural, economic, and political influences on the social welfare system. Policymaking, program development and planning.

Credit Hours: 3

Corequisite Courses: SWK 396.
Prerequisite Courses: SWK 235 and PLS 101.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Building Competencies/Information Literacy, Writing Intensive
Course Repeatability: Course may not be repeated.

SWK 355 - Issues in Diversity for Generalist Practice

Values, biases, and prejudices which produce personal and social vulnerability. Consequences in the lives of people of color, women, the poor, gays and lesbians, and others.

Credit Hours: 3

Corequisite Courses: SWK 240 and SWKL 240 and SWK 320, each with a grade of 'C' or better.
Prerequisite or Corequisite Courses: SWK 235 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

SWK 460 - Grant Writing for Human Services

Study and development of grant writing skills for human service workers. Course discusses development of needs assessment, goal setting, program design, evaluation, budgeting and securing funding sources.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

THR 121 - Introduction to Theatre

Appreciation of theatre through an understanding of its artistic elements, history, dramatic literature, and audience involvement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 380 - Stage Management

The techniques used by professionals for the managment of theatrical and performance events. Students will learn organizational and leadership skills necessary for being sucessful stage managers.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 381 - Theatre Management

An introduction to the theory and art of managment in the American theatre. Basic principles of business practices and relate them to theatre management. Examines the various types of theatre organizations and production methods.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 210 - Introduction to Women's Studies

This course introduces students to the discipline of women's and gender studies. Status of women from a variety of historical, economic, cultural, and theoretical perspectives. Topics include masculinity, femininity, violence, reproductive health, issues in sexual orientation, and the intersectional dynamics of race, class, and gender.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 212 - Sexuality and Gender

Theoretical and cultural contexts and complexities of sexuality as they relate to the dominant culture. Intersections of race, class, gender and sexual orientation will be examined in relation to the formation of sexual identity and the contradictions of institutionalized norms and standards.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

WGS 495 - Seminar in Women's and Gender Studies

Intensive interdisciplinary study of a topic or theme in women's studies, such as women and sports, women in art history, or feminist theory.

Credit Hours: 3

Prerequisite Courses: WGS 210
Additional Restrictions/Requirements: Prerequisite course and 6 additional hours of courses in the WGS minor or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 18

Oceanography Minor

The Department of Earth and Ocean Sciences offers a minor Oceanography. Because oceanography is a truly integrative and synthetic field which continues to become more technological and global in its approach, the oceanography minor requires students to develop basic proficiencies in a variety of oceanography related fields, while allowing students to focus on their specific interests through selection of appropriate elective course work.

Requirements for a Minor in Oceanography

Requires a minimum of 18 credit hours including 7 hours of core courses and 11 hours of electives. At least 9 hours of electives must be in courses at the 300 level or above.

Core Courses (7 Credit Hours)

OCN 150 - Introduction to Oceanography

An introduction to the geology, physics, chemistry, and biology of the ocean; instruments and techniques of oceanography; resources of the ocean. The lab for this

course is OCNL 150.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCNL 150 - Introduction to Oceanography Laboratory

A hands-on, experiential introduction to the study of the oceans including geological, biological, chemical, and physical aspects. Instruments and techniques of oceanography, marine resources, and human interaction with the oceans will also be explored. Multiple required field trips. This course is the lab for OCN 150.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: OCN 150.
University Studies: Approaches and

Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

OCN 350 - Advanced Oceanography

An in-depth examination of the structure and formation of ocean basins, the role of oceans in the hydrological cycle, the physical properties of seawater, atmospheric and ocean circulation, waves, and tides. Emphasis on data analysis and quantitative problem solving.

Credit Hours: 3

Prerequisite Courses: OCN 150
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Elective Courses (11 Credit Hours)

Students must also complete a minimum of 11 hours of electives, 9 of which must be above the 299 level. Students may select from any OCN courses, or from the following list.

BIO 318 - Invertebrate Zoology

Survey of invertebrate animals with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. The lab for this course is BIOL 318.

Credit Hours: 3

Corequisite Courses: BIOL 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 318 - Invertebrate Zoology Laboratory

Introduction to invertebrate sampling techniques and data analysis. Experience in species identification with emphasis on the structure, function, phylogeny, ecology, and life histories of marine taxa. This course is the lab for BIO 318.

Corequisite Courses: BIO 318
Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIO 362 - Marine Ecology

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. The lab for this course is BIOL 362.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIOL 362 - Marine Ecology Laboratory

Introduction to basic ecological principles in the marine environment as they pertain to individual organisms, populations, communities, and ecosystems. Laboratory activities are designed to give students experiential knowledge and acquaint them with the regional marine fauna and flora. This course is the lab for BIO 362.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 362
Prerequisite Courses: BIO 201 and BIO 202

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

BIO 363 - Coral Reef Ecology

Ecology and physiology of coral reef organisms, emphasizing processes that contribute to the function and complexity of coral reef ecosystems. Reef information and geology, coral biology and physiology, ecological interactions, human effects, global effects, and conversation will be considered. The lab for this course is BIOL 363.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202.
Course Repeatability: Course may not be repeated.

BIOL 363 - Coral Reef Ecology Laboratory

Methods for studying coral reef taxa, community structure, coral physiology, and ecological processes will be explored. Independent project required.

Credit Hours: 1

Prerequisite or Corequisite Courses: BIO 363
Prerequisite Courses: BIO 201, BIO 202
Course Repeatability: Course may not be repeated.

BIO 367 - Antarctic Ecology, Geology, History, and Policy

An in-depth examination of the frozen continent including its geologic origins, ice sheet formation, and fossil record. Its unique ecology, endemic wildlife, discovery and human history, anthropogenic impacts, and current international agreements to protect resources will also be examined. Open to juniors and seniors from all major departments. Also offered as BIO 585 with additional requirements.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

BIO 434 - Coastal Marine Ecology

An in-depth study of the major processes controlling populations and structuring coastal marine

communities. Emphasis is on the review and discussion of important historical and recent scientific papers.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Course Repeatability: Course may not be repeated.

BIO 462 - Deep Sea Biology

Study of deep-sea biosphere, with emphasis on the biology of abyssal zones off the North Carolina coast and hydrothermal vent ecosystems. Topics include unique benthic and pelagic animals in deep-sea environments and their physiological adaptations to hydrostatic pressure and low temperature, nutritional dynamics, reproductive strategies, energy flow, and speciation in abyssal and ultra abyssal zones.

Credit Hours: 3

Prerequisite Courses: BIO 362
Course Repeatability: Course may not be repeated.

BIO 489 - Benthic Ecology

The scientific study of the organisms and processes that structure coastal benthic communities. Benthic communities encompass the vast seafloor areas of estuaries and oceans and support aquatic communities, fisheries, larger species of interest, and critical ecosystem processes.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202, BIO 366.
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

CHML 377 - Environmental Chemistry Laboratory

Laboratory analysis of environmental samples, including applications of standard EPA methods. This course is the lab for CHM 377.

Credit Hours: 1

Corequisite Courses: CHM 377
Course Repeatability: Course may not be repeated.

CHM 475 - Chemical Oceanography

Introduction to chemical oceanography, including discussion of sources, distribution, forms of occurrence of chemical species in seawater; chemistry of salty solutions; air-sea interactions; marine carbonate system; organic compounds and trace elements in seawater; estuarine chemistry.

Credit Hours: 3

Prerequisite Courses: Prerequisite: CHM 102 and CHML 102. Recommended prerequisite or corequisite: CHM 235 and OCN 150.
Course Repeatability: Course may not be repeated.

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two

laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 333 - Applied Climatology

The spatial distribution and character of climates, their relation to other elements of the environment and to human activities. Students work individually or in small groups to solve problems through applications of climate principles and data.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.

GGY 383 - Geography of Islands and Coasts

The study of islands and coasts as unique geographic features. Explores the physical processes of islands and coasts, the environmental history of islands and coasts, and current environmental issues unique to islands and coasts.

Credit Hours: 3

Prerequisite Courses: GGY 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 424 - Advanced Geographic Information Systems

Advanced theory and application of the use of Geographic Information Systems (GIS), spatial data collection, data structures, data management, and relational databases, spatial analysis, and display of geographic information in a computer-based environment. Lectures, demonstrations, and lab

exercises. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
University Studies: Explorations Beyond the Classroom
Crosslisting: GGY 524
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

GGY 426 - Environmental Geographic Information Systems

Overview of environmental applications of GIS including planning, date development, and analysis of the data, and oral and written presentation of the results. Students work individually or in small groups to remediate an environmental problem. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 321 or consent of instructor
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 526
Course Repeatability: Course may not be repeated.

GGY 428 - Advanced Remote Sensing

Advanced theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, and forestry. Includes satellite data collection, advanced classification methods, hyperspectral and microwave image analysis, and satellite elevation data construction. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 322
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 528
Course Repeatability: Course may not be repeated.

GGY 433 - Weather Analysis and Forecasting

Introduction to tools of weather analysis and use of these tools to construct weather forecasts.

Credit Hours: 3

Prerequisite Courses: GGY 230 and GGY 333
Course Repeatability: Course may not be repeated.

GLY 390 - Field Methods in Geosciences

Applied study of geological materials and processes in field settings. Introduction to methods and techniques used in the geosciences including field measurement, sample retrieval and data analysis. Colloquium and required field trips.

Credit Hours: 2

Prerequisite Courses: GLY 132
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Explorations Beyond the Classroom, Common Requirements/Critical Reasoning
Course Repeatability: Course may be repeated.

Maximum Repeatable Hours: 4 **Repeat Limit:** 2
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

GLY 420 - Global Climate Change

Analysis of natural and anthropogenic global climate change with an emphasis on future global climate change. Topics include Earth's energy balance, the global carbon cycle, climate modeling, atmospheric composition, and dynamics. Review of geographical variation in climate change.

Credit Hours: 3

Prerequisite Courses: GGY 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GGY 420, PHY 420
Course Repeatability: Course may not be repeated.

GLY 426 - Geohydrology

Geology of groundwater and related aspects of surface waters. Methods of ground water resource evaluation, protection, exploitation, and contaminant remediation.

Credit Hours: 3

Prerequisite Courses: (GLY 101 or GLY 120 or OCN 150 or GGY 130), and (MAT 112 or MAT 160 or MAT 152 or MAT 161)
Additional Restrictions/Requirements: Junior or senior standing in geology, geoscience, geography, oceanography and/or environmental sciences, prerequisite courses, and consent of instructor.
Crosslisting: GLY 526
Course Repeatability: Course may not be repeated.

GLY 439 - Paleoclimatology

Climatic change throughout geologic time, with an emphasis on Quatenary climate change. Topics include an overview of Earth's climate system, tectonic-scale, orbital-scale, millennial-scale, and future climate change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 230 or GLY 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Crosslisting: GLY 539
Course Repeatability: Course may not be repeated.

GLY 450 - Geological Oceanography

Physiography, petrology, structure, sediments and geologic history of the ocean floor, including estuarine and coastal environments.

Credit Hours: 4

Prerequisite Courses: GLY 201 or GLY 205 or OCN 350
Course Repeatability: Course may not be repeated.

GLY 454 - Coastal Geomorphology

Provides an in-depth analysis of the coastal landforms that line the world's coasts. Understanding how these

land forms are created, evolve and erode is necessary to understanding the spatiotemporal evolution of the coastal zone.

Credit Hours: 3

Prerequisite Courses: OCN 150 or OCN 250 or GLY 101 or GLY 120 or GLY 125 or GGY 130 or EVS 195
Course Repeatability: Course may not be repeated.

GLY 465 - Introduction to Geophysics

Integrated application of geophysical methods to solve environmental and geologic problems. Includes discussion of reflection/refraction seismology, ground penetrating radar and gravity. Two lectures and three laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GLY 101 and (MAT 112 or MAT 160 or MAT 152 or MAT 161)
Crosslisting: GLY 565.
Course Repeatability: Course may not be repeated.

GLY 472 - Introduction to Geochemistry

Investigation of the abundance and distribution of chemical elements in the Earth's crust, mantle, atmosphere, hydrosphere, and biosphere. Introduction to thermodynamics, phase and mineral equilibrium, stable and radiogenic isotopes, and geochronology. Emphasizes the application of geochemical processes to solving geologic and environment problems, with selected examples from field and laboratory studies.

Credit Hours: 3

Prerequisite Courses: GLY 101 and CHM 101 and CHML 101.
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor.
Crosslisting: GLY 572
Course Repeatability: Course may not be repeated.

GLY 473 - Isotope Geochemistry

Introduction to the use of radio and stable isotopes for studying environmental processes; radioactive decay and the applications of radioisotopes at daily to earth history time scales; isotopic fractionation, and applications of stable isotopes in modern and

paleoenvironments.

Credit Hours: 3

Prerequisite Courses: CHM 101 and CHML 101, and CHM 102 and CHML 102.
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor.
Crosslisting: GLY 573
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PHY 477 - Observational Methods in Physical Oceanography

Description of instrumentation used to measure temperature, salinity, pressure, and current in the ocean. Hands-on use of techniques and instrumentation to collect and analyze real oceanographic data. Credit is not allowed for both PHY 477 and PHY 577.

Credit Hours: 3

Prerequisite Courses: PHY 315 and PHY 475
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive
Crosslisting: PHY 577
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PHY 478 - Geophysical Fluid Dynamics

The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and atmosphere. Equations of state, compressibility,

Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, and geostrophic adjustment. Credit is not allowed for both PHY 478 and PHY 578.

Credit Hours: 3

Corequisite Courses: PHY 475
Prerequisite Courses: PHY 350
Crosslisting: PHY 578
Course Repeatability: Course may not be repeated.

PHY 479 - Ocean Circulation Systems

Focus on results of World Ocean Circulation Experiment (WOCE), a multi-national, multi-decadal program designed to observe the global ocean. Explores large-scale circulation and properties of the ocean as foundation for understanding the future of the world oceans and their role in climate change. Credit is not allowed for both PHY 479 and PHY 579.

Credit Hours: 3

Prerequisite Courses: PHY 475

Crosslisting: PHY 579
Course Repeatability: Course may not be repeated.

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone hydrodynamics, storm surge, tides, estuarine hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around

resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Additional Information

Students must have an overall "C" (2.00) average in courses counted toward the minor.

Online Teaching and Learning Minor

Online education has increased significantly in K-12 institutions, community colleges, and higher education over the last decade. As a result of this increase, there is a need to train educators to teach in, create, and manage these online and virtual environments. This undergraduate minor program in Online Teaching and Learning (OT&L) is designed to meet the needs of pre-service teachers, teachers, and other individuals who wish to teach in, design, develop, and manage online learning environments.

The minor program in Online Teaching and Learning (OT&L) will provide participants with a multitude of learning experiences. These include design, development, implementation, and management of online courses using various Learning Management Systems (LMS); design and delivery of synchronous learning environments and learning management systems; design and development of electronic, self-directed learning materials, and others; and to teach in virtual schools. By completing this minor program, candidates have required competencies for teaching in, creating, and managing online programs.

Minor Program Objectives:

- Design, develop, implement, manage, and evaluate online learning environments, courses, and programs.
- Demonstrate skills in integrating instructional design principles and procedures with multimedia technologies and course management tools to develop highly engaging and interactive online learning environments.
- Develop knowledge safety, ethics, plagiarizing, and cyberbullying in online environments

- Develop knowledge and skills of designing, developing, delivering, and evaluating online learning environments and programs that are accessible for individuals with disabilities and are responsive to learners' diversity and cultural differences.
- Demonstrate competencies in creating and implementing assessments in online learning environments in ways that assure validity and reliability of instruments and procedures.
- Demonstrate competencies in using data and findings from assessments and other data sources to modify instructional methods and content and to guide student learning in online learning environments.
- Demonstrate administrative skills in planning, launching, maintaining, and coordinating distance education programs.

Requirements for a Minor in Online Teaching and Learning:

EDN 301 - Instructional Design and Evaluation

Provides conceptual tools and analytic skills essential to planning, implementing, and evaluating instruction.

The design of instruction that incorporates behavioral, cognitive and constructivist theories of learning and views of curriculum will be considered. Topics: types of learning; conditions of learning; performance objectives; purposes, forms, and procedures for educational assessment; task analysis, and lesson design.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:EDN 200 and EDN 203.
Course Repeatability: Course may not be repeated.

EDN 303 - Instructional Technology

Emphasizes the design, selection, production, and evaluation of instructional materials, computer-generated presentations, and interactive multimedia, with particular emphasis on their effective integration into an instructional unit. Develops skill in the operation of media production equipment, including microcomputers, fundamentals of operating systems, computer software applications, networks, and telecommunications.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

MIT 401 - Online Teaching: Design, Development, and Management

Focus on the design, development, and management of online instruction. Students will use principles of instructional to design and develop online courses with a focus on how to organize and manage an online environment in a Learning Management System (LMS).

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MIT 402 - Multimedia Instruction for Online Learning

Students will follow the instructional design process to create and evaluate multimedia instruction for online computer-based environments. Several advanced

technologies will be incorporated to design and develop instructional material. These technologies will include video, computer-based authoring software, mobile and desktops, and other advanced technologies impacting online course development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MIT 413 - Assessment of Learning and Instruction

Examine purpose of formative and summative assessment and how it's applied across a variety of systems. Particular attention is paid to the concepts of reliability, validity, norms, interpretation of scores, response sets, fairness in testing and performance assessment, formative vs summative, and norm referenced vs. criterion referenced tests. A variety of formative and summative instruments that are used to measure or assess human attributes and behaviors are studied.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

MIT 414 - Foundations of Online Learning

This course overviews the concepts, technologies, and issues related to the design, development, delivery, policy-making, and evaluation of distance education courses and programs. Learn about online learning technologies and focus on techniques for teaching and learning within a distance education system.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Philosophy Minor

Students who complete the minor in Philosophy develop critical skills in analytical thinking and thoughtful expression, which are essential for navigating professional life and engaging peoples of different philosophical backgrounds. Courses in philosophy explore questions in metaphysics, epistemology, logic, philosophy of science, ethics,

medical ethics, social and political philosophy, and aesthetics. They teach students how to analyze complex questions such as: how to live ethically, how to form beliefs properly, how to reason well, how to understand the connection between the mind and body, how to understand the complexities of justice, and how to live a fulfilling life.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Philosophy

PAR 101 - The Big Questions: Introduction to Philosophy

Introduction to various philosophers and philosophical problems from historical, critical, and other perspectives. Addresses the big questions of human existence, such as: What is right and wrong? Does God exist? How do we know anything about the world

around us? Students learn what a philosophical question is and discover just how pervasive philosophical assumptions are in life.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 105 - Critical Reasoning With Artificial Intelligence

Introduction to the principles of proper reasoning through the use of generative AI. Exploration of how to assess the reasoning of AI and how to use AI to improve one's own argumentation. Study of the contrast between good and bad forms of reasoning as manifested by both humans and AI.

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 115 - Introduction to Ethics

An introduction to fundamental principles, theories, and problems in ethics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

and

PAR 201 - History of Western Philosophy I

A survey of Western philosophical thought in ancient and medieval times. Emphasis on the Greek origins of the philosophical tradition. Readings from the Pre-

Socratics, Plato, Aristotle, Roman philosophy and such Christian thinkers as Augustine and Thomas Aquinas.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PAR 202 - Modern Philosophy: Descartes to Kant

Introduction to the major topics of Western philosophy during the modern period, including skepticism, the existence of God, and the source of our ideas. Analysis of the thought of philosophers such as Descartes, Elizabeth of Bohemia, Locke, Berkeley, Leibniz, Hume, and Kant.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches,

Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

- an additional 9 hours in philosophy courses, at least 6 hours of which must be at the 300-400 level.

Total Credit Hours: 21

Additional Information

An overall grade point average of "C" (2.00) or better is required in courses counted toward the minor.

Physical Oceanography Minor

Requirements for a Minor in Physical Oceanography:

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget;

dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

PHY 477 - Observational Methods in Physical Oceanography

Description of instrumentation used to measure temperature, salinity, pressure, and current in the ocean. Hands-on use of techniques and instrumentation to collect and analyze real oceanographic data. Credit is not allowed for both PHY 477 and PHY 577.

Credit Hours: 3

Prerequisite Courses: PHY 315 and PHY 475
University Studies: Explorations Beyond the Classroom, Building Competencies/Writing Intensive

Crosslisting: PHY 577
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

And 1 additional course from:

PHY 315 - Computational Physics and Complexity

Corequisites: PHY 321 or MAT 361. Introduction to numerial modeling techniques for solving problems in physics and complex systems. Numerial techniques will be applied to classical mechanics, bifurcation and dynamical systems, chaotic systems, thermodynamics, optimization, cellular automata, and self-organization.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms of the conservation laws for mass, momentum and energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 478 - Geophysical Fluid Dynamics

The fundamental principles governing the flow of a density-stratified fluid on a rotating planet, with applications to the motions of the ocean and atmosphere. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, and geostrophic adjustment. Credit is not allowed for both PHY 478 and PHY 578.

Credit Hours: 3

Corequisite Courses: PHY 475
Prerequisite Courses: PHY 350
Crosslisting: PHY 578
Course Repeatability: Course may not be repeated.

PHY 479 - Ocean Circulation Systems

Focus on results of World Ocean Circulation Experiment (WOCE), a multi-national, multi-decadal program designed to observe the global ocean. Explores large-scale circulation and properties of the ocean as foundation for understanding the future of the world oceans and their role in climate change. Credit is not allowed for both PHY 479 and PHY 579.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 579
Course Repeatability: Course may not be repeated.

PHY 480 - Coastal And Estuarine Systems

Introduction to the physical processes operating within coastal and estuarine systems. Focus on the dynamical description of topics such as gravity waves, surf zone

hydrodynamics, storm surge, tides, estuarine hydraulics, sediment transport, and morphodynamics. Credit is not allowed for both PHY 480 and PHY 580.

Credit Hours: 3

Prerequisite Courses: PHY 475
Crosslisting: PHY 580
Course Repeatability: Course may not be repeated.

Total: 17 hours

Additional Information:

A grade of "C" or better is required in each physics course counted toward the minor.

Physics Minor

The minor in Physics is a program designed to give students a background in advanced physics courses.

Requirements for a Minor in Physics:

PHY 201 - General Physics I

First semester of a two semester calculus-based introduction to the fundamental principles of physics for

the physical and mathematical sciences. Topics include kinematics, Newtonian statics and dynamics, gravitation, oscillations, and mechanical waves.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 161
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

PHY 202 - General Physics II

Second semester of a two semester calculus-based introduction to the fundamental principles of physics for the physical and mathematical sciences. Topics include electric and magnetic fields, circuits, Maxwell's equations, electromagnetic waves, and optics.

Credit Hours: 4

Prerequisite or Corequisite Courses: MAT 162
Prerequisite Courses: PHY 201
Course Repeatability: Course may not be repeated.

PHY 335 - Modern Physics I

Introduction to special relativity and wave mechanics. First of a two-course sequence in Modern Physics.

Credit Hours: 3

Prerequisite Courses: PHY 202.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

9 Additional Hours in Physics

Not to include PHY 101, PHY 102, or PHY 105; at least 3 of these additional hours must be at the 300-400 level. At least 4 of these additional hours must be from one of the following Options:

Option 1: (General Physics)

PHY 225 - Electronics

Practical introduction to making consumer electronic circuits in three formats: breadboard prototypes; hard-wired through-hole component circuits; and surface

mount-circuits, laid out using photo-lithography. Study of software tools to document and test circuit designs, and to create photo-lithographic masks to use in creating printed circuit boards.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 260 - Introduction to Astronomy

Descriptive course in principles, theories, and techniques of astronomy. Occasional night viewings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

PHY 321 - Classical Dynamics I

Newtonian and Lagrangian formulations of mechanics applied to single particles and systems of particles, central forces, oscillations, and normal mode analysis. Rotating frames of reference.

Credit Hours: 4

Prerequisite or Corequisite Courses: PHY 311 or MAT 361.
Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

Option 2: (Physical Oceanography)

PHY 321 - Classical Dynamics I

Newtonian and Lagrangian formulations of mechanics applied to single particles and systems of particles, central forces, oscillations, and normal mode analysis. Rotating frames of reference.

Credit Hours: 4

Prerequisite or Corequisite Courses: PHY 311 or MAT 361.

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 350 - Fluid Mechanics

Emphasizes fundamental physical principles; fluid statics, fluid kinematics, integral and differential forms of the conservation laws for mass, momentum and energy; Bernoulli equation; laminar flows; potential flows; vorticity dynamics; dyanamic similarity; boundary layers; turbulence.

Credit Hours: 3

Prerequisite Courses: PHY 321 or MAT 361
Course Repeatability: Course may not be repeated.

PHY 470 - Data Analysis

Data analysis techniques used in experimental and applied physical science. Topics include propagation of errors, probability distributions, data reduction techniques, covariance and convolution, autocorrelation, linear regression, time series analysis, and spectral analysis.

Credit Hours: 3

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

PHY 475 - Physical Oceanography

An introduction to the descriptive and dynamical features of ocean circulation. Topics include: the physical properties of seawater; oceanic heat budget; dynamics of ocean currents; descriptive oceanography; waves and tides.

Credit Hours: 3

Prerequisite Courses: (MAT 152 or MAT 162) and (PHY 102 or PHY 202)
Crosslisting: PHY 575
Course Repeatability: Course may not be repeated.

Option 3: (Engineering Physics)

PHY 225 - Electronics

Practical introduction to making consumer electronic circuits in three formats: breadboard prototypes; hard-wired through-hole component circuits; and surface

mount-circuits, laid out using photo-lithography. Study of software tools to document and test circuit designs, and to create photo-lithographic masks to use in creating printed circuit boards.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

PHY 414 - Engineering Physics I

Introduction to the practical fabrication of devices. Students will learn to use CAD (Computer-Aided Design) software to design projects and will also learn how to use hand tools, standard and CNC (Computer Numerical Controlled) machine tools, and 3D printers to fabricate objects. This class is intrinsically project oriented.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PHY 417 - Engineering Physics II

Integration of fabricated objects with hand-built electronic circuits and microprocessors in order to make sophisticated devices for practical use. This class is intrinsically project oriented.

Credit Hours: 3

Prerequisite Courses: PHY 225 and PHY 414.
Course Repeatability: Course may not be repeated.

Option 4: (Computational Physics)

PHY 215 - Introduction to Computing in the Physical Sciences

The computational methods commonly used to display and analyze data in the physical sciences by introducing students to the basics of MATLAB (tm) or a similar programming language. Topics include: control structures, handle graphics functions and matrix algebra. Laboratory setting, emphasiziing work with real environmental data and project-based.

Credit Hours: 1

Prerequisite Courses: MAT 162
Course Repeatability: Course may not be repeated.

PHY 315 - Computational Physics and Complexity

Corequisites: PHY 321 or MAT 361. Introduction to numerial modeling techniques for solving problems in physics and complex systems. Numerial techniques will be applied to classical mechanics, bifurcation and dynamical systems, chaotic systems, thermodynamics, optimization, cellular automata, and self-organization.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PHY 470 - Data Analysis

Data analysis techniques used in experimental and applied physical science. Topics include propagation of errors, probability distributions, data reduction techniques, covariance and convolution, autocorrelation, linear regression, time series analysis,

and spectral analysis.

Credit Hours: 3

Prerequisite Courses: PHY 202.
Course Repeatability: Course may not be repeated.

Total: 20 hours

Additional Information:

A grade of "C" or better is required in each physics course counted toward the minor.

Political Entrepreneurship and Leadership Minor

Coordinator: Dr. Nadine Gibson

The Political Entrepreneurship and Leadership Minor provides students with the practical knowledge of how to become an active participant and leader in politics and government. The minor prepares students for careers in campaigns, public policy, local government, community organizing, and legislative institutions. Students will develop the skills and tools necessary for success in the public sector, completing coursework on

applied work and technical knowledge. Elective offerings in the minor include courses on campaigns, elections, political institutions, public policy, and public opinion allowing students to focus on specific avenues of political engagement. The minor develops applied knowledge and real-world skills useful for career in politics, including requiring students to complete an internship in addition to coursework.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Political Entrepreneurship and Leadership

Core Courses (12 Credit Hours)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 205 - Campaign and Elections

Focuses on the electoral arena (history, financing, political environments), nominations (delegate selections and conventions), campaigns (organization, strategy, tactics, media), and the election (votes, policy, reforms). Special attention is given to recent and current presidential and congressional election campaigns.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals, role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 498 - Internship in Political Science

Experiential learning with selected public or private agencies or with an individual which allows the student to utilize academic training while learning from a practical field experience. (Formal research project is a major part of the internship.)

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201 and (PLS 300 or PLS 304 or PLS 308)
Additional Restrictions/Requirements: Prerequisite courses, junior or senior standing, overall 3.00 GPA or consent of instructor.
University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Major Restriction Political Science**Minor Restriction** Pre-Law

Elective Courses (6 Credit Hours)

PLS 304 - Introduction to Public Policy Analysis

Study of the theories and methods of analyzing and explaining public policy and the substance of recent domestic policies in the areas of public finance and human and physical resources, including welfare, education, protection of the environment, housing, health, urban renewal and transportation.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Common Requirements/Critical

Reasoning
Course Repeatability: Course may not be repeated.

PLS 350 - State Government and Politics

Survey and analysis of the organization, functions, and political processes of the American states with an emphasis on North Carolina politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 351 - Urban Government and Politics

Structure, functions, political processes, problems, and trends in American city and metropolitan government and politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Approaches and

Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 353 - American Parties and Interest Groups

Historical and analytical treatment of the appearance and realignment of political parties during the five successive 'national party systems' since the beginning of the republic. Special emphasis is given to the question of contemporary party disarray and potential realignment.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 403 - Public Opinion

Origin, content, and policy impact of public opinion in democratic nations. Emphasis on the contemporary American experience and the genesis of mass movements.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 404 - Campaign Management and Strategies

Internal mechanics of political campaigns, major areas of campaign management and strategy, campaign organization, voter contact, campaign research, finance and fund-raising, and communications. Special attention is given to recent and current presidential, congressional, and gubernatorial election campaigns.

Credit Hours: 3

Prerequisite Courses: PLS 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Political Science Minor

Coordinator: Dr. Jennifer Horan

The Department of Public and International Affairs offers a minor in political science, which exposes students to the different subfields of political science and trains students to examine political phenomena from an empirical and analytical perspective. 24 hours: 6 core, 18 subfield electives with at least 12 hours selected from 300-level courses or above.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Political Science

24 hours in political science with at least 12 hours selected from 300-level courses or above. Courses to be distributed as follows:

Core Courses (6 Credit Hours)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 201 - Introduction to Political Science Methods

Introduction to the rationale and application of the scientific method to political analysis. Major topics include: statement of problem, survey of literature,

theory construction, data collection and analysis, and presentation of findings and conclusions.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

Elective Courses (18 Credit Hours)

18 subfield electives with at least 12 hours selected from 300-level courses or above.

American Government and Politics Course

PLS 202 - Contemporary American Political Issues

Important political issues and their relationship to the overall American political process. Topics are selected from, but not limited to: education policy; health care policy; federal deficit and debt policy; and minorities and politics.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 203 - Religion and Politics in the United States

An examination of the origin, nature, and consequences of religion's influence on political values, institutions, and policies in the United States.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 204 - Judicial Politics

An analysis of the organization, powers and role of the judiciary. Topics include: the political role of judges, factors influencing judicial policy-making, selection of judges, the role of lawyers, and judicial decision-making.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 205 - Campaign and Elections

Focuses on the electoral arena (history, financing, political environments), nominations (delegate selections and conventions), campaigns (organization, strategy, tactics, media), and the election (votes, policy, reforms). Special attention is given to recent and current presidential and congressional election campaigns.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 300 - American Constitutional Law I

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights.

The powers of the judicial, executive, and legislative branches of national government; the relationships among these branches; and the federal system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 301 - American Constitutional Law II

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights. Individual rights and liberties other than procedural rights of persons involved with the criminal justice system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 302 - The Politics of the Supreme Court

Explores the role of Supreme Court in the American political system. Reviews the Court's history, membership, operations, and interactions with the other branches of government and the public. Focuses on the social scientific theories that explain the behavior of the justices and other individuals associated with the Court.

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Or permission of instructor.
Course Repeatability: Course may not be repeated.

PLS 303 - Political Behavior

The impact of citizen beliefs and preferences on election outcomes, and the factors that influence political participation. Structured around a critical examination of the assumptions, findings, and interpretations of the major studies of political behavior.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore,

junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 305 - The Constitution and the Criminal Justice System

Study of U.S. Supreme Court decisions on rights of suspects, defendants, witnesses, and convicted criminals.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 307 - The American Legislature

Functional study of legislative bodies and lawmaking. Among the topics studied will be the role of legislatures; the impact of constituencies, parties, interest groups, interpersonal relationships and other pressures on legislators; legislative structure; and the decision-

making process.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 309 - The American Chief Executive

Examination of the concept of a political chief executive as a coordinate member, with legislature and courts, of a government team. Emphasis will be placed on the powers, roles, decision-making processes, and institutional development of the offices of president, governor, and mayor.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 311 - Legal Research and Writing

Students will locate, apply, and analyze law in correct and precise written form. Legal formatting and Bluebook citation will be emphasized. Iterative writing assignments will encourage students to incorporate cohesive revisions leading to critical analysis in objective and persuasive writing. Students will produce a legal memorandum and a court brief while utilizing critical written analysis of the law.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 316 - Women in Politics

Introduction to political perspectives on sex role differentiation. Among the topics to be discussed will be political socialization of women in ancient and modern society; women's roles in politics and government; political consequences of women's entry into the work force; and contemporary issues in the women's movement. Emphasis will be placed throughout on comparative political analysis.

Credit Hours: 3

Prerequisite Courses: PLS 101 or PLS 111
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 340 - The Black Experience in American Politics

American political institutions and processes through the eyes of Black America. This study will analyze the power structure in the black community, dissent and protest, black participation in the political system, black leaders and politicians and their politics, and the uniqueness of black politics as compared with the wider spectrum of the political system.

Credit Hours: 3

Prerequisite Courses: PLS 101 or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 341 - Latino Politics

Role of Latino communities in shaping state and national politics in the United States. Latino political empowerment strategies, political representation, the electoral impact of Latino votes, and contemporary public policy issues.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 350 - State Government and Politics

Survey and analysis of the organization, functions, and political processes of the American states with an emphasis on North Carolina politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 351 - Urban Government and Politics

Structure, functions, political processes, problems, and trends in American city and metropolitan government and politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 353 - American Parties and Interest Groups

Historical and analytical treatment of the appearance and realignment of political parties during the five successive 'national party systems' since the beginning of the republic. Special emphasis is given to the question of contemporary party disarray and potential realignment.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore,

junior or senior standing or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 402 - U.S. Immigration Politics

Evolution of immigration policy in the U.S. Experience with various immigration time periods and source countries. Identifies the primary costs and benefits of immigration, with special attention to the policy changes making immigration more difficult over time. Conditions under which immigration increases or decreases, including the contemporary increase in the rate of illegal immigration.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 403 - Public Opinion

Origin, content, and policy impact of public opinion in democratic nations. Emphasis on the contemporary American experience and the genesis of mass movements.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 404 - Campaign Management and Strategies

Internal mechanics of political campaigns, major areas of campaign management and strategy, campaign organization, voter contact, campaign research, finance and fund-raising, and communications. Special attention is given to recent and current presidential, congressional, and gubernatorial election campaigns.

Credit Hours: 3

Prerequisite Courses: PLS 205
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.

University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 405 - Washington D. Seahawks: Experiential Learning in DC

Exploration of career opportunities in Washington, DC, through experiential learning. Utilization of on-campus resources, including the Career Center and the Alumni Association, to plan a trip to Washington, DC, to network with UNCW alumni, political practitioners, and other public affairs professionals. Students are required to participate in the trip to Washington, D.C.

Credit Hours: 3

Additional Restrictions/Requirements: Permission of Instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 406 - Contemporary Southern Politics

Recent developments throughout the American South and their impact on national politics. Topics include southern political culture, the decline of the one-party system, and the changing roles of blacks and organized labor. Emphasis is placed upon independent research projects involving student analysis of census, election return, and public opinion survey data.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or the consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 407 - Political Psychology

Examination of the leading scholarship in political psychology to investigate critical issues in American politics. After introducing political psychology's history, methods and major themes, course addresses the psychological aspects of campaign politics, public opinion, intergroup relations and leadership.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Public Policy and Public Administration Course

PLS 209 - Environmental Politics

Role of politics in environmental policy. Topics include the politics of the environmental movement, the environment as a public policy issue, and the development and impact of environmental policy.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals,

role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 304 - Introduction to Public Policy Analysis

Study of the theories and methods of analyzing and explaining public policy and the substance of recent domestic policies in the areas of public finance and human and physical resources, including welfare, education, protection of the environment, housing, health, urban renewal and transportation.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 308 - Public Administration

Introduction to public administration in the United States. Nature and scope of public administration, public interest in the administrative process, role of administrators, formal and informal organization, public personnel and financial management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 327 - Science, Technology, and Innovation Policy

Contemporary issues in the study and critique of science, technology and innovation policy including an overview of dynamics at the interface of science, politics and policy. Topic examples include: public and private spending on research and development (R&D), responsible innovation, governing artificial intelligence, science advice, integrity in science, evidence-based decision making, ethics in intellectual property.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or

Senior standing.
Course Repeatability: Course may not be repeated.

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 354 - Urban Planning and Policy

Overview of the policies, plans, and regulations that local governments used to shape the physical growth of cities, towns, and suburbs. A range of topics are covered, such as transportation planning, historic preservation, and affordable housing development.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 359 - American Policy Development: Politics, Institutions and Theories

Examination of the political events and ideas needed to understand the growth of American government. Study of how the change of institutional power contributed to the growth of government within our federal system. Students produce an empirical/data analysis of an important institutional aspect of American politics.

Credit Hours: 3

University Studies: Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 362 - Leading and Managing Volunteers

Addresses major issues in the leadership and management of volunteers in the nonprofit and public sectors. Focuses on the two main types of volunteers: service volunteers, and policy volunteers (board members). Topics covered include volunteer recruitment, screening, job design, supervision, recognition, and evaluation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 370 - Global Environmental Governance

Explores international environmental negotiations and agreements of global environmental problems regarding overfishing, climate change, deforestation, biodiversity loss, trans-boundary pollutants, and water scarcity. Examines the debate surrounding sustainable development, ecological justice, and conflicts around resource scarcity.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 434 - Nonprofit Leadership Experience

An engaged learning experience where students learn about nonprofit organizations, acquire useful employment skills and apply them in projects designed by nonprofit organizations in conjunction with the instructor. Students will complete projects developed and needed by nonprofit organizations in the community; and students will meet and interact with members of the UNCW and nonprofit community.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: PLS 534
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Political Theory Course

PLS 212 - Introduction to Political Theory

Fundamental questions about the nature and purpose of politics as treated by such writers as Plato, Augustine, Locke, Hobbes, and Marx.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 310 - Legal Philosophy and Jurisprudence

Introduction to the nature, concept and sources of law and the various schools of jurisprudence. Topics treated include natural law; historical, analytical and sociological jurisprudence; idealism; utilitarianism; legal realism; equity, justice, precedent, custom and law; and the relation of law and morality.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Crosslisting: PAR 310
Course Repeatability: Course may not be repeated.

PLS 312 - Political Analysis

Special topics course focusing on learning political analysis skills relevant to a variety of career paths and practical applications in the fields of political science

and public policy. Course topics may include qualitative analysis, quantitative analysis, statistical programming, experimental design, geospatial analysis (GIS), or game theory.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

PLS 313 - Early Political Thought

Introduction to the origin and development of political theory from the 5th Century B.C. through the medieval era. Emphasis will be placed on the political ideas of Plato, Aristotle, the Epicureans, the Stoics, Cicero, Augustine, medieval philosophers, and Aquinas in order to discover the recurring themes of political inquiry.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 314 - Modern Political Thought

Critical examination of political ideas from 1500 to 1900 with special attention to those of Machiavelli, Hobbes, Locke, Rousseau, Montesquieu, Hume, Burke, Hegel, Bentham, Marx, the Mills, Spencer, T.H. Green and Nietzsche.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 315 - Contemporary Political Ideologies

Ideology and its significance in the modern world. Systematic analysis of the major political ideologies of the 19th and 20th centuries with emphasis on democracy, communism, fascism, nationalism,

anarchism, and the New Left.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 317 - Political Thought of Asia

Recommended: PLS 212. Critical assessment of philosophical responses to the political, economic, and social challenges faced by the Asian Region. Considers Asian political thought comparatively, addressing recurring issues of politics and community life.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 415 - American Political Thought

American political thought from the colonial period to the present.

Credit Hours: 3

Prerequisite Courses: PLS 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

International Relations Course

PLS 218 - Ethics in International Affairs

Role of morality in international affairs to explore how states and citizens act responsibly in international public life. Drawing on the traditions of realism, liberalism, and utilitarianism along with the just war tradition, the course examines the ethical implications of issues such as war, terrorism, globalization, and genocide.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PLS 221 - Model United Nations I - Introduction to United Nations Issues and Organization

Introduction to United Nations issues and organization. Course focus on active learning through simulation of international diplomacy, speech making, negotiation, and foreign policy development. Course requires travel to a Model United Nations conference, with additional costs for students.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 222 - Contemporary International Political Issues

Important international political issues and their impact on the political processes among the nations of the world. Topics are selected from, but not limited to: the role of the United Nations; environmental policy; separatism and nationalism; religious conflict and international order; terrorism; and economic development.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear

weapons technology, why countries seek nuclear weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 422 - Contemporary American Foreign Policy

Roles and interrelationships of Congress, the media, public opinion, the president, the secretaries and departments of state and defense, and the intelligence community are examined. Emphasis is placed on the content and the dynamic aspects of the process of policy formulation and implementation.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 423 - National Security Policy

Formulation of security policy, including the roles of the executive and legislative branches and of non-governmental factors; evolution of changing assumptions, strategies, and goals; the nature of U.S. security requirements, U.S. military commitments abroad, and the cost of strategies based on weapons superiority, arms control, and disarmament.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 425 - International Politics

Students are provided with an overview of the current International system and introduced to the theories actors, their interactions, and the norms of the international system. The impact of the law and norms of international relations or international conflict are

analyzed and debated.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Crosslisting: CMR 525
Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 429 - International Political Economy

Political-economic structures at the international level (trade, finance, and currency) and the impact of the government, business, and human networks that emerge as a result of political-economic interactions between countries.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

PLS 463 - International Development

Examines the field of international development including economic development and governance assistance activities with attention to classic theories as well as current debates and innovative approaches.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Comparative Government and Politics Course

PLS 230 - Introduction to Comparative Government and Politics

Comparative analysis of political systems in developed, second- and third-world nations, including an examination of the foundations and structures of selected national governments, such as parliamentary and presidential systems, democratic and non-democratic systems.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 330 - Political Systems of Africa

Governments and politics of selected sub-Saharan African states. A survey from colonial days to the

present with emphasis on contemporary economic, social and political problems.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 331 - Politics in Developing Nations

Political, economic, and social problems confronting developing nations. Attention will be given to such issues as cultural pluralism, one-party states, military dictatorships, and U.S. relations with the developing world.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 332 - Politics of Central America

Introduction to core political issues facing the Central American, political history as well as contemporary processes. Students will critically evaluate development and the problems associated with moving from underdeveloped to ""developed"" status.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 333 - Politics of South America

Politics of South America and the impact of socio-economic forces on the region and its political structures.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 334 - Revolutionary Movements

Introduction to the social, political, and economic conditions which give rise to radical response. Examines small rebel bands, or militias (commonly referred to as 'guerrilla' movements), and 'terrorist' organizations, as well as large-scale revolutionary movements.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 335 - European Political Systems

Political institutions and processes of selected European countries, including Great Britain, France and Germany.

Credit Hours: 3

Prerequisite Courses: PLS 230

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the

post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 343 - Democratic Transition in the United States

Examination of the process of democratic transition and consolidation in the United States from 1898 to the present. Focus on the comparative analysis of scholarly literature concerning democratic transition and consolidation.

Credit Hours: 3

Prerequisite Courses: PLS 230, or permission of instructor,
University Studies: Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 430 - Caribbean Politics

Examines the importance of size, the influence of global forces, and the difficulties of unification and coordination in the Caribbean political context.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 464 - Democracy and Authoritarianism

Integrative course focusing on scholarly literature on democracy, authoritarianism, and democratization, with an emphasis on real world examples of regime types and transitions.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 24

Additional Information

Students must earn a course grade of C- or above. A minimum GPA of "C" (2.00) is required among all courses counted for a minor in political science.

If a course appears in more than one category (e.g., PLS 421), students can only use the course to fulfill one of the categories, not both.

Popular Music Minor

An interdisciplinary program open to non-majors and students majoring in music or music education, the popular music minor provides students with foundational skills in applied music (voice, piano, guitar, ukulele, electric bass, and drum set); songwriting and composition techniques using digital technology and popular music instruments; courses in musicianship, history and literature; and performance opportunities in a variety of ensemble settings. For additional information, students should contact the coordinator of Dr. Jonathan Kladder, coordinator of the popular music program.

Students must complete 6 credits in the Popular Music minor at or above the 300-level.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Popular Music

Students must complete 6 credits in the Popular Music minor at or above the 300-level.

Voice Performance Course (1 Credit Hour)

MUS 146 - Class Voice I

Intended for beginning singers and non-majors. Singing techniques learned through vocal exercises and study of song literature.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Repeat Limit: 2

> Students who successfully audition into MUS 195 or MUS 196 may substitute 1 credit of MUS 195 or MUS 196 applied lessons for Class Voice I (MUS 146).

Guitar Performance Course (1 Credit Hour)

MUS 143 - Class Guitar I

Intended for beginning guitarists and non-majors. Covers topics such as reading music on the first five frets of the guitar, basic chord fingerings, technique for beginners, and simple accompaniment methods.

Credit Hours: 1

Course Repeatability: Course may not be repeated. Students who successfully audition into MUS 195 or MUS 196 may substitute 1 credit of MUS 195 or MUS 196 applied lessons for Guitar Class I (MUS 143).

Piano Performance Course (1-2 Credit Hours)

Students must choose 1 course from the following:

MUS 136 - Jazz Theory and Keyboard

Theoretical concepts, aural skill, and basic keyboard skills associated with jazz styles.

Credit Hours: 2

Prerequisite Courses: MUS 111 and MUSL 111
Course Repeatability: Course may not be repeated.

MUS 140 - Basic Piano for Non-Majors

Note reading, rhythm, technique, other elements of elementary piano playing. Basic repertoire. No previous music study required. Two hours per week. May be

repeated for credit.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4

MUS 141 - Class Piano I

Basic piano skills development, including sight-reading, repertoire, major scales and arpeggios, accompanying, and harmonization. Preparation for the piano proficiency exam required of music majors.

Credit Hours: 1

Additional Restrictions/Requirements: Placement test or consent of department chair.
Course Repeatability: Course may not be repeated.

Students who successfully audition into MUS 195 or MUS 196 may substitute 1 credit of MUS 195 or MUS 196 applied lessons for any of the following: MUS 136, MUS 140, MUS 141.

Ensemble Performance Courses (3 Credit Hours)

Students must choose 1 credit in the first category and 2 credits in the second category:

Students must choose 1 credit in the first category and 2 credits in the second category:

MUS 183 - Chamber Singers

Select group chosen by audition. The singers study and perform a variety of repertoire written for a smaller choir or chamber group. Three rehearsal hours per week. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

MUS 184 - Jazz Ensemble

The development of idiomatic performance techniques of jazz music in a variety of styles and mediums

through the study of its musicians, as well as performance practices throughout its history. (Intended for students who have had instrumental experience.) May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Audition and consent of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 185 - Symphonic Band

The Symphonic Band is an outstanding ensemble consisting of highly talented woodwind, brass and percussion players, including both music majors and non-music majors. Enrollment is open to all UNCW students with previous instrumental experience and the necessary skills to perform on a wind or percussion instrument. Three rehearsal hours per week and

typically two concerts each semester. May be repeated for credit.

Credit Hours: 1

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 186 - University Chorale

Singers study and perform repertoire of various historical periods and styles appropriate for large chorus. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Auditions and consent of director.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 11

MUS 188 - Pep Band

Study and performance of contemporary music written for athletic bands. The Pep Band provides music at men's and women's basketball home games and other university events. Rehearsal and performances as dictated by the schedule of events. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: The ability to read music and perform at a basic level on a standard pep band instrument and consent of director.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

MUS 189 - Jazz Combo

By audition only. Small group rehearsal and performance of jazz standards, original jazz compositions and arrangements.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Students choose 2 credits from the following (at 1 credit per semester):

MUS 130 - Chamber Music Workshop

Small instrumental and vocal ensembles. Type of group depends on the availability of personnel. Meets one to two hours weekly with instructor for coaching plus individual practice and weekly rehearsal with partner(s). Previous training required. May be repeated for credit.

Credit Hours: 1

Additional Restrictions/Requirements: Consent of instructor and department chair.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

Either Digital Controller or Pop Rock Ensembles.

Popular Music Instruments Performance Course (1 Credit Hours)

Students will learn ukulele, electric bass guitar, and drum set.

MUS 246 - Instrumental Techniques III

Basic playing technique on ukulele, electric bass, and drum set. Students learn beginner and intermediate skills in the popular music idiom, including tablature, lead sheets, and ear-based approaches for learning and performing music.

Credit Hours: 1

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 3

Music History Course (3 Credit Hours)

Students choose from one of the following:

FNA 103 - Pop Divas and the Art of Performance

Interdisciplinary exploration of star singers in American popular culture, from Jenny Lind to Taylor Swift, Beyoncé, and beyond. Focus on the evolution of theatrical components in stage performances, musical

and lyrical analysis, fan and media reception, and the metaphorical "performance" of the celebrity self. Selected topics may vary by semester.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 116 - History of Jazz

A survey of the evolution of this American art form from its African roots and European influences to the present. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 117 - American Music

A survey of American composers, musicians, and music making from the earliest days of European settlement to the present. Includes a variety of styles: folk, religious, concert, rock, and more. Technical knowledge of music helpful, but not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

MUS 118 - History of Rock

A study of the musicians styles and movements that were central to the development of rock music from the early 1950s to the present. No previous musical knowledge is required.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Aesthetic, Interpretive, and Literary Perspectives
Course Repeatability: Course may not be repeated.

MUS 120 - Latin American Music

Introduction to the History of Latin American Music and examination of the history of Latin American music. The course aims to broaden the student's appreciation and understanding of Latin American music and society. Throughout the semester we will discuss some of the region's most significant composers, genres, and styles.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MUS 220 - African American Music

A survey of the eveolution of African American music from its African roots to current trends in jazz, gospel, R & B, and hip-hop. Technical knowledge of music not required.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthestic, Interpretive and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MUS 345 - Latin American Popular Music

Survey of popular music genres in Latin America, focusing on musical characteristics and components, instruments and performance techniques, and historical developments in their evolving musical forms. Music will be presented with contextual information on the social, religious, and economic history of each region.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

MUS 365 - Advanced Jazz History

Examination of jazz history, from the early twentieth century to today, with emphasis on the music's origins, development, and main contributors. Analysis of harmony, form, and style features while improving listening skills. By the end, students engage in a more profound intellectual discussion about jazz.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Music Technology Course (1 Credit Hour)

All students must take and succesfully pass MUS 110 with a minimum of a C-.

MUS 110 - Introduction to Music Technology

Overview of music technology for the music major. Introduction to Digital Audio Workstation environments, basic MIDI sequencing, and traditional notation software.

Credit Hours: 1

Course Repeatability: Course may not be repeated.

Music Theory & Aural Skills Courses (3 Credit Hours)

Students must complete and successfully pass MUS 111 and MUSL 111 with a minimum passing grade of a C-. All students will be required to take a music literacy pretest which will determine what theory course is appropriate. Students who are not able to pass the theory pretest should plan to take MUS 105 prior to MUS 111 and MUSL 111.

MUS 111 - Theory I

An in-depth study of the basic material of music, including notation of pitch and rhythm, intervals, scales and modes, key signatures, and triads. The lab for this course is MUSL 111.

Credit Hours: 2

Corequisite Courses: ["MUSL 111"]
Additional Restrictions/Requirements: Corerequisite course; Theory Placement test required.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives
Course Repeatability: Course may not be repeated.

MUSL 111 - Aural Skills and Sight-Singing I

Includes melodic, harmonic and rhythmic dictation and sight-singing using the materials introduced in MUS 111. This course is the lab for MUS 111.

Credit Hours: 1

Corequisite Courses: ["MUS 111"]
Course Repeatability: Course may not be repeated.

Popular Music Elective Courses (6 Credit Hours)

Students choose from the course listing below and must complete 6 credits of electives.
* Music Technology students should plan to take MUS 305 and MUS 307 for their popular music minor electives and a 300-level history/literature course.
* Students who fulfill their history/literature requirement with a 100-level course must choose all 300-level courses for popular music electives.

MUS 210 - Digital Music Production

Applications of music technology software for digital music production in Digital Audio Workstation environments, including non-traditional notation systems, intermediate-level work with MIDI sequencing, DAW signal flow, stereo mixing techniques, software-based virtual instruments, and intermediate sampling techniques.

Credit Hours: 2

Prerequisite Courses: MUS 110.
Course Repeatability: Course may not be repeated.

MUS 214 - Recording Technology I

Introduction to the fundamentals of audio engineering. Technical basics in the "language of audio." Emphasis is on Pro Tools recording software, audio interfaces, project workflow, the principles behind the five main stages of a recording project, and mastering music. Theoretical and practical application of microphones, mic pre-amps, equalizers, compressors, noise gates, effects, room acoustics, gain structure, and signal path.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MUS 305 - Beat Making

Comprehensive overview of Hip Hop beat making. Fosters each student development as a beat maker, in in EDM, house, dance/club, top 40, drum and bass, boom bap or any other subgenre of interest. No prerequisite. 2 credits hours.

Credit Hours: 2

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

MUS 307 - Songwriting

Study of basic songwriting styles and techniques, including methods for developing the skills and knowledge to construct well-crafted lyrics, melodies, and chords. Students develop their musical identity and critical listening skills through analysis, discussion, synthesis, and songwriting activities.

Credit Hours: 2

Prerequisite or Corequisite Courses: MUS 110.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 4 **Repeat Limit:** 1

MUS 310 - Film Scoring and Video Game Music

Intermediate study of digital sound synthesis, sampling, and MIDI sequencing, with an emphasis on scoring for film and video games.

Credit Hours: 3

Prerequisite Courses: MUS 214.
Course Repeatability: Course may not be repeated.

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

Total: 20-21 Credits

Portuguese/Brazilian Studies Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Portuguese/Brazilian Studies

18 hours at the 200 level and above, including approved courses taught abroad and up to three approved courses taught in English.

Of these, at least 9 hours must be at the 300 level or higher.

Total Credit Hours: 18

Additional Information

A grade of "C-" or better is required in each course counted toward the minor. A minimum "C" (2.0) average is required for all courses counted toward the minor.

Pre-Law Minor

The College of Humanities, Social Sciences, and the Arts offers a pre-law minor designed to prepare students with the foundational knowledge, critical

thinking abilities, and other essential skills to succeed in the field of the law.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Pre-Law Minor

The minor requires 24 hours of course work, including 15 hours of core courses, 3 hours of applied or skills-based courses, and 6 hours of other related courses in the legal field.

Core Courses (15 Credit Hours)

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 300 - American Constitutional Law I

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights. The powers of the judicial, executive, and legislative branches of national government; the relationships among these branches; and the federal system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 301 - American Constitutional Law II

Analytical study of U.S. Supreme Court decisions affecting separation of powers and individual rights. Individual rights and liberties other than procedural rights of persons involved with the criminal justice system.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 305 - The Constitution and the Criminal Justice System

Study of U.S. Supreme Court decisions on rights of suspects, defendants, witnesses, and convicted criminals.

Credit Hours: 3

Prerequisite Courses: PLS 101
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 310 - Legal Philosophy and Jurisprudence

Introduction to the nature, concept and sources of law and the various schools of jurisprudence. Topics

treated include natural law; historical, analytical and sociological jurisprudence; idealism; utilitarianism; legal realism; equity, justice, precedent, custom and law; and the relation of law and morality.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Crosslisting: PAR 310
Course Repeatability: Course may not be repeated.

Skills Course (3 Credit Hours)

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201

Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

COM 101 - Public Speaking

Preparation and delivery of public presentations, with emphasis on creativity, reasoning, evidence, organization, and delivery. Course content will also be applied to analysis of speeches by self and others.

Credit Hours: 3

University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

COM 223 - Mediation and Conflict Management

Introduction to the principles of conflict management and alternative dispute resolution with an emphasis on mediation and conflict theory. Other topics include negotiation, arbitration and litigation.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 105.
Course Repeatability: Course may not be repeated.

COM 257 - Arguing Well: Exploring Argumentation and Debate

Explores principles, practices and ethical dimensions of argumentation and their application to debates and decision-making. Students will engage in research and critical thinking in order to construct cases and participate in debates about issues of interest.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

COM 425 - Negotiation

Theoretical and practical perspectives of negotiation. Emphasis on negotiating techniques for use in business and interpersonal relationships. Explores differences between integrative and distributive bargaining.

Credit Hours: 3

Prerequisite Courses: COM 223
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PAR 110 - Introduction to Logic

Introduction to the principles of logic including the rules of deduction, the categorical syllogism, induction, and fallacies. Initiation in computer logic programs.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 311 - Legal Research and Writing

Students will locate, apply, and analyze law in correct and precise written form. Legal formatting and Bluebook citation will be emphasized. Iterative writing assignments will encourage students to incorporate cohesive revisions leading to critical analysis in objective and persuasive writing. Students will produce a legal memorandum and a court brief while utilizing critical written analysis of the law.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 498 - Internship in Political Science

Experiential learning with selected public or private agencies or with an individual which allows the student

to utilize academic training while learning from a practical field experience. (Formal research project is a major part of the internship.)

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201 and (PLS 300 or PLS 304 or PLS 308)
Additional Restrictions/Requirements: Prerequisite courses, junior or senior standing, overall 3.00 GPA or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Major Restriction Political Science**Minor Restriction** Pre-Law

Related Courses (6 Credit Hours)

BLA 261 - Law and Society

This course introduces students to legal concepts and provides an understanding of the role the law plays in an individual's personal and professional life. Students will also be exposed to legal, social, and ethical issues which impact societal norms..

Credit Hours: 3

Course Repeatability: Course may not be repeated.

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in government. Examines how the legal environment is influenced by changing social and ethical values. Topics include agency, antitrust, forms of business organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of

Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

BLA 363 - Cyber Law

A study of how the legal system impacts e-commerce. Examines how Trademark Law, Copyright Law and Patent Law impact e-commerce activities. Other topics include on-line contracting issues, taxation of e-commerce transactions on a statewide, national, and international basis, privacy concerns, obscenity, defamation, information security, computer criminal activities, as well as global e-commerce issues.

Credit Hours: 3

Prerequisite Courses: BLA 361
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

BLA 371 - International Business Law

An examination of the legal, political, social and cultural aspects of doing business abroad. The course will

cover major legal systems of the world, the political and governmental structures of various nations, international organizations, the law of international business transactions, and the settlement of transnational legal disputes. The course also will highlight cultural challenges and opportunities that an American may encounter in international business.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of Department Chair.
Course Repeatability: Course may not be repeated.

BLA 461 - Commercial Law

Study of the commercial legal environment in which business enterprises operate. Examines the law of contracts, sales and warranties, security interests, commercial paper, and debtor and creditor rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of

Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

COM 361 - Media Law and Ethics

Survey of laws and ethical principles that inform and regulate mediated communication including: freedom of speech and expression, defamation, invasion of privacy, intellectual property, the rights and responsibilities of journalists/reporters, and the regulation of journalism, advertising, public relations and multimedia industries.

Credit Hours: 3

Prerequisite Courses: COM 265 or COM 268, or permission of instructor.
Additional Restrictions/Requirements: COM Major or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors**Minor Restriction** Journalism Minors

CRM 105 - Introduction to Criminal Justice

Study of criminal law and the criminal justice system in the U.S. Emphasis on structure and function of police, courts and corrections.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 110 - Crime and Justice Issues

Critical issues and contemporary debates in crime and justice.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

CRM 250 - Crime in the Cape Fear

Topics relating to crime and punishment in the American legal system as viewed through the lens of the Cape Fear region. Explore a number of solutions to crime in the Cape Fear Region, many of which are unique to the area. Also serves as an introduction to the community and its fabric in the Cape Fear Region.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: PLS 250
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

CRM 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: CRM 105or SOC 105
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: SOC 255
Course Repeatability: Course may not be repeated.

CRM 307 - Police in Society

Analysis of role and behavior of police in the U.S. Special attention to social environment and political climate affecting the police.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 310 - White Collar Crime

Study of crimes of the powerful and the privileged. Topics include: corporate crime; environmental crime; antitrust violations; political bribery; corruption; tax evasion; fraud; embezzlement; conflict of interest.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 315 - Victimology

Role of victims in crime and criminal justice system. Special focus on sexual battery, battered women and child abuse.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 320 - Criminal Courts

Analysis of structure and function of U.S. criminal courts. Examines relationships among the courthouse work-group (police, prosecutor, defense attorney, judge) and the role of witnesses, victims, defendants and jurors.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 330 - Corrections

Study of societal patterns of punishment, alternatives to incarceration, consequences of imprisonment and correctional strategies of rehabilitation and deterrence.

Credit Hours: 3

Prerequisite Courses: CRM 105
Course Repeatability: Course may not be repeated.

CRM 370 - Racialization and the Criminal Justice System

Study of the relationships between racialization and criminalization. Exploration of the social, political and legal conceptions of "crime" and "justice" using critical perspectives and theories of crime.

Credit Hours: 3

Prerequisite Courses: CRM 105.

Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 375 - Drugs and Crime

Examination of the impact of drug use upon families, communities and the criminal justice system. Special attention given to how drug laws have criminalized vast numbers of people within our society.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

CRM 380 - Criminal Law

Basic concepts of statutory and common law. Topics include: definition of crime; elements of major crimes; criminal responsibility; defenses to criminal charges; inchoate and group criminality; and limitations of the criminal law. Special focus on North Carolina law.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 381 - Criminal Procedure

Basic concepts of procedural law. Topics include the nationalization of the Bill of Rights, searchers, seizures, probable cause, warrants, arrest, self-incrimination, right to counsel, and double jeopardy.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and

differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 420 - Collective Violence

Analysis of group violence and its control. Topics include the theory and strategy of mass violence, terrorism, genocide, riots and revolutions, and historical and contemporary forms of warfare and the examination of case studies to identify the influence of society, culture, and politics on such events, as well as the impact these events have on society.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Nine hours in CRM.
Course Repeatability: Course may not be repeated.

FST 304 - Legal Issues in Film and Entertainment Law

Study of the legal issues impacting the film and entertainment industry, including the legal aspects of business organization, contracts, torts, agency, employment law, environmental regulation, and intellectual property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: BLA 304
Course Repeatability: Course may not be repeated.

MGT 456 - Employee and Labor Relations

Study of the current legislation affecting employee and labor relations, union organizing, collective bargaining, contract administration, union-management relations, and best practices in employee relations in both unionized and non-unionized environments.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

PAR 220 - Race and Social Justice

Introduction to philosophical issues in race and social justice. Topics include race and identity, discrimination, multiculturalism, affirmative action, anti-racism.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PED 379 - Sport, Physical Activity and the Law

An introduction to the legal aspects of amateur sport and physical activity, emphasizing the legal knowledge practitioners need to function effectively. Considers terminology, procedure, operations of the law, and case studies.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: ["EXS 311"]
Course Repeatability: Course may not be repeated.

PLS 204 - Judicial Politics

An analysis of the organization, powers and role of the judiciary. Topics include: the political role of judges, factors influencing judicial policy-making, selection of judges, the role of lawyers, and judicial decision-making.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 250 - Crime in the Cape Fear

Topics relating to crime and punishment in the American legal system as viewed through the lens of the Cape Fear region. Explore a number of solutions to crime in the Cape Fear Region, many of which are unique to the area. Also serves as an introduction to

the community and its fabric in the Cape Fear Region.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: CRM 250
Course Repeatability: Course may not be repeated.

PLS 329 - Ocean and Coastal Law and Policy

National and international laws and policies concerning the ocean. Topics include: fisheries management, marine mammal protection, shipping and navigation, oil and chemical pollution, coastal and wetlands protection, submerged lands, riparian rights, and public access to coastal lands and waters.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 426 - International Law

Nature, development and basic concepts of international law. Examination of the scope, sources

and sanctions of international law; its relation to municipal law; the rights and duties of states and individuals; methods of settling international disputes. Characteristic cases used as illustrations.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

SOC 255 - Criminology

May not be taken for credit if student has already completed SOC 256 or CRM 256. The scientific study of the nature, extent, correlates and etiology of crime, with an emphasis on sociological theories of crime. Topics include crimes against persons and property, public order crimes, and both informal and formal reactions to crime.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Crosslisting: CRM 255
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 449 - Sociology of Law

Analysis of the role of law in society. Special emphasis given to the relationship between law and social organization and the relation of sociocultural changes to substantive and procedural aspects of law. Law viewed as a collectivistic-individualistic process and as a reflection of sociocultural values.

Credit Hours: 3

Prerequisite Courses: SOC 105.
Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: CRM 449
Course Repeatability: Course may not be repeated.

SOC 321 - Immigration and U.S. Society

Sociological considerations of immigration with a focus on the U.S. Major topics include why people migrate, the role of immigration and the immigration system in the larger society, how immigrants impact U.S. society, how social locations and institutions shape immigrants' lives.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors, Approaches and Perspectives/Living in a Diverse Nation
Course Repeatability: Course may not be repeated.

SWK 311 - Child Abuse and Neglect

Study of the knowledge base, laws, and professional roles associated with contemporary child welfare practice. Identification of child maltreatment, reporting procedures and community-based interdisciplinary practice issues are emphasized. Upon acceptance to the NC Child Welfare Education Collaborative, students must complete both SWK 311 and SWK 312 before admission to a DSS field placement.

Credit Hours: 3

Additional Restrictions/Requirements: Students must earn a "C" or better in each SWK course in order to progress in the program.
Course Repeatability: Course may not be repeated.

Total Credit Hours: 24

Additional Information

Note that some of the related courses have prerequisites which are not themselves counted toward the minor. Students must acquire the prerequisites and not ask to be waived into courses. Further, some of the related courses are only open to students in the Cameron School of Business. Related courses are also offered under PLS 495 (Department Seminar). These and other courses may be counted toward the minor at the discretion of the minor coordinator. A waiver form signed by the minor coordinator should be submitted in these cases. Students must earn at least a 'B' (3.00) average in all courses counted for the pre-law minor. At least six of the twenty-four hours counted toward the minor must come from outside the Department of

Public and International Affairs. Please note that the internship in Political Science (PLS 498) requires a minimum of a 3.0 overall GPA. In some cases, the instructor may grant students with lower GPAs the opportunity to pursue the internship for academic credit. The pre-law minor is designed to provide an advantage to students who plan to apply to law school after completing their degree; however, the minor is not a requirement for law school applicants.

Pre-Medical Sciences Minor

The minor in pre-medical sciences is designed to prepare students for admissions to medical, dental, pharmacy, or veterinary school after graduation by completing the major science and mathematics courses required as prerequisites for most programs. Contact the Department of Chemistry and Biochemistry for more information.

Minor in Pre-Medical Sciences

BIO 240 - Human Anatomy and Physiology I

Lecture must be taken concurrent with BIOL 240 . An introduction to the human organism with particular emphasis on maintenance of an internal steady state.

Tissues, musculoskeletal, nervous, and endocrine systems are stressed. The lab for this course is BIOL 240.

Credit Hours: 3

Corequisite Courses: BIOL 240.
Prerequisite Courses: BIO 201 and CHM 101 and CHML 101.
University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

BIOL 240 - Human Anatomy and Physiology Laboratory I

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 240. This course is the lab for BIO 240.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 240.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World
Course Repeatability: Course may not be repeated.

I

BIO 241 - Human Anatomy and Physiology II

A comprehensive study of human organ systems as relates to the maintenance of homeostasis. Topics include cardiovascular, respiratory, digestive, urinary, and reproductive systems. The lab for this course is BIOL 241.

Credit Hours: 3

Corequisite Courses: BIOL 241
Prerequisite Courses: BIO 240
Course Repeatability: Course may not be repeated.

BIOL 241 - Human Anatomy and Physiology Laboratory II

Basic histology, dissections, and physiology experiments to demonstrate principles explored in BIO 241. This course is the lab for BIO 241.

Credit Hours: 1

Prerequisite Courses: Prerequisite or corequisite: BIO 241.
Course Repeatability: Course may not be repeated.
I

BIO 335 - Genetics

Principles of Mendelian inheritance, gene action and molecular genetics, and population genetics. The lab for this course is BIOL 335.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

CHM 211 - Organic Chemistry I

Introduction to the chemistry of carbon compounds, including structure, reactions, mechanisms, and the concepts of organic synthesis. It is strongly recommended that students take the lab (CHML 211) concurrently with the lecture. The lab for this course is

CHML 211.

Credit Hours: 3

Prerequisite Courses: CHM 102
Course Repeatability: Course may not be repeated.

CHML 211 - Organic Chemistry Laboratory I

Introduction to reactions of organic compounds and basic laboratory techniques. This course is the lab for CHM 211.

Credit Hours: 1

Prerequisite or Corequisite Courses: CHM 211.
Prerequisite Courses: CHML 102
Course Repeatability: Course may not be repeated.

CHM 212 - Organic Chemistry II

Reactions and reaction mechanisms of organic compounds. A 'C' or better in CHM 212 is required to take certain advanced courses in chemistry. The lab for this course is CHML 212. It is strongly recommended that students take the lab (CHML 212) concurrently

with the lecture.

Credit Hours: 3

Prerequisite Courses: CHM 211 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 365 - Biochemistry I

The structures of macromolecules, amino acids and vitamins, and the chemical principles governing their actions. Solution properties of macromolecules, enzyme kinetics and mechanisms, and metabolic regulation, emphasizing organic/physical chemistry. Basics of nucleic acids and biological transfer information.

Credit Hours: 3

Prerequisite Courses: BIO 201 and CHM 212.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

Or

BIO 465 - Biochemistry

Chemical properties and metabolism of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymes kinetics; bioenergetics regulatory mechanisms. The lab for this course is BIOL 465.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202 and CHM 211
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

STT 210 - Introduction to Statistics with Applications in the Health Sciences

Topics include descriptive statistics, probability, probability distributions, sampling distributions, confidence intervals, hypothesis testing, correlation and regression. Instruction tailored to applications in the health sciences.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Or

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

Total credit hours: 24

Psychology Minor

Requirements for a Minor in Psychology:

PSY 105 - General Psychology

Principles of psychology with emphasis on scientific methods used in studying human behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

and fifteen additional hours in psychology, with at least six hours at the 300-400 level.

Total: 18 hours

Additional Information:

A grade of "C" or better is required in PSY 105, and no more than one course with a grade of "D" can count toward the requirements for a minor in psychology. There also must be a "C" (2.00) or better average on all courses counted towards the minor.

Public Administration Minor

The Department of Public and International Affairs offers a Public Administration Minor for students interested in pursuing careers in public service working in government or the nonprofit sector. The minor requires 18 hours of course work, including 9 hours of core courses and 9 hours of electives.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Public Administration

Core Courses (9 Credit Hours)

Take three of the following four courses:

PLS 101 - American National Government

Survey of basic principles, institutions and functions such as federalism, separation of powers, civil liberties and rights, judicial review, public opinion, political parties, elections and interest groups.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

PLS 308 - Public Administration

Introduction to public administration in the United States. Nature and scope of public administration, public interest in the administrative process, role of administrators, formal and informal organization, public personnel and financial management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 304 - Introduction to Public Policy Analysis

Study of the theories and methods of analyzing and explaining public policy and the substance of recent domestic policies in the areas of public finance and human and physical resources, including welfare, education, protection of the environment, housing,

health, urban renewal and transportation.

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

Choose three of the following courses:

PLS 209 - Environmental Politics

Role of politics in environmental policy. Topics include the politics of the environmental movement, the environment as a public policy issue, and the development and impact of environmental policy.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

PLS 217 - Ethics and Leadership in Public Life

Exploration of what it means to act responsibly and with integrity in public life in an environment of shared powers and competing values. Case studies, journals, role plays and film are used to illustrate concepts.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 350 - State Government and Politics

Survey and analysis of the organization, functions, and political processes of the American states with an emphasis on North Carolina politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 351 - Urban Government and Politics

Structure, functions, political processes, problems, and trends in American city and metropolitan government and politics.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

PLS 354 - Urban Planning and Policy

Overview of the policies, plans, and regulations that local governments used to shape the physical growth of cities, towns, and suburbs. A range of topics are covered, such as transportation planning, historic preservation, and affordable housing development.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore, junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the

Classroom
Course Repeatability: Course may not be repeated.

PLS 362 - Leading and Managing Volunteers

Addresses major issues in the leadership and management of volunteers in the nonprofit and public sectors. Focuses on the two main types of volunteers: service volunteers, and policy volunteers (board members). Topics covered include volunteer recruitment, screening, job design, supervision, recognition, and evaluation.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 427 - International Organizations

Survey of the evolution, objectives and methods of various types of regional and universal organizations and their role in contemporary international relations. Special emphasis will be placed on the principal functions and agencies of the United Nations and the European economic community.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 434 - Nonprofit Leadership Experience

An engaged learning experience where students learn about nonprofit organizations, acquire useful employment skills and apply them in projects designed by nonprofit organizations in conjunction with the instructor. Students will complete projects developed and needed by nonprofit organizations in the community; and students will meet and interact with members of the UNCW and nonprofit community.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Crosslisting: PLS 534
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

PLS 491 - Directed Individual Study

Investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

PLS 498 - Internship in Political Science

Experiential learning with selected public or private agencies or with an individual which allows the student to utilize academic training while learning from a practical field experience. (Formal research project is a major part of the internship.)

Credit Hours: 3

Prerequisite Courses: PLS 101 and PLS 201 and (PLS 300 or PLS 304 or PLS 308)
Additional Restrictions/Requirements: Prerequisite courses, junior or senior standing, overall 3.00 GPA or consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12 **Repeat Limit:** 1
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

Major Restriction Political Science**Minor Restriction** Pre-Law

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT 160
Course Repeatability: Course may not be repeated.

ACGL 201 - Financial Accounting Lab

This course is the lab for ACG 201.

Credit Hours: 1

Corequisite Courses: ACG 201
Course Repeatability: Course may not be repeated.

COM 223 - Mediation and Conflict Management

Introduction to the principles of conflict management and alternative dispute resolution with an emphasis on mediation and conflict theory. Other topics include negotiation, arbitration and litigation.

Credit Hours: 3

Prerequisite or Corequisite Courses: COM 105.
Course Repeatability: Course may not be repeated.

COM 257 - Arguing Well: Exploring Argumentation and Debate

Explores principles, practices and ethical dimensions of argumentation and their application to debates and decision-making. Students will engage in research and critical thinking in order to construct cases and participate in debates about issues of interest.

Credit Hours: 3

University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

COM 271 - Communication, Collaboration and Effective Groups

Theory and practice of collaborative communication. Emphasis on learning to work effectively in face-to-face and virtual groups. Focus on managing social and task dimensions of collaborative decision-making for problem solving and creative projects.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to sophomore or higher.
Course Repeatability: Course may not be repeated.

COM 272 - Introduction to Organizational Communication

Study of organizations and virtual organizations as systems created and sustained by communication processes. Topics include organizational analysis and development, diversity, leadership, culture, HR and issues relevant to the global and international marketplace.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM

COM 378 - Business and Professional Communication

Develop and refine communication skills in business environments and other professional settings. Topics include written correspondence, selection and use of communication technologies, delivery of mediated messages, and the design and delivery of professional presentations.

Credit Hours: 3

Prerequisite Courses: COM 101.
Additional Restrictions/Requirements: COM majors or Entrepreneurship minors, or permission of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors Only**Minor Restriction** Entrepreneurship

COM 425 - Negotiation

Theoretical and practical perspectives of negotiation. Emphasis on negotiating techniques for use in business and interpersonal relationships. Explores differences between integrative and distributive bargaining.

Credit Hours: 3

Prerequisite Courses: COM 223
Additional Restrictions/Requirements: Prerequisite course and consent of instructor.
Course Repeatability: Course may not be repeated.

COM 474 - Contemporary issues in Organizational Communication

Exploration of emerging challenges and cases that influence or are affected by organizations and organizational communication. Connections between intra-organizational communication, organizational cultural, and external communication choices will be examined from a variety of perspectives.

Credit Hours: 3

Prerequisite Courses: COM 272 or MGT 350
Additional Restrictions/Requirements: Senior class standing, prerequisite courses, or permission of instructor.
Course Repeatability: Course may not be repeated.

CRM 460 - Crime and Public Policy

Study of crime policies in the justice system with emphasis on theoretical and empirical merits of various crime reduction strategies. Qualitative and quantitative methods used to evaluate crime control policies.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course and 3 additional hours in CRM.
Course Repeatability: Course may not be repeated.

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic perspective. Specific focus will be given to methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

ECN 328 - Public Finance

Study of state, local, and federal government revenue and expenditures; theory of taxation, tax shifting and incidence; theory of public goods, fiscal neutrality and government regulation; methods of achieving efficiency in government benefit-cost analysis, program budgeting (PPB), and pricing of government services.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

ECN 329 - Industrial Organization and Public Policy

A theoretical and empirical study of how the structure of industry affects the conduct and performance of the firm; balanced coverage of public policy as it affects structure, conduct and performance.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

ECN 377 - Introduction to Econometrics and Data Analytics

Introduction to applied estimation, testing and interpretation of economic models useful for business and policy decision-making. Emphasis on applied, client-driven model formulation, data acquisition and manipulation, and model estimation using statistical regression in a desktop computing environment. Extensive practice in interpretation of results for business and policy audiences.

Credit Hours: 3

Prerequisite Courses: ECN 222 and (MAT 151 or MAT 161) and (BAN 280 or STT 215).
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of

Business or declared minor in economics.
Course Repeatability: Course may not be repeated.

ECN 428 - Applied Regional Analysis

Theoretical and applied analysis of patterns and trends in local, state, and regional economic growth. Use of current computer-based methods in regional economic analysis including economic impact models. Applied analysis of current regional issues and government policies to address these issues.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ECN 429 - Economics of Growth and Development

Economic principles are developed and applied to evaluate theories of economic growth and development in an international context. Major topics include: Measuring growth, theory of economic growth, the economics of poverty, agricultural issues, health, nutrition, productivity, gender bias, education, and technological change; government failures, migration and population growth, theories of income distribution, human capital theory, social capital theory, the effect of geography on growth, and sustainable development.

Credit Hours: 3

Prerequisite Courses: ECN 222.
Additional Restrictions/Requirements: Prerequisite courses and either admission to Cameron School of Business or declared minor in economics.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and

allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of

instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 472 - Coastal Protected Areas Management

Study of resource management focused on protected areas maintained by government agencies and by private non-profit organization. Emphasis will be on natural area significance, site selection, management plan development, policy formulation, protection options, use conflicts, and public relations.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVS 360
Additional Restrictions/Requirements: Prerequisite courses or consent of the Instructor.
Course Repeatability: Course may not be repeated.

HST 334 - Public History

A study of the ways in which historians practice outside of the academy. Topics include historic preservation, museum interpretation, cultural resource management,

media, and archives. Class may include guest speakers and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

LED 211 - Principles of Leadership

Introduction to leadership. Study of leadership theories, styles, and strategies. Emphasis on developing leadership skills in a variety of settings.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

LED 311 - Communication and Leadership

Theory and practice of leadership. Focuses on issues of cohesiveness, trust, motivation, vision, and goals.

Development of conflict management and decision-making goals.

Credit Hours: 3

Prerequisite Courses: LED 211
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches

and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MGT 352 - International Management

Study of management practices in the international business arena. Emphasis on the necessity of understanding global business interdependencies. Particular attention to developing sensitivity to other cultures, values, customs, and beliefs and their effects on business decisions and practices.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Prerequisite Courses: INB 300.
Additional Restrictions/Requirements: Prerequisite courses and admission to Cameron School of Business.
University Studies: Building Competencies/Writing Intensive
Crosslisting: INB 352
Course Repeatability: Course may not be repeated.

MGT 355 - Ethics in Management

Every person will face a moral or ethical quandary at some juncture in a career. This course will help prepare today's graduates (future employees and managers) to think in a structured, orderly way about their obligations to their companies and to other people. Ethics experts argue students must develop the skills needed to convincingly present their moral point of view so they may ethically represent their organizations, safeguard their careers, and protect their societies. Students will explore historical and contemporary cases in managerial ethics applying theories of ethical reasoning. Topics will relate to ethical problems in business management, moral analysis and economic outcomes, legal requirements underscoring ethical management, ethical duties of managers and business owners, and practical/legal reasons businesses should be ethical. Students will discuss how to identify unethical conduct and how to appropriately respond to it. The link between ethics and corporate culture will be reinforced.

Credit Hours: 3

Prerequisite Courses: MGT 350.
Course Repeatability: Course may not be repeated.

MGT 356 - Human Resource Management

Evaluation of concepts and approaches used in human resource management and development. Study of manpower planning, selection procedures, performance review, compensation and benefits, equal employment/affirmative action factors, and labor relations. Emphasis is on how personnel specialists and operating managers can improve organizational performance.

Credit Hours: 3

Prerequisite Courses: Prerequisite or Corequisite: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 358 - Organizational Behavior

Application of behavioral science concepts in the management of organizations. Emphasis on increasing

productivity on the individual, group, and organizational level. Particular attention directed to analyzing organizations, developing motivational programs, designing enriching jobs, leadership development, and managing organizational change.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350.
Additional Restrictions/Requirements: Admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

MGT 453 - Leading Virtual Teams

Modern organizational structures require leaders to be able to design and cultivate effective and efficient collaboration in teams – whether co-located, distributed, virtual, or any combination thereof. This course presents the state-of-the-science of leading collaboration in today's digital workforce. The goal of this course is to develop the capacity to lead collaboratively, regardless of the context in which your team works. Understanding the core actions of leaders and how they shape needed team properties is crucial

to success. The course will leverage a variety of tools to promote both skill and knowledge building: exercises, cases, readings, videos, discussions, a self-assessment, and guided self-reflection.

Credit Hours: 3

Prerequisite or Corequisite Courses: MGT 350
Additional Restrictions/Requirements: Admission to Cameron School of Business
Course Repeatability: Course may not be repeated.
Major Restriction BS Business Administration

MGT 459 - Negotiation

Study of theory, research and practice in negotiation. Topics include social dilemmas, distributive bargaining, integrative agreements, multiple-party scenarios, dispute resolution, third-party interventions and ethics. Negotiation exercises provide experience in a variety of contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to

Cameron School of Business.
Course Repeatability: Course may not be repeated.

MIS 411 - Information Systems Analysis

Processes and methods used for identifying and documenting information systems requirements and developing systems specifications. Topics include the systems development life cycle, analysis tools, development methodologies, and techniques for effective communication.

Credit Hours: 3

Prerequisite or Corequisite Courses: MIS 315.
Prerequisite Courses: Prerequisite: CIT 213 with a minimum grade of C-, or prerequisite/corequisite: MIS 315.
Additional Restrictions/Requirements: Admission to Cameron School of Business for students majoring in Business Administration, and students majoring in Information Technology B.S.
University Studies: Building Competencies/Information Literacy, Explorations

Beyond the Classroom
Course Repeatability: Course may not be repeated.

PSY 336 - Industrial-Organizational Psychology

Psychological techniques in job analysis, personnel selection and placement, training, performance appraisal, employee motivation, employee health and satisfaction, organizational productivity and communication, group decision making, and leadership.

Credit Hours: 3

Prerequisite Courses: PSY 246 or PSY 264
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

BAN 280 - Statistical Analysis for Business and Economics

Classification and presentation of business and economics data, probability and expected value, statistical inference, simple linear regression and

correlation analysis.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150.
University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

REC 375 - Leadership and Management in Tourism, Recreation, and Sport

Principles and practices of contemporary leisure service management, particularly the effective and efficient management of human, fiscal, informational, and physical resources through planning, organizing, directing, leading, and controlling decisions. Tutorials, case studies, and computer applications.

Credit Hours: 3

Prerequisite Courses: REC 265 and REC 270.
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Writing

Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 391 - Public and Applied Sociology and Criminology Seminar

Application of sociological tools to real-life issues in a variety of social settings. Methods may include surveys, interviews, focus groups, secondary data analysis, and evaluation applications. Development of proposals for research projects conducted in a second, sequenced course in the following semester.

Credit Hours: 3

Prerequisite or Corequisite Courses: SOC 301 or CRM 301.
Prerequisite Courses: SOC 300 or CRM 300, and SOC 360.
University Studies: Building Competencies/Information Literacy, Explorations Beyond the Classroom
Crosslisting: CRM 391
Course Repeatability: Course may not be repeated.

SOC 486 - Sociology of Work and Occupations

Analysis of the place of work in society. Examines occupational structures as the primary link between persons and the larger society. Topics include the growth and development of occupational structure, occupations and technological change, and organizational complexity.

Credit Hours: 3

Prerequisite Courses: SOC 105

Additional Restrictions/Requirements: Prerequisite course and three additional hours in sociology or economics.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total Credit Hours: 18

Additional Information:

A grade of "C" (2.00) or better is required for each course counted toward the minor.

Religion Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Religion

Core Courses (9 Credit Hours)

PAR 103 - Exploring Religions

Introduction to the academic study of religion. Explores the many diverse religions practiced around

the world and the ways practitioners construct religious experiences through scriptures, art, gender, race, and community.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches
Course Repeatability: Course may not be repeated.

PAR 125 - Scriptures of the World's Religions

Introduction to the history and composition of scriptures of the world's religions from oral stories to words, images, objects, books, performances, sounds, and texts. Examines how scriptures in major Eastern and Western religions have constructed historical, political, social, and cultural realities through various forms of art from antiquity to today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Historical

and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
and

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

Elective Courses (9 Credit Hours)

- an additional 9 hours in religion courses at the 200-400 level, at least 6 hours of which must be at the 300-400 level.

Total Credit Hours: 18

Additional Information:

An overall grade point average of "C" (2.00) or better is required in courses counted toward the minor.

Russian Studies Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Russian Studies

Completion of 18 semester hours: 6 hours of core courses including RUS 201 and RUS 202. Twelve hours of elective courses from RUS 209, RUS 294, RUS 395 (repeatable under different topics), RUS 491, FST 381, HST 325, HST 326, PLS 336, and approved study abroad courses. Students must select courses from at least two separate disciplines.

Minimum "C" (2.00) average for all courses towards the minor.

Core Courses (6 Credit Hours)

RUS 201 - Intermediate Russian I

A review of the grammatical structure of the language. Application of the language in composition, conversation, and readings.

Credit Hours: 3 To 4

Prerequisite Courses: RUS 102
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

RUS 202 - Intermediate Russian II

A review of the grammatical structure of the language. Application of the language in composition, conversation, and readings.

Credit Hours: 3 To 4

Prerequisite Courses: RUS 201
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 4

Elective Courses (12 Credit Hours)

RUS 209 - Russian Literature in Translation: Topics

Study of representative works from the literature of the Russian-speaking world. Readings and class discussions in English. May be repeated under different subtitles.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary

Perspectives
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

RUS 294 - Study Abroad

Special topics related to issues in the Russian-speaking world to be taken abroad from UNCW faculty or as transfer credit. Course may be repeated under different content/titles.

Credit Hours: 1 To 6

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

RUS 395 - Topics in Russian Studies

Intensive study of a selected topic in Russian Studies. Courses are taught through the UNC Russian Studies Consortium as a teleconference/DE course. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

RUS 491 - Directed Individual Study

Involves the investigation under faculty supervision beyond what is offered in existing Russian courses. For further information, consult Directed Individual Studies section in this catalogue.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor, department chair, and dean.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9

FST 381 - History of Russian and Soviet Cinema

Survey of Russian and Soviet cinema from the 1900s to the present, focusing on Sergei Eisenstein, Dziga Vertov, Andrei Tarkovsky, and other directors, as well

as the cultural, political, and economic forces that influenced their films.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 205, or permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

HST 325 - Russia to 1881

History of Russia from its origins to 1881. Topics include the Mongol Conquest, state building, foreign policy, popular and intellectual opposition to serfdom.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 326 - Russia Since 1881

History of Russia from 1881 to the present. Topics include the impact of emancipation, growth of revolutionary movement, revolutions of 1917, the Stalin years, post-Stalin reforms, end of Soviet Union.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

Total Credit Hours: 18

Security Studies Minor

The College of Humanities, Social Sciences, and the Arts offers a Security Studies Minor designed to examine how countries identify and organize to respond to threats to their physical, political, economic, and human security.

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for Security Studies Minor:

The minor requires 21 hours of course work, including 6 hours of core courses, and 15 hours of Security Studies electives. For successful completion of the minor, students must take 9 or more hours outside their major. A course will not be counted as both core and elective.

Core Courses (6 Credit Hours)

PLS 220 - Introduction to International Relations

Basic analysis of politics among nations. Role of law, force, and diplomacy in world politics; problems of war, peace, and disarmament.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

One from the follwing courses:

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 423 - National Security Policy

Formulation of security policy, including the roles of the executive and legislative branches and of non-governmental factors; evolution of changing assumptions, strategies, and goals; the nature of U.S. security requirements, U.S. military commitments abroad, and the cost of strategies based on weapons superiority, arms control, and disarmament.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

Security Studies Elective Courses (15 Credit Hours)

ANT 310 - The Ancient Maya

Explores the achievements of one of the most remarkable civilizations in the Americas. Artistic, architectural, economic and religious components of

pre-Columbian Maya Society; the rise and decline of the civilization; Spanish impacts on Maya cultural history.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ANT 327 - Globalization & Culture Change

Explores processes of globalization in local communities by addressing issues and dynamics of culture change in the contemporary world. Themes include: economic development and underdevelopment; legacies of colonialism; immigration; transnational culture; market and meaning exchanges in media and the arts; and organized resistance to globalization.

Credit Hours: 3

University Studies: Approaches and

Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists, students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 330 - The Immigrant Experience

Through ethnographic accounts and personal narratives from a variety of global settings, the course examines the economic, social and political factors that prompt migration and explores the cultural adaptations,

ethical questions, human rights issues, and public policy debates of immigration and resettlement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

CRM 410 - World Criminal Justice Systems

Comparative study of criminal justice systems throughout the world. Attention to historical, structural, political, legal and philosophical similarities and differences.

Credit Hours: 3

Prerequisite Courses: CRM 105
Additional Restrictions/Requirements: Prerequisite course plus 6 additional hours in CRM.
Course Repeatability: Course may not be repeated.

CRM 420 - Collective Violence

Analysis of group violence and its control. Topics include the theory and strategy of mass violence, terrorism, genocide, riots and revolutions, and historical and contemporary forms of warfare and the examination of case studies to identify the influence of society, culture, and politics on such events, as well as the impact these events have on society.

Credit Hours: 3

Prerequisite Courses: SOC 105 or CRM 105
Additional Restrictions/Requirements: Nine hours in CRM.
Course Repeatability: Course may not be repeated.

GGY 340 - Global Change: Population, Resources, and the Environment

Introduction to the four major driving forces of global change: demographic trends, natural resource use, climate change, and globalization. Explores the role of economic and cultural development and analyzes regional patterns that result in the unique manifestations of global change.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 101 or GGY 180, or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 322 - Introduction to Remote Sensing

Theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, forestry, and public health. Includes satellite data collection, digital image processing, multispectral image analysis, introduction to thermal infrared and microwave data through laboratory exercises. Students work in small groups to apply remote sensing concepts to solve complex problems. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 215 or GLY 101 or GLY 120 or OCN 150 or EVS 195 or consent of instructor.
Additional Restrictions/Requirements: Prerequisite

course or consent of instructor.
Course Repeatability: Course may not be repeated.

GGY 428 - Advanced Remote Sensing

Advanced theory and application of remote sensing techniques and software applications for environmental sciences, geography, earth sciences, hydrology, archaeology, and forestry. Includes satellite data collection, advanced classification methods, hyperspectral and microwave image analysis, and satellite elevation data construction. Two lecture and two laboratory hours each week.

Credit Hours: 3

Prerequisite Courses: GGY 322
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: GGY 528
Course Repeatability: Course may not be repeated.

HST 104 - Introduction to Global History Since 1848

Historical events, peoples, and places as well as the transformation of global systems. Examines the effects of industrialization, imperialism, nationalism, world wars, the Cold War, communism, and globalization on contemporary societies.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

HST 301 - History of American Foreign Relations since the Progressive Era

Formation and implementation of American foreign policy, including the relationship between foreign policy and American political culture, and the impact of foreign perspectives on U. S. foreign policy since the Progressive Era.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 317 - Northern Ireland from 1880

Politics and society in Northern Ireland from Home Rule through partition, the troubles, and the peach process of the 1990's and beyond. Examination of primary sources, film, and the work of a broad range of academic specialists in the region to explore the historical development of this deeply divided society.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

HST 326 - Russia Since 1881

History of Russia from 1881 to the present. Topics include the impact of emancipation, growth of revolutionary movement, revolutions of 1917, the Stalin years, post-Stalin reforms, end of Soviet Union.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST

course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 353 - The American Revolution and Formation of the United States

Organization of the British Empire, events preceding the Revolution, the war for independence, Confederation era, drafting and ratification of the U. S. Constitution, politics of the new nation.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 368 - History of Modern Latin America

The development of South America, Central America, Mexico, and the Caribbean from the time of independence in the early nineteenth century to the present.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 372 - History of Modern Africa

Historical survey of African history from 1800 to the present with emphasis on the abolition of slavery and the slave trade; the scramble for Africa; establishment and operation of colonial rule; independence movements; and the post-colonial period.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

HST 399 - Europe Since 1945

Europe from the end of the Second World War to the present. Topics include the welfare state, decolonization, the 1960s, consumer society, the origins and end of the Cold War, and European integration.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

INT 330 - Topics in Africa

Intensive study of a selected topic or theme about Africa. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

INT 335 - Topics in Asia

Intensive study of a selected topic or theme about Asia. May be repeated under a different subtitle.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 340 - Topics in Europe

Intensive study of a selected topic or theme about Europe. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 345 - Topics in Latin America

Intensive study of a selected topic or theme about Latin America. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 350 - Topics in the Middle East

Intensive study of a selected topic or theme about the Middle East. May be repeated under different subtitles.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

INT 361 - Ethnic Conflicts and Territorial Disputes

Examination of modern territorial disputes and ethnic conflicts in Asia, Europe, Africa and the Middle East in the 20th and 21st centuries.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

INT 405 - INT 405 - War in the Global System - Masters

Exploration of warfare in the post-Cold War era. Most wars today are Intrastate in nature, centered on identity, issues, and largely a consequence of decolonization processes. Explores these issues through interdisciplinary research drawn from the fields of peace studies and conflict management.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PAR 230 - Judaism, Christianity, and Islam

Survey of the history of Judaism, Christianity, and Islam from their origins in the Middle East over 3,500 years ago to their diverse practices, scriptures, art, and communities around the world today.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 232 - Asian Religions

A survey of Hinduism, Buddhism, Taoism, and Confucianism; historical aspects, basic insights, contemporary relevance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Historical and Philosophical Approaches, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

PAR 362 - Archaeology of Ancient Israel

Study of Ancient Israel, its peoples and cultures through archaeological artifacts and analysis of ancient writings.

Credit Hours: 3

Prerequisite Courses: PAR 103 or PAR 235
Additional Restrictions/Requirements: Prerequisite courses or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 370 - Tibetan Buddhism

Examination of the Buddhism of Tibet as seen in ethical and social thought, ritual and meditation practice, philosophy, and art.

Credit Hours: 3

Prerequisite Courses: PAR 232
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PAR 371 - Buddhism

Survey of the essentials of Buddhism as seen in ethical and social thought, mediation practices, philosophies, rituals and art.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 374 - Japanese Religions

Examination of Japanese religions and their roles in Japanese culture and society. Course will make use of texts, literature, film, anime, manga, and other media.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive/Information Literacy
Course Repeatability: Course may not be repeated.

PAR 378 - Caribbean Religions

Religious diversity within the Caribbean, including established, non-traditional, and Afrocentric religious traditions, and their interaction with popular culture.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 330 - Political Systems of Africa

Governments and politics of selected sub-Saharan African states. A survey from colonial days to the present with emphasis on contemporary economic, social and political problems.

Credit Hours: 3

Prerequisite Courses: PLS 230

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 333 - Politics of South America

Politics of South America and the impact of socio-economic forces on the region and its political structures.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 334 - Revolutionary Movements

Introduction to the social, political, and economic conditions which give rise to radical response. Examines small rebel bands, or militias (commonly referred to as 'guerrilla' movements), and 'terrorist' organizations, as well as large-scale revolutionary movements.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 336 - Russian and Post-Soviet Political Systems

Comparative study of the political institutions and processes of Russia and the eastern European Countries. Post-Soviet dynamics and the nature and significance of contemporary changes.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 337 - Chinese Politics

Political system of China with special emphasis on the challenges of development, democracy, and nation-building in the post-1949 period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 338 - Political Systems of the Middle East

Governments and politics of the Middle East with emphasis on the changes that have occurred since 1945. A detailed examination of the forces that have shaped contemporary Middle Eastern politics: Islam, nationalism, modernization, and current political trends. The political institutions and processes and the domestic and foreign policies of selected countries will be studied.

Credit Hours: 3

Prerequisite Courses: PLS 230
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 339 - Asian Politics

Recommended: PLS 230. Political systems of selected Asian countries. Special emphasis on the challenges of development, democracy, and nation-building in the post-World War II period.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 420 - Politics of Nuclear Weapons

Introduction to nuclear weapons policy and strategy with an emphasis on nonproliferation, nuclear security, and nuclear deterrence. Consideration of nuclear weapons technology, why countries seek nuclear weapons, risks to international security, and policy tools deployed to prevent proliferation or use.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

PLS 421 - Causes and Dynamics of Ethnic and Nationalist Conflict

This course introduces students to some of the most intractable and violent conflicts around the world in order to understand various theoretical approaches that explain the onset and dynamics of ethno-nationalist conflicts.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

PLS 422 - Contemporary American Foreign Policy

Roles and interrelationships of Congress, the media, public opinion, the president, the secretaries and departments of state and defense, and the intelligence community are examined. Emphasis is placed on the content and the dynamic aspects of the process of policy formulation and implementation.

Credit Hours: 3

Prerequisite Courses: PLS 220

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 423 - National Security Policy

Formulation of security policy, including the roles of the executive and legislative branches and of non-governmental factors; evolution of changing assumptions, strategies, and goals; the nature of U.S. security requirements, U.S. military commitments abroad, and the cost of strategies based on weapons superiority, arms control, and disarmament.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 424 - International Security

Investigates war and conflict at the international level and the different ways in which governments individually or collectively work to address the problem.

Credit Hours: 3

Prerequisite Courses: PLS 220
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

PLS 425 - International Politics

Students are provided with an overview of the current International system and introduced to the theories actors, their interactions, and the norms of the international system. The impact of the law and norms of international relations or international conflict are analyzed and debated.

Credit Hours: 3

Prerequisite Courses: PLS 220
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning

Crosslisting: CMR 525
Course Repeatability: Course may not be repeated.

PLS 428 - Global Terrorism

Investigates the phenomenon of terrorism at the international and global level with particular empasis on why terrorism occurs, and on domestic level and international cooperative counterterrorism.

Credit Hours: 3

Prerequisite Courses: PLS 220
Course Repeatability: Course may not be repeated.

SOC 215 - Modern Social Problems

Contemporary social issues and conditions viewed as problematic, such as racism, sexism, crime, poverty, war, alienation, and deviance.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Total: 21 hours

Small Business and Social Entrepreneurship Minor

The Minor in Small Business and Social Entrepreneurship prepares non-business students to

engage in entrepreneurial activities related to their major. The minor is particularly suited to students who are interested in developing or supporting an entrepreneurial venture related to their major. The minor is flexible and versatile enough to benefit any type of entrepreneurial interest ranging from the arts to the sciences, engineering, and beyond. Students are required to take five core courses for the minor and then they may ass two additional courses relevant to their major or area of interest.

Requirements for Minor in Small Business and Social Entrepreneurship:

The minor requires 21 credit hours of study with three required courses and two groups of electives (6 hours each) that can be geared toward the student's area of interest. Admission to the minor requires achieving a grade of 'C' or higher in EBD 280 OR EBD 282. The minor is open to all students outside the Cameron School of Business. Business majors, with the exception of students pursuing a Bachelor of Arts degree in Economics, are not eligible for the minor. With permission of the coordinator of the Small Business and Social Entrepreneurship minor, Electives

within this minor may be able to "double dip" up to two relevant courses taken for their major or another minor and taught by other departments across campus.

Fundamental Courses

These fundamental courses will introduce non-business students to the knowledge, skills, and resources they can use to leverage expertise from their major in order to begin or support entrepreneurial ventures. All students take the introductory course in entrepreneurship, either the general course (EBD 280) or the course geared toward the sciences and engineering (EBD 282), along with two entrepreneurial business courses (EBD 301 & EBD 302). Next students select two courses most relevant to their major to further develop their entrepreneurial acumen (EBD 281, EBD 303, EBD 304, EBD 354). Finally, students pick two elective courses related to their major. A list of courses particularly suited to this minor are listed, but alternate courses may be approved by the coordinator of the minor.

Required:

These fundamental courses will introduce non-business students to the knowledge, skills, and resources they can use to leverage expertise from their major in order to begin or support entrepreneurial ventures. All students take the introductory course in entrepreneurship, either the general course (EBD 280) or the course geared toward the sciences and engineering (EBD 282), along with two entrepreneurial business courses (EBD 301& EBD 302). Next students select two courses most relevant to their major to further develop their entrepreneurial accumen (EBD 281, EBD 303, EBD 304, EBD 354). Finally, students pick two elective courses related to their major. A list of courses particularly suited to this minor are listed, but alternate courses may be approved by the coordinator of the minor.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing

the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

OR

EBD 282 - Entrepreneurship for the Sciences and Engineering

This course introduces non-business, scientifically-oriented students to the process of creating new ventures and entrepreneurship in engineering and science intensive industries, such as chemical, energy, materials, bioengineering, environmental, clean-tech, pharmaceuticals, medical and biotechnology. Students gain a good sense of the excitement, complexity, and challenges associated with the creation of new businesses, whether within an existing organization or in a startup environment. The focus is on new ventures that require long development times, large investments,

integration across a wide range of technical and non-technical disciplines, and the creation and protection of intellectual property. Teaching methods will include lectures, case studies, guest speakers and individual and team projects.

Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.

EBD 301 - Entrepreneurial Finance for Non-Business Majors

Course provides students with the knowledge and skills necessary to manage cash as well as manage the necessary records in a small business. Topics include: calculating startup costs, running a monthly, quarterly and annual budget for a business, understanding the different sources of capital and how to obtain them, projecting income and what investors, lenders and grant organizations look for in an entrepreneurial venture. SBIR/STTR funding, financial analysis and record-keeping necessary to comply with federal, state,

and local tax law are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 302 - Managing & Marketing for Entrepreneurs

Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable

information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Students will also learn successful exit strategies for a business. Leadership, management, positioning, legal strategies, sales strategies, and scaling strategy are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Plus two courses from:

EBD 281 - Creativity and Innovation

Primary focus on the processes for fostering creativity and innovation. Emphasis on the creative process, creative problem solving, and intrapreneurship. Particular attention directed to the development of new products, services, processes, and business models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EBD 304 - Entrepreneurship in the Arts

This course will introduce and outline the role of "art" in various marketplaces, and how the emerging arts entrepreneur operates in society. Topics include how to position and market aesthetic products, the pricing of art products, understanding consumer behavior for aesthetic products, the modes of financing, and art patronage. Course will also examine the nature of art infrastructures, such as museums, festivals, and galleries, and the overall economics of the arts in modern society.

Prerequisite or Corequisite Courses: EBD 280 or

EBD 282
Course Repeatability: Course may not be repeated.

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

Plus 6 hours from the list of courses below or others as approved by the coordinator of the minor

Students will ideally select their final two electives to match with their entrepreneurial interests or their major. The below list offers suggestions of courses in other disciplines that are entrepreneurial in nature. Students may select courses outside this list with approval from the coordinator of the minor. In the case of restricted courses, approval must be secured by the appropriate Department Chair. Students should confer with their academic advisors when determining the elective courses.

ACG 201 - Financial Accounting

An introduction to the basic framework of accounting for students majoring in accountancy or other disciplines. Includes preparation of financial records and external financial reports. Emphasis on the underlying accounting concepts and constraints. The lab for this course is ACGL 201.

Credit Hours: 3

Corequisite Courses: ACGL 201
Prerequisite Courses: MAT 111 or MAT 150 or MAT

Course Repeatability: Course may not be repeated.

ACGL 201 - Financial Accounting Lab

This course is the lab for ACG 201.

Credit Hours: 1

Corequisite Courses: ACG 201
Course Repeatability: Course may not be repeated.

ACG 203 - Managerial Accounting

An introduction to the concepts and techniques used by management to analyze and interpret accounting data in the organization.

Credit Hours: 3

Prerequisite Courses: ACG 201 and ACGL 201
Course Repeatability: Course may not be repeated.

AFN 130 - Introduction to Africana Studies

Interdisciplinary exploration of the collective experiences of the African Diaspora, which includes

Africans and people of African descent in various continents and countries in addition to the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.

AFN 290 - Readings in Literatures of the African Diaspora

This course explores the literary expressions of Africans and peoples of African descent as they are found in the Caribbean, Latin America, and in the United States.

Credit Hours: 3

University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in a

Global Society
Course Repeatability: Course may not be repeated.

ANT 303 - Culture and Gender

A cross-cultural study of gender in a selection of societies from African, American Indian, Asian, and Central and South American cultures.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists, students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 330 - The Immigrant Experience

Through ethnographic accounts and personal narratives from a variety of global settings, the course examines the economic, social and political factors that prompt migration and explores the cultural adaptations, ethical questions, human rights issues, and public policy debates of immigration and resettlement.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ANT 460 - Poverty and Health: Critical Medical Anthropology Perspectives

Seminar survey of applied medical anthropology research on the health effects of extreme poverty. Through in-depth explorations of anthropologists working in public health settings around the world, students learn methods, theory, and critical issues of this subfield. Example target populations include farmworkers, immigrants, the homeless, refugees, and the working poor.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ART 475 - Professional Practices

Preparation for graduate school, business practices, portfolio presentation, grant applications, publicity, and professional studio practice.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or

senior standing.
Course Repeatability: Course may not be repeated.

ART 476 - Senior Exhibit

Topics include generating a coherent body of work; presentation solutions (matting, framing, pedestals, labels); writing an artist's statement and resume; curatorial decisions; promotion and installation of exhibition; discipline appropriate writing.

Credit Hours: 3

Additional Restrictions/Requirements: Senior standing, and course must be completed in the semester of graduation.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ART 498 - Internship In Art

Academic training and practical field experience through a program of work and study within an agency and/or setting related to the student's principal area of

interest. Faculty supervision and evaluation of all study and on-site activity. (A maximum of six credit hours may be applied toward the degree).

Credit Hours: 3 To 6

Additional Restrictions/Requirements: Junior or senior standing, minimum 3.00 GPA in the major and consent of chair.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

BIO 387 - Biological Impacts of Coastal Management

Overview of the impacts of coastal management efforts on species of concern and broader ecosystem dynamics. Exploration of how coastal activities and coastal management related to fisheries, aquaculture, shoreline processes, and water quality may directly and indirectly impact coastal ecosystem composition and

resiliency, populations of endangered species, and broader connections with the ocean foods webs.

Credit Hours: 3

Prerequisite Courses: BIO 201, BIO 202.
Additional Restrictions/Requirements: Junior or senior standing or consent of instructors
Course Repeatability: Course may not be repeated.

BIO 410 - Biotechnology

A survey of techniques used in biotechnology and application of these techniques for practical biomedical and environmental use. Topics include cloning, genetic engineering, PCR, RNAi, antibody technologies, vaccines, microarrays, bioremediation, biofuels, drug discovery and synthesis, gene therapy, transgenics, cloning, stem cells, forensics, and biowarfare.

Credit Hours: 3

Prerequisite Courses: BIO 335 or BIO 325.
Course Repeatability: Course may not be repeated.

BIO 466 - Conservation Biology

A scientific approach to the protection, maintenance, and restoration of biological diversity, including its ecological and evolutionary processes and total environment.

Credit Hours: 3

Prerequisite Courses: BIO 366 or BIO 362
Additional Restrictions/Requirements: Junior or senior standing.
Course Repeatability: Course may not be repeated.

BIO 480 - Field Studies in Biology

A research/experience-oriented field course offered in selected regional locales. Emphasis is placed on distribution, taxonomy, and ecology of animal and/or plant organisms. May be repeated under different subtitles.

Credit Hours: 1 To 6

Prerequisite Courses: BIO 201 and BIO 202
Additional Restrictions/Requirements: Prerequisite courses and consent of instructor. BIO 366 and credit

in advanced zoology or botany recommended.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

BLA 304 - Legal Issues in Film and Entertainment Law

A study of the legal issues impacting the film and entertainment industry including the legal aspects of business organization, contracts, torts, agency, employment law, environmental regulation, and intellectual property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.
Crosslisting: FST 304
Course Repeatability: Course may not be repeated.

BLA 361 - Legal Environment of Business

Study of the organization and role of business enterprises in society and their relationships in

government. Examines how the legal environment is influenced by changing social and ethical values. Topics include agency, antitrust, forms of business organization, environmental regulation, equal opportunity, labor law, product liability, and property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or admission to the Cameron School of Business, or students in the Accountancy and Business Law minor, or consent of department chair.
Course Repeatability: Course may not be repeated.

CHM 291 - Introductory Research

Laboratory and computational research under faculty supervision beyond what is offered in existing courses.

Credit Hours: 1 To 3

Additional Restrictions/Requirements: Freshman, sophomore, junior, or senior standing and consent of instructor and department chair.

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

CHM 380 - Forensic Chemistry

Theory and applications of trace organics and metals analyses, fiber and polymer analyses, toxicology, serology, drug and DNA chemistry, fingerprinting techniques, and chain of custody procedures. The optional 3-hour laboratory (CHML 380) may be registered for separately.

Credit Hours: 3

Prerequisite Courses: CHM 211 and CHML 211
Course Repeatability: Course may not be repeated.

CHM 480 - Chemistry Education Research and Practice

Selected topics from chemistry education research. Focus on current research about learning theories, epistemology, representations of chemical structure, technology use in the chemistry classroom, and laboratories.

Credit Hours: 3

Prerequisite Courses: CHM 212
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Crosslisting: CHM 580
Course Repeatability: Course may not be repeated.

CHM 485 - Industrial and Polymer Chemistry

An overview of major industrial processes, the synthesis and significance of major industrial chemicals. Polymer chemistry to include synthesis, properties, and applications is covered. Some specialty topics such as pharmaceutical chemistry and agricultural chemistry are also briefly covered.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CHM 486 - Fundamentals of Heterocycles with Emphasis on Pharmaceuticals

Well over half of all known organic compounds and most pharmaceuticals are heterocyles (containing an atom other than C in the ring), yet their chemistry is hardly touched on in conventional courses. Topics include the nomenclature, properties, synthesis, and pharmaceutical applications of heterocycles.

Credit Hours: 3

Prerequisite Courses: CHM 212 with a minimum grade of C
Course Repeatability: Course may not be repeated.

CLR 301 - Introduction to Clinical Research

Provides overview of people, terminology, execution, and regulations involved in clinical research process. Focuses on phases of biopharmaceutical product development and protection of human subjects. Emphasis on FDA evaluation of new products for the pharmaceutical and biotechnology industries. Open to non-majors.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

CLR 310 - Clinical Research Writing and Communications

Examines principles and practice of scientific writing in clinical research field with emphasis on critical thinking, researching, and writing processes. Includes writing of such documents as standard operating procedures, proposals, literature reviews, short reports and letters.

Credit Hours: 3

Prerequisite or Corequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3
Major Restriction Restricted to Clinical Research

majors**Minor Restriction** Restricted to Clinical Research minors

CLR 330 - Fundamentals of Biopharmaceutical Product Development

This completely on-line course provides an overview of the development of pharmaceutical and biotechnology products for the marketplace. This course reviews the theoretical and practical aspects of the discovery of new entities, the preclinical process, chemistry manufacturing and controls (CMC), manufacturing and scale-up of candidate products, over-the-counter and generic drugs, production and stability of marketed products as well as the overall costs of drug development.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minors.
Course Repeatability: Course may not be repeated.
Major Restriction Restricted to Clinical Research

majors**Minor Restriction** Restricted to Clinical Research minors

CLR 350 - Understanding Medical Terminology and Clinical Endpoints

Audio-visual approach to study of medical terminology, body systems, diagnostic procedures, and pharmacology. Emphasizes word construction, spelling, usage, comprehension, pronunciation, abbreviations. Applies terminology to clinical study endpoints commonly used to measure safety and efficacy of a biopharmaceutical product.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

CLR 420 - Regulatory Affairs

In-depth coverage of the requirements for worldwide marketing applications. Examination of the regulatory review process and regulatory agency interactions. Emphasis on late phase of clinical investigations and marketing considerations, including safety reporting.

Credit Hours: 3

Prerequisite Courses: CLR 301 with a C or better
Additional Restrictions/Requirements: Open only to students within the Clinical Research major or Clinical Research minor.
Course Repeatability: Course may not be repeated.
Major Restriction Restricted to Clinical Research majors**Minor Restriction** Restricted to Clinical Research minors

CLR 470 - The Business of Clinical Research

Examines financial aspects of clinical research spanning from individual studies to the business models supporting clinical research organizations. Focuses on contract research services, vendor management, study team labor costs, contracts and proposals. Disucsses accountability for study budgets at the individual level.

Credit Hours: 3

Corequisite Courses: CLR 497
Additional Restrictions/Requirements: Open to

Clinical Research majors only.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

COM 231 - Essentials of Integrated Marketing Communication

Exploration of advertising, public relations, promotions, events and experiential marketing, word-of-mouth marketing, and social media campaigns through an IMC framework. The IMC approach considers audience, research, messages, ethics, and the current cultural environment to provide the foundations of sound practice. Students also explore careers in this area and how those careers shape our world.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Major Restriction IMC Certificate

COM 271 - Communication, Collaboration and Effective Groups

Theory and practice of collaborative communication. Emphasis on learning to work effectively in face-to-face

and virtual groups. Focus on managing social and task dimensions of collaborative decision-making for problem solving and creative projects.

Credit Hours: 3

Additional Restrictions/Requirements: Restricted to sophomore or higher.
Course Repeatability: Course may not be repeated.

COM 272 - Introduction to Organizational Communication

Study of organizations and virtual organizations as systems created and sustained by communication processes. Topics include organizational analysis and development, diversity, leadership, culture, HR and issues relevant to the global and international marketplace.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM or permission of instructor.

Course Repeatability: Course may not be repeated.
Major Restriction PCOM or COM

COM 344 - Intercultural Communication

Theoretical and practical perspectives on communication effectiveness in dealing with people, groups, or organizations that are culturally different within and across national boundaries.

Credit Hours: 3

Prerequisite Courses: COM 105 with a grade of 'B' or better, or permission of instructor.
Additional Restrictions/Requirements: Restricted to Junior standing or higher.
University Studies: Approaches and Perspectives/Living in a Global Society, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

COM 346 - Interracial Communication

Explores communicative behaviors between individuals from various racial and ethnic groups and contextual dynamics unique to such interactions. Approaches to

enhancing the content and quality of interracial relationships are also examined.

Credit Hours: 3

Additional Restrictions/Requirements: PCOM or COM Majors, or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction PCOM and COM Majors

COM 378 - Business and Professional Communication

Develop and refine communication skills in business environments and other professional settings. Topics include written correspondence, selection and use of communication technologies, delivery of mediated messages, and the design and delivery of professional presentations.

Credit Hours: 3

Prerequisite Courses: COM 101.
Additional Restrictions/Requirements: COM majors or Entrepreneurship minors, or permission of instructor.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Major Restriction COM Majors Only**Minor Restriction** Entrepreneurship

COM 439 - Integrated Marketing Communication Practicum: Pier601

Applied learning experience in a student-run integrated marketing communication (IMC) firm. Students research, plan, create, and execute IMC and media production projects and are responsible for promoting the Pier601 brand, meeting client needs, and identifying new clients. Emphasizes collaboration, responsibility, cross-functional teams, professional and ethical standards and norms.

Credit Hours: 3

Additional Restrictions/Requirements: Permission of instructor. Up to 9 credits applied to total credit hours, but a maximum of 3 credit hours will be applied to COM Studies major or Integrated Marketing Communication (IMC) certificate requirements.

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 9 **Repeat Limit:** 2
Major Restriction COM Majors or Integrated Marketing Communication (IMC) Certificate

CRW 305 - The Creative Process

Investigation through reading, lectures, discussions, writing, and exercises of the creative process in general and its particular application to literary art. Readings include studies of the creative process in a variety of other disciplines.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: CRW 207 or CRW 208 or CRW 209, or consent of instructor.
Course Repeatability: Course may not be repeated.

CRW 318 - Screenwriting I: Introduction to Screenwriting

Theory and practice of screenwriting an emphasis on the fundamentals of narrative structure. Students write original scripts, including a short screenplay for possible use in FST 495.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: FST 201; or prerequisite:CRW 207 or CRW 208 or CRW 209; or consent of instructor.
Additional Restrictions/Requirements: Restricted to PCRW or CRW majors.
Crosslisting: FST 318
Course Repeatability: Course may not be repeated.

CRW 321 - Introduction to Book Publishing

Introduction to the culture and commerce of books. Examines the life cycle of a book; the people and processes involved in book publishing including editorial practice and the issues involved in editorial decision-making; and the business, economics, and ethics of the publishing industry. Engagement in a variety of publishing activities, such as a book proposal and mock book auction.

Credit Hours: 3

Prerequisite Courses: CRW 201
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

CSC 351 - Applied Software Security

Introduction to the development of secure software applications. Consideration of software vulnerability analysis, secure programming best practices, overflows, input sanitization, password security, command injection, database development, and web application development and vulnerabilities. Design, analysis, and implementation of a secure web application.

Credit Hours: 3

Prerequisite Courses: CSC 231 with a grade of C or better, or CYBR 251 with a grade of C or better, or instructor approval.
Course Repeatability: Course may not be repeated.

CSC 365 - Client-Side Web Development

Development of applications for the World Wide Web focusing on client-side languages. Introduction to current principles, standards, and best practices in website design, usability, accessibility, and management through project-based skills. Development in standards-compliant markup, styling, and scripting, including web services programming.

Credit Hours: 3

Prerequisite Courses: CSC 231 or permission of instructor.
Course Repeatability: Course may not be repeated.

CSC 385 - Professional and Ethical Issues in Computing

Professional and ethical issues arising from the impact of computer science and related technologies on society. Topics include ethical issues, obligations of professional practice, privacy and security, intellectual property, work and health issues, and the impact of emerging technologies. Students give both oral and written presentations and discuss case studies.

Credit Hours: 3

Prerequisite Courses: ENG 101, and (CSC 131 with a minimum grade of "C").
Additional Restrictions/Requirements: Junior or senior standing in computer science or information technology or Digital Arts or Software Engineering
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.
Major Restriction Computer Science or Information Technology or Digital Arts or Software Engineering**Minor Restriction** Computer Science or Information Technology or Digital Arts or Software Engineering

CSC 424 - Security Tools Engineering

Design and implementation of software solutions to achieve security goals using data captured on computer systems and networks. Topics include advanced network forensics, network defense tools and principles, and advanced intrusion detection and prevention implementations.

Credit Hours: 3

Prerequisite Courses: (CSC 231 with a C or better or CYBR 251 with a C or better) and (CSC 344 or MIS 320)
Crosslisting: CYBR 424.
Course Repeatability: Course may not be repeated.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and

Behaviors
Course Repeatability: Course may not be repeated.

EBD 281 - Creativity and Innovation

Primary focus on the processes for fostering creativity and innovation. Emphasis on the creative process, creative problem solving, and intrapreneurship. Particular attention directed to the development of new products, services, processes, and business models.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EBD 282 - Entrepreneurship for the Sciences and Engineering

This course introduces non-business, scientifically-oriented students to the process of creating new ventures and entrepreneurship in engineering and science intensive industries, such as chemical, energy, materials, bioengineering, environmental, clean-tech, pharmaceuticals, medical and biotechnology. Students gain a good sense of the excitement, complexity, and challenges associated with the creation of new

businesses, whether within an existing organization or in a startup environment. The focus is on new ventures that require long development times, large investments, integration across a wide range of technical and non-technical disciplines, and the creation and protection of intellectual property. Teaching methods will include lectures, case studies, guest speakers and individual and team projects.

Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.

EBD 301 - Entrepreneurial Finance for Non-Business Majors

Course provides students with the knowledge and skills necessary to manage cash as well as manage the necessary records in a small business. Topics include: calculating startup costs, running a monthly, quarterly and annual budget for a business, understanding the different sources of capital and how to obtain them, projecting income and what investors, lenders and

grant organizations look for in an entrepreneurial venture. SBIR/STTR funding, financial analysis and record-keeping necessary to comply with federal, state, and local tax law are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 302 - Managing & Marketing for Entrepreneurs

Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it

progresses through growth phases. Focus on key organizational activities that facilitate the growth and management of an enterprise. Provides valuable information for effective marketing techniques designed to grow, compete, and sustain the business. Focus on managing human resources and the ability to strategically develop the business model as it progresses through growth phases. Students will also learn successful exit strategies for a business. Leadership, management, positioning, legal strategies, sales strategies, and scaling strategy are also addressed.

Credit Hours: 3

Prerequisite or Corequisite Courses: EBD 280 OR EBD 282
Additional Restrictions/Requirements: This course is for non-business majors and students in the BA Economics program. Students pursuing a BSBA in the Cameron School may not take this course.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

EBD 304 - Entrepreneurship in the Arts

This course will introduce and outline the role of "art" in various marketplaces, and how the emerging arts entrepreneur operates in society. Topics include how to position and market aesthetic products, the pricing of art products, understanding consumer behavior for aesthetic products, the modes of financing, and art patronage. Course will also examine the nature of art infrastructures, such as museums, festivals, and galleries, and the overall economics of the arts in modern society.

Prerequisite or Corequisite Courses: EBD 280 or EBD 282
Course Repeatability: Course may not be repeated.

EBD 354 - Managing Innovation and Technology

Development and adoption of new technology in corporate operations. Attention directed to creating an environment that fosters continuous improvement through experimentation, innovation, and change. Topics include the nature of technology, its role in business strategy, technological forecasting, the creative process, organization and management of

professional personnel, and project management techniques.

Credit Hours: 3

Additional Restrictions/Requirements: Admission to Cameron School of Business.
Crosslisting: MGT 354
Course Repeatability: Course may not be repeated.

EBD 482 - Global Entrepreneurship and Exporting

Primary focus on entrepreneurial activities within the international arena. Particular attention on the mechanisms of international entry modes, import and export management, licensing mechanisms, international financing, the impact of globalization, identifying business opportunities, risk assessment, legal and accounting implications of international activities, and international intellectual protection processes. Upon completion of this course, students will be qualified to take the Certified Global Business Professional (CGBP) exam.

Credit Hours: 3

Prerequisite Courses: INB 300
Additional Restrictions/Requirements: Prerequisite course and admission to Cameron School of Business.
Course Repeatability: Course may not be repeated.

ECN 221 - Principles of Economics-Micro

Analysis of decision-making processes and economic equilibrium for the individual firm and consumer at an introductory level.

Credit Hours: 3

Prerequisite Courses: MAT 111 or MAT 150 or MAT 151 or MAT 160 or MAT 161
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

ECN 222 - Principles of Economics-Macro

Aggregate economic analysis examining the effects of fiscal and monetary policy upon aggregate employment, income and prices at an introductory level.

Credit Hours: 3

Prerequisite Courses: ECN 221
University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

EGN 210 - Engineering Economic Analysis

This course is focused on engineering and managerial decision making. Topics will include the theory of interest; equivalent annual costs; present worth; internal rates of return; benefit/cost ratios. Techniques in cost minimization models and sensitivity analysis will be developed in the context of engineering examples.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EGN 430 - Coastal Structures

Examine the functional design of coastal structures distinguishing between groins, jetties, seawalls, breakwaters, revetments and bulkhealds. Hydraulic design and structural stability as a result of breaking and non-breaking wave loading are also covered. In addtion, students examine the materials used and cost implications of coastal structures.

Credit Hours: 3

Prerequisite Courses: EGN 301 (C- or better) and EGN 330 (C- or better).
Course Repeatability: Course may not be repeated.

EGN 498 - Internship in Engineering

Practical experience and academic training in the student's principal area of interest. Joint supervision and evaluation by a engineering faculty member and an on-site supervisor.

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.50 and a GPA in EGN courses of at least 2.80. Students must be

pre-approved by the faculty supervisor, department chair and dean.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

ENG 204 - Introduction to Professional Writing

An introductory survey of concepts in professional writing, including audience analysis, research methods, visual thinking, and composing processes. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

ENG 309 - Technical Editing

Focus on the fundamentals of effective writing, organization, and design in order to develop the language and proficiencies necessary to edit print and digital texts used in a range of organizations.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

ENG 310 - Editing for Journalism and Mass Media

Instruction in revising, editing and copy editing. Techniques and strategies for getting prose ready for publication. Extensive practice in editing.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

ENG 312 - Writing Strategies for Business and Innovation

Advanced exploration of research and writing skills needed to plan and design texts for diverse audiences within organizational contexts. Projects include business plans, proposals, reports, and other genres developed using a variety of media. Includes instruction in graphically representing data and using social media for research and/or outreach.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 314 - Digital Composing

Study of the intersection between writing and technology, including Web page creation, documentation, usability, desktop publishing, and the use of graphics with text.

Credit Hours: 3

Prerequisite Courses: ENG 204 or ENG 205 or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

ENG 319 - Document Design

Study of effective design of print and electronic documents. Emphasis on browsing patterns, usability, the interaction of text and graphics, and visual rhetoric.

Includes a service-learning component.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ENG 204, or consent of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EVS 325 - Environmental Economics

Application of basic economic principles to help understand environmental problems and evaluate alternative solutions. Economic principles used to analyze fundamental environmental issues such as property rights, externalities, conservation, public good, environmental protection, natural resource damage assessment, and pollution control. Specific focus on methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221

Crosslisting: ECN 325
Course Repeatability: Course may not be repeated.

EVS 330 - Natural Resource Economics

Economic principles developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory developed and applied to the management of natural resources. Attention to specific resource management areas such as forests and fisheries. Feasibility of alternatives for public policy.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: ECN 330
Course Repeatability: Course may not be repeated.

EVS 424 - Environmental Nonprofit Organizations

Introduction to the unique issues facing environmental nonprofit organizations when addressing wicked problems in conservation, sustainability, and environment. Practical application and examination of

real-world case studies provides a foundation to examine best practices in outreach, education, systems thinking, and adaptive management from local and global frameworks in environmental nonprofit organizations.

Credit Hours: 3

Additional Restrictions/Requirements: Junior/Senior standing required or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 466 - Sustainable Tourism

Introduction to concepts and principles of sustainable tourism development, emphasizing implications for management and planning. Cases from the U.S. and around the world are used to examine and discuss issues and practices of sustainable tourism development within different geocultural contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or

senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 490 - Environmental Community Engagement

Introduction to the role of environmental agencies in the community. Requires 40 hours of volunteer time directed toward helping the mission of the environmental agency. Additional liability insurance

expense may be necessary.

Credit Hours: 1

Additional Restrictions/Requirements: Must be Environmental Science minor or Sustainability minor.
Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability Insurance

FIN 335 - Principles of Financial Management

An introduction to the finance function of business enterprise and to the analytical techniques used in making investment and financing decisions.

Credit Hours: 3

Prerequisite Courses: Prerequisite ACG 201, ECN 222 and (BAN 280 or STT 215); or prerequisite STT 315 and corequisite MAT 381.
Course Repeatability: Course may not be repeated.

FRH 304 - French for the Professions

Intensive study of specialized vocabulary, real-life situations, and cultural differences that play an important role in commerce with the Francophone world. Extensive use of authentic materials and translation; oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 202 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FRH 319 - Introduction to the Francophone World

An exploration of the diverse regions of the French-speaking world through the study of current cultural, literary, social, and linguistic issues.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam.
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

FRH 404 - Advanced French for the Professions

Advanced work in uses of French in various professional settings, including diplomacy, international affairs, global development organizations, medical professions, film and fashion industries, culinary arts, and others. Emphasis on research of professional organization in the Francophone world, individual and/or group presentations, and written reports specific to each profession. Content may vary to address individual needs.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH

303 or placement by exam
Additional Restrictions/Requirements: Permission of instructor.
University Studies: Building Competencies/Information Literacy
Course Repeatability: Course may not be repeated.

FRH 412 - The Francophone World

Study of representative literary and non-literary texts, films and sound recordings from French-speaking cultures in North America, the Caribbean, Africa, Asia, and elsewhere. Oral and written reports.

Credit Hours: 3

Prerequisite Courses: FRH 301 or FRH 302 or FRH 303 or placement by exam
Additional Restrictions/Requirements: Permission of the instructor.
University Studies: Building Competencies/Writing Intensive, Common Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

FST 204 - The Business of Film

Introduction to business aspects of the motion picture industry, including the life cycle of a film product from development through distribution and marketing. Emphasis on decisions regarding creative development, financing, legal issues, budgeting, scheduling, marketing, and exhibition.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

FST 304 - Legal Issues in Film and Entertainment Law

Study of the legal issues impacting the film and entertainment industry, including the legal aspects of business organization, contracts, torts, agency, employment law, environmental regulation, and intellectual property rights.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing.

Crosslisting: BLA 304
Course Repeatability: Course may not be repeated.

FST 398 - Practicum in Film Production

Selected topics in film production. May be repeated under different subtitles.

Credit Hours: 1 To 3

Prerequisite Courses: FST 201
Additional Restrictions/Requirements: Restricted to FST major or consent of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

FST 451 - Film Festival and Conference Management

Plan, market, and manage a film festival and conference.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite:FST 201 and FST 205, and permission of department chair.
Course Repeatability: Course may not be repeated.
Repeat Limit: 1

INB 300 - International Business

Survey course of the importance of global issues as firms attempt to compete across the world. Key topics include: anticipating and preparing for global competition, understanding international trade theory and differences in political economies, reviewing global and regional economic integration, considering international market entry processes, and examining key cross-cultural issues affecting business operations.

Credit Hours: 3

Prerequisite Courses: ECN 222
Additional Restrictions/Requirements: Junior or senior standing, prerequisite course, or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in a Global Society, Common

Requirements/Critical Reasoning
Course Repeatability: Course may not be repeated.

MGT 350 - Principles of Management

Study of theories, research and concepts underlying the structure and processes of complex organizations. Emphasis on problem solving issues and applications in organization design, leadership, motivation and interpersonal communications.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

MKT 248 - Sales Essentials

Examination of the theory and practice of sales skills designed to provide a professional foundation to students who will be involved in professional selling careers. Includes fundamentals of professional selling with an emphasis on self-confidence, persuasive presentation of ideas and products, customer

orientation, and other selling behaviors. Familiarize students with the role of selling in the promotional mix, practice presentation skills to be successful in professional selling, overcome objections, and close the sale.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

MKT 340 - Principles of Marketing

Introduction to the concepts, activities and decisions that relate to the marketing function in domestic and international business. Focus on development and implementation of marketing strategies through the use of marketing mix variables of product, price, distribution, and promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Sophomore standing or admission to the Cameron School of Business.
Course Repeatability: Course may not be repeated.

MUS 381 - Music Entrepreneurship

A survey of the history and practices of the music industry, with an emphasis on evolving practices, emerging opportunities, and innovation in career planning, as well as methods and practices of artist representation and self-promotion.

Credit Hours: 3

Additional Restrictions/Requirements: Consent of instructor.
Course Repeatability: Course may not be repeated.

MUS 382 - Music Industry

A survey of the structures, economics, and operations of the recording industry; music publishing and distribution systems; intellectual property; and issues related to live music performance, with an emphasis on copyright law, contracts, and licensing, as well as marketing and promotional strategies of major and independent record labels, music publishers, and various media.

Credit Hours: 3

Prerequisite Courses: MUS 381
Course Repeatability: Course may not be repeated.

OCN 479 - Smart Coasts

Advanced design and analysis of Smart Coastal monitoring systems and datasets. Study and application of the techniques used to observe coastal dynamics in near real time and provide not just data but also distilled information for research, operational, and educational uses.

Credit Hours: 2

Prerequisite Courses: OCN 350.
Course Repeatability: Course may not be repeated.

PLS 360 - Introduction to Nonprofit Management

Covers management fundamentals in the nonprofit sector. Selected topics include governance, human relations, financial management, public relations and fundraising.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom/Certified Internship Program
Course Repeatability: Course may not be repeated.

PLS 361 - Nonprofit Resource Development

Examines the range of ways for nonprofit organizations to raise funds from individuals, government, foundations, and corporations. Major theoretical foundations of fund development, general fundraising principles, donor market segregation, fundraising techniques, and key aspects of managing the fundraising process.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

REC 375 - Leadership and Management in Tourism, Recreation, and Sport

Principles and practices of contemporary leisure service management, particularly the effective and efficient management of human, fiscal, informational, and physical resources through planning, organizing, directing, leading, and controlling decisions. Tutorials, case studies, and computer applications.

Credit Hours: 3

Prerequisite Courses: REC 265 and REC 270.
Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 381 - Meetings, Expositions, Special Events and Conventions

An overview of the convention, exposition, meeting, and convention and visitors bureau industries and the career options within; provision of an essential understanding of the components involved in the operation of successful meetings, conventions, and

special events.

Credit Hours: 3

Additional Restrictions/Requirements: REC majors and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Major Restriction REC**Minor Restriction** REC

REC 392 - Organization and Leadership of Recreational Sports

Emphasis on the development of practical leadership skills, provided in a framework for understanding leadership dynamics. Evaluation and assessment of various leadership methods and techniques. Field work required.

Credit Hours: 3

Prerequisite Courses: REC 265
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 452 - Hospitality Management Operations

Analysis and evaluation of the operations behind management within the tourism and hospitality industries, specifically within food and beverage, transportation providers, attractions, tour operators and specialized tour segments such as the cruise industry and gaming.

Credit Hours: 3

Additional Restrictions/Requirements: Open only to students in the REC major and minor or with permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

REC 453 - Hotel and Lodging Management

Decision making, analysis and process improvement in managing the major divisions of a lodging establishment.

Credit Hours: 3

Prerequisite Courses: REC 375
Additional Restrictions/Requirements: REC majors

and minors only or permission of instructor.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 260 - Poverty Studies

Examination of the nature and extent of poverty in the United States. Discussion of poverty measurement, characteristics, poverty population, international comparisons, underlying causes of poverty and government programs and policies that address poverty.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in Our Diverse Nation, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 315 - Urban Sociology

Analysis of the history and development, social organization, and problems of the city.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 320 - Rural Sociology

An examination of the issues and perspectives in rural sociology. Multiple sociological aspects of rural life will be explored focusing on gender, race, social class and social change.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 325 - Racial and Ethnic Group Relations

An examination of race and ethnicity in modern societies and social, economic, and political inequalities among racial and ethnic groups. Major topics include

political-economic causes and consequences of prejudice, racism and institutional discrimination; social history of intergroup relations in the United States; comparative intergroup relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
University Studies: Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 340 - Organizations in Modern Society

An introduction to the dynamics of social life in large-scale organizations. Topics include organizational social psychology, organizational structure and process, and organization-community relations.

Credit Hours: 3

Prerequisite Courses: SOC 105
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SOC 486 - Sociology of Work and Occupations

Analysis of the place of work in society. Examines occupational structures as the primary link between persons and the larger society. Topics include the growth and development of occupational structure, occupations and technological change, and organizational complexity.

Credit Hours: 3

Prerequisite Courses: SOC 105
Additional Restrictions/Requirements: Prerequisite course and three additional hours in sociology or economics.
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 310 - Business Spanish

Designed for students who need familiarization with the terminology necessary for the fields of economics, business, accounting, natural sciences and others. Business correspondence in Spanish and the currency systems of the Spanish-speaking countries are included.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 311 - Spanish Civilization

Geographical, historical and cultural aspects of Spain.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 312 - Spanish-American Civilization

Geographical, historical, and cultural aspects of Spanish America.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
University Studies: Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 323 - Introduction to US Latino Literature and Culture

Selected readings from the literature of Latino communities in the United States; emphasis on textual analysis and criticism in classroom discussions; oral and written reports.

Credit Hours: 3

Prerequisite Courses: SPN 305 with a minimum grade of C
University Studies: Approaches and Perspectives/Aesthetic, Interpretive, and Literary Perspectives, Approaches and Perspectives/Living in Our Diverse Nation
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SPN 411 - Topics in Spanish Civilization

Advanced study in geographical, historical, and cultural aspects of Spain. Topics focus on specific time periods, geographic areas, or cultural phenomena. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: SPN 311 with a grade of 'C' or better.
University Studies: Building Competencies/Writing Intensive, Building Competencies/Information Literacy
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

SPN 412 - Topics in Spanish-American Civilization

Advanced study in geographical, historical, and cultural aspects of Spanish America. Topics focus on specific time periods, geographic areas, or cultural phenomena. May be repeated under a different subtitle.

Credit Hours: 3

Prerequisite Courses: SPN 312 with a grade of C or better
University Studies: Approaches and Perspectives/Living in a Global Society, Building Competencies/Information Literacy, Critical Reasoning
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6 **Repeat Limit:** 1

STT 412 - Applied Regression and Correlation

Review of elementary statistics; linear and multiple regression; correlation. Statistical software packages used as appropriate in problem solving.

Credit Hours: 3

Prerequisite Courses: MAT 335
Additional Restrictions/Requirements: Any elementary statistics course.
Course Repeatability: Course may not be repeated.

SWK 316 - Generalist Social Work in Rural Communities

A survey of rural community life, its institutions, value systems, customs, and their implications for social work

practice. Issues dealing with migrant workers and Native American cultures.

Credit Hours: 3

Prerequisite Courses: SWK 235
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

SWK 320 - Human Behavior and the Social Environment I

Perspectives on human development and behavior in diverse contexts, including: culture, oppression, poverty, gender, ethnicity, physical and social settings. Implications for social work practice and policies. Prenatal Through Adolescence.

Credit Hours: 3

Corequisite Courses: SWK 240 and SWK 355, and SWKL 240, each with a grade of 'C' or better.
Prerequisite or Corequisite Courses: SWK 235 with a grade of 'C' or better.
Additional Restrictions/Requirements: Restricted to

BSW majors main campus and/or extension site. Students must earn a "C" or better in each SWK course in order to progress in the program.
University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

SWK 443 - Social Work Practice with Communities and Organizations

Knowledge, values, and skills common to social work practice at the community and organizational levels. Principles of social planning, community development, and social action. Topics include needs assessment, program planning and development, organizational change and program evaluation.

Credit Hours: 3

Corequisite Courses: SWK 321 and SWK 396.
Prerequisite Courses: SWK 240 and SWK 320.
Additional Restrictions/Requirements: Restricted to BSW majors, main campus and/or extension site. Students must earn a "C" or better in each SWK course

in order to progress in the program.
Course Repeatability: Course may not be repeated.

THR 309 - History of Fashion

Exploration of the changes in silhouette and fabrication of clothing from ancient Greece to today. Special emphasis on the social and cultural consequences of fashion in different societies.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

THR 380 - Stage Management

The techniques used by professionals for the managment of theatrical and performance events. Students will learn organizational and leadership skills necessary for being sucessful stage managers.

Credit Hours: 3

Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 3

THR 381 - Theatre Management

An introduction to the theory and art of managment in the American theatre. Basic principles of business practices and relate them to theatre management. Examines the various types of theatre organizations and production methods.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

THR 395 - Applied Studies in Theatre

A broad study of topics within the theatre discipline, such as advanced design and technology, history of theatrical design, dramatic criticism, advanced directing, advanced playwriting, and stage management. May be repeated under a different subtitles.

Credit Hours: 3

Prerequisite Courses: THR 165
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

In the case of restricted classes, approval must be secured by the appropriate Department Chair. Students may choose any of the optional courses to meet the 6 hours; however students are encouraged to choose courses that constitute a focus, e.g. entrepreneurship in the Arts, in Science, in Technology as examples. Students should confer with academic advisors when determining a cluster of the three courses. Students must earn a C- or above in all classes in the minor.

Total Credit Hours: 21

Sociology Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Sociology:

Core Course (3 Credit Hours)

SOC 105 - Introduction to Sociology

Introduction to the scientific study of human society and social behavior.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Additional Courses (18 Credit Hours)

- 18 additional hours of sociology courses

Total: 21 hours

Additional Information:

A maximum of 6 hours below the 300 level (including SOC 105) may be used to satisfy the above requirements. Also, an overall grade point average of "C" (2.00) or better is required among sociology courses used to satisfy the minor.

Spanish Minor

Admission Requirements

Current UNCW Undergraduate Students

- See University Admission Requirements

Requirements for a Minor in Spanish

Completion of a minimum of 21 hours at the 200 level and above. Of these, at least 15 hours must be at the 300 level or higher. A grade of "C-"or better is required in each course counted toward the minor and a "C" (2.00) average or better for all courses counted towards the minor.

Courses (21 Credit Hours)

Completion of a minimum of 21 hours at the 200 level and above. Of these, at least 15 hours must be at the 300 level or higher.

Total Credit Hours: 21

Statistics Minor

Requirements for a Minor in Statistics:

STT 215 - Introduction to Statistics

Methods of data collection; numerical and graphical analyses of univariate and bivariate data; axioms of probability; conditional probability; independence; distributions of random variables; introduction to confidence intervals and hypothesis testing; simple linear regression and correlation; use of statistical software to analyze data and simulate random variables.

Credit Hours: 3

University Studies: Foundations/Mathematics and Statistics
Course Repeatability: Course may not be repeated.

DSC 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN

280
Course Repeatability: Course may not be repeated.

Or

STT 303 - R for Data Science

Introduction to data science with an overview of the basic techniques for making informed, data-driven decisions using the R statistical software. Students learn the basics of R programming and use it to visualize, wrangle, manipulate, and explore data of many types and sizes.

Prerequisite Courses: STT 215, or PSY 225, or BAN 280
Course Repeatability: Course may not be repeated.

Or

STT 305 - Statistical Programming

Introduction to statistical programming in SAS with emphasis on data step programming; applications to data management and report generation, simulation, graphical and numerical analysis of univariate and multivariate data. Comparison of current statistical software.

Credit Hours: 3

Prerequisite Courses: STT 215
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

- at least 12 additional hours in statistics at the 300-400 level.

Total: 18 hours in statistics

Additional Information:

An overall quality point average of "C" (2.00) or better is required for all courses counted toward the minor.

Studio Art Minor

Studio Art Minor introduces students to Studio Art practice with a foundational understanding of art-making and an opportunity to further explore an area of interest.

Requirements for a Minor in Studio Art

Core Courses (9 Credit Hours)

ART 101 - Two-Dimensional Design

Study of the principles of two-dimensional design and introduction to color theory.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 102 - Three Dimensional Design

Introduction to concepts of three-dimensional design. Focus on the elements, principles, and basic construction of three dimensional form.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

ART 111 - Drawing Fundamentals

Fundamentals of drawing; investigation of processes and visual concepts with emphasis on charcoal.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

Elective Courses (15 Credit Hours)

- 15 hours chosen from 200-400 level ART courses.
- At least 6 hours must be 300-400 level.

Total Credit Hours: 24

Additional Information

No more than 3 hours of ART 491 or 3 hours of ART 498 may be counted towards the minor. A grade of "C" (2.00) or better is required for each course counted toward the minor.

Sustainability Minor

Program coordinator: Dr. Huili Hao

The Department of Environmental Sciences offers an interdisciplinary minor in Sustainability. The minor examines the interconnected nature of environmental stewardship, economic stability, and personal and social responsibility necessary to achieve a sustainable future.

Requirements for a Minor in Sustainability

A minor in sustainability requires a total of 23 credit hours with a minimum overall quality point average of

"C" (2.00) in courses counted. Students may select any EVS numbered courses not used in the core requirements as an elective. A minimum of 9 hours must be at the 300-400 level. A maximum of 12 credit hours counted toward a student's major will be counted toward completion of the core and/or elective minor requirements in sustainability. Students selecting the minor are strongly encouraged to meet with an environmental studies advisor to determine a specific course of study.

Core Requirements:

EVS 195 - Introduction to Environmental Sciences

Interdisciplinary introduction to the scope and application of environmental sciences. Emphasis on integrated analysis of environmental principles and discussions centering on current environmental problems. The lab for this course is EVSL 195.

Credit Hours: 3

Additional Restrictions/Requirements: EVS 195 and EVSL 195 may be taken in different semesters.

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVSL 195 - Environmental Sciences Lab

Laboratory analysis of environmental principles, resources, and problems. Application of scientific and social principles to solving current environmental problems. This course is the lab for EVS 195.

Credit Hours: 1

Prerequisite or Corequisite Courses: EVS 195
Additional Restrictions/Requirements: EVSL 195 may be taken in the same semester as EVS 195 or in a semester subsequent to EVS 195.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

EVS 205 - Global Environmental Issues

Interdisciplinary study of contemporary environmental issues at a global scale, such as climate change, human population, biodiversity loss, food and water scarcity, energy, stratospheric ozone depletion, acid rain, and environmental justice. Causes, effects, policy implications, international negotiations, and development of treaties will be examined.

Credit Hours: 3

University Studies: Approaches and Perspectives/Scientific Approaches to the Natural World, Approaches and Perspectives/Living in a Global Society
Course Repeatability: Course may not be repeated.

EVS 476 - Topics and Issues in Sustainability

Study of fundamental concepts related to a sustainable society including current global and local issues. Focus on environmental topics (energy, water, climate, soil, forests, food, and population) with consideration of current social and economic issues. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195 and EVSL 195
Additional Restrictions/Requirements: Prerequisite courses or consent of the instructor.
Course Repeatability: Course may not be repeated.

Total: 10 hours

Applied Service Learning

Minimum of one credit hour required.

EVS 490 - Environmental Community Engagement

Introduction to the role of environmental agencies in the community. Requires 40 hours of volunteer time directed toward helping the mission of the environmental agency. Additional liability insurance expense may be necessary.

Credit Hours: 1

Additional Restrictions/Requirements: Must be Environmental Science minor or Sustainability minor.

Course Repeatability: Course may not be repeated.
Additional Course Fees: Student Blanket Professional Liability Insurance

EVS 491 - Directed Individual Study

Involves investigation under faculty supervision beyond what is offered in existing courses. For further information, consult the Enrichment Courses and Programs section in the catalogue.

Credit Hours: 1 To 6

Additional Restrictions/Requirements: Junior or senior standing, overall GPA of at least 2.00, and consent of instructor and department chair.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12

EVS 497 - Practicum in Environmental Sciences

Advanced field placement experience in governmental, corporate, NGO or other setting in the environmental field. Provides extended opportunity for fieldwork,

research, and creative projects. Relates theory to practical application in the field. 40 hours of field work for each credit hour. Additional liability insurance expense may be necessary.

Credit Hours: 1 To 12

Additional Restrictions/Requirements: Declared major in EVS, 2.00 GPA overall, and consent of instructor.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 12
Additional Course Fees: Student Blanket Professional Liability InsuranceAdditional Course Fee Schedule

EVS 499 - Honors Work in Environmental Sciences

Independent study for honors students.

Credit Hours: 2 To 3

Additional Restrictions/Requirements: Senior

standing.
University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 6

12 hours from the following (9 hours at the 300-400 level):

Economic Domain

Minimum of three hours required.

EBD 280 - Entrepreneurship for Non-Business Majors

Primary focus on the entrepreneurial mindset and the process for starting a business. Specific areas include the characteristics of successful entrepreneurs, profiles of successful new businesses, identifying and evaluating new business opportunities, and developing the business plan. Social and developmental entrepreneurship are also addressed.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 125 - Survey of Economics

An introduction to economics principles for non-business and non-economics majors. Current analysis rather than theoretical analysis is utilized to present and show the relevance of economics principles. (Not open to students who have earned credit for either ECN 221 or ECN 222.)

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 250 - Capitalism and the Global Market

An introduction to the history of capitalism, the current global market society, and the ethics of capitalism.

Credit Hours: 3

University Studies: Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

ECN 325 - Environmental Economics

Application of basic economics principles is used to help understand environmental problems and evaluate alternative solutions. Economic principles will be employed to analyze fundamental environmental issues such as property rights, externalities, conservation, and public goods. Public policy issues such as environment protection, natural resource damage assessment, and pollution control will be evaluated from an economic perspective. Specific focus will be given to methods for non-market valuation.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 325
Course Repeatability: Course may not be repeated.

ECN 330 - Natural Resource Economics

Economic principles are developed and applied to evaluate public and private decisions involving the use and allocation of natural resources. Optimal control theory is developed and applied to the management of natural resources. Attention is given to specific resources management areas such as forests and fisheries. The feasibility of alternatives for public policy is evaluated.

Credit Hours: 3

Prerequisite Courses: ECN 125 or ECN 221
Crosslisting: EVS 330
Course Repeatability: Course may not be repeated.

ENG 308 - Grant and Proposal Writing

Study of grant and proposal writing for use in non-profit organizations, educational settings, and businesses. Emphasis on research methods, planning, developing funding relationships, and writing collaboratively. Includes a service-learning component.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive, Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

MGT 351 - Green Business and Sustainable Enterprise

Examination of green business and sustainable enterprise from multiple perspectives. Emphasis on how organizations create a sustainable focus in their productive activities and successfully compete in the eco-friendly marketplace. Particular attention directed to regulatory trends that impact green enterprises, the development of sustainable technologies, and the management of entrepreneurial efforts in green industries.

Credit Hours: 3

Additional Restrictions/Requirements: Junior Standing
Course Repeatability: Course may not be repeated.
Maximum Repeatable Hours: 3

Social Domain

Minimum of three hours required.

ANT 329 - Environmental Justice Ethnography

Ethnographic survey of the emergence of social movements organized around environmental issues. Through the writings of cultural anthropologists, students learn how communities around the world threatened by environmental destruction seek justice, accountability, and sustainability. Environmental crises are analyzed in terms of globalization, structures of poverty, and human rights.

Credit Hours: 3

University Studies: Building Competencies/Writing Intensive
Course Repeatability: Course may not be repeated.

EBD 380 - Entrepreneurship

Primary focus is understanding entrepreneurship as a process and phenomenon that occurs in many different contexts. The course approaches entrepreneurship as a way of thinking and acting, as an attitude and a behavior. Specific areas include entrepreneuriial

competencies (e.g., opportunity assessment and recognition techniques) and career paths, venture typologies, as well as basics of business and economic modeling, financing, marketing, legal and IP issues.

Credit Hours: 3

Prerequisite Courses: Prerequisite or corequisite: ACG 203.
Course Repeatability: Course may not be repeated

EVS 304 - Citizen Science

Introduction to the rapidly growing, interdisciplinary field of citizen and community-based science. Exploration of prior research and social science theories to highlight strengths and weaknesses of different citizen science approaches. Key principles to creating and managing successful citizen science projects operating at different scales are covered.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 364 - Natural Resource Policy

Existing natural resource laws, institutions and programs are summarized in their historical context and in relation to current natural resource issues. Philosophical underpinnings of policy positions are examined and discussed. Models of policy creation, implementation, and reform, with specific examples focusing on natural resource management.

Credit Hours: 3

Prerequisite Courses: EVS 195 or permission of instructor.
Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 428 - Environmental Interpretation in Protected Areas

Exploration of key concepts related to environmental interpretation in terrestrial and marine protected areas. Focus on, and experience in, the development and implementation of environmental interpretive materials (e.g., brochures, signage, exhibits) and activities (e.g., talks, guided tours, field trips). Additional Course Fees:

Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

EVS 465 - Education for Sustainable Development

Study of educational strategies and methods for implementing priority action areas of sustainable development goals. Focus on sustainable development education as practiced in the field in different countries under varying circumstances using a case study approach. Evaluation of the relative success of alternative teaching methods related to sustainable development across locations and cultures.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 466 - Sustainable Tourism

Introduction to concepts and principles of sustainable tourism development, emphasizing implications for management and planning. Cases from the U.S. and around the world are used to examine and discuss issues and practices of sustainable tourism development within different geocultural contexts.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

GGY 473 - Environmental Land Use Change and Planning

Overview of the concepts and processes related to rural and urban development; growth and change, including land use issues and environmental planning strategies around land, water, and other natural resources; and critical evaluations of regional land use plans and policies. Students will conduct applied research on various regional/environmental land use issues and create outreach and communication tools in oral and written form.

Credit Hours: 3

Prerequisite Courses: GGY 130 or GGY 321 or EVS 195 or OCN 150 or consent of instructor
Course Repeatability: Course may not be repeated.

HST 332 - American Environmental History

The significance of the environment in American history from the colonial period to the present. Emphasis on the relationship between the natural environment of North America and the development of American culture and society, as well as changing attitudes toward the natural environment.

Credit Hours: 3

Additional Restrictions/Requirements: Any HST course or consent of instructor.
Course Repeatability: Course may not be repeated.

PLS 209 - Environmental Politics

Role of politics in environmental policy. Topics include the politics of the environmental movement, the

environment as a public policy issue, and the development and impact of environmental policy.

Credit Hours: 3

University Studies: Explorations Beyond the Classroom
Course Repeatability: Course may not be repeated.

SOC 385 - Environmental Sociology

Examination of human-environment interactions from a sociological perspective. Focus on culture, patterns of inequalities, consumption, and beliefs about the environment and their impacts on the natural world.

Credit Hours: 3

University Studies: Approaches and Perspectives/Living in a Diverse Nation, Approaches and Perspectives/Understanding Human Institutions and Behaviors
Course Repeatability: Course may not be repeated.

Environmental Domain

Minimum of three hours required.

BIO 366 - Ecology

An introduction to basic ecological principles as they pertain to individual organisms, populations, communities and systems. The lab for this course is BIOL 366.

Credit Hours: 3

Prerequisite Courses: BIO 201 and BIO 202
Course Repeatability: Course may not be repeated.

CHM 377 - Environmental Chemistry

Introduction to the chemistry of air, soil, and natural waters. Processes of environmental degradation, cleanup, and pollution prevention. Selected current topics. The lab for this course is CHML 377.

Credit Hours: 3

Prerequisite Courses: CHM 102 and CHML 102.
Course Repeatability: Course may not be repeated.

EVS 355 - Marine Debris

Study of marine debris in the field, including plastics, derelict fishing gear, trash, and storm wreckage, affecting the environment, human health, and the economy. Focus on field techniques and preparation of outreach materials for public audiences. Field excursions required. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 400 - Wildlife Management

Introductory principals of wildlife management spanning management perspectives, managing landscapes for wildlife, and managing wildlife populations.

Credit Hours: 3

Prerequisite Courses: EVS 195, BIO 366.
Course Repeatability: Course may not be repeated.

EVS 410 - Environmental Modeling

Overview of environmental modeling as used in practice. Consideration of selected abiotic and biotic models with applications to bacteria, plankton, fish, plants, trees, amphibians, reptiles, birds, and mammals. Hands-on ecological modeling with spreadsheet software.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 424 - Environmental Nonprofit Organizations

Introduction to the unique issues facing environmental nonprofit organizations when addressing wicked problems in conservation, sustainability, and environment. Practical application and examination of real-world case studies provides a foundation to examine best practices in outreach, education, systems thinking, and adaptive management from local and global frameworks in environmental nonprofit organizations.

Credit Hours: 3

Additional Restrictions/Requirements: Junior/Senior standing required or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 433 - Tree and Forest Measurement

Study of forest mensuration including skills needed to take accurate forest measurements using essential forestry tools. Topics include foundations of forestry; forest ecology; essential tree and forest measurements such as tree age, height, and basal area; and key forestry topics such as tree regeneration, prescribed fire, and forest understory. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Prerequisite Courses: EVS 195, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 440 - Wildlife Field Methods for Conservation

A hands-on course in the tools and techniques of wildlife field methods. Focusing on amphibians, reptiles, birds, and mammals, students learn basic applied wildlife methods employed by conservation and management agencies. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 4

Corequisite Courses: EVS 195, and STT 215 or GGY 222, or permission of instructor.
Course Repeatability: Course may be repeated.
Maximum Repeatable Hours: 8 **Repeat Limit:** 1

EVS 445 - Environmental Conservation

A scientific exploration of conservation theories and practices to understand the challenges of protecting, maintaining, and restoring biological diversity to Earth's many environs.

Credit Hours: 3

Prerequisite Courses: EVS 195, EVSL 195, BIO 366, BIOL 366.

Additional Restrictions/Requirements: Prerequisite course or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 452 - Offshore Energy & Resource Management

Introduction to the fundamental concepts behind offshore energy and resource management. Examination of a range of marine resources, including offshore oil and gas; wave, wind and tidal energy; and marine minerals. Discussion of the historical evolution, technological developments, challenges and potential impacts of each offshore resource. Additional Course Fees: Student Blanket Professional Liability Insurance.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 468 - Hazards, Risks, and Community Resilience

Overview of natural hazards and disasters, focusing on their social, economic and environmental impacts and the complex and interconnected systems affected by environmental and social change. This course also provides an exploration into alternative and sustainable ways to view, study, and manage hazards in the U.S, as well as disaster-resilient communities, higher environmental quality, inter- and intra-generational equality, economic sustainability, and improved quality of life.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing, or permission of instructor.
Course Repeatability: Course may not be repeated.

EVS 474 - Wildland Fire Management

Study of wildland fire management. Focus on the suppression of wild fires and the use of controlled burning as a natural resource management tool. Participation in practical field training including controlled burns. Participants must meet physical fitness guidelines. Additional Course Fees:

Student Blanket Professional Liability Insurance.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of instructor.
Course Repeatability: Course may not be repeated.

EVS 477 - Environmental Site Assessment

Study of ASTM guidelines for environmental site assessment, emphasis on historic overview, regulations, and preparation methods associated with environmental site assessment. Lecture and field trips.

Credit Hours: 3

Additional Restrictions/Requirements: Junior or senior standing or consent of the instructor.
Course Repeatability: Course may not be repeated.

EVS 483 - Fisheries Policy and Management

Overview of fisheries policy and management. Considers important international, national, and regional fisheries, with extended consideration of North

Carolina fisheries. Reviews fisheries management agencies, policies, data sources, trends and issues. Examines common biological fishery models, fishing methods and gear, and fishery regulations. Explores methods for assessing the economic impacts of fishing and the recreational value of fishing.

Credit Hours: 3

Course Repeatability: Course may not be repeated.

EVS 484 - Agriculture and the Environment

Interdisciplinary exploration of the impacts of crop and animal agriculture on terrestrial, aquatic, and marine environments. Topics include natural habitat impacts, sediment transport, nutrient runoff, land conversion, and concentrated feeding operations. Emphasis on building student communication skills and competency in critical analysis of current environmental issues.

Credit Hours: 3

Prerequisite Courses: EVS 195.

Course Repeatability: Course may not be repeated.
Additional Course Fees: None

GGY 340 - Global Change: Population, Resources, and the Environment
